Mr. CELLER. How would the gentleman propose to end a filibuster in the Senate Chamber?

Mr. MADDEN. There is no way to end a filibuster in the other body. That is a part of its royal function. [Laughter and applause.] That is the thing that gives it a standing, whether it be good or bad.

Mr. GIFFORD. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. GIFFORD. As to the short session protecting the people, has the gentleman in mind the failure of the last deficiency bill?

Mr. MADDEN. I am not sure about that.

Mr. GIFFORD. If we had not had a chairman who was courageous enough to take some liberty, the country might have been badly off.

Mr. MADDEN. Somebody had courage enough during the last summer to meet the emergency, and I was that one. There was a great flood in the Mississippi River, causing disaster throughout the States through which it ran. There was need for money and no place where you could get it. There was no appropriation that belonged to the work. The question was submitted to the Comptroller General and he ruled against the authority of anyone to act. The President was afraid to act and the Director of the Budget was afraid to act. It was submitted to me. They asked me what I thought about it. I read the decision made by Comptroller General McCarl. I wrote him a letter. I said if I was in your place I would have rendered the same decision. It is correct; it is the law; but sometimes it is more important to violate the law in a great emergency than it is to obey it. This is one of those times, and I am going to take the responsibility to violate the law and meet the emergency. I said that I would do that and submit the question to Congress for ratification. Congress, of course, ratified, for there was nothing else for it to do. I would be less than human if I did anything else than what I did. It was not done surreptitiously, but openly and above board.

It was done because life and property were at stake. We had the money in another fund, and we borrowed it and paid it back by the unanimous vote of Congress.

I am proud to have been one of the instrumentalities through which the relief was rendered in that important case.

Now, there is no question whatever that a man is just as good a Member of the House during the so-called lame-duck session as at any other session. I think those words "lame duck" is an insult to Members. It is an insult to place any such appellation on them, for they are just as brave, just as patriotic, and just as wise in the short session as at any other time.

Mr. GIFFORD. If the gentleman will permit, the affirmative side of the question has not been argued from that point.

Mr. MADDEN. That does not restrict my right, does it? [Applause.] I am a law unto myself, as you see. Sometimes I am regular and sometimes irregular, but I am always in favor of the best consideration of every problem that affects the American people as it comes to us for solution. I believe the men whose terms have expired who are in the last session, who are about to retire, makes them no less able, no less patriotic, no less interested in the advancement of the American cause, no less concerned about the welfare of the American people, and no less qualified to act. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. JEFFERS. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. WELLER].

Mr. WELLER. Mr. Chairman, a matter which involves an amendment to the Constitution of the United States is of such vast importance and so far-reaching that the proposal must be studied carefully before it is agreed to. The Senate resolutions proposes principally to change the Constitution as to the terms of the President and Vice President and Members of Congress and the time and date when Congress shall convene and Members of Congress shall take oath of office.

If this change or remedy is found to be necessary, of course, it invokes the interposition of the present powers of our regulatory Government. The proposed amendment must be adopted by resolution of both Houses of Congress and then must be submitted to the legislatures of at least 36 States, which in turn must ratify the proposal to become effective, and, of course, the legislature of each State comprises two branches, and some States require an additional referendum by the people when a constitutional amendment is proposed for ratification. To bring this elaborate machinery into working order involves a great deal of time and expense and should only be invoked when a fundamental right is affected or invaded, and the amendment itself is so obviously and universally needed that it requires little contest or argument.

I am not satisfied that the proposals in this resolution are necessary to this extent, nor am I clearly satisfied that the changing of time, terms, and dates is so vital to the preservation of our rights as to warrant taking this action.

We should be slow, indeed, to meddle or tinker with the document that has so thoroughly stood the test of time and has been referred to by that great statesman Gladstone as "The most wonderful work ever struck off at a given time by the brain and purpose of man." There is no doubt that it would be more pleasant and agreeable to have the President of the United States take office and the inaugural exercises take place in the month of May or June than in the month of March, and while some have stated that the month of January is the beginning of the calendar year, it would be well to start the term of Congress during the first month of the year, this argument, however, can be met and answered, because the fiscal year of the United States Government and its departments is as of June 30, and it would be, it seems, just as plausible to argue that the new President and the newly elected Congress should begin their terms on July 1 as it is argued that they should begin their respective terms during the month of January.

The greatest difficulty I find with this is how to handle and meet the so-called "lame-duck" situation and the fact that usually a Member of Congress does not take his seat until Congress is convened, 13 months after the election, and there is no question that there have been many abuses.

Members of Congress who have been rejected by the voters at the polls should in good conscience after such rejection limit their activities to the will of the people and to the legislation which controls the election. I find that the lame-duck argument is actually offensive, although not fundamentally wrong, and therefore I do not advocate amending the Constitution solely to meet the lame-duck situation, but, rather, to enjoin upon Congress and its Members to do and aid in enacting legislation in the light of the Constitution and of the verdict at the polls, letting each Member of Congress and of the coming Congress constitute himself a minuteman to see that such opinions and judgments of rejected Members of Congress are weighed in the light of the present status and even may be discounted to some extent.

As to the suggestion made by the gentleman from Alabama [Mr. BANKHEAD] that we also amend the Constitution to provide for a four-year term for a Member of the House of Representatives instead of the present constitutional two-year term, I can not concur or give my approval. It is no doubt a hardship and a burden upon a candidate to make a campaign each two years. It is expensive to the candidate and it is expensive also to the various States and districts to hold these frequent elections, necessitating the elaborate machinery being put into action of the respective districts, but I find that this, too, is not fundamental and that the men of 1789 who argued and disposed of this question in the Constitutional Convention decided for all time that the House of Representatives should be the House representing the people and the Members of the House should be close to the people. Members of the House should frequently go before their constituents and give an account of their stewardship of the office and the work that they have done in their behalf, so that the constituents, if they are not satisfied with their Representatives, may have the opportunity of making a change.

It is the greatest check upon the life of the Republic to have the Representatives of Congress in constant contact with the people of their district, and a four-year term to lengthen the tenure of office might tend to minimize the watchfulness and vigilance of a Representative. The theory of our Government and the Constitution is that the Senators would be elected by the legislatures, and the Senate represents the sovereign State as distinguished from the House, representing the people. Many criticisms were leveled at this method of selecting Members of the Senate, and hence the constitutional amendment which was passed provided for a direct vote of the people in senatorial elections.

With reference to the proposal in the resolution to convene Congress on January 4 and the inauguration of the President on January 24, it would seem that this would leave 20 days for organization of the House of Representatives, the election of a Speaker, and the assignment to committees, but at the same time we would also have during this period a lame-duck President, who, of course, may not be in political sympathy with the Congress and its Members. Under these circumstances, 20 days would be sufficient to organize the House; but in case a question may arise when there would be a contest in

the selection of a Speaker or as to the committee assignments which would not be disposed of in this time, we can see that in either of these proposals there might be a filibuster which would make it disastrous. Therefore it does not appeal to my judgment that there should be any change in the Constitution in this respect. There would also have to be a count of electoral votes and also the election of the President in case the election was thrown into the House. All of which would take a good deal of time and might not be completed before the term fixed for inauguration of President on January 24.

As things are now, we know our Constitution and realize its strength, and we feel that we are in a better position as things are than to change a document which has world-wide approval as the most liberal and satisfactory guaranty of liberty.

The great document of our Constitution is not ideal, but it has worked very satisfactorily, and these proposals are not of such magnitude or dignity to warrant changing the elaborate machinery. In my judgment, if this resolution passed the amendment would not be adopted by the legislatures of the United States; it would be rejected. [Applause.]

Mr. WHITE of Kansas. Mr. Chairman, I yield 20 minutes to the gentleman from Massachusetts [Mr. LUCE].

Mr. LUCE. An analysis of the discussion hitherto indicates a preponderance of opinion in favor of the purposes of this measure. It discloses also much uncertainty in matters of detail, and the accomplishment of the chief object will be thwarted unless gentlemen remember that compromise and concession are of the essence of legislation. Somebody has said that all legislation is the second best, which means, of course, that it is never possible to get perfection; and in this instance, unless those who are so strongly favoring or opposing this or that detail will yield to the necessities of the case, we may lose the important object. I would, therefore, remind you that there will be a committee of conference on this resolution, which will give due consideration to all these matters of detail, and should the House not favor its report, the House may then take appropriate action to uphold its views.

Analysis of the debate also shows that but one or two speakers have raised the question of the purpose the framers of the Constitution had in mind. It was argued that they meant to provide a time during which the passions of men might subside and a better perspective of the public needs be secured. This is quite contrary to the facts. The present schedule is wholly a matter of accident. The Congress learned in September that enough States had ratified the Constitution.

Its members desired an election at the earliest prudent moment, which they decided would be the first Wednesday in January. Next they wanted the Electoral College to meet as soon as possible, and they decided it should be on the first Wednesday in February. Then they wanted the Congress to assemble as soon as possible, and they decided it should be on the first Wednesday in March. By beginning terms on that day the present schedule became practically inevitable, but no thought whatever seems to have been given to this. So it was wholly accidental that the present program was imposed upon the Republic. No other country in the world has such a program. Even in England, conservative of nations as she is, no such argument would ever be advanced as was presented on the floor of this House in the matter of the purpose of the founders.

And what happened after the Constitution was accepted? Up to the Civil War nearly one-half of the States provided for elections in the odd years, so that the period between a man's election and his return to receive the judgment of his constituents included all of his actual service. It is neither historically right nor philosophically right to oppose this amendment on the score of what the fathers had in mind.

The objections have been chiefly to the details of the schedule. Let me very briefly comment on them. First, it is complained that once in every four years the House may be brought together earlier than is necessary by reason of the 20 days' proviso. My own State, following the example of California, has put into its constitution a provision for the very purpose of permitting an interval between the organization of the legislative body and its active functioning, in order that the committees may without interruption, without the necessity of appearing on the floor of the house, deliberate and decide as far as they may. It would be a gain to the Federal House if even once in four years its committees might have that interval to study the problems before them.

Fear is expressed lest in the January, when the choice of President might be thrown into the House, its organization might be so delayed by a deadlock over the election of a Speaker that the 25th day of the month might find the Nation without a President. This mischance could be easily avoided by the resort already used on two occasions—the adoption of a special rule for choice by plurality after a certain number of ballotings. Can it fairly be assumed that a House would not use common sense in meeting such an emergency?

Objection has been raised by the distinguished chairman of the Committee on Appropriations [Mr. MADDEN] in the matter of the public finance. He has intimated to the House that it would be unfortunate to take away barriers that prevent the House from acting. Sir, I fear he underestimates the esteem in which we hold him and hold his committee. I fear it is his modesty which prompts him to intimate to the people of the United States that it is not safe for the Legislature of the Nation to function. We know that in him and in his committee we have a safeguard and protection against extravagance, which makes every argument that he offered on that score ineffective and vain.

It is further objected that there will be difficulties by reason of the termination of the session on the 4th of May. Why, sir, it is but necessary for the President to call us together on the next day without any of the task of organizing, electing the Speaker, and choosing committees, without the many days of work caused by the necessity of beginning over again with a clean slate. Immediately the House may function.

But let me go quickly to other objections. One is that there is no public demand for this, and that it is a matter of propaganda—recent propaganda. Why, sir, ever since I could read I have read the protests offered against the 4th of March as inauguration day—quadrennial protests on the ground of danger to health and of discomfort to all concerned, by reason of everything the month of March brings that is unsuitable. I remember my first visit to Washington. I was brought here as a small boy to see the second inauguration of General Grant.

I was attacked with one of the ills of childhood, and so inclement was the weather that I had to watch that procession from behind windowpanes. Although I was not here at the time of the inauguration of President Taft, I remember the accounts of the blizzard which raged and I know that the papers throughout the country then demanded that we no longer subject our public servants to the menace of such a day.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. LUCE. Yes.

Mr. TILSON. I wish to inquire of the gentleman if January 24 is apt to be any better?

Mr. LUCE. January 24 is likely to be so much worse that there would be no attempt to endanger our health and lives by outdoor exercises. It has been common knowledge in Washington for many years why this reform has been delayed. The reason may be found in the mercenary instincts of some of the business people of Washington—the hotel men, the handlers of excursions, the shopkeepers, who year after year have opposed this salutary and desirable reform.

Of course, these are trivial things compared with the great principles that are involved, yet they are not to be ignored.

I wish also to call your attention to two or three other personal considerations. First, the hardship upon Members who are unable to have a definite idea as to the periods during which they will stay here, in matters of buying or renting houses, the bringing of families, the education of children, and so forth. The Christmas recess is a source of inconvenience to all of us. Those are petty details, but still may be thrown into the scale for what they are worth.

There is a more serious consideration to which I would address myself, namely, the argument that there is no public demand for this change. I am a member of the American Bar Association, together with more than 26,000 other lawyers in this country. It was in the year 1917 that this association first took up the study of the subject.

In 1921 they voted in favor of this proposal and appointed a special committee to push it along. The chairman for some years was a man I knew well, he having been a classmate of mine, a lawyer of Boston, eminent in his profession, conservative by reason of his surroundings and tendencies, earnest in his championship of this measure. A judge of the Federal court in my own State joined with him in urging upon me this reform. Year after year that special committee has advised this change, and the Bar Association has approved. That body, I may say, is probably the most conservative organization in the United States. The most serious and conservative body of men that you could select has again and again asked Congress to do this thing.

Yet you say it is a matter of temporary agitation and propaganda. I deny it. The Congress of the United States has been asked to do this thing for years and years, and the growing demand for it has at last brought this measure to the floor of the House. [Applause.]

Let me mention a more serious consideration still, that of the public business. Gentlemen in the course of this debate

have said that no harm has come from the present system. At least one member has demanded that somebody point out wherein the country has suffered. Is his memory so short? Is your memory, gentlemen, so short? Mine can go back to the 4th of March only one year ago and to my anxiety when I stood on the floor of the Senate and watched the black clouds over the legislative sky. That anxiety was never to be forgotten. Suddenly the clouds broke and the sun shone through. The Senator who was blocking action desisted for a few minutes, and with some others the bill in which I was so keenly interested slipped by.

But let me remind you of other bills of more consequence that did not have such fortune. The filibuster caused the loss of the public buildings bill, which by this time would have been distributing $100,000,000 among the thousands who to-day hunt for employment and find it not. It prevented final action on the emergency Army officers' retirement bill, and so deprived for still a year longer many an incapacitated man and his family of the help the House had by overwhelming vote decided to give. It kept uselessly in the vaults of the Treasury for still another year the hundreds of millions we have now voted to return to alien owners. Many another righteous measure failed of enactment. We of the House had sent to the Senate 428 bills and resolutions that were prevented from becoming law. Think of the effort wasted by the committees of the House, the time lost here on the floor, the harm done to innocent sufferers by delay of justice, and then tell me if such things call for no remedy.

Mr. WELSH of Pennsylvania. Who was responsible for that? Was it the rules of the Senate or the Constitution of the United States?

Mr. LUCE. It was in the last analysis because of the too-short period for the Senate to do its work.

Do you want to know why the Senate has four times passed this resolution almost unanimously? It is because the Senate knows that its work can not be done in three months. Look where we are this year on the 8th day of March. The appropriation bills have not been passed yet.

Mr. MADDEN. Will the gentleman allow me to correct him?

Mr. LUCE. Certainly. I am always anxious to be corrected at the moment.

Mr. MADDEN. The appropriation bills are all over there but one.

Mr. LUCE. My intent would have been clearer had I said they were not all over there as yet.

Mr. MADDEN. They are all over there but one.

Mr. LUCE. The gentleman and I have no quarrel, and yet he takes my time. But he is welcome to all of my time if he wants it, so much do I admire him as the appropriations leader of this House.

But I crave for opportunity to tell you about the failure of the deficiency bill. Because of its failure, there was no money for the payment of the salaries of judges; there was no money for the juries; there was no money with which to pay pensioners; and there was no money for loans on adjusted compensation. In many directions there was hardship. There is hardly a day goes by that demands are not coming into the office of Massachusetts Members for more work for our navy yards, and the reason for that is the failure of the second deficiency bill. Men out of work and men suffering.

Let me tell you another thing to illustrate the perils of the present situation. A veterans' hospital bill went to the Senate last year and should have been acted upon. There was an evident, immediate, imminent need of at least 2,000 more beds for the sick veterans of the World War. That bill failed, and now we of the House have to do all that work over again. Far, far worse, by reason of the failure of that bill more than 2,000 crippled, disabled, suffering veterans of the World War will have been delayed one year in the receipt of the attention that the Nation ought to give to them in its own hospitals.

Sir, it is said that the filibuster would not be prevented if we were forced to adjourn on the 4th of May. But I have already pointed out to you that a special session can be easily secured whenever needed. I will also point out to you that we will have extended the life of the short session by one month—by full one-half if you take into account the Christmas recess—which is the opportunity the Senate desires to do its work. At any rate, by so much will we limit the power of the filibuster.

In a long debate like this it is almost impossible to present any novel proposition, but I have one that has not been brought to the attention of the House, and I think it has not even been suggested publicly or privately. Let me point out to you that at present we are prevented from functioning, save with the permission of the President, for 9 months, the first 9 of every term, so that out of every 24 we have only 15 available for our work upon our own initiative. Under the new schedule that period of possibility is extended by 3 months, so that we will have 18 months instead of 15 during which we can follow our own judgment as to sitting in order to legislate for the benefit of the country.

There has been much discussion as to the right of constituents to be represented in this House as may be shown by a majority of their votes. I believe in that right. Next fall I am going on the stump, in company with every other man on my left here, and tell my people the reasons why the party to which I belong should be returned to power. The men on the right are going to set forth reasons why it should be rejected. They may prevail or we may prevail. In either case, how can the winners justify themselves by putting a limitation on the things they have promised to do, saying they will not attempt to do them for 13 months after the people have given them their confidence?

Why have platforms if we intend thus to postpone the time for them to be put into effect in the hope that our pledges will be forgotten and that we need not act? How much better the practice of the rest of the world where, when a majority of the people have declared their desires, immediately the new principles are brought into operation!

You quibble about the time the President would have in which to prepare himself. The newly chosen Prime Minister of England has but two or three days. So it is with the Prime Ministers in Canada, in France, in Germany, and over all the rest of the world. A gentleman who puts forth that proposition here has himself been the governor of one of the States of this country, and he had but two months to prepare himself to be governor. There is not one of the 48 States that attempts to follow a program like ours that demands such a delay as is here incurred. In not one of them is it planned to keep a defeated man in office any longer than can be helped.

Because I believe the will of the people should be promptly put into law, because I believe the majority of the people should prevail in the enactment of legislation, because I believe that the representatives they send into this House should have the earliest practicable opportunity to vote as they have promised they will vote to carry into effect the measures they have advocated, I hope the principles of this resolution may prevail. I hope the proposal as it stands may go to the committee of conference. I hope amendments will not so confuse that we shall lose sight of our main object, which is to correct the unfortunate results of an accident, results that can not be justified logically, results that I am confident are unsatisfactory to the majority of the House, as I am sure they are to the majority of the people of the United States, results that make for inefficient legislation, results that make for hardship to all concerned, results that are bad for the welfare of the country. [Applause.]

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. JEFFERS. Mr. Chairman, I yield 14 minutes to the gentleman from Texas [Mr. SUMNERS].

Mr. SUMNERS of Texas. Mr. Chairman and gentlemen of the committee, the matter of proposing a resolution for the amendment of the Constitution is too important a matter for the interests of the individual Member, for the interests of the party, and certainly for the interests of a group to be considered.

I shall endeavor in the time that is allotted to me to analyze the situation as it presents itself to us, conceding to each gentleman on the floor of this House the purpose to cast that vote which will reflect his judgment as to the best interests of the country.

Some confusion has arisen here, it seems to me, judging from the statements of gentlemen, as to what the framers of the Constitution did in regard to the sessions of Congress. The fathers did nothing with regard to the sessions of Congress. The fathers provided that the legislative responsibility should rest with the Congress, that the period of their service should be two years between elections; they should meet on the first Monday of December unless the Congress otherwise determined. This is the entire Constitution with reference to the sessions of Congress. Some very remarkable statements, it seems to me, have been made in connection with this consideration. We have heard much about cooling time between the election and the beginning of service, and, strange as it may seem, this resolution embodies a restriction upon the length of a session of Congress.

There are a number of different sorts of governments in the world. Ours is that government which began, in so far as we have history, in the forests of Germany. It is a popular system. If we forget the nature of our system of government, gentlemen, we can not wisely proceed in matters of this sort. Ours is a government of the people. There are no kings, no hereditary rulers, in this country. If we fail, if the people do not have the capacity to select their public officials, or if these public officials when selected do not have the ability and the courage and the statesmanship to stand against improper pressures and represent the best interests of the Nation, our sort of government fails. It depends not upon written constitutions but upon the virtue and governmental capacity of the people.

I want to make another suggestion, and I can, of course, only touch the high points here. Gentlemen are afraid the people will make mistakes. They are afraid to trust their newly elected Representatives.

Gentlemen, in my judgment that policy is an unwise policy which would attempt to protect the people against the possibility of making mistakes even. In this Nation of ours it is the people's Nation. They have the right to make mistakes. They can have no guardian. Only through mistakes which they make and the wisdom which they get from experience do people become wiser and wiser as the generations go on. The time is too long now between election and beginning service.

Under the existing methods a Member takes office, begins work, as has been stated, 13 months after he is elected. This resolution proposes two months between election and service. Gentlemen object to only two months intervening because they say there is not cooling time. What a reflection upon persons who come to take their place here. Why, that is just about the right amount of time, even if they were hot at election time. A Member has been through his campaign, he has been considering public questions, he has had two months to wind up his business and come on here without having to loaf around his home for 13 months and become an eyesore to every man in the community. [Laughter and applause.] If people elect a man to office, they want him to get on the job, and if he can not cool off in two months in the middle of the winter, put him in a refrigerator for two months. After the people have defeated a Member of Congress it is in direct conflict with the philosophy and the fact of representative government for him to continue to hold the office of their Representative. [Laughter.] I want to vote for this resolution. I hope the limitation upon the length of the last session, contained in section 2 of this resolution, will be stricken out, so that I will be able to vote for the resolution.

Why that restriction in the Constitution now? The framers of the Constitution did not incorporate any restriction. The business of Congress is growing with the growth of the country. There is greater need now than ever, and we are still growing. Section 2 provides for the termination of the last session by the Constitution—by the language of the Constitution—on the 4th day of May. Under the existing Constitution, in so far as the Constitution is concerned, Congress convenes and adjourns when it chooses; I mean in so far as the Constitution is concerned.

It is now proposed in section 2 that the discretion and the judgment of the Congress its own control over its time shall be limited by the language of the Constitution. Members say if there is need of more time the President can call an extra session. It is a remarkable fact that Members of Congress on the floor of this House, in the face of the philosophy of our system of government, which divides our Government into three coordinate branches and puts the legislative responsibility upon the Congress, now by their own act would submit the suggestion on amendment to the Constitution that if, after we have been in session for four months and the legislative business of the country has not been attended to, then we shall have to depend upon the President to convene us in extra session in order that we may discharge our constitutional duty.

Think of this, gentlemen. Self-respecting Representatives of a great people, upon their responsibility as Members of the American Congress suggesting to the people that the sole power be put in the hands of the President of the United States, and the responsibility there of calling us back like young children to our task if the work has not been finished. I am not trying to discuss the entire resolution.

There are three different sorts of provisions in the Constitution: Those provisions which delegate power, those provisions which are provisions of reservation and of limitation, and then those provisions which establish and provide for the operation of the functioning machinery of the Government. To cut off all succeeding Congresses from the right to take more than four months to discharge their constitutional duty or to place any other such limitation upon the judgment of those who will come after us in responsibility is poor statesmanship. It violates every conception of free and responsible government. Neither wisdom nor patriotism will die with us. It is unwise, it is contrary to the nature of a system of popular government, that a generation or a Congress, in responsibility, should undertake to put into the Constitution of the United States provisions which limit the sound judgment of those who may come after us in responsibility as to how long a time they ought to have in which to do their work. [Applause.]

No gentleman will say that it is wise in the organic law of the country absolutely to limit the power of Congress in the second year to legislate only through a period of four months. But gentlemen say the President can call the Congress in extra session. Think of that. The legislative responsibility rests here. It is here now. The Constitution puts it here. But this section 2 would take away from Congress control over eight months of the last year. If the session ought to be limited, Congress can limit it by legislation.

Mr. MOORE of Virginia. Will the gentleman permit an interruption?

Mr. SUMNERS of Texas. Yes.

Mr. MOORE of Virginia. Does not the gentleman think it is very absurd to attach any such limitation to a session with the business of the Government constantly increasing?

Mr. SUMNERS of Texas. It is the height of absurdity. People sometimes laugh at the Congress. That is not good for the country. For the sake of the Nation, Congress must hold the respect of the country. We will pass on, but the Congress must go on as long as our Government lasts. Its necessary independence must be preserved, not for its own but for the country's interest. How can you expect the country to have respect for a body of men charged in the Constitution with legislative responsibility who says to the country, as in this proposed amendment, "Tie our hands so we can not sit in Congress more than four months during the last session, and leave it to the wisdom of the President of the United States only whether or not Congress shall have further time in which to discharge its constitutional responsibilities"? [Applause.] No wonder they laugh at a Congress like that.

Mr. GIFFORD. Will the gentleman yield?

Mr. SUMNERS of Texas. Yes.

Mr. GIFFORD. Have not we in the last hundred years lived under the same condition with Congress forced to end by limitation on March 4?

Mr. SUMNERS of Texas. When we come to submit a resolution proposing a constitutional amendment to correct an evil, then do we have to put up a second evil to choose between, when we are master of our own fortunes, destiny, and responsibility? We are masters of the situation. We have the power, and I appeal to you as Representatives of the American people not to say that the people can not govern in this country through their chosen Representatives. I challenge history for any proof that my people and those from whom my people have come—although they may have made mistakes—have not made a supreme demonstration of the ability of the people to govern. [Applause.]

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. SUMNERS of Texas. Yes.

Mr. MOORE of Virginia. It seems to me the answer to the gentleman from Massachusetts is that we have the power to make a session begin at 12 o'clock noon on the 4th of March instead of the first Monday in December. I am unalterably opposed to constitutional limitation upon the power of officers to do their work.

Mr. SUMNERS of Texas. This Constitution did not come from the fathers as its source of origin; it came from the experience of ages out of the governmental instinct and the developed governmental capacity of the people. Have we reached that time in this country when we are unwilling to trust to the capacity of the people? If they do not have it, they must get it, and get it in the school of experience. They need no constitutional guardianship.

Talk about a cooling time and all that sort of rot as though the American people and their ancestors through the ages have not demonstrated governmental capacity and have to have somebody fanning them for three or four months before they can begin after an election. [Laughter and applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. JEFFERS. Mr. Chairman, I yield 10 minutes to the gentleman from South Carolina [Mr. STEVENSON].

Mr. STEVENSON. Mr. Chairman and gentlemen, it might be well for us to take a glance at the reasons that are put forth for the proposed change in the Constitution. First, that it will dispense with the short session, known as the lame-duck session. I do not propose to waste any time on that, from

the lame-duck standpoint. The distinguished list of men who have been enumerated has shown that they are not dangerous. The gentleman omitted to state on two occasions Uncle Joe Canon was rejected by his constituency and became a lame duck. Yet nobody could question the patriotism of Uncle Joe, and never did.

You might look in the chair and see the distinguished Speaker, a statesman who by a paroxysm of politics at one time was made a lame duck for one Congress. But he came back here and is known as a statesman. So we will throw that aside. The first thing is to get clear of the lame-duck session.

The next was to provide another time for the meeting of Congress. Let us see what we can do. It is well enough to know what we can do. These are the two principal things. Then we have to provide for a method of counting votes and declaring elected the President and Vice President different from the present method and safeguard the possibility of a death between the time of the vote and the time the vote is declared. What can we do as it now is?

Those are the three things we want to do—make more safe the declaration of the election of a President, make sure that Congress meets a short time after it is elected, and make sure that the lame ducks are eliminated. Congress can now provide that a Congress elected the first Tuesday in November can take office and begin work and begin its session on the 4th day of March, if it sees fit. It has done it. A reference was made a while ago to what the fathers had done. Did you know that the reason your term begins on the 4th of March was because the Continental Congress directed that the first session of the Congress begin on the 4th day of March, 1789? So the fathers established that, and all congressional terms begin at that time, and for all time they have run for two years under the Constitution, and, therefore, terminate at 12 o'clock on the 4th day of March.

Congress can fix the 4th day of March; and in 1869, for instance, the Congress in January passed an act that the succeeding Congress should meet at 3 o'clock p. m. on the 4th day of the next March, and it so met. Congress has also provided that the Congress meet on the 15th day of October, and time and again it has done that. It has provided that it should meet on the 4th day of January, and Congress so met; but after all, in the experience of 140 years Congress has come to the conclusion that the time named in the Constitution is best and they have abolished all of these other periods and have left it there to start on the first Monday in December or upon the call of the President.

So that you do not need this proposition in order to have the Congress meet earlier after their election. You could do it in four months if the Congress had sense enough to require it and consider it good statesmanship to do it. That is all there is to that.

Take the other proposition, the matter of the election of the President and the Vice President. Some one a day or two ago said there might be a death, that the nominee of the Republican or the Democratic Party might be voted for in the Electoral College and elected, but die between that time and the time of the declaration, and that there was no provision for electing somebody else. That may be true, but is it any trouble to fix that? At the present time the electors are required to vote on the second Monday of January, and the vote is declared on the second Wednesday of February. If there is so much danger of a President dying between the time he is elected by the electors and the election is declared, just move it up; and Congress can do that, it is expressly authorized to do it, and it has fixed the dates now fixed, and you could put it one week before the declaration of the vote in the House here, and with the present methods of communication and transportation the votes can all be here and be declared, and you would have to take a chance of only a week, and almost any life insurance company would take a chance on the life of the President elect for a week.

I shall take up now what my objections to this change are. It is proposed to put into the hands of the Congress that is elected in the same struggle with the President the power to declare the election of the President. You have had contests in the past, and you may have them in the future. Take a Congress elected the first Tuesday in November, and let us say that there are contests as there were in 1876, when in three or four States the seat of every Member was contested, and there was also a contest as to the presidential vote.

Take that case, for instance, suppose the Congress elected in 1876 had come here with those contested Members, most of whom were excluded afterwards, all seated and helping to declare the election in 1876 of a President, when there was only 1 vote between the candidates, and you would have committed to the people who are most interested in the controversy the determination of the controversy; whereas if you have a Congress whose membership is already determined and the seats have been assigned, a Congress that is held over, with everything certain, the people will accept their verdict without question; and in the other contingency they would not. I well remember as a boy hearing of the electoral commission when it was rigged up here, which down with us we thought did not do right by us. My own brother, who had participated for the first time in an election that year, was reading the account of how the commission was named to my father, who was a very conservative man and profoundly in favor of Mr. Tilden for President. My brother remarked that it looked as if they had fixed it up so that the Republicans would have 1 majority every time. My father then said, "Let me tell you something. We are face to face with a very serious situation. I have been through one war. I do not want another. The people need certainty rather than political advancement. They have fixed it so that there will be no doubt about a determination that will settle this without a war, and we would better have that than political advantage or war or a revolution or a riot as the result of it." For the same reason I say that the old Congress should be here with its commission unquestioned, with every man here entitled to his seat by the action of this House to declare the election of a President, rather than a crowd with a lot of their seats contested, brought in in the same paroxysm and upheaval with which the President has been elected, seething with partisanship. They would not appeal to the sober sense and confidence of the people of this country like a Congress that has already been properly seated and vouched for. It should take more than political expediency to justify changing our organic law.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. JEFFERS. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. ROMJUE].

The CHAIRMAN. The gentleman from Missouri is recognized for five minutes.

Mr. ROMJUE. Mr. Chairman and gentlemen of the committee, the Constitution of the United States ought never to be changed as long as there is a reasonable doubt about the advisability of that change. The gentleman who has just left the floor, the gentleman from South Carolina [Mr. STEVENSON], has, I am sure, brought to your attention some very vital points in this resolution. So far as changing the date of the time of the meeting of Congress is concerned, he has correctly explained to you that that can be done without any constitutional amendment and without the passage of this resolution.

If that question were all that is involved in this resolution, gentlemen, I would have no objection to supporting the change; but that by legislative enactment and not by constitutional amendment. But there are also other matters involved in and connected up with this question which have no place whatever in a constitutional amendment. And what are some of those things? In the first place, you provide by this resolution that under the change Congress shall assemble on the 4th day of January. The Members of the Congress will commence serving their constituents at that time and on that date. The President of the United States does not begin his service at that time, but he is to begin 20 days later, to wit, on January 24.

Now, why? What will happen? With a new Congress coming in, my friends, practically one month will be lost. Why? Because when the new Members come here under the provision regarding the 4th of January, the outgoing President will say, "I am to retire in a few days; I am to go out of the President's office on January 24; I do not wish to submit any message to this incoming Congress; wait 20 days until your new President is coming in." And so for 20 days the Congress sits here idly waiting for the new President to come in and deliver his message. So that after all, when by this resolution you extend the time from the 4th to the 24th of January, it means an extension of but one month more. Under that regulation you have lost almost a month due to the regulation itself, and, on the other hand, where formerly and as at present Congress begins in December and may run on if it wishes until the next December, under the new rule you will, by the manner I explained a moment ago, reduce your time of effective service from 12 months to 11 months, because the incoming Congress will have to wait 20 days for the incoming President, which amounts to nearly a month.

Mr. O'CONNELL. Mr. Chairman, will the gentleman yield?

Mr. ROMJUE. Not now. My friends, the purpose in the formation of this Government and the very basis on which it was founded was to represent and protect the people of this country in their fundamental rights and liberties, and that being so the fixing and division of terms was so arranged that this lower House of Congress should have frequent contact with the people of the country.

Now, I assume that it is as important for the Representatives of the people to know what the people think and what the people want, so that the Congress may thereby be the better able to give them the proper service. But what do you in this resolution? Ah, my friends, every two years every Member of this House is up for election; he goes back to his constituents to discuss, during the campaign, the questions that are foremost in the minds of the people. You talk about being unemployed, that is, after you are elected, for a few months. Under the resolution now asked to be passed you are limited just as much as at present as to the length of the two sessions of Congress, except for one month, and 20 days are lost in that. My friends, there is nothing more important to the Members of this House, and there is certainly nothing more important to the people of this country, than that the Representatives of the people put in some of their time in close contact and close association with the people whom they represent, so as to know the needs and wishes of the people and to discuss with them and get their personal views as to what they want done. But under this resolution, if it is put into the Constitution, what happens? Ah, my friends, you have taken away that time when you are not in a political campaign, and by this resolution you have tied yourselves up in this body, so that you are deprived of the privilege of conferring with them as you now have the opportunity to do, and then by constitutional limitation you say, "You are to return home to your constituents." When? Only when we are up again for our election, and when a man's attention is diverted to his campaign instead of being devoted entirely to the transaction of the public business.

The terms of Congress should be left so that when they expire the term of the President would also expire, except, of course, that his term is four years, while that of the lower House of Congress is two years and that of the Senate is six years, so that when the President's term of office expires it will be on the same date of the expiration of the term of the Members of the House and one-third of the Senate, because, as I said before, if the terms of the Members of the House and Senate are made as this resolution provides—to begin 20 days before the President takes his office as President—they would merely be compelled to wait the 20 days for the President to deliver his message and to outline the legislation he deems advisable for the country, and that time would practically be time wasted, almost a month. So even if this resolution were to be added as an amendment to the Constitution, under its present terms it would be in fact on the 24th of January that the President would come in office, and it would be practically the 1st of February before the President and the House and the Senate could settle down to business, which would only mean advancing the matter about five weeks, as that would be the difference between the 24th of January, as this resolution provides, and the 4th of March, which is the date of the present expiration. So, after all, it would only accomplish very little.

Moreover, under the Constitution as it was originally written by the wise and sensible statesmen who were present at the formation of the Government they left it so that dates of the beginning and ending of any session of Congress may be changed or fixed by an act of Congress without any constitutional amendment, and I submit it is a dangerous practice to be changing the Constitution of the United States by a constitutional amendment, and particularly so on matters that could be remedied, if there is need for remedy, by the passing of a law, because if a law is passed and placed on the statute books of our country, if it proves unsatisfactory, it can be promptly repealed, but if a matter is written into the Constitution of the United States it can not be changed except by going through a process of tedious work in bringing it about, and, as a matter of fact, up to the present time, there has never been a constitutional amendment taken out of the Constitution once it has been written in.

Some who are in favor of this resolution say that the 20 days' time between the beginning of the term of Congress and term of the President will give time in the event that the election of the President is thrown into the House of Representatives, there to be settled. I want to call attention to the fact that while this wonderful Government of ours has been in operation for now approximately 150 years, only about three times, as I now recall, has the election of the President been thrown into the House of Representatives to be settled. First, it occurred when Mr. Jefferson was elected President the first time. The House of Representatives determined who should be the President, and strange to relate the deciding vote was cast by Alexander Hamilton. Second instance was when Andrew Jackson ran for President the first time. While he received more votes for President than any other one, he did not receive the required number of electoral votes to seat him as President, and when it was thrown into the House of Representatives to be settled that time John Quincy Adams was elected. Henry Clay, who had been a candidate against both Jackson and Adams, threw his influence to John Quincy Adams, and Mr. Adams was elected, and Mr. Clay himself was selected by Mr. Adams as Secretary of State. The third instance, resulting in some little difficulty in the selection of a President, was the contest between Hayes and Tilden, and this case was somewhat different from the other two and finally determined by a commission designated for the settlement of that contest. So neither of the first two cases, which were the two only strictly clear cases presented to the House of Representatives, caused any particular confusion, and the Government under its present form of Constitution has operated in a very satisfactory manner, so far as this problem and many others are concerned, and I think it is a dangerous thing to forget the wisdom of Jefferson, Madison, and Franklin, and other great statesmen of their time, who rendered such great service in drafting and giving to the people the great Constitution which they aided so much in framing for us.

Of course, we can find an individual now and then at the present day who thinks the ideas, thoughts, and works of such men as Madison and Jefferson could be fairly eclipsed by themselves. When we meet such a character, however, it is well worth our time to ponder long before taking their counsel and advice.

Some have argued that January 24 would be a better date to inaugurate a President on account of the weather on the 4th of March. My opinion is that we are apt to find in this country of ours more severe weather on the 24th of January than we do on the 4th of March, so I really see no sound argument for the change of the date for that reason. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. JEFFERS. Mr. Chairman, I yield five minutes to the gentleman from Minnesota [Mr. KVALE].

The CHAIRMAN. The gentleman from Minnesota is recognized for five minutes.

Mr. KVALE. Mr. Chairman, we have waited and waited for eight long years for a chance to vote on this resolution. And why do we have that opportunity now to express our wishes? It was said here that the press is responsible for it. I grant you that may be the case. In that event, then, let us thank God for the press and hope that it may function along the same line in many other instances.

But why has there been such pressure brought to bear upon Congress by the press of the country? It is because they in turn are responsive to the demands of the people, and those demands have been brought to the attention of Congress by the people all these years and have been denied. By whom? By a majority of the Members of this House or the Congress? Not at all. During all these years a majority of the Members of this House has been in favor of the Norris resolution, but the leadership of this House has denied us the opportunity to express our opinion and our vote on the subject. That is well known, and the injury spoken of by the gentleman from Massachusetts [Mr. LUCE] to the crippled soldiers of this country, and many other instances that might be mentioned must not be laid at the door of the Senate and its filibuster last June, but should be charged to the leadership of this House, consisting of three men. They are fine men and I do not in any way question their integrity or their patriotism or their sincerity. Our viewpoints differ; that is all. But these three men, the Speaker of the House and the majority floor leader and the chairman of the Committee on Rules—these three men have prevented this House from having a chance to vote on this proposition all these years.

Mr. O'CONNELL. Will the gentleman yield?

Mr. KVALE. Yes; I yield.

Mr. O'CONNELL. How did we get it up now?

Mr. KVALE. We got it up because they did not dare block it any longer. That is the only reason we got it.

Mr. CELLER. Will the gentleman yield?

Mr. KVALE. Not now, please. We have it now, as I say, because they have yielded to these demands, but in yielding to these demands to give the membership of this House a chance to vote upon it, I am afraid there is a joker in it. I refer to the limitation of the short session of Congress. By doing that you are inviting the filibuster just as much as you are at the present time. It is true that a filibuster is not always an evil.

There are instances in the history of the Senate when one man, the elder La Follette, of Wisconsin, by a filibuster saved the taxpayers of the United States over $900,000,000, and there may be other instances. But these are exceptions that prove the rule. In the vast majority of cases the filibuster is a nuisance and is an injury to the country, and I am very much afraid that by placing this joker in the bill you have made it

possible to repeat these instances of the filibuster. I now yield to the gentleman from New York.

Mr. CELLER. I did not want to interrupt the trend of the gentleman's thought, but I would like to get his views on this proposition: What does the gentleman think of having a ratification by the States made by conventions convoked in the States rather than by the State legislatures?

Mr. KVALE. Oh, of course, I would like to have the people have their say on all amendments to the Constitution.

Mr. CELLER. In other words, the gentleman is in favor of that method; that is, by the convocation of conventions in the various States for the purpose of ratification?

Mr. KVALE. No; I am in favor of as representative a ratification as possible, but if there is any movement started to make it more difficult to change the Constitution, then I am opposed to it. [Applause.]

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. WHITE of Kansas. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. SNELL].

Mr. SNELL. Mr. Chairman and gentlemen of the committee, I had not intended to say anything in regard to this proposition, but the more I have listened to the debate and the more attention I have given to it the more important I think it is that each one who is opposed to this proposition should express that opposition on the floor of the House.

I appreciate very well that the proponents of this measure are opposed to having the lame-duck proposition presented. I also appreciate that my friend from Tennessee looks at the whole proposition perhaps differently than the average American citizen does. Regardless of any interpretation he may put on this, I feel that the average citizen throughout this country interprets the whole proposition from the standpoint of the individual Congressman who comes here and passes on laws after he has been defeated for reelection. You can say what you please, but if it had not been for the significant application of those two words, lame duck, the propaganda that has been spread throughout this country would never have been one-half as effective as it has been, and if it had not been for that propaganda I doubt whether this proposition would be on the floor at this time.

Some reference has been made to foreign governments and that they do not follow our plan. As far as I am concerned that does not make any impression on me whatever, because our form of government is entirely different from their forms of government. We do not start with the same premise and, of course, we do not follow along the same direction. The fact that they do not wait so long a time before a new government expresses itself has nothing whatever to do with our situation.

I appreciate the fact that there is some feeling among our people that 13 months is too long to wait for the convening of a new Congress, and there is probably some real reason for this amendment on that ground alone. But I want to call the attention of the House once more to Article I, section 4, of the Constitution, which specifically provides:

> The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Now, if there is a demand in this country that Congress shall meet sooner than a year from the time it is elected, it is entirely within the province of Congress itself to change the date of that meeting and provide that we shall meet here regularly on the 4th day of March after the election. So it is not necessary to have a constitutional amendment in order to reach this change in our present program. The only thing that would be gained under the present amendment is to set it ahead about 40 days, and we can do the other without any amendment to the Constitution.

Mr. CELLER. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. CELLER. The gentleman would not say that the Congress itself could change the tenure of any one or all of the terms of the Members of Congress?

Mr. SNELL. No; I would not say that.

Mr. CELLER. That is what you would have to do.

Mr. SNELL. No; I said we could pass a law providing that we should meet here on the 4th day of March after the election, and it can be done at the present time as provided in section 4 of the Constitution.

Mr. STOBBS. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. STOBBS. Of course, in doing that we do not eliminate the so-called lame-duck session of Congress, and a constitutional amendment is necessary to do that, is it not?

Mr. SNELL. I am glad the gentleman asked me that question. In all the debate that has been held on the floor of this House, and in every article I have ever read I have never heard or seen any reference made to one single piece of important legislation which the lame ducks in the House have helped to defeat, and I have never known of a piece of legislation of importance which in any way has been affected by the few men who were lame ducks. If the gentleman can call my attention to a single thing of that kind, I wish he would do so at the present time.

Mr. STOBBS. It is not so much the fact that your lame duck, so called, would vote wrong on legislation but it is allowing men to vote after an election who are not responsive to the wishes of the people.

Mr. SNELL. Statistics show that on the average there has not been a change of more than 12 per cent in the membership of the House. Has the gentleman any idea that the 12 per cent of new men coming in six weeks after they are elected, regardless of how intelligent they are, or how much experience they have had, would have very much influence on the legislation that is passed through that session of Congress?

Mr. STOBBS. Suppose Abraham Lincoln had not received a majority of the vote in the Electoral College and the vote had been thrown into that so-called lame-duck second session, when James Buchanan was President and both the House and Senate were under the control of the Democratic Party at that time, would Abraham Lincoln have been elected President of the United States, and does the gentleman think that so-called second session should have had the opportunity to pass on the election of a President of the United States under such circumstances? [Applause.]

Mr. SNELL. There might be something in that; but carrying that a little bit further, you have in the proposed amendment a provision that Congress shall come here 20 days before the President is inaugurated in order to canvass the vote.

If the presidential election has been so close that the election is thrown into the House of Representatives, let me tell you, my friends, the election of a number of the Members of the House will be so close that the election of a great many of them will be contested and you will have men voting on the election of a President under this proposed amendment whose own term of office in the House is not secure at the time they are voting.

Mr. STOBBS. There was quite a substantial difference between the second session of the Sixty-eighth Congress and the first session of the Sixty-ninth Congress.

Mr. SNELL. I do not get the gentleman's point on that.

Mr. STOBBS. If President Coolidge, for instance, had not received a majority of the electoral votes, his chance of being elected President would have been greater in the first session of the Sixty-ninth Congress than in the second session of the Sixty-eighth Congress.

Mr. SNELL. That may be true, but you are embodying here a proposition of 20 days where a great many men are going to pass on the election of the President who do not possess a clear certificate of election for themselves. Do you think that a good proposition?

Mr. CELLER. Will the gentleman yield?

Mr. SNELL. Yes; I will be pleased to yield.

Mr. CELLER. Did we not have three different occasions in the history of our country when so-called "lame ducks" or defeated Members of Congress participated in the election of a President?

Mr. SNELL. Yes; we have had three cases of that kind and we might have a similar case when Congress would not organize during the 20 days allowed in this resolution.

Mr. CELLER. Does the gentleman think it would be a fair proposition to have men who have been defeated by their constituents participate in the election of a President?

Mr. SNELL. You have that situation in either event, and I do not like either one of the situations, but I prefer the present situation when we have a year within which to get things done rather than 20 days, when in all probability the contests will not have been decided.

Mr. KETCHAM. Will the gentleman yield for this one suggestion?

Mr. SNELL. Yes.

Mr. KETCHAM. In response to the question raised by the gentleman from Massachusetts [Mr. STOBBS], has the gentleman thought that in the election of a President we do not vote as individual Members, but vote as States, and therefore the very small percentage of difference would cut very little figure in such an election?

Mr. SNELL. That may be true, but if we had a very close election there might be a great many of the individual Members

whose election would be contested, and that would undoubtedly be so if the election was so close that the election of the President was thrown into the House of Representatives.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. JEFFERS. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. LOZIER].

Mr. LOZIER. Mr. Chairman, last Tuesday I discussed at length the pending Norris-White resolution, stating in detail some of the many reasons why I am giving this proposed constitutional amendment my whole-hearted support. I now desire to answer the claim advanced by the opponents of this resolution that the people should be protected from themselves, and that a repudiated Congress should constitute itself a wet nurse for the new Congress chosen by the American electorate.

Those who are fighting this resolution are very much concerned lest the people act hastily in translating their will into law. They are afraid the people do not know what they want, or what will be for their best interests. They are worrying themselves sick for fear the people will do a little thinking for themselves. These self-appointed guardians of the public think they have a monopoly on statesmanship and that wisdom will die with them. So they advocate a continuance of the present system by which they can prevent legislative action and much needed reforms for 13 months after they have been repudiated at the polls. In that 13 months they can strengthen their strangle hold on the masses and consolidate their power and control of the Government. I have no patience with this "holier-than-thou" group that looks with indifference and contempt on the efforts of the common people to get a square deal and economic justice.

Article I, section 4, of the Federal Constitution provides:

> The Congress shall assemble at least once each year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Under existing law a new Congress comes into existence on March 4 following the biennial congressional election. Obviously it can not be assembled in advance of March 4 following the congressional election without an amendment of our organic law. Senate Joint Resolution 47 proposes to amend the Constitution so as to authorize the new Congress to assemble at an earlier date, January 4 following the congressional elections. It also provides that the term of the President shall begin January 24, instead of March 4 as under the present law. Under the present system the President is not inaugurated until four months after his election. This article, if adopted, will advance the date the President takes office to less than three months after his election. Under the law as it now exists a new Congress does not assemble until 13 months after it is elected, unless the President should call Congress in extraordinary session. Therefore, the new Congress can not function until nearly one-half of the term of its Members has expired, and necessarily the legislative program of the new Congress is held in abeyance. This is in fact a denial to the electors of their rights to express their approval or disapproval of existing laws or proposed legislation, and is an intolerable postponement of the people's right to initiate new legislation to remedy existing evils. That is to say, after the people have in a nation-wide referendum approved or disapproved legislative or administrative policies their voice is stifled and their hands tied for 13 months, unless forsooth the Chief Executive in his opinion concludes to convene Congress in special session. Thus the will of millions of voters may be set aside and held for naught for 13 months, and the will of one man (the President) neutralizes the will and wishes of a majority of the American people.

Under the present system direct action by the electors is practically impossible, because they are compelled to wait 13 months before their representatives have any opportunity to formulate a legislative program or to put into effect the principles and policies approved by the American people at a general election. I grant you that under existing law the President may, if he so desires, call Congress in extraordinary session immediately following the time the new Congress comes into existence, and very frequently the Presidents have exercised that prerogative, and as a result in numerous instances the electors have obtained speedy relief. But the calling of these special sessions now rests with the Chief Executive of the Nation. If the American electors in a nation-wide congressional election forcibly express their disapproval of existing laws and demand legislative relief therefrom, if the President thinks the people are wrong and still believes in the wisdom of these policies which electors have repudiated, by inaction and failure to convene Congress in special session he can thwart the public will and perpetuate those policies which have been so recently and so overwhelmingly condemned in a nation-wide referendum.

It seems to me that this condition is intolerable and inconsistent with the genius and spirit of our institutions. It is, in effect, a denial to the people of the right of self-government in that they are not permitted to enact new legislation which they believe will promote the public good and are compelled to live under laws enacted by Representatives and Senators who have been relegated to private life, frequently because, in the opinion of the people, these public servants have failed to reflect the will of their constituents or to promote the public good.

It will not do to argue that the people can not be trusted to legislate for themselves; it will not do to say that the will of one man should stand between the people and the enactment of their legislative program, even though that man be President of the United States and of unimpeachable character and unquestionable patriotism. There never will be a time in the life of our Republic when all the people will agree on a legislative or administrative program, and Representatives and Senators who have been repudiated at the polls, or at least have been subjected to a vote of "no confidence," as the situation is sometimes described, should not be continued in office four months longer with the power and opportunity to enact additional legislation akin to that disapproved by the people.

But some of the Members of the House are opposing this resolution on the alleged ground that there may be a deadlock in the House and it may not be able to organize and elect a Speaker between January 4, the day Congress convenes, and January 24, the day fixed for the inauguration of the President. Obviously, this objection is more imaginary than real. It is extremely improbable under our system of party government that a deadlock of that long duration will ever occur. The American people would not tolerate a Congress that would deliberately precipitate a condition that would prevent the choice of a President, or the inauguration of a President who has been chosen by the people. To urge this objection is, it seems to me, a reflection on the intelligence and patriotism of the Members of Congress. We well know that the emergency to which the opponents of this resolution refer will never occur.

Moreover, the Constitution does not require that Congress shall have elected a Speaker before it declares the result of the vote in the Electoral College, nor does it necessarily follow that Congress shall have elected its other officers before it proceeds to choose a President, in the event none of the candidates have a majority in the Electoral College. The Constitution requires the House and Senate to declare the result of the vote in the Electoral College, but there is no mandate that the House must have perfected a two-year organization before it proceeds to discharge its constitutional duty in reference to the election of a President. This can be done before it elects its Speaker, before it elects its Clerk, before it elects its Sergeant at Arms and subordinate officers. Under the present practice, the House proceeds to transact important business, namely, the election of a Speaker, before the Members take the required oath. When the Members assemble and take the oath of office, the House is in session, although it has not elected its permanent officers, and the House can then and there join with the Senate in canvassing the vote as reported by the Electoral College, and if the Electoral College has not made a choice, the House, as a legal proposition, can proceed to vote in the constitutional manner for President, although the Speaker and other permanent officers may not be elected for months or never elected.

The custom has been for the Speaker to swear in the Members, but this is a mere custom, and its observance is not necessary. The Members can lawfully take the required oath before a judge or other officer authorized to administer oaths, so far as meeting the requirements of the Constitution. The system we have been following is a mere practice, custom, or regulation adopted by the House from time to time for its own convenience, and it can be changed at the will of the House or by the action of a majority of the newly elected Members.

You well know that this House has absolute control over its own organization, and it can to-day, by a majority vote, displace the Speaker and all of its other officers and place others in their places. Why, the House functions as a House before it elects a Speaker or its other officers. We vote as Members of the House before the House is organized. The House is functioning before and at the time it elects its Speaker and other officers. When a Member takes the prescribed oath, he is a Member of the House; and when a majority of the Members have taken the oath the House exists as an organized constitutional body and can perform any of its constitutional duties. I repeat, when a Member has taken his oath of office,

he is then a Member of this House, and he is qualified to cast his vote for President, assuming, of course, that the Electoral College has failed to choose a President.

Mr. MADDEN. Will the gentleman yield?

Mr. LOZIER. Yes.

Mr. MADDEN. A Member of the House does not take his oath of office until we organize.

Mr. LOZIER. That is only a form, custom, or ceremony of the House. The Members have a constitutional right to take the oath of office without regard to whether or not the House has been organized. No House-made custom or regulation can deprive a Member of that right. The right of a Member to take the oath is a constitutional right, and not a right that the other Members of the House can grant or take away. The formalities heretofore followed are not essential, and their nonobservance would not prevent a Member elect from becoming a Member of the House, provided, of course, he had elsewhere or in some other manner taken the required oath.

The dangers so vividly pictured by the opponents of this resolution are imaginary, and if these objections were removed these gentlemen would probably find some other pretext for voting against this much-needed and far-reaching reform. Some men are constitutionally reactionary. They never look at any problem from a progressive standpoint. They are prophets of evil omen, at all times and all circumstances. They are always predicting that the country will go to the "demnition bow wows" if any forward-looking legislation is proposed. Every great reform since the curtain went up on human history has been opposed by "standpatters" who preached the doctrine of "let well enough alone."

But, gentlemen, this "scarecrow," paraded up and down this Chamber by those who are opposing this resolution, sinks into insignificance when we consider the serious complications that may result at any time by failing to amend our Constitution as proposed in the pending resolution. The Members who oppose this resolution leave uncorrected a situation that may result in strife, yes, bloodshed between the people of the United States. You are "gagging at a gnat and swallowing a camel" if you defeat this reform and allow the Constitution to remain in its present shape. I will go more into detail.

In 1924 there were three candidates for President—Mr. Coolidge, Mr. Davis, and Mr. La Follette. For a time it was believed by many well-informed persons that the election might be thrown into the House of Representatives, as it was considered within the realms of probabilities that the votes would be so divided that neither candidate would have a majority in the Electoral College. In that event it would have been the duty of the House to select a President. The present Constitution provides that in selecting a President when there is a deadlock in the Electoral College the House is restricted to the three candidates who had the highest number of votes in the Electoral College, and in this case the House would have had to vote for either Coolidge, Davis, or La Follette. Now suppose under this situation Mr. Coolidge had died between the time the electoral votes were cast and the time the House met to declare the result of the election; that is, suppose Coolidge had died between the second Monday in January and the second Wednesday in February, 1925. In that event the Republican Members of the House would have been compelled by the present Constitution to vote for either Davis or La Follette, or not vote at all, because the Constitution provides that the voting in the House must be for one of the three leading candidates voted for in the Electoral College; and this would have meant that the Republicans in the House would have been disfranchised, because this present Constitution that you refuse to change would not have allowed you to vote for some other Republican in the event of the death of Mr. Coolidge, and your great party would have been disfranchised. And the expressed will of a majority of the American people would have been set aside.

Or suppose John W. Davis had died between the second Monday in January and the second Wednesday in February, 1925. In that event the Democratic Members of the House would have been compelled to vote for Coolidge or La Follette or not vote at all, and that would have amounted to a disfranchisement of the Democrats in the House. Why, gentlemen, are you so wedded to existing order of things that you will allow our Constitution to remain in a condition like this? Here is a real danger, and yet you refuse to remedy it. If President Coolidge had died between the second Monday in January and the second Wednesday in February, 1925, and the Republican Members of the House had been deprived by the present Constitution from the privilege of voting for some other Republican, methinks your Republican constituents would have torn you to pieces for not having remedied a situation of this kind. And, likewise, if John W. Davis had died during this period, then, in that event, the Democrats in the House would have been deprived by the present Constitution from voting for some other Democrat, and your Democratic constituents would have brought you to a stern reckoning, and what they would do to you "would be a plenty." If no candidate had a majority in the Electoral College, and if death had called either Coolidge or Davis between the dates I have mentioned, when the election of a President came on in the House, I can visualize the situation. I can hear the stentorian tones of Haltigan calling the roll. Listen to the names and the response: TILSON, and he would feebly whisper, "John W. Davis." SNELL, and hear him answer, "John W. Davis." WOOD, and hear him respond, "Robert La Follette." LEAVITT, and listen to his dulcet tones as he votes for "Davis." HULL of Illinois votes for "Davis"; MADDEN for "La Follette," and so on. Of course, I understand the vote would be by States, and oh, the confusion and woe in the Republican ranks when Illinois, Ohio, Indiana, Michigan, Pennsylvania, and other rock-ribbed Republican States cast their votes for Davis or La Follette.

This is no joke. It is just what would have happened if President Coolidge had died between the dates I have mentioned, had there been no choice of President by the Electoral College.

And if Davis had died under those conditions, I can hear the gentlemen from the Old Dominion, Mr. MOORE and Mr. MONTAGUE, shouting "Calvin Coolidge" when their names are called. I can even now hear a lot of these southern Democrats, when their names are called, answering feebly, "Calvin Coolidge" or "Robert La Follette." The solid South would be compelled to not vote at all or vote for Coolidge or La Follette; and then you Democrats would curse the day you voted to perpetuate this dangerous condition. I repeat, here is a real, not an imaginary, peril. Are you going to lend your influence to defeat a resolution that corrects this grave situation?

The CHAIRMAN. The time of the gentleman has expired.

Mr. JEFFERS. I yield the gentleman three minutes more.

Mr. LOZIER. Do you Republicans want to leave the Constitution in a condition that would prevent the Republicans in the House from voting for some other Republican if no candidate in the Electoral College has a majority and your presidential candidate should die between the time the vote is taken in the Electoral College and the time the House meets to select a President? And do you Democrats want to leave the Constitution in such a shape as to prevent you from voting for a Democrat under the conditions I have mentioned? And this situation may result at any time. I assert that the present conditions are undemocratic, unrepublican, and un-American, and I for one will now vote to remedy this unthinkable situation.

Mr. LEAVITT. Will the gentleman yield?

Mr. LOZIER. Not now. But, say some, we should have a cooling-off process or delay between the election and the time Members of Congress enter upon their official duties. One purpose in having elections is to afford the American people an opportunity to pass judgment on public policies and on the record of those in power. If the policy of an administration has been repudiated by the American people, this popular verdict should promptly be translated into laws designed to give effect to the wishes of the people as expressed at the ballot box. If a Congress has been weighed in the balance and found wanting, why allow that Congress to hold over for three months longer and fortify and strengthen the policies that have been condemned in a nation-wide referendum?

Napoleon said, "Scratch a Russian and you will find a Tartar." I say, scratch the leaders of the opposition to this resolution, and in a majority of cases you will find standpat reactionaries. I do not think all who oppose this resolution are reactionary, but it is quite evident that practically all the reactionaries in this House are fighting this resolution "tooth and nail."

For years a few Members who dominate this House have strangled this resolution and prevented its consideration. These gentlemen are now exerting their great ability and influence to defeat and prevent its submission to the States. The issue is made up. The roll will soon be called. A record will be made, and the House will determine whether this forward-looking proposal is to be strangled again or submitted to the American people for approval or disapproval.

In relation to the Bankhead amendment, may I make a few observations? Of course, I understand that we have a representative form of government and not a pure democracy. Our constitutional fathers refused to go to the extreme limit suggested by Jean Jacques Rousseau and other leaders of public thought in France and America at the time of the revolutions in those countries against oligarchic and monarchal forms of government.

We adopted a representative form of government as affording the best scheme for the development of our free institutions

instead of a pure democracy, such as prevailed in Greece in ancient times. Our constitutional system of government, especially our legislative body, represents a compromise between the two contending schools of political thought in America at the time our Constitution was adopted. One school was intensely concerned in preserving political and civil rights of the people; that is, of the individual citizen, and desired to protect the masses from the superior power and cunning of the wealthier and more resourceful classes. The other school was suspicious of popular government and had a contempt for the masses and little, if any, respect for the expression of the popular will. One group insisted that we could with safety trust the people; that they had sufficient intelligence, ability, and patriotism to have an active participation in public affairs. The other group insisted on a strong centralized form of government controlled and directed exclusively by the cultured and wealthier classes. These two contending factions finally compromised their differences, and as a result we have a legislative system in which the Members of the Senate are elected for six years and the Members of the House for two years.

The theory in building this system was that the Senate, being the more conservative and stable representative body, would not be influenced by popular appeals or swayed by sudden changes in public opinion, but would resist tides of popular opinion and quick changing public sentiment and therefore be a check on the impulsive political and legislative activities of the House of Representatives which comes every two years fresh from the people.

On the other hand, the term of Representatives was made two years in order that they might at all times be in touch with the people and reflect the popular will. Now, will not this Bankhead amendment, if adopted, to a very considerable extent, make it more difficult for the popular will to be reflected in legislation? Will it not remove the Representatives two years further from the people, make them less reliant on the judgment and approval of their constituents, and more indifferent to the expression of the popular will?

Under the present system every Representative is constantly face to face with the realization that at the end of every two years he must give an account of his stewardship and so conduct himself that his record will merit and win public approval.

Now you purpose by this Bankhead amendment to double the length of the term of Representatives. Do you not thereby make them less dependent on the favor of their constituents, postpone their day of reckoning, and lessen their appreciation of their responsibility as direct representatives of the popular will?

There is much merit in the contention of our constitutional fathers to the effect that our Representatives should be compelled to submit their record and claims to their constituents every two years. The theory is that with long terms public servants become indifferent to the wishes and welfare of their constituents, and if compelled to ask a reelection every two years, they will keep in closer touch with the people and more accurately interpret and reflect the popular will. I concede that long terms will increase the power of a good Congressman to render efficient service, but the converse of this proposition is true, and long terms augment the evil influence of a bad Congressman and increase his power to do harm.

Of the Bankhead amendment, it may be said that it would increase the capacity of an efficient Representative to do good work and to render more valuable public service, and at the same time increase the damage that an unfaithful Representative may do. I think we should retain the two-year term for Members of the lower House. [Applause.]

Mr. WHITE of Kansas. Mr. Chairman, I yield 10 minutes to the gentleman from Connecticut [Mr. TILSON].

Mr. TILSON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD, and in view of the fact that the time is so short, I ask not to be interrupted, for I need every one of the 10 minutes for what I have to say.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TILSON. Mr. Chairman, it is a matter of sincere regret that I find myself in opposition to a report and recommendation of one of the fine committes of this House, and I should not allow myself to take this position if I could by any proper means bring myself to support the proposition recommended. This is not a party matter, however, in any sense whatever, but it is a matter which each Member must square with his own conscience, and this is what I must do. Hence my attitude.

Changing the time for the meeting of Congress is not the most important matter in the world. During all the 140 years under the Constitution no Congress has ever deemed it a matter of sufficient importance to even legislate upon the subject, although during all those years Congress has had full, complete, unlimited power to legislate and to fix as the date of meeting any day in the year. If it be a matter of so great consequence that Congress convene on any particular day of the year, why was not the discovery made long years ago and that day selected by an act of Congress?

While fixing the date on which Congress shall meet is not of vital importance; changing the Constitution for this or any other purpose is a serious matter. Of the amendments adopted since the first 10—which were to all intents and purposes a part of the original Constitution—some were unnecessary, some have not worked as expected, some have worked badly, and some have not worked at all.

Doubtless I am somewhat old-fashioned in this respect, but I have a deep, sincere affection and admiration for that old document, and I hate to see it changed without the best of reasons. Our experience in changing this precious instrument has not been such as to encourage further experiment along this line, except for reasons clear and compelling. I do not believe that the reasons given for the proposed change are sufficient or convincing, but, on the contrary, that when analyzed they become untenable.

What are the alleged reasons for adding the proposed amendment to the Constitution? The one argument upon which the demand for a change in the meeting date of Congress is based is that the time is too long between the election and the meeting of the new Congress. Looked at superficially, this is a plausible argument, especially when made to appear that 13 months must elapse after the election before the newly elected Member actually takes his seat; but even this formidable charge can be met and readily answered. In the first place, this charge is not true as I have stated it and as it is usually stated. Under our present Constitution only four months must elapse before the new Member may take his seat. Any longer time than four months is only because Congress, in its wisdom, has not seen fit to fix March 4 as the date for the new Congress to meet. Then we are called upon to pass a constitutional amendment in order to have Congress meet 60 days earlier than it could otherwise. And even then, in the case of a new President, he will not come in for 20 days longer, so that in reality the new Congress will gain only 40 days by meeting January 4 instead of March 4.

But we are told in all seriousness that it will never do for the new Congress to meet as late as March 4, which can be done by a simple resolution, because that would mean running into midsummer, and it is hot in Washington during June and July. Shades of our illustrious predecessors! Shall we amend the Constitution of our country in order to avoid a few days of personal discomfort? [Applause.]

The practice in foreign countries of early assembling is cited, but there is no real similarity, and any argument based on such an analogy is not well grounded but is altogether misleading. In other countries governments fall and cease to function, carrying in their fall both executive and legislative authority, which are not separated, so that a new government must be formed to carry on. There is no such thing in our system of government. Our executive and legislative powers are distinct and our terms of office are fixed by law or the Constitution. And, on the whole, has not the plan worked reasonably well, even as compared with foreign countries?

But it is not necessary to amend the Constitution in order to have an early meeting of the new Congress, and if it be believed that this is what is needed and what the people are demanding, let it be done by an act of Congress. As it stands to-day, Congress can fix any date of meeting it may deem best; and if it should turn out that the day fixed is not the best date, it can be changed and go back to the old date that has served satisfactorily throughout our history. But once fix the date by the Constitution, and it must stand whether satisfactory or not, whether it work well or ill.

Let us consider for a moment whether any real harm comes from postponing the date of convening the new Congress even the full limit of 13 months. We are now under a Budget system and it is working well. During the summer and autumn the President, through the heads of executive departments and the Director of the Budget, prepares the estimates of the several departments and makes up the Budget. It is sent to Congress the first week in December. As at present, the old Congress is organized and before January 4 is well under way in the consideration of the supply bills. The Cabinet heads, who under the outgoing President have submitted their estimates, now come before the committees of Congress and explain each the portion of the Budget which relates to his department. Before March 4, if Congress attends to business, all the supply bills and other necessary legislation is passed, and the old Congress and the old President, with his Cabinet heads and their assistants,

all go out together. The new President comes in on March 4 with a new Cabinet and assistants and begins at once to prepare for the new estimates and the new Budget to be submitted in the autumn.

Meanwhile, the new Congress on and after March 4 stands ready to meet in case of need to pass emergency or any other legislation deemed necessary for the public interest. Time after time the new Congress has been called together early for one reason or another, and there is no danger that the public interest will ever suffer for want of a Congress ready to serve.

Let us see what would be the situation under the proposed amendment. The old President and his Cabinet must make up the Budget as before, but can not submit it before January 4. It is then submitted to a new Congress, not thoroughly organized and without committees. Meanwhile the "lame-duck" President holds on for 20 days. Whether he delivers a message on the state of the Union to the new assemblage, now cleansed of its "lame-duck" contamination, is not specified in the resolution.

Having organized—if no deadlock interferes—and counted the electoral vote, if there is time, the now pure congressional aggregation, out of deference to the new President soon to come in, will probably twiddle their thumbs until January 24 arrives. And now work must begin—on the supply bills, at any rate. A new Cabinet will have taken the place of the old and without time to learn anything whatever about their several departments, with no knowledge whatever of the estimates or the Budget, they must appear before the committees of Congress to explain and defend the provisions of their several bills. The new President must take on faith the Budget of his "lame-duck" predecessor, for surely he is not in position to make up one of his own; and so throughout the first year of his term, the most important year of all for him, the benefits of the Budget system may be nullified, so far as he is concerned. Can you imagine anything worse than such a situation? And yet I have not in the least overdrawn what must inevitably happen in case this amendment should be ratified.

Can we afford to take such a step which, once taken, can not be retraced? It matters nothing to me personally. It matters little to any of us older Members, whose time here after this amendment is in effect at most will not be long; but it does matter very much to the people of the country through all the years to come and to those who follow us here in giving service to the country. I have one boy of my own, dearer to me than my own life, as every father will understand. He is only a schoolboy now, but in the dreams of a fond father touching his son I have seen him standing here in my place, giving himself to the service of his country as his father has faithfully tried to do. I would not for this right arm do anything by my vote that would make his path more difficult or render his service and that of the others who will then stand where we now stand less effective or useful.

I can not vote for this resolution. Neither can I allow it to pass without giving voice to my opposition and utterance to my conviction that its adoption will be an unfortunate mistake which those responsible for it should never cease to regret. And remember, when we give our vote for it and send it on its way all the harm of which it is capable throughout the years to come will have been done, so far as we are concerned. [Applause.]

Mr. JEFFERS. Mr. Chairman, I yield five minutes to the gentleman from Virginia [Mr. MOORE].

Mr. MOORE of Virginia. Mr. Chairman, of course there is a greater responsibility on Members dealing with a proposition of this sort than dealing with an ordinary statutory proposition. In this case the responsibility is indicated by the provision in the Constitution that a vote of two-thirds of the membership of each House, a quorum being present, shall be required to submit a constitutional amendment. I am a liberal; I do not agree with some that the Constitution is a sort of Ark of the Covenant which is too sacred to be touched, but, nevertheless, as to this matter I apply the view expressed by an old English statesman that when it is not necessary to change it is necessary not to change.

It is unthinkable to me, for the reasons that have been detailed, that the provision will be adopted to terminate the last session of the Congress. The reason indicated by those who favor that idea is that it will cut out filibustering. Some time ago I had occasion to review the history of filibustering since 1841, when it started, and I was brought to the conclusion that very much more good has been accomplished by filibustering than harm. [Applause.] And let me say to my friends from the South that except for the filibustering in the Senate some years ago we might be living under the Force bill to-day.

Now, assuming that the particular provision to which I have referred will be discarded, let me come for a moment to the main provision. Various arguments have been made against bringing about the session of the new Congress on the 4th of January and the inauguration of the President and Vice President on the 24th of January. I am not going to rehearse those arguments, but I am going to call upon my own experience for an illustration of what would have occurred several years ago if that plan had then been in effect.

There was a presidential election in 1876. Following that election there was tremendous controversy as to how the country had voted. The Hayes-Tilden fight came on, marked by unlimited passion and heat. An Electoral Commission was organized. It took a vast amount of testimony and heard from the representatives of the two men principally involved, at the greatest length. It would have been simply impossible for the commission to pass on the case and for Congress to have received the report of that commission and acted on it in the short time elapsing between the 4th of January and the 24th of January.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. JEFFERS. I yield two additional minutes to the gentleman.

The CHAIRMAN. The gentleman from Virginia is recognized for two additional minutes.

Mr. MOORE of Virginia. I sat in the gallery of this House as a schoolboy on the night when, before a crowded House, late in February the report of the Electoral Commission came along for consideration; and I well remember the excitement that prevailed and the predictions of the gravest trouble that might occur, when Mr. Hewitt, of New York, rose and said, representing Mr. Tilden, that he desired the House to adopt the report of the commission.

There had been some time for deliberation. There had been some time to consider what might happen in the event of the failure to adopt that report; and I venture to say, judging from what was the attitude of the country in respect to that election, that if we had had such a plan in effect at that time as now suggested there would have been serious danger of civil war.

Now, why should we run the risk of all sorts of complications and difficulties by indorsing a proposal as to which even many of its advocates are not without doubts? Why should we cultivate the habit of amending the Constitution in such a sudden and impulsive way as is now proposed and, in my opinion, without any compelling necessity? [Applause.]

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

Mr. JEFFERS. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. BLACK].

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. BLACK of New York. Mr. Chairman and gentlemen of the committee, I have finally made up my mind as to what I am going to do about this resolution. I do not mind confessing to the House that I was wobbling back and forth on the proposition. I almost had mental St. Vitus's dance through worrying about it.

In the first place, I do not believe we should monkey too much with the Federal Constitution, especially after we attached a blotter to it in the eighteenth amendment. My main difficulty was concerned with the draftsmanship of the resolution now before us. I tried to make out what it meant. I finally concluded that I knew what it meant. Then I tried to set forth in my own language what it meant in a better way, and I could not do it; and then finally I came to the conclusion that I wanted to vote for the resolution. [Laughter.] I went so far on it that I finally decided I would make a speech for it. [Laughter.] I hope I will not get mixed up again before a vote is taken. [Laughter.]

The only substantial defect that I can see in the resolution is that it does not permit a woman to be President or Vice President. I know there is no immediate possibility of a woman becoming President or Vice President, and I only make this remark as an allusion to the Republican old women who are waiting for the nomination. [Laughter.]

It was interesting to hear the gentleman from Massachusetts [Mr. LUCE] remark upon the corruption in the State of Pennsylvania because of the lack of this amendment. Somebody else blamed it on the primary system, and others blamed it on the churches in Pennsylvania. A gentleman on the Republican side, Mr. TILSON, of Connecticut, spoke of his deep love for the Constitution. Oh, how I love to hear Republicans speak of their love for the Constitution! From my experience I realize that

there is only one provision in it that they have any love for, and that is the provision against self-incrimination. [Laughter.]

Mr. LUCE. Mr. Chairman, will the gentleman yield?

Mr. BLACK of New York. No; I can not.

Mr. LUCE. Mr. Chairman, I rise to question of personal privilege.

The CHAIRMAN. The gentleman declines to yield.

Mr. BLACK of New York. The people of the country want this legislation. They have been agitating to kill the lame duck status for some time. It is an anachronism and ought to be done away with.

We should not worry unduly about the draftsmanship of the proposition. That can be corrected. I say, pass the resolution and in this form, send it to conference, and let the conferees study it and perfect it and polish it up, and give the people what the public wants, namely, a real logical system of Federal administration, a timely system, a system that will bring the Congress and the President nearer election, a responsive system.

We do not have to worry about the particular wording. The conference can take care of that. So I finally came to the conclusion that I ought to vote for it, and I hope everybody I asked to vote against it in the lobby will follow me now. [Applause.]

Mr. LUCE. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Massachusetts rise?

Mr. LUCE. I rise to a question of personal privilege.

The CHAIRMAN. That can not be raised in the Committee of the Whole House on the state of the Union. It can only be raised in the House itself.

Mr. LUCE. I ask 15 seconds to say that the gentleman from New York has made an error in attributing to me certain language. I did not use that language and made no reference to the subject of which he has spoken.

Mr. BLACK of New York. I am glad he did not.

Mr. WHITE of Kansas. Mr. Chairman, I yield the balance of the time remaining on this side to the gentleman from Iowa [Mr. RAMSEYER]. [Applause.]

The CHAIRMAN. The gentleman from Iowa is recognized for 12 minutes.

Mr. RAMSEYER. Mr. Chairman and gentlemen of the committee, I want to be helpful in whatever way I can on the proposal that is before us in the brief time at my disposal. First, let us get it into our heads that this is not a proposal to change anything fundamentally vital in the Constitution like, for instance, the nineteenth amendment was, the eighteenth amendment, the seventeenth amendment, and the sixteenth amendment. This is administrative in character. As has been stated on the floor of the House before, it goes to the mechanics of the Government and not to anything vital or fundamental. Reference has been made several times to the situation that prevailed in 1876 and doubt was suggested as to whether the new Congress would have handled that situation as well as the old. No one can answer that, if he is honest with himself, either yes or no. I am not here to presume that the Congress elected in 1876 would have been any less intelligent or any less patriotic than was the Congress that handled that very distressing and unusual situation, a situation which had never arisen before in the history of the country and may never again arise in the history of the country.

The argument is made by the majority leader that we have been getting along for 140 years and this change has not heretofore been suggested. Of course, that same argument could have been made against every constitutional amendment that has ever been proposed, or even against every law that has ever been proposed in the last 140 years. So that point is not vital in the discussion here. He refers also to the difficulty of rearranging our Budget. The Budget can easily be adjusted to the change proposed even though it may necessitate some legislation by Congress. My good friend from Illinois [Mr. MADDEN] says that the short session of Congress is a money saver. I can not now recall the figures, but I think I am within the facts when I state that by looking over the expenditures of a number of years you can tell no difference in the amount of money authorized to be spent in the short sessions and the amount of money authorized to be spent in the long sessions. There has been a gradual increase in appropriations and in expenditures of the Government at least since the Civil War, or soon after the Civil War; they have been gradual and have been going on whether the appropriations have been authorized during the long session or during the short session.

The argument is made, too, that this proposition would not be before us if it were not for propaganda. Insinuations have been made in the press locally and also on the floor of the House that this scheme is a half-baked proposition, ill-considered, and visionary. I am here to tell you that as far as I am concerned I have not gotten any propaganda either for or against it.

The debate here has been very interesting and has been conducted on a high plane of intelligence and reason. I hope it will continue so, and I am sure it will continue so. The manner in which it has been conducted has renewed my faith in this House.

It is a serious proposition to change the Constitution, and it has been seriously considered, and when we get under the five-minute rule in a few minutes I am sure it will continue to be seriously considered.

I had not intended to make reference to the attitude of the American Bar Association on this proposition if it had not been for the fact that the inference has been left here that this proposal originated in the minds of propagandists. So far as I am aware the credit for seriously pressing this proposition belongs to the American Bar Association. I have been interested in this proposal for a number of years, and when the American Bar Association in 1917 referred this matter to a special committee my interest in the proposal was increased. I have watched the development of this proposal before the American Bar Association. During the war it did not receive much consideration. But in 1919 and again in 1920 the American Bar Association indorsed the principle, and in 1921 it referred a special resolution to this special committee. The committee gave it most thorough study, and in 1923 it made a very full and complete report to the American Bar Association. I happen to be a member of the association and was present at the time when this report came up. It had been printed three or four months before, and was in the hands of every member of the American Bar Association and, of course, everybody there was advised of what was in the report.

I am here to tell you what you already know, and that is that the American Bar Association is as intelligent and as conservative a body of men as exists in the country; I will not say more intelligent or more conservative. There are in that organization some of the greatest students of government that we have and they are just as devoted to the Constitution and the perpetuity of our Government as any of us here are. A former president of the American Bar Association sits before us and he can testify to the truth of what I have just said.

Even though this report was printed and in the hands of every member of the bar association three or four months before the meeting of the bar association in Minneapolis, in August, 1923, there was not a voice raised in opposition to this report and there was not a vote cast against the adoption of this report.

Mr. TILSON. Will the gentleman yield there?

Mr. RAMSEYER. Certainly.

Mr. TILSON. Is it not the fact that ever since the first vote was taken in 1917 by the American Bar Association upon this question, the majority in favor of it each year when it has been brought up has been gradually less and less?

Mr. RAMSEYER. The majority? Why, it was unanimous.

Mr. TILSON. It was unanimous the first year.

Mr. RAMSEYER. It was unanimous in 1923, and if there has ever been anything before the bar association since 1923, and I have been getting the reports of the association every year, to indicate there was any opposition to this proposal, I have never seen it or heard of it.

Mr. TILSON. I have understood that the vote in favor of the proposition has been growing less each year since 1917 as the members of the bar association have studied the question.

Mr. RAMSEYER. With me it is not a matter of understanding, it is a matter of knowledge. I was present. [Applause.] I have been following this question and if there has been opposition developed in the American Bar Association against the proposal it has never found place in any of the annual reports of the association reporting the proceedings of their meetings from time to time.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. RAMSEYER. For a pertinent question.

Mr. WILLIAM E. HULL. Is it necessary for the Congress to follow what the American Bar Association advocates?

Mr. RAMSEYER. Certainly not. Nobody has claimed that, but I am simply referring to this to show that the most conservative and the most intelligent thought of the country has been, and is yet, unanimously back of this resolution. [Applause.]

Mr. LEAVITT. Will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. LEAVITT. Is the American Bar Association back of it in the form in which it is presented to the House or the form in which it was passed by the Senate?

Mr. RAMSEYER. They passed or proposed a resolution, and that resolution I carried from the American Bar Association myself that year of 1923, and introduced it in this House on the first Monday in December, 1923, and the gentleman from Kansas [Mr, WHITE], some time later, as chairman of the committee, introduced an identical resolution, and the resolution adopted by the American Bar Association is almost identical with the resolution here except as to the fourth section, which adds matter to which, I understand, nobody is objecting on the floor of this House.

Mr. LEAVITT. The gentleman referred to a past president of the bar association who is a Member of the House. Is that Member supporting it in the form in which it is presented?

Mr. RAMSEYER. I do not know. The gentleman will speak for himself when the time comes. He may be opposed to it or not; I do not know. If he is opposed to it, so far as I know, he never voiced any opposition to it in the American Bar Association in 1923 or any other time, and we have had such presidents of the bar association of late years as Justice Sutherland, of the Supreme Court, former Justice and ex-Secretary of State Hughes, and in 1923 the president of the association was John W. Davis, the last candidate for President on the Democratic ticket. He indorsed this proposition. If I had the time—my time is about up now—I would read to you what John W. Davis then said about it in his annual address. The presidents of the American Bar Association since this matter has been up have all indorsed it, and, so far as the records of the American Bar Association show, all members of the American Bar Association, with all their intelligence and patriotism and conservatism, are back of this resolution. [Applause.]

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. WILLIAM E. HULL. I would like to know if the United States Chamber of Commerce has indorsed it.

Mr. RAMSEYER. I do not know.

Mr. WILLIAM E. HULL. You are putting it all on the bar association, when the United States Chamber of Commerce would have just as much right to indorse it or not indorse it as the bar association.

Mr. RAMSEYER. If the gentleman was listening to me throughout my argument, he will understand why I drew in the American Bar Association. It was not to argue that you should follow them blindly, but to refute some of the arguments made on the floor of the House and published in the press of this city that this proposition would not be before us but for propagandists. [Applause.]

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. GIFFORD. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Massachusetts rise?

Mr. GIFFORD. I would like to ask, first, how much time there may be remaining?

The CHAIRMAN. There are two minutes remaining in the control of the gentleman from Alabama.

Mr. JEFFERS. Mr. Chairman, we have no more speeches on this side. During these remaining two minutes let me just say that I am favorably inclined toward the main object of this proposed amendment to the Constitution. However, I think now, as I have thought all during the time we have had it under consideration in the committee and here in the House, that this specific date for the closing of the session in the even-numbered year ought not to go into the Constitution of the United States, and therefore I shall support appropriate amendments which will be offered at the proper time to correct what I think are serious defects in the proposed resolution; otherwise I think the resolution should be adopted.

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The Clerk will read.

Mr. GIFFORD. Mr. Chairman, I desire to present a unanimous-consent request. Inasmuch as the committee has been very liberal in the matter of granting time I ask for five minutes for debate and an additional five minutes in which to present the parliamentary aspect of the matter, with respect to how we are to proceed in offering amendments. I ask unanimous consent that I may have 10 minutes, principally on the parliamentary situation.

The CHAIRMAN. The Chair would like to state to the gentleman from Massachusetts that the unanimous-consent request made by him is out of order because the time was fixed by the House, and the committee has no power to change it.

Mr. GIFFORD. Mr. Chairman, may I speak out of order for 10 minutes?

Mr. BANKHEAD. Mr. Chairman, I shall be compelled to demand the regular order.

Mr. TILSON. Let the Clerk read the first paragraph.

The CHAIRMAN. The Clerk will read.

Mr. GIFFORD. Mr. Chairman, I rise for the purpose of making a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GIFFORD. I should like to know whether this whole resolution is to be read before amendments are offered, or whether each section will be amended as read? It is extremely important to know which procedure is to be followed.

The CHAIRMAN. The committee substitute, which is the matter to be read for amendment, is the legislative proposition under consideration and is divided into sections. Unless it is otherwise ordered by the committee, the Chair will direct that it be read for amendment section by section.

Mr. CHINDBLOM. Mr. Chairman, the rule prescribes that the committee amendment may be amended as an original bill.

The CHAIRMAN. Surely; for that reason the Chair is directing that it be read section by section.

Mr. GIFFORD. I make the parliamentary suggestion that this bill really contains but one section.

The CHAIRMAN. It is obvious that there are five sections.

Mr. GIFFORD. I think that this ought to be understood before debate on amendments is begun, and I ask for one minute in which to present the situation which may arise if certain amendments are offered.

Mr. BANKHEAD. I ask for the regular order.

The CHAIRMAN. The regular order is called for, and the Clerk will read.

The Clerk read as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 24th day of January, and the terms of Senators and Representatives at noon on the 4th day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin."

Mr. GIFFORD. Mr. Chairman, I move to strike out the last word. I do this in order to show how important it is fully to understand whether or not, after a section has been amended, we can return to a previous section which may be made necessary by the amendment to a later section. If section 5 should be amended in such a way that section 1 is affected thereby, it is necessary to determine now whether we can without unanimous consent go back and remedy the situation that may have been created. I am sure that many who have argued against sections 1 and 2 have no objections to sections 3 and 4. Amendments to the latter may be made which would make necessary amendments to previous sections. It should, therefore, now be determined whether we are to be permitted to return to the previous sections and amend them without unanimous consent.

The CHAIRMAN. In answer to the parliamentary inquiry by the gentleman from Massachusetts, the Chair will state that although this is a proposal for an amendment to the Constitution of the United States, the practical consideration in Committee of the Whole is no different in practice than considering any ordinary bill. After a section is passed it can not be returned to in committee without unanimous consent.

Mr. BANKHEAD. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The Clerk read as follows:

On page 3, after line 7, insert a new section, to read as follows:

"SEC. 2. The House of Representatives shall be composed of Members chosen every fourth year by the people of the several States."

Mr. GIFFORD. Mr. Chairman, I make a point of order as to that.

Mr. RAMSEYER. I make the point of order that it is not germane to the section or the resolution as a whole.

The CHAIRMAN. The gentleman from Massachusetts and the gentleman from Iowa make points of order that the amendment is not germane. Does the gentleman from Alabama wish to speak on the point of order?

Mr. BANKHEAD. Does the other side desire to present any argument in support of the point of order? I think that would be the proper procedure.

Mr. RAMSEYER. Is not the burden to show that it is free from the point of order upon the gentleman from Alabama?

The CHAIRMAN. The burden to show that it is in order is on the gentleman from Alabama. The Chair thinks the gentle-

man from Alabama would be entitled to rebut the arguments made in behalf of the point of order.

Mr. BANKHEAD. Mr. Chairman, I will say this in advance of the statement I shall make, addressing myself to the point of order. It is not my purpose to tax the patience of the Chair or the committee. I realize that the present occupant of the chair for a number of years has been a Member of this House; he has been diligent in the study of parliamentary procedure. In addition to that a day or so ago I gave notice to the Presiding Officer of this amendment that I have presented for the consideration of the committee. I have no doubt in advance the occupant of the chair has given the matter some consideration. For that reason I shall make my remarks on the point of order just as brief as possible.

The question has been raised that the amendment proposed is not germane to the resolution or at the place where it is offered as a new section or to the resolution. The question of the germaneness of a proposal is often one involving a close question, and is therefore a matter which concerns the presiding officer. I think the gentleman from Minnesota, Mr. Anderson, late a Member of this Congress, in a decision recorded in the first session of the Sixty-seventh Congress, correctly states the general principles that should govern the Chair in determining the question of germaneness.

On page 2416, volume 61, Sixty-seventh Congress, it says:

The Chair confesses to having a considerable degree of difficulty with that question. The Chair does not think that the general rule can be laid down, that where several portions of a law are amended by a bill reported by a committee, it is not in any case in order to amend another section of the bill not included in the bill reported by the committee, nor does the Chair think that the opposite rule can be laid down and rigidly applied in every instance. The Chair thinks that a question of this kind must be determined in every instance in the light of the facts which are presented in the case.

First, I desire to call the attention of the Chair to the fact that the title to this proposed resolution is not now before the Chair or the committee in its original form. In fact, the House Committee on Privileges and Elections in reporting the resolution saw fit to incorporate at the end thereof this language:

Amend the title so as to read: "Joint resolution proposing an amendment to the Constitution of the United States."

In its original form the resolution proposes—

An amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

So that as now presented the general subject matter of this resolution is not as first expressed in the title, the general purpose and its specific purposes named in the original resolution, but in broad terms it proposes an amendment to the Constitution of the United States.

I submit to the Chair that the amendment proposed is germane upon two theories. First, that section 1 of this resolution deals specifically and in terms with the broad questions of the terms of the President and Vice President of the United States, with the terms of the Members of the Senate of the United States, and with the terms of the Members of the House of Representatives of the United States. It not only does that, Mr. Chairman, with reference to the sitting Members, who will be affected by this resolution in the event of its passage and ratification, but it goes further; in the last line of section 1 it provides:

And the terms of their successors shall then begin.

So that we see we have before us for consideration under a resolution proposing an amendment to the Constitution of the United States specific proposals dealing not only with the terms of other officials of the Government but with the terms of the Members of the House of Representatives, and by the very terms of the section 1 the terms of the President and Vice President and Members of the House are shortened for a period of some six weeks. If we can deal with a proposition involving the shortening of the terms of sitting Members, at the time of the ratification, and deal with the terms of their successors if ratified, certainly it would be germane and within the general fundamental purpose of the resolution to say that we could extend the time. In short, if we can shorten it, dealing with the same subject matter, I submit that it would appear to be a rather arbitrary ruling of repression against the expression of the real will of the House upon the specific object mentioned in the face of the resolution itself to hold that we can not lengthen the term, and I use the word "arbitrary" in a general sense and not personally in respect to the present occupant of the chair.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. BANKHEAD. Yes.

Mr. BURTNESS. Of course, no one could ever argue that it would not be germane to offer an amendment to change the date from the 4th of January, say, to the 4th of July or the 4th of August. By simply changing one word in this section we could lengthen the term of office a few months, and if you can lengthen it a few months by changing one word, it does seem to me there ought not to be a great deal of objection to proposing an amendment which would in effect lengthen the time two years by some other means.

Mr. BANKHEAD. That is in support of the proposition, as I understand it, for which I contend.

Mr. BURTNESS. And it was so intended to be.

Mr. BANKHEAD. I shall not undertake to cite a long line of authority on this question, because I do not think it is necessary. In volume 5 of Hinds' Precedents, section 5582, this principle is announced, and I shall not read the decision, but just the substance of it:

To a bill proposing one mode of arranging the presidential succession, an amendment proposing a joint resolution for submitting a constitutional amendment on a plan differing as to details was held germane.

In this same volume, section 5824:

To a bill amending a general law in several particulars an amendment providing for the repeal of the whole law was held to be germane.

In the same volume, section 5839:

To a resolution embodying two distinct phases of international relationship an amendment embodying a third was held to be germane.

In the same volume, section 5882:

To a proposition relating to the terms of service of Representatives and Senators, an amendment proposing the election of Senators by the people was held not to be germane.

I cite this last decision, because probably this decision has fallen under the eye of the Chair, tending to support the point of order; but I respectfully call the attention of the Chair to the fact that that ruling by the late Speaker Crisp was well taken for the reason that in that amendment it not only undertook to deal with the terms of the succession, but it undertook to propose an absolutely new and different method of electing United States Senators, to wit, by a direct vote of the people, instead of by the legislatures of the various States. My amendment proposes nothing new in the Constitution with reference to the method of electing Members of this House. It involves no departure from the constitutional structure at the present time relating to Members of the House of Representatives. All that it does is to seek the opportunity, if presented to the House, under the rulings of the Chair, for the House to say that the present terms of the Members of the House shall be extended.

On the other theory, the Chair is, of course, familiar with the principle that where, in dealing with a bill involving a number of different subjects, an amendment involving a new subject is in order, if germane, to the general principles of the bill. The Chair will notice that the resolution proposes a change in the Constitution of the United States in three different particulars. It undertakes to amend Article II of section 1 of the Constitution in the first section, and it undertakes to amend Article I of section 4 of the Constitution in the second section.

It undertakes to amend the twelfth amendment to the Constitution of the United States in the third section, so that I say, under the principle of germaneness, where different subject matters are undertaken to be dealt with in a bill, a proposal injecting a different subject, if fundamentally along the line proposed in the other proposition, it is germane to the bill. I could cite a lot of decisions on that, but the Chair is familiar with the principle that I am announcing.

Now, as to the third reason, Mr. Chairman, I do not know whether from the investigation of the Chair of that question he has in his own mind reached a decision upon this question. Of course, I have got to take the chances on that. But I want to submit this to the Chair, and it is a sound principle; it is an equitable principle; it is a philosophical principle of parliamentary procedure that if the Chair has any reasonable doubt as to the correctness of a proposition being in order, as Mr. Speaker Clark held and as Mr. Speaker Reed held, and as Mr. Speaker Crisp held, and I believe all the great Speakers of this House have held, where there was involved on the part of the Presiding Officer a serious doubt as to the correctness of a ruling on a point of order as to germaneness, he should resolve that doubt in favor of the membership of the House in order that they might have a free opportunity for an expression of

conviction upon the proposition proposed. And from that standpoint, Mr. Chairman, you will bear in mind that our present distinguished Speaker, on an occasion, I believe, in the present session of the House when this proposal was suggested on a closely contested point of order, if this be such a case, carrying out that principle, he hesitated to make a decision himself, and submitted to the decision of the House the question as to whether or not a point of order was good.

Now, Mr. Chairman, as I said in the beginning of my remarks, I do not want to weary the Chair or the committee. What I have said states the propositions on which I rely as to the germaneness of this proposal.

Mr. GIFFORD. Mr. Chairman, with reference to the discussion of the point of order on "germaneness," I may say that few of us claim superior knowledge of parliamentary law. We have been told that in as far as possible common sense should rule in matters of this sort. In that connection I should like to say that in framing this resolution, which has for its primary purpose fixing the commencement of the terms of President, Vice President, and Members of Congress and establishing the time for the Congress to assemble, we had no thought of permanently changing the presidential term or the terms of Senators and Representatives. All these changes could be made if this amendment were in order. It would seem that the rule of common sense applied to the germaneness of this amendment would be to consider the intent of the contemplated legislation. Is it possible to make germane all provisions of the Constitution wherever the terms of "President, Senator, and Representative in Congress" may appear? We have so much confidence in the Presiding Officer that few of us care to argue the point further. however.

The intricacies of parliamentary procedure are not so involved in a question as to what is germane as is the principle of common sense, applied to the consideration of matters not contemplated and entirely separate in intention and effect.

Mr. RAMSEYER. Mr. Chairman, the rule of germaneness, as I understand, is this: The fundamental purpose of an amendment must be germane to the fundamental purpose of the bill or resolution before the House.

Now, what is the fundamental purpose of this resolution? First—and it is really the only thing that concerns this amendment—section 1 proposes to change the date of the beginning of the terms of Congress and the beginning of the terms of the President and Vice President. That is what is involved in section 1, and section 2 has to do with the date of the assembling of Congress. The rest of the resolution has to do with certain contingencies that might arise in case the Electoral College does not elect a President and a Vice President.

The purpose of the first section is to fix the date of the beginning of terms, not the length of terms. I want you to get that clearly in mind. Not a word is said there about the length of terms. The truth is, that if this resolution is adopted, it will incidentally affect one term of Members of Congress, as now arranged by custom and law. The terms of Senators are fixed by the Constitution, and the four-year term is fixed for the President; but it is not the purpose of this resolution to change the length of terms. That one term will be shortened is not the fundamental purpose of the resolution but is a mere incident to the change proposed for the beginning of the terms.

Now, the gentleman undertakes by an amendment to affect all terms of Representatives in Congress; not of Members of the Senate or the term of the President, but he undertakes to fix all terms of Members of the House at four years. We are only dealing with one term, and the shortening of that one term is only incidental and not the fundamental purpose of the resolution before us. I claim that under the Constitution we could by law change the time for the commencement of the terms of Members of Congress without violating the Constitution.

We could not do so for the President and for Senators. As to the President, the Constitution specifically states that he shall hold his office during the term of four years, Article II, section 1, clause 1. As to Senators, the Constitution specifically states in Article I, section 3, clause 1—

> The Senate of the United States shall be composed of two Senators from each State, chosen by the legislature thereof for six years.

Their term is specifically fixed. I do not think that by statute we could shorten or lengthen the terms of either President or Senators without violating these constitutional provisions. But let us see what the Constitution has to say in regard to Members of the House. This is Article I, section 2, clause 1:

> The House of Representatives shall be composed of Members chosen every second year by the people of the several States.

It does not fix the term of Members at two years. If for some reason Congress should change the term of Members of the House to 21 months to be followed by a term of 27 months and so on alternate the different length of term I think that would be within the Constitution so long as we carried out the mandate of the Constitution and gave the people the right to elect Members every two years. So this provision in section 1, so far as it affects the Members of the House, does not change any existing constitutional provision. The proposed resolution in section 1 incidentally shortens one term of Members of the House two months, and if we did that by statute we would not be violating the Constitution. So in that respect we are not changing the fundamental law. On the other hand, of course, the amendment offered by the gentleman from Alabama changes the Constitution in that it fixes all terms of House Members specifically at four years.

Now, in conclusion let me summarize, Mr. Chairman. First, the fundamental purpose of the amendment proposed is not germane to the fundamental purpose of section 1 of the resolution. That is the first proposition. The second proposition is that the gentleman undertakes to change all terms of Members of the House to four years in length, while the section 1 before us as an incident to its fundamental purpose shortens only one term by two months, but it does not thereby violate the existing provision of the Constitution in Article I, section 2, clause 1. That is all I have to say on that proposition.

I do not think the proposition which the gentleman suggested in closing, that inasmuch as this resolution affects three provisions of the Constitution that he could invoke the rule that where there is a bill proposing numerous or many changes in a law, like the bankruptcy law or the revenue law, that thereby it would be germane to offer amendments to change sections of the law that were not referred to in the bill. There is nothing here akin to that rule, and I shall not even undertake to answer it except to suggest to the Chair that the rule the gentleman from Alabama tries to invoke does not apply to a situation such as is before us.

Mr. GARRETT of Tennessee. Mr. Chairman, I should like to say that I am addressing myself purely to the parliamentary situation and in no way to the merits of the amendment, because I do not happen to be in sympathy with the amendment.

We have here before us a resolution which contains three distinct, separate, and unrelated propositions. Sections 1 and 2, standing alone, would be complete. In other words, the integrity of those sections would not be affected in any way if the House should conclude to strike out all the remainder. So of section 3 and so of section 4. Therefore it would seem to fall within the line of decisions that where a measure contains two or more subjects it is in order to offer a third subject of the same class. I call the Chair's attention to citations from the Manual, which state:

> Thus, the following have been held to be germane: To a bill admitting several Territories into the Union, an amendment adding another Territory; to a bill providing for the construction of buildings in each of two cities, an amendment providing for similar buildings in several other cities; to a resolution embodying two distinct phases of international relationship, an amendment embodying a third.

Mr. NEWTON. Mr. Chairman, speaking not to the merits but to the point of order, I would like to call the attention of the Chair to this proposition: We are not only governed by the underlying purpose of the resolution or a section of the resolution, but we are also governed by the text of the resolution and the particular section which has been drawn with the idea of accomplishing the underlying purpose. In the particular section before us, in an attempt to effect what the gentleman has called the fundamental purpose, the committee has used certain language. In using that language it has made very substantial changes in the Constitution. Of course, it is the change that they propose to make which forms the basis on which amendments are in order.

As the gentleman from Iowa pointed out, section 2 of Article I of the Constitution says nothing about when the terms of Members of Congress shall begin; neither does the Constitution say when the terms of the President and the Vice President shall begin; neither does it say anything about when the terms of Members shall end or when the terms of the President or Vice President shall end. Now, this section attempts to do both.

It provides that the terms of the President and Vice President shall end, and so on; the terms of Senators and Representatives shall end at a certain time; and then it goes on to say, "that the terms of their successors shall begin" at a certain time.

Therefore in the drafting of this section, in an attempt to accomplish the underlying purpose, the committee has not only commenced the term of Members of Congress and ended that term but they have fixed the date for the beginning of the term of his successor.

It seems to me to be extremely technical if, when the committee has before it a bill which ends the term of a Member of Congress, shortens that term, specifies the date, sets the beginning of the term of his successor, that it would then under those circumstances not be germane to attempt, as has been provided for in the amendment offered by the gentleman from Alabama, to provide that the term shall be four years.

I submit to the Chair that under the circumstances under which this underlying purpose is sought to be carried out in the terms of this section that the amendment of the gentleman from Alabama is in order.

Mr. HOCH. If the Chair will bear with me just a moment in answer to the statement made by the gentleman from Minnesota, the gentleman from Minnesota contends that it would be highly technical not to hold this amendment germane. It seems to me it would be much more technical to hold it germane, because it is only by virtue of a technical situation that section 1 affects the term of Members at all. The thing that is proposed is not to affect permanently the term of any of these officers, and after this amendment goes into effect, if it should be ratified, the term of Members would still be the same as it is now—two years—and it is only a mere incident that in bringing about the change in the beginning of the term we do affect by two months the term of the officers who are in office at the time the amendment is ratified. Therefore to hold that this is germane is to so hold because of a technicality and not otherwise.

Mr. BURTNESS. Will the gentleman yield for a question?

Mr. HOCH. Yes.

Mr. BURTNESS. The last clause of section 1 reads as follows:

> And the terms of their successors shall then begin.

Suppose an amendment were suggested to simply add to that language so that the clause as a whole would read, "And the terms of their successors shall then begin and shall end four years after the commencement thereof."

Mr. HOCH. I think it would not be germane for the same reason. It is the substantive matter that is important on this question of germaneness. The substantive thing that the amendment offered by the gentleman from Alabama proposes is to change the length of the term of Members.

Mr. BURTNESS. But the gentleman will agree that the Bankhead amendment does nothing more than that sort of language would do if it were added specifically at this point where it states that the terms of their successors shall then begin.

Mr. HOCH. No; it goes to the substantive thing, namely, the length of the term of Members, whereas the resolution before us does not, except in the mere incidental way I have stated with reference to the first officers, have any effect whatever upon the term, and that is the substantive thing upon which we are seeking to legislate.

Mr. LUCE. Mr. Chairman, although I have the keenest interest in parliamentary law and the science of legislation, I have almost never taken the floor on a point of order; and my confidence in the judgment of the Chairman is so great that I would not now so do if the gravity of the situation did not warrant saying a word in order to call attention to the purpose of the rule about germaneness.

You know very well, Mr. Chairman—I need not dwell upon it particularly for your benefit—but if the committee will indulge me, let me point out that the purpose of the rule relating to germaneness is to put Members on warning that a measure is to be discussed, that a proposal is pending. It is to give the committees assurance that they will not be brought on the floor of the House to face problems to which they have given no consideration, upon which, perhaps, no hearings have been held, no witnesses have been allowed to speak; and there is a broader purpose, in order that the public itself may be on guard, for we are here under the eyes of the Nation, and those of the people who take an interest in public questions have the right to know what we are considering.

Therefore it is that this rule about germaneness has commended itself to all our predecessors, and I trust, sir, that no ruling to-day will lead the House, its Members, or the public to believe that proposals that have not been considered, proposals that have not been meditated upon, may without warning be precipitated for the consideration of the House.

The CHAIRMAN (Mr. LEHLBACH). The Chair is ready to rule.

The Committee of the Whole House on the state of the Union has before it for consideration the text of the committee substitute for the Senate Joint Resolution 47. This substitute being read for the purpose of amendment, the gentleman from Alabama [Mr. BANKHEAD] offers the following amendment:

> SEC. 2. The House of Representatives shall be composed of Members chosen every fourth year by the people of the several States.

To this a point of order is made that the amendment is repugnant to the provisions of the rule on germaneness, which reads as follows:

> And no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

In order to determine whether this amendment is on a subject different from that under consideration it is necessary to examine the subject matter of the legislative proposition to which it is offered as an amendment. An examination of the entire article shows that it is composed of four sections having two distinct and definite purposes. Sections 1 and 2 provide that the term of the President shall commence on the 24th day of January and the terms of Senators and Representatives shall commence on the 4th day of January, instead of as now on the 4th day of March, and that the Congress shall assemble on the 4th day of January, instead of as now on the first Monday of December. That is the distinct proposition involved in the first two sections, the reason for the proposition being to abolish the session of Congress after its successor has been elected and to bring the session of the new Congress nearer the date of election, so that the Congress will be more responsive to the will of the people.

The other proposition deals entirely with who shall exercise the powers of the Chief Executive and perform his duties in the event of the failure to elect the President, Vice President, or both, or in the event of the death of the President elect, or the Vice President elect, or both. These are the distinct and clear-cut propositions involved in the article, and there are no other propositions.

There is no proposition to alter permanently the length of the terms of any of the officers dealt with, either President, Vice President, Members of the Senate, or Members of the House. While in one instance throughout the future history of the country the terms of these officers are shortened by two months, that is merely incident to moving forward the date of the assembling of Congress and the abolition of the session of Congress subsequent to election.

Now, an examination of the amendment offered by the gentleman from Alabama shows that its effect not only deals with the length of the term of the Members, but necessarily affects the make-up of the Senate and of the Congress. Although the Constitution does not in express words say so, it is a necessary result of the structure of our legislature as laid down in the Constitution that a Congress begins with the term of the Members of the House of Representatives and ends with the expiration of the term of the Members of the House of Representatives. That is not the case with the Senate, because the Senate is considered a continuing body, one-third of its Members going out every two years.

So, if this amendment were adopted, it would result in this, that where now in each Congress every Member of the Senate and every Member of the House is a Member at the beginning and remains a Member of the Senate and House until the expiration of Congress, we would have a situation where one-third of the Members of the Senate who began with the Congress would go out in the middle of its work and one-third of the membership of the Senate would come in when the work of the Congress was half done. That shows that this proposition involves not merely the length of the term of the Members of the House of Representatives, and for that reason might be deemed germane to section 1, but other consequences by reason of which it could not be held germane to section 1.

As to the doctrine of germaneness, the Chair has diligently refreshed his memory from the precedents, and will refer first to the decision of former Speaker John G. Carlisle, to which reference has been made.

Mr. Carlisle, prior to his election as Speaker, was a chairman of the Committee of the Whole House on the state of the Union, and in 1880 he rendered a decision in which he discussed at great length the rule requiring amendments to be germane.

> When, therefore, it is objected that a proposed amendment is not in order because it is not germane, the meaning of the objection is simply that it (the proposed amendment) is a motion or proposition on a subject different from that under consideration. This is the test of admissibility prescribed by the express language of the rule; and if the Chair, upon an examination of the bill under consideration and the proposed amendment, shall be of the opinion that they do not relate to the same subject, he is bound to sustain the objection and exclude the amendment.

Representative Fitzgerald, on September 22, 1914, in passing on a point of order that an amendment is not germane, among other things said:

> If it be apparent that the amendment proposed some modification of the bill, or of any part of it, which from the declared purposes of

the bill could not reasonably have been anticipated and which can not be said to be a logical sequence of the matter contained in the bill, and is not such a modification as would naturally suggest itself to the legislative body considering the bill, the amendment can not be said to be germane.

The question might arise whether the doctrine as to germaneness applies to an amendment to the Constitution, and for that reason the Chair directs attention to a precedent to be found in the fifth volume of Hinds, paragraph 5882:

On January 10, 1893, the House proceeded to the consideration of the joint resolution (H. J. Res. 98) proposing amendments to the Constitution substituting the 31st day of December for the 4th day of March as the commencement and termination of the official terms of the Members of the House of Representatives and the United States Senators, and providing that Congress shall hold its annual meeting on the second Monday in January and substituting the 30th of April for the 4th of March as the date for the commencement and limitation of the terms of President and Vice President.

After debate, Mr. William S. Holman, of Indiana, submitted this amendment:

"That the Senate of the United States shall be composed of two Senators from each State, who shall be chosen by a direct vote of the people of the several States for six years, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature; and each Senator shall have one vote."

Mr. Nelson Dingley, jr., of Maine, made the point of order that the amendment proposed by Mr. Holman was not germane to the pending joint resolution.

The Speaker, Mr. Charles F. Crisp, sustained the point of order.

It will be observed that the proposition then pending to amend the Constitution was substantially the same proposition that is pending at the present time. The difference between the amendment of the gentleman from Alabama [Mr. BANKHEAD] and the amendment held not germane by Mr. Speaker Crisp is that the manner of the election of the Members of the Senate was sought to be added to the propositions then, and the lengthening of the term of Members of the House of Representatives is sought to be appended to similar propositions on this occasion.

Just a word further with respect to the germaneness of this amendment to the text of the committee substitute. The Chair calls attention to the language used on September 19, 1918, by Mr. FINIS J. GARRETT, of Tennessee, presiding in the Committee of the Whole House on the state of the Union, on the question of germaneness. He said:

The present occupant of the chair had the honor of presiding as Chairman of the Committee of the Whole when the amendment was proposed to create the Tariff Commission as a part of a revenue bill. The point of order was made, and the Chair held generally that the meaning of the expression "germaneness" under the facts that were presented was that the fundamental purpose of the amendment must be germane to the fundamental purpose of the bill.

The Chair commends that language to the House—

that the fundamental purpose of the amendment must be germane to the fundamental purpose of the bill.

The proposition is now advanced, however, that while the amendment may not be germane to the provisions of the subject matter under consideration, inasmuch as the resolution under consideration amends the Constitution in several particulars, it, therefore, is in order to amend it in any particular, although the amendment may not be germane to the amendments carried in the resolution itself. That is based on a doctrine which is frequently reiterated in this House, that if a bill amends a law in several particulars, the law may be amended by an amendment to the bill in all particulars. The Chair has been unable to find substantial authority for this doctrine. In discussing this contention, Mr. Speaker Clark, on December 5, 1912, stated his opinion very succinctly. He said:

The rule is not that if there are two substantive propositions in the bill you can add anything else to it.

Mr. Speaker GILLETT, on June 19, 1919, speaking on this phase of the question of germaneness, said:

That although more than one clause or section of a law is amended, that fact does not necessarily bring the whole law before the House, but the law itself is only subject to amendment when the propositions under consideration are numerous and go to the heart of the law and change the law in a vital way.

It is insisted that these proposed amendments do not go to the heart of our Constitution or change it in a vital way. The gentleman from Alabama [Mr. BANKHEAD] in his argument has referred to the decision found in Hinds' Precedents, volume 5, section 5824. The Chair is familiar with that decision and calls attention to the situation that led to the ruling upon which the gentleman from Alabama relies. In holding an amendment to the original law in order because the bill under consideration amended the original law in various particulars the Speaker pro tempore, who was Mr. Dalzell, of Pennsylvania, said this:

It is apparent from even a casual examination of the bill that it is a general amendatory bill. Section 1 relates to clause 15 of section 1 of the existing bankruptcy law; section 2 relates to clause 5 of section 2 of the existing bankruptcy law; section 3 relates to clause 4 of subdivision A of section 3 of the bankruptcy law; section 6 relates to section 17, and section 10 relates to section 40, and so on, skipping from section to section throughout the entire law, without regard to the particular relation of these sections to each other. In other words, 16 sections in all of the 70 sections of the bankruptcy law are here sought to be amended, or more than one-fourth of the entire law.

In other words, the decision upon which reliance is placed for the doctrine was in a case where the bill under consideration revised generally the original law.

Mr. Sidney Anderson, on June 10, 1921, in passing on an amendment to a bill amending the war risk insurance act in various particulars, the amendment under consideration applying to a section of the original act, not dealt with by the pending bill, said:

The Chair does not think that the general rule can be laid down that where several portions of a law are amended by a bill reported by a committee, it is not in any case in order to amend another section of the bill not included in the bill reported by the committee nor does the Chair think that the opposite rule can be laid down and rigidly applied in every instance. The Chair thinks that a question of this kind must be determined in every instance in the light of the facts which are presented in the case.

The point of order was sustained.

Chairman Stafford, on December 10, 1921, in passing on a similar point of order as now under consideration, said:

The gentleman invokes the rule that because the bill under consideration amends two or three provisions of the Judicial Code, therefore it is in order to amend all or any section of the entire Judicial Code. The Chair can not subscribe to that doctrine, since it would violate the fundamental principles that guide the procedure of the House in the consideration of questions that come up from time to time.

The Chair has fortified himself with many other precedents, but does not deem it necessary to go further into an exposition of what the records disclose.

In order to point out the fact that the decision that the Chair is about to render is not based on the decisions only of certain presiding officers, the Chair calls attention to the fact that a decision was made on this very point on May 20, 1920, and that an appeal therefrom was taken, and the decision at that time, holding that the amendment was not germane, was sustained by an almost two to one vote; so that the highest authority that can exist for the ruling that the Chair indicates he is about to make, is the decision of the House itself, on an appeal, sitting in Committee of the Whole House on the state of the Union.

On that occasion a bill containing a series of amendments to the war risk insurance act was under consideration, dealing with various matters of administration but not with the beneficiaries or the benefits provided for in the act. Mr. Sims of Tennessee offered an amendment to include a certain class within the beneficiaries under the act. The point of order that the amendment was not germane was sustained.

The decision was made by the present incumbent of the chair, who reads it not because it has intrinsic merit but that it may be known just what question was involved in the precedent established by the House itself:

On May 20, 1920, Mr. LEHLBACH ruled as follows:

"The amendment of the gentleman from Tennessee [Mr. Sims] reads:

"'That section 401 of the war risk insurance act is amended as follows:

"'The Chair presumes the intent is to add to the end of section 401 this additional proviso. The bill under consideration is a bill to improve the facilities and service of the Bureau of War Risk Insurance and further amending and modifying the war risk insurance act as amended. The first section of the bill provided for the installation of regional offices and suboffices, and the various other sections of the bill provide for the mode of administration and method and manner of making payments under the bill. The bill is entirely within that general scope. It is not a bill generally amending the war risk insurance act. It does not amend it in various particulars, but only amends it in the method or manner of making certain payments; in

matters of administration, in other words. It does not deal with a class of beneficiaries or change the advantages that beneficiaries may enjoy, nor does it in any way define or modify who such beneficiaries may be. The Chair therefore thinks that the amendment offered by the gentleman from Tennessee is not within the scope of the bill or any of the provisions of the bill and is, therefore, not germane, and sustains the point of order.'"

The Chair, therefore, sustains the point of order that this amendment is not germane to the joint resolution, nor is it in order, under the rule of germaneness, because the resolution amends the Constitution itself in various particulars.

Mr. BANKHEAD. Mr. Chairman, I respectfully appeal from the decision of the Chair.

The CHAIRMAN. The gentleman from Alabama appeals from the decision of the Chair. The question is, Shall the decision of the Chair stand as the judgment of the committee?

The question was taken, and the Chairman announced himself as in doubt.

The CHAIRMAN. Those in favor of sustaining the decision of the Chair will rise and stand until they are counted.

The committee divided; and there were—ayes 207, noes 33.

The CHAIRMAN. The decision of the Chair stands as the judgment of the committee.

Mr. CHINDBLOM. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Illinois moves to strike out the section. The gentleman is recognized for five minutes.

Mr. CHINDBLOM. Mr. Chairman, this is not a pro forma motion. If the committee adopts the motion to strike out this section, I shall follow it by further motions to strike out section 2 and section 5.

I would be in favor of the retention of sections 3 and 4, because they deal with what I conceive to be a matter of immediate necessity, or, at least, a matter of large importance at the present moment. They relate to the election of a President and Vice President where the Electoral College has failed to elect, and provide for several hiatuses now actually existing in the provisions of the Constitution.

I observed in the discussion of this constitutional amendment that at least one Member was of the opinion that he was merely voting upon a question of a referendum; that all he was doing in supporting this resolution was to vote to submit to the legislatures of the States the question whether they desired the Constitution of the United States to be amended in the manner here proposed. I want to say that I conceive my duty to be much larger and greater and more important than that. I believe that I myself, using my own judgment. reaching my own opinion, following the best light that has come to me in determining for myself, and I might say also for my constituency, as representing them, should consider whether it is in the interest of all the people of the United States that an amendment such as here proposed shall be adopted. So we can not take the consoling unction to our souls and absolve ourselves from responsibility by imagining that we are merely submitting this amendment to the States. We are saying to the people of the United States, "We believe the Constitution should be amended in the manner here proposed." We are actually sponsoring and recommending the amendment.

I am opposed to the sections which I have enumerated—sections 1, 2, and 5—not so much because they relate to the period of the time when Congress shall convene, but because of the very dire consequences which to my mind the adoption of this provision might have in the election of a President and Vice President of the United States under the conditions which will exist even after the adoption of this amendment.

We are proposing here that the Congress shall take office on the 4th of January and 20 days later, on the 24th of January, Congress shall be ready to determine who shall be the President and Vice President of the United States. In other words, it is necessary that every question of contest as to membership in the House or Senate, every difference of opinion as to the organization, and the preliminary labor necessary for the functioning of both the House and the Senate shall have been completed within 20 days prior to the inauguration of the President of the United States.

We can well dispose of this question as to the convening of Congress by statute if we desire. We can propose, I hope, some other amendment which will not subject the country to dangers such as were suggested by the gentleman from Virginia [Mr. MOORE] and the gentleman from South Carolina [Mr. STEVENSON]. I commend to the House the study of the remarks made by both those gentlemen.

I am afraid that we have been too much influenced by the so-called argument that the last session of a Congress now is a pro forma session and is largely dominated by certain gentlemen who are described as "lame ducks" and who are said to control action in that session. The Members who have more experience in the House know that there has not been an occasion within the last nine years, at least, when any such situation has arisen. I would rather leave to that session of the Congress, that closing session under our present system, the matter of passing appropriation bills and passing necessary legislation after the election in November than I would leave it to a new Congress after 20 days of existence, 20 days of attempted organization, to determine the question of the election of the President and Vice President in case of a contest. And if there should be any question or difficulty about the election of a President or Vice President we may be certain that there will be contest after contest in the various congressional districts and in the States as to Representatives and Senators which will be presented to the Congress for their determination at that very time.

Therefore, Mr. Chairman, without any further argument, I ask unanimous consent to revise and extend my remarks, and insist upon my motion, not as a pro forma motion, but as a substantive motion. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired. Is there objection to the request of the gentleman from Illinois to revise and extend his remarks?

There was no objection.

Mr. GIFFORD. Mr. Chairman, I am naturally anxious to expedite, if possible, the passage of this resolution. Now that the amendment has been ruled not in order it should be possible speedily to dispose of the other amendments which, it is expected, will be offered. There are two which, I think, would not be opposed by the committee. Another, that as to the limitation of May 4, seems to be the principal one to which objection may be made. This has already been much debated, and it would seem that we should be able to reach a vote on the proposal by 5 o'clock. I wish to avail myself of this opportunity to comment briefly on certain arguments which have been advanced in opposition to the report of our committee.

We wish to be reasonable and not object to amendments that do not take the heart out of the resolution. I think that the new Members of the Congress, having had their 13 months of waiting after their election, are fully as well qualified to judge the desires of the people as some of us who may have been here longer.

If I should remain here long enough to be made the leader of the House or be elected Speaker—which is, of course, highly improbable—or even be made chairman of the Committee on Rules or on Appropriations, I should, I suppose, love the machinery that placed me there. I should grow exceedingly conservative and regard our present political machinery as about perfect.

But the people are watching the Congress. I think that many of us full well realize that they are demanding that the present situation be changed. The committee has felt that there is a very real demand for legislation of this nature. The American Bar Association, a wonderful organization, appeared before the committee as the first witness favoring a change. I regret that not more copies of the hearings are available for the Members to read. It should be remembered that we have held hearings over a period of several years and have listened to many strong and able advocates of the proposed change.

The argument made by the chairman of the Committee on Appropriations was to the effect that short sessions of Congress would be of benefit to the country. He argues that the Budget would not be available and passed upon by the President elect, but if the President elect will have had time enough to write his message advising us as to the legislative needs for the session, surely he can approve a Budget previously prepared by the Director of the Budget, there being plenty of opportunity to make supplementary estimates later as they may be needed or desired.

Mr. MONTAGUE. Mr. Chairman, I wish to offer a perfecting amendment.

The CHAIRMAN. A motion to perfect has precedence over the motion that is pending, and the Clerk will report the amendment.

Mr. MONTAGUE. Mr. Chairman, I move to strike out the words in line 5, page 3, "the fourth day of" and insert "the second Monday in."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MONTAGUE: Page 3, line 5, strike out the words "the fourth day of" and insert in lieu thereof the words "the second Monday in."

Mr. HOCH. Mr. Chairman, I make the point of order that the amendment is not germane, because the effect of it would

be to change the length of term of Members of Congress. The amendment is therefore out of order under the ruling just made by the Chair. The second Monday in January not falling always upon the same day of the month, the effect of it would be to have a variable term for Members of Congress. The length of the term would vary several days from year to year. I am in sympathy with what I think is the gentleman's purpose, that the date of the meeting which is provided for in section 2 should be upon Monday, but the proposed amendment would affect the length of the term and not the date of meeting.

Mr. MONTAGUE. I will be very candid with the gentleman. I made the motion for the purpose of getting the floor. I do not care whether you vote it in the resolution or not, because I think the whole proposition is bad. [Applause.]

The CHAIRMAN. The Chair overrules the point of order.

Mr. MONTAGUE. Mr. Chairman, I am very reluctant to impose myself upon the committee after an arduous day, and so late in the afternoon. If I were not impelled by a sense of conviction I would not do so. I do not know that I can add anything to the debate or that I can contribute to arguments that have been made, but I wish to relieve myself of my duty, and in an effort to do that I beg your patient and indulgent consideration.

I would have this committee go back to the Constitutional Convention of 1787. In this convention, when the question of the meeting of Congress arose, Mr. Madison wished to know the reasons "for fixing by the Constitution the time of the meeting of the Legislature, and suggested that it be required only that one meeting at least should be held every year, leaving the time to be fixed or varied by law." Mr. Ellsworth was of like opinion. Mr. Madison again expressed himself at a subsequent point in the debate as of the same opinion. Mr. Mason, the author of the great bill of rights, "thought the objections against fixing the time insuperable." I repeat, he thought the objections to fixing the time insuperable; "but that an annual meeting ought to be required as essential to the preservation of the Constitution." Mr. Randolph held the same opinion and offered an amendment which is practically clause 2, section 4, of Article I. But as there was no provision in the Constitution for regulating the periods of meeting, and as some precise time must be fixed, he moved that the words "unless a different day shall be appointed by law," should be added after the "second Tuesday of December," the language already agreed upon. This had to be done, for otherwise Congress might not exist. So the Constitution gave that date as the physical medium by which Congress could operate, and that is the reason for the present date.

May I say, Mr. Chairman, that this enlarging amendment was carried by eight States to two, and by the votes of the weightiest members of that body, members of an ability that may not occur again unless some great event brings them forth from the womb of chaos.

The provision of the Constitution is practically in the words of Mr. Randolph:

> The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December—

Now Mr. Randolph's language—

> unless they [the Congress] shall by law appoint a different day.

Now, I submit, so far as getting rid of what has been opprobriously called "lame ducks," we need no constitutional amendment. Congress can change these dates. Congress can "by law appoint a different day" so long as we keep within the two years for which Representatives are elected.

Mr. BURTNESS. Will the gentleman yield?

Mr. MONTAGUE. In a moment.

We have full and ample power to do this now under the existing Constitution. There can be, I think, no successful contradiction of that construction of the Constitution. If I am sound in this, why should Congress desire to have a constitutional amendment to bind it to do something it already has the right to do? Are we afraid of ourselves?

I now yield to the gentleman.

Mr. BURTNESS. I was wondering if the gentleman's amendment was not really intended to be offered to section 2 rather than to section 1. Section 2 deals with the time of meeting, while section 1 deals only with the term of the Members of Congress.

Mr. MONTAGUE. I will state to the gentleman, I have no special interest in the amendment that I have offered, but I have a special interest in the whole resolution. [Applause.]

The CHAIRMAN (Mr. CHINDBLOM). The time of the gentleman from Virginia has expired.

Mr. MONTAGUE. Mr. Chairman, I ask for five additional moments.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. RAMSEYER. Will the gentleman yield.

Mr. MONTAGUE. I yield to the gentleman from Iowa.

Mr. RAMSEYER. Does the gentleman object to the Constitution fixing definite lengths of terms of President and of Members of Congress and of Senators?

Mr. MONTAGUE. I will not discuss that now.

Mr. RAMSEYER. The Constitution itself fixes that.

Mr. MONTAGUE. I have no objection to what the Constitution does, I only object to what you want to do to the Constitution. [Laughter and applause.]

Mr. RAMSEYER. The committee is not attempting in section 1 to do anything the gentleman is talking about.

Mr. MONTAGUE. I hope the gentleman will not misunderstand me. I am dealing frankly with the House. I do not often appear upon the floor. I am simply asking their liberality and generosity to enable me to speak for a few moments against this resolution, and my amendment was designed to give me a parliamentary status whereby I could obtain the floor.

Mr. RAMSEYER. I want the gentleman to have all the time he desires, and nobody is crowding this bill, as I understand.

Mr. MONTAGUE. No; it ought not to be crowded, and I have the utmost confidence in the fairness of the gentleman.

Mr. RAMSEYER. But fixing the length of the term of Congress is one thing, and fixing the time of the meeting of the Congress is quite a different thing.

Mr. MONTAGUE. Yes; and I contend that we have the right now under the Constitution to fix the time of the meeting.

Mr. RAMSEYER. We agree with you there.

Mr. MONTAGUE. That is all I am contending.

Mr. RAMSEYER. Within certain limitations, of course.

Mr. MONTAGUE. In other words, it is just as competent for this Congress to fix the 4th day of January by its own enactment as it is to fix the 4th day of January by this resolution offered in the form of a proposed amendment to the Constitution. We can do now under the Constitution in this matter just what we could do under the proposed amendment, if it should be ratified by the people of this country.

I must hurry. I wish to speak briefly of the President. We are curtailing by this proposed amendment the time within which the President-elect may prepare for the discharge of his very onerous and august duties. We are subtracting, roughly, two months from the present period of preparation.

I submit that from the election in November until the 4th of March following is not at all too much time to give the President of the United States within which to make adequate preparation for his duties. [Applause.]

I think he needs 13 months more than the Members of the House need 13 months.

Mr. HUDSON. Will the gentleman yield for a question?

Mr. MONTAGUE. Yes.

Mr. HUDSON. Does the gentleman contend that we could fix the date of the incoming Congress, say, beginning the 4th of March without changing the Constitution?

Mr. MONTAGUE. I think so.

Mr. RAMSEYER. Will the gentleman yield? I think we can, but to fix it on the 4th day of January without changing the term of the beginning makes one session of two months.

Mr. MONTAGUE. I am not speaking of the mechanics or merits. I am speaking of the competency of the body to make the change.

Mr. RAMSEYER. Will the gentleman yield once more? Speaking of the beginning of the meeting of Congress, when the gentleman suggests that Congress can meet on the 4th day of January——

Mr. MONTAGUE. What was in my mind by suggesting a day of the week was that we ought not to meet on Sunday.

Mr. RAMSEYER. You could not change the beginning of the term of Congress without a constitutional amendment.

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

Mr. RAMSEYER. Mr. Chairman, I ask that the gentleman's time be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONTAGUE. This question has been precipitated upon the House by the agitation of the so-called lame-duck sessions, an argument that I must repel so far as my individual views are concerned. I do not think that this country has suffered

grievously from the "lame ducks." I have been in the House a little over 14 years, and I know some ducks that never walked so well as they did after they became lame. [Laughter.] Nor did they ever fly so well as they did after there were winged. [Laughter.] They were brought to a sober sense of responsibility and exercised their judgment without fear or favor or hope of reward.

Mr. MOORE of Virginia. Will the gentleman yield? Some one sitting near me said that this is a quack remedy for a supposed lame-duck evil. [Laughter.]

Mr. MONTAGUE. Now, when we come to the President, we hear the argument that should there be a failure to elect we desire an election by the Congress that comes in with or through the presidential election. You do not wish a judicial tribunal, you desire a Congress with all the passion and prejudice of the campaign.

I would have little hope of the American Republic or the existence of our institutions if I thought the old Congress did not have sufficient honesty and intelligence to act fairly in an election of the President. I would rather select a judge in a trial where his interest is not involved than to take my chances before a court having personal interest or partisan interest in the case.

Now, another observation—if we meet under this resolution on the 4th of January, and there is a failure to elect a President, is not the House powerless to vote under certain conditions? My eloquent and able friend from Missouri intimated that the House, though unorganized, is competent—but is there a House? Since 1789 we have been required to elect a Speaker and organize before doing any other business. That is a long period, 139 years. I may be in some things too much swayed by traditions, but I must have some respect for the operation of the machinery of the House for 139 years. [Applause.] This resolution is a matter of machinery, and should be set in motion or operation by constitutional methods. It is procedural in character, and should be under the flexible control of the legislature—the Congress, where it now is.

We may have the House here in session in a great party contest, when our partisan passions run high, and there is no prejudice quite so insidious as partisan prejudice. Persons who possess it in its most aggravated form, dream not of its virus. After the Congress is assembled, we may have a contest for the Speakership. Oh, the explanation that this is short work. Do Members know that one time it took from December until the February following to elect a Speaker of this House, Mr. Pennington of New Jersey, as I recall. Other contests have run over many days, and under settled procedure. Since the statute of 1789, as I have heretofore stated, no other business of the House shall be done until the House is organized.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. MONTAGUE. Mr. Chairman, I ask unanimous consent for three minutes more.

There was no objection.

Mr. MONTAGUE. In answer to the argument of my friend from Missouri, I submit that the procedure which he suggests as a solution of this difficulty named can not be determined by a disorganized House. It should be not within the jurisdiction of parliamentary institutions to submit so grave a matter as the election of the President of the United States to the machinery of chaos—an unorganized House, with no restraints, with no lines of operation, just thrown hurly-burly into a mass of men; with no Speaker, under no oath, perhaps not even a Clerk, for he may have died. This would be chaos run mad.

To recapitulate, I have no objection to the convening of Congress nearer to the date of the election of its Members, though I do not think the abuses that follow are as aggravated as have been portrayed in the debate. Argument has been made here that the short session will encourage filibusters. That is true, but the end of any session will encourage filibusters, I care not whether you fix the date on the 4th of May or the 4th of March. There is no alchemy in the change of dates. The question is, Is that the end of the session? and while I am in favor of orderly procedure and I regret some filibusters that have happened, I am profoundly grateful for others that have happened. I think that the evils that we would fly to will outweigh the evils that we now endure. [Applause.]

Mr. WOOD. Mr. Chairman, the chairman of this committee having this bill in charge, and for whom I have a very high regard, a few moments ago deplored the possibility of any amendment being submitted to this resolution that would take the heart out of it. In my opinion the best thing that this committee can do is to take the heart out of this resolution. I believe that the country has concluded, or is very rapidly concluding, that the Congress of the United States submitted one amendment that should have had its heart taken out at the time it was being considered. I refer to that amendment which makes it a law to elect Senators by a direct vote of the people. If that question were before this House to-day, with the experience that has been had since it became a part of the fundamental law of this country, I do not believe it would get 15 votes in the House.

Mr. BROWNE. Mr. Chairman, will the gentleman yield?

Mr. WOOD. Yes.

Mr. BROWNE. Why does not the gentleman submit such an amendment and try it?

Mr. WOOD. I expect and hope that the time is not far distant, recognizing the mistake that was made in adopting that amendment to the Constitution, when this body will take the initiative and propose an amendment striking it from the Constitution of the United States.

Mr. Chairman, I can not feel that this resolution has been thoroughly considered. I do not believe it would be conducive to the best interests of the country. Under the law as it now exists the electoral vote is to be counted upon the second Wednesday of February. That law would have to be changed and, of course, it may be changed. The gentleman from Virginia [Mr. MONTAGUE] referred to the fact and cited an instance where this House was more than a month in electing a Speaker. There is one instance in the history of the Congress of the United States where the House was more than three months in electing a Speaker. What has happened may happen again. Either the gentleman from Iowa or the gentleman from New York, I forget which, attempts to make light of the argument of the gentleman from Pennsylvania that it is well that there be a cooling time after a Congress is elected. I think that argument is worthy of the greatest consideration. We are rapidly degenerating not into a condition where two dominant political parties control, but into a system of bloc and clique and association control, and we are passing laws of the most vital importance, affecting the weal and woe of this country, which are submitted in passion and adopted in passion. If there is that time, 13 months, in which sober thought may take possession of those who are elected to control the destinies of this country in the House of Representatives, they may be able to dispel that passion and dispel that prejudice that actuated the electorate in electing them to this body. We can not spend too much time in deliberation upon the statutes of this country which are adopted for the control of our Government, and we should be very slow indeed to change the fundamental law of the country, the Constitution of the United States.

Mr. Chairman, I am of opinion that the greatest service that this House can render is to take the heart out of this resolution, and I am of opinion that this debate is not without service because it will awaken in the minds of the people of the United States the importance of the greatest deliberation and the most profound thought and consideration before it changes the Constitution of the United States. [Applause.]

Mr. CHINDBLOM. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CHINDBLOM. Was the amendment offered by the gentleman from Virginia withdrawn or is it pending?

The CHAIRMAN. It is pending.

Mr. WHITE of Kansas. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration Senate Joint Resolution 47, proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress, and had come to no resolution thereon.

THE COOPER BILL

Mr. FENN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a communication from the Governors of New Hampshire, Connecticut, Rhode Island, and Vermont regarding the Cooper bill.

The SPEAKER. The gentleman from Connecticut asks unanimous consent to extend his remarks in the RECORD by printing a communication from various governors with regard to the Cooper bill. Is there objection?

There was no objection.

Mr. FENN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following communication from the Governors of New Hampshire, Connecticut, Rhode Island, and Vermont regarding the Cooper bill:

To the Congress of the United States:

As governors of some of the States of the United States which are to be affected by the passage by Congress of the Hawes bill now pending in the Senate, and the Cooper bill now pending in the House of Representatives, we urge your earnest consideration of the advisability of enacting into law the principle contained in these measures.

We believe that the passage of this legislation may be the entering wedge to the adoption of such laws as will ultimately result in permitting a State to determine with what States it will carry on interstate business, a principle which should not be extended beyond the scope of the police power.

Further than this, we feel that every State would be obliged to pass statutes prohibiting the sale of the goods covered by such legislation for its own protection, thus completely destroying the market for such goods and bringing about a condition of unemployment in prisons and correctional institutions to the serious injury of the inmates thereof, and a great increase in expense of maintenance of such institutions.

It is therefore our opinion that this legislation ought not to pass.

Respectfully submitted.

H. N. SPAULDING,
Governor of New Hampshire.
JOHN H. TRUMBULL,
Governor of Connecticut.
NORMAN S. CASE,
Governor of Rhode Island.
JOHN E. WEEKS,
Governor of Vermont.

THE HAWES-COOPER BILL

Mr. CELLER. Mr. Speaker, I ask unanimous consent that my colleague, Mr. JACOBSTEIN, now out of the city, have the right to extend his remarks in the RECORD on the subject of the Cooper bill.

The SPEAKER. The gentleman from New York asks unanimous consent that his colleague, Mr. JACOBSTEIN, may be permitted to extend his remarks in the RECORD on the subject of the Cooper bill. Is there objection?

There was no objection.

Mr. JACOBSTEIN. Mr. Speaker, under leave granted to extend my remarks, I ask to have printed in the RECORD the following communication from the Legislature of the State of New York, expressing approval of the bill now before Congress known as the Hawes-Cooper bill (S. 1940; H. R. 7729):

Resolution of the New York State Legislature relative to the Hawes-Cooper bill (S. 1940, H. R. 7729)

(By the Senate)

Whereas a bill has been introduced in the Senate and House of the United States Federal Congress which has for its purpose granting to the States the power to legislate for self-protection against the products of convict labor from other States, as follows:

"A bill to divest goods, wares, and merchandise, manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

"Be it enacted, etc., That all goods, wares, and merchandise manufactured, produced, or mined, wholly or in part by convicts or prisoners, except paroled convicts or prisoners, or in any penal and/or reformatory institutions, transported into any State or Territory of the United States and remaining therein for use, consumption, sale, or storage, shall upon arrival and delivery in such State or Territory be subject to the operation and effect of the laws of such State or Territory to the same extent and in the same manner as though such goods, wares, and merchandise had been manufactured, produced, or mined in such State or Territory, and shall not be exempt therefrom by reason of being introduced in the original package or otherwise."

Whereas the enactment of this bill will empower the States that do not permit the products manufactured in their penal institutions to be placed on the public market to protect themselves from the products of penal institutions of other States, and the object is to protect free labor which is now and for many years has been suffering from the competition of products made by the inmates of penal institutions: Therefore be it

Resolved (*if the assembly concur*), That the New York State Legislature hereby extends its approval of the bill now before the Federal Congress and urges its passage; it will be a humane law that has been demanded by the people of our country for more than half a century; be it further

Resolved (*if the assembly concur*), That copies of this resolution be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Federal Congress and to Representatives of the State of New York in the United States Senate and House of Representatives.

BY THE ASSEMBLY

Whereas the State of New York has for the protection of labor from competition with prison-made goods enacted laws compelling the labeling of all goods made by convict labor; and

Whereas the prison-made products of other States having no such laws are being shipped into this State and sold in competition with the products of free labor: Therefore be it

Resolved (*if the senate concur*), That the Legislature of the State of New York petition and urge Congress to pass the Hawes-Cooper bill now pending in the House of Representatives providing that all prison-made goods for State or interstate sale shall be plainly marked as such; and be it further

Resolved (*if the senate concur*), That our Representatives in Congress be asked to further the passage of such legislation.

Indorsements of the Hawes-Cooper bill have also been received from the following business firms and organizations of the State of New York:

International Association of Garment Manufacturers, 395 Broadway, New York City.

H. D. Bob Co. (Inc.), 40 Leonard Street, New York City.

New York Photo Engravers Union, No. 1, 502 World Building, New York City.

United Textile Workers of America, 1 North Mohawk Street, Cohoes, N. Y.

American Meat Cutters, Local No. 95, 42 Nichols Street, Rochester, N. Y.

Boot and Shoe Workers' Union, 62 State Street, Rochester, N. Y.

Journeymen Stone Cutters' Association, Rochester Local, Rochester, N. Y.

Consolidated Machine Tool Corporation of America, Rochester, N. Y.

Bakers' Union, No. 14, 530 St. Paul Street, Rochester, N. Y.

Nine State federations of labor and 54 industrial organizations in addition have sent communications urging the enactment of this bill into law.

CERTAIN AMENDMENTS TO THE CONSTITUTION

Mr. LEA. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a substitute which I will propose to-morrow to section 3 of this proposal.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD by inserting an amendment which he proposes to offer to-morrow to the pending resolution. Is there objection?

There was no objection.

The substitute referred to follows:

Amendment to be offered by Mr. LEA: Page 3, strike out lines 15 to 24, inclusive, and lines 1 and 2 on page 4, and insert the following, preceded by quotation marks:

"SEC. 3. If the President elect dies, then the Vice President elect shall become President. If a President is not chosen before the time fixed for the beginning of his term, or if the President elect fails to qualify, then the Vice President elect shall act as President until a President has qualified; and the Congress may by law provide for the case where no Vice President elect has qualified, declaring who shall then act as President or the manner in which a qualified person shall be selected, and such person shall act accordingly until a President or Vice President has qualified."

FARM RELIEF

Mr. BROWNING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a letter that my colleague from Texas [Mr. JONES] has written on the export debenture plan for farm relief.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by printing a letter written by his colleague [Mr. JONES]. Is there objection?

There was no objection.

Mr. BROWNING. Mr. Speaker, pursuant to the consent granted me for extending my remarks, I submit the following letter written by my colleague, Hon. MARVIN JONES, of Texas, on the export-debenture plan for farm relief:

WASHINGTON, D. C., *February 17, 1928.*

Mr. J. M. NORTH,
Editor The Star-Telegram, Fort Worth, Tex.

DEAR MR. NORTH: I have read with interest the editorial entitled "Recognizing the tariff," which appeared in a recent issue of your paper, and having reference to the export premium or debenture plan as a solution for the farm problem. It is an able discussion of this proposal, and I thank you for the attention given it. However, there are one or two suggestions in the editorial that I should like to comment upon. You say the plan "recognizes the tariff as a benefactor and by inference approves it." I can not agree to this statement in its full meaning. No one has ever questioned that the high tariff has certain advantages for the manufacturer, but these advantages are gained by way of increased prices which the people of the whole country must pay for the articles manufactured.

Under the present tariff act the Government collects as customs duties on foreign-made goods coming into this country approximately $600,000,000 per year. Behind the tariff wall the manufacturers collect

in increased prices some $3,000,000,000, according to conservative estimates. Of course, it is a good thing for them. No tariff can give any such great advantages to the basic agricultural commodities. This is true because we produce a surplus of these commodities—a surplus of wheat, a surplus of cotton, a surplus of corn, and a surplus of most products of the farm. This surplus must seek an outside market. At the same time those who produce these commodities must buy their supplies under the increased price of highly protected articles. The cultivator that cost $28 in 1914 under a revenue tariff cost $62 in 1924 under the protective policy. The tariff covered all the component parts that went into the making of the cultivator. The grain binder that cost $150 in 1914 cost $225 in 1924, with similar increase for farm machinery generally. The price of aluminum ware, cutlery, clothing, etc., materially advanced. These increases the farmer must pay.

The export premium or debenture plan purposes to issue to any farmer, cooperative organization, or other exporter of basic farm commodities, a premium certificate measurably equivalent to the tariff, and to make these tenderable in payment of tariff duties, or imported articles generally. The effect would be reflected back, and would increase the price of the various farm commodities in the domestic market. The premium thus placed on exportation would automatically lift the domestic price substantially the amount of the premium.

The export corporation provision is for the purpose of removing any possibility of the full advantages of the premium not being reflected back in the price paid to the farmer, and would be a sort of "musket behind the door" to prevent any collusion to deprive the farmer of the increase in price. If the farmer were not getting the full advance in price on any commodity the corporation could simply step in and buy, export, and sell such commodities. It would then be a powerful agency in assuring the farmer a reasonable price.

So much for the plan. How about its actual results? Its direct advantages would be $10 additional per bale on cotton, or $150,000,000 additional to the southern cotton farmers, 20 cents per bushel on wheat, or $160,000,000 additional to the wheat growers; similar advantages would accrue to other crops. Then, too, its stimulation of world trade and prices would furnish great indirect advantages.

Since the farmer because of the tariff must pay an increased price for the articles he buys, is it unfair to furnish him a correspondingly increased price tied onto the same system for the commodities he has for sale? Is there anything akin to party disloyalty in saying that whatever laws are enacted shall as far as possible have a national application? Is it wrong to provide that when the farmer exports a commodity and sells it in a world market that he may purchase the things he needs in that world market and bring them in without actual payment of duty? If so, then what becomes of the doctrines of equal rights to all?

Whether we have a high tariff or a revenue tariff, the export premium could be used with rates adjusted to suit the tariff schedules.

I believe in a revenue tariff, but in applying that tariff it should be made to cover every article coming through the customhouse from which a revenue may be derived, whether it be the raw product or the finished article. This has been good Democratic doctrine since Andrew Jackson's day. But whatever tariff there is, it should be uniform, and the debenture plan will tend to make it so.

You indicate that some may have fears of mortal flaws in operation. I can see no basis for such fears. It is not new. It is not untried. A similar plan is now in effect in four countries—Germany, Sweden, Czechoslovakia, and partially in France.

It was first enacted in Germany in 1902, and reenacted in 1925. It covers wheat, oats, buckwheat, and other principal agricultural products of Germany. One of the students in that country says of its operation, "That it certainly put money in the pockets of the farmer."

It was adopted in England more than 100 years ago, and remained a part of her system until the great increase of her population called for the consumption of more farm products than her limited acreage could produce. Thereupon she ceased to be an exporter of farm products, and the plan was naturally not needed any longer.

Everyone who has thoroughly studied this proposal admits that it would give the farmer increased prices. Everyone must admit its fairness. It will tend to equalize values as between agriculture and industry. The whole farm-movement cry for five years has been for equality. Why not give it to them? The export plan would require no expensive machinery. It is grounded on legal principles. It would be simple in application, national in scope, and effective in operation.

RADIO EQUALIZATION AMENDMENT

Mr. McKEOWN. Mr. Speaker, I ask unanimous consent that my colleague from Tennessee [Mr. DAVIS] be permitted to extend his remarks in the RECORD on radio legislation.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that the gentleman from Tennessee [Mr. DAVIS] be permitted to extend his remarks in the RECORD on radio legislation. Is there objection?

There was no objection.

Mr. DAVIS. Mr. Speaker, there has been much misrepresentation of the purpose and effect of the amendment designed to insure a fair distribution of broadcasting licenses, wave lengths, and station power, which the Committee on the Merchant Marine and Fisheries has reported to the House, and which will come up for action in the House to-morrow or next day.

The lobbyists and propagandists of the radio monopoly have persistently disseminated the false argument that the station power in all the other zones would be reduced to the power now allocated to the zone with the lowest power if this amendment should be adopted. The amendment directs no such thing; nobody wants that done, and surely not even the present commission would be foolish enough to so administer the provision. The amendment authorizes and directs an equalization between the zones and a fair and equitable allocation within each zone in proportion to population. It is a perfectly fair and simple proposition.

The station power allotted to all the zones now amounts to about 600,000 watts. There would certainly be no good reason for reducing this power. It could well be increased.

If the first zone, with only 3.63 per cent of the total geographical area, can absorb 223,000, or 36.98 per cent of the power, surely the other zones, with so much greater geographical area, could absorb as much power much more easily. Consequently, if the Radio Commission desires to continue the present amount of power in the first zone and the people therein are satisfied with the present condition, they need not reduce the power in the first zone but increase the power in the other zones. However, the commissioners have repeatedly stated that there should be reductions in the congested areas, and probably the course which would and should be pursued would be that a fair equalization would be brought about by both increases and reductions—that would be a matter of administration to be worked out by the commission.

As a matter of fact, the listeners in the highly congested areas are suffering more than anybody else. They can satisfactorily hear only a few of their very high-powered stations, and no outside stations.

However, those of us in the neglected areas are only asking for a square deal for our sections. We want an opportunity to have our own stations with decent wave lengths and adequate power so that we can hear them, as well as the New York stations.

The following tables give some illuminating facts, under the present allocation.

Under the equalization clause, and with the present national station power, which would undoubtedly be the very minimum, it will be noted that all of the States except three or four would be entitled to increased station power:

State	Per cent Nation population	Per cent Nation receiving sets	Per cent Nation power	Per cent zone population	Per cent zone receiving sets	Per cent zone power now given
ZONE 1						
New England	6.9	9	4.34	30	31	8.5
Connecticut	1.3	1.23	.35	5.7	5	.1
Massachusetts	3.6	5.68	3	16	23	8.8
New York	9	10.09	27	43	45	72
New Jersey	2.9	2.98	2.88	13	12	7.8
Maryland	1.4	1.26	.95	6	5.2	2
ZONE 2						
Pennsylvania	8.1	7.74	9.9			
Ohio	5.4	5.6	4.6	23.4	26.5	25.8
Michigan	3.4	4.18	2.5	15.6	19.08	14.4
Virginia	2.1	1.4	.38			
West Virginia	1.4	.93	.06			
Kentucky	2.3	1.2	.17			
ZONE 3						
Zone 3	23.14	15.97	7.8			
ZONE 4						
Indiana	2.74	2.72	1.05			
Wisconsin	2.5	2.6	1.05			
Minnesota	2.3	2.3	1.69			
Nebraska	1.2	1.55	.99			
Kansas	1.65	1.55	.66			
Missouri	3.2	3.1	2.83			
Illinois	6.6	7.2	13.8			
ZONE 5[1]						
California	3.19	6.34	4.4			(1)
Montana	.51	.48	.11			(1)
Idaho	.40	.42	.37			(1)
Wyoming	.18	.23	.083			(1)
Colorado	.87	1.27	1.7			(1)
New Mexico	.33	.33	.83			
Arizona	.31	.38	.12			(1)
Utah	.42	.63	.2			(1)
Nevada	.07	.08				(1)
Washington	1.26	1.85	1.9			(1)
Oregon	.72	1.10	.9			(1)

[1] Equalization amendment on basis of present national power would give States in fifth zone following increase of station power: California, 18,060; Montana, 6,420; Idaho, 245; Wyoming, 2,020; Colorado, 7,950; Arizona, 3,555; Utah, 4,560; Nevada, 108; Washington, 5,665; Oregon, 4,810.

NOTE 1.—Equalization of present national power would give second zone increase of 13,965 watts or 13 per cent.

NOTE 2.—Equalization of present national power would give third zone increase of about 73,000-watt power or 155 per cent.

NOTE 3.—Equalization of present national power would give fifth zone increase of about 59,000-watt power or about 96 per cent. It would give California an increase of about 59 per cent over present power.

There are enough formal applications for power or increased power on file with the Federal Radio Commission to more than absorb the increased power to which the second and third zones would be entitled, as above. Formal applications for power or increased power are on file sufficient to absorb a large percentage of the increase to which the fifth zone would be entitled. In addition, the radio commission has denied numerous applications from existing stations, as well as new stations, in those zones. For instance, the commission has denied applications for an increase to 20,000-watt power each filed by three existing broadcast stations in the fifth zone.

As to the necessity of this amendment, we have but to consider the manner in which the Radio Commission not only disregarded but affirmatively violated the equitable distribution clause in the act of 1927, as disclosed by the data which they upon request filed with the committee at the hearings.

For instance, they filed a list of "existing stations that have applied for change in power or wave length and power." I placed the totals of those applications by zones, showing the "power requested" and "power granted," in the CONGRESSIONAL RECORD of March 2, 1928, and they will be found on page 3987.

Although the first zone was already favored with more power than any of the other zones, and a great deal more than three of the other zones, yet these records of the commission show from the time they went into office up to January 15, 1928, that stations in the first zone requested power of 89,655 watts and were granted 81,905 watts, of which 60,500 watts thus granted were to New York stations.

On the other hand, stations in the other four zones requested 186,650 watts and were granted only 45,110 watts. In other words, the other four zones made request for more than twice as much as the first zone and yet received but little more than half as much as the first zone. That is "equitable distribution" with a vengeance.

The above data does not embrace new stations which have applied for licenses, or existing stations which have applied for more power, but whose applications have been denied or are still pending. Data as to those applications may be found on page 3987 of the CONGRESSIONAL RECORD of March 2, 1928.

COMMISSION ON THE ELECTORAL SYSTEM

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent to extend my remarks by placing in the RECORD a bill which I have introduced and which, in a measure, is intended to take the place of the proposal now before the House.

The SPEAKER. The gentleman from Montana asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. LEAVITT. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following bill which I have introduced and which, in a measure, is intended to take the place of Senate Joint Resolution 47:

H. R. 11853, Seventieth Congress, first session

IN THE HOUSE OF REPRESENTATIVES,

March 7, 1928.

Mr. LEAVITT introduced the following bill; which was referred to the Committee on Rules and ordered to be printed:

A bill creating a commission on the electoral system of the United States and defining its duties

Be it enacted, etc., That a commission on the electoral system of the United States is hereby created, which shall consist of three members of the Committee on the Judiciary of the Senate, to be appointed by the President of the Senate, and three members of the Committee on the Judiciary of the House of Representatives, to be appointed by the Speaker.

SEC. 2. That it shall be the duty of the commission on the electoral system of the United States to compile, review, study, and correlate all available information on the subject of the system for the election of the President and Vice President of the United States from its origin to the present time, including provisions of the Constitution of the United States, laws enacted by Congress and by the legislatures of the several States pertaining thereto, and debates and discussions thereon. Said commission shall examine particularly and thoroughly into the following hypothetical questions and any other questions that may have arisen or which may arise concerning the succession to the office of Chief Executive of the United States under any and all possible circumstances, to wit:

(a) Does the Secretary of State succeed to the Presidency if for any reason there is no constitutionally elected President by the March 4 when the term of the Chief Executive begins?

(b) Shall there be a special election, or does the person succeeding to the Presidency fill out the unexpired term?

(c) If the election were ordered in case of a vacancy in the office, could it be for the unexpired term, or would it have to be for a term of four years, thus disarranging the four-year period of the Government?

(d) Does the commission of a Cabinet officer expire on March 4, and would this prevent succession?

(e) For what length of time would a Cabinet officer act as President?

(f) Shall the choice of a Chief Executive be intrusted to the House of Representatives about to go out of existence, when such House may even be under control of the party defeated at the preceding November election?

(g) Where the President elect dies before the second Wednesday in February, the day fixed by law for counting the electoral vote, may the House of Representatives elect a President?

(h) In case of failure to count the votes and declare the results by the 4th of the March, when the term of the Chief Executive begins, where the electors have not failed to elect but Congress has failed to declare the result, may the count continue?

(i) Would the Vice President or Vice President elect succeed to the Presidency should the President elect die before the 4th of the March, when the term of the Chief Executive begins?

(j) Who would be President in case both President elect and Vice President elect should die before the March 4 when the term of the Chief Executive begins?

(k) If more than three persons voted for as President should receive the highest number and an equal number of votes in the Electoral College, and suppose there were six candidates, three of whom had an equal number, who is to be preferred?

(l) If there should be more than two of the candidates for the Vice Presidency in a similar category, for how many, then, and for whom would the Senate vote?

(m) If a candidate for President should die after the election and before January 12 of the following year and before the electors met, how should they vote?

(n) If the President elect should die after the Electoral College has met and before Congress counted the vote, how could the vote be counted? Or could it be postponed?

SEC. 3. That the commission shall report to both the Senate and the House of Representatives the results of its labors on or before the first Monday in February, 1929, accompanied by drafts of one or more proposed amendments to the Constitution of the United States which, if necessary in the judgment of the commission, may be deemed to be necessary to remedy any omissions or defects in the electoral system of the United States and to render safe and sure beyond reasonable doubt the perpetuity of the office of Chief Executive constitutionally and legally. The commission is authorized to employ such assistance as it may require, at such compensation as the commission may determine to be just and reasonable, to have such printing and binding executed as may be necessary, and to incur other reasonable expenditures for the proper conduct of its work from appropriations hereby authorized to be made by Congress.

SEC. 4. That the commission shall have access to and the right to examine any books, documents, papers, or records, original or printed, in possession of any officer of the United States for the purpose of securing the information needed by the commission in the prosecution of its work; and the constituted authorities of the several State governments are requested to cooperate with the commission to the extent that may be necessary.

PERMISSION TO ADDRESS THE HOUSE

Mr. BURTON. Mr. Speaker, I ask unanimous consent that after the reading of the Journal on Monday next the gentleman from New York [Mr. FISH] may address the House for 10 minutes.

The SPEAKER. The gentleman from Ohio asks unanimous consent that on Monday next, after the reading of the Journal and the disposition of business on the Speaker's table, the gentleman from New York [Mr. FISH] may address the House for 10 minutes. Is there objection?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted—

To Mr. CRAMTON (at the request of Mr. MAPES), indefinitely, on account of illness.

To Mr. TAYLOR of Tennessee, for seven days, on account of important personal business.

SENATE JOINT RESOLUTION AND BILLS REFERRED

A joint resolution and bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. J. Res. 95. Senate joint resolution authorizing the Secretary of Agriculture to dispose of real property located in Hernando

County, Fla., known as the Brooksville Plant Introduction Garden, no longer required for plant introduction; to the Committee on Agriculture.

S. 150. An act for the relief of former officers of the United States Naval Reserve Force and the United States Marine Corps Reserve who were released from active duty and disenrolled at places other than their homes or places of enrollment; to the Committee on Naval Affairs.

S. 624. An act for the relief of the Van Dorn Iron Works Co.; to the Committee on Claims.

S. 656. An act to amend section 15a of the interstate commerce act, as amended; to the Committee on Interstate and Foreign Commerce.

S. 766. An act to fix the compensation of registers of local land offices, and for other purposes; to the Committee on the Public Lands.

S. 1369. An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington; to the Committee on Roads.

S. 1678. An act for the relief of the estate of George B. Spearin, deceased; to the Committee on Claims.

S. 1823. An act to amend section 2 of the act approved June 6, 1924 (43 Stat. L. 470), entitled "An act to amend in certain particulars the national defense act of June 3, 1916, as amended, and for other purposes"; to the Committee on Military Affairs.

S. 1955. An act for the relief of Lieut. Charles Thomas Wooten, United States Navy; to the Committee on Naval Affairs.

S. 2126. An act to provide for compensation for Ona Harrington for injuries received in an airplane accident; to the Committee on Claims.

S. 2410. An act to amend section 1440 of the Revised Statutes of the United States; to the Committee on Naval Affairs.

S. 2442. An act for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy; to the Committee on Naval Affairs.

S. 2456. An act to establish game sanctuaries in the national forests; to the Committee on Agriculture.

S. 2660. An act to amend an act entitled "An act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia," approved December 13, 1924, and for other purposes; to the Committee on the District of Columbia.

S. 2788. An act for the relief of Charlie McDonald; to the Committee on Claims.

S. 2855. An act for the relief of the estates of John Frazer, deceased, Zephaniah Kingsley, deceased, John Bunch, deceased, Jehu Underwood, deceased, and Stephen Vansandt, deceased; to the Committee on Claims.

S. 2966. An act for the relief of Oliver C. Sell; to the Committee on Military Affairs.

S. 3194. An act to establish the Bear River migratory-bird refuge; to the Committee on Agriculture.

S. 3198. An act to amend the act of March 3, 1915, granting double pension for disability from aviation duty, Navy or Marine Corps, by inserting the word "Army," so as to read: "Army, Navy, and Marine Corps"; to the Committee on Pensions.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 9293. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Clinch River on the Sneedville-Rogersville road in Hancock County, Tenn.; and

H. R. 9843. An act to extend the times for commencing and completing the construction of a bridge across the Kanawha River in or near Henderson, W. Va., to a point opposite thereto in or near Point Pleasant, W. Va.

The SPEAKER also announced his signature to an enrolled bill of the Senate of the following title:

S. 1531. An act authorizing the Secretary of Agriculture to sell the Weather Bureau station, known as Mount Weather, in the counties of Loudoun and Clarke, in the State of Virginia.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 8 minutes p. m.) the House adjourned until to-morrow, Friday, March 9, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Friday, March 9, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.
Legislative appropriation bill.

COMMITTEE ON MILITARY AFFAIRS

(10.30 a. m.)

To safeguard national defense; to authorize, in the aid of agriculture, research, experiments, and demonstration in methods of manufacture and production of nitrates and ingredients comprising concentrated fertilizer and its use on farms (H. R. 10028).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the north Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

A hearing to consider private bills on the committee calendar.

EXECUTIVE COMMUNICATIONS, ETC.

309. Under clause 2 of Rule XXIV, a letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Columbia and lower Willamette Rivers between Portland, Oreg., and the sea, and of Columbia River from Tongue Point base, Astoria, Oreg., to its mouth (H. Doc. No. 195), was taken from the Speaker's table and referred to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. ELLIOTT: Committee on Public Buildings and Grounds. H. J. Res. 60. A joint resolution to create a commission to secure plans and designs for and to erect a memorial building for the National Memorial Association (Inc.) in the city of Washington, as a tribute to the negro's contribution to the achievements of America; with amendment (Rept. No. 853). Referred to the Committee of the Whole House on the state of the Union.

Mr. ELLIOTT: Committee on Public Buildings and Grounds. H. J. Res. 204. A joint resolution providing that the Secretary of Agriculture be directed to give notice that on and after January 1, 1929, the Government will cease to maintain a public market on Pennsylvania Avenue between Seventh and Ninth Streets NW.; with amendment (Rept. No. 854). Referred to the Committee of the Whole House on the state of the Union.

Mr. REECE: Committee on Military Affairs. S. 3456. An act allowing the rank, pay, and allowances of a colonel, Medical Corps, United States Army, to the medical officer assigned to duty as personal physician to the President; with amendment (Rept. No. 855). Referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of South Dakota: Committee on World War Veterans' Legislation. H. R. 8223. A bill to authorize the sale of certain buildings at United States Veterans' Hospital No. 42, Perry Point, Md.; with amendment (Rept. No. 856). Referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of South Dakota: Committee on World War Veterans' Legislation. H. R. 9966. A bill to provide for the reimbursement of certain patients at the United States Veterans' Hospital, Sunmount, N. Y., for loss and damage to personal effects; without amendment (Rept. No. 857). Referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of South Dakota: Committee on World War Veterans' Legislation. H. R. 10027. A bill to authorize the transfer of a portion of the hospital reservation of the United States Veterans' Hospital No. 78, North Little Rock, Ark., to the Big Rock Stone & Material Co., and the transfer of certain land from the Big Rock Stone & Material Co. to the United States; with amendment (Rept. No. 858). Referred to the Committee of the Whole House on the state of the Union.

Mr. MICHENER: Committee on the Judiciary. H. R. 5769. A bill to authorize the consolidation and coordination of Government purchases, to enlarge the functions of the General Supply Committee, and for other purposes; without amendment (Rept. No. 860). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. H. R. 9496. A bill to recognize commissioned service in the Philippine Constabulary in determining rights of officers of the Regular Army; without amendment (Rept. No. 861). Referred to the Committee of the Whole House on the state of the Union.

Mr. LEAVITT: Committee on Indian Affairs. S. 2279. An act authorizing the Secretary of the Interior to purchase certain lands in the city of Bismarck, Burleigh County, N. Dak., for Indian school purposes; without amendment (Rept. No. 862). Referred to the Committee of the Whole House on the state of the Union.

Mr. DYER: Committee on the Judiciary. H. R. 9784. A bill for the issuance and execution of warrants in criminal cases and to authorize bail; with amendment (Rept. No. 863). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. JOHNSON of South Dakota: Committee on World War Veterans' Legislation. H. R. 8423. A bill for the relief of Timothy Hanlon; without amendment (Rept. No. 859). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 3243) for the relief of Sterrit Keefe; Committee on Military Affairs discharged, and referred to the Committee on Naval Affairs.

A bill (H. R. 3539) for the relief of Frank Murray; Committee on Claims discharged, and referred to the Committee on Indian Affairs.

A bill (H. R. 11863) granting a pension to Anna Dix; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COHEN: A bill (H. R. 11885) to provide for the free entry of articles imported for exhibition at expositions to be held in New York by the French Chamber of Commerce of the city of New York; to the Committee on Ways and Means.

By Mr. LaGUARDIA: A bill (H. R. 11886) to establish the office of captain of the port of New York and to define his duties; to the Committee on Interstate and Foreign Commerce.

By Mr. MOREHEAD: A bill (H. R. 11887) authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Nebraska City, Nebr.; to the Committee on Interstate and Foreign Commerce.

By Mr. GARRETT of Texas: A bill (H. R. 11888) authorizing the issuance of service medals to officers and enlisted men of the Eighth Regiment Texas Infantry, organized under authority of the War Department under date of November 19, 1917, and were recognized by the United States Government on October 3, 1918, and authorizing an appropriation therefor; and further authorizing the wearing by such officers and enlisted men on occasions of ceremony of the uniform lawfully prescribed to be worn by them during their service; to the Committee on Military Affairs.

By Mr. RAINEY: A bill (H. R. 11889) to promote interstate commerce, agriculture, and the general welfare by providing for the development and control of waterways and water resources, for water conservation, for flood control, prevention, and protection; for the application of flood waters to beneficial uses; and for cooperation in such work with States and other agencies; and for other purposes; to the Committee on Flood Control.

By Mr. PALMER: A bill (H. R. 11890) allowing the rank, pay, and allowances of a captain, Medical Corps, United States Navy, to the medical officer assigned to duty as personal physician to the President; to the Committee on Naval Affairs.

By Mr. DYER: Joint resolution (H. J. Res. 229) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEERS: A bill (H. R. 11891) granting an increase of pension to Carrie A. Speck; to the Committee on Invalid Pensions.

By Mr. BRAND of Ohio: A bill (H. R. 11892) granting an increase of pension to William G. Shotwell; to the Committee on Pensions.

By Mr. CRAIL: A bill (H. R. 11893) granting an increase of pension to J. Alfred Guiou; to the Committee on Pensions.

By Mr. DOUGLASS of Massachusetts: A bill (H. R. 11894) granting a pension to Leo H. Fitzpatrick; to the Committee on Pensions.

Also, A bill (H. R. 11895) to correct the naval record of Daniel V. McKendry; to the Committee on Naval Affairs.

By Mr. DYER: A bill (H. R. 11896) for the relief of John K. Davis; to the Committee on Foreign Affairs.

Also, a bill (H. R. 11897) for the relief of J. Hall Paxton; to the Committee on Foreign Affairs.

By Mr. ENGLAND: A bill (H. R. 11898) granting an increase of pension to Harriet L. Workman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11899) granting a pension to Letha Dickens; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11900) granting a pension to Ballard P. Pettry, alias B. P. Petrey; to the Committee on Invalid Pensions.

By Mr. W. T. FITZGERALD: A bill (H. R. 11901) granting an increase of pension to Ada Lee Ritter; to the Committee on Pensions.

By Mr. HAMMER: A bill (H. R. 11902) to authorize payment of fees to M. L. Flowe, United States commissioner, Monroe, N. C., for services rendered after his commission expired and before a new commission was issued for reappointment; to the Committee on Claims.

By Mr. KENDALL: A bill (H. R. 11903) granting an increase of pension to Ella Dean; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 11904) granting an increase of pension to Lena Kircher; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 11905) for the relief of Commodore J. M. Moore, United States Coast Guard, retired; to the Committee on Naval Affairs.

By Mr. LOZIER: A bill (H. R. 11906) granting an increase of pension to Mary Kitchen; to the Committee on Invalid Pensions.

By Mr. McSWAIN: A bill (H. R. 11907) to authorize the commission of Casper P. West as second lieutenant in the United States Army; to the Committee on Military Affairs.

By Mr. MANLOVE: A bill (H. R. 11908) granting a pension to Mary Susan Ann Hatcher; to the Committee on Invalid Pensions.

By Mr. MOORE of Kentucky: A bill (H. R. 11909) granting an increase of pension to Mahala Shifflet; to the Committee on Invalid Pensions.

By Mr. SWICK: A bill (H. R. 11910) granting an increase of pension to Frany Rice; to the Committee on Invalid Pensions.

By Mr. THURSTON: A bill (H. R. 11911) granting an increase of pension to Caroline D. Owens; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 11912) granting a pension to Ethel V. Sweetser; to the Committee on Invalid Pensions.

By Mr. WATSON: A bill (H. R. 11913) granting an increase of pension to Savilla Kelichner; to the Committee on Invalid Pensions.

By Mr. WHITE of Colorado: A bill (H. R. 11914) granting a pension to William Maguire; to the Committee on Pensions.

By Mr. ADKINS: A bill (H. R. 11915) granting an increase of pension to Clara L. Woford; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5107. Petition of Veterans of Foreign Wars, urging favorable consideration of House bill 9138, a bill to grant a World War service pension to certain soldiers, sailors, and marines of the World War; to the Committe on Pensions.

5108. Petition of Masters, Mates, and Pilots' Association of America, Local No. 25, urging the defeat of House bill 11137; to the Committee on the Merchant Marine and Fisheries.

5109. By Mr. CARSS: Petition of Mrs. Ellen Wiles and 62 other residents of Duluth, Minn., protesting against enactment of House bill 78, the compulsory Sunday observance bill; to the Committee on the District of Columbia.

5110. Also, petition of Will A. Herreid and 37 other residents of Deer River, Minn., protesting against enactment of House bill 78, the compulsory Sunday observance bill; to the Committee on the District of Columbia.

5111. By Mr. CRAIL: Petition of James D. Jameson and sundry citizens of Los Angeles County, Calif., against the naval armament program now pending in Congress; to the Committee on Naval Affairs.

5112. Also, petition of George Gleason, president Council on International Relations, protesting against action on the Box bill, and suggesting that a commission be appointed to study the question of Mexican immigration and report to Congress; to the Committee on Immigration and Naturalization.

5113. By Mr. GARBER: Petition of residents of Enid, Okla., in protest to the enactment of compulsory Sunday observance (H. R. 78); to the Committee on the District of Columbia.

5114. Also, letter of Gate Quarterly Meeting of Friends, by Coy L. Morgan, clerk of Gate, Okla., in protest to the adoption of the program of naval armament as proposed; to the Committee on Naval Affairs.

5115. Also, letter and resolution of joint legislative committee of the radio industry, Washington, D. C., in regard to radio act of 1927; to the Committee on the Merchant Marine and Fisheries.

5116. Also, letter of W. F. Riffel, Carrier, Okla., in protest to the enactment of compulsory Sunday observance, especially as embodied in House bill 78; to the Committee on the District of Columbia.

5117. By Mr. GIBSON: Petition of citizens of Williamstown, Vt., and vicinity, in opposition to pending legislation for compulsory Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

5118. Also, petition of residents of Bellows Falls, Vt., in opposition to proposed legislation for compulsory Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

5119. Also, petition of residents of Jamaica, Vt., opposing legislation to provide for compulsory Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

5120. By Mr. GRIEST: Petition of Thomas H. Burrowes Council, No. 784, Junior Order of United American Mechanics, Lancaster, Pa., favoring the maintenance of the basic provisions of the immigration act of 1924, including the national-origins system, as a permanent basis for apportioning the immigration, and urging upon Congress the extension of the quota restrictions to Canada, Mexico, the West Indies, and the countries of Central and South America, and also the reduction of the total quota immigration to a maximum of 80,000 per annum, and the passage of House bills 3 and 10078; to the Committee on Immigration and Naturalization.

5121. By Mr. DARROW: Memorial of the Philadelphia Board of Trade, protesting against the enactment of House bill 10568, to foster agriculture and to stabilize the prices obtained for agricultural commodities, etc.; to the Committee on Agriculture.

5122. By Mr. GALLIVAN: Petition of Col. Charles F. Sargent, United States property and disbursing officer for the National Guard of Massachusetts, statehouse, Boston, Mass., urging early and favorable consideration of House bill 9369, "A bill to recognize the military war services of adjutants general and United States property and disbursing officers as Federal military war duty during war period, April 6, 1917, to November 11, 1918"; to the Committee on Military Affairs.

5123. By Mr. GOODWIN: Petition by Mr. and Mrs. Charles F. Bennett and Benjamin A. Bennett, Rush City, Minn., in opposition to House bill 78, the Lankford Sunday observance bill; to the Committee on the District of Columbia.

5124. Also, petition by William T. Lauritzen and 99 other residents of Maple Plain, Minn., in opposition to the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5125. Also, petition by Sarah E. Blain and seven other residents of Maple Plain, Minn., voicing their opposition to the provisions of the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5126. Also, petition of Lydia Larson and 70 other residents of Foreston, Minn., in opposition to the Lankford Sunday Observance bill (H. R. 78); to the Committee on the District of Columbia.

5127. By Mr. HALL of North Dakota: Petition of members of Florence Kimball Post, No. 7, of the American Legion, of Lisbon, N. Dak., for the enactment of the naval program of the American Legion as first presented to Congress; to the Committee on Naval Affairs.

5128. Also, petition of Kringen Lodge, No. 25, Sons of Norway, of Fargo, N. Dak., for the repeal of that provision of the immigration law of 1924—national origin—method of regulating immigration into this country subsequent to July 1, 1928; to the Committee on Immigration and Naturalization.

5129. Also, petition of members of Wergeland Lodge, No. 247, of the Sons of Norway, of Jamestown, N. Dak., petition for the enactment of Senate bill 1481, which annuls the national-origin clause and retains the present quota distribution based on the census of 1890; to the Committee on Immigration and Naturalization.

5130. By Mr. HARRISON: Petition of J. M. Hillhimer and others, against compulsory Sunday observance; to the Committee on the District of Columbia.

5131. Also, petition of Mrs. A. G. Lotti and others, protesting against the Sunday observance bill; to the Committee on the District of Columbia.

5132. Also, petition of Edward White and others, against compulsory Sunday observance; to the Committee on the District of Columbia.

5133. By Mr. HILL of Washington: Petition of W. H. Buxton and 18 other persons of Spokane County, Wash., protesting against House bill 78, and all other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5134. Also, petition of A. D. Murray and 60 other persons of Wenatchee, Wash., protesting against House bill 78, and all other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5135. Also, petition of Bernice Chase and 22 other persons of Chelan, Wash., protesting against House bill 78, and all other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5136. Also, petition of Peter H. Brady and 136 other persons of Spokane, Wash., protesting against House bill 78, and all other proposed compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5137. Also, petition of G. W. Ellis and 104 other persons of Spokane, Wash., protesting against House bill 78, and all other proposed compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5138. By Mr. HUDDLESTON: Petition of W. H. Tomfert and numerous other residents of Birmingham, Ala., in opposition to monopolies in broadcasting; to the Committee on the Merchant Marine and Fisheries.

5139. Also, petition of Henry Andrews and numerous other residents of Jefferson County, Ala., in opposition to the District of Columbia Sunday bill (H. R. 78); to the Committee on the District of Columbia.

5140. By Mr. JAMES: Petition of members of the Calumet Methodist Episcopal Church, Calumet, Mich., urging the enactment into law of House bill 78; to the Committee on the District of Columbia.

5141. By Mrs. KAHN: Petition of Henrik Ibsen Lodge, No. 7, Sons of Norway, urging the repeal of the national-origins clause of the immigration act; to the Committee on Immigration and Naturalization.

5142. By Mr. KVALE: Petition of 84 residents of Swift County, Minn., protesting against compulsory Sunday observance; to the Committee on the District of Columbia.

5143. Also, petition of several residents of Alexandria, Minn., urging passage of the Brookhart bill; to the Committee on Interstate and Foreign Commerce.

5144. By Mr. LINDSAY: Petition of national organization, Masters, Mates, and Pilots of America, protesting the passage

of House bill 11137; to the Committee on the Merchant Marine and Fisheries.

5145. Also, petition of American Broadcasters' Association, embodied in telegram from President Norman Baker, declaring that true conditions misrepresented regarding radio situation, and praying for prolongation of life of Radio Commission; to the Committee on the Merchant Marine and Fisheries.

5146. By Mr. MAGRADY: Petition of numerous citizens of Danville, Pa., protesting against the passage of House bill 78, or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

5147. Also, petition of numerous citizens of Columbia County, Pa., protesting against the passage of House bill 78, or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

5148. By Mr. MEAD: Petition of residents of Erie County, N. Y., in opposition to the Lankford Sunday observance bill; to the Committee on the District of Columbia.

5149. By Mr. MONAST: Petition of citizens of Pawtucket, R. I., protesting against compulsory Sunday laws; to the Committee on the District of Columbia.

5150. By Mr. NEWTON: Petition presented by members of "Esther Young" Woman's Christian Temperance Union, Minneapolis, requesting favorable support of Stalker bill (H. R. 9598); to the Committee on the Judiciary.

5151. Also, petition presented by members of "Hobart Union," Woman's Christian Temperance Union, Minneapolis, requesting favorable support of Stalker bill (H. R. 9598); to the Committee on the Judiciary.

5152. By Mr. O'CONNELL: Petition of the Connecticut committee on the big navy bill, Hartford, Conn., with reference to the naval program and the Gillett resolution for further action on the World Court; to the Committee on Naval Affairs.

5153. Also, petition of the National Fertilizer Association, Washington, D. C., with reference to the present fertilizer situation in the United States; to the Committee on Agriculture.

5154. Also, petition of the Knights of Columbus, New York State Council, Buffalo, N. Y., favoring legislation enactment which will provide for full Federal responsibility in respect to future protection measures in the lower Mississippi Valley; to the Committee on Flood Control.

5155. Also, petition of the Federal Wild Fowl Protection Association of Stamford, Conn., favoring the passage of Senate bill 2917; to the Committee on Agriculture.

5156. Also, petition of the New York State Council of Churches, New York City, N. Y., opposing a large naval building program as proposed by the Navy Department; to the Committee on Naval Affairs.

5157. Also, petition of the Citizens' Medical Reference Bureau, New York City, opposing the passage of House bills 8128 and 11026, for coordination of health activities and Gorgas Memorial Laboratory; to the Committee on Foreign Affairs.

5158. Also, petition of H. D. Bob Co. (Inc.), New York City, N. Y., favoring the passage of the Hawes-Cooper bill (S. 1940 and H. R. 7729); to the Committee on Labor.

5159. By Mr. REED of New York: Petition of residents of Belfast, N. Y., in behalf of Civil War pension bill; to the Committee on Invalid Pensions.

5160. By Mr. ROBINSON of Iowa: Petition signed by Caroline Scherr, of 2071 Elm Street, Dubuque, Iowa, and about 70 other citizens of Dubuque, Iowa, protesting against the passage of the Sunday compulsory observance bill, or any other like bill enforcing the observance of the Sabbath; to the Committee on the District of Columbia.

5161. By Mr. SCHAFER: Petition of various residents of Wisconsin, protesting against the passage of House bill 78, or any similar compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5162. By Mr. SELVIG: Resolution of Hon. Mike Holm, Minnesota secretary of state; J. P. Bengston, assistant secretary of state; and others living in St. Paul, Minn., in favor of the repeal of the national-origins clause and in favor of the present quota disposition and against further measures of reductions of the Scandinavian quotas; to the Committee on Immigration and Naturalization.

5163. By Mr. SHALLENBERGER: Petition of citizens of Nebraska; to the Committee on the District of Columbia.

5164. By Mr. THATCHER: Petition of numerous citizens of Louisville, Ky., and vicinity, protesting against the enactment of compulsory Sabbath observance legislation; to the Committee on the District of Columbia.

5165. By Mr. VINCENT of Michigan: Petition of residents of Saginaw, Mich., protesting against the passage of House bill 78, or any other bill providing compulsory Sunday observance; to the Committee on the District of Columbia.

5166. By Mr. WATSON: Resolution passed by the State executive committee of the American Legion, favoring the Navy program outlined by President Coolidge and the Secretary of the Navy; to the Committee on Naval Affairs.

5167. Also, petition of Pennsylvania State Chamber of Commerce, by George E. Foss, general secretary, protesting against House bill 6511, introduced by Representative SIROVICH; to the Committee on Labor.

5168. Also, petition of Department of Pennsylvania, Veterans of Foreign Wars of the United States, indorsing plan of President Coolidge for an adequate United States Navy; to the Committee on Naval Affairs.

5169. By Mr. WASON: Petition of 25 residents of Concord, N. H., protesting against the passage of House bill 78, known as the Sunday closing bill; to the Committee on the District of Columbia.

5170. By Mr. YON: Petition of P. P. Anderson and other citizens of Pensacola, Fla., protesting against the passage of the Lankford Sunday observance bill; to the Committee on the District of Columbia.

SENATE

FRIDAY, *March 9, 1928*

(Legislative day of Tuesday, March 6, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 1531. An act authorizing the Secretary of Agriculture to sell the Weather Bureau station known as Mount Weather, in the counties of Loudoun and Clarke, in the State of Virginia;

H. R. 9293. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Clinch River on the Sneedville-Rogersville road, in Hancock County, Tenn.; and

H. R. 9843. An act to extend the times for commencing and completing the construction of a bridge across the Kanawha River in or near Henderson, W. Va., to a point opposite thereto in or near Point Pleasant, W. Va..

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	Kendrick	Sackett
Barkley	Edwards	Keyes	Schall
Bayard	Ferris	King	Sheppard
Bingham	Fess	La Follette	Shipstead
Black	Fletcher	McKellar	Simmons
Blaine	Frazier	McLean	Smith
Blease	George	McMaster	Smoot
Borah	Gerry	McNary	Steck
Bratton	Glass	Mayfield	Steiwer
Brookhart	Gooding	Neely	Stephens
Broussard	Gould	Norbeck	Swanson
Bruce	Greene	Norris	Thomas
Capper	Hale	Nye	Tydings
Caraway	Harris	Oddie	Tyson
Copeland	Harrison	Overman	Wagner
Couzens	Hawes	Phipps	Walsh, Mass.
Curtis	Hayden	Pine	Walsh, Mont.
Cutting	Heflin	Pittman	Warren
Dale	Howell	Ransdell	Waterman
Deneen	Johnson	Reed, Pa.	Wheeler
Dill	Jones	Robinson, Ark.	Willis

The VICE PRESIDENT. Eighty-four Senators having answered to their names, a quorum is present.

PETITIONS AND MEMORIALS

Mr. LA FOLLETTE presented memorials of sundry citizens of Grant County, Wis., remonstrating against adoption of the proposed naval building program, which were referred to the Committee on Naval Affairs.

Mr. PHIPPS presented a petition of sundry citizens of Denver, Colo., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. BROOKHART presented a memorial of sundry citizens of Wapello County, Iowa, remonstrating against control of radio

broadcasting by chain-station hook-ups of large companies, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the council of the Parent-Teacher Association of Ottumwa, Iowa, praying for the passage of legislation creating a Federal department of education, which was referred to the Committee on Education and Labor.

He also presented petitions of sundry citizens of Dysart, Ottumwa, and Cedar Rapids, all in the State of Iowa, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. BLAINE presented the petition of Hans Vigdahl and 61 other citizens of Janesville, Wis., praying for the passage of the so-called Shipstead bill, being the bill (S. 1481) to amend sections 11 and 12 of an act to limit the immigration of aliens into the United States, and for other purposes, approved May 26, 1924, which was referred to the Committee on Immigration.

Mr. JOHNSON presented 24 petitions numerously signed by sundry citizens of the State of California, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. COPELAND presented petitions of sundry citizens of Waverly and Highland Falls, N. Y., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

He also presented a resolution adopted by the committee on cooperation of the United Synagogue of America, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

The committee on cooperation of the United Synagogue of America in its desire to help stamp out the horrors of narcotic drug addiction, with the resultant menace to the health, morals, and safety of the country, pledges itself to cooperate in organized efforts to remedy the great evil which threatens the physical and moral welfare of society. Accordingly it urges upon Congress the enactment, as soon as practicable, of the Porter and Shortridge bills, which are designed to restrict the peddling of narcotics and effectively to cure the victims of addiction to the use of narcotic drugs.

PROGRESS OF TRANSOCEANIC AIR NAVIGATION

Mr. BINGHAM. Mr. President, on February 28 last the Senate was kind enough to listen to some remarks I then made in regard to rigid airships. A number of persons have since expressed some doubt with regard to statements then made. I wish to say that I took the matter up with the National Advisory Committee for Aeronautics, a body which is composed, as the Senate knows, of a number of the highest authorities on aeronautics in this country, and possibly in the world. Their publications are eagerly welcomed in all aeronautical circles. I ask unanimous consent to have my letter to the committee and their answer in regard to the subject of rigid dirigibles printed in the RECORD and referred to the Committee on Naval Affairs.

There being no objection, the letter and communication were referred to the Committee on Naval Affairs and ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
February 16, 1928.

The NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS,
3841 Navy Building, Washington, D. C.

GENTLEMEN: I would greatly appreciate having you answer, from the information which you have available, the following questions regarding the development and operation of large rigid airships:

First. In the opinion of the National Advisory Committee for Aeronautics, does the present state of the art of constructing and operating large rigid airships justify the belief that such airships can be constructed and operated successfully?

Second. What, in the opinion of the committee, are the most practical steps that can be taken at this time to encourage the development of an airship industry in the United States, looking toward the promotion of commercial air navigation by rigid airships?

Thanking you in advance for your courtesy in giving attention to this request, believe me,

Sincerely yours,

HIRAM BINGHAM.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS,
Washington, D. C., March 1, 1928.

Hon. HIRAM BINGHAM,
United States Senate, Washington, D. C.

DEAR SENATOR BINGHAM: Your letter dated February 16, 1928, making certain inquiries as to the opinion of the National Advisory Committee for Aeronautics with reference to the construction and operation of rigid airships and the development of an airship industry in the United States was considered at a meeting of the executive committee held March 1, 1928, and the following resolutions were adopted:

"*Resolved*, That it is the opinion of the National Advisory Committee for Aeronautics that the present state of the art of constructing and operating large rigid airships has progressed to the point where we are justified in believing that large rigid airships can be constructed and operated successfully; and

"*Resolved further*, That it is the opinion of the National Advisory Committee for Aeronautics that the most practical step to be taken at the present time to encourage the development of an airship industry in the United States is to begin the construction of the airships authorized under the five-year aircraft building program. The construction of these airships will foster the development of an airship industry; and this, with the knowledge to be acquired from experience in the operation of airships, will be necessary in order to enable the United States to meet the needs for commercial airship construction and operation when they arise."

The committee appends hereto a memorandum, entitled "The present status of the development of rigid airships in the United States," which states the facts on which its opinion is based.

Sincerely yours,

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS,
JOSEPH S. AMES, *Chairman.*

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS,
Washington, D. C., March 1, 1928.

THE PRESENT STATUS OF THE DEVELOPMENT OF RIGID AIRSHIPS IN THE UNITED STATES

CONSTRUCTION

No rigid airship has been built in this country since the *Shenandoah* was completed in 1923, but theoretical studies, research, and practical tests have continued, so that ultimately additional rigid airships might be designed and built in the United States. As a result, the United States is to-day as fully abreast of rigid airship development as could be expected without actual construction since 1923.

The *Shenandoah* was a remodeled copy of a 1916 German design, and when completed was recognized as an admirable first American effort rather than as a modern rigid airship. The necessity for providing suitable materials for the *Shenandoah* led to the further development of aluminum alloys and brought to the United States expert talent who knew how to manufacture gas cells. Additional technical experts were brought to this country who were familiar with rigid airship fabrication, erection, and operation. Original thought and effort were expended along various lines connected with theoretical designs, with the result that in spite of meager information as to the prototype, the design of the *Shenandoah* was placed upon a sound basis. A special subcommittee of the National Advisory Committee for Aeronautics checked the design and found it reasonable. Recent information confirms this opinion.

The *Shenandoah* was operated successfully by the Navy for two years. Her operation proved the practicability of mooring masts ashore and afloat. She made a number of notable flights, including one of 9,000 miles to the west coast and return, during which she was based entirely on mooring masts for 21 days. A noteworthy flight resulted from a breakaway from the mooring mast. During this she weathered a gale in a badly damaged condition. The fact that she was finally caught in an unusually severe storm and succumbed to it is no reason to condemn her as an airship—much less to condemn airships in general. Engineering history is full of instances where final success has been reached only through lessons learned in early attempts.

The acquirement in 1924 of the *Los Angeles*, as an example of modern German airship construction, was an important step in airship development in the United States. With the *Los Angeles* there came much information about questions hitherto obscure. Shortly after the *Los Angeles* arrived there was brought to this country a group of the most experienced rigid-airship engineers. They still remain and represent the quarter of a century of Germany's experience in airship design and construction.

The United States began its experience with rigid airships nearly 10 years ago, and the present "state of the art" may be summarized as follows: One rigid airship was built and operated successfully; another was acquired and is still being operated successfully; much thought and effort have been applied to engineering problems connected with airships; technical personnel familiar with airship matters are available, including those self-trained in the United States; the technical knowledge and experience available in the United States for the design and construction of rigid airships is ample; satisfactory materials are available, notable examples being aluminum alloys, steel wire, cotton cloths, gas-cell materials of various kinds, engines, and power-plant equipment, including water-recovery apparatus; promising development of oil-burning engines is under way; and helium, available only in the United States, gives to American airships a unique measure of safety.

From a technical standpoint it is believed the United States is prepared to design and build rigid airships to any required degree of engineering exactitude. American ingenuity and production methods applied to airship construction will cheapen their cost and offset the present high-cost differential between American and foreign airships.

OPERATION

The successful operation of rigid airships depends on two factors—(a) trained personnel, and (b) facilities available, which include weather-information service. Operation is also a matter of experience. Although our experience is not as wide as that possessed by the Germans or English, it is more recent.

The American personnel engaged in rigid-airship operation is the equal of any. They have been largely self-taught, but the foundation of the training was sound and embodied the best of German and British experiences adapted to American conditions and to helium operation. As only one rigid airship has been in operation at a time, competitive effort has not been possible. Development would be faster if more rigid airships were available. The large cost of rigid airships and the fact that only one is now available forced a cautious, conservative scheme of operation which, though sound, has not as yet allowed the technique of rigid-airship operation to develop to the full extent of its possibilities. This situation will correct itself when more airships and better facilities are available.

The facilities for the operation of rigid airships in the United States are not the best, and additional facilities are needed. There are only two large sheds—at Lakehurst and at Scott Field. The former, in particular, is poorly located from a meteorological standpoint. The shortage of helium and meager facilities for its transportation and storage have retarded the operation of rigid airships at intervals. Several mooring masts have been erected at strategic points, but the masts remote from the shed base have been used only once.

Arrangements and mechanical appliances for landing airships and handling them on the ground, and in or out of sheds, are being improved with experience. As a result we should be prepared to handle the larger airships now contemplated with no more difficulty, and perhaps with less difficulty, than airships of the *Los Angeles* size. There has been gratifying progress in developing the floating mast, the fixed stub mast, the mobile stub mast, mechanically operated docking trolleys, cars for supporting airships while moving in and out of sheds, artificial superheat device, remote control for hauling down winches, and the deck landing platform.

The operation of airships, like airplanes, is influenced by weather conditions and will be facilitated by improved weather information service. A new system for the collection and distribution of weather reports has recently been worked out by the Weather Bureau in cooperation with the telegraph companies. This will much facilitate the prompt furnishing of aerological information so necessary for the safe navigation of the air.

FOREIGN DEVELOPMENT

No survey of rigid airship development would be complete without a résumé of what is being done by other nations.

Germany, the original home of the rigid airship, and where it finds most enthusiastic support, is just completing a 3,650,000 cubic foot airship, funds for which were raised largely by popular subscription. It is proposed that this airship, after making demonstration flights, including one to the United States, will be used to start a commercial line between Spain and South America. The design is a modern and enlarged copy of the *Los Angeles*. This airship will carry a large portion of its fuel in gaseous form. This permits an important increase in cruising range. This development is being watched with interest, and a combination of helium and a fuel gas offers attractive possibilities without much greater risk than with helium alone and gasoline.

Great Britain, after abandoning airships for the sake of economy in 1919, and after being confirmed in her antiairship convictions by the *R–38* disaster in 1921, executed an about face in 1923 and resumed the construction of rigid airships. Great Britain now believes airships will play an important rôle in linking up her outlying possessions.

Two rigid airships of 5,000,000 cubic feet volume and using hydrogen are nearly completed. One of these is being built by the air ministry, the other by the Airship Guarantee Co., a subsidiary of Vickers (Ltd.). From all information available the designs appear to be on a sound basis, and there is no reason to doubt their success. The Airship Guarantee Co. uses a novel and ingenious type of girder which promises to simplify and cheapen the structural parts of an airship. The air ministry airship will use considerable alloy steel. Oil-burning engines are proposed for both airships, but they are not yet sufficiently developed to be pronounced satisfactory. Each airship is fitted with accommodations for about 100 passengers, and both are intended for quasi-subsidized commercial service to India.

Great Britain has five shed berths for large rigid airships. A new shed has been erected in India, and one shed in England is being enlarged. Mooring masts have been built in England, India, and Egypt. Other masts are contemplated in Canada, Australia, and South Africa.

At least one of these British airships is expected to visit the United States during the summer of 1928.

France has several sheds suitable for large rigid airships, but probably for reasons of economy has not built such craft. Designs are available and she contents herself with trying to keep abreast of development without building or operating.

Italy still operates the small rigid airship *Esperia*, delivered to her in 1922 by Germany. Italy's own airship efforts, however, are concentrated on developing the semirigid type, which satisfies her geographic requirements. An enlargement of the *Norge* type is under construction. In her chosen field of moderate-sized airships Italy has developed a superior technique of design, construction, and operation.

REPORTS OF COMMITTEE ON FINANCE

Mr. SMOOT, from the Committee on Finance, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 367) to authorize the settlement of the indebtedness of the Kingdom of the Serbs, Croats, and Slovenes (Rept. No. 506); and

A bill (H. R. 10954) to authorize the Secretary of the Treasury to execute agreements of indemnity to the Union Trust Co., Providence, R. I., and the National Bank of Commerce, Philadelphia, Pa. (Rept. No. 507).

Mr. WALSH of Massachusetts, from the Committee on Finance, to which was referred the bill (H. R. 7224) to extend the time for the refunding of certain legacy taxes erroneously collected, reported it without amendment and submitted a report (No. 508) thereon.

ENROLLED BILL PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that on March 9, 1928, that committee presented to the President of the United States the enrolled bill (S. 1531) authorizing the Secretary of Agriculture to sell the Weather Bureau station known as Mount Weather, in the counties of Loudoun and Clarke, in the State of Virginia.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

Mr. NORRIS. At the request of the Attorney General, I introduce a bill, which, together with the letter of the Attorney General, I ask may be referred to the Committee on the Judiciary.

The bill (S. 3572) authorizing an appropriation for the purpose of defraying expenses incident to the making of a comprehensive survey covering the requirements of a Federal penal system (with an accompanying paper); to the Committee on the Judiciary.

By Mr. JONES:

A bill (S. 3573) relating to certain war veterans and widows in the classified civil service of the United States, and for other purposes; to the Committee on Civil Service.

By Mr. McNARY:

A bill (S. 3574) to extend the benefits of the act entitled "An act granting pensions to certain soldiers who served in the Indian wars from 1817 to 1898, and for other purposes," approved March 3, 1927, to certain members of Company B, Second Regiment Oregon State Militia; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3575) to amend the grain futures act; to the Committee on Agriculture and Forestry.

By Mr. McKELLAR:

A bill (S. 3576) for the erection of tablets or markers at Camp Blount, Lincoln County, Tenn.; to the Committee on the Library.

By Mr. SACKETT:

A bill (S. 3577) granting a pension to Rosanna Sanders (with accompanying papers);

A bill (S. 3578) granting a pension to Joseph T. Pike (with accompanying papers);

A bill (S. 3579) granting an increase of pension to Maud E. Harper (with accompanying papers); and

A bill (S. 3580) granting an increase of pension to Martha A. Wilson (with accompanying papers); to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3581) authorizing the Commissioners of the District of Columbia to settle claims and suits against the District of Columbia; to the Committee on the District of Columbia.

By Mr. BINGHAM:

A joint resolution (S. J. Res. 110) to provide for annexing certain islands of the Samoan group to the United States; to the Committee on Territories and Insular Possessions.

AMENDMENT TO CENSUS BILL

Mr. ROBINSON of Arkansas submitted an amendment intended to be proposed by him to the bill (H. R. 393) making

provision for the fifteenth and subsequent censuses, which was referred to the Committee on Commerce and ordered to be printed.

PENSIONS AND INCREASE OF PENSIONS

Mr. JONES submitted an amendment intended to be proposed by him to the bill (H. R. 10159) granting pensions and increase of pensions to widows and former widows of certain soldiers, sailors, and marines of the Civil War, and for other purposes, which was referred to the Committee on Pensions and ordered to be printed.

AMENDMENTS TO TAX REDUCTION BILL

Mr. SHEPPARD submitted an amendment and Mr. STEPHENS submitted two amendments intended to be proposed by them, respectively, to House bill 1, the tax reduction bill, which were severally referred to the Committee on Finance and ordered to be printed.

SUPERVISION OF NICARAGUAN ELECTION

Mr. NORRIS submitted the following resolution (S. Res. 164), which was read and referred to the Committee on Foreign Relations:

Whereas on March 6 (calendar day, March 7), 1928, the Committee on Foreign Relations made a report to the Senate (Rept. No. 498, 70th Cong., 1st sess.) upon S. J. Res. 57, in which report the committee states that the Government of the United States made an agreement with the Government of Nicaragua to supervise an election in Nicaragua, and that by virtue of said agreement the so-called liberal faction in Nicaragua had laid down their arms upon the promise of the United States Government to supervise said election, and that to withdraw our troops at this time from Nicaragua would be a violation of said agreement; and

Whereas it appears from said report that the President of the United States had been requested by the Nicaraguan Government to supervise the election in that country in 1928 and had accepted such request, and that the President, through his personal representative, Henry L. Stimson, had notified the liberal faction in Nicaragua of such acceptance and of his intention to supervise such election, and that he intended to supervise said election regardless of what action might be taken by the liberal faction in said country, and that under these conditions the liberal forces, under said ultimatum, had surrendered their arms and agreed to such supervision on the part of the armed forces of the United States: Now therefore be it

Resolved, That the Committee on Foreign Relations, after making such investigation as in its judgment is proper, is hereby directed to report to the Senate:

1. What, if any, authority did the President of the United States have to accept such invitation on the part of the Nicaraguan Government to supervise an election in Nicaragua?

2. If the committee finds that the President of the United States did have such authority, then it is directed to report to the Senate whether, in its judgment, the same authority does not give the President of the United States the right to supervise any election in any foreign country.

3. If the President of the United States does not possess authority to use the Army and the Navy of the United States to supervise elections in foreign countries, then the committee is hereby directed to report to the Senate, by bill or otherwise, the necessary legislation that will prevent such illegal use of the armed forces of the United States in the future.

4. If the President of the United States has authority, under existing law, to use the Army and the Navy of the United States to supervise an election in Nicaragua, has he not the same authority to use the same forces in the supervision of an election in any other foreign country?

5. Will the use of the Army and the Navy of the United States in supervising elections in foreign countries have a tendency to bring on war between our Government and foreign nations where such supervisory authority is attempted?

6. If the President of the United States, under existing law, has authority to use the Army and the Navy to supervise elections in foreign countries, does he possess the same authority to use the armed forces of the United States to supervise elections in different States of the Union and would such use of the Army and the Navy of the United States be advisable in cases where the Senate has official information of corruption taking place in State elections where members of the Senate and House of Representatives are elected?

SIXTH PAN AMERICAN CONFERENCE

Mr. SHIPSTEAD submitted the following resolution (S. Res. 165), which was read and referred to the Committee on Foreign Relations:

Resolved, That the President be, and he is hereby, requested, if not incompatible with the public interest, to furnish the Senate at the earliest practicable date with the detailed report of the United States Delegation to the Sixth Pan American Conference, together with the texts, both in English and in the language of origin, of all committee reports, treaty drafts, and resolutions adopted or proposed in that meeting.

INTERSTATE COMMERCE COMMISSIONERS

Mr. SACKETT obtained the floor.

Mr. NEELY. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from West Virginia?

Mr. SACKETT. I yield.

Mr. NEELY. Mr. President, the attention of the Senate and the country is invited to the following news item, which appeared in yesterday's Evening Star:

INTERSTATE COMMERCE COMMISSION RESIGNATIONS REPORTED LIKELY—SENATE'S FAILURE TO CONFIRM COMMISSIONER ESCH STIRS RESENTMENT

Resignation of "two or three" members of the Interstate Commerce Commission as a result of failure of confirmation by the Senate of Commissioner John J. Esch was freely predicted to-day in political circles. At least one member of the commission is known to have declared within an hour after the Senate Interstate Committee had acted unfavorably on Mr. Esch's renomination that he and the other 10 members of the commission should resign in a body in protest against what is declared the unfair attitude of the Senate.

Nevertheless, it was declared on high authority at the commission to-day that resentment against the Senate for its declared unfair action is spreading among members of the commission and that several resignations among its membership may be looked for shortly.

Mr. Esch's vote in the coal-rate case coincided with those of the majority members of the commission, and other members were represented to feel that their integrity as well as that of their unconfirmed associate had been attacked by the negative vote of the Senate committee.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. NEELY. Certainly.

Mr. CARAWAY. Does the Senator feel that the commissioners really do intend to resign or that they are just extending a hope to the country which will be disappointed?

Mr. NEELY. In my opinion they do not intend to resign, Mr. President, the Star's sponsorship of a news item is ordinarily accepted as adequate proof that the item is true. But in spite of the fact that it impliedly vouches the verity of the article that I have read, I am nevertheless unable to believe that this news item correctly represents the attitude of the Interstate Commerce Commission. It is impossible for me to believe that the members of the commission would for an instant attempt, or think of attempting, to intimidate or coerce the Senate into pusillanimously surrendering its lawful right and violating its lawful duty to determine the qualifications of appointees to membership on the commission.

If this newspaper article be justified by the facts in the case, it discloses the most extraordinary and reprehensible attempt in the history of the Government to intimidate the United States Senate.

Mr. CARAWAY. And the most ineffective.

Mr. NEELY. Manifestly so. I hope that the commission will promptly inform the Senate whether the article in question correctly states the attitude and the intentions of the members of the commission in the matter of the pending Esch confirmation.

Mr. HEFLIN. Now, Mr. President, will the Senator yield to me merely for a moment?

The VICE PRESIDENT. The Senator from Kentucky [Mr. SACKETT] has the floor.

Mr. HEFLIN. Then will the Senator from Kentucky allow me to ask the Senator from West Virginia one question at this time?

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Alabama?

Mr. SACKETT. I yield.

Mr. HEFLIN. Suppose the Senator from West Virginia [Mr. NEELY] shall make the inquiry which he suggests, and shall find out that the members of the Interstate Commerce Commission have given expression to such sentiments. Then we can confer with them, and I should be in favor, if they have given expression to such sentiments, of letting them know that we will accept their resignations.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. SACKETT. Mr. President——

Mr. BLACK. Mr. President, will the Senator from Kentucky yield to me for the purpose of offering a comparatively

short amendment to the pending joint resolution? I desire that it may be read, as the Senator may wish to discuss it in connection with his speech.

Mr. SACKETT. I yield to the Senator from Alabama for that purpose.

The VICE PRESIDENT. The amendment proposed by the junior Senator from Alabama will be read.

The LEGISLATIVE CLERK. Amend section 10, page 5, line 19, by substituting for the figures "$2,000,000" the figures "$35,000,000." Amend section 8, by substituting for it the following:

The farmers' board herein provided shall immediately provide for the completion of such phosphoric acid plants at Muscle Shoals and other equipments as may be necessary for the manufacture of fertilizer by the most improved available process in commercial and salable form, and shall provide equipment sufficient to manufacture an amount of fertilizer containing 50,000 tons of nitrogen, using nitrate plants No. 1 and No. 2, if they deem it advisable.

It is hereby again expressed to be the fixed policy of this Government to utilize the power at Muscle Shoals for the farmers of America in the manufacture of fertilizer. There shall be turned over to such farmers' board immediately after the passage of this act nitrate plants No. 1 and No. 2, and the steam plant connected therewith, Dam No. 2, and the power therefrom, and all dwellings, houses, buildings, shops, and other equipment at Muscle Shoals necessary for use in the manufacture of fertilizer; Waco Quarry, with the houses and equipment there, and the said farmers' board shall not sell any power so as to prevent or restrict the full use of same in the manufacture of fertilizer. If there should be any surplus power at any time, more than is needed for the manufacture of fertilizer, the farmers' board may sell it to States, counties, municipalities, corporations, or partnerships, or individuals, but preference shall be given to States, counties, or municipalities, purchasing said current for distribution to citizens and customers. Any contract made for the sale of power shall contain a provision that the same may be canceled by the farmers' board whenever they are of the opinion that the power is needed for the manufacture of fertilizer, or for the manufacture of any by-products, when such manufacture would reduce the manufacturing cost of fertilizer. The proceeds received from the sale of power shall be retained by the farmers' board for use by them in the manufacture of fertilizer as herein provided.

Amend by adding section 12:

"SEC. 12. A board shall be appointed by the President immediately after the passage of this act, consisting of five members, who shall be appointed as follows: The President shall select one from a list of nominees suggested by the American Farm Bureau Federation; one from a list of nominees suggested by the National Grange; one from a list of nominees suggested by the Farmers' Educational and Cooperative Union of America; and the President shall further designate one member to represent the Department of Agriculture and one to represent the Department of War. The members selected from the farm organizations shall receive a compensation of $7,500 per year and shall devote their entire time to the administration of their duties as members of the board. The board shall have the authority to prescribe its own rules and regulations for the administration of its business, and it is hereby declared to be the object of the creation of this board to provide for the manufacture, sale, and distribution of fertilizer, directly to the farmers and farm organizations of America, in the most concentrated form practical."

Amend further by substituting for the words: "Secretary of Agriculture" and "Secretary of War" wherever used in the original resolution, the words: "Farmers' board," as herein created.

Amend further by striking from the original resolution subdivision (b), pages 3 and 4, of section 6.

Amend section 7, on line 17, page 4, by substituting for the words "Secretary of the Treasury" the words "farmers' board," as herein provided.

Mr. SACKETT. Mr. President, I wish to address the Senate for a few moments upon the Muscle Shoals problem. I shall do so because I have had the opportunity of studying the question to a considerable extent as a member of the special committee which this body appointed two years ago. From the experience that I have had with the whole subject, I find that the information of Members of the Senate as to the problem that is presented by the pending joint resolution and by the various proposed substitutes is not complete but is fragmentary. Furthermore, because we have here a technical problem that requires very considerable study by any Member of the Senate before he can vote on it intelligently.

It will be necessary for me, in the short discussion that I shall make, to differ from the joint resolution offered by the Senator from Nebraska in one part; it will be necessary for me to suggest slight amendments to another part; but I want to say to the Senate that, though I shall have to take a position which will not meet the views of some of its Members, I do not feel that I or any other Senator who is trying to reach a just and real determination of this great question before the country ought to be subjected to any aspersions as to his motives in so doing.

The Senator from Nebraska [Mr. NORRIS] has introduced a joint resolution which calls for the Government operation of the power plant. I can not agree to that for reasons which I hope to state to the Senate. If those reasons shall commend themselves to the judgment of the Senate, if they shall involve the presentation of valuable facts to the Senate, I hope that my expression will be taken as the honest opinion of one who seeks to bring about a proper solution and that credence will not be given to the idea that I am interested in any particular developments in this country other than to bring those developments to such a fruition as will be for the best interests of the people.

I wish to speak first in regard to the second part of the joint resolution which has to do with the production of fertilizer. I believe that is the real meat of the subject. We have not only the so-called Norris joint resolution pending before us, but we have some 10 or 15 amendments and proposed substitutes that have been submitted in good faith by different Senators to meet their personal ideas of how this problem should be handled. Some of them are based upon the desire to have the fertilizer which is to be produced made in a certain section; others are based upon a desire to have the fertilizer made by a certain process; but I think that every one of those suggestions is made in the absolute hope that fertilizer will be provided at a price at which it can be used on the farms of this country.

We have been listening during the last week to hopes for the production of fertilizer, that have come almost entirely from the South. It is a mistake to consider that the need of fertilizer of a concentrated type at a very low price is limited to the South or to the cotton fields. If such fertilizer could be used generally upon the cotton fields there would result a very decided increase in the production of cotton per acre, but the increase which would come in the yield of cotton would not be so great in proportion as would the increase in the yield of the wheat fields if we could obtain fertilizer sufficiently cheap to be used there. It would not be so great in proportion as the increased yield that would come on the widespread cornfields of this country, if we could secure the fertilizer cheaply enough to be used on those fields. It is my hope, and I think the hope of those who have been working constantly upon the idea of a concentrated fertilizer, that the price of the material in a completed form can be so reduced in the not far distant future as to bring it within the realm of probability that it can be used on practically every farm in the United States.

That statement may seem somewhat unusual; but industrial chemistry in this country has been making tremendous strides. All of us who have been engaged in the general business of the country can not fail to recognize the enormous advantages that have come from the development of industrial chemistry in almost every branch of business; and yet it seems to me that industrial chemistry as applied to fertilizer manufacture today is almost in its infancy.

The fertilizers we have used have been fertilizer mixtures; not, in a true sense, chemical fertilizers. They have carried to the field, as everybody knows, a very small proportion of the actual food of the plant. Because of the few points of manufacture they have involved, as has been shown, large freight charges. They have required tremendous charges after they reach the farm in order to have them spread, since it is necessary to spread so much waste material. The use of concentrated chemical fertilizer simply means taking the few plant-food elements that come in nature, concentrating them into a narrow compass, combining them according to the needs of the particular land, and shipping them with a large proportion of the actual plant food to the bulk of material which is shipped.

When you get the concentrated chemical fertilizer to the farm it takes far less wagons to carry it out on the fields and much less labor to spread it; and if that fertilizer, concentrated and chemical in form, can be manufactured in every crossroads and hamlet of this country, it will make it available to the farms of the Nation as a whole without these excessive freight charges which make it so expensive to-day to use it, considered even with the tremendous influence it has on the production of the fields.

I talked to the Senate a year ago on this subject, and brought out at that time that new investigations had just then been published, practically within a month, which showed the results of actual experiments as to what concentrated fertilizer would do upon the different crops and upon the fields. I almost hesitated to tell the Senate the result of those experiments, because the increase of production was so tremendous.

In corn and wheat, as I recollect, the concentrated fertilizer doubled the production of an acre. In cotton it increased it by more than a half. If that can be done at a cost that will make it pay it reduces your farm overhead, it requires much less land in order to get the same results, it saves in labor, it saves in every element that goes into farm costs, and it will be a tremendous benefit to the people who live upon the land and who need it more than any other people that we have in this country to-day.

As I say, we are not a unit in the Senate, because we do not quite understand the technicalities of the various types of fertilizer and the various processes by which it is made. While we have a good many amateur chemists in the Senate who are willing to tell us forthwith that this will do one thing and that will do another, I do not believe there is any safety in that smattering of knowledge which we as nontechnical men may have. I believe that the only way we can approach a solution of this question is to take the consensus of the chemists of this country as to what is taking place, irrespective of the technical methods by which it is done, and pin our faith to the men who have been educated in these particular lines.

I listened with a great deal of interest to the speech which the Senator from Nebraska [Mr. NORRIS] made upon this concentrated fertilizer. I can say, as a result of sitting for months upon the special committee, that he has thoroughly grasped the situation of the fertilizer industry. He may not be technically expert in how to make a mixture, but he has followed the trend of the industry from the time we first knew about taking nitrogen from the air, and he showed without a shadow of a doubt that the trend of the industry to-day is toward the synthetic processes. I do not find a single opinion from technical men—and I have searched—that does not tell us that in the future nitrogen from the air will be synthetically produced by the gasification of coal. I do not find it, I say, from any technical men except from those who have some connection with the other processes that are in use to-day, and who are not yet willing to acknowledge the leadership of the new processes which come from the synthetic methods. I do find that a great cheapening of cost has already been accomplished in the synthetic methods.

There is another feature to this whole fertilizer problem to be considered in the disposition of Muscle Shoals.

In order to make a successful plant food you have to combine three elements. We talk here in the Senate only about taking nitrogen from the air. Nitrogen is only about 25 or 30 per cent of the total requirements of a plant food that will make the farms produce these tremendous quantities. You have to combine that with a phosphoric acid. That is a different material from the ordinary acid phosphate of the trade to-day. As nearly as I can find out, the scientists believe that the production of phosphoric acid to-day is very much more expensive than it need be if we can experiment and study new methods of production for phosphoric acid. The experts that I have read after tell me—and I do not set up my own opinion at all, because I think we must follow the men who have been educated in those lines—that the excessive cost of phosphatic acid to-day comes from the fact that it has not been needed heretofore in great quantities, and the need of cheap production has not been pressing upon industry; that the cost of production of phosphoric acid to-day warrants the assumption that by competent study and experiment it can be reduced materially, and it forms a large portion of the cost of concentrated fertilizer.

The third element that you have to have in quantity, in making a successful fertilizer, is potash.

Most of our potash comes from Europe; but last year we provided the opportunity of trying to find potash in what were thought to be the fields of Texas and New Mexico. The Government is going down into those fields and sinking core drills, bringing up the core, and analyzing the product, to see if we can find potash. They have dug already seven wells. They have others going down. They drill one at a time. They have found beds of potash. They have not yet found much potash in the chloride form. They have found it in other forms. They would prefer the chloride form, because it could be extracted more cheaply. There are private potash companies now in those fields which are doing some work not connected with the Government, and they are having considerable success in finding the chloride form. The latest information I could get from the Bureau of Mines on yesterday was to the effect that they thought the experiments so far warranted great hopes of our being free from the need of getting foreign potash for any fertilizer that we seek to make in this country.

Therefore, these three elements are concerned in this thing.

The fertilizer business, Mr. President, if the product could be brought to a cost that would enable it to be used generally, would become one of the biggest industries in America, because the necessity of its use is so universal. Therefore in dealing with this whole question you are dealing with one of the future great businesses of America if you can produce cheaply.

You are not dealing merely with the question of the disposition of a power plant at Muscle Shoals. You are dealing with something that will go to every farm in America if it can be done. You are dealing with what will be the leading business experiment of this country, and I want you to realize that in what you may do this week on this joint resolution you are committing this country to a development that will be worth more to it than almost any other matter that can come before the Senate.

Muscle Shoals itself is just one big water power. The thing that you can do with Muscle Shoals, if you will, is to use Muscle Shoals to make possible this concentrated fertilizer so that it will benefit the Nation as a whole. You can do it under the theory that the Senator from Nebraska has set out in principle in his joint resolution—that is, that though the times have changed since we went into Muscle Shoals, though we no longer are able to make economical fertilizer by the use of tremendous amounts of electric power—yet we can use that power to raise the funds that, if rightly applied, can bring about this thing which ought to be desired by every Member of the Senate—that is, the production of a fertilizer for such general use, and which can be manufactured in such a large number of places—that it will be a benefit in every section of the country.

I do not see any reason why any Member of the Senate who sat through the hearings that were had last year, and who took occasion to read the technical pamphlets that have been issued, should for one moment feel that he could advocate the production of nitrogen by any method except a synthetic method. I give you that as the deliberate judgment as one who has read, not as a technician, and has simply applied common sense to what we are told by others in whom we have confidence who have studied this question more deeply than we have.

I happen to have at hand the remarks made by Doctor Howe in a recent address. He is a chemist, the publisher of the magazine Industrial Chemistry. I read just a sentence:

> It has been abundantly demonstrated in all parts of the world that, other considerations being comparable, the erection of a plant to fix nitrogen to-day is based wholly upon the synthetic ammonia process.

Senators, we are not going to get men who know the business, who have studied it for years, and who occupy places of prominence in the industrial world to make clean-cut statements like that on a technical matter unless they know they are going to be backed up by the results.

Mr. FLETCHER. Mr. President, will the Senator allow an interruption?

Mr. SACKETT. Certainly.

Mr. FLETCHER. Was not nitrate plant No. 1 at Muscle Shoals constructed on that basis and principle?

Mr. SACKETT. Nitrate plant No. 1 at Muscle Shoals was constructed on the idea of using a large amount of power to produce nitrogen, but what I refer to as the synthetic method is through the gasification of coal.

Mr. FLETCHER. Nitrate plant No. 1 uses coal, as I understand it.

Mr. NORRIS. Mr. President, if I may be pardoned, one Senator is referring to one nitrate plant and the other is referring to the other one.

Mr. FLETCHER. I am referring to nitrate plant No. 1.

Mr. NORRIS. Nitrate plant No. 2 is the plant to which the Senator from Kentucky has referred, but nitrate plant No. 1, which was constructed at the same time, is the one to which the Senator from Florida refers. Nitrate plant No. 1 was constructed during the war, when we did not have in this country a single plant anywhere operating under the synthetic process, or what was then called the Haber process. It was known that Germany was doing it, but we did not know how. Nitrate plant No. 1 was built, and it was developed that it was a complete failure so far as getting any nitrogen was concerned.

Mr. SACKETT. It is the synthetic method, but it is not the method of gasification of coal. When using technical terms, I will say to the Senator from Florida, it is almost necessary, when we argue a question, to have a dictionary showing the exact meaning of every word we use. That is what the chemists have, and that is the advantage they have; and that is the difficulty we have in the open Senate. We can not always be sure we are using the words with the correct meaning.

"Synthetic" is a wide term; but a synthetic method that is dependent upon the gasification of coal for its product is a more defined and limited term, and that is the term I am trying to use here to-day.

Mr. KING. Mr. President, will the Senator suffer an interruption?

Mr. SACKETT. I yield.

Mr. KING. Does the Senator mean to state that in the cyanamide process coke may not be used for the purpose of eliminating the calcium and of uniting with the nitrogen other elements in compounds such as are introduced by the synthetic process? Indeed, the cyanamide process, if the word "synthesis" is employed in its ordinary and perhaps technical and scientific meaning, is a synthetic process, or cyanamide is produced by a synthetic process.

Mr. SACKETT. That may be true. I am not trying to argue the relative values of these different processes, because, as I said in the beginning, I think the most we amateur chemists of the Senate can do is to be guided and led by the men who have made those matters life studies, and not to attempt to set up our little knowledge of what industrial chemistry is performing to-day. In the statements of those men, almost without contradiction, they refer to the growing developments that are taking place in the use of coal as a base, through its gasification, to bring about cheaper production of nitrogen from the air.

I could read again from Doctor Howe, where he tells the amounts of production and all that, and gives the basis on which he makes the final statement which I did read, that every tendency to-day is toward a synthetic process, through the gasification of coal; that is, if we are really seeking nitrogen from the air.

Chemistry is a wonderful thing. As I said before, it is in its infancy. It is going to be subject to just as great changes in the next few years as it has been subject to in the last few. Experiments are being carried on all over the world to-day. We are going to see some new results, which may make the present process not the cheapest process, which may make it so obsolete, almost by the turn of a wheel, that we will have to abandon it and go to the newer development.

Any man who undertakes to say that chemical processes in the manufacture of any product to-day are in their final stage, or in the most useful and economic stage, does not know the history of business in America. He could not have the temerity to fix a definite method or a definite process of manufacture unless he were unwilling to yield to industrial chemistry the leadership which it has demonstrated year after year, and which we may look forward to for years to come.

To the resolution of the Senator from Nebraska I have offered certain amendments, through the Senator from Rhode Island [Mr. METCALF]. I say I have offered them, because I suggested them to him. I did so because I have offered a substitute for the whole resolution myself, and did not want to complicate it. I felt there were amendments to other parts of his resolution pending which, if adopted, would make it a more suitable measure, but I feel that these suggestions as to fertilizer production ought to be included.

One of those amendments provides for a larger sum of money to be appropriated for the purpose of building the necessary plants for the production of nitrogen from the air, and of phosphoric acid, because I recognize that in the progress of industrial chemistry a plant may be built to-day, and two years from now it may be out of date and money must be secured to put up a new and different plant.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. SACKETT. I yield.

Mr. NORRIS. I rise not for the purpose of finding fault with the statement the Senator has just made but to explain to him, if I may, the reason for the authorization of the appropriation contained in my resolution.

As the committee reported the measure last year it contained an authorization of $10,000,000. In the pending resolution the authorization is for $2,000,000. It was cut down after consultation with Doctor Cottrell, who himself suggested the amount to the committee, and we thought that that would be all that would be necessary. I am not finding fault with the Senator——

Mr. SACKETT. I appreciate the Senator's interruption.

Mr. NORRIS. The Senator has just called attention to a condition, and if we want to be economical and not throw away money extravagantly we can pretty near demonstrate, it seems to me, that a very large appropriation is unnecessary, that we could take $10,000,000 at the outside—I think some have said eight—and build a plant down at Muscle Shoals to be operated under the synthetic process that would have a capacity of 40,000 tons of nitrate a year. I would not have serious objection to doing that very thing; but as a business man it seems to me in the present state of the chemical propositions involved, which the Senator has so accurately outlined, it would be unwise to build a plant larger than was necessary to perform the necessary experiments, for fear that, as the Senator has said, to-morrow we would find that we had improved the system so that a lot of our expenditure of money would be useless, and until we have the manufacture of this article perfected it seems to me it would not be good business policy to proceed on such a large scale. We ought to proceed on a large-enough scale, regardless of how much it may take, so that the experiments may be performed in a commercial way, in a large way, as distinguished from a laboratory test.

If some of the amendments proposed to this resolution, to some of which I have no serious objection, should be adopted, I anticipate that it will be necessary to increase the authorization from $2,000,000 to a larger sum.

Mr. SACKETT. I appreciate the Senator's suggestions, but my suggestion was made for a little different purpose. In the first place, I think this thing is going so rapidly that the plant may become obsolete almost between sessions. It may be that a further plant will be necessary. I think the work to be done on phosphoric acid has not been considered, or the work of the nitrogen laboratory that we have here in Washington; that is, the cost of plants that must be built to develop phosphoric acid in its cheap form has not been sufficiently considered.

More than that, I think we have to produce this fertilizer in quantity, and I think the Government can afford to do it, in view of the great benefits which the production of this fertilizer in quantity would bring to the farmers. I think, furthermore, that if it is to be produced in quantity there must be developed a use for the article.

This fertilizer is being made in Germany; it is being made in France; and it is being made in Italy, and the great difficulty they find there is the unwillingness of the farmers to use it. A sales resistance, which an innovation in husbandry always meets with, is one of the most difficult things to overcome. Therefore, I feel that on account of its great need, on account of the probable cost, and the fact that there will be new development in the manufacture of the various articles, it is going to be necessary to produce it in quantity, and to begin a large-scale production in order to begin the work of introduction and save time in its eventual general use.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. HARRIS in the chair). Does the Senator from Kentucky yield to the Senator from Utah?

Mr. SACKETT. I yield.

Mr. KING. I do not wish to misinterpret the position of the Senator, but as I understand his position it is that the United States need fertilizers, but we can not trust private capital to produce the same at Muscle Shoals, notwithstanding the fact that private capital has built a large number of fertilizer plants, and has produced and is now producing a considerable part of the fertilizers used by the farmers of our country. As I am advised, there are corporations, not governmental, operating plants, some using the Haber process, others the synthetic and the cyanamide processes. These various plants are making hundreds of thousands of tons of fertilizers annually. The fact is, I repeat, that private capital has been invested and large sums are now being employed in producing nitrogen and other components important in making suitable fertilizers. But, as I understand, the Senator contends that we can not trust private capital to provide nitrogen and the basic elements required in making proper fertilizers needed in the United States, and therefore the Government must go into the business. Is that the Senator's position?

Mr. SACKETT. That is not the position I take. I think the Senator readily recognizes the fact that I would not want to say to anybody that I would not trust private capital to do anything. I think the ingenuity of American business men has demonstrated that they can do anything in every line of endeavor in this country.

Mr. KING. I agree with the Senator.

Mr. SACKETT. If it is profitable, if it is a thing that can be worked out, the American business man does not wait for the United States Senate to talk 10 years on Muscle Shoals before he goes ahead. But the American business man has waited 10 years for the Senate of the United States to go ahead, and because he has run up against tremendous expenses, both in production and in distribution, which he has been hesitant to incur, because he knows what the development of the processes must cost and what obsolescence of plant must cost, and the difficulties that lie before him there, and he looks askance at wholesale manufacture when he considers the sales resistance he is necessarily going to meet upon the farm. We are overcoming it gradually. We have a plant in Hopewell now under way which I am told, though I know nothing about it, is going into a large production of synthetic nitrogen by a certain process which they have in control.

What I am seeking is to make the processes available at every crossroads of the country, in order that cheap distribution may be had. As a man opposed to every interference with private work in industry, I believe that the situation here has developed to the point where, on account of the rapid changes which are taking place, the Government alone can afford to go into the field as an experiment and waste the money if necessary. What would be the wasture of $10,000,000 if we could double the production of a crop upon the farm? It may be necessary to waste a certain amount of money in developing a process, but the goal which is hung before us for this thing must appeal to anybody that has an interest or a stake in the country. When we think of the difficulty of getting distribution we must come to the conclusion that we will have to have the benefit of our Department of Agriculture, which has the confidence of our farming community, to bring about its use through experimental farms, to guarantee the farmer against loss. There is a prejudice against anything that is denominated "concentrate" when it comes to be put upon the tender blades that grow upon the field.

Mr. NORRIS. Mr. President, will the Senator permit an interruption there?

Mr. SACKETT. Certainly.

Mr. NORRIS. The reference the Senator has made in answer to the Senator from Utah calls to my mind, right along the line which he was talking, a conversation which I had with Doctor Cottrell on this very subject. It is the reason for the inclusion, in the resolution which the committee has reported, of some of its provisions. The Senator just told of the need for Government help in making these experiments and trying to get a concentrated fertilizer, which is the ideal for which we are all striving and for which scientific men have been striving for years, calling attention to the great danger involved in financial loss of anyone who wants to improve the system. It backs up the Senator in his statement that there is about only one place on earth to go and expect favorable consideration, and that is the Government; that for the benefit of all the people the Government can afford to make the experiment which may result in a loss.

The idea of Doctor Cottrell was, for instance, and it is in the resolution, something like this: Suppose he developed a concentrated fertilizer as they can now make it, the question then comes of its application to the soil and getting it in such form that he thinks it will work. Who will try it? The Government does not own the farms. The Government would not try it. The Government can not go out to a farmer and say, "We are going to try a new fertilizer on your crops this year, on 160 acres of your land," because the farmer does not know whether it may kill all his crop or not. It might be an absolute failure. We have to expect those failures. So he is given authority to contract with the farmer, if he will let him experiment on a large enough scale to demonstrate that commercial men can apply it in a business way, and in case it is a failure he pays the farmer for the loss of his crop and for the use of his land.

It is hardly fair to expect private individuals in business to do that. If they did, they would be charging a fabulous price for their fertilizer in order to make up the losses which they would necessarily sustain in those experiments. Therefore, it seems to me, as the Senator has said, that it well comes back to the proposition that when we are going to apply any new method of fertilization on a large enough scale to know whether it is going to become of practical use, the Government is about the only institution that can afford to do it. If a private party does it, he is going to charge enough to get it back, and he ought to. He may fail, and because there is danger of his failing, if he is getting along all right, he sticks in the old rut and does not perform the experiment. He says, "They will buy what I have. It is not all that it ought to be," but he goes on.

So it seems to me the way to get an improved fertilizer is for the Government to go into the business on a sufficiently large scale, and, if it develops something new, then it does not patent it like the private party would. It is open to the world and the fertilizer manufacturer can utilize it the next day and eventually, if we accomplish what we think we can or hope to do, it will be private institutions and private corporations, which are in the business for what they can get out of it, that will eventually be supplying the fertilizer to the farmers of America, but they will have had the benefit of governmental experiments on a large enough scale to know whether they can carry the idea out for practical purposes.

Mr. KING. Mr. President, will the Senator from Kentucky permit a rather extended interruption by way of reply to the Senator from Nebraska?

Mr. SACKETT. Certainly.

Mr. KING. The argument just made by the Senator from Nebraska is the one usually employed by paternalists, and I do not mean by that to say that the Senator from Nebraska is a paternalist. It is always advanced by those who want to project the Government into business. It rests upon the assumption that the American people lack the ability, the genius, the inventive characteristics, the technical as well as the practical knowledge, the chemical skill, to undertake new enterprises or to enter new fields for the development of the arts or sciences or industry. The argument is that the Government must construct fertilizer and chemical plants and produce fertilizers, and then sell or distribute the same to the farmers. The fact is that we lead the world in invention, in industry, in the application of the discoveries of science to the needs of the people. Americans, during the past 100 years, have secured more patents and produced or made more inventions than all of the rest of the world put together.

The field of discovery and invention has not been narrow, nor have the inventions and discoveries been limited to a few industries or confined to any particular section of our country. American genius has penetrated every field of science, and utilized in a practical way and for the benefit of the people, its intellectual and scientific achievements. There has been remarkable development in the dye industry. And in the chemical and pharmaceutical field, the United States ranks with any country in the world. Notwithstanding the great research work done by Germany and the high standards set by her scientific men, I think it may be said that the United States has produced chemists and scientists and technical men who equal, if they do not surpass in some fields, those of Germany or any other country. I do not make this statement for the purpose of boasting, but to pay deserved tribute in a feeble and defective way to the remarkable and extraordinary work performed by American scientists and chemists and those engaged in what is called research work.

And the business men of the United States have exhibited great interest in advancing science, in promoting inventions and discoveries, and in applying the same in a practical and utilitarian way to the development and advantage of our country. Our universities have exhibited increasing interest in applied science, as well as in pure science. It is a fact that the great leaders of art and industry from other countries visit the United States and return to their homes amazed at the extraordinary development of industry in the United States.

We have the greatest and most efficient smelters in the world, and in metallury, in the reduction of ores no country approaches the United States. A few years ago many base ores were regarded as valueless; to-day, by reason of the scientific advancement in mining and in metallurgy, these ores and other minerals are yielding profits to those engaged in their reduction.

Private capital has been available for these enterprises that have wrought such mighty changes in our economic and industrial life. The Government has not secured these great results, but American enterprise and genius and courage have made this the most powerful nation of the world.

It was not the design of the founders of this Republic that it should be a business machine or a paternalistic or socialistic government. Those who laid the foundation of States, as well as the Federal Government, were determined to be free from bureaucratic and paternalistic inefficiency and tyranny. They believed that the genius and quality of the American people would develop the highest form of political institutions and an economic and industrial system which would yield the most beneficent results. Their views have been vindicated and our development in art, in science, in mechanics, in utilitarian activities has been the most remarkable phenomenon exhibited in the life of any country.

The Senator from Nebraska referred to plant No. 1 at Muscle Shoals. It was built by the Government at a cost of $13,000,000, for the production of synthetic nitrogen, but was a failure under Government operations. Approximately $5,000,000 has been expended in addition for experimental purposes without any satisfactory results, and the plant is now idle and deteriorating.

Mr. SACKETT. The Senator must remember that that plant was built for war purposes.

Mr. KING. Oh, yes.

Mr. NORRIS. Now, if the Senator will permit me, plant No. 1 was a failure. I am not contradicting anything that I believe to be true. I always said it was a failure, and all the scientific men admit it was a failure. Yet, I think if the Senator would ask the chemists of the United States whether they think the Government was justified in that experiment, they would come back with a unanimous chorus that the Government was so justified. The Government spent several million dollars in the construction of nitrate plant No. 1. Where was the private corporation, where was the private individual that was

willing to do that? Not a cent was any of them ready to invest. The Government spent over $50,000,000 of Government money in the construction of nitrate plant No. 2. Why did not private initiative do it? Why did they ask the Government to do it?

Mr. SACKETT. Confirming what the Senator has said about plant No. 1, may I quote again from Doctor Howe?—

It is also history that the No. 1 plant, erected as an experiment, produced fixed nitrogen only experimentally, but that it served a useful purpose as a pioneer interest in this enterprise in this country, paving the way for a synthetic ammonia industry which in my opinion has to-day rendered Muscle Shoals plant obsolete, whether considered from the standpoint of nitrogen for defense or nitrogen for the use of agriculture.

Mr. NORRIS. Mr. President——

Mr. KING. I had not finished my reply to the Senator from Nebraska.

Mr. NORRIS. I have to take the Senator's criticism in sections, because it is so lengthy that I am apt to forget it.

Mr. KING. But the Senator made such an able speech.

Mr. NORRIS. I do not mean to trespass upon either the Senate or the Senator from Kentucky, who so kindly yielded to me. I was getting to the point that the Senator has illustrated by his quotation from Doctor Howe.

Nitrate plant No. 1 was a failure. Nobody else would build it, and yet by the experiments we made, the mistakes we made, when they came to apply it, it resulted, as everybody admits, to a great extent in the present wonderful knowledge that the chemical world has, particularly in the United States, of the synthetic process. Following that failure by the Government, profiting by the experiments the Government made, there was a private company which constructed a synthetic process at Syracuse. It has been successful ever since, though not nearly so successful as later ones. Following that came others in different parts of America. There came one at Charleston, and now we have one at Hopewell, the largest in the world, I am informed, which has reduced the cost still more. To a great extent the men who are doing that owe the development to the experiments made by the Government of the United States when nobody else would make them.

Mr. KING. Mr. President, may I trespass upon the Senator from Kentucky?

Mr. SACKETT. I yield.

Mr. KING. The Senator from Nebraska bases his argument upon the theory that unless every need of the people is immediately satisfied then the Government must undertake the task of satisfying such need. His idea seems to be that whenever any wish is expressed, in some magical way factories will be erected, enterprises set on foot, and material results affected. He would have everything which the people desire spring immediately from the brow of Jove. If smelters are needed to treat refractory ores, and private capital hesitates, then the Government must undertake the erection of smelters for the purpose of extracting the values from such ores. If dyes and chemicals are required by the people, they must be immediately provided by the Government, if private capital does not at once provide them for the people. There must be no evolution, everything must be spontaneously produced, or the Government must undertake its production.

Mr. President, the great achievements which have made for the benefit of mankind have been the result of private and individual efforts and labor. Governments have different functions to perform than individuals. The great inventors and scientists have wrought out their great work without governmental aid and often amid hardships and sufferings that challenged the stoutest heart.

The United States is a young nation, and yet its progress in a material way in the application of inventions and discoveries, in the mechanical arts, and in every field of human endeavor, has been such as to challenge the admiration of the world. Capital is available whenever the imperative needs of the people require it. It would be undesirable and quite unnecessary to gratify every human want and desire instantly or in a very limited period of time. Our railroads were not built in a day; our waterways and harbors will not reach the full standard of their development for many years. The results of our technical knowledge and our inventions and scientific discoveries will not be realized in their fullness in this generation, and perhaps not in this century. We are not to have everything in our own day. There are new fields to conquer intellectually and in the industrial and economic field.

We are not Alexander, weeping for new fields to conquer. And it is fortunate for us that such is the case. Our progress would be arrested if there were no discoveries to be made, no more mountain peaks of knowledge to be ascended, no more enterprises to be embarked upon, no more factories to be built and industries to be developed.

American business men and American capital will give to the American people whatever they should have; they do not need contributions from the Federal Treasury to accomplish that result. Fertilizers will be produced in abundance and to meet the requirements of the farmers, not perhaps in a day or a year, but in due season. And its production will be brought about more rapidly by private enterprise than by governmental operation. Paternalism has not proven to be a satisfactory or efficient organizer or producer. It has almost destroyed the industries of Russia and its heavy hand has arrested progress in many countries. A few years ago we produced but few of the dyes needed in our textile production. Germany did produce them, and both countries profited in the trade resulting from their purchase by Americans. The mines, the smelters, and the multitudinous business activities of our growing and expanding country promised greater awards to the investor and hence he did not build dye plants and manufacture dyes. But when there was a return upon the capital invested and when the situation in our country required the production of dyes and pharmaceuticals and medicines, capital was available, and hundreds of millions have been invested for that purpose.

Mr. President, whenever there is any great need for any product capital will be available without governmental intervention.

My friend complains because the farmers do not understand the use of concentrated fertilizers.

Mr. SACKETT. Not because they do not understand it, but because they are afraid of it.

Mr. KING. The Senator's position, if I understand it, is that the Government must not only go into the business of manufacturing fertilizer but it must distribute the same to the farmers, and then teach them how to use the same. In other words, the Government is to go into the manufacturing business upon a large scale and then provide selling agencies and distributing instrumentalities to reach all the farmers in every part of the United States. The Government is to conduct experiments, it must provide the capital for plants and buildings and factories, including warehouses and cars and all the necessary personnel for handling, selling, and distributing the products of its factories. But this is not sufficient. The Government must go to the farm and show the farmers how to use the fertilizers manufactured at Government plants. And, of course, if the Government engages in this enterprise, why not in others? If it manufacture fertilizers and distributes them to the people, why not dyes and chemicals and electric power? Where will the end be? What are the limitations upon the power and authority of the Federal Government?

Mr. President, aside from the question of authority there is the question of expediency, the question of economy. There is too much paternalism in our country now, there is too much legislation which projects the Government into activities and business enterprises which belong to the field of private endeavor. In my opinion, we will best serve the people by keeping the Government within its legitimate limits. The American people will rise to every emergency; they will provide for their needs; their genius will develop new industries, promote new enterprises, effect changes and modifications in our economic and industrial system. American capital will be ready to build where building is needed, to launch new enterprises where they will be of advantage to the people, and to satisfy all legitimate aspirations and wants in every part of our country. If we introduce paternalism with its deadly paralyzing inefficiency, we will arrest our industrial progress and mar the industrial and political system which the genius and patriotism of the American people is producing.

Mr. SACKETT. Mr. President, if the Senator from Utah thinks I am a paternalist, God help the rest of them; that is all. We might just as well, under the Senator's argument, abolish the Department of Agriculture as to say that department shall not teach the farmers who need instruction the use of concentrated fertilizers. Why let the department teach the farmers any other soil work or any methods of husbandry or poultry raising or any of those things? But so much for the fertilizer part of it.

I wish to say, in passing, that the Senator from Nebraska [Mr. NORRIS] and I do not differ as to what the director of the nitrogen laboratory wants. He wants an experimental plant for the production of nitrogen. I do not want an experimental plant, because I think it is necessary to go into the business on a large scale, for the goal to be reached is so wonderful for the country as a whole. It is going to take so long to secure the use of the fertilizer throughout the land that the country

can better afford to go into it on a large scale, and, if necessary, lose a few obsolete plants, and the game is worth the candle.

Now as to the question of power. I think Muscle Shoals ought to be looked at from the point of view of its availability. We have 80,000 water horsepower there. Some of us call it kilowatts, some call it horsepower, and many of us do not know the difference; but in addition to the water power we have about 80,000 in the steam plant. It is located in the middle of the South, in what I believe to-day is the growing industrial area of the Nation.

I sympathize, and I sympathize strongly, with the desire of the Senator from Nebraska to lower electric rates for the people of the country, and I hope a reduction may be brought about; but he and I differ upon one fundamental, and that is that I feel, and I think that the evidence goes to prove, that the operation by the Government of the Muscle Shoals power plant and the selling of the current to municipalities that want it is not going to accomplish the result which the Senator from Nebraska pictures in such glowing terms and which he has found to follow from certain other municipal operations which have brought about lower rates from one cause or another.

The reason I state that is that if the Government operates Muscle Shoals it will control only the cost of production of electricity; that is all. It will control the cost of that electricity when it passes out of the station. That, in the trade, is called the "bus-bar" cost. As the evidence has shown without contradiction in the hearings that we have had, if we shall base the cost of electricity at the bus bar on the peace-time cost of building the dam and the steam plant, it runs around four-tenths of a cent a kilowatt; that is a little less than a half cent a kilowatt.

I know, and all Senators can check the figures, because they all have friends who can give them the definite information, that a modern steam plant located within easy transmission distance of Muscle Shoals can produce electricity at the bus-bar cost of not more than six-tenths of a cent a kilowatt. That is a little more than a half cent a kilowatt. The difference between the production cost of the Muscle Shoals plant and a modern steam plant in that same vicinity is one-fifth of a cent a kilowatt. If that one-fifth cent per kilowatt be translated to the bill which the small consumer, who is rightly held up here as the ultimate consumer, pays to the electric power company in his district—a bill that is variously estimated from 5 to 7 cents a kilowatt-hour—if that one-fifth of a cent per kilowatt be translated to his bill, one could never find it. The cost of electric power and light to the small consumer, wherever he may be located, is not the production cost of electricity—that is less than half a cent—it is the transmission charges, the overhead charges, and any other charges that accumulate and are computed by the electric power company after the electricity leaves the plant. The owning and operation by the Government of a producing plant can not affect those charges. The Government itself would have to take over the distribution, would have to meet the franchise requirement of the cities, would have to find some way to make those distribution charges cheaper than they are to-day before it could ever accomplish the desired result of lower bills to consumers of electricity in any part of the country. That is not any idle statement; that is not made for the purpose of argument; it is made in an effort to acquaint the Senate with a definite and pertinent fact as to why a great experiment in Government operation can not bring about the very desirable results that are hoped for. The costs of production by water power and by modern steam installations are so nearly together that the difference in spread can not yield advantage to any consumer so far as the size of the bill which he must pay is concerned.

I wish to say further—and it is very pertinent to this inquiry—that we are to-day just on the threshold of still greater economies in the generation of electricity by steam. It is difficult to conceive, and yet no one should have the temerity to prophesy it as a fact, that there can not be made a further reduction in the cost of electricity produced by water passing over the dam and over the wheel. Such a reduction is possible, but it is hardly likely; but to-day in the generation of electricity by steam in the modern plant we are adopting for the first time in history the use of powdered coal. Only last winter the Shipping Board fitted out one of its freighters with appliances to enable it to use powdered coal. That vessel was sent across the ocean and back again. It used high-grade coal from America on one side and low-grade coal from Germany on the other, the coal being in powdered form. The result was a very considerable economy on the first trip. So striking was the saving effected that the Shipping Board is requiring other vessels under its control to be fitted out with similar mechanism.

The boiler factories of this country are to-day constructing boilers for the first time in our history without a fire bed, but adapted for blowing the coal, finely ground, into the furnace, and doing all the work automatically. In an industrial plant to-day which has been adapted to the use of such boilers there will not be found laborers working around the boiler room. Gravity does the work of feeding the coal; mechanics do the work of firing; mechanics remove what ash there is left, and the efficiency of those boilers under that new system is increasing by leaps and bounds.

Heretofore in a steam plant coal has been the great item of cost in producing electricity, although, of course, labor has also entered into the factor of cost. Great economies are being effected through the use of powdered coal blown into the fire box and through the consequent elimination of labor. We are on the threshold of definite cost reduction of electricity made from coal. There is going on day after day in this country the development of this new method of using the great power that lies stored up in our hillsides in the form of coal. So I say that to-day we are on the threshold of a great change. The new method of using powdered coal is employed only in two or three great plants at the present time, but business men the country over are making inquiry and are going soon to ascertain that their old plants are obsolete and that in order to enable them to make further economies they have got to come to the new method.

Furthermore, engineers tell us that there is held out another bright prospect for the reduction of the cost of electricity produced by steam. For years experiments have been going on in connection with the low temperature distillation of coal, which means that from the coal such as has been burned and wasted and sent up the chimneys in smoke for generations past they are going to take by-products eventually which will be equal in value, perhaps, to the coal itself, so that the resultant material, the coke, or whatever it may be called, may be burned under the boilers and the most efficient methods of production may be obtainable at practically no cost for fuel. Those experiments are going forward. Some think they have already reached a practical result; but, whether they have or not, the promise that lies in them is well worth our consideration here and tends to show that the opportunities of cost reduction in production of electricity by steam warrant us in saying that the Appalachian section, where water power and coal lie side by side, and with a difference of only one-fifth of a cent a kilowatt-hour existing in the present cost as between water and steam, steam itself has a better opportunity to become the low-cost producer than the water power of the Appalachians. The use of such water power requires not only a plant and a dam to confine the water, but requires a supplementary steam plant, a stand-by plant along with it, in order to make the primary water power effective.

I confine my talk to you, Senators, to the Appalachian system because the same considerations do not apply to the difference in cost between water power and steam power in the Rocky Mountains and any other sections where you are far from the coal fields. We are speaking of a definite point, a point in the regenerated South where we call for power daily for new industries; where by climate, by natural resources, by the availability of power, and by every right of conquest, industry to-day is taking its just place in the economic status of this Nation. That is a thing that we ought to consider; and its relevancy, if I may so call it, may be instanced in this way:

If the city of Birmingham, Ala., which is within transmission distance of Muscle Shoals, were sufficiently interested in the experiment of municipal ownership and municipal operation or governmental operation, which the Senator has so cleverly put into his joint resolution, it could build within its own borders a modern steam plant and get electricity at a cost practically no greater than that for which it could buy it from Muscle Shoals under Government operation. It could distribute it as well from the steam plant within its own borders as it could distribute the current that it got from Muscle Shoals. It would bring to the people of that territory electricity under its own municipal operations without having to go to the Government and get them to bring about the sale of electricity to it from Muscle Shoals. I do not know why Birmingham does not do it. It probably has not wanted to do it; but it is available.

Mr. HOWELL. Mr. President——

Mr. SACKETT. I yield to the Senator from Nebraska.

Mr. HOWELL. Is it not a fact that the tremendous advantage of a central station operated, say, by the Government, together with its transmission lines, is the reason why a city can sell electricity so much lower when it merely has to install its own distribution system and operate it?

Mr. SACKETT. Tell me why can not the city of Birmingham, Ala., do the whole thing just as well within its own borders as it could if it could buy the electricity from Muscle Shoals? It does not have to pay any great price for money. Its credit is high. It has to pay for Muscle Shoals an interest upon the cost to the United States. It would have to pay an interest upon the cost of its own steam plant. The best that it could expect to gain by going to Muscle Shoals would be one-fifth of a cent a kilowatt under its own modern steam plant; and I can not conceive why the United States Government should go into what the Senator from Utah calls this paternalistic method in order to enable a great city like Birmingham, which has its own resources, which is located right on the coal fields, to purchase electricity at a possible advantage of one-fifth of a cent per kilowatt.

Mr. FESS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Ohio?

Mr. SACKETT. Yes.

Mr. FESS. I have listened to the Senator, and I think the compliment is due him that his address is one of the best addresses I have heard since I have been a Member of this body. Being strongly impressed by his discussion, I desire to ask him what the solution of Muscle Shoals is. I understand that the Senator has not accepted the Norris joint resolution, and I have not been able to do it myself; and I understand that he has not accepted the Madden-Willis proposal, and I have not been able to do that either. I am wondering whether he has a concrete solution of it.

Mr. SACKETT. I thank the Senator for his kindly reference. I have a concrete solution. It is not a solution that brings any great advertisement in itself. It is a solution of this character:

That the Government ownership of Muscle Shoals is essentially, primarily, and ultimately a fertilizer proposition for the help of the farmer; that as a power proposition it is but one unit in all the great Southland; that if it had not been built by the Government for the specific purpose of making nitrogen it would not have been built by the Government for producing power, and in my judgment, on account of the wide fluctuations in the river at that point, it is doubtful if it would yet have been built by private parties as a water-power plant. It would eventually, but I doubt whether it would have been built just yet. I treat it as an isolated instance to-day.

Every State in the South, so far as I know, has its public-utility commission in charge of electric rates. I do not want the United States Government to come into my State and fix the rates at which electricity shall be sold. We have some ideas in my part of the country that perhaps the lowest rate is not always the best rate. I think it was instanced the other day by the Senator from Nebraska [Mr. NORRIS] when he referred to the New Jersey municipality which preferred to advertise to the world that it had no municipal taxes rather than to reduce the price of electric power within its borders. It used the profits which it made under the normal price for which it sold electricity in order to pay all the municipal taxes, and it thought it was better business.

There are other instances of the same kind that could be multiplied; but we do have public-utility commissions under the control of the legislatures of our States to protect our people. We adopted them in the early days for the very purpose of seeing that our people were not overcharged for their electrical requirements. The idea of inaugurating now a different plan, based upon municipal or governmental operation, to strengthen and reinforce and change the very things which we have appointed our own commissions to determine is abhorrent to me. I think we are amply protected, and if we are not, the remedy is in our own hands.

Being protected in that way, my theory is that in view of the need and requirement of agriculture for fertilizer, in view of the fact that under our war-time appropriations we dedicated this plant in the South to the nitrogen-production business, and in view of the fact that if you make nitrogen in time of peace for agriculture you automatically make nitrogen in time of war through taking over the plant, I advocate that we should so use the Muscle Shoals power plant that we get out of it the highest possible income, and we should apply that income to experimental work and to large-scale production work for making a concentrated fertilizer and for getting it used upon the farms of this country. Then I say further—if the Senator from Ohio will listen; I come now to the important point—that in order to get the highest income out of the Muscle Shoals power plant it ought to be offered freely to the country, to that man or that set of men who will pay the highest price for it, because it is not going to help to sell that power for us to restrict the use that anybody will make of it. Every restriction that you put upon it requires a prospective lessee to consider just how much less the power is worth to him.

I know that I subject myself to the accusation that in offering this power freely to the country it will be said that I am turning it over to the great predatory corporations who distribute electric power. I can not help it if that charge is made. It is common sense that if you want money out of a property you must offer it in such a way that you will get that money. It is not going to help you to restrict it to require that the power be distributed, first, to municipalities, and, second, to States, or anything of that kind, and for this reason:

You ought to visualize the South as an entire entity. Political subdivisions in a growing industrial community mean nothing. Every State and the border of every State is in competition for industry to-day with every other State and the border of every other State. Alabama has to insure to the factories that are going to come there as cheap power and as good service as are going to be insured to those of Georgia, or else Georgia is going to get those factories. Every interest of the people who live in those States is in seeing to it that there shall be a distribution of power over the whole State.

The great power companies of the South to-day cross State lines. They are interwoven. They are gradually approaching a time when there is going to be one central reservoir from which leads will go in all directions; and whether the power is made at Cove Creek or whether it is made at Muscle Shoals or whether it is made on the Tallapoosa or any other river, into that great reservoir is going to feed all the power of the various water powers and their auxiliary steam plants.

The people of the South are going to draw power from that reservoir, and it is going to reach into every hamlet where the demand for electric power justifies the investment of the necessary capital in transmission lines to take it there.

Nothing that the Senate can do, no restriction that it can put upon its use, is going to change one iota in the period of time to come the distribution of electric power from any single unit in the South. It is a practical, common-sense problem that anybody who has ever had anything to do with the distribution of an electric current appreciates.

I therefore urge you to authorize the Secretary of War to lease the power at Muscle Shoals for the highest price he can get for a period of time that will warrant a bidder in coming in and making a high bid. In the substitute which I have offered I have put no qualification as to its use, except to reserve to the Government the right to use such power as may be necessary for its own purposes, at a price of $15 per horsepower per year, which is under the cost of production.

I want the Secretary of War to offer that power under a lease for 15 years, which would warrant anybody in building a transmission line to meet it. I want to give him the right to put in the additional units of the steam plant and the water plant, if he desires to. It is not everybody who would lease Muscle Shoals who would want those units put it. I want to leave it open to the bidder to supply those units—or so many of them as he desires—and I want to agree to buy those units back at the end of the lease less obsolescence and depreciation, ordinary wear and tear excepted.

I want to get every dollar I can out of Muscle Shoals. It will be more helpful to the people of the South if the power leased to any company or any set of men is distributed into the general reservoirs than if we try to divide up the 160,000 horsepower among nine States, among a thousand communities within the nine States, and after the subdivision be able to give every one of them a hundred kilowatts, and then provide the money to build a transmission line to get it to them. I shall ask for a vote upon the substitute that I have offered at the proper time.

Mr. SMITH. Mr. President, I do not intend at this time to make any extended remarks on the subject, but I do think that a lot of misinformation, honestly given, but nevertheless misinformation, has been scattered abroad among the Members of the Senate who are not as familiar with the fertilizer question as are those of us who have to use fertilizer. The Senator from Kentucky spoke about phosphoric acid and the processes that are now being developed for the concentration of it. I want to state here and now that there is not a practical farmer in America who uses fertilizer who will not testify that there is in this country all the phosphoric acid we want, obtainable at a price that is entirely reasonable, and the supply is unlimited and practically inexhaustible.

There are the phosphate rocks of Tennessee, there are the phosphate rocks of Florida, there are the phosphate mines of South Carolina. The amount of phosphoric acid is practically unlimited, and with hardly any cost, except for transportation, and the mere mechanical method of treating the phosphate rock with sulphuric acid, which produces all the phosphoric acid we need. I can get it to-day, manufactured at Charleston

and delivered in the territory 90 to 100 miles away, for $9 and $10 a ton.

Mr. McKELLAR. And some soils do not require potash.

Mr. SMITH. As the Senator from Tennessee indicates, some soil does not need any potash at all. The alluvial deposits in the bottom lands and the overflowed lands that have been reclaimed from the rivers are rich in phosphoric acid, as well as in potash. That is one ingredient. There are three ingredients in most of our fertilizers, especially those used on depleted or what they call worn-out land, phosphoric acid, potash, and nitrogen or ammonia, which are interchangeable terms when it comes to the question of plant food.

As to potash, it is as cheap now as phosphoric acid, or cheaper, because there is an unlimited supply of it already manufactured by nature in the great German potash wells. The fact of the matter is that potash, in the form of what they call *kainit*, has been brought over to this country in ballast and sold at an out-of-pocket cost in order to help defray the expense of bringing the vessel over. The agricultural interests of this country do not need the production of another pound of potash or of another pound of phosphoric acid, because the prices are now extremely reasonable.

Let me give some facts. I have not prepared myself as I should have done before attempting to make even this short statement in order to correct impressions that are being made that might affect a very vital piece of legislation as far as agriculture is concerned.

The ordinary commercial fertilizer, what we call the mixed fertilizer, runs in percentages of these three ingredients, and there are none others. One farmer may want 8–2–2, 8 per cent phosphoric acid, 2 per cent potash, 2 per cent ammonia. Some farmers may want 8–4; that is, 8 per cent phosphoric acid, no potash, and 4 per cent ammonia. If he is in the Piedmont, in the red lands, he does not need potash; the color of the soil indicates that there is plenty of it available, and he does not need any more. But in the gray lands, in the coastal plain, from the foothills to the seaboard, the color of the soil indicates, perhaps, the need of potash. If there is not potash in that kind of soil, cotton is subject to what is known as rust; the leaves shed off during the period when it should be flourishing and growing. The phosphoric acid is also indicated in soils of that kind.

Even there, however, you can find a substitute very often, in the presence of humus in the ground, for either one of these two ingredients, phosphoric acid or potash. You can plant some crop that will grow luxuriantly, turn it under, and furnish your land largely with these two ingredients; but the sine qua non is nitrogen or ammonia.

As I started to say a moment ago when I was diverted—I have not thought this thing out and I should not get off on a tangent, even in my own statement—I said I had bought my fertilizers for this year. The relative cost of my 8–4–4, which I bought, I will explain a little later. My phosphoric acid cost me at the rate of about $10 a ton delivered. I will put it at the maximum. That is, $10 per 2,000 pounds, with a 16 per cent content. My potash cost me about the same, with about a 12½ per cent content, $10 a ton. My nitrate of soda, which had in it only 18 per cent of nitrogen, cost me $60 a ton, and that is the cheapest form of available ammonium we can get. We get it from Chile; it is imported from Chile. Not only is it perhaps the cheapest, taking into account the real nitrogenous content, but it is the most easily available, the most easily handled. It lends itself more readily to the customs and practices of the users of fertilizer in America than any other fertilizer known. Mark you, 16 per cent phosphoric acid, $10 a ton; 12½ per cent potash, $10 a ton; 18 per cent ammonia, or 16 per cent of its equivalent in nitrogen, $60 a ton.

What other sources are there? Blood and tankage, rich in ammonia, $75 to $80 a ton. The percentage of ammonia is high. Fish scrap, which is rich in nitrogenous content, and cottonseed meal, which is not so rich but which is easily soluble and available for plant food at 7 per cent.

Mr. President, the problem for the farmer is to get available ammonia, or nitrogen; they are convertible terms. I state here on the floor of the Senate, without the possibility of truthful contradiction, that crops in this country can be made abundantly if there is neither potash nor phosphoric acid. Clemson College, one of the great agricultural institutions of this country, located in my State, through a series of experiments proved that a maximum corn crop could be made with no other fertilizer applied but nitrate of soda.

Mr. SIMMONS. And, Mr. President, that is used in the concentrated form.

Mr. SMITH. It is a reasonably concentrated form.

Mr. SIMMONS. It is put out by the farmer with his hands.

Mr. SMITH. With his hands. It is absolutely innocent of any ill effects upon the individual who handles it. It is clean. It is as white and as attractive in appearance as salt.

Mr. SIMMONS. I will ask the Senator if it is not true that in the coastal sections that is about the only fertilizer we use on corn.

Mr. SMITH. As I just started to remark, Mr. President, following the indication of the agricultural college in my State, down in the coastal plain of South Carolina, in Lee County, I planted 12 acres of corn in 1927. We had a short session and I was at home and could give this little crop of mine my personal attention. I used nitrate of soda alone, and used not to exceed 300 pounds to the acre, a large fertilization for an 18 per cent ammonia, and I averaged ninety-seven bushels and a half to the acre.

Jerry Moore, in my State, according to the Department of Agriculture, by the use of highly concentrated nitrogenous fertilizers, made 235 bushels on 1 acre. If he had put an excess of phosphoric acid and potash on his land it would have destroyed the productive power of the land.

Mr. Drake, of whom the Senator from North Carolina has heard, just preceding the exploit of Jerry Moore, according to the department of agriculture of my State and the Agriculture Department of the Government, made 250 bushels of corn on 1 acre by the use of nitrogen.

I sit here and listen to Senators say, "Let us get a mixed fertilizer." I wish the junior Senator from Georgia [Mr. GEORGE] was here, because he is like me in this respect. He has a liability of several hundred acres known as a farm. At the present price of farm products in their relation to other products it is a liability rather than an asset, but I wish he were here so that I could ask him what he would give any fertilizer company to mix the ingredients for his balanced fertilizer for his crops. The Senator from Tennessee [Mr. MCKELLAR] has just suggested that he has mixed many tons. Why? On rainy days, which are generally more numerous in the spring than at other times, the practical farmer will take his cottonseed meal, which is his nitrogen, 7 per cent, his phosphoric acid, and other ingredients which all come in separate sacks. He will get his hoes and his hired hands and get under sheter and calculate what percentage of each he wants. Then he will mix those ingredients and put them back in the same sacks. Why does anyone come here and talk scientifically about a mixed fertilizer? What we want is nitrogen. Nature has provided the other two almost indigenous to the soil, but she has not provided that life-giving element, without which no plant can live and thrive, known as nitrogen.

Mr. SIMMONS. Mr. President, may I ask the Senator a question at that point?

Mr. SMITH. Certainly.

Mr. SIMMONS. The Senator stated, and stated correctly, that nitrogen is used just as it comes, in its concentrated form. Can cyanamide be used in that way?

Mr. SMITH. The experience of my people in the use of cyanamide was very unfortunate. Cyanamide means a lime container for the nitrogen. It does not adapt itself to immediate used on the farm. It is available in the fertilizer factories as a sort of nitrogen or ammonia. After it has been mixed, it does not have the effect on the hands of the individual or perhaps on the soil that it has in the form in which it comes from the factory. To answer categorically the Senator's question, I do not believe there is a farmer in America who can use cyanamide as cyanamide and apply it to his land.

Mr. MCKELLAR. The effect of it is to burn the crop.

Mr. SMITH. One of the officials of the Bureau of Chemistry claims that there is a very distinct poisonous effect upon the land where it is not judiciously or scientifically used. As to that I do not know, but I do know that it did have a very disastrous effect on the hands of those who attempted to put it out in the form in which it comes from the factory. In addition to that, my information is to the effect that it was not a quickly diffusible form of ammonia. What I mean by that is that the plant does not assimilate it half so readily as it does either nitrate of soda or fish scrap. It is slower in its process of assimilation and doubtful in its effect upon land, but it is nitrogen and not, in that form, available for the farmer.

Mr. SIMMONS. The point I wish to make is that cyanamide can not be used for the purposes of fertilizer except in mixed fertilizer.

Mr. SMITH. Yes; that is my experience.

Mr. SIMMONS. If the Senator will permit me, I would like to read just a few lines from a letter which I received this morning from an official of the Department of Agriculture who visited me on yesterday. I requested the department to send a man who had knowledge on the subject to discuss the matter

with me. Here is a part of the letter he wrote to me, the balance of the letter not relating to this subject:

After my conference with you yesterday I was able to get in touch with Doctor Ross, of the fertilizer investigation laboratories of the Department of Agriculture, who has just returned from a visit to the laboratories at Niagara Falls, where cyanamide is produced. He said that the estimated production of cyanamide for 1928 was 135,000 tons, most of which will be sold in the United States. Last year approximately 90,000 tons of cyanamide was used in the United States in mixed fertilizer. Doctor Ross says that cyanamide is used principally in conditioning mixed fertilizer. When from 50 to 60 pounds is added per ton of mixed fertilizer it reduces the acidity of the fertilizer and eliminates the tendency of the fertilizer to cause acid soil. When used in greater proportion than this it has a tendency to injure the plant, because when cyanamide is treated with water it reverts to an acid which injures the roots of the plant. A small percentage of the cyanamide used in this country is also reduced to ammonia phosphate for use in mixed fertilizer. The use of cyanamide in the United States is increasing quite rapidly because of its value in conditioning mixed fertilizer.

Mr. SMITH. That is the very point. That bears out what I said a moment ago.

Mr. SIMMONS. Of course the Senator knows a considerable amount of it is also used in refrigerating plants.

Mr. SMITH. That bears out what I said, that if the farmer is to get the benefit of cyanamide he must also pay the cost of the mixing machinery that mixes it at the fertilizer plants.

Mr. BLACK. Mr. President, may I ask the Senator just a question?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Alabama?

Mr. SMITH. I yield.

Mr. BLACK. The Senator did not understand either myself or my colleague or anyone else to be advocating the use of cyanamide as fertilizer, did he? If so, I want to clear up that situation.

Mr. SMITH. I got the impression that the Senator said it might be used directly.

Mr. BLACK. Cyanamide?

Mr. SMITH. Yes.

Mr. BLACK. Oh, no. I have stated that it was not used directly and in my judgment would not be used directly. That is, the Senator will understand, only a step in the cyanamide process. From it they extract the ammonia. That is the last step in the cyanamide process.

Mr. SIMMONS. What is that?

Mr. SMITH. That is where they produce ammo-phos.

Mr. SIMMONS. I would like to read something about ammo-phos from the letter to which I just referred:

Ammo-phos produced by the laboratories at Niagara Falls is not sold in the United States. The principal market for this product is in the West Indies.

This letter is signed by C. M. Purvis, associate agricultural statistician, division of statistical and historical research.

Mr. SMITH. I would not pretend to try to speak as to the form of reducing the nitrogen, which is incident to cyanamide, to ammoniated phosphate. That is what ammo-phos is—phosphate of ammonia. They treat phosphate rock in the presence of the nitrogen and the cyanamide, and produce ammonium phosphate. I do not think any practical farmers would care for them to mix ammonium phosphate for them, when, if they can get all the ammonia they want, they can get all the phosphate and all the potash they want and will do their own mixing, thereby saving from $3 to $4 a ton, which is the cost of the artificial process of mixing, which does not add one penny's worth to the value of the thing the farmer buys.

Mr. SIMMONS. Mr. President, will the Senator pardon me for another interruption?

The PRESIDING OFFICER. Does the Senator from South Carolina yield further to the Senator from North Carolina?

Mr. SMITH. I am glad to yield.

Mr. SIMMONS. I think the Senator has stated the case admirably and that he has made it very clear that the high price the farmer is paying for mixed fertilizer is due to the high price of nitrates in the fertilizer. I think it ought also to be said that most of the fertilizer factories in the country are simply assembling and mixing plants.

Mr. SMITH. That is true.

Mr. SIMMONS. They buy their phosphate, they buy their potash, they buy their nitrate of soda, and then mix them. I think it can be said that most of the producers or assemblers and mixers of fertilizer in the country did not make any money to speak of last year. The high price of fertilizer was not due to any high profits that they made. It was due chiefly to the high price they had to pay for the nitrogen in the mixture. This year the assemblers have increased the price about 9 per cent, I think. Is not that correct?

Mr. SMITH. About 10 per cent.

Mr. SIMMONS. But last year, taking the industry as a whole, they lost money. They did not make money. My complaint, therefore, is not against the assemblers of the materials and their conversion into a mixed fertilizer. My complaint is against the unnecessary high price that we have to pay for nitrate of soda which is in the mixed fertilizer as now used by the farmer. I agree with the Senator that it is possible for the Federal Government to take hold of this question vigorously and with determination, and for the Government to discover and develop some process by which nitrogen can be extracted from the air and sold to the farmers at a reasonable price. There is the heart of the whole controversy, in my opinion.

Mr. SMITH. I think the effect indicated by the Senator, that we might find some process which would cheapen the cost of nitrogen to the farmer, has already been had. I am not in a position to state, as I hope to be able to state before this year is over, not what are the possibilities, but what are the actual accomplishments of the synthetic process now in operation in this country in developing, in an available form, nitrogen from the air. When I say "available form," I mean in a form that is immediately available for the man in the field. I think that the development of the process up to the present time has so convinced the fertilizer people and the capitalists of the country that it has already had its effect upon the price of nitrate of soda.

I do not intend to take up any more time now on that matter, because I want to speak at length later; but at this time I want to call attention——

Mr. McKELLAR. Mr. President, before the Senator leaves the question he has been discussing, will he give us the price of nitrate of soda last year and the year before as compared with this year, so we can have those figures before us?

Mr. SMITH. I do not think there has been, until quite recently, any change in price. The price year before last and last year and this year ran pretty uniform up to within a comparatively short time ago, when it dropped about $8 or $9 a ton, which in fertilizer circles was attributed to the effect of the different synthetic processes in producing ammonia for fertilizer purposes.

Mr. BLACK. Mr. President, will the Senator from South Carolina yield to me now?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the junior Senator from Alabama?

Mr. SMITH. I yield.

Mr. BLACK. I have been informed, and I have sought diligently to ascertain whether or not it is true, that there is not a particle of ammonia which is manufactured by the synthetic process in America which has gone into any fertilizer. I have been informed by the Senator from Nebraska [Mr. NORRIS], and I have received that information from numerous other persons, that there has not been one pound of ammonia produced by the synthetic process in America that has gone into fertilizer.

Mr. SMITH. I rather think that the Senator from Alabama is correct, but in its present stage it has gone into the refrigerating plants; it has gone into chemical production; and fish scrap, tankage, and the by-products of the coke and coal ovens, which are readily available for fertilizer purposes, have found their place in the fertilizer market because they have been substituted in chemical production by the synthetic ammonia.

Mr. BLACK. Let me suggest one other thing at this point. I have in my office a statement, which I cut out of a newspaper two days ago, that fertilizer instead of going down in price has gone up in price. That may be wrong, but I merely cut the clipping to that effect out of a newspaper.

Mr. SMITH. In that connection I desire to say that I think, perhaps, the Senator will find that all the fertilizer companies in America united in a statement, and the Senator from Georgia [Mr. GEORGE], who unfortunately, like myself, has to buy fertilizer, will bear me out in this, that the companies got together and said, "We lost so much money last year that we have to raise the price of fertilizer this year in order to recoup our losses." That was not so much because the ingredients which composed the fertilizers themselves had gone up, but that the companies claimed they had to recoup their losses for the preceding year. I will ask the Senator from Georgia if that is not his understanding of the situation?

Mr. GEORGE. That is my understanding.

Mr. McKELLAR. I wish to ask the Senator from South Carolina, in that connection, if it is true or not that this same combination of fertilizer companies sell to the farmers at a price that is very much larger for credit than for cash?

Mr. SMITH. I positively would be ashamed of the business ability of my people if I were to quote the actual difference between the cash prices and the credit prices of fertilizer companies for the fertilizer sold to farmers.

Mr. McKELLAR. However, I hope the Senator from South Carolina will do so.

Mr. SMITH. The difference between the cash prices of those companies and their time prices reflects on the worth of the moral risk of the farmer who has to buy on time, and shows that the companies are even willing to take that risk, that they consent to take it, and if they can collect some of the exorbitant difference between the two prices they will break about even. For instance, I think the fertilizer which is known as 8–3–3 would cost on the market, free on board, $22 a ton if sold for cash, but its price would be $32 a ton if purchased on time.

Mr. BLACK. The Senator knows as to the credit price merely from hearsay, does he not?

Mr. SMITH. My heavens, no; I do not know about credit prices from hearsay, but I know about them because of the acid test of actual experience.

Mr. McKELLAR. There is a difference in price of $9 a ton, is there not?

Mr. SMITH. There is a difference of from $9 to $10 a ton; yes. But I want to get back to what the Senator from Kentucky said. I hope he will correct his speech where, if I understood him correctly, he said the greatest desideratum was to get phosphoric acid. Mr. President, the cheapest and most unlimited form of fertilizer known to agriculture is phosphoric acid. One can get all he wants of it in any per cent he wants in unlimited supply. All that is necessary to be done is to grind the rock rich in phosphate, treat it with sulphuric acid, and the resultant product is phosphoric acid. It is not even necessary to get a container, but the rock when it is ground, after it absorbs the sulphuric acid, it is converted into phosphoric acid. The manufacturers just grind up the rock, let it stand a while, then dump the dust into big tanks, mix the sulphuric acid with it, and then put it in a sack and ship it. Nature has very nearly done the whole work herself.

As to potash; it is not necessary to treat it at all. It is pumped from the potash wells in Germany or it is mined in the salt form, in the form of kainit, and sacked and shipped in ballast, and sold at the "out-of-pocket" cost; or it is put in solution and evaporated so as to be put in the form of muriate of potash or sulphate of potash, with 40 to 45 per cent of potash content, and the purchaser pays proportionately more but reduces the freight rate.

The Senator from Kentucky was talking about phosphoric acid. There was an attempt made down here at our nitrate laboratory to see if there was any other process by which phosphoric acid could be obtained from the phosphate rock without treatment by sulphuric acid. Under a chemical process of which I do not know, but this was testified to before our committee, that phosphate rock of such a low per cent of phosphate that it did not pay to mine it—for the container would probably cost more than the percentage would justify—by putting it in a superheated furnace and taking common sand from the road or wherever it was found and just shoveling it into the furnace there was precipitated an acid from the sand which readily united with the phosphate from the rock and produced as good phosphoric acid as was produced by the sulphuric-acid process.

That discovery was hailed with great delight, and I do not know but it will become a practical thing for this reason: We had to abandon the phosphate beds of South Carolina because the iron content of the phosphate rock was so great, the per cent of pyrites in it or the iron in it was so great, that when the rock was treated with sulphuric acid the iron neutralized the sulphuric acid and no phosphoric acid was produced. It was found, however, that by the sand process it did not make any difference how great was the iron content, it did not affect the production of the phosphoric acid. That is one of the things that we would hail with great delight and it would possibly result in benefit.

As to the question of concentrated fertilizer, let me tell my colleague that the farmers can wait, and wait profitably, if they can only get an abundance of nitrogen at anything like the present cost of potash and phosphoric acid. It will cut his fertilizer bill by half.

So, Mr. President, I am not so much interested in the talk about concentrated fertilizer or mixed fertilizers as I am interested in having Muscle Shoals devoted to the extraction from the air of this sine qua non of the vegetable world—nitrogen.

Mr. SIMMONS. Mr. President, I should like to ask the Senator from South Carolina, who knows much about this subject and has studied it a great deal, and is also a farmer, leaving out the question of freight, does not the farmer prefer a mixed fertilizer to a concentrated fertilizer?

Mr. SMITH. At the present stage he does, because the machinery is not adapted to the use of the concentrated fertilizer.

Mr. McKELLAR. He would have to be educated up to its use?

Mr. SMITH. Yes. Let me give the Senator an illustration.

Mr. SIMMONS. Before the Senator answers that question, let me ask him another question, which he can answer in connection with the first one. Although the farmer may have to pay a little more freight because of the filler in the mixed fertilizer, can he not distribute the mixed fertilizer cheaper than he can distribute the concentrated fertilizer?

Mr. SMITH. Yes; I think it would call for a new kind of machinery. Let me give the Senator an idea as to that. The present fertilizer distributor is so constructed that when we put out, say, 200 pounds of fertilizer to the acre in that form, let us say a potash, it is a mere trickle; one can imagine what 200 pounds of dust would be to an acre; but it is put in a furrow, and that 200 pounds contains only 32 pounds of actual phosphoric acid. Here is a delicately adjusted piece of machinery, distributing actually, according to the width of the rows apart, 200 pounds. If 32 pounds were put out, it would be necessary to get entirely new machinery. However, that is not the thing that concerns the American farmer to-day. The essential thing is to give him nitrogen. He can get all the other ingredients he wants.

Now, as sensible men here why should we be haggling about fertilizer and concentrated fertilizer when the cry of the earth is for replenishment with nitrogen. It is possible to double the wheat crop of America with nitrate of soda; we can quadruple the corn crop with nitrate of soda; we can take a sand hill—and I say this in the presence of the Senator from North Carolina and the Senator from Georgia—that will barely sustain the life of the roughest kind of deep-rooted grasses, and by the application of nitrate of soda in the presence of moisture make a corn crop equal to that produced in the bottom lands of the Mississippi. There is no limit except in the possibility of the lands to sustain life with the other chemicals that are indigenous to the soil. Therefore I say we should lay aside any question of potash, any question of phosphoric acid, any question of concentrates, and devote ourselves to relieving agriculture of the intolerable burden placed upon it.

How may we do that? As sensible men proposing to legislate for the benefit of agriculture how are we going to do it by saying that we will take the cyanamide process? What do we know about that process except what has been stated to us and what we have learned from the little experiments we have made in our own fields. What about the synthetic process? What do we know about the possibilities of that? Is it not our duty to cause our Government, which we have delegated to do this thing, to take the power at Muscle Shoals and develop the basis by which nitrogen can be extracted and given to the American people.

I want to state frankly that it is not so much a question with me by whom to do this as it is, "Go and do it." I believe, as the Senator from Nebraska [Mr. NORRIS] brought out here, that the Government must do the "dead work," which is a term used by all inventors. The deadly part of an invention is developing the process until it becomes practical.

Now I want to ask the Senator from Tennessee [Mr. McKELLAR] and the Senator from Utah [Mr. KING], as practical men, what can be expected from these companies that are manufacturing fertilizer now, or, rather, mixing it. They do not manufacture anything; they mix it. They have no extra machinery other than just a mixing plant—some revolving things, some wheels, and a chemist to figure just how much of each ingredient to put in to have an 8–3–3 mixture or an 8–4–4 mixture. How many of those companies do the Senators suppose are going to go down yonder to Muscle Shoals and spend millions of dollars on the doubtful outcome of a machine to get nitrogen from the air? How many does the Senator from Tennessee expect to start in at that?

Mr. McKELLAR. I do not expect any.

Mr. SMITH. How many does the Senator from Utah expect to start in at it?

Mr. KING. Does the Senator want me to answer that question?

Mr. SMITH. Yes; I do.

Mr. KING. Mr. President, a few years ago I had the pleasure of visiting, with the late Senator Ladd, a number of the cyanamide and synthetic plants in Germany which were extracting nitrogen from the atmosphere. One of the plants that I visited had an enormous receptacle, nearly as large as this Chamber, into which was poured, from spouts above, the product, the nitrogen from the atmosphere. They had so perfected the chemical art, if I may so denominate it, that they

had no fear at all of their ability to get nitrogen from the atmosphere; and five hundred millions of dollars—it was inflated, it is true—was expended on those plants for the purpose of manufacturing nitrogen.

Mr. SMITH. That was under the auspices of the Government, was it not?

Mr. KING. Oh, no, no. It was done by private individuals. Not a single one of those plants was conducted by the Government, according to my advices.

Mr. HOWELL. The Government had furnished part of the money.

Mr. SMITH. That was my information.

Mr. KING. No; at least, those with whom I talked had erected the plants with their own capital.

Mr. McKELLAR. What year was that?

Mr. KING. That was in 1924.

In the United States the Allied Chemical Co. has manufactured nitrogenous products. and is now manufacturing nitrogenous products. The Cyanamid Co., by its process, extracts nitrogen from the atmosphere. We have in the United States some of the ablest chemists in the world, who are addressing themselves to this question. I think, profiting by the experience of the chemists in France, in Italy, and particularly in Germany, they are perhaps improving upon processes heretofore existing just the same as in the metallurgical world improved processes have been developed.

For instance, if I may divert, a few years ago in the West all of our minerals that contained arsenic were base; and millions of tons that were taken from the ground had to be thrown over the dump because the smelting charges were so high, and the arsenical element therein made the smelting of the product almost impossible. Now that is not done. A few years ago ores that had zinc in them were penalized. The zinc, valuable as it is, was a disadvantage and a handicap; and a man that sent a ton of ore that had a 10 or 20 or 30 or 40 per cent zinc content got less for it than if it did not have an ounce of zinc in it.

Mr. SMITH. Let me ask the Senator a question. He has gone far enough to illustrate what I asked him.

Suppose the extraneous matter that made it unprofitable to mine that ore did not make it unprofitable to mine it from the miner's standpoint, and he could sell it at a reasonable profit. Do you reckon he would have gone to all the expense and trouble of getting rid of that noxious element that affected his market? The question I asked the Senator was, as long as the fertilizer mixers of this country get the raw material in abundance to meet their needs and are able to fix their prices and to sell their stuff at a profit, when do you suppose they will go to work to develop a process that will cheapen the product and lessen the profits per ton that they now are obtaining?

Mr. KING. Of course, human nature is human nature——

Mr. SMITH. Exactly. That is the point I am making.

Mr. KING. And if nitrogen can be obtained from Chile and laid down here, say, at $10 a ton, just for illustration, chemists are not going to waste much time in devoting their capital and their efforts to extracting nitrogen from the atmosphere. As the Senator knows, however, with the inventive genius of the United States and with the great amount of capital for investment in the United States, whenever a product is needed and there is a possibility of success and profit in the enterprise, American capital is venturesome.

Mr. SMITH. I grant that; but the point I am making, Mr. President, is that in the first place the same principle applies here that applied in the radio question—a great revelation, as it were, to the genius of the country that messages could be sent through the air. Instead of its being a boon to all mankind, what has happened? In the first place, under our patent laws—which I do not criticize, because I think we ought to encourage the invention of these things that have made this age a marvel—the inventor, nine times out of ten, is the man who gets the least out of his invention. At the very birthplace of these marvelous revelations stands organized capital, which seizes upon the discovery and makes what should be its blessings a means of burdening and cursing the American people.

I have stood amazed at the revelations before the Patents Committee of what is being done in controlling the patents that make possible the transmission of messages through the air. The same thing is true of these scientific processes; and there is no one in America that can stand between the great mass of the unorganized producers and laborers of this country and the great organized capital of the country save the American Government.

The Senator says human nature is human nature, and that is true; and—

> The good old rule
> Sufficeth them—the simple plan,
> That they should take who have the power,
> And they should keep who can.

That has been the doctrine from the day that Wordsworth put those words into the mouth of Rob Roy, and before. So, as I had the honor of being the author of the Muscle Shoals act when first passed, with the object in view of utilizing the discoveries of science for the relief of the agricultural interests of the country, I stand here to-day and plead that the Government stay in this work until it shall have demonstrated beyond the cavil of any Senator here that it can or can not produce nitrogen in such quantities and at such price as to bring about the fruition of the hope that was in my heart when I introduced the original measure.

Mr. KING. Mr. President, may I be permitted, then, to draw the deduction from the Senator's concluding statement that he does not favor the subordination of agricultural development—that is, the production of fertilizer for agricultural uses—to power, and he is not in favor of turning Muscle Shoals over to power development, whether operated by the Government or operated by private individuals? He prefers to hold Muscle Shoals and the power potentialities of Muscle Shoals for the development of nitrogen or fertilizers for use on the farm?

Mr. SMITH. Unquestionably.

Mr. BLACK. Mr. President, I think, from the Senator's remarks, in which I have been very much interested, that he and I are practically 100 per cent in accord. While the Senator was talking, the junior Senator from Georgia [Mr. GEORGE] told me that he had just bought some Chile nitrate at $60 a ton. Figured out, that made the nitrogen content cost him 19 cents a pound.

The Senator from Nebraska [Mr. NORRIS] stated on yesterday that Doctor Cottrell and two other scientists had told him that nitrogen could be extracted from the air by the synthetic process for 4 cents. Doctor Cottrell also testified before the Military Affairs Committee yesterday, and so told me again this morning, that under the cyanamide process, nitrogen, ammonia—I am not talking about cyanamide; let us forget cyanamide; that is just one of the steps—ammonia could be extracted from the air at a cost of between 5 and 6 cents. My figures the other day were larger. He said, too, that in figuring the 5 and 6 cents he did not take into consideration a reduction for the by-products, nor did he know of the difference in labor—he had not informed himself on that—and that both those things would bring down the figure.

At any rate, under the recognized scientific statements of all of these gentlemen, we can get nitrogen from the air now for between 4 and 6 cents. My position, with which I think the Senator is in full accord, is this: Why delay a day in experimenting with anything, when the Senator from Georgia is buying nitrate at 19 cents and every one of these people tells us that it can be made for from 4 to 6 cents?

Mr. SMITH. If the Senator from Alabama will allow me, I think everybody is confused about this term "experiment." The whole fixation of nitrogen from the air is in the empirical stage, the experimental stage, now. I agree with the Senator. Let us use the present development to its full capacity, and let them go on and experiment every day to improve it.

Mr. BLACK. That is correct.

Mr. SMITH. That is all I have contended for from the beginning; but let us not restrict them or bind them in a contract to any one process. This is the Government of the people of America; and we have no right to allow anyone to step in and say to what extent this Government will go in meeting a great economic problem or what method it will use to meet it.

I know there are individual rights that we must respect; but when an individual right runs counter to the life and prosperity of the vast majority of people, that individual right must be subordinate, or I do not understand our system of government.

Mr. BLACK. The Senator and I are in absolute accord. I believe in the operation of that plant to its full capacity. It will make 50,000 tons. Under the statement of the Senator from Nebraska [Mr. NORRIS] yesterday of what that nitrate would cost when fixed from the air, it would save the farmers of America who paid the same price that the Senator from Georgia [Mr. GEORGE] did $15,000,000. Therefore I agree with the Senator that we need legislation here which will run that plant or some other plant at its full capacity right away. We need a bill that will provide a sufficient appropriation to have

it run at full capacity, either by private operation or public operation. Personally I favor private operation, but if they will put in a bill or if they will accept the amendment which I have offered which provides for the full operation of some plant to produce this nitrogen that they say can be produced at from 4 to 5 cents a pound, when the farmer is paying from 15 to 19 cents a pound for it, then I will vote for the bill.

Mr. SMITH. Now, I want to make one concluding statement, so that my position will be thoroughly understood:

I am not wedded to Government operation, but I am wedded to Government operation at the present time, for the reason that I believe the Government would take a greater interest in bringing about the things that I want than a private corporation.

I believe that the Government, moreover, should hold it until it had done all the dead work necessary to make a theory a fact, an empiricism a working realization, and when it shall have done that, it will have also ascertained the cost and capacity, and when it comes to lease, if it wants to lease, it will know what it is leasing and the value of the lease to the lessor.

Mr. HOWELL. Does not the Senator believe that the synthetic process promises more?

Mr. SMITH. I have no more doubt about it than I have that the present-day automobile is far superior to the first attempt to apply the internal-combustion feature to transportation.

Mr. HOWELL. Then, so far as Muscle Shoals is concerned, the Senator would agree that if the energy is sold for money and the money used in the promotion of the development of the production of nitrogen, that would be as satisfactory as if the plant were used itself for that purpose.

Mr. SMITH. Taking human nature as it is, I would like to answer that in this way: The minds of the American people are concentrated on Muscle Shoals as a locus, as a place, where this thing is going to be done. The people who are familiar with the synthetic process say that the presence of cheap coal is essential not only for the production of power, but of certain ingredients that enter into the production of nitric acid, involving the use of technical terms of which I am not familiar, and which I would not use if I were, because we in this body are talking to the great mass of people, and we ought to try to speak in such language that they will know what we are driving at.

I would like to try the experiment at Muscle Shoals of producing nitrogen by the synthetic process for the reason that I believe that the nearness of the Tennessee coal would make it reasonably available for the process. I think the Senator will agree with me that the power generated from coal gases can be used in the production of ammonia. I believe we ought to take that cyanamide plant and run it to its capacity, under the auspices of the Government, to settle the question once for all as to whether it is an available source for producing nitrogen available for agricultural purposes direct to the agriculturists.

I believe we ought to scrap nitrate plant No. 1 because it was not constructed, to use a highly technical term, to properly synchronize in the synthetic process of extracting nitrogen, and therefore it was a failure. But let us erect right away a synthetic process at Muscle Shoals, bring down the coal from the Tennessee mines, or from the Alabama mines, and try it out, for the psychology of the thing, if nothing else.

Mr. President, I want to call attention to a very curious thing that has made me suspicious of a great many statements made even by the synthetic people and others. When I first introduced my bill on this subject many said, "You never can extract nitrogen from the air for agricultural purposes because the amount of power necessary to produce a unit of nitrogen makes the cost prohibitive." That was especially true, they said, of the arc process, the Norway and Sweden process. But they said not to produce nitrogen, but cyanamide, which is an indirect method of converting the nitric acid into ammonia; but even there it would take a vast amount of power, more than you could develop at Muscle Shoals if you proposed to make enough fertilizer to supply the needs of agriculture. They beat us off with that, that you could not develop enough power at Muscle Shoals under the process to make enough fertilizer to supply the country.

When the synthetic process has demonstrated that it takes only a small per cent of power as compared with these other processes, they say, "Why waste the power at Muscle Shoals? If you would use all the power down there, you would produce more fertilizer than America will need."

It is a question of—

I can and I can't,
I will and I won't;
I'll be damned if I do,
I'll be damned if I don't.

It is a thing for us to take hold of and do.

CALL OF THE ROLL

Mr. HAWES obtained the floor.

Mr. BLEASE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. TYSON in the chair). The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Barkley	Fess	La Follette	Robinson, Ark.
Bingham	Fletcher	McKellar	Sackett
Black	George	McMaster	Schall
Blease	Gerry	McNary	Sheppard
Bratton	Gould	Mayfield	Simmons
Brookhart	Hale	Neely	Smith
Broussard	Harris	Norbeck	Steiwer
Bruce	Harrison	Norris	Stephens
Capper	Hawes	Nye	Thomas
Caraway	Hayden	Oddie	Tyson
Copeland	Heflin	Overman	Walsh, Mass.
Curtis	Howell	Phipps	Walsh, Mont.
Cutting	Johnson	Pine	Warren
Deneen	Jones	Pittman	Waterman
Edge	Kendrick	Ransdell	Willis
Edwards	King	Reed, Pa.	

The PRESIDING OFFICER. Sixty-three Senators having answered to their names, there is a quorum present.

FLOOD CONTROL

Mr. HAWES. Mr. President, almost a year ago a great disaster visited our country. It involved the loss of some 200 lives, it made homeless 700,000 people, it destroyed over $250,000,000 worth of property. It would almost seem that we have forgotten that event, but at the time all through America meetings were held, petitions were sent to the President of the United States asking for a special session of Congress, and great conventions were called in different portions of our country, one of national import at Chicago. There the representatives of all the valley States requested the President to call a conference on this subject. That was last June. He was requested to call into that conference, which is the significant thing, not only the experts of the Government but civil engineers, conservationists, geologists, financiers, and agriculturists.

The Chicago conference adopted the following resolution:

Resolved, * * * That the President of the United States is requested to call a conference for the purpose of formulating, in conjunction with such governmental agencies, a comprehensive plan for navigation and permanent flood control. Said conference to be composed of Army engineers, civil engineers, conservationists, geologists, financiers, agriculturists, and other experts representing the various interests of our country.

That convention believed that the President should have the advice not only of Army engineers but of all elements of American life.

Even before the convening of Congress a committee of the House has been holding hearings beginning last November. They have continued since. Four or five volumes of testimony have been taken.

Before that committee appeared engineers, business men, and experts who understood the river and its needs.

On the Senate side hearings were held, some two weeks in length, and only recently a bill was reported to the Senate.

The significant thing is in all the hearings fully 95 per cent of the witnesses before the House committee opposed what was called the Jadwin plan, and the same percentage of those who appeared before the Senate committee opposed his plan, and yet the bill presented to the Senate provides for the adoption of the Jadwin plan.

I state here without fear of successful contradiction by any Senator that in the Senate hearings, with the exception of Colonel Jadwin himself and two of his assistants, all other witnesses condemned the Jadwin plan. In the shape that it comes before us, as a representative of the State of Missouri it can not receive my support.

Mr. President, this is a serious situation. As a friend of the river, born near the banks of the Ohio in Kentucky, growing up to manhood on the banks of the Mississippi in Missouri, watching the development of its navigation, I am amazed to find that in the month of March, 1928, we have only before us a plan that has been opposed by 95 per cent of the witnesses before the House and Senate committees. I shall discuss the Jadwin plan in detail later. Now, I direct the attention of the Senate to its national scope. I hope amendments will give us a flood-control plan that will meet with the approval of the representatives of the States in the valley.

THE RIVER

We can not visualize flood control unless there is clear understanding of the size of the drainage basin whose waters all pass through the alluvial delta and create the floods.

It is not the waters of the immediate States which are responsible for floods; it is the waters that come from States at a distance.

It may be said, in passing, that the greatest sufferer of all is Louisiana, and that practically all the rainfall in that State is carried to the Gulf through its bayous, creeks, and smaller rivers. The waters of this State do not enter the Mississippi nor contribute to the floods which overmaster the ingenuity of the people of Louisiana; and, in a degree, this is true of Arkansas, of Tennessee, of Mississippi, Kentucky, and Missouri.

All the waters flowing through this valley, no matter from what State or source it comes, must be taken into consideration in determining this problem. The entire rainfall between the western slopes of the Alleghenies and the eastern slope of the Rockies drains into this basin and passes through the area now under discussion on its way to the Gulf.

Before discussing the physical contact with some 31 States through its waterways, it may be interesting to briefly state some of its historical connections.

Even in colonial days the alluvial valley at the mouth of the river was the occasion of much diplomatic discussion between England, France, and Spain.

Washington sent three messages to Congress in the matter of the Mississippi River. The Louisiana Purchase was made by Jefferson largely because he believed it was essential to national unity that the Mississippi River should come into the possession and be made part of the United States. As far back as 1845 we find speeches from John C. Calhoun referring to the flood conditions of the previous year, which he then said were too great for local enterprise; that their control was a duty to be undertaken by the Federal Government.

Long before the wilderness was invaded by the pioneer the Spanish had the broad vision of the valley; the French had it; the English had it. George Washington, Andrew Jackson, and Abraham Lincoln all realized the importance of the river and had the broader view of the problem it presented.

It has always been accepted as a fact that a hostile army could never cross the Alleghenies on the east nor from the Rockies on the west. An invading army could find its way to the heart of America only up the river from its mouth or down the river from its source, and the Nation could not be conquered until this section had been subdued.

Jackson went down the river to the Battle of New Orleans, down the valley traveled the troops that helped Texas secure its freedom, and later again the troops that won the war with Mexico.

Modern authorities state that the real, decisive battles of the Civil War were fought upon its banks, and Union generals trained in the battles of the river were put in command on the eastern front, displacing the early opponents of General Lee.

The Mississippi watershed embraces 1,250,000 square miles, about 41 per cent of the total area of continental United States. Its watershed embraces 31 States and 2 Provinces of Canada.

It is not surprising, therefore, that President Garfield in 1878 said:

> The statesmen of America must grapple with the problem of this mighty stream. It is too vast for any State to handle, too much for any authority other than that of the Nation itself to manage.

But these are not the things in which we are interested to-day. What constitutes the Mississippi; whence come these flood waters? Whose problem is it? Whom does this river serve? How many does it serve? How many feel the weight of the misery it leaves in its wake when on a rampage? These things we must understand before we can move in legislative consideration.

If anyone were to say here to-day that the Mississippi River is a river more than 10,000 miles in length, there would be a tendency to question this geographical accuracy. But when we consider the whole facts for the purpose of flood control, we find that the Mississippi River is more than 10,000 miles in length; that it is probably twice that length; that no one has ever actually computed its real length, and that it is many times the largest body of flowing water in the entire world.

Sitting here in the Nation's Capital within 150 miles of the Atlantic seaboard, we can hardly realize that in the vast empire stretching to the west there is a gigantic watershed some 2,000 miles in width that is in fact drained by one great river. Not more than 200 miles west of the building in which we now are, the watershed of the Mississippi begins and then lays out across 2,000 miles until it meets the crags of the Rockies.

The waters of central West Virginia and the very western tip of Maryland flow off the Appalachian slopes into Ohio and Kentucky to ramble on through many States until at last they pass the levees at New Orleans to empty into the Gulf. Waters which ultimately become a part of the body of the Mississippi may be found above the northern borders of the United States in Canada, north and west of Montana.

Other water may be found a few miles from Lake Superior in Wisconsin, while still others—and this should be remembered by distinguished colleagues Senators COPELAND and WAGNER—may be found in the southwestern section of New York that pass the levees at New Orleans.

One who studies the map of the Mississippi Valley drained by the Mississippi River and its tributaries will be amazed. Every great river of the vast empire of the valley pours its waters into the Mississippi, and an accurate map of all these great rivers show hundreds of streams ranging from 50 to 200 miles in length paralleling each of them; rivers that run east and rivers that run west, and even rivers that run north.

I wonder how often it occurs to the residents of Montana that the Yellowstone coursing from the great national park north and east to its confluence with the Missouri ultimately drains its waters into the Gulf of Mexico.

How often do the residents of South Dakota, watching the Cheyenne flow north and east to the Missouri, realize that the waters that pass over their State rush on to become a part of the flood waters of the Mississippi?

There is the Little Missouri in North Dakota, that runs almost directly north toward Canada. And dropping to the southwestern section of the country we find the Tennessee wandering out of its own State into northern Alabama, then flowing almost directly north to the Ohio to carry its waters; first north, then south through the drainage basin of the Mississippi. And likewise, the Cumberland flowing first south from Kentucky across the northern section of Tennessee, then back north through Kentucky to the Ohio.

All along the great rivers which have become well known to us because of the consideration we have given to harbor problems in the past—the Ohio, the Red, the Arkansas, the Kansas, the Missouri, the Platte, the Atchafalaya, the Illinois, the Cheyenne, the White, the St. Francis—all along these rivers there are myriads of other streams running north, south, east, and west, pouring their waters into currents that sweep onward to New Orleans.

It is not fiction when we say that the Mississippi watershed touches 30 of the 48 States of this great Nation. The Mississippi River drains the far Northwest section skirting the boundary of Idaho. It drains all of Montana. It drains two-thirds of Wyoming. It drains one-half of Colorado and one-fourth of New Mexico. It drains one-third of North Dakota and all of South Dakota. It drains all of Nebraska, all of Kansas, all of Oklahoma, and the northwest strip of Texas.

Two-thirds of Minnesota's waters flow past New Orleans, all the waters of Iowa, all the waters of Missouri, all the waters of Arkansas, one-half of the waters of Wisconsin, all the waters of Illinois, and one-half of the waters of Mississippi.

This great river drains all the waters of Indiana, all the waters of Kentucky, all the waters of Tennessee, all the waters of Ohio, the western quarter of Pennsylvania, a small southwest corner of the State of New York, and the northern portion of Alabama.

Tributaries of the Mississippi reach into North Carolina, draining the southwest portion of Virginia, practically all of West Virginia, and reach almost to the Nation's Capital on the western edge of Maryland.

In addition to this, Chicago has cut a canal from Lake Michigan to the Illinois River, and it is difficult to determine how much of the waters of the Great Lakes are flowing past New Orleans. If we stop to consider for a moment the extent of this great empire, we are astounded at its size and its importance.

In this vast area served by this great natural water system are scores of the greatest cities of our Nation: Chicago, Pittsburgh, Wheeling, Columbus, Akron, Dayton, Cincinnati, Louisville, Nashville, Chattanooga, Paducah, Indianapolis, Decatur, Peoria, Memphis, Vicksburg, Milwaukee, St. Paul, Madison, Davenport, Des Moines, St. Louis, Kansas City, St. Joseph, Cape Girardeau, Sioux Falls, Fargo, Bismarck, Omaha, Lincoln, Topeka, Atchison, Arkansas City, Tulsa, Muskogee, Denison, New Orleans, Baton Rouge, Little Rock, Hot Springs, and many others.

There is hardly a city I have mentioned that does not expect at some future date to be the direct beneficiary of our river and harbor work which the Government of the United States has undertaken in connection with our great rivers.

This vast area of drainage is divided by engineers into six drainage basins, the first extending through portions of Virginia, North Carolina, Maryland, and Pennsylvania on the east and through the eastern section of Illinois on the west, taking in a portion of Ohio and the northern portion of Georgia and Alabama.

This is known as the Ohio drainage section. The upper Mississippi drainage section takes in the States of Illinois, Wisconsin, Minnesota, and a large portion of the State of Iowa.

The Missouri drainage extends from Montana and Idaho on the north and west in an irregular form down through portions of Colorado and Kansas, taking in the Dakotas, Nebraska, the western portion of Iowa, and Missouri.

The Arkansas drainage takes in the southeastern portion of Colorado, the northeast section of New Mexico, the northern strip of Texas, the southern portion of Kansas, all of Oklahoma and Arkansas, and all of the northern and eastern sections of Louisiana.

The lower Mississippi drainage basin is the area of Louisiana, Mississippi, Tennessee, Arkansas, and southeast Missouri, into which the water of all the other areas pour.

In this vast basin which we have described is an area of 1,240,000 square miles, or more than 41 per cent of the United States, not including Alaska. In this drainage area also may be counted 20,000 square miles of Canada. What might be called one river, the Mississippi from St. Louis to New Orleans, and the Missouri from its confluence above St. Louis to its source, is a continuous flow of water for 4,200 miles, a distance which is unequaled by any other river in the world and approached only by the Nile and the Amazon.

The Mississippi River from its source in Lake Itaska to its mouth is approximately 2,500 miles. A direct line from its source to its mouth would be approximately 1,300 miles.

The report of the Mississippi River Commission states that the navigable waterways of the Mississippi River and its tributaries is estimated at 15,000 miles, so that including other waters than navigable waters the total length of the flood waters of the Mississippi may well be placed between twenty and twenty-five thousand miles—a river which, if extended into one stream, would reach around the entire globe at the equator.

Now, let us turn to the valley which this vast waterway system drains—a valley that is an empire of wealth in itself, self-sustaining in its raw and manufactured products, and raising on its fields more than two-thirds of the agricultural products of the Nation, manufacturing in its plants one-half of the products of the whole of America.

In the Mississippi Valley live more than one-half of the entire population of the United States. The valley contributes to the national wealth 68 per cent of the exportable products. In the valley is the industrial center of the Nation, the agricultural center near the confluence of the Mississippi and Illinois Rivers, and the center of population in southwestern Indiana near the Illinois line.

At least four mountain areas are embraced within the boundaries of the valley. There are forests and plains, thinly populated but teemingly productive flat lands. And then, again, great congested commercial centers. Although housing slightly more than one-half of the population of the Nation, the valley is inhabited by 70 per cent of the rural population.

In the Mississippi Valley all but 15 per cent of the entire corn output of the Nation is grown; 80 per cent of the Nation's wheat yield is found; practically all of the rye, barley, flaxseed, sugar cane, and oats are raised in the valley on its 295,000,000 acres. The potential productive wealth is incalculable. Its stock is about three-fourths of the total livestock of the Nation.

Producing more than one-half of the manufactured products of the United States, this great area turns out the agricultural implements of the world, 90 per cent of the automobiles, one-half of the brick and terra cotta, one-third of the leather, two-thirds of the wood, one-half of the furniture, one-half of the glass, and practically all of the iron and steel work, to say nothing of a practical monopoly in the output of coal, coke, and iron ore.

The drainage basin of the Mississippi is larger than the area of the whole of continental Europe. It is the world's most precious area. Its development in less than 100 years is probably the most remarkable chapter in this history of national growth.

FLOODS

The waters of Montana and the waters of Pennsylvania join with the waters of northern Wisconsin and those of Virginia and New Mexico at some point of the basin along the lower Mississippi and contribute to the causes of floods.

There are records of floods in 1828, 1844, 1849, 1850, 1858, 1862, 1882, 1883, 1890, 1892, 1893, 1897, 1903, 1912, 1913, 1916, 1922, and 1927. So there has been a continuous struggle with the problem for 100 years, first by the States and subdivisions of the States and later with Federal assistance. This Federal assistance has been increasing, but without success. So precedent must be set aside and the Nation take the problem fully in hand and solve it as a national problem at national expense.

These floods are naturally characteristic of the vast basin with its tilted-up northern section and its tilted eastern and western borders all hurling its waters into the narrow strip of the lower Mississippi. The early settlers along the banks of the lower Mississippi saw the necessity for controlling the floods. They built makeshift levees along the river banks, and as the pioneer population swept into the valley dikes and levees were constructed by these first pioneers.

The first efforts were individual efforts and then, through a community spirit, by organized districts. One by one the States, as they grew up and became a part of the United States, undertook some form of legislation with respect to these floods; but it was a hopeless task for any State or group of States. It is manifest from the picture of this great drainage basin that no one section and no one State can handle the flood problem. These floods are not caused alone by the act of God, by the deposit of snow and rain, but in recent years they have been contributed to by the act of man, and this contribution by man is constantly increasing.

The millions spent annually on good roads are constantly forming drainage systems which carry water with an increased velocity to the basin. Drainage systems add to this velocity. Forests have been denuded which held back in restraint the quick flow of rain water. Swamp lands have been converted into farms, and the natural provisions of nature for holding back the waters have been destroyed. I am not discussing the lower valley now, which is in immediate distress. This artificial precipitation comes from above that district, beyond its reach and control.

The people of the alluvial valley made their fight against these floods, without assistance from the Government, until 1882, when it became apparent to everyone that the States and local subdivisions could not handle the matter without national assistance. Since that time the policy of Congress has been to constantly enlarge its contribution, and there has been a corresponding acknowledgment by Congress of the national responsibility.

From 1714 until the creation of the Mississippi River Commission in 1879 the entire expense of the fight against the floods was borne by the States and local subdivisions. Immediately upon Federal participation came absolute Federal control. To-day a private citizen can not build a boat, a dike, a bridge, a dam, or revetment without permission from the National Government. Its authority is supreme; its control absolute. Yet under this Federal control and direction this territory has lost in floods, in 1903, $40,000,000; in 1912, $78,000,000; in 1913, $12,000,000; in 1916, $5,500,000; in 1922, $17,000,000; and in 1927 between $236,000,000 and $284,000,000. This shows a total loss of over $400,000,000 in less than 25 years in a district which is now under the direction, control, and mandate of the Federal Government so far as flood matters are concerned.

To prevent this great loss the States had spent $292,000,000, while Congress had contributed only $71,000,000, leaving a difference of $221,000,000.

The whole theory of local contribution and dual responsibility is illogical, unsound, and impossible of equitable application. The only argument in its favor is precedent, and the precedent is unsound because there has been a change in conditions and a recent frightful demonstration which has destroyed the precedent.

Local contributions can not be equitably imposed. The contribution of the States is not uniform. The attempt to make Missouri pay for Illinois, or Kentucky to contribute to Tennessee, or Arkansas to Louisiana, can not be worked out on any equitable basis, and finally leaves the vast burden to be borne by Louisiana, when, as a matter of fact, the cost to Louisiana is of benefit not only to all the adjacent States but to the entire valley.

It has been stated that flood control is a reclamation matter; that it confers special benefits to special landowners and should be paid for by them. No one who has investigated the subject ever made such claim. It is merely an ignorant assumption unsupported by facts.

The losses in seven States amounted to $236,344,414.06. I give this in itemized form so that some idea of the diversity of the damage may be understood.

Report of loss and damage by the 1927 floods in the Mississippi Valley in the States of Illinois, Missouri, Kentucky, Tennessee, Arkansas, Mississippi, and Louisiana

(Acres of crop land flooded in five States, 4,002,400. No report on number of acres flooded in Illinois and Kentucky.)

Crop losses:			
Baled cotton damaged		$2,828,850.00	
Loss on average crop expected		16,028,024.00	
Loss of rents on lands not cultivated by reason of overflow		12,190,300.00	
Damage to growing cotton crop		13,497,237.00	
Damage to sugar industry (report furnished by American Sugar Cane League)	$7,080,000.00		
Cost to replant 34,000 acres of cane	3,400,000.00		
		10,480,000.00	
Damage to growing crops other than cotton and sugar		15,679,950.00	
Damage to matured crops		2,083,260.00	
Damage to seed		753,419.00	
			$73,541,040.00
Cost of replanting			4,181,627.00
Livestock losses:			
12,626 horses and mules		1,269,150.00	
2 counties in Missouri report livestock losses without giving number		45,000.00	
25,716 cattle		633,075.00	
133,174 hogs		1,153,929.00	
2,560 sheep and goats		10,615.00	
719,647 poultry		388,723.30	
			3,500,492.30
Property damage:			
7,879 houses destroyed		3,341,650.00	
46,840 houses damaged	$6,724,625.00		
2,200 houses destroyed or damaged (Arkansas)	570,000.00		
9,904 houses, stores, gins, barns, and other buildings destroyed or damaged	1,535,750.00		
Houses destroyed or damaged, no number given (Louisiana)	50,000.00		
Houses, stores, gins, barns, and other buildings destroyed or damaged	3,601,562.00		
		12,481,937.00	
118 stores destroyed	87,600.00		
Stores destroyed or damaged, no number given (Illinois)	3,000.00		
		90,600.00	
2,138 stores damaged	625,150.00		
10 stores destroyed or damaged (Arkansas)	10,000.00		
Stores destroyed or damaged, no number given (Louisiana)	5,000.00		
		640,150.00	
17 gins destroyed		118,000.00	
235 gins damaged		197,650.00	
2,997 barns destroyed		791,650.00	
11,594 barns damaged	$888,710.00		
400 barns destroyed or damaged (Arkansas)	160,000.00		
Barns destroyed or damaged, no number given	134,500.00		
		$1,183,210.00	
16,971 other buildings destroyed		1,570,800.00	
36,523 other buildings damaged	$941,220.00		
200 other buildings destroyed or damaged (Arkansas)	20,000.00		
Other buildings destroyed or damaged, no number given	96,500.00		
		1,057,720.00	
Damage to merchandise		1,628,711.00	
Damage to oil mills		528,000.00	
Damage to farm implements		1,317,515.00	
Damage to automobiles		1,003,650.00	
Damage to feed		3,054,544.50	
Damage to household goods		4,730,627.00	
Damage to land by washing and spreading of obnoxious grasses		4,736,750.00	
Damage to fences		964,625.00	
Damage to private roads and bridges		1,211,850.00	
Damage to private ditches and drains		840,350.00	
			$41,489,999.50
Business losses			18,655,515.00
Damage to school buildings and equipment			399,841.29
Damage to hardwood lumber industry			4,474,820.00
Damage to cooperage industry			258,952.00
Damage to highways and bridges			2,738,122.00
Damage to railroads			16,702,379.51
Damage to public utilities			718,835.00
Cost of high water fight:			
Mississippi River Commission		$6,000,000.00	
Levee boards		2,120,084.26	
Board of Engineers (Louisiana)		250,000.00	
			8,370,084.26
Closing crevasses (Mississippi River Commission)			3,578,000.00
Restoring levees to preflood condition			2,575,566.20
Damage, Caernarvon Crevasse			5,000,000.00
Damage, junior crevasse			350,000.00
War Department supplies furnished			7,000,000.00
Red Cross fund		$16,000,000.00	
Appropriated by the State of Illinois for relief		2,000,000.00	
			18,000,000.00
Loss of earnings of tenants and share croppers, average 137,773 people at $20 per month, on a basis of 9 months' working season			24,799,140.00
Total			236,334,414.06

Number of lives lost, 183.

The railroads alone suffered a loss of $16,702,379.51, as follows:

Loss and damage to railroads by reason of the 1927 floods in the Mississippi Valley

Missouri-Kansas-Texas Railroad Co.
St. Louis-Southwestern Railway Co.
St. Louis & San Francisco Railway Co.
Chicago, Rock Island & Pacific Railroad Co.
Louisiana Railway & Navigation Co.
Texas & Pacific Railway Co.
Illinois Central system.
Louisiana & Arkansas Railway Co.
Missouri Pacific Railway Co.
Gulf Coast Lines.
Missouri & North Arkansas Railway Co.

Eleven companies report as follows:

Expense of keeping line open	$2,022,972.09		
Cost of repairing roadbed damaged by high water	4,349,809.12		
Damage to equipment	253,989.69		
Damage to shipments in transit	212,314.00		
Expense of handling Red Cross supplies	329,812.67		
Expense of handling refugees	$143,982.60		
Expense in connection with providing box cars for living quarters of refugees	160,719.00		
Loss of business during high water (Due to damage to crops, logging operations, manufacture, etc., freight and passenger business.)	7,185,720.94		
Direct loss			$14,659,320.11
Four companies report loss of business account diverted to other lines during high water (business which did not return after high water receded)	612,118.40		
Loss due to decrease in efficiency of operation and efficiency of personnel	27,500.00		
Freight and passenger business which did not move due to erroneous information given out in various parts of the country concerning flood conditions and their effect on the transportation lines	208,500.00		
Miscellaneous expense (6 companies)	1,194,941.00		
Indirect loss			2,043,059.40
Total loss			16,702,379.51

The utility companies lost $718,835, as follows:

Loss and damage to public utilities by reason of the 1927 floods in the Mississippi Valley

STATE OF ILLINOIS		
Illinois Bell Telephone & Telegraph Co		$12,000
STATE OF KENTUCKY		
Southern Bell Telephone & Telegraph Co		5,000
STATE OF ARKANSAS		
Southwestern Bell Telephone & Telegraph Co	$32,000	
Postal Telegraph & Cable Co	11,250	
		43,250
STATE OF MISSISSIPPI		
Southern Bell Telephone & Telegraph Co	150,000	
Postal Telegraph & Cable Co	18,750	
		168,750
STATE OF LOUISIANA		
Southern Bell Telephone & Telegraph Co	$86,500	
Postal Telegraph & Cable Co	5,000	
		$91,500
Western Union Telegraph Co., loss and damage in the seven States		98,335
American Bell Telephone & Telegraph Co., reports loss of business		300,000
Total damage		718,835

As another illustration disproving the claim that this is a reclamation project, I give the losses in Missouri as typical in character of the losses in other States:

STATE OF MISSOURI

Loss and damage by reason of the 1927 floods in the Mississippi Valley—Nine counties affected

Crop losses—310,000 acres of crop land flooded:			
Baled cotton damaged		$7,500	
Loss of rents on lands not cultivated by reason of overflow		1,786,400	
Damage to growing cotton crop		290,000	
Damage to other growing crops		3,140,500	
Damage to matured crops		420,260	
Damage to seed		66,800	
			$5,711,460
Cost of replanting			55,000
Losses of livestock:			
108 horses and mules	$10,800		
Horses, mules, cattle, hogs, and poultry (Dunklin and Pemiscot Counties, no number given)	45,000		
		55,800	
148 cattle		4,150	
1,280 hogs		22,300	
700 poultry		250	
			82,500
Property damage:			
136 houses destroyed		60,000	
1,814 houses damaged	97,000		
479 houses, stores, gins, barns, and other buildings destroyed and damaged (Dunklin County)	40,250		
Houses, stores, gins, barns, and other buildings destroyed and damaged (Pemiscot County, no number given)	40,000		
		177,250	
1 store destroyed		1,000	
20 stores damaged		4,000	
2 gins damaged		1,600	
38 barns destroyed		15,000	
55 barns damaged	6,400		
Barns and other buildings destroyed and damaged (Stoddard County, no number given)	21,000		
		27,400	
40 other buildings damaged		2,000	
Damage to merchandise		20,000	
Damage to farm implements		16,200	
Damage to automobiles		6,500	
Damage to feed		254,000	
Damage to household goods		38,750	
Damage to land by washing and spreading of obnoxious grasses		55,000	
Damage to fences		121,000	
(Two counties report 210 miles damaged.)			
(One county reports without giving number of miles.)			
Damage to private roads and bridges		82,500	
Damage to private ditches and drains		122,500	
			1,004,700
Business losses			250,000
Hardwood lumber industry, 10 mills affected			136,820
Damage to school buildings and equipment			74,378
Damage to highways and bridges			376,407
Total damage			7,691,265

The testimony of the witnesses before the House and Senate committees will be illuminating. Read the testimony of Postmaster General Harry New on the number of post offices closed, the interruption and suspension of mails, the closing of schools, the idleness of school children. Read the statements of the presidents of the great transcontinental railroads, together with their chiefs of engineers. Read the testimony of bankers and investment houses. Read of the interruption of commerce and the loss which affected not only the immediate community but the entire United States.

Other Senators may illustrate the losses in their own community. I have given the Missouri losses, which are relatively small considering the large total, and this loss was created because of one break in a long line of levees. It came from one crevasse, and that levee was under the control and management of the Federal Government.

We find in the last analysis that $292,000,000 was spent by the States, only $71,000,000 by the National Government, or a total of $366,000,000; that the total losses from floods was over $400,000,000; and now we are quibbling as to the contribution for levees and other forms of construction which will not involve over $12,000,000.

Suppose we have another flood next year with another $250,000,000 loss? If it does not come next year, it is certain to come in some succeeding year. What answer will these contenders for local contribution be able to make to another great national disaster?

We have handled the matter of floods in an unbusinesslike manner. We have paid the cost for national neglect, and we will have to pay it again and again and again until such time as the Army engineer is permited to have a broader vision, more humanity, to a time when self-contemplation and pride of personal opinion will give place to an adequate plan before an aroused and outraged national public sentiment.

If the losses in this region and the failure of local effort do not tell their own story, no words of mine can add to the facts or be persuasive. These figures give the lie to fiction. They demonstrate that flood control is a national problem. If the waters that flow from more than 40 per cent of the area of the Nation in which live more than 50 per cent of the population, and 70 per cent of our agricultural population, do not constitute a national problem when at flood stage, then, it seems to me, that we have no national problem with which to deal.

This is not a new problem. It has been merely emphasized by the losses of the recent flood. For a century the minds of thoughtful men have turned to this question of controlling the floods of the Mississippi.

NATIONAL PROBLEM

Men from all classes of life, engineers of experience, business men of standing, and representatives of various organized groups, have appeared before both the House and Senate committees. They have almost uniformly, with the exception of General Jadwin and some of his immediate associates, contended that this was a national problem to be borne by national expense. They have shown the futility of asking local contribution, the injustice of it, its inhumanity considering the terrible losses recently suffered, and how it can not be compelled by the National Government. They have shown that where the chain breaks in one part it destroys the whole machinery of protection.

It may be well, however, in passing to quote a few of these witnesses:

The representatives of the chamber of commerce, the great national business organization.

The representatives of the American Federation of Labor.

The representatives of the American Legion.

The representatives of farm bureaus.

The American Chamber of Commerce, representing the business men of every State in the Union, submitted to its membership, by referendum, two resolutions for their consideration:

First, the committee recommends that the Federal Government should hereafter pay the entire cost of constructing and maintaining works necessary to control floods of the lower Mississippi.

The vote in favor was 2,131; votes opposed, 512.

Proposition No. 2:

The committee recommends that the Federal Government should assume the sole responsibility for locating, constructing, and maintaining such works.

Votes in favor were 2,581; votes opposed, 240.

The committee from this organization made a personal trip of investigation, held hearings, took with them their own engineers and experts, and arrived at their conclusions only after thoughtful consideration and first-hand information.

On this committee were representatives of citizens from Washington, D. C., from California, from Illinois, from Arkansas, from Tennessee, from New York, from Missouri, from Wisconsin, from Mississippi, and various sections of the country.

For the information of the Senate, I ask permission to insert in the RECORD, in the body of my remarks, some description of these men, their past experience, and ability to pass judgment on so vital a matter.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

PERSONNEL OF NATIONAL CHAMBER'S COMMITTEE ON FLOOD CONTROL OF THE MISSISSIPPI

Frederic A. Delano, chairman, Hibbs Building, Washington, D. C.: Formerly a railroad executive and president of the Wabash Railroad; appointed a member of the Federal Reserve Board upon establishment of the Federal reserve system, resigning in 1918 to enter Army; on staff of the director general of transportation in France; member National War Savings Committee, Treasury Department, during war; recently receiver for the United States Supreme Court in Red River boundary case; member national chamber's committee on inland waterways, 1922–23; ex-member board of overseers of Harvard; ex-trustee University of Chicago; member American Society Civil Engineers, American Institute Mining Engineers, Western Society Engineers, A. A. A. S., American Railway Association, Franklin Institute, International Railway Congress; Western Railway Club, Chicago.

Robert P. Lamont, vice chairman, 410 North Michigan Avenue, Chicago, Ill.: Manufacturer, of Chicago; president American Steel Foundries; director First National Bank of Chicago, Armour & Co., etc.; during war chief procurement division, Ordnance Department; honorary vice president National Foreign Trade Council Convention, 1919; member Chicago Association of Commerce and formerly vice president Illinois Manufacturers' Association; director Chamber of Commerce of the United States.

Arthur S. Bent, 418 South Pecan Street, Los Angeles, Calif.: Engineering contractor, of Los Angeles, Calif.; senior partner Bent Bros. and president California Glazed Cement Pipe Co.; formerly president Associated General Contractors of America; director Chamber of Commerce of the United States; trustee Pomona College (Claremont, Calif.); director, 1923, Merchants and Manufacturers' Association; American Concrete Institute, affiliated American Society of Civil Engineers.

William Butterworth, Deere & Co., Moline, Ill.: Manufacturer, of Moline, Ill.; president Deere & Co.; formerly president National Implement and Vehicle Association; chairman Army vehicles, General Munitions Board, Council National Defense; chairman subcommittee on Army vehicles, General Munitions Board, Council National Defense; member American Committee of the International Chamber; vice president of the Chamber of Commerce of the United States for the Northern Central States.

H. C. Couch: Engineer, of Pine Bluff, Ark.; president Arkansas Light & Power Co.; vice president Bankers Trust Co., Little Rock, Ark.; chairman Arkansas Farm Credit Co.; national counselor for Pine Bluff Chamber of Commerce in United States Chamber of Commerce.

Jacob M. Dickinson: Lawyer, of Chicago; formerly Secretary of War; president of the American Bar Association; receiver for Rock Island lines, etc.; vice president American Society of International Law; president Izaak Walton League.

Robert R. Ellis, 155 South Front Street, Memphis, Tenn.: Wholesale merchant, of Memphis, Tenn.; president the Hessig-Ellis Drug Co.; formerly president Memphis Chamber of Commerce; vice president of the Chamber of Commerce of the United States; director Central-State National Bank, of Memphis.

Walker D. Hines, 320 Broadway, New York, N. Y.: Lawyer, of New York City; president Cotton Textile Institute; formerly chairman board of directors Atchison, Topeka & Santa Fe Railroad; formerly Director General of Railroads; author of numerous pamphlets and articles governing railroad problems, especially those connected with Government regulation and railway and international affairs since the war; recently arbitrator under peace treaties of questions relating to river shipping and investigator under League of Nations respecting navigation on Rhine and Danube.

John G. Lonsdale, National Bank of Commerce, St. Louis, Mo.: Banker, of St. Louis, Mo.; president of the National Bank of Commerce, St. Louis; director St. Louis Reserve Bank; member commerce and marine committee of the American Bankers' Association; chairman production bureau committee St. Louis Chamber (committee interested, among other things, in rural educational facilities; secured cooperation of school superintendents throughout the State in making a survey of rural educational facilities, which committee used in industry and educational campaign for their improvement, etc.), 1920–21; member of national chamber's committee on education, 1921, 1922, and 1923; member of board of directors St. Louis Chamber of Commerce, 1921; member of Business Men's Agricultural Commission, 1926 (Chamber of Commerce, United States of America, and National Industrial Conference Board); chairman national chamber's committee on aeronautics, 1926–27, 1927–28; member committee on banking and currency study, 1927–28; director representing finance department Chamber of Commerce of the United States.

Daniel W. Mead, 115 South Carroll Street, Madison, Wis.: Engineer, of Madison, Wis.; professor of hydraulic and sanitary engineering, University of Wisconsin, and consulting engineer in these fields; built waterworks for Rockford, Fort Worth, Tex., Danville, Ill., Moline, Ill.; filter, Kilbourn, Wis., hydraulic-electric plant (10,000 horsepower); Prairie du Sac, Wis., hydraulic-electric plant (20,000 horsepower); author, "Notes on hydrology," 1904; "Water-power engineering," 1908; "Contracts, specifications, and engineering relations," 1916; also numerous papers read before scientific societies and bulletins of University of Wisconsin; member of the former Red Cross commission to China on flood protection; and formerly consulting engineer Miami conservancy district.

John M. Parker: Cotton planter and cotton merchant, of New Orleans; former Governor of Louisiana; formerly president New Orleans Board of Trade, Mississippi Valley Association.

Leroy Percy, Weinberg Building, Greenville, Miss.: Lawyer and cotton planter, of Greenville, Miss.; former Senator of the United States; director of St. Louis Federal Reserve Bank; attorney for First National Bank; Yazoo & Mississippi Railroad; director, First National Bank of Greenville, Miss.

Matthew S. Sloan, 380 Pearl Street, New York, N. Y.: Engineer, of Brooklyn, N. Y.; president Brooklyn Edison Co.; member American Institute of Electrical Engineers; treasurer and trustee Polytechnic Institute of Brooklyn; trustee Brooklyn Hospital; member American Institute for Electrical Engineers, New York; Electrical Society, Academy of Political Science; director Brooklyn Chamber of Commerce; director representing natural resources department, Chamber of Commerce of the United States.

Alfred H. Stone, Dunleith Plantations, Dunleith, Miss.: Cotton planter, of Dunleith, Miss.; vice president Staple Cotton Cooperative Association; member Mississippi Legislature, 1916–1923; American Political Science Association; American Sociological Society; American Historical Association; American Economic Association; African Society of London; president Mississippi Historical Society, 1912–13; author, Studies in the American Race Problem, 1906; editor, the Staple Cotton Review.

Mr. HAWES. Mr. President, Mr. William Green, the president of the American Federation of Labor, in a letter addressed to me on February 18, makes this statement:

The officers and members of the American Federation of Labor believe that the cost of flood control in the Mississippi Valley should be borne by the Federal Government. The task is so great and the problem so complicated and difficult that it seems that the Federal Government is the proper agency to undertake and complete this great enterprise.

Mr. Wallace, representing the American Federation of Labor:

To tell those people that they must pay part would in effect do two things: First, it would delay the securing of the banks of the river, or whichever way the engineers might think it is necessary to control the flood waters. Secondly, it might bring about controversies between States, between localities, as to how this work should be done. Surely if they are asked to help pay they will demand some voice as to how this work shall be done. If this work is to be done well and to be done thoroughly, in our opinion, it should be controlled by one head, and therefore financed by that same head.

The representatives of the National Association of Credit Men, with a membership of 30,000 and with headquarters in New York, Chicago, and San Francisco, made this interesting statement:

That the influence of these disasters, while it is felt immediately by those in the vicinity where they occur, is causing untold thousands of dollars' loss of property and loss of lives, and suffering does not stop there. It spreads out through the channels of trade and commerce and business and economic conditions throughout our entire Nation. It is a national problem. It must and should be controlled.

Mr. Frederic Delano, chairman of the special committee studying this problem for the National Chamber of Commerce, made this statement:

As it is a national problem, it is one for the National Government to finance in its entirety. The people in the flooded areas have exhausted themselves in their unavailable efforts to protect themselves. They are at the end of their resources.

Mr. James E. Spofford, national commander of the American Legion, presented the following resolution from the Legion:

That legislation should be enacted by the Congress of the United States not only to grant relief in the present disaster but to provide against the recurrence of these floods, and finally to solve the problem of flood control particularly through the Mississippi River Basin.

Independently of this portion of this resolution, Mr. Spofford made this statement:

It is the Government's business to see that it is done. The Government has no authority, that I know of, to force the States to do anything on that line; and, therefore, if the States refuse, I should say the Government would have, under that resolution, to carry it out at Government expense.

* * * * * * *

Everybody has a local idea, but in the Legion, with people who have seen service for their country, there is something that goes beyond a local position, and a man gets a national view of it as well.

Southern States Republican League, represented by John Stephen Sewell:

Whereas these floods have been greatly accelerated and increased in recent years by the reclamation of tremendous areas of swamp lands in the north which formerly acted as natural reservoirs, and by the tilling and draining of millions of acres of farm lands which were a natural sponge to hold back flood waters, * * * the Federal Government should hereafter pay the entire cost of constructing and maintaining works necessary to control floods of the lower Mississippi Valley.

Representatives of the Investment Bankers' Association and others testified to the impossibility of further local contributions, failure to pay interest on bonds, the inability to pay, and the general state of demoralization which exists and which will continue to exist until the National Government performs its full duty. There is general agreement that there can be no further local contribution. The levee districts which have made these contributions in the past have been bled white.

During the absence of the President, he selected as his personal representative and to act for him in the flooded district Mr. Herbert Hoover, Secretary of Commerce.

Mr. Hoover spent considerable time in the district during the flood, visited many portions of the river, and made a great many speeches, some at banquets, some at meeting places, some over the radio, and accompanied by newspaper interviews.

There can be no doubt from these statements that at that time the Secretary believed this to be a national problem, to be executed without delay, to be paid for by the United States Government without contribution from the local States.

At Memphis, on April 30, over the radio:

A week ago when it broke the levee at Stops Landing only a quarter of the river went through the hole, yet in a week it poured water up to 20 feet deep over several counties, an area up to 150 miles wide, and flooding 150,000 people. The crest of this great collection of water from 30 States moved slowly down the river 30 or 40 miles an hour.

Same speech:

To-day some 3,000 are homeless in each of Illinois, Kentucky, and Tennessee, 20,000 or 30,000 in the State of Missouri, 120,000 are flooded in Arkansas, and 150,000 in Mississippi.

Same speech:

No man can charge the fate of these unfortunate people to any failure upon their part.

At St. Louis, May 8, Raymond P. Brandt said:

The next step may be the request for appropriations. I shall do whatever I can to help in this work. I will gladly go before the House and Senate committees to give my views on the necessity of appropriations for the surveys or the actual work. If necessary, I will make speeches to arouse public sentiment. As a matter of fact, public sentiment is already aroused on this question of flood control, and I do not expect there will be any trouble over appropriations this session.

I quote from an interview with the brilliant reporter of the New York Times, Mr. Speers, on May 22:

Given the money necessary, there is a solution for every engineering problem, and no matter what the cost of flood control, it will not be nearly so much as the loss suffered as the result of this flood, which has devastated so many hundreds of thousands of acres of the most fertile land on earth and rendered hundreds of thousands of good citizens homeless and destitute.

The Mississippi has been here a long time, it has a flood every spring and sometimes a superflood like this one.

* * * * * * *

We must give these people security and not permit them to live in peril. And it can be done for a whole lot less than we have lost in this flood. I expect to see brought forward a perfectly competent, workable plan of Mississippi flood control. It is a magnificent problem and it can and will be, I am convinced, solved in a magnificent and thoroughly American way.

In a speech in Louisiana, May 23, Mr. Hoover said:

And I wish to say in conclusion that I have now spent five weeks in your midst. I have had an opportunity to witness the fine spirit and cooperation of the communities, the able leadership and courage of the citizens of your State, and all of your sister States who have participated in this calamity. I have seen the gratitude of your people for the effort made by the Nation under the leadership of the President of the United States. I have acted as his representative and, in doing so, I have been but giving evidence of the President's desire and the desire of the people of America to do not only their duty but to cooperate in generous spirit to remedy a calamity that was no fault of your people.

In Chicago on June 4, the Chronicle reports him as saying:

God has blessed our country greatly in resources and wealth. We number our possessions in hundreds of billions. These people are our own citizens. Their fate is not due to any fault or failure on their part. They are carrying burdens which outweigh our assistance manyfold. We of the North have the right and the duty to bind their wounds because they are of our own country.

I quote from a speech at Monroe, La., June 8:

There is one bright ray which comes out of the gloomy situation confronting the Mississippi Valley. It is the realization that the 125,000,000 people in the United States have awakened to the fact that this valley must be protected from future catastrophe. When Congress convenes to take up the flood problem, I am certain that the question will be settled for all time and that the future prosperity and growth of the valley will be guaranteed. All that you need down here to make your success complete is a sense of security. I am willing to guarantee you right here and now that the sense of security will be forthcoming within the next 8 or 10 months.

Statement by Herbert Hoover, Washington Star, June 12:

What it all means in human terms is simple enough, 750,000 people flooded, 600,000 driven from their homes or made dependent upon relief.

No one can at present calculate accurately the economic loss. It will probably run from $200,000,000 to $400,000,000. That 1,500,000 of our countrymen should continue to live in such jeopardy is unthinkable, nor can the Nation afford to abandon to disease-producing mosquito swamps 20,000,000 acres of its richest lands, an area nearly as large as the State of Indiana. This flood has been the greatest disaster of peace times in our history, but what will it be if we have 10,000,000 of our people living in such jeopardy instead of 1,500,000?

* * * * * * *

All the engineering plans for flood control of the river must, of course, be revised in the light of their experience, and they must be revised as against any combination of floods from the tributaries.

* * * * * * *

The main thing is a plan bold and strong enough to deal with the question in finality, for we have to live with this river for thousands of years yet.

* * * * * * *

I am convinced that our engineers can develop plans which will control the floods. I believe we can give security to the people living below the levees that will permit the full development of these plans and their full growth in population.

Washington Star, June 12:

I have no doubt that within the next few months there will be worked out a plan of flood control that will permanently relieve the Mississippi Valley of all fear of future disaster; I am convinced the American people are going to see that this plan is to be put into effect at once.

New Orleans, June 18, Washington Star:

In human terms, this Mississippi River flood of 1927 means 750,000 people flooded, 600,000 driven from their homes or made dependent upon relief. The economic loss will probably run from $200,000,000 to $400,000,000. That 1,500,000 of our countrymen should continue to live in such jeopardy is unthinkable.

New Orleans, June 29:

"Assumption by the Nation of its responsibility for prevention of future floods," said Secretary Hoover in discussing the present flood situation, "is one benefit that will result from the present disaster. With this flood menace removed," he added, "the economic development of the flood plain of the Mississippi will be such that the present population of 1,800,000 will be increased to from 5,000,000 to 10,000,000 in the next quarter of a century."

Speech at Little Rock June 25:

This great catastrophe by which a million and a half people in this valley have been brought in jeopardy, by which hundreds of thousands have been driven from their home, is not all a loss. It has served to educate the whole people of the United States to a great problem of elemental importance to the progress of our country and the prosperity of our State. That is the necessity for complete and whole control of the Mississippi River. I believe the sentiment of the Nation to-day is unanimous in that it should be taken in hand in such fashion as to give a complete assurance that, in the words of President Coolidge, "It will not happen again." And it is a national problem. Not only does the lower Mississippi River serve as a trough to carry off the flood waters of 32 States, but in the great flood plain of the Mississippi

we possess one of the Nation's greatest assets of 20,000,000 acres of its richest lands.

* * * * * * *

Nor can we as a Nation tolerate periodic destruction and shock which come from a repetition of catastrophes such as this. Every great loss of this kind reechoes throughout the whole Nation. No matter how small it be, every citizen is deducted something from his wage or income toward such loss as this.

* * * * * * *

Nor can the cost of flood control fall upon the people who are now prostrated by inadequate measures of the past and who bear the burdens of losses which will require years for recovery.

* * * * * * *

Adequate flood control therefore becomes a national problem. One of the first obligations upon Congress is to authorize a complete and not a partial solution and to provide funds for its execution.

Executive Office, Rapid City, S. Dak., July 21:

It is not incompatible with national economy to prevent $10 of economic loss by the expenditure of $1 Federal outlay. In the face of their great losses and their present destitution, I do not see how the people along the river can contribute much more than the maintenance of the central works after they have been constructed.

Mr. President, the Jadwin plan as presented to the Senate in the Jones bill does not solve the problem. It was a plan that was repudiated by 95 per cent of the witnesses before the House committee, by practically every witness before the Senate committee.

All through the hearings we were asked to provide a place for the civil engineer, and we find the Chief of Engineers, General Jadwin, asking that the civilian engineer be pushed further back. This is a subject upon which I will not now detain the Senate, but I hope I have said some things which may impress upon the Senate the fact that this subject must be considered as a national problem, that local communities in the States are unable to handle it properly, and that there is unanimity of opinion among the great business organizations, the great labor organizations, the farm organizations, the American Legion, and the great newspapers of the Nation, that this is a national problem, to be paid for wholly and exclusively by the Nation.

Twenty thousand civilian engineers are being graduated from 48 State colleges and other special colleges, such men as served under General Jadwin in the war, 75 of them from my own city of St. Louis having left places of high profit to serve in the war, and on any commission that decides any vital question of flood control adequate representatives of this body of trained civilian engineers should be provided for.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). The question is on agreeing to the amendment proposed by the Senator from Alabama [Mr. HEFLIN] to the amendment of the Senator from Mississippi [Mr. HARRISON], as modified, to sections 2, 3, and 4.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Barkley	Edwards	King	Schall
Bingham	Fess	La Follette	Sheppard
Black	Fletcher	McKellar	Simmons
Bratton	George	McLean	Smith
Brookhart	Gerry	McMaster	Steiwer
Broussard	Gould	McNary	Stephens
Bruce	Hale	Neely	Swanson
Capper	Harris	Norris	Thomas
Caraway	Harrison	Oddie	Tydings
Copeland	Hawes	Overman	Tyson
Curtis	Heflin	Pittman	Walsh, Mont.
Cutting	Howell	Ransdell	Warren
Deneen	Johnson	Reed, Pa.	Waterman
Dill	Jones	Robinson, Ark.	Willis
Edge	Kendrick	Sackett	

The PRESIDING OFFICER. Fifty-nine Senators having answered to their names, a quorum is present.

Mr. NORRIS. Mr. President, several days ago when I addressed the Senate on the subject of Muscle Shoals I had on the wall a chart which I asked unanimous consent to have inserted in the RECORD. That consent was granted, but the printing clerk and others found that it was impossible to have it reduced in size in time to go in the RECORD in connection with my remarks, so it was not included. Since that time I have had the chart revamped, and I now ask unanimous consent to have it inserted in the RECORD at this point as a part of my remarks and to include also with the chart the statistics which I send to the clerk's desk with the chart.

The PRESIDING OFFICER. Without objection, it is so ordered.

The statistics and chart are as follows:

COMPARATIVE COST OF DOMESTIC ELECTRIC SERVICE, UNITED STATES AND ONTARIO 1910–1926

By Judson King

The chart herein is based upon the following figures of the net average price in cents per kilowatt-hour for domestic service in a selected group of 32 American cities and all 21 Ontario cities of 10,000 population and up.

Year	United States, cost kilowatt-hour	Ontario, cost kilowatt-hour
	Cents	*Cents*
1910	9.2	[1] 9.3
1911	9.0	
1912	8.9	6.00
1913	8.7	5.06
1914	8.5	4.86
1915	8.0	3.83
1916	8.05	3.08
1917	8.1	2.89
1918	7.9	2.72
1919	7.8	2.55
1920	8.0	2.29
1921	7.9	2.20
1922	7.8	1.98
1923	7.7	1.83
1924	7.6	1.73
1925	7.5	1.76
1926	7.4	1.61

[1] Cost under companies prior to hydro. The Ontario hydro system began operation Oct. 11, 1910, with 5 cities and 9 towns to serve. By 1918 there were 21 cities and also 108 towns and villages connected.

Sources: United States: Electrical World estimates quoted at page 162 and charted at page 164 of a memorandum filed by the joint committee of National Utility Associations, Hon. George B. Cortelyou, chairman, with the Interstate Commerce Committee, United States Senate, January 19, 1928, in opposition to the Walsh resolution for a power investigation.

Ontario: 1914–1926, official bulletin hydroelectric power commission, January, 1927, page 8; November, 1927, page 411. Ante 1914, estimated from data in nineteenth annual report of commission, 1926, pages 340–349.

Cities used for comparison

UNITED STATES

	Population
Atlanta	250,000
Baltimore	819,000
Birmingham	217,000
Boston	793,000
Buffalo	550,000
Chicago	3,102,000
Cincinnati	412,000
Cleveland	984,000
Denver	289,000
Detroit	1,334,000
Houston	256,000
Indianapolis	374,000
Jacksonville	137,000
Kansas City	383,000
Los Angeles	1,300,000
Memphis	179,000
Minneapolis	447,000
Mobile	66,000
New Orleans	424,000
New York	5,970,000
Norfolk	179,000
Philadelphia	2,035,000
Pittsburgh	665,000
Portland, Me	76,000
Portland, Oreg	340,000
Richmond	191,000
St. Louis	839,000
San Francisco	576,000
Savannah	96,000
Scranton, Pa	143,000
Seattle	411,000
Washington	540,000
Total	25,377,000

ONTARIO

Brantford	28,010
Chatham	14,118
Galt	12,686
Guelph	19,219
Hamilton	122,238
Kingston	21,621
Kitchener	24,805
London	63,339
Niagara Falls	16,819
Ottawa	118,088

	Population
Owen Sound	12,231
Peterborough	21,726
Port Arthur	17,021
St. Catharines	21,810
St. Thomas	17,152
Sarnia	15,588
Stratford	18,888
Toronto	542,187
Welland	8,942
Windsor	52,638
Woodstock	10,114
Total	1,179,240

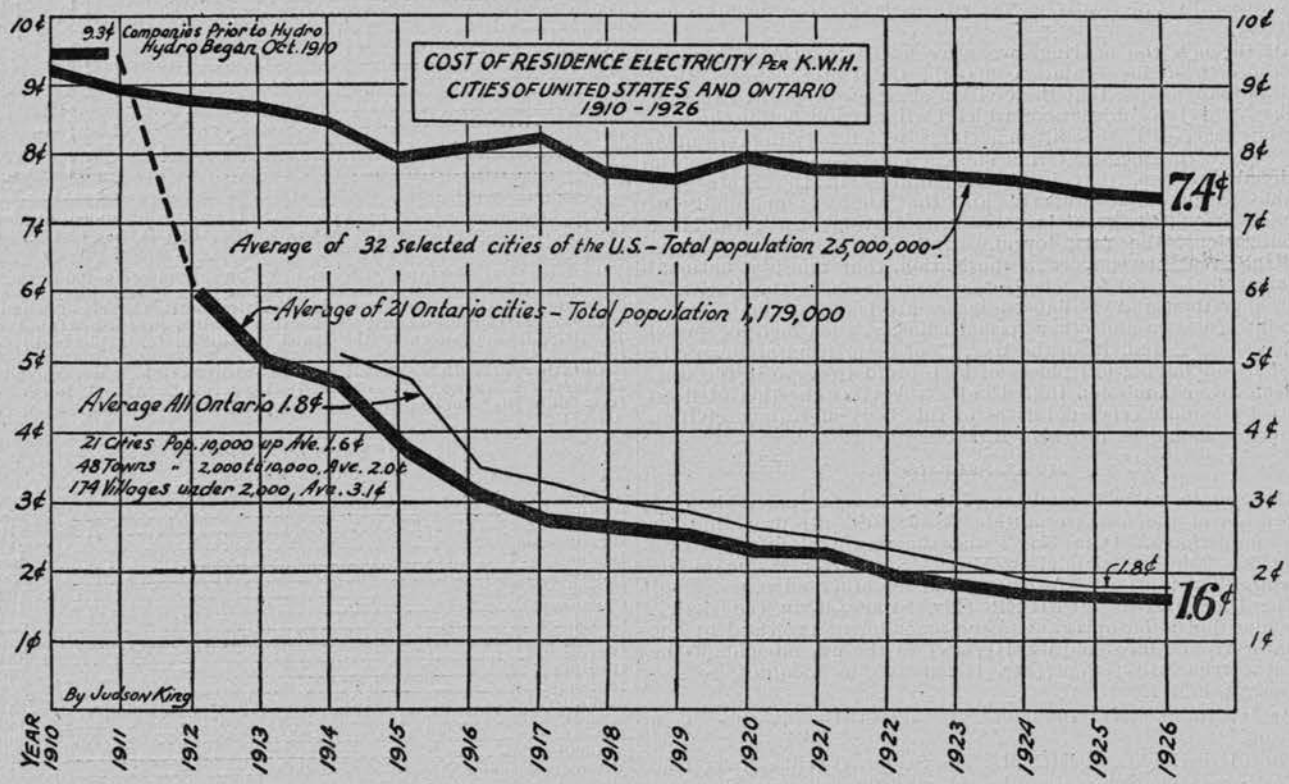
Domestic service, above cities only, 1926

	Average monthly bill	Average monthly use, kilowatt-hours
United States	$2.22	30
Ontario	1.79	98

Industrial power, total, 1926

	Kilowatt-hours sold	Revenue	Kilowatt-hours
			Cents
Entire United States	35,154,000,000	$461,000,000	1.31137
Entire Ontario	546,452,626	6,720,796	1.22990

Hence, at Ontario power rates the American power bill would have been less by $28,819,000.



Domestic, commercial, and street light, 1926

	Kilowatt-hours sold	Revenue	Kilowatt-hours
			Cents
Entire United States	15,000,000,000	$1,018,200,000	6.788
Entire Ontario	638,486,973	12,987,676	2.034

At Ontario light rates the total American light bill would have been less by $713,000,000.

Sources: Electrical World, January 7, 1928, tables, page 18. List of cities, United States Labor Review, August, 1927, page 203. For Ontario data: Bulletins and Reports, page 1.

Why This Difference?

Average Price in These American Cities to Domestic Consumers in 1926	**7.4c K.W.H.**
Average Price "Service at Cost" in Ontario Cities in 1926	**1.6 c**
Since Hydro does not pay taxes in proportion to U. S. add 10%	.16
Since Hydro does not pay dividends, add a fair profit of 10%	.16
Since Hydro generates by water power and 23 of the above U. S. Cities generate chiefly by coal, add per K.W.H.	.48
Adding these American extras would raise the Ontario price to	2.4c K.W.H.
Leaving Unexplained Why American Consumers are Forced to Pay an Added	**5c K.W.H.**

Mr. HEFLIN. Mr. President, I ask unanimous consent to have printed in the RECORD a letter addressed to me by Mr. Thomas W. Martin, president of the Alabama Power Co. The Alabama Power Co. have been criticized by both Senators from Nebraska and some other references have been made to their rates and practices. I told Mr. Martin I thought it was but fair that he should have an opportunity to give an account of the conduct of his company and of the rates they charge, and that I would be glad to ask to have his statement printed in the RECORD. I ask unanimous consent that it may be printed in the RECORD at this point.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The letter is as follows:

ALABAMA POWER CO.,
Birmingham, Ala., February 25, 1928.

Hon. J. THOMAS HEFLIN,
United States Senate, Washington, D. C.

DEAR SENATOR HEFLIN: A number of tables and schedules prepared by Mr. Kenneth G. Harlan, public-utility expert for the city of Tacoma (Wash.) municipally owned plant, were inserted in the CONGRESSIONAL RECORD February 15, 1928 (pp. 3038–3044). Rates are quoted for the Tacoma plant and compared with rates in the privately owned plants of the Alabama Power Co., operating in a large portion of Alabama.

We desire to submit for your information and that of the Senate a statement showing the average rate on the system of the Alabama Power Co. which has been prepared on the same basis of average kilowatt-hour sales as was employed by Mr. Harlan, the expert of the publicly owned plant in Tacoma, for purposes of comparison with rates in Alabama; and also relating to other statements in the Senate respecting this company.

Mr. Harlan says:

"The foregoing computations are based upon the combined amount of energy served annually to all classifications of business divided into the total revenue received, which gives the average rate of kilowatt-hour, and which in the last analysis reveals the true status of the rate structure, irrespective of what may result in the comparison of rates at certain points or in certain schedules or classifications of service" (p. 3039).

Mr. Harlan shows that the average rate in Tacoma per kilowatt-hour is 1.0427 cents. He makes no attempt to show the average rate on the system of the Alabama Power Co. Since the Alabama Power Co. in 1927 sold to and interchanged with utilities outside the State 422,747,000 kilowatt-hours of energy because of a supply of power from Muscle Shoals, this amount has been deducted for purposes of comparison. The comparative results follow:

Producer	Total kilowatt-hour sales	Revenues	Average rate
			Cents
Tacoma	168,648,489	$1,758,558.30	1.0400
Alabama Power Co	1,050,107,427	13,079,600.02	1.2457

Thus the average rate per kilowatt-hour on the system of the Alabama Power Co., serving almost a whole State, with many scattered communities, both large and small, only slightly exceeds that of the Tacoma plant, serving a single large city. If State, county, and municipal taxes and license fees were deducted, the average rate for the Alabama Power Co. system would be less than shown above. The average revenue per unit of output for the entire industry in the United States in 1926 was 2.3 cents per kilowatt-hour.

In this connection it is interesting to compare the average rate in Alabama with that of a number of outstanding municipally owned plants, both excluding and including that of Tacoma. The comparative results follow:

Name of producer	Total kilowatt-hour sales	Revenue	Per kilowatt-hour sold
			Cents
1. Seattle	178,819,600	$3,859,042	2.17
2. Cleveland	134,115,639	3,110,302	2.32
3. Los Angeles	488,538,323	11,190,323	2.30
4. Jamestown, N. Y.	16,532,364	482,849	2.92
5. Springfield, Ill.	18,016,267	479,613	2.66
6. Jacksonville, Fla.	54,621,675	2,169,957	4.00
Total of above	890,643,868	21,292,086	2.39
7. Tacoma	168,648,331	1,758,558.30	1.04
Total, including Tacoma	1,059,292,199	23,050,644.30	2.18
8. Alabama Power Co	1,050,107,427	13,079,600.02	1.24

1. Calendar year 1926; official report city lighting department.
2. Calendar year 1926; official report bureau of municipal light plant.
3. Year ending June 30, 1926; official report bureau of light and power.
4. Calendar year 1926; Public Service Commission of New York.
5. Year ending Feb. 28, 1927; eleventh annual report city water, light, and power department.
6. Calendar year 1926.
7. Year ending Sept. 30, 1927, including power sold to municipalities. (CONGRESSIONAL RECORD, Feb. 15, 1928, p. 3039.)
8. Calendar year 1927.

You will note:

(a) That the average of the first six municipal plants mentioned is 2.39 cents per kilowatt-hour, as compared with 1.2457 cents in the Alabama Power Co. system.

(b) That if Tacoma be included the average rate is 2.18 cents for the seven municipal plants, as compared with 1.2457 cents in the Alabama Power Co. system.

(c) You will also note that while the total kilowatt-hours sold in the seven municipal plants combined is about the same as the Alabama Power Co., the total receipts exceed that of the Alabama Power Co. by nearly $10,000,000.

Mr. Harlan correctly states that the average kilowatt-hour basis "reveals the true status of the rate structure, irrespective of what may result in the comparison of rates at certain points or in certain schedules or classifications of service." Different physical and climatic conditions, the character and source of power supply, the extent of the territory served, and the nature of the business of the consumer make necessary a number of classifications of service and different schedules of rates to fit the varying conditions which prevail in different States.

Questions arise from time to time in the adjustment and application of these schedules and classifications which are determined by the State commissions. Moreover, many factors are involved in the cost of service which make any direct comparison of rates as set up by Mr. Harlan, at page 3038 of the RECORD, February 15, 1928, of little value. In the case of Tacoma, the ordinance upon which the rate is based specifically provides for the separate and individual negotiation and approval by the city council of all contracts for blocks of power greater than 1,000 kilowatts (Report and Information Book, light department, Tacoma, 1925, p. 79). Mr. Harlan draws the same conclusion when he says that "such comparisons, while they may be properly computed, are void of any material importance, nor can they be seriously considered when true comparison of rates are sought" (p. 3039).

The Alabama Power Co. has in recent years acquired 23 municipally owned lighting plants that are now connected with its distribution system. In each case the sale of the plant was first approved by the governing board of the city and then submitted to a vote of the people, as is required by the laws of Alabama. In many instances the vote was practically unanimous. A study of the municipal rates in effect at the time of sale in these communities will show rates ranging from 10 cents to 25 cents per kilowatt-hour, and in most cases they were flat rates with but little reduction for increased use. However, while these communities were interested in obtaining a reduction in the lighting rates, they were specially interested in obtaining power which would attract industries into their communities.

Domestic rates in effect in all towns connected with the system of the Alabama Power Co. range from 9 cents per kilowatt-hour (with the exception of a few communities where it is 10 cents) for the first block of energy used for lighting purposes alone down to 5 cents per kilowatt-hour. Where energy is also used for other household purposes, such as cooking, water heating, ironing, washing, refrigeration, etc., the rate, dependent upon amount of consumption, goes down to 2½ cents per kilowatt-hour. The result has been to increase greatly the number of customers as well as the per capita use of energy.

The following table shows typical rate results before and after the acquisition of municipally operated plants in Alabama:

Net lighting rates

Town	Before purchase	Present [1]	Per cent reduction
	Cents	*Cents*	
Albertville	12½	9	28
Boaz	12½	9	28
Camp Hill	13	9	30
Carbon Hill	11¼	9	20
Dadeville	12	9	25
Haleyville	20	9	55
Livingston	25	9	64
Ozark	15	10	33
Russellville	20	9	55
Union Springs	12½	9	28
Uniontown	18	9	50
Wetumpka	13½	9	33
York	18	9	50

[1] This reduces to 3½ and 2½ cents per kilowatt-hour less 10 per cent discount where energy for cooking and heating is combined with lighting.

The city of Birmingham for many years owned municipal lighting and water plants serving part of the territory embraced within the corporate limits of Birmingham. An election was held on November 15, 1927, after extensive advertising, on the question of selling these plants

for private operation, and was approved by a vote of the people. The sale was completed January 4, 1928.

Nine reasons why the city commission favored the sale of the plants were given by Hon. J. M. Jones, president of the commission, as follows:

"1. Because the people of North Birmingham have petitioned the city commission to sell them.

"2. Because the patrons of these plants are not receiving as good service as other people of Birmingham.

"3. Because the people of North Birmingham are paying a higher rate for electricity than the rest of the people.

"4. Because the city is simply selling two distribution systems.

"5. Because the city is now buying current and water at wholesale from the utilities and retailing it.

"6. Because since 1910 the city has operated these plants at an annual loss of over $11,000.

"7. Because the price offered for these plants is the appraised value fixed by Morris Knowles (Inc.), a nationally known and impartial appraiser.

"8. Because the price offered for these plants is fair and reasonable, being the full appraised value as fixed by Morris Knowles (Inc.).

"9. Because the city commission pledges itself to spend the proceeds of these sales only in other paramount public improvements."

President Jones further said:

"It is the unanimous opinion of the city commission that these plants should be disposed of for the best interests of the entire city. It is an excellent opportunity to turn a liability into an asset. If the plants are not sold the city must continue to operate them and take the loss that results. The responsibility is with the people. The commission is anxious for the people to have the full facts."

The case of Alabama Pipe Co. et al. *v.* Alabama Power Co., heard by the Alabama Public Service Commission and decided September 30, 1927, involved an adjustment of certain rates of the company. In the course of the opinion the commission said:

"'Every utility is entitled to just and reasonable rates as will enable it at all times to fully perform its duties to the public and will, under honest, efficient, and economical management, earn a fair net return on the reasonable value of its property devoted to the public service. This is our law. However, this does not mean that rates for all classifications of service should be the same.'—Alabama Power Co., supra.

"Representative of complainants made reference to the contract between the Alabama Power Co. and the United States Government for the purchase of a portion of defendant's power requirements from the Wilson Dam plant, the price paid therefor, and the distance of the location of a number of complainant's plants from the Muscle Shoals power supply. No evidence was introduced, however, to sustain a contention that customers located nearer the Muscle Shoals source of supply should have preferential rates on account of the proximity of their plants to the source of supply.

"Complainants have not undertaken in this case to show by evidence that we are justified in so regulating defendant's rates for power generated at Muscle Shoals by the United States, as to require defendant to distribute and sell such power at lower rates to those near by than to those farther distant within the State of Alabama. We are not prepared to say that the water-power resources at Muscle Shoals should be distributed upon a basis founded upon a theory that such resources exist primarily for those near by and that near-by customers should have a preference in rates over all other customers located in other parts of the State. Certainly no evidence has been offered in this case to justify any such conclusion.

"The defendant's rate structure, in so far as rates for power are concerned, is based on uniformity to all communities served, and it has observed this basis since its hydroelectric system was first constructed and put into operation over 15 years ago.

"The system of defendant utility, beginning with a single generating plant some 15 years ago, has rapidly extended until its transmission system now covers the greater portion of the State, with many large sources of power supply. In addition to the Muscle Shoals source of supply, there are at present two large hydroelectric plants on the Coosa River, three hydroelectric plants on the Tallapoosa River, and three large steam reserve plants, in addition to defendant's interchange connection with other power companies.

"These large steam reserve plants are located in or close by the coal deposits of the State. Complainants, through their representatives, have raised the question whether the power latent in the Coosa River, the Tallapoosa River, and other streams of the State capable of generating hydropower sufficient to justify their development for this purpose, and that which is latent in the coal deposits within the coal fields of Alabama, should be distributed throughout the State under a rate structure which would require the more distant cities, towns, and communities to pay a higher rate than those adjacent to the generating sources of such power because of such difference in distance. The thinking mind will see at once this raises a big question. To zone this State for rate-making purposes in the distribution of such power would require an entire change in that plan of defendant's rate structure, which, as we have pointed out, has been followed since the defendant began such utility operations. Complainants have not furnished evidence to show that such change is justified, or if justified, what plan of rates would be just and reasonable on such new and different basis. Such a change would involve material interests of all the customers of the utility throughout the entire State and of every city, town, and hamlet of the State. Even if these particular complainants had brought before us in this case substantial evidence in support of this zoning theory for rate-making purposes, which has not been done, we would have to shut our eyes to most important and material interests of all those customers of defendant located in cities and communities other than those represented by the present complainants, if without notice to them and the right to be heard, we should undertake to require defendant in this proceeding to apply such zoning theory of rate making.

"Within the last few years the defendant, at the instance of the agricultural interests, has extended its transmission lines into rural communities to make the State's power resources available to the farmer, to aid him, if possible, in the solution of his difficult problems and in order to make home life upon the farm more attractive. The transmission of power from the sources named to the smaller towns and villages of the State makes every such town and village a potential location for manufacturing industries. Economists who have given long and careful thought to the future development of Alabama are practically unanimous in the view that our State as a whole is best adapted to development as a manufacturing and industrial community rather than an agriculture section. It is a matter of common knowledge that agriculture in Alabama is finding it increasingly difficult to compete in the production of cotton with States more favorably adapted, such as Texas and Oklahoma."

The rate schedules of this company have been developed with the view of serving the general purposes indicated in the foregoing opinion of the commission. By far the greater portion of the energy sold in Alabama is used in industry, resulting, as it does, in the decentralization of industry throughout the State, creating pay rolls and other advantages to the communities because of large available quantities of power.

In the recent Commercial Survey of the Southeast, 1927, published by the Department of Commerce, at page 113, it is shown that in the 12-year period from 1914 through 1925 manufacturing in the Southeast increased in greater proportion than for the United States as a whole, the percentage of increase in the value of manufactured products in the Southeast being 203 per cent, compared with 159 per cent for the country as a whole. The most recent two-year period shows extraordinary development, the combined value of manufactured products in the States of North and South Carolina, Georgia, Florida, Alabama, and Tennessee having been $305,138,380 more in 1925 than it was in 1923.

Reports from the Geological Survey show the output of power in the six States of North Carolina, South Carolina, Florida, Tennessee, Alabama, and Georgia increased from 3,828,281,000 kilowatt-hours in 1923 to 6,911,421,000 kilowatt-hours in 1927, an increase of 78.6 per cent compared with 46.8 per cent increase in the same period for the Nation as a whole.

The public utilities of the United States in 1927 showed an increase of power output of more than 8 per cent over 1926, while in the South the increase was more than 16 per cent over 1926, or twice the percentage of increase in the Nation as a whole. This tremendous gain in power consumption not only explains the rapid growth of public utilities in the South, but also indicates the continued expansion of southern industries. It offers a yardstick for the measure of industrial development and in this respect reflects the greater activity experienced by southern industry in 1927 as compared with former years. New plants and plant enlargements have required additional power, and by the building of steam and hydroelectric generating stations public utility power companies are endeavoring to supply the growing power needs of the South. (Manufacturers Record, January 19, 1928.)

Continued growth in the South is closely related to the ability of the public utilities to supply increasing power needs for industrial and other purposes.

It has been stated that the Alabama Power Co. is buying Muscle Shoals power at a very low rate under the temporary arrangement, in effect for two years, pending disposition of Muscle Shoals by the Congress. The rates under this contract are from 2 to 4 mills per kilowatt-hour for power for use in Alabama and in power systems in other States with which the lines of Alabama Power Co. are interconnected. The agreement with the Secretary of War is to purchase power of the Government in lieu of operating steam plants on the system of the Alabama Power Co. when the demand on its system or that of interconnected companies operating in other States requires a supply of power in excess of the water-power resources on their own system. Therefore, operation of the Government plant has not been continuous.

Under these circumstances the price paid is graduated on a scale commensurate only with the increment cost for generating an equal amount of power from the several steam plants on the system of the Alabama Power Co. Furthermore, the arrangement is revocable on 30 days' notice, which means that the company must be prepared with plants sufficient to replace the Muscle Shoals power. This necessarily

affects the price that can be paid for temporary use, because the company could not make firm contracts to furnish consumers with Muscle Shoals power and depend on a contract with the Government revocable on 30 days' notice. Such temporary arrangement deprives the Government of increased revenue which would come from maximum output secured through full use of power-plant facilities, especially the opportunity to utilize much of the secondary power going to waste because of inability to coordinate the plants with interconnected reserve plants in the coal regions and in other watersheds. Even under the present arrangement the Government has collected $2,390,038 for 1926 and 1927.

The difference in price paid to the United States, from 2 to 4 mills, and the average received by the Alabama Power Co. in 1927 for all power sold does not represent profit. To this must be added fixed charges, operating expenses and other overhead, interest on investments in reserve steam plants, in transmission lines, substations and local distribution systems, and various forms of taxes, plus losses in transmission from point of generation to points of consumption throughout the State and into other States.

I am, very respectfully,

THOS. W. MARTIN, *President.*

Mr. HOWELL. Mr. President, at an expense of about $50,000,000 the United States Government has developed a great machine at Muscle Shoals whose finished product is electrical energy in a form for distribution. It was originally proposed that this great plant should be devoted to the manufacture of fertilizer. My distinguished colleague, the senior Senator from Nebraska [Mr. NORRIS], has clearly shown that the electrical method of producing fixed nitrogen is no longer commercially important; that a synthetic method has been developed which enables the production of fixed nitrogen at a much lower cost.

The question arises, Shall we carry out our original idea; use Muscle Shoals in an inefficient manner for the production of fixed nitrogen, or shall we sell our finished product, electric energy, and utilize the funds derived therefrom to promote synthetic production? There can be no question as to what ought to be done. The Government should not proceed in this matter in any other way than would private business. Assuming that such will be the conclusion of the Senate, then the question arises, How shall we dispose of the electrical energy? Shall we turn it over to private interests for distribution, or shall we, the Government, continue to develop electrical energy, transmit it to points of use—that is, to municipalities—and sell it at wholesale for local distribution?

Mr. President, if the pending resolution is adopted by the Senate and ultimately becomes a law, the possible benefits to the municipalities within practical transmission distances of the Muscle Shoals hydroelectric plant will be far-reaching, indeed. These benefits will be such as result from the advantages of public ownership, advantages to the public, and for which my colleague has been contending for years in connection with this great hydroelectric development.

What are the advantages of public ownership?

It is the practice of public service commissions throughout the country to adjust the charges for service which a public utility may collect from its patrons so as to amply provide for all expenses of operation, maintenance, a reserve for depreciation, a fixed rate of return upon the value of the plant, and, finally, a surplus, as otherwise there might be a deficit.

The rate of return allowed a utility varies from 7 to 8 per cent in the different States. Assuming the average to be 7½ per cent, the rate in the District of Columbia, then 7½ per cent is what the public is called upon to pay upon capital invested in privately owned utilities. However, if the utility is publicly owned, the rate of return is the interest charge upon outstanding bonds representing the indebtedness of the plant, or in the neighborhood of 4¼ per cent. The difference between these two rates, 7½ per cent and 4¼ per cent, is 3¼ per cent, which represents the saving in favor of public ownership.

As to what this saving means, consider a $10,000,000 plant. Three and one-fourth per cent of $10,000,000 is $325,000. This sum invested annually at 4 per cent compound interest will equal $10,000,000 within 21 years.

This is the first of the financial advantages I shall enumerate resulting from public ownership; in fact, is the chief advantage of this character, and, of course, inures to the public—that is, the consumers.

The second advantage of public ownership is in connection with reserves for depreciation. The annual amount allowed to be deducted from income and placed in this reserve is a matter of estimation, and, as a rule, if there is error, it is on the side of liberality. As a consequence, such reserves from this cause alone tend to accumulate. But there is another and major cause of the undue growth of reserves for depreciation. The purpose of this reserve is to take care of replacements. However, the line of demarcation between maintenance and replacements is so shadowy and vague that a utility management, both consciously and unconsciously, tends to maintain the value of a plant in the neighborhood of 100 per cent at the expense of maintenance, thus sparing the reserve for depreciation. This is not a difficult thing to do in connection with a plant whose component parts consist of diverse units dispersed over a considerable area, as in the case of an electric plant. In fact, it rather does itself, and especially so if the annual surplus is making strides ahead, as such a tendency, if persistent, ultimately results in an order by the regulating authority for a reduction in rates. The depreciation reserve of the Potomac Electric Power Co. serving Washington, D. C., was, at the close of 1926, $5,372,000, or 17½ per cent of its value for rate-making purposes, not including this reserve.

If a utility is privately owned such a reserve for depreciation, in one way or another, ultimately appears, in whole or part, in the capitalization of the plant, and thus indirectly reaches the pockets of the stockholders. If a utility is publicly owned, however, such excess accumulations are used for the extinguishment of the debt of the plant or for new capital expenditures. this inuring to the benefit of the public; that is, the consumers.

The third advantage of public ownership is derived from the ultimate disposal of the annual surplus. If the utility is privately owned, such surpluses ultimately reach the pockets of its stockholders. If the utility is publicly owned, annual surpluses are applied to the extinguishment of the debt of the plant, or are used for new capital expenditures, thus also inuring to the benefit of the public; that is, the consumers.

Again using the Washington, D. C., electric plant as an example: The surplus for 1926 was about $800,000 or 26 per cent of the plant's value, not including depreciation reserve. This sum invested annually at 4 per cent interest would equal the value referred to—$30,728,000—in less than 24 years.

The results of these three advantages in practice are illustrated in the case of the water plant of Omaha, my home city. This utility was acquired by the municipality in 1912 at a cost of $6,400,000. During the 15½ years ending December 31, 1927, the plant has been operated by a public corporation identical in form and organization with a private corporation. As a result, the methods of private operation and corporate accounting have been strictly followed, and rates reduced whenever persistent surpluses have justified such a course. The plant was paid for out of the proceeds of a 4¼ per cent bond issue; hence the first advantage of public ownership has consisted of an annual saving of 3¼ per cent upon the average investment, approximating $266,000 per annum.

During the 15½ years there was placed in the reserve for depreciation—mark you—$1,878,000, of which but $96,000 has been expended. In short, on the 1st day of January of this year there was in the reserve for depreciation $1,878,000, less $96,000. Thus the average net increment added to this fund has been about $115,000 per annum, and represents the second advantage of public ownership. This undoubtedly would have gone into the pockets of private stockholders had the plant been privately owned.

The annual surplus, which is responsible for the third advantage of public ownership, has averaged during 15½ years $109,000, which also, under private ownership, would have accrued to stockholders.

The total of these three advantages in this case is $490,000 per annum, which, if invested at 4 per cent compounded annually, would equal the cost of the plant, $6,400,000, in between 10 and 11 years. I have assumed 4 per cent compound interest only, but, as a matter of fact, we should have assumed 7½ per cent. Therefore there is an ample margin of safety in my conclusions.

Mr. BROOKHART. Mr. President, will the Senator from Nebraska yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. HOWELL. I yield.

Mr. BROOKHART. I will ask the Senator from Nebraska if he expects to consider the element of capitalizing unearned increment under private operation?

Mr. HOWELL. Mr. President, I have confined myself to these three very apparent advantages. There are others which I shall not discuss for lack of time.

Mr. BROOKHART. The unearned increment would be in many cases a very considerable item. Take the Keokuk Dam, for instance, at the time it was built. It could now be recapitalized on a basis of cost of reproduction, which means adding unearned increment, very much higher than would have been justified in the beginning, although, I think, in the beginning its constructors capitalized unearned increment.

Mr. HOWELL. I have merely considered, in determining the average capital invested, the amount of money actually ex-

pended upon the water plant, which is about $11,500,000, including purchase price and improvements. A recent tentative valuation of the plant, on the basis of reproduction new, less depreciation, reached about $16,000,000. In short, this would be the rate base upon which the people of Omaha would now be paying 7½ per cent return were the water plant privately owned.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Nebraska yield to me?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Arkansas?

Mr. HOWELL. Certainly.

Mr. ROBINSON of Arkansas. What is the capitalization of the corporation, who owns the stock, and what is the amount of the stock of the Omaha corporation?

Mr. HOWELL. There is no stock outstanding; it is simply a public corporation, identical in form and organization with that of a private corporation, which is owned by the people of the city of Omaha.

Mr. ROBINSON of Arkansas. No stock has been issued?

Mr. HOWELL. No stock has been issued. It is similar to a school district, except that it manages utilities instead of schools; it is another corporate district superimposed upon the city of Omaha.

Mr. ROBINSON of Arkansas. Does the city operate the plant?

Mr. HOWELL. A board of directors that is elected by the stockholders, who are all of the people instead of a part of the people, operate the plant and have full control of its assets, fix the rates—in fact, determine everything with reference thereto, just as in the case of a private holding and operating corporation.

Mr. ROBINSON of Arkansas. When the Senator from Nebraska says the board of directors are elected by the stockholders, he means by the electors of the city of Omaha, I presume, since he has just stated that there are no stockholders in the sense that stock has been issued and is held?

Mr. HOWELL. No stock has been issued; however, the people are the stockholders, in fact.

Mr. ROBINSON of Arkansas. Has the Senator gone into the question of the cost of operation?

Mr. HOWELL. I have done so quite thoroughly.

Mr. ROBINSON of Arkansas. What does it cost to operate the plant?

Mr. HOWELL. I have not the details here, but the total cost of operation is somewhere in the neighborhood of $700,000, as I remember.

Mr. ROBINSON of Arkansas. Annually?

Mr. HOWELL. Annually.

Mr. ROBINSON of Arkansas. Does the Senator expect to include in his remarks a discussion of the plan or method under which the Omaha corporation is operating? Is he going into that?

Mr. HOWELL. I had not intended to go into the details, but I might add that the law under which the Metropolitan Utilities District, which is the name of the organization as incorporated, provides that there shall be a board of six directors, two of whom shall be elected every two years at the time of the biennial State election, one director so elected to be a Democrat and one a Republican. The law contemplates a nonpartisan board.

Mr. ROBINSON of Arkansas. Does not the Senator mean a bipartisan board?

Mr. HOWELL. A bipartisan board is the nearest to a nonpartisan board that seems humanly possible. The fact that two directors are elected every two years for six years also renders possible a continuity of policy. The directors have full control of the plant, its business, and assets to the same extent as in the case of a private corporation.

Mr. ROBINSON of Arkansas. How many directors are there?

Mr. HOWELL. There are six. If additional capital is needed the board has the right to submit a bond proposition to a vote of the people. I might add that during the fifteen and a half years the water plant has been owned by the public no additional bond issue has been asked for, its reserves having largely afforded all necessary new capital. I might add that the number of consumers to-day is double the number when the plant was taken over in 1912.

Mr. ROBINSON of Arkansas. How does the cost to the consumer compare now with what it was when the corporation was formed?

Mr. HOWELL. The maximum rate has been reduced 52½ per cent. For 12 years bills were issued at the same old rate, the discount of 52½ per cent was calculated and subtracted from the total and indorsed thereon, preceded by this legend in red, "Public ownership reduction, 52½ per cent." This was done so that the people might be reminded each month what public ownership was doing for them. The public, as a rule, scarcely remembers anything longer than seven days.

Mr. ROBINSON of Arkansas. Mr. President, I would not want to admit the accuracy of that statement. I do not care, however, to contradict it for the purpose of the Senator's argument.

Mr. HOWELL. Let me say this, then, that the opponents of public ownership in the face of such a showing will not remember longer than seven days—will even deny the facts after the lapse of a week.

Mr. FLETCHER. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Florida?

Mr. HOWELL. I yield.

Mr. FLETCHER. Of course, the success of an enterprise such as that to which the Senator from Nebraska is referring depends almost entirely on the management. May I ask if the directors meet regularly and actively participate in the control and management of the system, or do they elect a general manager or a president or some other officer, turn it over to him, and meet once a month just to confirm what he does?

Mr. HOWELL. Under the law the board of directors must meet once a week, and under the law they are authorized and directed to appoint a general manager, who holds his office at the will of the board. I might also add that the board of directors does meet weekly, does function, and has functioned for the last 15½ years in a highly efficient manner.

Mr. President, it may be urged that one example does not prove a case. Therefore let us consider the Omaha gas plant which was acquired in 1920 at a cost of $5,000,000.

The first advantage of public ownership heretofore referred to proved to be less in this case than in that of the water plant, as the money borrowed was on the basis of 5 per cent. In other words, there was only a saving in interest of 2½ per cent instead of 3¼ per cent in that case, as the plant was taken over and bonds issued in 1920 at a time when money rates were higher than at present.

Now, mark you, the total of the depreciation reserve for the seven and one-half years which have elapsed since the purchase of the gas plant, up to the 1st day of January, 1928, was $685,000, of which but $28,000 have been expended for replacements. This is an average plant; this is what usually takes place in all private plants.

Mr. ROBINSON of Arkansas. Mr. President, why is so large a depreciation reserve established and maintained?

Mr. HOWELL. There has been a constant effort on the part of public utility corporations to boost the reserves for depreciation allowed by public service commissions. It is to their interest.

Mr. ROBINSON of Arkansas. Is the object to make the cost of service greater?

Mr. HOWELL. No; the effect might be to maintain rates at their level, but the purpose is to increase the profit. Unjustifiable depreciation reserves are partially responsible for the pyramiding of electrical companies and securities in this country.

Mr. ROBINSON of Arkansas. I am speaking now with reference to the Omaha corporation. It appears that it is maintaining a very large depreciation reserve, as is shown by the very small amount of such depreciation reserve which has been used, and I asked why the corporation maintains so large a reserve?

Mr. HOWELL. Mr. President, the reason therefor is this: When we took over the plant in 1920 the gas company, which was owned by the United States Gas Improvement Co. of Philadelphia, insisted that an annual sum equal to 6⅔ cents per thousand feet of gas sold should be covered necessarily into the reserve for depreciation. We accepted this dictum and put it in effect when we took over the plant. In other words, we have been operating the plant just exactly as they would have operated it; and had they still owned and been operating the plant they would have been setting aside this reserve every year, and they would have had the money. Now the people of Omaha have the money. Again, a gas plant is a much more profitable utility than a water plant, and as a consequence its surplus has averaged $220,000 a year.

Mr. President, since 1920 gas plants have been enormously profitable in this country. During the war period they were securing increases in rates because of the rise in the cost of supplies. Following 1920, supplies began to go downhill very rapidly; but the rates did not go down in the same proportion. At the same time gas companies were insisting upon valuations based upon the unearned increment, to which the Senator from Iowa [Mr. BROOKHART] referred just a few moments ago. As

a consequence, while we were piling up these reserves, growing melons for the people of Omaha with our gas plant, in New York City and in Brooklyn they were "cutting melons" for their stockholders—100 per cent stock dividends in each case.

Thus, in the case of Omaha's gas plant, these three advantages of public ownership are measured by $458,000 per annum, which, if invested at 4 per cent compounded annually, would equal $5,000,000, the cost of the plant, within from 9 to 10 years.

There is still another example to quote in connection with Omaha's utilities. Because of the increase in the charges for delivered ice during the war from 50 cents to 70 and 80 cents per 100 pounds, an ice plant was established in 1919, and a second one constructed in 1921. These utilities were far more profitable than even the gas plant, their total cost—$700,000—being amortized by the close of the season of 1926. In short, these ice plants paid for themselves within seven years. Thus, in Omaha these three advantages of public ownership have paid off the cost of the ice plants in less than 7 years; would have paid off the cost of the gas plant in from 9 to 10 years; and the cost of the water plant in from 10 to 11 years.

Therefore, it may be stated with confidence that if the average operating methods and practices of private operation are maintained public ownership will pay for a utility plant within 12 years. This may be assumed as a truism which applies to every public utility in this country privately owned and on a profitable basis.

The policy adopted in Omaha was not to amortize plant indebtedness within the shortest possible time but to use the accumulations of surplus and in the depreciation reserves for the extension and improvement of the plants; further, not to maintain the rate of return on the capital invested at 7½ per cent but to forego accretions from this source and reduce rates. Thus, the maximum water rate was reduced 52½ per cent, resulting in a saving to the people of more than $5,000,000 during the 15½ years. Gas rates which formerly varied from 90 cents to $1.15 per thousand cubic feet have been reduced so that they now vary from 70 cents to 90 cents.

In the case of the ice plants, they regulated the price of delivered ice in Omaha, it promptly dropping back to 50 cents per 100 pounds, while some 52 neighborhood ice stores have been established from which people, for most of the time, have been able to purchase cash-and-carry ice in 5-cent chunks at the rate of 30 cents per hundred pounds—recently reduced to 27½ cents.

Nevertheless, the combined financial statement of these plants for December 31, 1927, show that while they have cost $19,908,000, and have current assets of $4,387,000, or a total of $24,295,000, yet the bonds outstanding and current liabilities totaled but $11,713,000, indicating for the 15½ years of public ownership of the water plant, 8½ years of the ice plants, and 7½ years of the gas plant, the accumulation of an apparent net worth of $12,563,000, or about $60 per inhabitant, nearly $300 per family in Omaha.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. HOWELL. I do.

Mr. BROOKHART. Mention has been made of the question of management. Has there been any trouble in securing efficient managers of these enterprises?

Mr. HOWELL. There has been no difficulty in connection with the conduct of these plants. A responsible board of directors has assured efficient management; and I am confident that under the organization that is in effect, which is applicable elsewhere, which is applicable in our governmental business—that is, of definitely lodging responsibility, centralizing it in a board of directors—you can have public business as well conducted and efficiently dispatched as private business, for such has been the result in connection with Omaha's utilities.

Mr. BROOKHART. Is it not true that the mismanagement of public enterprises usually comes from the control of public enterprises by private enterprises, and their influence and power in reference to the management?

Mr. HOWELL. Mr. President, the great foes of public enterprises of this kind are the privately owned public utility managements, serving the people alongside. They are constantly trying to break down the confidence of the people in the efficiency of their plants. In the case of Omaha they have failed. In fact, it was the efficiency of management and achievements of the water plant that brought about public ownership of ice plants in seven years and of the gas plant the year after the initiation of the first ice plant. If the public had not been convinced that the water plant was efficiently conducted, further public ownership never would have come to pass. As it was, however, the public definitely and positively refused to grant another franchise to the gas company, thus compelling its owners to sell.

Mr. LA FOLLETTE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Wisconsin?

Mr. HOWELL. I yield.

Mr. LA FOLLETTE. May I ask the Senator whether the electric utility is publicly or privately owned in Omaha?

Mr. HOWELL. The electric utility is privately owned in Omaha.

Mr. LA FOLLETTE. What has been the effect, if any, of the successful operation of these public undertakings upon the rates which the private utility in electricity charges to consumers in Omaha?

Mr. HOWELL. Mr. President, in 1912, when the water plant was taken over, the maximum rate charged to consumers in the city of Omaha for domestic service was 14 cents a kilowatt-hour.

The effect of our taking over the water plant, after a 16 years' contest, was that almost immediately the electric light company reduced its rate from 14 to 12 cents. A year later we began installing two small electric units at the water plant to supply the plant with its required electrical energy. When these units were installed it was found, in 1914, that the energy, even with these small units, could be placed upon the switchboard, at the then cost of coal, for three-fourths of a cent a kilowatt-hour. This fact was proclaimed to the people of the city, and within one month the rate was reduced to 11 cents a kilowatt-hour. We then went to the legislature and asked for an enabling act authorizing the people of Omaha to vote upon the question of extending their electric plant. The bill passed both houses of the legislature, but was vetoed by the governor upon the ground that it was unmoral to allow the public to compete with a private corporation; but they knew they had had a fight, as the rate immediately came down, in 1916, to 8½ cents.

Two years later we appeared at the legislature again; they said for another raid, and the day before it met the company reduced the rate to 6 cents, and now the maximum is 5½ cents in the city of Omaha. In other words, we have had a maximum rate of not more than 6 cents for electrical energy in Omaha dating from January 1, 1917, the midst of the war.

Mr. LA FOLLETTE. Mr. President, it would seem, then, that the threat of public ownership and competition is sometimes sufficient to bring about reasonable rates to consumers from privately owned utilities.

Mr. HOWELL. Mr. President, potential public competition is indeed effective. More effective, of course, is actual public competition, and in every city of the country that has had the enterprise to establish a competing electric plant electric rates have been reduced to the domestic consumer about one-half by the competing company.

In the city of Cleveland in 1914 the people were paying 10 cents a kilowatt-hour. Ex-Secretary of War Baker was then mayor and was responsible for the construction of a competing municipally owned plant. What has been the result?

The maximum rate charged by the publicly owned plant is now 3 cents a kilowatt-hour, with a 30-cent service charge, and the private company has reduced its rates from 10 cents to 5 cents.

I imagine I can hear some one saying, "How about taxes?" And I appreciate that telepathic challenge. In the city of Omaha when a public utility pays its taxes it hands them over to the county and city treasurer, and thereupon he distributes such payments among several pockets. One is labeled "Police fund," another "Street-cleaning fund," another "General fund," and finally he gets down to a pocket that is labeled "Bond-redemption fund." In the case of Omaha's publicly owned utilities an increment is added to charges for service that will produce a fund in each case equal to the amount of taxes the utility might be called upon to pay if privately owned. Moreover, this fund as it accumulates is paid over to the county and city treasurer, but instead of distributing it into various pockets he adds it to the "bond-redemption fund" for the payment of the people's utilities debts. As a consequence the reduction in the rates enjoyed by the people of Omaha because of their publicly owned utilities can not be wholly attributed to the nonpayment of taxes.

Are these advantages of public ownership operative in connection with hydroelectric power developments?

The power plant of the hydroelectric installation involves a much larger investment of capital per horsepower than in the case of a steam plant. Therefore the first advantage of public ownership, the differential between the charges for private and public credit, is emphasized under such circumstances.

Hydroelectric plants cost anywhere from two to three times as much as steam-electric plants. Therefore it must be evident that this differential of 3¼ per cent runs, not against $100 per horsepower but against about $300 per horsepower.

Mr. FLETCHER. Mr. President, may I interrupt the Senator?

Mr. HOWELL. Certainly.

Mr. FLETCHER. Did I understand the Senator to state that the hydroelectric plant costs more than the steam plant?

Mr. HOWELL. Yes.

Mr. FLETCHER. I never quite understood that to be the case. Is that so everywhere or just at this place?

Mr. HOWELL. That is true, generally speaking. Much more money is invested in a hydroelectric plant, but there is not the same expense of operation. Less money would be invested in a steam plant, but there would be a greater cost of operation.

So far as the other two advantages of public ownership are concerned, they will be fully as operative. As a matter of fact, electrical utilities are about the most profitable in the country to-day. They even surpass gas, as the American public has been carefully drilled into the habit of paying high electrical rates. In fact, the people have accepted them on faith because of the stamp of approval by public service commissions. However, there is a gradual awakening, and hence the developing sentiment for public ownership which is abroad.

Nor is it strange that there is an awakening when we consider the relative charges for electrical energy in Ontario and in the United States, and the fact that Ontario rates are wholly due to public ownership.

Prior to 1913 there was organized in that Province an agency of the government known as the hydroelectric commission. It proceeded to buy and construct hydroelectric plants, and now owns and operates 22. It also transmits the energy developed, selling it wholesale at points of use. Thus, practically every municipality in Ontario owns its own electrical distribution system, buying and retailing the energy supplied by the transmission lines of Hydroelectric. These municipalities number about 284, and but three of them have privately owned plants, they being in competition with publicly owned systems. The largest of the hydroelectric power plants is located in the vicinity of Niagara Falls, and the wholesale charge to the city of Niagara Falls, Ontario, for energy delivered is 2.9 mills per kilowatt-hour. During 1926, domestic consumers in Niagara Falls, Ontario, used, on an average, 208 kilowatts per months at a cost of 1.2 cents per kilowatt-hour.

Mr. OVERMAN. Mr. President, what is the cost across the river, on the American side, where I understand the plants are privately owned?

Mr. HOWELL. Across the river is Niagara Falls, N. Y., served by privately owned utility, obtaining its electrical energy also from Niagara River, and they are charging for the same service about three times the rate in the Canadian city. This fact justly casts a suspicion on public regulation, and suggests the advantages of public ownership. Some one may suggest that the domestic consumer—that is, the voter in Ontario—is given undue consideration at the expense of the power users.

I have before me certain electric light and power bills. The following is an actual charge for use of 161 kilowatts per month in Niagara Falls, Ontario. The amount is $2.26 net. Across the river, in Niagara Falls, N. Y., served by a privately owned electric utility, also obtaining its hydroelectric energy from Niagara River, the bill for identically the same energy would be $6.21, not quite three times as much.

It is often urged that domestic users in Ontario are special beneficiaries of Hydroelectric, but that the power users pay the freight.

I have before me a power bill indicating a service charge for 23.7 horsepower and a consumption for the month of January of this year of 1,536 kilowatt-hours. The total of the bill for that month was $35.44. In Niagara Falls, N. Y., just across the river, the same bill would have been $41.47.

Again, let us consider a bill for a larger power in Niagara Falls, Ontario: Service charge, 622.5 horsepower; consumption, kilowatt-hours, 99,460; bill for the month, $1,090.48. In Niagara Falls, N. Y., the identical bill would have been $1,296.90.

I will make another comparison that is to me indeed striking:

Toronto is northeast of Niagara Falls, a distance of about 90 miles, a metropolitan city. St. Thomas is west of Niagara Falls, about 110 miles, and has a population of some 17,000. Each of these cities buys at Niagara Falls energy at about 2.9 cents per kilowatt-hour. The hydroelectric commission transmits it 90 miles to Toronto for an additional 1.1 mills; to St. Thomas for an additional 1.7 mills; so that the cost of electrical energy in Toronto is 4 mills and in St. Thomas 4.6 mills.

The United States Government has spent $50,000,000 in the construction and equipment of Wilson Dam at Muscle Shoals, Ala. It is now developing and selling electric energy at Muscle Shoals to the Alabama Power Co. for 2 mills per kilowatt-hour, or nine-tenths of a mill less than Toronto and St. Thomas pay for their energy at Niagara Falls.

The Alabama Power Co. has a transmission line connecting Muscle Shoals with Birmingham, Ala., a city of about 200,000 inhabitants and about 100 miles distant from Muscle Shoals, and it is probable that it can transmit the energy it purchases for 2 mills per kilowatt-hour from Muscle Shoals to Birmingham for not to exceed an additional 2 mills, making the total cost of Muscle Shoals energy delivered in Birmingham 4 mills per kilowatt-hour, or the same as the cost of energy delivered to the city of Toronto by the hydroelectric commission.

Here we have an excellent opportunity for comparison of the results of public and private ownership of hydroelectric plants, each consuming city located at about the same distance from the source of energy.

I have before me a bill for domestic consumption. Kilowatts used, 66. In Toronto the bill would be $1.41; in Birmingham, Ala., $5.05.

Incidentally, this same bill, if rendered in Washington, would be $3.89, or at the rate of about 6 cents per kilowatt-hour; that is less than in Birmingham. Mark you, Birmingham is supplied by water power, Washington by a steam electric plant. Congress has recently had an influence upon Washington rates. As a matter of fact, its influence has been growing for the last three or four years. When I first came to Washington, some four years ago, the rate was 10 cents per kilowatt-hour.

Mr. BROOKHART. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. HOWELL. I yield.

Mr. BROOKHART. I remember that the Senator made a speech on that proposition, and I also remember that following his speech the officials of the privately owned companies began to look around for a way to reduce their rates, because they did not want to have to pay anything back, as the Senator then suggested. That is the reason why the rates were reduced in Washington.

Mr. HOWELL. It must be evident that such a rate as 10 cents per kilowatt-hour in this city was utterly indefensible. It does not cost appreciably less to produce energy here to-day than it did in 1926, in 1924, or in 1923.

Small power: In Toronto the service charge for eight horsepower, kilowatts used per month, 1,355; bill in Toronto, $18.54; in Birmingham, Ala., $69.11. Consider this difference in connection with small power, and yet it is often urged in financial papers that while Ontario domestic consumers pay less than is paid in the United States, the power users pay more, or at least that is the suggestion.

Large power: In Toronto service charge for 657 horsepower, use per month 223,000 kilowatts, the bill in Toronto, $1,717.65; in Birmingham, Ala., $2,329.50; in Washington, D. C., $3,327.88.

Mr. President, here is evidence again of the advantages of public ownership and the burden of private ownership subject to legal regulation. It may be urged that it is unfair to compare Washington charges, where energy is produced by steam, with charges in cities supplied by hydroelectric power. Electric energy can be put on the switchboard at some of the great plants of the country, including all costs, not excepting capital, coal $4 per ton, for as low as 5 mills per kilowatt-hour. I was assured by the president of a great chemical concern the other day that a modern steam electric plant can be constructed and operated with coal at $4.15 per ton so as to put energy on the switchboard for 3.8 mills per kilowatt-hour.

However, assume the cost in Washington to be 6 mills per kilowatt-hour; then in such case the cost of hydroelectric energy in Toronto is but 2 mills less than the cost of steam electric energy in Washington. What has this difference of 2 mills to do with a rate of 6 cents charged to-day to the domestic consumers in Washington?

In the case of the 66 kilowatt-hour domestic bill I have quoted for Toronto, Birmingham, and Washington, the rate in Toronto is 21 mills. Add the additional cost on account of steam power, 2 mills, and we have 23 mills, or 2.3 cents, as compared to a rate of 6 cents in Washington.

It may be insisted that the Toronto bill does not include taxes while the Washington bill does. In the city of Washington the total taxes of the electric company for 1926 amounted to 3 mills per kilowatt of energy actually sold, which is more than the average for the country at large. Add those 3 mills to the Toronto rate and then we have 26 mills, or 2.6 cents, as a result of the public ownership of an electric plant using steam and paying taxes; this as compared to the 6-cent rate charged

in Washington. It might be added that in 1926 the average domestic rate in this country was about 7.4 cents per kilowatt-hour as compared with less than 2 cents in Ontario.

Mr. NORRIS. Mr. President, will my colleague yield?

Mr. HOWELL. Certainly.

Mr. NORRIS. In making the comparison which the Senator has made, it seems to me he omitted one thing where he accounted for taxes. He has said nothing with reference to the amortization fee that is included in the Toronto rate and not included in the Washington rate and which, as was shown here the other day, amounts to about 20 per cent of the rate paid.

In Ontario, Canada, the rate, although it is so much cheaper than the Washington rate, notwithstanding the Senator has added something for taxes, nevertheless includes an amortization fee which in 30 years would eliminate the entire capital investment, and under the Washington rate the capital investment, of course, never is eliminated.

Mr. HOWELL. Earlier in my remarks I called attention to the fact that in Omaha we set aside sinking funds equivalent to taxes. Of course, likewise, the sinking fund set aside by the hydroelectric commission, and in each case by the various municipalities throughout Ontario, is also in the nature of taxes. If the amount thereof is equal to the taxes that might have been collected, then the plants in Ontario are in effect paying taxes.

Mr. NORRIS. Mr. President, I have just spoken to my colleague, and I suggest to the Senator from Washington [Mr. JONES] that he make his motion now to proceed to the consideration of executive business, as my colleague is willing to stop now and finish his speech to-morrow.

Mr. JONES. Very well.

EXECUTIVE SESSION

Mr. JONES. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. JONES. I move that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and (at 5 o'clock and 15 minutes p. m.) the Senate took a recess until to-morrow, Saturday, March 10, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 9 (legislative day of March 6), 1928

COLLECTOR OF INTERNAL REVENUE

George L. Foote to be collector of internal revenue for the district of Indiana.

COLLECTOR OF CUSTOMS

George D. Hubbard to be collector of customs for customs collection district No. 30, with headquarters at Seattle, Wash.

POSTMASTERS

CONNECTICUT

Clifford E. Chapman, Niantic.

KENTUCKY

Albert E. Brown, Pembroke.

OKLAHOMA

Ada M. Thompson, Mannford.

PENNSYLVANIA

Thomas Collins, Commodore.
Charles G. Fullerton, Freeport.

HOUSE OF REPRESENTATIVES

FRIDAY, *March 9, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Throne of God, we seek the highway whose starry path our feet would press. Thou dost look over this wonder-teeming world every day—morning and evening—and all things are made new. Yet there is nothing higher than the soul is high; there is nothing wider than the heart is wide. A life in Thee is more powerful, more pervasive, and more durable than all the eye beholds, for space is nothing to spirit. Let this little prayer ascend to a throne of grace. O for a life in Thee, deep, boundless, and abundant. "Ye shall know the truth, and the truth shall make you free." There is nothing finer, vaster, and more glorious than the knowledge of God's truth. Let the bigness of our lives, the richness of our service root and blossom in Thee. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed the concurrent resolution (S. Con. Res. 12) appointing a committee to represent Congress at the exercises at Atlanta, Ga., incident to the unveiling of a portion of the Stone Mountain Monument, in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had passed with amendments a bill of the following title, in which the concurrence of the House was requested:

H. R. 9137. An act granting the consent of Congress to the highway department of the State of Tennessee to construct, maintain, and operate a bridge across the Cumberland River on the Lebanon-Hartsville Road in Wilson and Trousdale Counties, Tenn.

SENATE BILL AND CONCURRENT RESOLUTION REFERRED

A bill and concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. 2061. An act for the relief of W. H. Kaufman; to the Committee on Claims.

S. Con. Res. 12. Concurrent resolution appointing a committee to represent Congress at the exercises at Atlanta, Ga., incident to the unveiling of a portion of the Stone Mountain; to the Committee on Rules.

THE GREAT SMOKY MOUNTAINS NATIONAL PARK

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, the country at large, I am sure, will be very much interested in the announcement that the Laura Spelman Rockefeller Memorial Fund has authorized a gift of $5,000,000 toward the establishment of the Great Smoky Mountains National Park. This gift, with the $2,000,000 gift from the State of North Carolina and approximately the same amount from the State of Tennessee and approximately the sum of $1,000,000 from private subscriptions, assures beyond question the establishment of this great playground and monumental natural area for the benefit, profit, and edification for this and future generations. [Applause.]

In this age of commercial materialism it is a hopeful sign to see such gifts as that from the Laura Spelman Rockefeller Memorial Fund. Having been privileged to report to the House the legislation establishing this great park, I take pleasure in announcing this gift. The great State of North Carolina, which I in part have the honor to represent, greatly appreciates this splendid and magnanimous gift.

Of this gift the Washington Post editorially on March 8 has this to say:

SMOKY MOUNTAINS PARK

The gift of $5,000,000 from the Laura Spelman Rockefeller Memorial Fund makes certain that the Great Smoky Mountains National Park will soon become a national asset. The amount, given as a memorial to Mrs. John D. Rockefeller, sr., will complete the $10,000,000 needed to purchase and turn the 700,000-acre tract over to the Federal Government. Within a few years a pleasure ground and beauty spot within easy reach of three-fourths of the population will be thrown open.

Although much of Great Smoky Mountains National Park is virgin forest land it lies in a region already famous. It is a part of the "Land of the Skies," which has been so successfully capitalized by North Carolina. Even before that section of the country became popular as a resort and vacation ground it was selected by some of the Nation's settlers as a place for their homes in the new country. The salubrious climate, the abundance of game, and the accessibility of water and fuel compensated the pioneers for the fact that they were forced to cling to the sides of the hills for their dwellings. Some of the purest American stock lives in the mountain territory.

The boundaries of the Great Smoky Mountains National Park will cover portions of Tennessee as well as North Carolina. It should, and no doubt will, attract residents of the entire eastern section. Its appeal may not be quite as varied as Yellowstone, but should prove fully as attractive to those unable to make the longer journey west. Linked with the Shenandoah National Park, the Great Smoky Mountains reservation will form an outlet almost at the gates of the National Capital for those who find pleasure and recreation in visiting nature at its best.

RESIGNATION OF RESIDENT COMMISSIONER

The SPEAKER. The Chair lays before the House the following communication:

MARCH 6, 1928.

The SPEAKER,
United States House of Representatives,
The Capitol, Washington, D. C.

SIR: I beg hereby to inform you that I sent to-day a cablegram to the president of the Philippine Senate and the speaker of the Philippine House of Representatives tendering my resignation as Resident Commissioner to the United States from the Philippines, effective on July 16, 1928.

Assuring you of my sincere appreciation of the courtesies accorded me by you and the Members of the United States House of Representatives in my official capacity and otherwise, I beg to remain, sir,

Very respectfully yours,

ISAURO GABALDON.

CALL OF THE ROLL

Mr. TILSON. Mr. Speaker, the Members in charge of the bill are desirous of having a quorum, and therefore I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 43]

Allen	Curry	Hope	Norton, N. J.
Andresen	Darrow	Hull, Morton D.	O'Connor, N. Y.
Anthony	Dempsey	Hull, William E.	Quayle
Arentz	De Rouen	Igoe	Rathbone
Bankhead	Dickstein	Irwin	Reid, Ill.
Beck, Wis.	Douglas, Ariz.	Jacobstein	Sabath
Begg	Dowell	Johnson, S. Dak.	Sanders, N. Y.
Berger	Doyle	Kelly	Sears, Fla.
Britten	England	Kiess	Snell
Buckbee	Fish	Kindred	Strong, Pa.
Butler	Fitzgerald, Roy G.	Kunz	Strother
Canfield	Freeman	Langley	Sweet
Casey	Gallivan	Larsen	Taylor, Tenn.
Christopherson	Graham	Leech	White, Colo.
Cole, Md.	Griffin	McFadden	Williams, Tex.
Combs	Hall, Ill.	Martin, Mass.	Wilson, Miss.
Connally, Tex.	Hancock	Moore, Ohio	Winter
Cramton	Harrison	Morgan	Wood

The SPEAKER. Three hundred and sixty-one Members are present, a quorum.

On motion of Mr. TILSON, further proceedings under the call were dispensed with.

CERTAIN AMENDMENTS TO THE CONSTITUTION

Mr. WHITE of Kansas. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the joint resolution (S. J. Res. 47) proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the joint resolution (S. J. Res. 47), with Mr. LEHLBACH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. The Chair desires to make a brief statement. On yesterday the gentleman from Virginia [Mr. MONTAGUE] offered an amendment. The Clerk reported the amendment, as follows:

Amendment offered by Mr. MONTAGUE: On page 3, line 5, strike out the words "the fourth day of" and insert in lieu thereof the words "the second Monday in."

Thereupon the gentleman from Kansas [Mr. HOCH] made a point of order against the amendment on the ground it was not germane, because the effect of it would be to change the length of the term of Members of Congress. Mr. MONTAGUE thereupon said:

I will be very candid with the gentleman. I made the motion for the purpose of getting the floor. I do not care whether you vote it in the resolution or not, because I think the whole proposition is bad.

The gentleman from Virginia had previously intimated to the Chair that he would seek an opportunity to get recognition under the five-minute rule, as he had had no such opportunity in general debate. The Chair, in view of the statement of the gentleman, which I have just read, without considering the merits of the question and in order not to take the gentleman from the floor, which would have resulted if the point of order had been sustained, overruled the point of order.

Upon reflection, however, while the intent and purpose of the amendment may have been pro forma, the amendment in its substance is a genuine amendment, and the point of order of the gentleman from Kansas was well taken. In fairness to him the Chair therefore reverses his decision and sustains the point of order.

Mr. HOCH. In view of the statement of the Chair, I would like to say that, of course, had I understood that the amendment was intended as a pro forma amendment, I would not have injected a point of order, for the House always hears the distinguished gentleman from Virginia with interest and profit. [Applause.]

Mr. MONTAGUE. Mr. Chairman, the statement of the Chair is correct. My purpose, as stated, was to obtain the floor. I do think, however, and I submit to the committee, that the amendment suggested by me in the first section, or one somewhat similar, should be considered when we reach the second section, and instead of being the 4th day of January should be some particular day of the week, because I think this is better than having it fall upon a Sunday.

Mr. GIFFORD and Mr. TUCKER rose.

Mr. CHINDBLOM. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CHINDBLOM. There is nothing pending now but the motion which I made to strike out section 1?

The CHAIRMAN. That is correct.

Mr. GARRETT of Tennessee. Mr. Chairman, the gentleman from Virginia has a perfecting amendment.

The CHAIRMAN. The gentleman from Virginia [Mr. TUCKER] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TUCKER: On page 2, line 25, strike out "the legislatures of three-fourths of the several States" and insert in lieu thereof "conventions in three-fourths of the several States," so that it will read, "when ratified by conventions of three-fourths of the several States."

Mr. GIFFORD. Mr. Chairman, I would like to see if we can not come to some agreement as to time for debate on section 1 as quite a number of requests for time have been made. I would like to ask if one hour will be satisfactory—that debate on section 1 and all amendments thereto shall close in one hour?

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that debate on section 1 and all amendments thereto shall close in one hour. Is there objection?

Mr. CHINDBLOM. Reserving the right to object——

Mr. HASTINGS. How will the time be controlled?

Mr. CHINDBLOM. Reserving the right to object, it would seem after all the debate that we have had that now five minutes for and against shall be sufficient. Has the gentleman requests for more time?

Mr. GIFFORD. Yes; much more. This is the heart of the whole resolution.

Mr. GARRETT of Tennessee. The gentleman may regard it as the heart of the whole resolution, but some of us regard section 2 as of considerable importance. I am not objecting to what the gentleman suggests, but I would like it understood that there will probably be a desire for more than 10 minutes when we come to section 2.

Mr. GIFFORD. If section 1 goes out, section 2 will go also.

Mr. BURTNESS. I want to emphasize what the gentleman from Tennessee said. We want some time on section 2, and the sooner we get through with section 1 the sooner we will get to section 2. If section 1 goes out, of course that settles it; but if it does not go out, liberal time should be allowed for section 2.

Mr. MADDEN. Mr. Speaker, I object to the request.

Mr. GIFFORD. Mr. Chairman, I make a point of order on the amendment of the gentleman from Virginia. It was ruled yesterday that after a section had been read we could not go back to a previous section.

The CHAIRMAN. The point of order might be good, but it comes too late.

Mr. GIFFORD. Does the Chair hold that debate had begun on this amendment?

The CHAIRMAN. Business had intervened.

Mr. LAGUARDIA. There has been no discussion of the gentleman's amendment.

The CHAIRMAN. The gentleman from Massachusetts, instead of making his point of order when the amendment was reported, offered a unanimous-consent request and discussed it.

Mr. CHINDBLOM. And it came out of the time of the gentleman from Virginia, for the gentleman from Virginia had been recognized.

Mr. GARRETT of Tennessee. The Chair did not announce that it would be subject to a point of order, but expressed the opinion that it might be.

The CHAIRMAN. Yes; it might be. The gentleman from Virginia is recognized for five minutes.

Mr. TUCKER. Mr. Chairman and gentlemen of the committee, I have offered the amendment to the pending proposition, which, if adopted, would cause it to rest upon the sovereign power of the sovereign people of the States. The Constitution which was builded in 1787 rests upon that solid foundation. Should amendments to it be less stable? It was referred to conventions, the only power recognized by the people at that time as constituting sovereign power.

I recognize the fact that this proposed amendment in many respects is merely functional, and the point has been made that the amendment does not seek to change any fundamental principle, but is merely administrative and functional. I deny that.

When the attempt is made in this amendment to limit the powers of Congress by limiting the first session to May 4, that is a fundamental principle that should never be attempted except by the sanction of the sovereign people of the country.

Now, Mr. Chairman and gentlemen, just one moment—the Constitution permits under the amending section that Congress may refer any amendment either to the legislatures of the States or to conventions. I have often wondered why that was done. The Constitution itself was ratified by conventions, the sovereign power of the States, but mark you, when the first 10 amendments were proposed, they were referred to the legislatures of the States. They were fundamental in character and evidently they were referred to the legislatures because when all of the States ratified the Constitution these very amendments were discussed, and in five or six States ratification was made upon the condition that these amendments should be subsequently adopted.

Mr. MOORE of Virginia. And there were no contests in the State conventions on that subject.

Mr. TUCKER. Not only no contest but it was recognized by them that the condition of ratifying the Constitution was that the subsequent amendments were to be a part of it. So that there was no occasion to refer them back to the people, and for two long years the greatest orators that ever adorned the history of America discussed these questions before the people. The people heard them and the State conventions then ratified the Constitution upon those conditions. So that if it is necessary in order to make the Constitution symmetrical that all amendments should be ratified by the people, the history of the times shows clearly that the reason that they were not referred to conventions of the people was that conventions of the people had already acted upon them.

How about the eleventh and twelfth amendments? I can plainly see when the gentlemen who brought in the eleventh and twelfth and the other amendments looked back at once to see how former amendments were first offered, they found that they were ratified by the legislatures, and doubtless, without thinking for the reason, that mode was adopted. The first 10 amendments constituted the precedent, but I warn this House to take no chances on this matter.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. O'CONNELL. Mr. Chairman, the gentleman is making a very instructive and impressive speech. I ask unanimous consent that he may proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GIFFORD. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. Yes.

Mr. GIFFORD. Were any of the 19 amendments made to the Constitution ever ratified other than by the legislatures of the States?

Mr. TUCKER. No.

Mr. RAMSEYER. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. Yes.

Mr. RAMSEYER. Is not the method for ratification proposed in this resolution as much a reference to the sovereign people of the sovereign States as the method proposed by the gentleman, by conventions? It is the sovereign people of the sovereign States through legislatures in one case, and the sovereign people of the sovereign States in conventions in the other case.

Mr. TUCKER. My dear friend, I have been following you too long to have my idol shattered. Does my friend make no distinction between the sovereign power of the people and a branch of the government of the State? Where is the sovereignty of the legislature? It is not even sovereign in the States; but now my friend proposes to make it sovereign in the United States. Oh, no. Gentleman say, what difference does it make whether it is ratified by a convention or by the legislature—it is ratified, is it not? Yes.

Mr. Chairman, this building that we are sitting in to-day was added some years ago to the Capitol Building. It was made as "an amendment" to the Capitol Building. Can you imagine that the architect who had the wings of this Capitol in charge, in erecting them, could have placed the foundation on any less solid ground than the foundation which upholds the dome itself? To have made the foundations of these wings less solid and sound than those of the main building would have been to invite destruction and demolition. You say what difference does it make? I have sometimes heard in the past a good deal of criticism of the southern people because they did not uphold and stand by the post bellum amendments—the fourteenth and fifteenth. I have heard in recent years a good deal of talk about a certain other amendment because it was never ratified by the people. Aye, there's the rub.

The chief argument that you hear about many of these amendments is that they were never ratified by the people. Let us take no risks. Let us have this ratified by the sovereign power of the people that the men who made the Constitution recognized as necessary. [Applause.]

I am against this whole business, not because there are not good things in this amendment, but it is not necessary. As I read the amendment there is not a single thing in it that can not be accomplished by legislation, except the abolition of the so-called "lame-duck" session, and even that can practically be done by a law of Congress.

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

Mr. GOLDSBOROUGH. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection?

Mr. GIFFORD. Mr. Chairman, I reserve the right to object. I do not want to object, but if we are going to allow the gentleman to have 15 minutes, there are many others who will want to have the same respect shown to them.

Mr. DYER. Mr. Chairman, I trust the gentleman from Massachusetts will not object. The gentleman from Virginia is one of the greatest constitutional lawyers in this country, and I am sure his argument is of great benefit to all the Members of the House.

Mr. GIFFORD. I shall not object, but I shall expect the same spirit of courtesy to be shown to other speakers.

The CHAIRMAN. The Chair hears no objection.

Mr. TUCKER. I thank the gentleman from Massachusetts. I stand here as the defender of the lame ducks. I have been one myself. [Applause and laughter.]

Mr. CHINDBLOM. And several of the other gentlemen who talk so loudly about lame ducks have been lame ducks themselves, but they will not apply to themselves what they say of others.

Mr. TUCKER. Mr. Chairman, 35 years ago I had the honor to occupy the position of chairman of this committee that my honored friend [Mr. WHITE of Kansas], who has brought in this resolution, now occupies. We had this whole question before us for two years, and I had at my right hand as fine a lawyer as I ever knew in this House, David A. DeArmond, of Missouri. [Applause.] We thrashed it out for two years and could come to "no resolution thereon." Lame ducks! Why, I remember in 1892, after the McKinley bill had been passed, we Democrats thought a political millennium had come—there were so many vacant seats on the Republican side. I saw a drove of lame drakes go out of this House—you have to be pretty careful these days in your language. [Laughter.]

I saw heading that list a man whose memory I love to cherish, as fine a man as God ever permitted to live—William McKinley. [Applause.] I saw him walk out of this House. You know that ducks always march in a long row one after the other. He was leading them, and who do you suppose was bringing up the rear? No one other than my noble friend—I had almost said the patriarch of the House—whose wisdom and learning we always enjoy, THEODORE BURTON, of Ohio [laughter], and in between was old Uncle Joe Cannon, Julius Cæsar Burrows, and God knows how many more. [Laughter and applause.]

Four years after that time I saw President McKinley come into the Capitol as President of the United States, and I went to hear his inaugural, and a little later there was another distinguished lame duck from Ohio, NICHOLAS LONGWORTH, who I am glad to know presides now over this House with distinction, honor, and fairness to all. [Applause.]

The only thing in this amendment, gentlemen and ladies, which has given trouble is this lame-duck session of Congress. But mark you: The amendment itself retains the lame-duck session. What are you going to do between the 4th of November and the 4th of January? A new President has been elected; a new Congress has been elected. If the old President and the old Congress are united, they have got two months, or a lame-duck session, in which to accomplish their object as against

three months at present. If a lame-duck session is objectionable, what is the difference between a two months' lame-duck session and a three months' lame-duck session?

If we can do by legislation everything carried in this resolution, except getting rid of the lame-duck session, why should we vote for this measure that retains a lame-duck session?

The CHAIRMAN. The time of the gentleman from Virginia has expired.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

Mr. GIFFORD rose.

Mr. LOZIER. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Massachusetts [Mr. GIFFORD] desires to debate the amendment and is recognized.

Mr. GIFFORD. Mr. Chairman, it is difficult to follow and to argue against a man of such delightful personality as the gentleman from Virginia. The amendment which he has offered provides that this amendment be ratified by conventions rather than by legislatures, as has been the case in the ratification of every previous amendment that has been added to the Constitution. This would, perhaps, make ratification more difficult; but I hardly think that it should be accepted simply because of the great appreciation which we have for the gentleman. Those great men whom he has mentioned as having, at one time or another, been lame ducks prove nothing as an argument either for or against this amendment. I believe that every single one of them would have been glad if they could have served out their two full years in the way suggested by this amendment.

Let us examine ourselves and see whether we would not rather serve for two years continuously before defeat than come here and complete our service after having failed to be reelected. Of course, we should expect to act in accordance with the dictates of our conscience and should do our full duty. I might feel, however, that I was not here truly representing my constituents if I had been defeated by a vote of the people and another, whose opinions were radically different, had been elected to succeed me.

The opinion of our chairman of the Committee on Appropriations, the gentleman from Illinois [Mr. MADDEN], has a great deal of influence here. His principal argument yesterday was that even two short sessions would be for the good of the country because we would not spend as much money and the Treasury would benefit thereby.

As to the distinguished chairman of the Committee on Rules, the gentleman from New York [Mr. SNELL], we appreciate his splendid service, but what is his argument?

It is that the Members to whom the term "lame duck" is applied represent only about 12 per cent of the turnover in the elections, but I would remind him that the turnover as to the Executive is 100 per cent. We do not attempt, Mr. Chairman, to argue that there is no opportunity to hold a lame-duck session between November and January 4, if necessary. In discussing the effect of the lame-duck session I do not contend that a Member who has been defeated does not properly perform his duty after such defeat.

Newly elected Members are usually obliged to wait for 13 months before they can carry into effect the will of the country as expressed in their election. But why should we devote so much time to talking about lame ducks? The gentleman from Virginia [Mr. TUCKER], who preceded me, says that all the things which would be accomplished by this amendment can be accomplished by legislation. Not before March 4, and it is advisable and necessary to meet much earlier, and to effect this it must, of necessity, be done by constitutional amendment.

The gentleman from Connecticut [Mr. TILSON], the Republican leader of the House, is one with whom I should always wish to agree, because how can I hope to be advanced in his estimation if I do not show respect for and follow his leadership? But as I look over his argument of yesterday what do I find it to be? He hoped that his son might later come to Congress, and he did not wish him to be subjected to the action of this provision, as it would make it harder for him. I can not for the life of me see how this provision would do that. He exclaimed, "Shades of our illustrious ancestors, why should we change the Constitution if, by legislation, we can come here after the 4th of March?" It is not practical to attempt to legislate for the country during the hot summer weather, and all agree upon that point.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. GIFFORD. I ask for one minute more.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. GIFFORD. Mr. Chairman, I wish to repeat that on the first day of this discussion, which lasted all the afternoon, we heard but one speech in opposition to this measure. Since yesterday, Mr. Chairman, many have requested time to speak and I trust that full opportunity for debate will be given to-day.

Mr. CHINDBLOM. Mr. Chairman, this discussion has been going on the theory that the amendment offered by the gentleman from Virginia [Mr. TUCKER] is a perfecting amendment. I beg to suggest it is not a perfecting amendment under my motion. My motion is to strike out section 1.

The CHAIRMAN. The amendment is not an amendment to section 1. It is an amendment to the clause providing for submission.

Mr. CHINDBLOM. I submit it should not be considered in preference to my motion.

The CHAIRMAN. It applies to the subject matter under consideration. It is not intended to perfect the amendment of the gentleman from Illinois, but to perfect the submission clause. The debate on this specific amendment has been exhausted, and the Chair would suggest to gentlemen who wish to debate on this general subject that there is quite a number of specific amendments upon which their remarks might be based. The debate on this specific amendment being exhausted, the question is on agreeing to the amendment offered by the gentleman from Virginia.

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. Without objection, the gentleman from Oklahoma is recognized for one minute.

There was no objection.

Mr. HASTINGS. Mr. Chairman, stripped of all of its verbiage, let me say to the members of the committee, with all due deference to our good. and able friend from Virginia [Mr. TUCKER], that the friends of this resolution should not be deceived and should vote against his amendment to ratify by conventions, for the reason that it is putting up an additional hurdle over which this resolution will have to jump. If this amendment is adopted, you will have to induce the legislatures of the several States to provide the details for calling the conventions. [Applause.]

It is simply another hurdle against favorable action upon this amendment to the Constitution. Let none of us be deceived by the adroit argument of the gentleman from Virginia. That was intended to lead our minds away from the question. Those who favor the resolution will vote against the amendment. It must pass the House by a two-thirds vote and then be ratified by three-fourths of the States. This amendment in effect would make it receive the favorable consideration of the several State legislatures that must provide for conventions and then by the conventions themselves.

This is a joint resolution proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of assembling of Congress.

Section 1 provides that the terms of President and Vice President shall end at noon on the 24th day of January, and the terms of Senators and Representatives at noon on the 4th day of January of the years in which such terms would have ended if this article had not been ratified.

Section 2 provides that Congress shall assemble at least once in every year. In odd years the time of meeting is set for January 4 unless a different day is fixed by law. The second session is closed on the 4th day of May. I see no reason why Congress should be compelled to close on the 4th day of May; and if an opportunity is afforded, I shall vote to eliminate that provision.

Section 3 provides that where, under the Constitution, the choosing of a President falls to the House of Representatives, and that has not been done, the Vice President shall act until a President is chosen, and authorizes Congress to provide by legislation for the choosing of a Vice President where none has been chosen. I see no objection to this section.

Section 4 provides that in the event of a death of a President elect before the time fixed for the beginning of his term, then the Vice President shall become President, and also provides that Congress may, by law, provide for the case of the death of both President elect and Vice President elect before the time fixed for the beginning of a term, and it extends to those whom the Representatives may choose under the Constitution as President whenever the right of choice devolves upon them, and the Senate may choose the Vice President.

Section 5 provides that sections 1 and 2 shall take effect on the 30th day of November of the year following the year in which this article is ratified, and this is done so as to not affect any sitting Member of Congress.

If an opportunity is afforded I shall vote for the convening of Congress on the first Monday of January instead of the 4th day of January and shall vote for the terms of President and Vice President to begin on the second Monday of January instead of the 24th day of January. I see no reason for 20 days to intervene between the convening of Congress and the beginning of terms of President and Vice President. One week would be sufficient within which to meet and organize and elect committees, count and certify the vote for President and Vice President. No legislation of value could be enacted before the message of a newly elected President. Unless section 1 is amended every four years Congress will find itself in session some three weeks during which time nothing of value will be accomplished. For that reason I think this section should be amended as I have indicated.

I shall vote against the amendment to make the terms of Members of the House four years instead of two. Our branch of Congress should always be responsive to the will of the people. A Member who is faithful to his trust and truly reflects the sentiment of his constituents will be appreciated and returned, whereas an opportunity should be afforded the people to replace the accident who misrepresents his district and is neglectful of his duties.

I am not influenced so much by the argument against the hold-over or so-called lame-duck Members of Congress. The record shows on the average they number less than 12 per cent, and some of them retire voluntarily.

The merit in the proposed amendment is that it will enable a President and Members of Congress newly elected to meet earlier and register the will of the people expressed at the November election.

Now, a word as to amending the Constitution. The convention provided for its amendment. The original Constitution would, perhaps, not have been ratified if its amendment had not been provided for. As a result the first 10 amendments were proposed at the first session of the Congress and ratified without opposition.

The other 9 amendments, 19 in all, have each been ratified by the legislatures of the several States. The amendment to this resolution by the gentleman from Virginia would in effect require ratification both by the legislatures and the conventions of three-fourths of the States and therefore make it more difficult of ratification.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired. The question is on the amendment offered by the gentleman from Virginia.

The question was taken; and on a division (demanded by Mr. TUCKER) there were—ayes 90, noes 107.

So the amendment was rejected.

Mr. LOZIER. Mr. Chairman, I rise in opposition to the motion of the gentleman from Illinois.

The CHAIRMAN. The gentleman from Missouri is recognized for five minutes.

Mr. LOZIER. Mr. Chairman and gentlemen of the committee, a number of false issues have been raised in this debate. The oligarchy that rules this House with a rod of iron are holding up the skull and crossbones. A number of scarecrows have been erected. Several gentlemen have come to the defense of the so-called lame-duck sessions of Congress, and all the arguments which have been made against this resolution have consisted of fulsome eulogies on the character of those who were Members of lame-duck sessions of Congress in the past. This is a false argument, honeycombed with sophistry, and is not legitimate or logical argument.

Gentlemen who are opposing this resolution and commending the integrity, ability, and patriotism of Members of Congress who constituted the so-called lame-duck Congresses are not discussing the real issues involved in this resolution. Their arguments are far afield and do not go to the real issue involved in the pending resolution. Though I do not challenge the sincerity of those of my colleagues who have made arguments of this character, still candor compels me to say that these fallacious arguments are not calculated to enlighten or instruct the Members of this House but to confuse and inject into our deliberations a false issue. The personal integrity and patriotism of those who have been Members of so-called lame-duck Congresses are not involved in this question.

These, in effect, are appeals to passion and prejudice and are not arguments that should appeal to the Members of this body, because these eulogies on former Members of lame-duck Congresses are entirely beside the question. In the last analysis, the question involved is one of national policy, not a question as to whether or not Members of lame-duck Congresses are honest and well meaning.

Now, with reference to sessions of Congress held by Members who have been defeated for reelection, I will say that these Members may be good men, they may be patriotic men, and they may be honestly trying to serve their country as they see their duty, but if they represent a policy which has been the subject of a nation-wide discussion and the American electorate has gone on record in opposition to that policy, then the fact that those men who advocated that repudiated policy may be patriotic men and well-meaning men does not change the situation. The question is this, and it goes right to the foundation of our free institutions and the orderly processes of government: Shall a Congress whose record and whose policies have been repudiated and rejected by the American people, and who have been denied a vote of confidence—shall this repudiated body be given a four-month lease of life to work their will, to reinforce and consolidate their policies, pass new legislation of the same character as that repudiated in the preceding election, and make it either absolutely impossible or exceedingly difficult for the people through their newly elected Congress to work their will? It is not a question as to whether or not these men are honest and patriotic. The real issue is whether or not the Congress whose membership has been repudiated and whose policies have been rejected shall be continued for another period of four months after the elections, with full power to enact additional legislation of the same character as that repudiated by the American people in a nation-wide election.

Mr. GILBERT. Will the gentleman yield?

Mr. LOZIER. Yes.

Mr. GILBERT. I fully agree with the gentleman that no man is good enough to serve after he has been repudiated, but I have been driven to the position—although my thought coincides with the gentleman's thought—that it is not necessary to change the Constitution in order to accomplish that result. If the gentleman will convince us of that, there are quite a few of us who would be glad to vote with him.

Mr. LOZIER. There is only one way you can eliminate the evils incident to the present system of government by a repudiated Congress, and that is by a constitutional amendment. Within the terms of newly elected Members they can meet and function at any time, and they can enact a law which will call Congress in session on or after the 4th of March; but you can not, without a constitutional amendment, prevent these so-called lame-duck sessions of Congress.

Something has been said about the Tilden and Hayes controversy in 1876 and 1877. Why, in 1877 the Tilden and Hayes controversy was settled de hors the Constitution, outside of constitutional methods, and in the absence of any constitutional provision authorizing such provision.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. LOZIER. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. LOZIER. They talk about the Hayes and Tilden contest. That emergency was met and settled by extraconstitutional methods. It was settled as the result of the common sense, good judgment, and patriotism of the American people and the patriotism, good judgment, and common sense of the American Congress, who were willing to give up political advantage in order to prevent the country being again involved in civil war. Can it be contended by my good friend from Virginia [Mr. MOORE] and my good friend from Virginia [Mr. MONTAGUE] or my good friend from South Carolina [Mr. STEVENSON] that if an emergency arises in the future like the one that confronted the Nation in 1876 and 1877 that any future Congress will be less patriotic or exercise less common sense or poorer judgment than the Congress in 1877? Why, gentlemen, this argument is a mere scarecrow. What is behind this opposition? The opposition to this comes from the reactionaries in or out of Congress, although not all of those opposed to it may be reactionary. However, there is not a reactionary or stand-pat Member of this House who is supporting this resolution, and every reactionary newspaper in the United States is opposing this resolution. As a matter of fact, we have in the United States a class of people——

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. LOZIER. No; I have not the time.

Mr. WILLIAM E. HULL. I want to ask the gentleman what is meant by reactionary?

Mr. LAGUARDIA. A standpatter.

Mr. LOZIER. Mr. Chairman, I have not yielded, and I do not want this interruption taken out of my time.

The CHAIRMAN. The gentleman declines to yield.

Mr. LOZIER. I have told the gentleman I would not yield. The gentleman has been on his feet a great many times during

this debate. He has made his bed; let him lie in it. If the gentleman had been a member of the States General in Paris years ago, he would doubtless have voted with the Bourbons. If he had been at Runnymede in 1215, he doubtless would have defended King John, the Plantagenet; and if he had been in England during the period of Cromwell, he would have been opposed to the parliamentary party. In every age of the world's history where the people have dared to dream of freedom and where they have sought to obtain self-government there have been reactionaries—men who were always opposed to the people having the opportunity of writing and expressing their will in effective legislation.

When the American people have passed upon an administration, when they have at the ballot box judged the record of a Congress, then, if our free institutions amount to anything, that Congress should cease to function.

I claim no superior honesty or sense of duty to that of the ordinary man; but let me tell you, if I were a candidate for reelection and if I were defeated upon any issue, or if I represented in Congress a policy which my constituents had repudiated in a preceding election, so help me God, when I came back to the short session, I would never vote to disregard their mandate or do anything to prevent their will and policies as indicated by their ballots from being written into law and made effective at the earliest possible moment.

So, my friends, the opponents of this resolution have confused the issue. They say that turmoil might result and Congress might not be organized between the 4th and the 24th of January in the event the Electoral College should fail to chose a President. Do you tell me that the American Congresses that assemble in the future would have any less patriotism, common sense, or good judgment than the Congress which in 1877 settled the Hayes and Tilden contest? As to the Members of lame-duck Congresses, I have no right to criticize their patriotism, I have no right to challenge their good faith, but I do have the right to say if they represent policies which their constituents have repudiated, if they have been defeated for reelection, then they should not, in all good conscience, continue on this floor to enact other laws like those repudiated by their constituents at the ballot box. [Applause.]

Mr. BYRNS. Mr. Chairman, I move to strike out the last two words.

I have not heretofore participated in this discussion, and in the few minutes at my disposal I can only expect to state my position very briefly, because it is not my purpose to ask for an extension of time.

I am frank to say that I think a great deal more excitement has been stirred up over this proposition than the importance of the matter really deserves, but if the resolution is amended in certain particulars I expect to vote for its submission to the people of the country for ratification.

A great deal has been said about so-called lame-duck Congresses. Of course, there is a good deal of merit in what is said with reference to legislation by lame-duck Congresses. No one questions the honesty, the integrity, or the ability of Members who have been named and many others who might be named, who have been classed in the category of lame ducks. It has been said many times upon the floor of the House that this is not a question of personality; it is a question of change in governmental policy, and that is the whole proposition. It is a question of whether legislation shall be enacted by those who have received the approval of their constituents or by those who for one reason or another have been repudiated.

Going further, as has been said by others upon this floor, I do not think this amendment will have the effect of preventing legislation from being enacted by a Congress composed of Members who are classed as lame ducks, and my chief reason for voting to submit this amendment is the fact that if it is passed as the Senate passed it and ratified by the people, it will prevent such filibusters as we frequently have at the end of the short sessions of Congress.

I think the Constitution ought to be amended so as to prevent one or two Members of the Congress at the other end of the Capitol from holding up, frequently, important and necessary legislation in order to put through some propositions in which they are interested against the will of the majority. Popular government, if it means anything, means the rule of the majority, and I am opposed to placing in the Constitution a limitation on the power of future Congresses to continue their sessions, if they believe a longer session is in the interest of the people or that it is necessary to prevent one or two Members from holding up an overwhelming majority of Congress.

This is my objection to the House committee amendment: It does not do away with the short session but simply extends it 30 days. If this is changed, I expect to vote for the submission of the amendment; otherwise, I shall vote against submission. I have been listening for some good reason to be given as to why the House committee has proposed to limit this session. The only reason I have noticed or observed is the reason that is set forth in the report of the committee to the effect that if it is not limited it will prove very inconvenient to Members of Congress who are seeking reelection, if they are required to stay in session beyond May 4. But why restrict the power of the majority in such a matter?

Mr. LAGUARDIA. Will the gentleman yield?

Mr. BYRNS. In a moment. Gentlemen, I think this is a most absurd and ridiculous reason to give for amending the Constitution of the United States, and would put the Congress in an absurd position if it were to vote to limit the session of Congress, as I say, to May 4 on purely personal grounds.

I now yield to the gentleman.

Mr. LAGUARDIA. That proposition is still under the control of the House. This is subject to amendment and we can perfect the resolution before it leaves here.

Mr. BYRNS. I understand, and I have just said that unless the House strikes out "May 4" I expect to vote against the submission of the amendment, because as I look at it the chief reason for the submission of this proposed amendment is the fact that it will serve to prevent filibusters.

Why, only two years ago, or less than two years ago, we witnessed a filibuster when appropriations, certain of them, failed, and while nobody has offered any criticism, yet in order to avoid an extra session it was actually necessary for the administration in some instances to violate, in a sense, the law, and to authorize money to be expended contrary to law.

Mr. TILSON. Will the gentleman yield?

Mr. BYRNS. I will.

Mr. TILSON. Would it not be much easier to reach the matter by amendment of the rules of the Senate rather than by an amendment of the Constitution of the United States?

Mr. BYRNS. That may be true, but unfortunately over here I will say to the gentleman that we have no control over the Senate in the construction of its rules. I repeat, I think it would be exceedingly unwise to write into the Constitution an express limitation on the power of future Congresses to control the length of their sessions, and I hope that part of the amendment proposed by the House committee, and which seeks to do this, will be stricken out. [Applause.]

Mr. CROWTHER. Mr. Chairman and gentlemen of the House, with some degree of temerity I approach the discussion of this matter in which so many brilliant legal minds of the House have differed so materially. A great deal has been said about the effect of propaganda, and as to how much attention is paid to the people at home. Some Members say we pay too much attention to it. I am of the opinion that we do not pay quite enough attention to what the people at home think and say on important legislative matters. Although I am opposed to this resolution, I have always been in favor of the four-year term for Members of the House. I have an idea that if Congress could be elected with the President, serving for four years, it would add to party responsibility and fix it conclusively. The people would then say to the President, "Here is the ship of state; here is your chart, the platform on which you were elected. Here is your crew composed of the Congress, and there will be no mutiny at the end of half the journey, but the crew will serve for the full period of your term. If you come back to port with a good record we will consider it, and maybe return you; and if you do not we will get a new captain of the ship and a new crew."

However, I am rather of the opinion that the wisdom of the fathers is manifest in the various clauses of the Constitution, and while it has been suggested that because of difficulties of transportation and the time that must elapse they provided for 13 months' gap between the time of the election of the Representative and his beginning of service, it seems to me that in their wisdom they looked further than that; they knew that new cults would develop, that new propositions would be advanced, and as the result of some hysterical disturbance there might be elected a minority of considerable strength, sent to Washington determined to destroy conservative policies, and they said it would not be a bad idea to let them sit at home on the cracker barrel at the old corner grocery store and cool their heels for awhile; and it might be that even the people who voted for them would change their minds as to the wisdom of the policies they had supported in the heat of a campaign. [Laughter.]

The people, as a matter of fact, rather balk at such tinkering as we have done to the Constitution—it has not met with universal approbation by all the people of the United States. Some people think that we are posing as a perpetual Santa Claus, trying to decorate the Constitution with new amendments as if it were a Christmas tree. The folks at home think we might

better devote our time to the consideration of such important matters as tax reduction, flood relief, and farm relief.

Mr. SCHAFER. Will the gentleman yield?

Mr. CROWTHER. Yes.

Mr. SCHAFER. If we have got too long a Constitution, would the gentleman favor a repeal of the eighteenth amendment?

Mr. CROWTHER. No, sir; I am not in favor of that; the gentleman can offer an amendment of that kind if he chooses, but he will not get very far with it. The eighteenth amendment is there to stay. I believe that if the people could send a message to this Congress to-morrow by radio, telegraph, telephone, or any other means from the 48 sovereign States in the Union they would say to their Representatives, "Let the Constitution alone." [Applause.]

Several Members rose and addressed the Chair.

The CHAIRMAN. The Chair will state that debate on this amendment has long since expired. Gentlemen who desire to discuss propositions generally in reference to the proposed amendment can do it on other amendments.

Mr. LAGUARDIA. But, Mr. Chairman, I desire to speak in opposition to the amendment offered by the gentleman from Illinois, and I move to strike out the last four words of his amendment.

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. LAGUARDIA. Mr. Chairman, let us pause and consider what is before the committee. The gentleman from Illinois [Mr. CHINDBLOM] offers an amendment which is now pending, and we will vote on it in a few moments, to strike out the entire paragraph. The gentleman from Illinois has served notice that if that amendment prevails he will offer another amendment striking out section 2.

Now, gentlemen, this amendment, as the gentleman himself says, goes to the very heart of the resolution—I will put it in rough, military parlance and say that it is the very guts of the resolution. If you take out the first section you have nothing left before you. So it is necessary that we do not precipitate this vote before Members know exactly what is before them.

We have been talking about the lame-duck constitutional amendment for the past 15 years. It has been before every Congress during that time. There is not a Member who spoke on the pending resolution who heretofore has not admitted publicly the desirability of advancing the date of the first sessions of Congress.

I concede, of course, that every Member has a right to stand up and vote as his conscience dictates, but I submit that we have a right to have our day in court and have a record vote on this proposition. Should the present amendment carry by default let us say, I mean by Members failing to realize its importance, that would be an end to the resolution itself, and a final vote in the House with the section stricken out would be a useless gesture.

I submit it is manfestly unfair for any Member who is opposed to the resolution itself to seek to avoid responsibility of a record vote on the resolution itself by voting for this amendment in the committee.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. CHINDBLOM. The gentleman has not altogether stated my position. I have moved to strike out section 1, and not the preceding preamble, with notice that if that motion is agreed to I shall move to strike out sections 2 and 5. I propose to leave sections 3 and 4, which I think ought to be enacted.

Mr. LAGUARDIA. I have so stated, but the gentleman will admit that if his amendment prevails this so-called changing of the time of the meeting of Congress is gone, and he will also admit that if his amendment prevails in the Committee of the Whole, we can not get a record vote upon it in the House. I say that gentlemen ought not to seek to avoid the responsibility of a record vote by voting for this amendment.

Mr. CHINDBLOM. Of course, you can get a record vote in the House. This is a motion to strike out.

Mr. LAGUARDIA. Oh, no. Only a motion to recommit.

Mr. CHINDBLOM. You can get a vote upon the direct question of striking out sections 1, 2, and 5.

Mr. GARRETT of Tennessee. But this whole proposition here is an amendment to a Senate resolution.

Mr. CHINDBLOM. But it is a question of the construction of the rule.

Mr. LAGUARDIA. If this discussion is to be taken out of my time, I decline to yield further. There can be no vote on the amendment in the House under the present parliamentary situation of the Senate resolution as it is amended. In closing, I simply ask the membership of the House to inspect and examine the arguments that have been urged against this resolution. There is no one who has spoken against this resolution who will not have to explain and apologize for his argument from to-day on during the rest of his life. There has been no real sound, logical argument presented. The matter of the climate, the schooling of children, the danger of a long session, and all such arguments are too frivolous to urge against a constitutional change that the whole country is demanding. Every fear that has been expressed is a fear against parliamentary government. Every danger that has been imagined is a danger that opponents of parliamentary and representative government argue against our form of government. The distinguished chairman of the Committee on Appropriations states that two short sessions are better than two long sessions. The gentleman from Illinois contends that Congress will spend less money in short sessions than it would in long sessions. Surely, he can not be serious in that. A spendthrift Congress or an extravagant Congress will spend as much money in a short session as it will in a long session. Of course, there are people who will say that no Congress at all would be better; but I am sure the gentleman from Illinois would not want to put himself in the company of such men, who are fundamentally opposed to representative and democratic form of government. If we believe in our form of government, if we believe in our Constitution, if we trust and are sincere in our belief in government by the people through their elected and chosen Representatives, then we need have no fears in adopting this resolution. If we believe that a Congress elected by the people can be trusted if it takes its seat 13 months after election, we can surely trust the same Congress elected by the same people in the same manner that takes its seat 2 months after election. That is all there is to this resolution. The amendment offered by the gentleman from Illinois would be voted down in order to bring the resolution itself to a final record vote. I close by saying again that the people of the country are demanding this constitutional amendment, and Congress should respond to that demand by adopting the resolution and submitting the question in the 48 States for their decision.

The CHAIRMAN. The time of the gentleman from New York has expired. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

SEC. 2. The Congress shall assemble at least once in every year. In each odd-numbered year such meeting shall be on the 4th day of January unless they shall by law appoint a different day. In each even-numbered year such meeting shall be on the 4th day of January, and the session shall not continue after noon on the 4th day of May.

Mr. JEFFERS. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. JEFFERS: Page 3, line 8, strike out all of section 2 after the words "Sec. 2" and insert in lieu thereof the following:

"The Congress shall assemble at least once in every year, and such meeting shall be on the 4th day of January unless they shall by law appoint a different day."

Mr. JEFFERS. Mr. Chairman, I am sure all Members very clearly understand this proposed amendment. When this resolution has been reported to the House in previous years it has contained the exact language as my amendment, and if the Members will now turn to page 21 of this report they will find the language there about the middle of the page. It provides that each year Congress shall meet on the 4th day of January, and it does not provide one plan for odd-numbered years and another plan for the even-numbered years. The plan as proposed in section 2 of the resolution as it has come out from the committee this time is complicated in that it does propose one plan for the odd-numbered years and another plan for the even-numbered years, and it also places a hard-and-fast limitation on the length of the session for the odd-numbered years.

Mr. NEWTON. Mr. Chairman, will the gentleman yield?

Mr. JEFFERS. Yes; surely.

Mr. NEWTON. Is the gentleman's amendment in accordance with the language of the Constitution?

Mr. JEFFERS. Yes; exactly. If Members will turn to page 22 of the report, they will find an appendix which contains the existing provisions of the Constitution; and on page 23 will be found the language of the Constitution:

The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Now, in my amendment the 4th day of January is designated instead of the first Monday in January or the first Tuesday in January, or the second Monday or Tuesday, as suggested by some Members.

We have named the 4th day specifically, for the reason that if we say the first Monday or the first Tuesday it might fall before the 4th day and, of course, that would be before the day when the new Congress would become effective under this proposed change of the Constitution. Therefore we must not name a day which would be prior to the 4th day. Obviously, we could not have it the first Monday or the first Tuesday. And if we should make it the second Monday or the second Tuesday, of course that would fall after the 4th day all right, the date when the new Congress comes into existence, but it might be as late in the month as the 14th, and that would cut down the time to only 10 days before the 24th day, when the President is to be inaugurated, and that would be entirely too short to be safe. Therefore, it is thought best to make it on the very day that the new Congress comes into existence, namely, the 4th day of January.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. JEFFERS. Yes; I yield to my friend.

Mr. BURTNESS. I am in thorough accord with the gentleman's viewpoint. I am wondering why it would not be better to adopt section 2 of the Senate resolution just as it is, changing it merely from the 2d day of January to the 4th day of January, and then it would provide for the meeting at noon on the 4th day of January. If the gentleman's amendment should then be adopted, there would be no disagreement between the two Houses at all upon that particular section.

Mr. JEFFERS. That was considered, I will say, and personally I would have no objection to that wording. The reason the amendment is worded as it is proposed is that it should follow the language of the Constitution as we find it. I had regard for the language found in the fundamental law, and kept close to that.

Mr. BURTNESS. Of course, it is simply a matter of custom that the Congress meets at noon now.

Mr. JEFFERS. I understand that.

Mr. BURTNESS. The provision in the Norris amendment makes it specific.

Mr. JEFFERS. It does, I admit. As I say, personally I would have no real objection to that language, but after due consideration and after conferring with older Members than I am I thought it best and most appropriate to follow the language of the present fundamental law, the Constitution of the United States.

Mr. LAGUARDIA. In other words, the gentleman is friendly to the resolution, and his amendment carries out the idea entirely of abolishing the "lame-duck" session.

Mr. JEFFERS. Absolutely; and I am for that. We can readily see that while the President of the United States might agree to call the Congress back into session on the 5th day of May when necessary, he might not, and thus Congress would be shackled, so far as its meeting is concerned, during its odd-year session unless we remove this limitation, and it is the duty of the Congress to say as to how long its sessions shall be held in order to attend to the business of the Nation.

I now yield to the gentleman from Nebraska.

Mr. SHALLENBERGER. The question I was going to ask the gentleman is largely contained in the question propounded by the gentleman from North Dakota, and that is that your amendment is in conformity with the previous resolution as heretofore reported to the House?

Mr. JEFFERS. Yes, Governor; it is.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. JEFFERS. Mr. Chairman, may I have two minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. SHALLENBERGER. This amendment of yours is in line with the proposals that we have had on this subject before?

Mr. JEFFERS. Yes; certainly.

Mr. SHALLENBERGER. The language in the bill as reported is new language rather than yours?

Mr. JEFFERS. Yes; I am following the language of the Constitution.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield there?

Mr. JEFFERS. Certainly.

Mr. MOORE of Virginia. As a matter of detail, supposing that the 4th of January should fall on Sunday. The Constitutional Convention in naming the only date involved in this subject, as contained in the original instrument, designated the first Monday of December?

Mr. JEFFERS. Yes, sir.

Mr. MOORE of Virginia. That is a matter worthy of consideration.

Mr. JEFFERS. Yes. As I say, you could not designate the first Monday because the new Congress does not come into existence until the 4th day, so if you name a Monday or Tuesday you could not name it before the second Monday or Tuesday, and that might be too close to the 24th day of January, thus further reducing the time before the 24th of January, which, in my judgment, is none too long as it is.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. JEFFERS. Mr. Chairman, I ask for a couple more minutes, if I may secure unanimous consent for that small extension of time.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to proceed for two minutes more. Is there objection?

Mr. LINTHICUM. Mr. Chairman, I ask that he may proceed for three minutes. I want to ask him a question.

Mr. JEFFERS. Two minutes will be enough; thanks so much. I will be glad to yield to the gentleman.

The CHAIRMAN. Is there objection to the request of the gentleman?

There was no objection.

Mr. LINTHICUM. I want to ask the gentleman a question as to the language on page 3, line 14, "after noon on the 4th day of May." Why should we not provide for the termination of the session of Congress by saying "unless otherwise provided by the Congress"?

Mr. JEFFERS. I hardly think that would be necessary, if we just remove that arbitrary date for the adjourning of Congress.

Mr. LINTHICUM. The gentleman said something about the President calling a session.

Mr. JEFFERS. This amendment leaves it to the discretion of Congress itself as to when its session shall come to a close; and, of course, that is as it should be.

Mr. LOZIER. Mr. Chairman, will the gentleman yield?

Mr. JEFFERS. Yes; I yield to my colleague.

Mr. LOZIER. The language in the gentleman's amendment is the language agreed upon by the committee at the last three sessions of Congress, and it was only recently changed, practically overnight, as the result of some pressure that was brought to bear.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. JEFFERS. Yes; gladly.

Mr. BURTNESS. Was consideration given by the committee in the hearings on this proposition as to this limitation to the 4th day of May? Was that matter discussed at length in the hearings, pro and con?

Mr. JEFFERS. I will say to the gentleman that it is my opinion that the matter was really not discussed as fully as other provisions in the resolution. I do not know exactly to what extent it was considered in committee, but I am of the opinion that it was not as much discussed as other matters.

Mr. BURTNESS. But it was discussed?

Mr. JEFFERS. It was; at least to some extent.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. GARRETT of Tennessee. Mr. Chairman, I think it is desirable to have the parliamentary situation cleared up, and for that purpose I desire to submit an inquiry. First, let it be suggested that the special order under which the House is proceeding in the consideration of this resolution provides that for purposes of amendment the House resolution shall be read as if it were original. I do not know whether that is the exact language of it, but that is the meaning of it. Now, my inquiry is this, Mr. Chairman: After the committee amendment shall have been read and perfected, will not the question then be on the substitution of the committee amendment as amended for the Senate resolution?

The CHAIRMAN. In committee?

Mr. GARRETT of Tennessee. Yes; in committee.

The CHAIRMAN. The language of the resolution is as follows; that is, with respect to the question raised by the gentleman from Tennessee:

> For the purpose of amendment the House committee substitute shall be considered as an original bill.
>
> After general debate and when the resolution is being read for amendment, pursuant to this direction, we are reading the committee substitute, which is being amended. Then the resolution continues:
>
> At the conclusion of the reading of the Senate Joint Resolution for amendment the committee shall rise and report the Senate resolution to the House with such amendments as may have been adopted.

The gentleman in charge of the resolution will move, presumably, that the committee rise and report back the Senate

joint resolution with an amendment, with the recommendation that the amendment be agreed to and that the resolution as amended do pass; whereupon the Chairman of the Committee of the Whole House on the state of the Union will report back to the Speaker in the chair the original joint resolution as messaged over by the Senate and reported out by the committee, together with a committee amendment, the committee substitute, with the recommendation of the committee. After the reading of the committee substitute for amendment and at the conclusion of the consideration of the amendment offered to it, there will be no other action necessary to be taken in committee but the motion to rise.

Mr. GARRETT of Tennessee. And in that situation there of course can be, so far as amendments are concerned, only one separate vote in the House?

The CHAIRMAN. That is a question which the Chairman of the Committee of the Whole is not at liberty to rule upon. It is a question that may arise in the House.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. CHINDBLOM. I said a moment ago in a colloquy that I thought there would be a separate vote on such amendments as might be adopted by the Committee of the Whole. At that moment I misapprehended the purport of the rule, and I now want to join in the opinion of those who contend that the vote shall be on the substitute with such amendments as may be adopted by the Committee of the Whole.

Mr. BURTNESS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BURTNESS. As I understand the rule, if I interpret it correctly, there will be an opportunity of voting in the Committee of the Whole, at any rate, upon the question as to whether the amendment reported to the House in the manner in which it is perfected—there will be opportunity of voting on the substitution of that amendment so perfected for the original Senate or Norris resolution?

The CHAIRMAN. The substitution occurs automatically.

Mr. BURTNESS. It occurs automatically?

The CHAIRMAN. Yes.

Mr. BLACK of Texas. Mr. Chairman, I have an amendment to offer.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLACK of Texas: Page 3, line 9, after the word "each," strike out the words "odd numbered," and in line 11, after the word "day," strike out all the language in the balance of line 11 and all of lines 12, 13, and 14.

Mr. GARRETT of Tennessee. Is that being offered as a substitute?

Mr. BLACK of Texas. No; I am offering it as a perfecting amendment to section 2 as now written in the resolution. If my amendment were adopted, section 2 would then read as follows:

The Congress shall assemble at least once in every year. In each year such meeting shall be on the 4th day of January unless they shall by law appoint a different day.

Now, Mr. Chairman, the amendment offered by the gentleman from Alabama [Mr. JEFFERS] is to strike out section 2 and substitute the following language:

The Congress shall assemble at least once in every year and such meeting shall be on the 4th day of January unless they shall by law appoint a different day.

On examination of his amendment I find it is just the same as mine in substance and almost identical in language, and therefore at the conclusion of my remarks I shall ask to withdraw the amendment I have offered and vote upon his substitute.

Mr. Chairman, I am opposed to the short session that would be inevitable if section 2 were adopted as it now stands in the bill. It would give credence to the attacks that are made upon Congress by many of its critics that the less Congress is in session the better. The House of Representatives, as I view it, is to the American people very much the same as the British House of Commons is to the British people. It is the popular branch of government. In using that word "popular," I do not mean to say that we excel in popularity, because, on the contrary, there are times when the people would rather throw a brick at us than praise us, but when I use the word "popular" I mean that every two years we are elected by the direct vote of the people and on that account we more nearly represent the current thought of the people upon public questions than any other department of the Government.

It is one of the favorite indoor sports of certain newspaper feature writers and alleged comedians to take a fling at the House of Representatives at every convenient opportunity, and say that the less we meet and the less number of days we sit the better it is for the country. Now, Mr. Chairman, I do not intend to enter upon any eulogy of the House of Representatives, but I will say that if the most of these critics and if the most of these alleged comedians who fling their alleged jokes at the House of Representatives were to offer themselves as candidates before the people very few of them would get enough votes to count, but their excuse would be that the people did not have sense enough to choose the best man for the office. Well, I will admit that the people do make mistakes in selecting their Members of Congress, just as they make mistakes in selecting their other public officials; but I will say this: That if the people elect a dishonest man or an incompetent man, they soon find it out and retire him to private life. The most of the men who have had long service in the House of Representatives have been men of industry, men of ability, and they have been men of honesty and courage.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLACK of Texas. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for three additional minutes. Is there objection?

There was no objection.

Mr. BLACK of Texas. They have been men such as Henry Clay, John C. Calhoun, Daniel Webster, Samuel J. Randall, Charles R. Crisp, Thomas B. Reed, David B. Culberson, Champ Clark, Joseph G. Cannon, James R. Mann, Claude Kitchin, and many others whom I might mention.

James G. Blaine, who was himself a distinguished Member of the House, said in his eulogy upon President Garfield, who had also served in the House with honor and distinction, that there is no test of a man's ability in any department of public life more severe than service in the House of Representatives. There is no place where so little deference is paid to reputation previously acquired or to eminence won outside. There is no place where so little consideration is shown for the feelings and failures of beginners. What a man gains in the House of Representatives he gains by sheer force of his own character, and if he loses and falls back, he must expect no mercy and will receive no sympathy. It is a field in which the survival of the strongest is the recognized rule and where no pretense can survive and where no glamour can mislead. The real man is discovered, his worth is impartially weighed, and his rank in the House is irrevocably decided.

Let me say again that I am not here to enter upon any extravagant eulogy of the House.

But I do say that it can be trusted to transact the public business and should not be hampered by the restrictions in section 2 as it now stands. If the amendment of the gentleman from Alabama [Mr. JEFFERS] is adopted, I shall then vote in favor of submitting the amendment.

The best thing that can be said of the House of Representatives is that it is representative of the great American people which elects it.

I can pay it no higher tribute. On great occasions I have seen it rise greatly to the occasion and have heard debate which would have done credit to any parliamentary body in the world. On other occasions when it was jogging along on such dry subjects as appropriation bills I have seen it about as uninteresting a body as anyone would find in the world.

Because it represents so many sides of character, strong and weak, exalted and commonplace, the House has won and retains the confidence of the masses—with all its faults, I am happy to believe that our representative form of government is the best in the world.

For, as Mr. Lincoln said:

A majority held in restraint by constitutional checks and limitations, but always changing easily with deliberate changes of popular opinion and sentiment, is the only true sovereign of the people. Whoever rejects it does of necessity fly to anarchy or to despotism.

Mr. BLACK of Texas. Mr. Chairman, I ask unanimous consent to withdraw the amendment I have offered.

The CHAIRMAN. Without objection, the amendment offered by the gentleman from Texas will be withdrawn.

There was no objection.

Mr. VINSON of Kentucky. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, ladies and gentlemen of the committee, we are approaching the conclusion of the consideration of Senate Joint

Resolution 47, proposing an amendment to the Constitution of the United States. There have been two days of debate. The arguments have been presented and soon it will be known whether the Seventieth Congress will submit to the States for ratification an amendment which many believe is in step with progress.

It is admitted beyond contravention that this amendment deals with the mechanics of the legislative branch of our body. The proponents of the resolution are motivated with the desire to oil the legislative machinery so that it would function more efficiently. However, in the consideration of this measure one marvels at the smoothness with which the majority machine has functioned in its effort to defeat this resolution. Upon Tuesday, with a whole day of debate, I think there were some 10 minutes devoted to opposition to the resolution itself. It came from the gentleman from Connecticut [Mr. MERRITT], who, I take it, from his remarks, would probably oppose any constitutional amendment. There was some discussion about proposed amendments, but there was no effort made to oppose the resolution. Yesterday we had splendid gentlemen voicing objection for one reason or another, some not satisfied with the manner in which the "i" is dotted and the "t" crossed. Then we see the operators of the administration machine, a smooth-functioning Juggernaut, step into the breach, and I am fearful that the march of progress will be temporarily impeded because of the power which they exercise.

Last night I wondered what caused the consideration of this measure. For years a resolution of like import had passed the Senate, and the House substitute has been many times reported by this committee. The thought occurred to me that the administration dared to bring this resolution to the floor of the House, mayhap because of the situation which confronted them in another body prior to its organization. Then it occurred to me that this resolution certainly could not be a dangerous thing else my good Republican friends would not have used it perhaps in part consideration for organization control of another body.

There has been no one, as I recall, who takes issue with the provisions of sections 3 and 4 as far as they go. The gentleman from California [Mr. LEA] would go further, and I am inclined to support his amendment.

In my mind there are two things which result in such a resolution being considered by the Representatives of the people. First, the anomalous situation which obtained in a new Member, who will not, under ordinary conditions, be sworn in and permitted to voice the sentiments of his constituency until 13 months have elapsed since his election. Not only must a new Member wait until more than one-half his term expires before he can express the wishes of his constituency in the Congress but that same condition applies to older Members excepting his service in the short session. I submit that the people are capable of self-government; that the people are capable of knowing what they want when they elect a man to Congress; that the people have the right to give expression to their needs and their desires within a reasonable time after they have spoken at the polls.

My friends, when you talk about the "cooling off" period, I submit that you are casting a doubt upon the power of the people to govern themselves. I do not impugn the motives of any gentleman who has voiced such sentiment, but, to my mind, he is voicing the same philosophy of the able gentleman, in the Constitutional Convention, headed by Hamilton, who opposed our present representative form of government.

A "cooling off" period. My friends, the people who elect us to Congress are not overwrought with excitement or passion; are they? It may be that a candidate may have become exercised in the campaign, but as a practical matter this House knows that by the experience of the past, the turnover is small, and, furthermore, that the new membership would not, if they could, and could not, if they would, revolutionize the workings of Congress. The people desire legislative service from their Members in Congress. They are entitled to receive it. It is anachronism for a Member to mark time for 13 months before the legislative machine, of which he is a part, begins to function.

It is amusing, were it not of such serious portent, to hear distinguished gentlemen lament the fact that if this resolution were to be ratified and become organic law that the Congress of the United States might not have anything to do between January 4, the beginning of the term of the Representative, and January 24, the beginning of the term of the President. In the first place, this time will be occupied in the organization of the House and the election of the President. But if it were not, and assume for the sake of the argument that nothing was to be done between these dates, we would see a clear loss of 20 days. And yet the gentlemen who stress the loss of time—20 days—for 435 Members of the House, are perfectly willing to see that same membership stand idly by from the date of their election until December of the following year, a period of 13 months. I am fearful that some of the gentlemen may have in mind that they would be expected to spend this 20 days, part of which might or might not be working days for them, in their office in Washington rather than the 13 months which otherwise they might spend at home.

The second thing that brings this resolution to us is the wide-spread opposition to the short session of Congress. This agitation is based upon two grounds: First, that the Members who have been defeated or who did not stand for reelection in the election next preceding its convening should not legislate, in possible contravention of the will of their district, however expressed. The gist of most of the arguments favoring the lame duck, as I gather it, is that a lame duck, because of his experience, his proven integrity, and so forth, is a better legislator than the new Member who either displaced or replaces him; or, as one of my good Kentucky friends, who is opposing this resolution, expresses it, whether a lame duck will do more harm than a wild duck. This sort of statement is very plausible. It listens well.

I do not decry or belittle legislative experience. I know full well, from my own experience, that the new Member has much to learn, but I do not think of him as less patriotic, less honest, possessed of less integrity, than the gentleman whom he succeeds. I submit that it is an unsound argument, and an indictment against our representative form of government, to assert that the lame duck should legislate for his district subsequent to the time his constituents have selected another to express their will.

The second aspect of the short session which does not meet the approbation of the people is the power to defeat legislation by the exercise of the filibuster. I would not deprive gentlemen in the other body of their power of speech, but I would not overlook the rights of other Members of that body, always keeping in mind the rights of the people who sent them there. The argument is proposed that a longer session is given in the pending resolution than in the present law. I do think that that is a valid argument in favor of the limitation of the second term by constitutional provision. The short session is limited because of the expiration of the term. So, I will support the amendment to exclude from section 2 the limitation of its term to May 4. I do not feel capable of pulling aside the curtains of time and ascertaining the needs of a great growing Nation in the days to come in respect of the time which it will need for legislating in the presidential years. I do not feel that the political need of a Member should control in the enactment of the constitutional amendment. I feel that if the legislative needs of the country should demand that part or all of the eight months of a Member's term which follows the arbitrary date proposed in this resolution, to wit, May 4, might be utilized in legislative deliberation without requiring the presidential urge. [Applause.]

Mr. SIMMONS. Mr. Chairman, I move to amend the amendment of the gentleman from Alabama by striking out "the fourth day of" and inserting "the second Monday of."

The CHAIRMAN (Mr. TREADWAY). The gentleman from Nebraska offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SIMMONS to the amendment offered by Mr. JEFFERS: Strike out the language "the fourth day of" and insert in lieu thereof "the second Monday of."

Mr. SIMMONS. Mr. Chairman and gentlemen, I have not spoken on this amendment heretofore, preferring to listen to men who have had a longer period of service in this House and likewise men of greater experience than mine. I have been disappointed in some of the arguments that have come from men learned in the Constitution who have objected to this change on the ground there is opposition in the country to it, leaving the impression that so far in our constitutional history there has been no opposition to anything that was in it originally or has been placed in it by amendment.

I call your attention only to that great work of Beveridge's on the Life of Marshall, where he sets out the difficulty had in America in adopting the original Constitution, and likewise if you follow through the history of the 19 amendments that each one of them has met its opposition along the way. There are always those opposed to progress. We ought not to fear a step forward on the ground that somebody in the United States might be opposed to what we are doing. This is the statement that is always made when there are proposals to take a progressive step forward—that somebody might not want it done. It is right to go ahead, and we should do that which is right.

Now, about the amendment I have offered, it makes no fundamental difference whether the wording of Mr. JEFFERS's amend-

ment or mine is adopted. The thing I believe essential now is the adoption of the proposal making the second session a session unlimited in time. The change offered by the amendment of the gentleman from Alabama [Mr. JEFFERS] carries out the real intent and purpose of this amendment as it comes to us from the Senate, and that is that we make the Congress more responsive to the will of the American people. That is the proposal. It should be done.

As the proposed amendment comes to us from the committee, the Congress is required to ask the American people to prevent Congress acting in their behalf; in other words, cutting out the power the Congress should have and that the American people have the right to demand the Congress have, to wit, the power to control its own actions. Put this committee proposal in the Constitution and you have taken from the American Congress the right to control its own actions and given that power to the President. Put in the amendment offered by the gentleman from Alabama [Mr. JEFFERS] and you are leaving the control of sessions of the Congress in the hands of Congress and not in the hands of the President, and you are making the Congress likewise more responsive to the expressed will of the American people. In my judgment, a vote against this amendment is a vote against the intention and the purpose of the whole resolution. A vote for the amendment of Mr. JEFFERS, or if you prefer to have the Congress meeting on Monday instead of possibly on a Sunday, a vote for the amendment as I have offered it is a vote to carry out the purposes of the amendment as sent to us by the Senate.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. SIMMONS. I yield.

Mr. JOHNSON of Texas. As I understand it, the gentleman's amendment offered to the amendment of the gentleman from Alabama [Mr. JEFFERS] simply does this. The Jeffers amendment fixes the date of the convening of Congress on the 4th day of January, whereas the gentleman's amendment would place it on the second Monday in January.

Mr. SIMMONS. Yes, sir.

Mr. JOHNSON of Texas. I think the gentleman's amendment in that respect is preferable to that of the gentleman from Alabama.

Mr. JEFFERS. Will the gentleman yield?

Mr. SIMMONS. Yes, sir.

Mr. JEFFERS. I would like to have the attention also of the gentleman from Texas [Mr. JOHNSON]. If you put it on the second Monday, you may have it coming as late as the 13th or 14th of the month, thereby cutting down the time between that date and the 24th to only 10 days.

Mr. JOHNSON of Texas. Let me answer that. It could meet not earlier than the 8th day of January nor later than the 14th day of January.

Mr. JEFFERS. The second Monday might be as late as the 14th and then would be only 10 days prior to the 24th, which is not enough time.

Mr. SIMMONS. One minute. Let me have a little of my own time.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. SIMMONS. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. SUMNERS of Texas and Mr. JOHNSON of Texas rose.

Mr. SIMMONS. I yield first to the gentleman from Texas [Mr. SUMNERS].

Mr. SUMNERS of Texas. I would like to suggest to my friend that in so far as the date mentioned in the resolution is concerned, that date does not become fixed in the Constitution. It only has reference to the first meeting so far as the constitutional power is concerned, because the Congress has the legal power under the Constitution to change the date if it sees fit to do it. Do I make myself clear?

Mr. SIMMONS. Which date?

Mr. SUMNERS of Texas. The Constitution now provides that Congress shall meet on the 1st day of December unless the Congress shall determine otherwise.

Mr. SIMMONS. Yes, sir.

Mr. SUMNERS of Texas. The amendment offered by the gentleman from Alabama provides that it shall meet on the 4th day of January unless the Congress shall determine otherwise.

Mr. SIMMONS. Yes, sir.

The amendment I have offered prevents a forced meeting on Sunday. The vital issue is that the committee proposal requiring Congress to adjourn on May 4 be defeated and that the proposal of the gentleman from Alabama [Mr. JEFFERS] be accepted with or without my amendment. Congress may stop on the 4th of May if it wants to, but it ought not to be compelled to stop on that date.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. SIMMONS. I yield to my colleague from Nebraska.

Mr. SHALLENBERGER. I was interested in what the gentleman said about the sentiment in the country in favor of the proposed amendment. I want to read the declaration of the last Democratic Party in national convention upon this very question:

> We pledge the Democratic Party to a policy which will prevent Members of either House who fail of reelection from participating in the subsequent sessions of Congress. This can be accomplished by fixing the days for convening the Congress immediately after the biennial national election; and to this end we favor granting the right to the people of the several States to vote on proposed constitutional amendments on this subject.

So the Democratic Party is on record in favor of the amendment.

Mr. BURTNESS. Will the gentleman from Nebraska yield?

Mr. SIMMONS. I yield.

Mr. BURTNESS. I want to find out just what the gentleman's amendment does. It states the second Monday in January. That means that the meeting would be held between the 8th and the 14th; it could not come any earlier than the 8th and not later than the 14th; is that correct?

Mr. SIMMONS. That would be its effect.

Mr. BURTNESS. Does not the gentleman think that is shortening up the time a little too much?

Mr. SIMMONS. That may be true. My amendment would prevent Congress convening on Sunday, unless Congress by law fixed a date otherwise.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. STEAGALL. Mr. Chairman, I have the most profound respect for the author of the original resolution which is the foundation of the proposal now before the House. I admire and appreciate the splendid Senator from Nebraska [Mr. NORRIS], and the high purposes influencing him in offering his resolution. But whatever might be my inclination as regards the original plan proposed by the Senator from Nebraska I can not bring myself to a favorable view of the resolution as amended by the House. Under the Constitution as it now exists when there is a failure to elect a President and Vice President the duty devolves upon the House of Representatives. The question must be settled by a body elected two years in advance, a body that has been organized and functioning, a body that has settled all contests for seats, and the action of which is accepted by the country as in every sense valid and binding. In my judgment it would be dangerous to depart from this plan and to adopt a new provision which would make it possible for the question of the election of President and Vice President to be thrown into a House elected in the same election as the President and Vice President, and a body that would carry forward and necessarily be involved in all the partisian controversies of the same campaign in which the election of President and Vice President was undertaken, and with the organization of the body to be affected by the question impending.

In such a situation many difficulties in organization would arise, with a probability that no organization could be perfected between the 4th day of January, the time fixed for the assembling of Congress, and the 24th day of January, the date of the inauguration of the President and Vice President. The election would have to be held before contests in the House could be settled, and undoubtedly would engender new contests for seats that would not otherwise exist. The new plan would break down one of the checks provided by the framers of our Constitution that make for safety and stability. This is far more important than any possible advantage to be gained in the attempt to hasten changes to be desired or accomplished by reason of a shift in membership of Congress. The fact is there is generally only a very small per cent of the membership of the House and Senate retired at each election. These considerations alone lead me to entertain grave doubts of the wisdom of the original resolution as it passed the Senate.

There is a new provision in the resolution as reported by the committee of the House which I can not support. I refer to section 2, which is as follows:

> The Congress shall assemble at least once in every year. In each odd-numbered year such meeting shall be on the 4th day of January unless they shall by law appoint a different day. In each even-numbered year such meeting shall be on the 4th day of January, and the session shall not continue after noon on the 4th day of May.

This section limits the session of Congress in even-numbered years by providing that the session shall begin on the 4th day of January and end the 4th day of May. Let no man deceive himself in thought that he is following the distinguished Senator from Nebraska who offered this proposal in the Senate, or the purposes he had in mind, if a favorable vote is given the resolution with section 2 embodied. The author of the original resolution and those who agreed with him had in mind the idea of enlarging the dignity and powers of the Congress. It was their purpose to have Congress called in early session after the election and leave the length of the session in each instance to be determined by the Congress itself. The resolution before us, if section 2 is to remain as part of it, would arbitrarily terminate the session of Congress in even-numbered years so that the legislative branch of the Government could not function unless called into extraordinary session by the President. It places in the Executive the power to say whether or not the people may be permitted to exercise their voice in affairs of government through the Congress. No matter how important measures unsettled might be, nothing could be done, save to make appeal to the Chief Executive. No matter what abuses might exist, nor how much corruption might exist on the part of officers not directly responsible to the people, nothing could be done by the Congress. I am not willing and I will not vote for such a curtailment of the power and prerogatives of the legislative branch of the Government.

We are told that the welfare of the country demands that a new Congress shall convene a few days after Members are elected. Yet the proposition before us embodies the arbitrary provision that the Congress shall end on the 4th day of May unless the Chief Executive sees fit to call another session. Where is the logic in the contention that a new Congress embodies so much wisdom and patriotism a few days following the election of its Members but that the same body is not to be trusted after its Members have had the experience that comes from serving a year and a half? Section 2 contradicts the fundamental thought and purpose of the original resolution.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. STEAGALL. I ask for five minutes more.

The CHAIRMAN. Without objection, the gentleman will proceed.

Mr. STEAGALL. My friends, there is not a thoughtful person in the country who does not recognize the danger of the never-ending encroachment upon the powers of Congress by the executive branch of the Government. I say this in no partisan spirit and with no reference to any particular President or administration. I am simply stating a fact that is known on every hand. This development has gone on and on and grown with the years until it has become alarming to every student of history and to everyone who has any adequate conception of the principles and philosophy of our Government.

The right of the people to express themselves through their own chosen representatives is the crowning achievement of all the ages. This right should not be destroyed by the free people of this Republic through the adoption of a provision in our Constitution that curtails that right or subjects it to the dictation and control of the Chief Executive. If the people are to be relied upon to correct abuses in government, to hold down public expenditures, to expose and punish corruption, to enforce faithful administration of the laws, and to steer our course along lines of prudence and wisdom, they must rely upon the power reposed in them to be exercised through their chosen representatives. It is a dangerous thing to have the people led to believe that they may rely on any force save their own sound judgment voiced and made effective through the representatives selected by them to give expression to their will. Statesmen should endeavor to protect and preserve the right of the people to control their government by direct action. Let the people be taught to trust their own awakened consciences and that their judgment when expressed freely and with due deliberation is the controlling force in our national life. But in carrying out this policy it is not necessary that anything shall be done in haste. The important thing is that legislation shall be worked out with proper caution and care. I am not so much concerned that legislation shall be accomplished quickly as I am that it shall be done wisely and well and that our actions shall rest upon mature deliberation. I see no reason for haste to have Congress legislate the morning of the next day after an election. I am willing to wait at least until the afternoon of the next day instead of trying to do it before breakfast! [Applause.]

Mr. GIFFORD. Mr. Chairman, I move that all debate upon this section and all amendments thereto close in 20 minutes.

Mr. GARRETT of Tennessee. Mr. Chairman, if the gentleman will yield for a moment, no one has been heard except those who are favorable to the amendment pending. Of course, if any gentlemen are going to defend the committee provision, they would be entitled to all of the time suggested. I am personally very anxious to have five minutes at this time in favor of the amendment.

Mr. MAPES. Mr. Chairman, I have an amendment to offer to the amendment of the gentleman from Nebraska, and I desire five minutes on that.

Mr. GIFFORD. Mr. Chairman, I ask to modify my motion, and I move that all debate upon this section and all amendments thereto close in 30 minutes.

Mr. MAPES. And how is that time to be divided?

The CHAIRMAN. Under the rule it is in the control of the Chair. The question is on the motion of the gentleman from Massachusetts to close debate upon this section and all amendments thereto in 30 minutes.

The motion was agreed to.

Mr. MAPES. Mr. Chairman, I offer an amendment in the nature of a substitute to the amendment of the gentleman from Nebraska, providing that the Congress shall meet on the first Monday after the 4th day of January.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MAPES as a substitute for the amendment offered by Mr. SIMMONS to the amendment of Mr. JEFFERS: In the Jeffers amendment, before the word "fourth," insert "the first Monday after."

Mr. MAPES. Mr. Chairman, I am in favor of the pending resolution in general but I favor the motion of the gentleman from Alabama [Mr. JEFFERS] to strike out the provision limiting the second session of the Congress. It seems to me that the time of adjournment may well be left to the judgment of the Congress in the years to come to be guided as the circumstances and conditions exist at the time. I think, however, that his amendment should be amended so that the Congress will not be required to convene on Sunday.

As everyone knows, the first day of the first session of a Congress is more in the nature of a reunion of Members than anything else; and I think it would grate upon the finer sensibilities of a great many people in the Nation for us to begin a session of Congress on Sunday.

The amendment which I have proposed would make Monday the first day of the session, the same as now, and the Monday after the 4th day of January when the terms of Members begin—that is, on the very first Monday it is possible for the Congress to convene after the terms of the Members begin under the resolution. The objection has been raised that that would put off the meeting for a few days in some years, and might make it difficult in cases of emergency to provide for the election of the President; but I think we can depend upon the practical common sense of Congress to take care of that situation if it should arise.

While I am on my feet I want to say a word in favor of the resolution itself.

In defending the so-called lame-duck session of Congress and advancing that as an argument against this resolution, it seems to me that the emphasis is being put in the wrong place. One can agree with almost everything that has been said in defense or commendation of the so-called lame-duck Congress and still favor this resolution. The two positions are not necessarily inconsistent. Nearly everyone agrees that it is something of an absurdity for Congress not to convene until 13 months after the election of its Members, as is the case now under normal conditions. At least that is an unnatural condition as compared with our State and municipal governments. To remedy that situation this amendment is proposed, and a necessary incident of the convening of the new Congress in January is the abolition of the so-called lame-duck session.

To me it is no convincing argument against this proposal that some one does not like some of the recent amendments to the Constitution and thinks that they should not have been adopted. Neither can one's reverence and devotion to the Constitution be measured by his attitude on this proposed amendment. Those who fear frequent and radical changes to the Constitution seem to overlook our history. The attitude of the American people toward the Constitution for the 140 years since its adoption will have to be changed, radically and materially, before anyone is justified in getting alarmed over its frequent amendment. The fact that the fathers provided a means for its amendment is an indication that they had no thought that they had said the last word in government in the drafting of it. This resolution proposes an orderly and constitutional way of amendment. I believe that its adoption will have a tendency to improve our procedure of government, and I shall therefore support it. [Applause.]

Mr. GARRETT of Tennessee. Mr. Chairman and gentlemen of the House, I desire, in the first place, to direct the attention of gentlemen to the importance of this vote in the Committee of the Whole. Unless I am confused upon the parliamentary situation, this vote taken in the Committee of the Whole will be the only opportunity anywhere or at any time for the House to express itself on this particular question, no matter what the result of that vote may be. If an amendment shall prevail, it will become an integral part of the House proposition, and the House proposition will be substituted for the Senate resolution, and in the House, after we have left the Committee of the Whole, there will be opportunity for only two votes, and there will be no opportunity for a separate vote on any amendment that may be adopted to this House resolution here in Committee of the Whole, nor will there be an opportunity to move to recommit or take out anything that may be in the resolution as it is substituted for the Senate proposition.

Now, that much for the parliamentary situation.

Mr. Chairman, it seems to me that the House committee has taken a proposal which was relatively not of overwhelming importance, but which was sufficient to merit amendment of the Constitution, and has attached to it a principle which will do infinitely more harm if adopted than all the good that will be wrought by the original proposal. [Applause.]

While I stated in the early part of the debate on this matter my willingness and desire to support that part of this proposal which is a question of mechanics—and I use the word again because I can think of none better—I was unwilling then, and nothing has been stated in the debate which makes me willing now, to vote to lay this limitation upon the power of Congress itself to determine as to the termination of its sessions. [Applause.] And with that as an integral part of this amendment, I can not vote to submit it for ratification.

Some gentlemen have said, "Submit it and let it go to conference." Upon legislative propositions I might be willing to do that; but upon an amendment to the organic law I am unwilling to risk my vote to the determination of conferees. The principle of this matter has been asserted by many and it is not necessary for me to go into it. I could bring to your attention many illustrations of possibilities and probably many illustrations of probabilities that would render this undesirable as a matter of principle. Take, for example, the question of impeachment. Congress is called upon to exercise this great function, and has frequently done it. With a limitation such as proposed, fixed by the Constitution itself, Congress might be helpless even in the exigency of an impeachment of the Executive himself. After May 4 of the second year the President is the only power that can bring the Congress back together under this proposition. [Applause.]

Mr. MADDEN rose.

The CHAIRMAN. The gentleman from Illinois is recognized.

Mr. MADDEN. Mr. Chairman, it is always interesting to listen to the gentleman from Tennessee. He is one of the most interesting debaters we have in the House, and one of the ablest. I should like to be able to agree with him, as I do on most things, but this is one of the things where he and I separate. He thinks that if there is no limitation to the second session of the Congress—and there would be no limit to it if this amendment is adopted—it will be beneficial to the welfare of the country. On the other hand, I think that if there is no limit it will be dangerous, and therefore I hope and pray that the amendment striking out the limit of May 4 will not prevail.

I urged yesterday that there could be no place where a greater safeguard to the Treasury could be made than in this very place that is proposed to be changed by the amendment. Anybody that has had long experience in the House knows that after the appropriation bills are enacted in any session, whether the session be long or short, there is a race to see who can get the greatest number of bills passed carrying large sums of money, irrespective of whether there is any justification for the passage of the bills or not.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. GARRETT or Tennessee. Does not the gentleman think that in writing a constitution there should be some factors to be taken into consideration besides the Treasury?

Mr. MADDEN. The Treasury is the foundation of all our success. It is the safeguard of our liberties in a large sense.

Mr. MONTAGUE. The gentleman would not suggest that the Treasury is greater than the people?

Mr. MADDEN. Of course, the Treasury is made by the people, and, of course, it can not be made greater than the people; but it seems to me that in the consideration of the protection of the Treasury we are in the largest measure protecting the interests of the people.

Who maintains the Government? Is it the people or is it not? Who maintains the integrity of the Nation in the hour of its greatest need? Is it not the people, supplied by the Treasury? Where are we running to if we leave the case wide open without any restrictions? Surely no harm can come by building a safety valve somewhere that will prevent the explosion of the boiler. Is there any reason why we ought to protect the boiler from explosion or should we leave it in its greatest menace without any safeguards whatever? Shall we say that in the wisdom of the Members of the House they can always be trusted never under any circumstances to override the mark?

Shall we say that the conservative judgment of the House is such that we never need fear any action that the House may take, or shall we say when we have this opportunity to safeguard the rights of the people that we should properly safeguard them and not leave them to the caprice of the membership of the House? Who knows what kind of a House we shall have at different times, and is there any reason why we should not protect the rights of the people when we have the opportunity? [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. SUMNERS of Texas. Mr. Chairman, I think everybody in the House loves the gentleman from Illinois, but I am afraid that if he were writing the Constitution he would provide that the Congress shall be composed of the chairman of the Appropriations Committee. [Laughter.]

Mr. MADDEN. Well, you might go further and do worse. [Laughter.]

Mr. BROWNE. Would you not add to that General Lord?

Mr. SUMNERS of Texas. Gentlemen of the committee, I believe it is understood in the discussions here with regard to the date of adjournment specified in this amendment it is not of great importance, because it fixes only the date of the first meeting after ratification, and it will be 1930 before the 4th of January comes on Sunday. Congress would have from ratification until that time to change that date by legislation if it should desire to do so. So much for that. We have heard some very remarkable statements made in connection with this consideration, in view of what has been said in behalf of the proposition to limit the last session of Congress to four months. I would like to direct attention to the fact that the Constitution originally did exactly what is proposed by this amendment, proposed in lieu of section 2, and I would like to direct attention to the fact that this body—which gentlemen seem to be afraid to give control over its time—in the Constitution was given and is now given the power to exclude the Representative of any constituency. The Republicans of this House, for instance, could have prevented at the very beginning of this Congress a single Democrat from taking a seat here—I am talking about power, constitutional power.

The two Houses of Congress can take the President out of the White House, the judges from the Supreme Court. That is the power the framers of the Constitution gave to the Houses of Congress to which gentlemen on the floor of this House are not now willing to give the right to control their own sessions. The framers of the Constitution gave to the two Houses of Congress the power to send the Nation to war, and gentlemen are afraid to give to them the control over their own time. The Constitution of the United States gives to the Congress the power to pledge the credit of the Nation in any amount, billions and billions of dollars—there is no limit—and yet gentlemen are afraid to give them control over their own time. [Applause.]

With all respect to gentlemen who are in favor of tying the hands of Congress and with all due respect to gentlemen who stand on the floor of this House and say to the country, "In our judgment, through years of experience we have reached the conclusion that the Congress of the United States must be cut off with four months in the last term, and if they are to have a longer time it is to be at the will and suggestion of the executive branch of the Government." I say that position is not justified by experience. I have nothing to say in criticism of the executive branch of the Government, but I challenge the history, not only of my Nation but of parliamentary nations throughout the ages, if in the great crises of the past, when the liberties of the people have stood in the balance, if it has not been the legislative branch that has protected them. [Applause.] I will not vote to surrender one iota of the power and the responsibility which the Constitution gave to Congress.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. TILSON. Mr. Chairman, I am opposed to this entire resolution, regardless of whether this paragraph remains as it is or is stricken out, because I think there are other dangers lurking in it that are of so serious a character that whatever

we might do to this section I should still have to vote against the entire proposition.

I do not look upon this particular amendment with the seriousness that some have. I do not believe that we rob ourselves of all power because we fix in this resolution the 4th of May as the date of adjournment of the second session. The power still remains to us to fix by statute the 5th day of May to meet again if we find that the business of the country demands it.

Mr. GARRETT of Tennessee. Oh, no.

Mr. TILSON. Yes; the session ends, but we can have another session. The power is unlimited, and the gentleman has said so himself. The gentleman from Texas [Mr. SUMNERS] has said so, and, best of all, the Constitution says so. The power to fix any date is unlimited. Therefore fixing the date on May 4 is simply fixing what in our best judgment is the date that would, on the whole, serve the public interests best.

Mr. STEVENSON. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. STEVENSON. The gentleman will remember that in 1869 a Congress, that was going to die on the 4th day of March, fixed the 4th day of March at 3 p. m. for the next Congress to meet, and it met accordingly.

Mr. TILSON. Certainly. There is nothing in this argument at all. If there is any necessity for us to meet, the Congress can fix the date of the meeting, just as the gentleman from South Carolina has indicated; but it will be a new session, of course, because the other session must end, if this provision remains in the resolution, on May 4.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. TILSON. I yield to the gentleman.

Mr. GARRETT of Tennessee. The very language of the first part of the section precludes the construction which the gentleman is placing upon it. It says, "In each odd-numbered year such meeting shall be on the 4th day of January, unless they shall by law appoint a different day."

Mr. TILSON. Yes; the language is perfectly clear.

Mr. GARRETT of Tennessee. Then, "in each even-numbered year such meeting shall be on the 4th day of January, and the session shall not continue after noon on the 4th day of May."

Mr. TILSON. Certainly, that is exactly right; but the next day another session can begin by statute. There is nothing in the language of the proposed amendment to prevent it. There is no question about it, gentlemen. There is no danger here. We have simply set a mark at May 4, saying that with the House and all its committees already organized, four months from January 4, is sufficient time to do the necessary business of the country and go home.

Many of the States have fixed a limit by constitutional amendment upon the time their legislatures may sit. My own State adopted such an amendment only a few years ago. This simply fixes a limit for the session, but another session can be called at once. Fortunately, in such a case the new session can be called by an act of Congress without a penny of expense—not even mileage—because we can fix the date to call us back here on the very next day. So there is no danger in the proposition whatsoever, and we are giving up no rights or privileges whatsoever, except that cause must be shown why more time is needed and action must be taken.

If there is no limit set, then some whose personal interests would urge them to hold Congress here until they get their precious bills passed, might hold us indefinitely into the summer, and that not for the public interest, but for selfish purposes to the detriment of the public interest.

Mr. BYRNS. Will the gentleman yield?

Mr. TILSON. I yield to the gentleman from Tennessee.

Mr. BYRNS. Would not such a law require the approval of the Executive?

Mr. TILSON. Certainly; just like any other law.

Mr. BYRNS. Suppose the President should veto the bill, then a two-thirds vote would be required to override the veto.

Mr. TILSON. He would probably be right in doing so, but the power to legislate on the subject is complete and ample, so that there is no danger whatsoever in the bugaboo which gentlemen have set up here.

Mr. SIMMONS. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. SIMMONS. Do we not at the present time in the presidential election year have an unlimited session?

Mr. TILSON. Oh, yes.

Mr. SIMMONS. What is the difference between that condition and the condition that would exist if the amendment of the gentleman from Alabama prevails?

Mr. TILSON. There is this difference. At the first session everyone knows that there is another session coming, and the bills that are not passed lie over and wait until we meet again, when they can be taken up; but the second session is the last one of the Congress, bills not passed die with the Congress, and sometimes the pressure for the passage of bills is so great that those who are urging them might insist that Congress remain in session indefinitely, perhaps, to the detriment of the public interest. [Applause.]

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

Mr. GREENWOOD. Mr. Chairman, the gentleman from Connecticut [Mr. TILSON] raises the point that the power of Congress on every second year ought to be limited by having a fixed date for its adjournment. I submit to you, gentlemen, what basis of science is there for having in one year a long session of the Congress and in the next year a short session with the volume of business of Congress constantly increasing? Why is it not just as important to have a session of Congress without limitation in one year as it is in the following year? I would divide the business up between the two sessions so that the current business could be considered without any limitation.

It would seem to me to be the scientific thing to have no limitation so that Congress can continue until the task is completed without having to depend upon a call of the Executive in order to complete its own business.

We are now engaged in the consideration of a proposed constitutional amendment to remove limitations upon the Congress so it can proceed to the consideration of the business of the Nation and the advantages that the gentleman from Connecticut speaks of are more than offset by having a barrier every second year in the pathway of Congress by which minorities knowing the barrier is there often plan a filibuster in order to defeat legislation that ought to be passed. There is no necessity of protecting the Treasury in this way, because there are checks and balances provided in the Constitution which are sufficient to protect the Treasury. We have the Bureau of the Budget, we have the Appropriations Committee of this House, we have the Appropriations Committee of the Senate, and then we have the veto of the President. These are checks and balances that are intended for the protection of the Treasury without any necessity of providing a barrier or post in the pathway of Congress to which every person who wants to defeat legislation by delays and filibusters may look in order that such legislation may be defeated. Therefore the viciousness of the filibuster or of having a fixed time or of having a post or barrier more than offsets any possible raid upon the Treasury, especially when the Constitution has provided all these checks and balances; and we have them in the second session the same as we have them in the first session.

So I favor the proposed amendment as it was passed in the Senate where it was known as the Norris amendment, without this second section, which places this barrier or limitation upon Congress. I believe our legislation should proceed untrammeled and without having to ask the President of the United States to call us into session in order to transact the legislative program every second year. The volume of business is constantly increasing, and it is essential we have this power without limitation so as to make the machinery uniform, one year with another, because the detail work is increasing every year and we ought not to have this barrier to prevent uniform action by Congress.

Mr. JEFFERS. I would like for the gentleman to stress the point that it removes the rigid limitation of May 4.

Mr. GREENWOOD. The amendment of the gentleman from Alabama provides that there be no limitation, so that each session of Congress, one with another, will be uniform and will continue until both Houses say their task is done, and they will not have to call on the Executive to reconvene them in order to complete the legislative program.

The CHAIRMAN. All debate has expired. The question is on the substitute offered by the gentleman from Michigan for the amendment of the gentleman from Nebraska to the amendment offered by the gentleman from Alabama.

Mr. MAPES. May we have the substitute read?

The CHAIRMAN. Without objection, the Clerk will report the substitute.

The Clerk read as follows:

Substitute by Mr. MAPES for the amendment of Mr. SIMMONS to the amendment of Mr. JEFFERS: Before the words "the fourth" insert the words "the first Monday after."

Mr. STEVENSON. Now let the amendment of the gentleman from Nebraska [Mr. SIMMONS] be read.

The CHAIRMAN. Without objection, the Clerk will read the amendment of the gentleman from Nebraska.

The Clerk read as follows:

Amendment by Mr. SIMMONS to the amendment offered by Mr. JEFFERS: Strike out the words "the fourth day of" and insert in lieu thereof "the second Monday of."

Mr. SIMMONS. May I ask unanimous consent, Mr. Chairman, to accept the substitute offered by the gentleman from Michigan?

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. JEFFERS. Mr. Chairman, request has been made that my amendment be reported, so that gentlemen can get it clear in their minds.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read as follows:

Amendment by Mr. JEFFERS: Page 3, line 8, strike out all of section 2 after the words "SEC. 2" and insert in lieu thereof the following: "The Congress shall assemble at least once in every year, and such meeting shall be on the 4th day of January unless they shall by law appoint a different day."

Mr. CHINDBLOM. Is that substitute in lieu of section 2?

The CHAIRMAN. The Jeffers proposition is; yes. The question is on the amendment of the gentleman from Nebraska.

Mr. MAPES. Mr. Chairman, I would like to have the Clerk read the Jeffers amendment as it will read if the proposed amendment is adopted.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. The Clerk will report the Jeffers amendment as it would read if the amendment of the gentleman from Nebraska is adopted.

Mr. MAPES. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MAPES. The Chairman uses the words "amendment of the gentleman from Nebraska." If the House understands that the substance of the amendment was introduced by myself, all right.

The CHAIRMAN. The amendment to be voted upon is the Simmons amendment as modified by his acceptance of the amendment of the gentleman from Michigan. In order to relieve matters the Chair will say that the intent and effect of the Simmons amendment as modified by the Mapes amendment is that instead of meeting on the 4th day of January it will meet the Monday after the 4th day of January. The question is on the amendment of the gentleman from Nebraska.

The question was taken; and on a division (demanded by Mr. SCHAFER) there were—38 ayes and 197 noes.

So the amendment was rejected.

The CHAIRMAN. The question now recurs on the amendment offered by the gentleman from Alabama [Mr. JEFFERS].

The question was taken; and on a division (demanded by Mr. JEFFERS) there were—151 ayes and 96 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 3. If the House of Representatives has not chosen a President, whenever the right of choice devolves upon them, before the time fixed for the beginning of his term, then the Vice President chosen for the same term shall act as President until the House of Representatives chooses a President; and the Congress may by law provide for the case where the Vice President has not been chosen before the time fixed for the beginning of his term, declaring what officer shall then act as President, and such officer shall act accordingly until the House of Representatives chooses a President, or until the Senate chooses a Vice President.

Mr. LEAVITT. Mr. Chairman, during the debate of two days, which is now becoming three days, on this resolution, I have taken no part, except to ask an occasional question, in order that the intention of some of the things proposed might become clear to myself and that I might come to a conclusion that would be satisfactory to my judgment and my conscience when acting as a Member of this House on this proposed amendment to the Constitution of the United States. I have come to a conclusion, and it is the conclusion which has been forced upon me by the logic of the facts, that this entire proposal is full of danger to the Republic and a thing which should be defeated in this House. [Applause.]

The fifth article of the present Constitution provides:

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution—

Mark the words—

whenever two-thirds of both Houses shall deem it necessary.

I contend that the entire debate in favor of this proposed amendment has so far proceeded as though this were the original convention considering a Constitution which had not yet been written, and which was trying to decide between different proposals with regard to important matters—with the question still entirely open, that we were merely trying to reach a decision for the first time. But that is not the situation. The situation is that the Constitution is now here, that it has within it certain provisions, and that we are now trying to determine whether or not, first, it is necessary to make amendments to it in certain particulars; and, second, if we decide that it is necessary, whether or not the exact proposals being advanced as amendments are in proper form to meet that need. My contention is, with regard to the first two sections of the proposal set forth, that necessity does not exist. There is no necessity for changing the present Constitution of the United States to accomplish the legitimate purposes of the first two sections of the proposal, because you will find in the Constitution itself this statement: "The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they by law shall appoint a different day."

If it is necessary, then, to shorten the time between the election and the meeting of the new Congress elected in November, it can be done now by a general statute which would call us into session, for example, on a Monday of the succeeding March. The only difference between that accomplishment and the thing being proposed as an amendment would be that we would then meet on the Monday after the fourth day in the ensuing March, instead of on the fourth day of the ensuing January. That is but a difference of two months.

A difference of only two months in bringing together the new Congress after its election is not of sufficiently vital importance to justify an amendment to the basic law of the country, the Constitution.

Again, there is this fact, that if it should be decided that such an act of Congress should be resorted to, rather than an amendment to the Constitution, by general law we could also fix the first or the second Monday of January as the time of meeting in the even years, and the same thing would be accomplished as is proposed in this amendment as it now stands with the limitation of the May 4 adjournment struck out by the action just taken by the House.

I address myself now to what I think is an even more vicious proposal in the amendment before us. It is that with regard to the election of a President and Vice President when the Electoral College has failed to choose. Too little attention has been given to that which is the vital thing in this entire matter. It is proposed that there be a change, and that it shall have to do with a change of dates, and also the method of procedure.

The CHAIRMAN. The time of the gentleman from Montana has expired.

Mr. LEAVITT. Mr. Chairman, I ask unanimous consent to proceed for five minutes more?

The CHAIRMAN. Is there objection?

Mr. GIFFORD. Mr. Chairman, I do not want to object to the gentleman having five minutes more, but I am being importuned constantly during this debate against extending the debate on the general proposition, because there are several amendments yet to be offered to particular sections, and I give notice that after the gentleman has his 10 minutes, I shall have to object to a further extension of five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEAVITT. Mr. Chairman, I am glad that the gentleman referred to the fact that there are to be still further amendments proposed, because it calls to my mind the history of this entire matter. Since it was first proposed in the Senate in the Sixty-seventh Congress it has been modified some thirty times up to now. The thing we are considering this afternoon is in many respects different from the proposals that have been before the country.

Mr. GIFFORD. Mr. Chairman, will the gentleman yield?

Mr. LEAVITT. Not now.

Mr. GIFFORD. Has it been changed here one-tenth of thirty times?

Mr. LEAVITT. In the House not, perhaps, but the House itself this afternoon has already changed the proposal of the

committee in one respect, and that according to my count would make 31. Why, when this matter was first presented in the Senate in the Sixty-seventh Congress it had to do with a resolution that the voting power of lame duck Members should be taken away from them, and since that time it has grown into the strange form which it now assumes. That was the genesis of it, and it is probably due to the fact that it was first referred in the Senate not to the Committee on the Judiciary but to the Committee on Agriculture and was there cultivated, which accounts for the strange form of its growth.

Mr. JEFFERS. I call the gentleman's attention to the fact that the language in the amendment just adopted by the committee is exactly the same language which was in the resolution reported to the House at the last session.

Mr. LEAVITT. That is true, so far as the House is concerned; it has been consistent. But to-day is the first time the House itself has ever voted on it.

Now, gentlemen, the danger involved in the present situation, regarding the succession of the President and Vice President under circumstances which have been presented here is a real danger, but that does not mean that the remedies proposed in the amendment before us are the cure for them. As has been so well pointed out by the gentleman from Virginia [Mr. MONTAGUE], the cure is worse than the present situation. Surely we are not justified in opening the doors to even greater dangers. My objection is that this proposal does that very thing.

It says in effect this—and only a matter of 20 days are allowed to work this thing out between the 4th and the 24th of January—that if the House has not arrived at the selection of a President and the Senate has arrived at the selection of a Vice President, the Vice President shall then become—what? The President? No. He shall become Acting President, to go on only until the House can agree upon a selection for President. Then that Vice President who has been acting as President would have to step down and become President of the Senate, and the man selected by the House, voting by States, would become President himself.

Think of the danger, Mr. Chairman, involved in a situation where the Executive shall be unstable and uncertain in its incumbency and its powers. That, to my mind, is a greater danger than any existing danger which it is proposed to remove by this amendment.

My time has expired and I have not the opportunity to bring to an adequate conclusion the argument which I have wished to make. I would be constructive and not critical only, and I have made a proposal which you will find printed in yesterday's RECORD as H. R. 11853. It provides for the appointment of a joint committee of the House and Senate to consider this electoral question, which is too vital to be taken up here and changed in this haphazard way. That joint committee would be composed of three Members of the House and three Members of the Senate Judiciary Committees, all lawyers; those from the House to be appointed by the Speaker, and those representing the Senate to be appointed by the Vice President. It would be their duty to take into consideration all the circumstances involved in the present electoral situation in regard to the President and Vice President, and propose to this Congress a sound amendment to meet the needs of the situation. [Applause.]

The CHAIRMAN. The time of the gentleman from Montana has expired.

Mr. SIROVICH. Mr. Chairman and ladies and gentlemen, I have listened with profound attention and interest to the distinguished lawyers on both sides handling the proposed amendment to the Constitution. I think the time has now arrived for a doctor like myself to handle the remains. [Applause and laughter.]

From my observation of the debate there seems to be considerable discontent in this House, and the discontent is not confined to either side of the Chamber, but exists on both sides.

The sentiment of this House, as I view it, can be divided into two groups—one standing for stability and order and the other fighting for progress and reform. Viewing life as I do, passing in panoramic fashion before me with all its accomplishments and achievements, I desire to arraign myself on the side of progress and reform. [Applause.]

To me, Mr. Chairman, discontent is a healthy sign. It is the principle upon which all great reforms in our Government and throughout the world have been founded from time immemorial. It was the discontent with the old method of writing books and manuscripts that led Gutenberg to invent the art of printing from movable types. It was discontent on the part of producers of cotton that led Eli Whitney to invent the cotton gin. It was discontent with the methods of transportation by sailing ships that excited Fulton to discover the principle involved in the steamboat. It was discontent that moved Stephenson to plan the locomotive, Morse to develop the electric telegraph, Bell to perfect the telephone, Ericsson to originate the battleship type symbolized in the *Monitor*, Curtiss and the Wright brothers to plan the modern airplane, while the genius of Marconi contrived the method of modern radio communication. Thus we see how discontent has made it possible for the intelligence of mankind to subjugate the forces of nature to serve the will of man. [Applause.]

Congress has always been trusted by the people. It represents the popular branch of our bicameral legislative department. It symbolizes the hopes, the ideals, and the aspirations of the founders of our country. From the splendid debate I have witnessed here for the last few days on this bill that attempts to amend the Constitution so that Members of Congress can take their seats 3 months after election instead of waiting 14 months, I am convinced that nobody need have any concern regarding the future welfare of our glorious Nation. [Applause.]

I want to assure the distinguished gentleman from Illinois, the chairman of the Committee on Appropriations, that he need have no fear or anxiety regarding our country if this amendment passes, because no matter what action this House will take the sun will continue to shine, the planets will persist in revolving in their respective orbits, the Nation will continue to prosper, while Congress marches onward and upward in the performance of its constitutional duties. [Applause.]

The previous speakers have referred to this bill as the "lame duck bill." There is another duck who should be considered. He is no other than the "fresh duck." I am one of those. [Laughter.] As a "fresh duck" I was elected on November 4, 1926, but I was not able to take my seat until 14 months later—December 5, 1927. I have had hundreds of men and women come to me and say, "Doctor SIROVICH, what are you doing in the House? We have not heard a word of you since your election." My answer was that I had no chance to take my seat.

I think we owe a duty, a greater duty, to the "fresh duck" who comes in here imbued with high ideals and enthusiasm and devotion to his country than we do to the lame duck who has been defeated and repudiated by his fellow citizens at the last election. The lame duck is the wounded soldier, who should be taken to the rear and placed in a hospital, where he belongs. [Applause.] But we should give an opportunity to the "fresh duck" like myself, and others, to become acquainted with the workings of the House, so that we can go back home, after diligently performing our duties here, and say to our constituency that we have given them 16 ounces of a square deal to every pound of service demanded from us. When I and my recently elected confreres get here, 14 months have passed by. It takes us four months to get acquainted with the routine of the House. Thus 18 months have passed away, and then our term has expired. Is it fair to the men newly elected to office? Is it fair to our constituency that sent us here? Eighty-eight per cent of the men go back year in and year out, so it does not affect them. Twelve per cent of the men, the balance that remains, are retired, either of their own free will or through their defeat in the election. So that the "lame duck bill" only affects 6 per cent of the membership of this House.

I was inspired and thrilled to listen to the reverential affection and sentiment that characterized the remarks of our older brethren for their defeated brethren, the so-called lame ducks. It was noble. It was wonderful. It shows that comradeship and friendship lives on, as it should, even after Members leave this august body. But let us not forget that in our love and affection for our defeated colleagues who failed in reelection, we owe a profound and important obligation to the newly elected Member, who needs the guidance, advice, and cooperation of the membership of this House, so that he can render efficient service to the constituency that sent him here to represent them.

I maintain as a patriotic American citizen, who yields to no man upon this floor in his love for his country and in his devotion to the Constitution, that progress and reform demand that we take some action that will take care not of the "lame duck" or the "dead duck," but of the "fresh duck." And so, Mr. Chairman, as one discontented with the modern method of seating Members 14 months after election, and as a believer in the principle of progress and reform, I propose to vote for this constitutional amendment. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SCHAFER. Mr. Chairman, ladies, and gentlemen, I am heartily in favor of the pending resolution, which has for its major purpose the abolishment of the so-called "lame-duck" session of Congress. [Applause.]

I was astounded to see the late additions to the ranks of the Republican insurgents. The committee, including all its Republican members, unanimously reported the pending resolution,

favorably, and yet those stalwart champions of party regularity, who claim to be opposed to insurgency, the distinguished floor leader from Connecticut [Mr. TILSON], the distinguished chairman of the Committee on Rules, from New York [Mr. SNELL], and the distinguished chairman of the Appropriations Committee, from Illinois [Mr. MADDEN], have taken the floor of this House in open revolt and insurgency against the resolution and the recommendations of the committee. It is a remarkable situation, indeed.

A very large majority of the people of the great State of Wisconsin, a portion of which I have the honor to represent, are in favor of abolishing "lame-duck" sessions of Congress, and I shall vote for the pending resolution.

Certain amendments, if adopted, would have perfected the resolution. Failure to adopt said amendments will not cause me to vote against this legislation. Eleven votes from Wisconsin should have been cast on the amendments voted upon in the Committee of the Whole, and 11 votes of Wisconsin Representatives should be cast to-day when the roll is called on the final passage of the pending measure. I regret that Wisconsin did not have her entire delegation of 11 Representatives voting in the Committee of the Whole and will not have 11 votes to-day upon final passage of this worthy measure. The keynoter for the Norris presidential delegate campaign has left his post of public duty in Washington and for the past several weeks has been campaigning in Wisconsin telling the people of Wisconsin how necessary it is to elect the delegates he favors in order to abolish the "lame-duck" session of Congress. It is an insult to the intelligence of Wisconsin voters to be campaigning as he has and be absent from his post of duty to-day and the past week when the constitutional amendment to abolish the "lame-duck" session is being considered and voted upon. He should be here and not in Wisconsin telling the people to elect delegates pledged to a dry, world-court presidential candidate in order to bring about an amendment of the Constitution to abolish "lame-duck" sessions of Congress. [Applause.]

Mr. LEA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEA: Page 3, strike out lines 15 to 24, inclusive, and lines 1 and 2 on page 4, and insert the following, preceded by quotation marks:

"SEC. 3. If the President elect dies, then the Vice President elect shall become President. If a President is not chosen before the time fixed for the beginning of his term, or if the President elect fails to qualify, then the Vice President elect shall act as President until a President has qualified; and the Congress may by law provide for the case where neither a President elect nor a Vice President elect has qualified, declaring who shall then act as President or the manner in which a qualified person shall be selected, and such person shall act accordingly until a President or Vice President has qualified."

Mr. LEA. Mr. Chairman and gentlemen of the committee, I ask your attention briefly while I attempt to explain this proposed amendment. Section 3 of this resolution deals with one of the most important provisions of the Constitution of our country. It deals with the filling of vacancies in the office of President of the United States. Under some circumstances, as the history of our country has shown, that subject may become a vital one. The Constitution now provides for filling only vacancies that occur in the office of President after the President is once installed. For over 100 years every student of our Government has recognized this gap in the Constitution. It fails to provide for filling those vacancies that are due to causes that occur before the President is installed. Fortunately no case has occurred where that weakness of the Constitution has demonstrated the ill results of which it is readily capable. Following any presidential election we may find ourselves with a vacancy in the Presidency without a constitutional method of filling it. There may be a failure to elect a President, the elected candidate may die, or there may be a physical or mental inability of the elected candidate, without a qualified person to take his place. No one can measure the untoward results that might follow.

This resolution provides for filling vacancies where there is a failure to elect a President or in case of the death of the President elect after election and before he takes his office. The original Constitution also provides for the case of a vacancy due to the inability of the President to act. For instance, if the President is insane or physically incapable of taking his oath and becoming President there is no provision in the Constitution at the present time for filling that vacancy. The resolution before the House does not provide for that case.

The fundamental purpose of the amendment I offer is to provide for filling vacancies in every case which may occur before the President elect is installed in his office. The Constitution now provides for filling every vacancy that may occur after the President has taken his oath at the beginning of his term. The weakness of section 3, as I see it, is that it fails to provide for all the vacancies covered in the Constitution. It fails to provide for the case of inability, which includes both mental and physical inability.

The amendment I offer has been worked out very carefully with the aid of members of the drafting service of the House and after consultation with some of our able Members. In form, by analogy, it follows the language of the existing Constitution relating to vacancies. If nothing else was involved in the resolution before the House, this Congress would be doing a good service to the country if it made it possible to correct this defect. I believe that among the students of the Constitution of our country there will be no disagreement that the substance of this amendment should be added to the Constitution.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. LEA. Yes.

Mr. CHINDBLOM. I want to ask whether the gentleman's amendment would assist in remedying the difficulty which would arise under section 1 of the resolution before us in the event the House of Representatives gets into a chaotic condition and is unable to elect a President?

Mr. LEA. It will; and that is one important reason for its adoption.

Mr. CHINDBLOM. So the gentleman is of the opinion that section 1, which has already passed the committee, would not be safe without some further perfecting provision, such as the gentleman offers?

Mr. LEA. That is true and that is true of the existing Constitution. That is a condition that is not at present provided for and it may become a matter of monumental importance. Subsequent provisions of the resolution before us partially cover the situation, but these are not included in section 1.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. GIFFORD. Mr. Chairman, I do not rise to speak in opposition because, as far as I can learn, the committee is willing to accept the amendment. The difference between this amendment and the resolution submitted by the committee is that the latter merely provided for the case of the "death" of the President and the Vice President. This amendment not only provides for what shall happen in case the President and Vice President die, but for the further contingency that they fail to qualify.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. GIFFORD. Yes.

Mr. CHINDBLOM. If the gentleman now is accepting this amendment in behalf of the committee, why did not the committee report it?

Mr. GIFFORD. Mr. Chairman, the gentleman from California [Mr. LEA] appeared before our committee. Although we expressed sympathy for his purpose we felt that he failed to present to us a phrase which seemed appropriate or which we were willing to place in a constitutional amendment. Since this resolution was reported, our legislative counsel has worked very diligently with Mr. LEA in order to provide proper phrasing to cover the many possibilities which this resolution seeks to provide against, and I feel that they have at last found words which very happily cover the situation which would arise if the President or Vice president failed to qualify. One thing insisted on was that we must preserve the right of the House to choose a President after March 4 if it had not done so before that date.

At present if we do not select a President by the beginning of his term on March 4 the Vice President elected by the Senate will at once become President for the full term. Under this amendment we are preserving the rights of the House, and that feature being taken care of, we are willing to accept the amendment.

The amendment was agreed to.

The Clerk read as follows:

SEC. 4. If the President elect dies before the time fixed for the beginning of his term, then the Vice President elect shall become President; and the Congress may by law provide for the case of the death of both the President elect and the Vice President elect before the time fixed for the beginning of the term, for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice devolves upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice devolves upon them.

Mr. GIFFORD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GIFFORD: Page 4, line 3, after the period strike out all down to and including the comma in line 8 and insert in lieu thereof the following: "The Congress may by law provide."

Mr. GIFFORD. Mr. Chairman, in explanation of the amendment, I would say it is simply a formal amendment made necessary by the adoption of the substitute for section 3.

The amendment was agreed to.

Mr. STOBBS. Mr. Chairman, I wanted to get up in reply to my friend the gentleman from Montana, but a little time has intervened. I simply want to make this observation before the debate comes to a close. There has been a great deal of false emphasis, as the gentleman from Michigan has said, on the fact that the criticism of the present existing arrangement is on the so-called lame ducks in the second legislative session of a Congress.

It seems to me the reason this resolution for amendment of the Constitution ought to be supported is not because of any criticism of the men who have rendered noble service in the past and who were candidates for reelection but were not reelected. No one for one moment can with any spirit of fairness criticize the attitude of those men who have been placed in this unfortunate situation. The real emphasis, it seems to me, in the matter of this resolution ought to be placed on the fact that what this committee is trying to do is not to eliminate the so-called lame ducks, but to eliminate the second session of Congress which takes place after a presidential election, and they are doing that because it is not a fair thing to the people of the United States to have such a session.

Mr. TILSON. Will the gentleman yield?

Mr. STOBBS. Yes; I will.

Mr. TILSON. Does not the gentleman, who is a fine lawyer, realize that we can now under the Constitution as it stands eliminate the session after the election, except one day every fourth year to canvass the electoral vote? If we can do that without any change of the Constitution, why should we not do it by statute? That is all there is to it.

Mr. STOBBS. If the gentleman from Connecticut will allow me to answer, you can call your first session of the new Congress under the present law on March 4, and you can not call it any earlier than that; therefore you must have your second session after election in order to canvass the electoral votes, and also to take care of the contingency where a President of the United States has not been elected by the Electoral College. I know what the gentleman is going to say——

Mr. TILSON. It is very evident.

Mr. STOBBS. You are going to say there is no reason why, if the election takes place on the 4th day of November, Congress can not call another session the very next day.

This is perfectly true; but, as a practical matter, that will not be done. As a practical matter we are not going to call a session in December or on the 4th day of January or any other day after election, to last until the 4th day of March, and then start a new session the same day; and in any event, that session if called would be a session of the old Congress. So the whole theory of this proposal is to start your first session of Congress early enough so that it will prevent any session of the old Congress after election, and so that the men who start to take part in any legislative discussion after an election will be the people who have just been elected, and who are responsive to the will of the people.

Let me illustrate why this is advisable.

When John Adams was defeated for the presidency and Thomas Jefferson elected, in the second session under the John Adams administration, what did the Federalists try to do? This is not any fanciful difficulty we are facing. History is full of illustrations where the second session has not played the game the way it ought to have played it.

In the second session, under John Adams's administration, you know the Federalist Party passed legislation purposely to embarrass the incoming administration. John Adams sat up until midnight on March 3 signing appointments, filling vacancies in all the courts of the country, and that Congress during the last few days created 24 new judges.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. STOBBS. I ask for five minutes more.

The CHAIRMAN. Without objection, the gentleman will proceed.

Mr. STOBBS. If Abraham Lincoln had not received a majority of the votes in the Electoral College in 1860 and that election had been thrown into the House, you would have had a situation at that time as follows: The candidates for President were Lincoln, Breckinridge, Douglas, and Bell—four candidates. If Lincoln had not received a majority, and there was a grave probability that he would not receive a majority of the Electoral College; if it had been thrown into the House, do you think Abraham Lincoln would have been elected President of the United States? The Senate was clearly Democratic, and the Democrats, by a combination of all the forces against the Republicans, could probably have controlled the House. That was the time where the House had 44 or 45 ballots for Speaker. Instead of getting a President of the United States elected on the issue on which they had gone before the people, the clear issue of slavery, an issue upon which the people had expressed their opinion decisively, you would have had Douglas or Breckinridge instead of Lincoln as President, and the will of the people would have been defeated.

I say the whole argument narrowed down into a nutshell is this: That it is not a sound principle for any session of Congress to be held after the people have expressed themselves in any election on any issue except by the new Congress and new Representatives coming into power, elected on that same issue, and that goes to the very fundamentals of our democratic form of government. [Applause.]

Mr. MACGREGOR. Will the gentleman yield?

Mr. STOBBS. Yes.

Mr. MACGREGOR. Under the amendment that has been adopted there could be a session after the election in November; in December.

Mr. STOBBS. If I understand the gentleman correctly; yes.

The Clerk completed the reading of the bill.

Mr. WHITE of Kansas. Mr. Chairman, I ask unanimous consent to extend my remarks by publishing a joint resolution by the Legislature of the State of Wisconsin referring to this joint resolution, and also a short article from the Evening News, of Portland, Me., on the same subject.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The matter is as follows:

Joint resolution relating to the Norris resolution proposing an amendment to the Constitution of the United States for the earlier seating of Congress

Whereas the United States Senate in the present session of Congress has for the fourth time passed the Norris resolution, which submits to the several States an amendment to the Constitution eliminating the so-called "short" or "lame-duck" session of Congress by advancing the date for the convening of the first regular session of a new Congress from 13 months after its election to January 15 following the November election, and at the same time advancing the date of the inauguration of the President and Vice President from March 4 to January 2; and

Whereas under the present system it is a frequent occurrence that a Congress and a President who have been repudiated at the election are able to defeat the wish of the people, not only for many months but often permanently, and the reason which in 1789 rendered necessary the long delay in the seating of Congress has been removed by the great improvements in transportation since that time; and

Whereas, despite the fact that only six Senators voted against the Norris resolution, there is danger that the House of Representatives will again shelve this resolution without allowing it to come to a vote, as it has done in the three preceding sessions: Now therefore be it

Resolved by the assembly (the senate concurring), That the Wisconsin Legislature hereby again goes on record in favor of the passage of the Norris resolution for the earlier seating of Congress, and petitions the House of Representatives to act favorably upon this resolution without delay; be it further

Resolved, That properly attested copies of this resolution be sent to the Speaker of the House of Representatives and to each Wisconsin Member thereof.

HENRY O. HUBER,
President of the Senate.
O. G. MUNSON,
Chief Clerk of the Senate.
JOHN W. EBER,
Speaker of the Assembly.
C. E. SHAFFER,
Chief Clerk of the Assembly.

[From the Evening News, Portland, Me.]

WASHINGTON, January 21 (Special).—The concurrent resolution of Representative HAYS B. WHITE, Republican, of Kansas, changing the assembling of Congress in each odd-numbered year from March 4 to January 4, has been reported out from the House Committee on Election of President, Vice President, and Representatives in Congress, and efforts will be made to have it brought before the House at this session

of Congress. This resolution is similar to the Norris resolution which recently passed the Senate.

The White joint resolution, as it came from the candidate, contains an amendment which, it is believed, will meet with favor among the majority of the House Members. This amendment is: "In each even numbered year such meeting of Congress shall be on the 4th day of January, and the session shall not continue after noon of the 4th day of May."

If this resolution as it is now worded becomes an amendment to the Constitution, the ending of sessions of Congress in each even numbered year on the 4th day of May, it is pointed out, will give the Representatives, as well as the Senators, who are up for reelection ample time to return to their home States and start their campaign.

The House has been the stumbling block against passing similar resolutions in past sessions of Congress, while the Senate has always acted favorably on similar resolutions, the intent of which has been to kill off all "lame ducks" who continue to serve for 13 months although defeated at the polls.

Mr. GARRETT of Tennessee. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. GARRETT of Tennessee: After line 16 insert the following as a new section:

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the States within seven years from the date of the submission hereof to the States by the Congress, and the act of ratification shall be by legislatures, the entire membership of at least one branch of which shall have been elected subsequent to such date of submission."

Mr. GARRETT of Tennessee. Mr. Chairman, I shall not detain the committee for the discussion of this amendment. In the early hours of the debate I submitted it and gave notice of my intention to offer it and undertook to give the reasons which underlie it. It seems to me that it is eminently proper that we should have a limitation of time, and I understand the gentleman from Massachusetts [Mr. GIFFORD] agrees with me. We have the precedent for it, and this follows the exact precedent fixed as a time limit of seven years, the same that was fixed in the eighteenth amendment, which the Supreme Court of the United States has declared was reasonable and was within the power of Congress to fix.

As to the other part as far as this particular amendment is concerned, it will have no practical effect, because the legislatures that will presumably pass upon, or have the first opportunity of passing upon it, are nearly all of them to be elected this year. It is fixing a precedent which, if adopted now, I trust may be a guide to future Congresses in submitting constitutional amendments.

Mr. GIFFORD. Mr. Chairman, I am sure that there will be no objection upon the committee's part to an addition to the amendment that is an exact copy of what has been added to other amendments to the Constitution, but, as I understand it, there is no precedent for the latter part requiring that one branch shall have been elected before the amendment is presented to the legislature.

Mr. GARRETT of Tennessee. That is correct.

Mr. GIFFORD. I am wondering if an objection should not be made to that. I wonder if it is not an attempt to establish a precedent which would, in a large measure, take the place of the constitutional amendment heretofore suggested, so that in all cases in the future no amendment will be allowed to be presented to a legislature until it has first been brought to the attention of the people and the legislature may be elected or rejected on the issue.

Mr. RAMSEYER. What objection has the gentleman to making that a precedent?

Mr. GIFFORD. Mr. Chairman, I rose for the purpose of calling the attention of the House to the fact that there had not heretofore been any exact precedent for this. I do not know that I have any particular objection, but I think that the Members should know that there is no precedent for it.

Mr. CHINDBLOM. Does the committee take any attitude upon it?

Mr. GIFFORD. The committee has tried to be liberal and does not wish to be loath to accept suggestions from any who have given thought and study to the resolution. Members of the Rules Committee have suggested certain things which it has been agreeable to us to have added since the first report.

Mr. HUDSON. Can this amendment be divided in being voted upon, and, if so, I ask for a division of the amendment.

The CHAIRMAN. The Chair is inclined to think that it is one substantive proposition and is not susceptible of division.

Mr. MADDEN. The gentleman from Massachusetts made the statement, when he had the floor, that at the suggestion from the Rules Committee, when asking for the consideration of this resolution, his committee had to make certain concessions, which they would not have made if not suggested by that committee. I feel sure he does not want to leave that impression on the House.

Mr. GIFFORD. Mr. Chairman, the point I wished to bring out was that this committee went before the Committee on Rules, that the members of the Committee on Rules were painstaking in their questioning, and that they made many suggestions, some of which we adopted. Of course, we did not have to do it.

Mr. TILSON. Mr. Chairman, I move to strike out the last word. We are going to vote on this resolution within a very few minutes, and before we vote I wish to say just another word, because I feel that this is a very serious matter. I regard this resolution as now framed as fraught with great danger to the future, partly because of the uncertainty of some of its provisions, some of which have been put in here to-day on the floor without an opportunity for 1 Member out of every 25 to even read them. Some of them are most important provisions; for instance, the one upon which the succession to the Presidency may depend. We are taking a serious step when we submit a constitutional amendment. It is far better that a thousand good things shall stay out of the Constitution than that one bad, one dangerous thing shall go in, because once in it is very difficult ever to take it out again.

There is one provision in this resolution which should cause us to hesitate long before voting for this proposal. Under this resolution the new Congress will have to canvas the electoral vote for President and Vice President, and it has only 20 days in which to do it. The House will meet on January 4 unorganized——

Mr. HUDSON. Mr. Chairman, will the gentleman yield?

Mr. TILSON. I regret that I can not yield. History is replete with instances where it has taken a longer time than 20 days to organize. We all know that within three Congresses—the beginning of the Sixty-eighth Congress, as I recall—there was a deadlock lasting for several days. If the Presidency of the United States had depended upon the completion of the organization of the House at that time we might have gone, instead of 4 days, 20 days, and even that time might not have been enough.

Another thing: It is provided in this resolution that in case there is no election, the Vice President elected by the Senate may act as President until the House shall elect a President. We might have under this resolution one man acting as President, and an election of President pending in the House, which may take place during that Congress or wait until the next Congress in the middle of the presidential term, when there might be a change made in the political complexion of the House, and then put out the man who has been acting as President, for the House could take such action at any time and put in a new man.

My friends, we should think this matter over very deliberately before taking action that might bring about such a situation. It is comparatively easy to put amendments through the two Houses of Congress, and it is somewhat easy to have them adopted by the States; but the mistake once having been made, it is difficult, if not impossible, to retrace our steps. [Applause.]

One instance of a deadlock or the failure to organize this House might plunge this country into a very serious emergency. So, Mr. Chairman, as long as such a proposal remains in this resolution or in any resolution requiring that the vote for President be canvassed by a new Congress, I shall oppose it. Under the present existing system we have Congress already organized, the Speaker is elected, the House is organized in all its committees, and we are ready to act. The country would have confidence in the action of such a Congress when taken; but if we met here with the Presidency depending upon it, no one knows what might happen. Let us not take chances in connection with a matter involving so much danger. [Applause and cries of "Vote!"]

Mr. DENISON rose.

The CHAIRMAN. For what purpose does the gentleman from Illinois rise?

Mr. DENISON. I wish to speak in opposition to the amendment.

Mr. LAGUARDIA. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LAGUARDIA. Has the Chair ruled that this amendment is not divisible?

The CHAIRMAN. No demand to that effect has been made.

Mr. LAGUARDIA. I now demand that it be separated.

The CHAIRMAN. In the opinion of the Chair, while the amendment may contain to a certain extent propositions which

are divisible, the whole proposition is so nearly one single substantive proposition that the Chair does not consider that a clear-cut division may be made, and the Chair so holds.

Mr. LAGUARDIA. Mr. Chairman, I respectfully appeal from the decision of the Chair.

The CHAIRMAN. The gentleman from New York [Mr. LAGUARDIA] appeals from the decision of the Chair. The question is, Shall the decision of the Chair stand as the judgment of the committee?

The question was taken, and the decision of the Chair was sustained as the judgment of the committee.

Mr. DENISON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The debate on this amendment has been exhausted. If the gentleman from Illinois desires to make a pro forma amendment, the Chair will recognize him.

Mr. DENISON. I have not spoken on this amendment heretofore, and I will not take up the five minutes. I merely want to call attention to the fact that there may be something unconstitutional about the amendment offered by the gentleman from Tennessee [Mr. GARRETT].

I have listened to the debate on this resolution with a great deal of interest. I have tried to be content with listening rather than speaking. The gentleman from Tennessee has offered a very interesting amendment to the resolution, and I have arisen to submit an inquiry to the gentleman from Tennessee, and other Members of the House, as to whether or not he may have some doubt about the validity of the amendment he proposes?

Mr. GARRETT of Tennessee. In what respect?

Mr. DENISON. In this respect: The Constitution provided that it may be amended by submitting the proposal to legislatures or to conventions. The gentleman from Tennessee is proposing a third method. His amendment imposes a condition upon the constitutional provisions. Now, however desirable that may be, the question in my own mind is whether or not we can do that.

If we can put that condition on the constitutional provision why can we not put on any number of conditions? For instance, why can we not provide that it must be submitted to the State legislatures, all the members of one branch of which have been elected after its submission in an election in which this question is voted on? Or why may we not attach other conditions? For example, why not provide that it shall be submitted to the legislatures of the States, all the members of at least one branch of which have been elected at an election held under certain conditions, or on certain dates, or under certain safeguards, or at an election in which the proposed amendment is submitted for a referendum? I am asking this question in all seriousness.

I think the question which the gentleman from Tennessee has raised is a very interesting one, and I think it may be a desirable condition to attach to any proposed constitutional amendment. But it is not in the Constitution, and even when we are amending the Constitution it must be done in a constitutional way.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. DENISON. Yes.

Mr. MOORE of Virginia. I am going to ask the gentleman a question: What would you do in a State where the State law provides that the State senate shall be elected, one-half at one time and one-half at another time? You would find it impossible to enforce this provision, and it would become a nullity.

Mr. DENISON. The gentleman from Virginia is entirely correct. The Constitution is just as plain as it could be. It provides for the submission of proposed amendments to the State legislatures. I doubt if we can properly attach any conditions or limitations to the submission. So I seriously doubt the validity of the amendment offered by the gentleman from Tennessee.

Mr. HASTINGS. And would it not postpone action for four years in a great many States where the legislatures are elected only once in four years?

Mr. DENISON. It would, of course.

Mr. GARRETT of Tennessee. If the gentleman from Illinois will permit me to answer that question I will say no.

Mr. DENISON. Gentlemen, I have been undecided whether I would vote for this resolution or not. I have listened to the debate in order to get all the information I could. When Congress submitted the amendment providing for the election of Senators by a direct vote of the people, a most serious mistake was made which can perhaps never be remedied. Therefore, I approach all proposed constitutional amendments with more or less doubt and even fear. So I have decided not to support the pending resolution.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. RAMSEYER. Mr. Chairman, I rise to support the amendment just offered by the gentleman from Tennessee [Mr. GARRETT]. This amendment provides that the proposed amendment to the Constitution, commonly known as the Norris-White constitutional amendment, first, shall be inoperative unless ratified by the legislatures of three-fourths of the several States within seven years from the date of submission by Congress to the States and, second, the act of ratification shall be by legislatures, the entire membership of at least one branch of which shall have been elected after such date of submission.

The first clause of the pending Garrett amendment is in substance a part of the eighteenth amendment to the Constitution and has been held by the Supreme Court of the United States to be a reasonable limitation in Dillon *v.* Gloss (256 U. S. 368). On page 376 the court says:

> Whether a definite period for ratification shall be fixed so that all may know what it is and speculation on what is a reasonable time may be avoided, is, in our opinion, a matter of detail which Congress may determine as an incident of its power to designate the mode of ratification.

In this same decision after quoting Article V of the Constitution and discussing the two modes of ratification, to wit:

> by the legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as one or the other mode of ratification may be proposed by Congress—

The Supreme Court says on page 374:

> Thus the people of the United States, by whom the Constitution was ordained and established, have made it a condition to amending that instrument that the amendment be submitted to representative assemblies in the several States and be ratified in three-fourths of them. The plain meaning of this is (a) that all amendments must have the sanction of the people of the United States, the original fountain of power, acting through representative assemblies; and (b) that ratification by these assemblies in three-fourths of the States shall be taken as a decisive expression of the people's will and be binding on all.

I can not take up more time to discuss this case. I commend a careful reading of this case to the Members of the House. In this connection I wish to call your attention to another instructive case of Hawke *v.* Smith (253 U. S. 221), in which was held unconstitutional a provision in the Ohio constitution requiring a referendum on the action of the general assembly ratifying any proposed amendment to the Constitution of the United States. The Supreme Court in this case, after discussing the meaning of Article V of the Constitution, says on pages 226 and 227:

> The method of ratification is left to the choice of Congress. Both methods of ratification, by legislatures or conventions, call for action by deliberative assemblages representative of the people, which it was assumed would voice the will of the people.

The first clause of the pending amendment imposes a time limitation of seven years on one end of the ratification process, which has been held constitutional by the Supreme Court; and the second clause of the pending amendment imposes a time limitation on the other end of the ratification process by way of a stay or delay until the entire membership of at least one branch of the State legislatures shall have been elected after such date of submission, which latter clause has not been passed on by the Supreme Court.

The limitation in the first clause is—

> a matter of detail which Congress may determine as an incident to its power to designate the mode of ratification.

The mode of ratification may be either—

> by the legislatures of three-fourths of the several States, or by conventions in three-fourths thereof.

Congress must determine the mode of ratification and in that determination is limited to one of two modes prescribed in Article V of the Constitution. As an incident to its power to designate the mode of ratification, Congress may prescribe that if a proposed constitutional amendment is not ratified within seven years after the date of submission it shall be inoperative.

In order to assure the assent of the people of the United States, "the original fountain of power," to a proposed constitutional amendment and to prevent hasty, ill-considered, and at times hysterical action on the part of the State legislatures, why is not the delay imposed in the second clause "a matter of detail which Congress may determine as an incident of its power to designate the mode of ratification" in order to make more certain legislatures that "would voice the will of the people" and give "a decisive expression of the people's will"?

This second clause under consideration in no way violates any provision of Article V of the Constitution. It is sound and sensible. It is conducive to an orderly consideration of the constitutional amendment submitted by Congress to the States. It is a reasonable limitation or regulation to give the people of the States an opportunity to become advised in what way it is proposed to change their fundamental law. It brings the proposed constitutional amendment before the people for discussion and consideration and gives a reasonable time in which the legislatures can learn that "decisive expression of the people's will." It simply tends to make more certain that the legislatures of the several States shall "voice the will of the people" and "that all amendments must have the sanction of the people of the United States, the original fountain of power."

The difference between the two clauses is: The first clause inhibits action on the part of the legislatures after a designated time and the second clause inhibits action on the part of the legislatures before a designated time. The object of the first clause is to prohibit action on the part of legislatures after the proposal has gone out of the people's minds, while the object of the second clause is to prohibit action on the part of legislatures before the proposal has entered the people's minds.

Mr. Chairman, in conclusion permit me to call attention to some data of historic interest in connection with constitutional amendments. To date there have been 24 amendments proposed to the Constitution of the United States, and 19 of these have been ratified by the legislatures of three-fourths of the States. Some of these 19 amendments were ratified within a single year after their proposal and all within four years. Of the 5 amendments that have not yet been ratified by the requisite number of States, 2 were proposed in 1789, 1 was proposed in 1810, 1 in 1861, and 1 in 1924. I think a fair and reasonable conclusion from the discussion in Dillon *v.* Gloss, supra, is that further action by the State legislatures to ratify the outstanding amendments, except the one proposed in 1924, would be declared to be invalid by the Supreme Court.

Mr. Chairman, bearing on this discussion, I submit for printing in the RECORD the following very interesting contribution from Jameson on Constitutional Conventions (4th ed.), section 585, to wit:

585. VI. Two further questions may be considered: 1. When Congress has submitted amendments to the States, can it recall them? And 2. How long are amendments thus submitted open to adoption or rejection by the States?

1. The first question must, we think, receive a negative answer. When Congress has submitted amendments, at the time deemed by itself or its constituents to be desirable, to concede to that body the power of afterwards recalling them would be to give to it that of definitively rejecting such amendments, since the recall would withdraw them from the consideration of the States and thus render their adoption impossible. However this may be, it is enough to justify a negative answer to say that the Federal Constitution, from which alone Congress derives its power to submit amendments to the States, does not provide for recalling them upon any event or condition; and that the power to recall can not be considered as involved in that to submit as necessary to its complete execution. It therefore can not exist.

2. The same consideration will, perhaps, furnish the answer to the second question. The Constitution gives to Congress the power to submit amendments to the States—that is, either to the State legislatures or to conventions called by the States for this purpose, but there it stops. No power is granted to prescribe conditions as to the time within which the amendments are to be ratified, and hence to do so would be to transcend the power given. The practice of Congress in such cases has always conformed to the implied limitations of the Constitution. It has contented itself with proposing amendments, to become valid as parts of the Constitution, according to the terms of that instrument. It is, therefore, possible, though hardly probable, that an amendment once proposed is always open to adoption by the nonacting or nonratifying States.

The better opinion would seem to be that an alteration of the Constitution proposed to-day has relation to the sentiment and the felt needs of to-day, and that if not ratified early while that sentiment may fairly be supposed to exist it ought to be regarded as waived and not again to be voted upon unless a second time proposed by Congress.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken; and the Chair being in doubt, the committee divided, and there were—ayes 187, noes 23.

So the amendment was agreed to.

Mr. CARTWRIGHT. Mr. Chairman, if nothing further were to be accomplished by this amendment than to do away with the absurdity of electing Members to Congress 13 months before they are allowed to become full-fledged Congressmen, that alone would be enough to justify prompt action on our part. Whatever justification there may have been for this delay in the early days when the average rate of travel was 5 or 6 miles an hour, there is none to-day, when the average rate of travel is 40 to 60 miles an hour. Almost everything is moving almost ten times faster to-day than it was 150 years ago. In times like these it is travesty on responsible democratic government to choose Representatives to serve the people in the transaction of business of vital importance and then not allow them to begin that service for more than a year. Imagine a housewife engaging a cook to begin work more than a year hence. Imagine a farmer buying seed, or work animals, or farming implements, of which he was to make no use for more than a year. Imagine a corporation electing directors to do nothing but watch other directors transact the business of the concern for upwards of a year. That kind of absurdity is reserved solely for this great deliberative body, in which the best current thought of our people ought to find expression. Nowhere except in the United States are the elected representatives of the people put into a political morgue and kept there for over a year before they can take action. In England the popular will may assert itself through the House of Commons almost instantly.

But this amendment aims to do much more than put an end to this absurdity in modern democratic government. Its main purpose is to free Congress from the dead hand of the so-called "lame duck." These "lame ducks," of whom there are often 10 or more in the Senate, and 30 or more in the House, with a greatly lessened sense of responsibility to the people by whom they have been rejected, often hold the balance of power in both Houses, and so have it within their power to decide matters of the greatest importance affecting the welfare of the whole Nation. It is idle to deny that these "lame ducks" have time and again been influenced by expectations of favors to come from the White House.

The "lame duck" flourishes during the so-called short session of Congress. It is also during this session that the filibuster flourishes. It is also during this short session that the undemocratic cloture is made use of to jam measures through Congress without adequate debate or understanding. The proposed amendment does away with the short session. By so doing it increases from 50 to 100 per cent the chances of legislation being given the fullest possible consideration and being decided by Representatives who look directly to the people, and nowhere else, for their reward.

There is another sense in which Congress would be relieved of the dead hand by this amendment. Each Congress would organize itself. At present the dying Congress provides by caucuses the officers and organization for the newly elected Congress. A dead Congress seeks to control the vital machinery of a Congress that is yet to come into being. The proposed amendment would put a stop to that vicious, undemocratic practice.

The proposed amendment has received the approval of the American Bar Association and of a great many farm, labor, and women's organizations. The press throughout the whole country is for it. I do not know of any body or group that is openly against it. It seems to me that the devil's advocate himself would find it hard to make out a case against it. [Applause.]

Mr. WHITE of Kansas. Mr. Chairman, I ask the courtesy of the committee to proceed for two minutes. I wish to congratulate the committee upon the wonderful tranquillity that has characterized this debate. I want to say that I listened to the eulogies spoken of the gentleman from Virginia, my good friend, and of our beloved leader on this side, with which I fully agree. I want to say further with regard to the leader himself that I believe he can be wrong with better grace than any man I have ever known in my life. [Laughter and applause.]

Mr. TILSON. Mr. Chairman, does not the rule provide that upon the completion of the reading of the resolution the committee shall automatically rise?

The CHAIRMAN. The reading of the resolution having been completed, the committee now rises.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration Senate Joint Resolution 47, proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress, had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the resolution as amended do pass.

The SPEAKER. The question is on agreeing to the amendment.

Mr. TILSON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TILSON. Is this the formal submission of the amendment to the Senate resolution?

The SPEAKER. As the Chair understands, this is the formal submission of the amendment, but not of the resolution itself. The question is on agreeing to the amendment.

The amendment was agreed to.

The resolution was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the resolution.

Mr. TILSON. Mr. Speaker, is it not necessary to have a yea-and-nay vote on a resolution proposing a constitutional amendment?

The SPEAKER. There is no rule which provides for a yea-and-nay vote, and the Chair will quote from the Manual, section 224:

Ayes and nays not required to pass a resolution amending the Constitution.

The question is on the passage of the resolution.

Mr. GIFFORD. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 209, nays 157, answered "present" 2, not voting 66, as follows:

[Roll No. 44]

YEAS—209

Abernethy	Drewry	Kelly	Rankin
Adkins	Edwards	Kemp	Rayburn
Almon	England	Kent	Reed, Ark.
Andresen	Englebright	Kerr	Reid, Ill.
Arnold	Eslick	Ketcham	Robinson, Iowa

ANSWERED "PRESENT"—2

Stalker	Williams, Tex.

NOT VOTING—66

Allen	Connally, Tex.	Igoe	O'Connor, N. Y.
Anthony	Crail	Irwin	Quayle
Arentz	Cramton	Jacobstein	Rathbone
Bankhead	Darrow	Johnson, Ind.	Sabath
Beck, Pa.	Dempsey	Johnson, S. Dak.	Sanders, N. Y.
Beck, Wis.	De Rouen	Kendall	Sears, Fla.
Begg	Dickstein	Kiess	Snell
Berger	Doyle	Kindred	Strong, Pa.
Boies	Fish	Kunz	Strother
Buckbee	Fitzgerald, Roy G.	Larsen	Sweet
Bushong	Gallivan	Leech	Taylor, Tenn.
Butler	Graham	McFadden	White, Colo.
Campbell	Griffin	Magrady	Wilson, Miss.
Chalmers	Hall, Ill.	Martin, Mass.	Wood
Christopherson	Hancock	Menges	Yates
Cole, Md.	Harrison	Milligan	
Combs	Hull, Morton D.	Moore, Ohio	

So (two-thirds having failed to vote in favor thereof) the joint resolution was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Johnson of South Dakota and Mr. Begg (for) with Mr. Harrison (against).

Mr. Rathbone and Mr. Christopherson (for) with Mr. Sanders of New York (against).

Mr. Combs and Mr. Stalker (for) with Mr. Snell (against).

Mr. Fish and Mr. Jacobstein (for) with Mr. Anthony (against).

Mr. Cole of Maryland and Mr. De Rouen (for) with Mr. Buckbee (against).

Mr. Williams of Texas and Mr. Hancock (for) with Mr. Sweet (against).

Mr. Taylor of Tennessee and Mr. Berger (for) with Mr. Bankhead (against).

Mr. Beck of Wisconsin and Mr. Gallivan (for) with Mr. Wood (against).

Until further notice:

Mr. Kiess with Mr. Sears of Florida.
Mr. Yates with Mr. Larsen.
Mr. Martin of Massachusetts with Mr. Sabath.
Mr. McFadden with Mr. Kunz.
Mr. Butler with Mr. Connally of Texas.
Mr. Campbell with Mr. Doyle.
Mr. Cramton with Mr. Griffin.
Mr. Strong of Pennsylvania with Mr. Igoe.
Mr. Moore of Ohio with Mr. Kindred.
Mr. Dempsey with Mr. Milligan.
Mr. Beck of Pennsylvania with Mr. Quayle.
Mr. Darrow with Mr. White of Colorado.
Mr. Magrady with Mr. O'Connor of New York.
Mr. Arentz with Mr. Dickstein.
Mr. Graham with Mr. Wilson of Mississippi.

Mr. DOUGLASS of Massachusetts. Mr. Speaker, my colleague, the gentleman from Massachusetts [Mr. GALLIVAN], is absent on account of a sore throat. If present, he would vote "aye."

Mr. WILLIAMS of Texas. Mr. Speaker, I am paired in favor of the bill. I therefore desire to withdraw my vote and answer "present."

Mr. CHAPMAN. Mr. Speaker, my colleague, the gentleman from Missouri [Mr. MILLIGAN], is absent on account of illness. If present he would vote "no."

Mr. STALKER. Mr. Speaker, I voted "aye." I am paired with my colleague, the gentleman from New York [Mr. SNELL]. I therefore withdraw my vote and answer "present."

The result of the vote was announced as above recorded.

On motion of Mr. TILSON, a motion to reconsider the vote by which the joint resolution was rejected was laid on the table.

A similar House joint resolution was laid on the table.

ANNIVERSARY OF THE BATTLE BETWEEN THE "MONITOR" AND "MERRIMAC"

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LINDSAY. Mr. Speaker, 66 years ago there occurred the historic battle between the *Merrimac* and the *Monitor*, which was epochal in its effect on naval operations and construction of the future. The Confederate cruiser *Merrimac* had been converted into a crude but highly effective "ironclad" ship. Ironclad is perhaps a very accurate description, for this

was a wooden vessel whose sides had been clad in iron over her timbers.

On March 8 the *Merrimac* alone attacked five Union frigates. The concerted broadsides of the northern ships left the *Merrimac* unharmed. She continued to fire until the five frigates were sunk, 250 men being killed. The effect of this victory was most disheartening to the North. It opened a way for attack on Washington by shell fire and placed the coast cities of the North in a precarious position.

Then on the following morning there appeared to oppose the victorious *Merrimac*, the most absurd-looking craft imaginable, the now famous *Monitor*. In the engagement that followed the armor of the *Merrimac* was damaged, several of her heavy guns put out of action, her hull damaged, and many of the crew killed and injured. The *Merrimac* was compelled to withdraw and never again appeared in action.

I shall not enlarge on this remarkable event, as I believe some of my colleagues will wish to speak later, and I do not wish to anticipate their remarks in any way. I simply wish to recall that the *Monitor* was built in Greenpoint, Long Island, which historic territory I have the honor to represent in Congress. Greenpoint is a remarkable section. Its inhabitants are unanimous in their devotion to their locality. They are interested in public affairs and politics from childhood. Men, women, and children follow events closely. It would cheer the hearts of those who observe the vote slacking elsewhere to note the voting in Greenpoint. Every citizen votes in the election there. It is not surprising that this energy enabled the builders of the *Monitor* to complete their task in 100 days, a record for shipbuilding. And within a month after launching, Greenpoint's *Monitor* had saved naval supremacy for the North.

FARM RELIEF

Mr. SANDERS of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech which I made over the radio on farm relief legislation.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. SANDERS of Texas. Mr. Speaker and gentlemen of the House, I avail myself of the privilege granted to me by the House by printing in the RECORD an address delivered by me over the radio in Washington on the evening of March 7, 1928, on farm-relief legislation:

In discussing agricultural legislation, the first question which presents itself is that of the importance of agriculture. The national industrial conference board said of it: "The position of agriculture is of vital concern to all the people of the United States, not only for to-day but for all the future as well. It involves the national security, the racial character, the economic welfare, and social progress of our people. The development of sound, far-sighted national policies in respect to agriculture is, therefore, one of the most important problems before the country to-day. As our industries rely so greatly upon agriculture for their basic materials, industry has a direct interest in the maintenance of an adequate and well-proportioned agricultural production, unless we are to become dependent upon foreign countries, not only for the food supply of our industrial workers but for many industrial materials." Thomas Jefferson in his writings, in discussing the great industries of the country, placed agriculture first and stated in substance that it was a duty of the Government to tide it over adverse conditions.

The second question is: Is there an agricultural problem? Since 1900 agriculture has been slowing up in comparison with all other industries. All other industries have been so organized that they have shifted the heaviest burdens upon the farmers until their average earnings in 1926 were $627 per year—that is to say, that was the average income to the farmer for that year. Since 1882 the cost of producing agricultural products has been more than the wholesale prices of these products, and the farm indebtedness has grown from four billion in 1910 to twelve billion in 1920, and it has steadily increased since 1920. Many farmers are losing their farms and all the savings which they have accumulated. Business stagnation and bankruptcy abound.

The losses which the farmers of the country have suffered during the last seven years have been enormous. According to official bulletins recently issued by the Department of Agriculture during the fiscal year of 1926–27, there was an average decline of 4 per cent in farmland value for the whole country, while in some sections of the corn and cotton belt the decline reached 10 per cent. The 4 per cent average decline made a total decline from 1920 of 30 per cent. This means, expressing it in terms of dollars, $18,900,000,000 from the valuation of $63,000,000,000 placed on the value of farm lands in 1920. One reason for this is the deflation policy which the Republican Party put into effect in 1920. The other is the protective policy of the present and preceding Republican administration which has forced the farmer to sell at world prices while he was forced to buy his supplies at inflated prices in a protected market. While farm lands have been depreciating and prices of farm products have been steadily going down, the farmer's taxes have been going up by leaps and bounds. From 1921 to 1926 his land value was depreciating 30 per cent, and his taxes had increased 98 per cent. In the fiscal year of 1926 and 1927, 1,020,000 persons left the farm. During that time 131,000 farms were disposed of at forced sale and 40,000 sold at administrators and executors' sales, making a total of 171,000 sold "under the hammer." Counting 5 persons as the average number to a family, there were 855,000 men, women, and children dispossessed of their farm homes during that year. One hundred and sixty-three thousand other farms were sold voluntarily during that year because the farms were not profitable and the farmers could not support their families on them. The people of this Nation are fed and clothed by the farmers, and agriculture ought to have the sympathetic consideration of this Congress and ought to be given the same governmental concern as the railroads, manufacturers, and industries. This demand for agricultural legislation is increasing all the time, and it is presenting an issue which will be with us until it is settled, and settled right. This agricultural distress is not temporary. We suffered a loss of between three hundred million and four hundred million dollars on the crops of 1926, to say nothing of the enormous loss on the crops of last year. No other industry has ever been left to endure its hardships alone.

Banking has been assisted by the Federal reserve system. Manufacturing has had tariff protection for 100 years. Railroads have been given such legislation as allows a fair return on their investments. Labor has been helped and assisted by the Adamson eight hour law and the immigration laws. Hence the farmer has a right to demand that his industry shall be given at least an equal consideration by our Government, whose powers have been employed to help and shelter all other industries. Farmers have not now the power, nor are they likely to acquire it through voluntary action, to control their surplus crops, and the Government must come to their assistance if this Republic is to survive—if our population is not soon to be divided into a large industrial class on the one hand and peasantry and poverty and want and misery on the other. The net income of the average farmer in 1926 shrank 20 per cent over 1925. The total net revenue from agriculture, according to figures of the Bureau of Economics for the year 1926, including that from products consumed on the farms, amounted to $853 for each farm family. If we allow 4½ per cent interest on the capital investment, then the average income to the farmer was $627 per year. How are you going to keep him on the farm under such conditions? How are you going to make farm life attractive to him? How are you going to maintain churches and schools in rural communities with an annual farm income of things raised and consumed at home at only $627 per year? The reports from this Government bureau show that the total invested farm values the last calendar year declined one and one-half billion dollars. This presents a situation which is serious and can not be ignored. It demands a far-reaching remedy, and those who treat it lightly are enemies to the farmers and to the country. We should make it possible for agriculture to attain an economic equality with industries and labor in the domestic market; that the farmer be given an equal opportunity to enjoy the fruits of his labor, as do his fellow men in all other lines of endeavor. Both of our great political parties recognized this farm problem in 1920, and both of them incorporated planks in their national platforms of that year, dealing with this problem and promising relief. In the election which followed in the fall of 1920 Harding was elected President by a 7,000,000 plurality vote, and both the Houses were overwhelmingly Republican.

The Republicans in their platform of 1920 made the following pledge to the American farmer: "The farmer is the backbone of the Nation. National greatness and economic independence demand a population distributed between industry and the farm, and sharing on equal terms the prosperity which is wholly dependent upon the efforts of both. Neither can prosper at the expense of the other without inviting joint disaster. The crux of the present agricultural condition lies in prices, labor, and credit. The Republican Party believes that this condition can be improved by practical and adequate farm representation in the appointment of governmental officials and commissions; the scientific study of agricultural prices and farm production costs at home and abroad, with a view to reducing the frequency of abnormal fluctuations; the uncensored publication of such reports; the authorization of associations for the extension of personal credit; a national inquiry on the coordination of rail, water, and motor transportation with adequate facilities for receiving, handling, and marketing food; the encouragement of our export trade; an end to unnecessary price fixing and ill-considered efforts arbitrarily to reduce prices of farm products which invariably results to the disadvantage both of producer and consumer; and the encouragement of the production and importation of fertilizing material and of its extensive use." Why did they not redeem this pledge? They had the power to redeem it. They had the President and a large majority in both Houses of Congress. The reason they did not redeem it is evidently because they

did not have the inclination or they did not have the ability. I am charitable enough to permit them to classify themselves under these two heads as they may desire, but personally I think they properly come under both. In fact they admitted their ignorance of the problem by appointing a Commission of Agricultural Inquiry. This commission spent much time and money and when it made its report but few of them read it and those who did did not understand it. This was their "scientific study" promised in their platform. That Congress, the Sixty-seventh Congress, was in session many months, with several special sessions, and nothing was done to redeem that platform pledge. Drunk with power, they felt that it would be safe to neglect the farmer another time just as he has always been neglected. Not only did they refuse to redeem their pledge to assist agriculture, but they enacted the Fordney-McCumber tariff law, which more largely contributed to the farmers' enslavement.

In the campaign of 1924 they made another pledge to the American farmer, which pledge is as follows: "In dealing with agriculture the Republican Party recognizes that we are faced with a fundamental national problem, and that the prosperity and welfare of the Nation as a whole is dependent upon the prosperity and welfare of our agricultural population. We recognize that agricultural activities are struggling with adverse conditions that have brought deep distress. We pledge the party to take whatever steps are necessary to bring back a balanced condition between agriculture, industry, and labor." Notwithstanding the fact that they still had the President and a majority in both the Houses, they again failed to redeem their pledge. The Sixty-ninth Congress passed the McNary-Haugen bill, which was fought by many Republicans and vetoed by a Republican President. This bill's purpose was to stabilize the prices of farm products by removing the surplus from the domestic market. The administration did not want the farm prices stabilized. It wanted to keep the farmer in bondage. I am mentioning these facts because it is conceded by both Democrats and Republicans that our Government is by parties and all acknowledge party responsibility. These facts, therefore, show that, in so far as agricultural legislation is concerned, the Republicans have been weighed in the balance and found wanting. This Congress has been in session three months, and yet nothing has been done for agriculture. The Agricultural Committee of the House, composed of 21 members, a majority of whom are Republicans, have been dillydallying and no bill reported.

The enemies of real agricultural legislation are now trying to defeat legislation in behalf of the farmer by saying that they must not pass any legislation that the President will veto. Why delegate legislative authority to the President? It is a duty of Congress to pass such legislation as it may deem best, irrespective of the President, who has never been known to be on a farm except at picture-taking time and campaign time. If the President wants to veto legislation which the Congress in its wisdom may see fit to pass, let him take the responsibility.

When President Coolidge left South Dakota last summer he stopped at Brookings, S. Dak., and dedicated the Lincoln Memorial Library at South Dakota State College, an agricultural college. The people naturally expected him on such an occasion, and especially after having spent the summer among farmers, to say something about the greatest of all problems confronting the Nation—the agricultural problem. But instead of speaking on that subject, and suggesting some relief, he talked about the spiritual side of life. The spiritual side of life is very important, but you can not reach the spiritual life of man when he is hungry. As long as he is hungry he is going to be thinking about getting something to eat to maintain his physical well-being. This has always been true. We are constituted that way. The President proved that Lincoln was interested in agriculture. We all knew that all the time. We appreciate Lincoln's interest in agriculture, but Lincoln is dead. What we would like now to have is to have our President interested in agriculture, and to tell us how he stands on the Republican platform which recognizes the agricultural problem and which promises relief. After he had laboriously proved Lincoln's interest in agriculture, he quoted Lincoln as follows: "No other human occupation opens so wide a field for a profitable and agreeable combination of labor with cultivated thought as agriculture." He failed to tell them that while Lincoln's statement was true when it was uttered, that it is true now. That the people on the farms are getting poorer and that every year witnesses many farms being sold for taxes. It is well for the President to talk about the past and refer to the sweet by-and-by, but what we want to know something about is the nasty now-and-now. We want to know how to get by. Many farmers have not paid last year's taxes nor the interest on their mortgages. Doubtless the farmers who heard the President on that occasion felt like the doughboy during the World War. An Army welfare worker seized the opportunity offered by a halt in the march of an American division toward the battle lines to deliver an address to a group of Infantry soldiers. He expanded on the nobility of the allied cause, and he was about to mount to even greater heights of eloquence and punch the eternal blue, when a footsore, weary, and hungry doughboy broke up the meeting by shouting, "At's fine—but when do we eat?"

"Ill fares the land, to hastening ills a prey,
Where wealth accumulates and men decay;
Princes and lords may flourish or may fade;
A breath can make them as a breath has made;
But a bold peasantry, their country's pride,
When once destroyed, can never be supplied."

Congress could also help the farmer by prohibiting gambling in cotton futures. From all over the country comes the demand from the farms that this pernicious practice should be stopped. Recently there was testimony given before the Judiciary Committee of the House by Arthur Marsh, former president of the New York Cotton Exchange, showing how the cotton exchanges attempt to control and do control the cotton market.

"The two firms Marsh named were Anderson, Clayton & Co., of Houston, Tex., and George H. McFadden & Bros., of Philadelphia. He alleged that they concentrated on the New York Exchange a reserve supply of what he said was inferior cotton, ranging from 185,000 to 200,000 bales, and then sold it to traders who, when unable to sell it to spinners, had to place their other holdings on the market. This acted to depress prices on all markets of the country," he charged, adding that the two concerns were able to control the market during the depression.

"Marsh, together with Jacob M. Gilbert, a New York attorney and son-in-law of Justice Brandeis, of the Supreme Court, urged approval by the subcommittee of the Rankin bill, which would make market manipulations a violation of the Sherman antitrust law."

While many bills have been introduced in this and preceding Congresses, seeking to prevent gambling in cotton futures, none of them have ever been reported by the Agriculture Committee of either the House or the Senate. The House Committee on Agriculture has not even gone so far as to hold hearings on these bills. It is time farmers all over the country should take concerted action if they are to be given the assistance which they deserve. Would a person pay $226,000 for a seat on the New York Cotton Exchange unless it was a highly profitable business? And their profit comes at the expense of the farmer.

The President of the United States could materially assist the farmers by asking Secretary Jardine to retire from the Cabinet. Secretary Jardine is not only incompetent for the place, but he throws the weight of his official influence against the farmers. We who come from the cotton-producing States have not forgotten last September, when a message went out from the Agricultural Department to the New Orleans Cotton Exchange, predicting a downward trend in cotton prices, caused the market to immediately decline about $6 per bale on cotton, which cost the South many millions of dollars and at the same time had a demoralizing effect throughout the Nation. At that time I protested to Secretary Jardine and to the President of the United States, asking him to remove Jardine. That it was a serious blunder and that the President recognized it is evidenced by the fact that it caused the longest session of the Cabinet which has been held since Mr. Coolidge has been President, and at the adjournment of the Cabinet meeting the newspapers quoted the President as saying that he "regarded as hazardous predictions of price trends by the Department of Agriculture." And then the surprise came when the newspapers quoted the President as saying that he was going to leave the entire matter with the Agriculture Department. From every section of the cotton-producing States came a storm of protest against this unlawful, unjust, and unwarranted action, and yet the President took no action to have Mr. Jardine retire. The Dallas News in its issue of September 17, 1927, had the following to say about this prediction by the Department of Agriculture:

"The rumor that cotton was going down and that somebody or other in the Department of Agriculture had said so resulted in the serious embarrassment of many traders in cotton. Some of them may well have been brought to extreme distress by it. And there were undoubtedly many cotton farmers who parted with their cotton on the spot market at a disadvantage in consequence of the trend of quotations.

"The explanation of how it all came about is incomplete. It appears almost lame. The Associated Press on the day following the occurrence sought out the office from which the 'announcement' was supposed to have come, and learned that the chief of the bureau was absent from his desk. His assistant, the acting chief, was gone. In fact, nobody was there to explain except the publicity man for the bureau. And he rolled up his sleeves and did as good a job of explanation as he could.

"His opening statement was, as the Associated Press paraphrased it, that the declaration complained of 'was contained in a publication of limited circulation intended primarily for economists and field agents.' The date of that publication is not given, but it is stated that it was almost identical with a cotton-price review published a month ago. His third item of information was that the price prediction was not issued as a regular press release.

"From this it appears to have been a reiteration of a prediction of price made 30 days ago. Although it was the repetition, rather than the original guess, which gained attention and caused a drop in the market, it is not the repetition so much as the practice of price pre-

diction itself which seems objectionable. While it is a fact that economists and statisticians have toyed at times with mathematical means of predicting price trends in the cotton market, it is also a fact that the weather and the weevil and the cotton planter of the American farmer have made these theoretical results look altogether silly. If this is what the bureau has been attempting, it ought to discontinue operations in that direction at once.

"The Department of Agriculture is trying to help the farmer, but in a number of its ramifications it is performing unnecessary labors to the hurt of the farmer, rather than otherwise. Of course, in price predicting the guess might be for an unwarranted rise next time, so that the farmer would temporarily gain, just as he has temporarily lost. But guesswork about cotton can not long be an aid to agriculture. If the farm needs any guessing, the farmer can do his own guessing. He has had enough practice to be at least as shrewd at it as any group of swivel-chair specialists in a Washington bureau."

The fact is that every time ginners' reports and other information has come out to show a small cotton crop Mr. Jardine has always had a statement to counteract the effect of such facts and to bear the cotton market. He has done this so often that he is known to cotton raisers as "Beardine." As long as we are handicapped with "Jardine" or "Beardine," and the failure and refusal of a Republican Congress to carry out its platform demands for the relief of agriculture, we are left helpless for the present; but knowing the temper of the American people, their desire for fair play, this fight will go on until the question is settled and settled right. In the language of old—

"I never could believe that Providence had sent a few men into the world, ready booted and spurred to ride, and millions ready saddled and bridled to be ridden."

REREFERENCE OF A BILL

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent to change the reference of the bill S. 1218 from the War Claims Committee to the Committee on Claims. Both chairmen have agreed to the reference.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

CERTAIN AMENDMENTS TO THE CONSTITUTION

Mr. TILSON. Mr. Speaker, there are a number of requests for permission to extend remarks in the RECORD. I have been requested to ask, and I now ask, that all Members of the House may have the right to extend their own remarks in the RECORD, for not to exceed five legislative days, on the subject of the proposed constitutional amendment that has just been rejected.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MAJOR of Illinois. Mr. Speaker and Members of the House, this resolution, generally designated as the Norris resolution, which has to do with the beginning of the congressional and presidential term, is in my opinion one of the most important questions to be considered by Congress during the present decade. By its provisions some very material and vital parts of our governmental machinery are to be changed. The people of this Republic have been slow and hesitant in changing and adding to the fundamental law of the land. Proof of this assertion is found in the fact that there have really been only nine amendments added to the Constitution in a period of a century and a half. This reluctance to change the basic law is not to be criticized, but rather a subject of commendation. It should not be changed for light and transient reasons, but only when it will either inure to the certain benefit or welfare of the people, or will enable the Government to function more readily and responsively to their desires.

The original Constitution provides that the President and Vice President should hold office for four years, Members of the Senate for six years, and that Members of the House be elected every second year. It was also originally provided that Congress assemble at least once in each year and that such meeting be had on the first Monday in December. Strange as it may seem, and contrary no doubt to prevalent opinion among those who have not investigated the subject, the Constitution did not fix the time of the commencement of either the presidential or congressional terms. A resolution was passed by the Congress of the Confederation, fixing the first Wednesday in March, 1789, to begin proceedings under the Constitution, and as that time fell on the 4th day of March, and as the Constitution fixed the length of the terms, they have since commenced and expired on that date.

If the authors of the Constitution had tried deliberately to pick the worst time for the annual meeting of Congress, they could not have succeeded better than by fixing the date as they did. There can be little question, I think, but what this date was fixed more as a matter of chance than as deliberate judgment of those in authority as to the most convenient and best time for the commencement of these terms. In theory it is a governmental monstrosity; in practice, undemocratic; and has produced a situation inimical to the best interests of the people and a handicap to their chosen Representatives.

The ridiculous situation which this system presents is best illustrated by a practical example which is applicable in every congressional district in the United States. Assume, for instance, that Bill Jones defeated Bill Smith at the regular election in November, 1926, for a seat in this body.

The old Congress did not expire until March 4, 1927, and Smith continued to be a Member until that time. Jones then took the oath of office (by mail perhaps) and commenced to draw his salary. However, unless the President had called Congress into extraordinary session, which he did not do, and which rarely happens, Jones, the newly elected Member found there was no session of Congress for him to attend until the first Monday in December, 1927, a period of 13 months after his election. In the meantime, Smith, the defeated candidate, represented his district, or perhaps it would be more appropriate to say he misrepresented it, during the short session which convened on the first Monday in December, 1926. When Jones came to Washington in December, 1927, to attend his first session, there was only four months, if he is from Illinois, and only a few months if from any other State, depending upon the time of the primary in the State he comes from, prior to the time when his successor was to be nominated. In other words, before Congressman Jones had laid his eyes on the Capitol Dome for the first time he must announce either his intention to retire or his candidacy for reelection. In the latter event, if he has an opponent for renomination, he is confronted with the problem of either deserting his post here and returning to his district to engage in the campaign, or remaining here under circumstances not conducive to the rendition of service comparable with his ability. He may answer roll calls, his voice is here, but his thoughts are back home. This quite obviously is not fair to either the Representative or to the people whose servant he is.

Another illustration of the absurdity of our existing system is found in an election contest. Assume that Bill Smith decides to contest the election of Bill Jones, who defeated him on the face of the returns, and who has been issued a certificate of election. He can not institute contest proceedings in any forum except here in the House. He could not file his petition for contest until the new Congress assembled 13 months after the election. The matter then would have been referred to the proper election contest committee, which, if the contest was not too complicated, would be expected in the ordinary course to make a report in time for the House to pass upon the same before it adjourns, perhaps 18 or 20 months after the election, and only shortly before it is time to elect a new Member. If the House decides the contest in favor of Smith, his term has almost expired before he is seated, and the district has been represented by Jones, who the House now decides was not elected, and the Government is compelled to pay both men their salaries as Representatives of the same district.

As heretofore suggested, under our present system Congress convenes on the first Monday in December of each year. It takes several days to organize, make committee assignments, and set the legislative machinery in motion. By the time that is accomplished, it is time to adjourn for the holiday recess; so little, if anything, can hope to be accomplished before the new year. Under this proposed plan Congress is to meet annually on the 4th day of January.

Under the proposed plan, as under the present plan, there will be two regular sessions of Congress during each two-year term, but under the former plan both sessions will be held between elections, while under the latter or present plan one session is held before the election and one after. In other words, under our system at present, a Member who is a candidate for reelection has only served one session, and that under difficulties, heretofore suggested, when he asks his district to return him. This is quite unfair to the Member himself, as well as his constituents. As now proposed, both sessions will have been served and the Members' record, good or bad, will have been made. The voters of his district can then intelligently determine whether his record merits a continuation of their confidence.

I have directed my remarks to the resolution as it affects the Members of the House, but the same logic, although perhaps to a less degree, is applicable to the situation as it affects the commencement of presidential terms. In the latter case there is a period of four months between the election and the inauguration of the President, which is entirely too long. It is a situation calculated to produce a period of stagnation in governmental activities. The people may have expressed a desire for a radical change in governmental policies, and yet the person who is elected President is not permitted to assume his office for four

months. In the meantime, the outgoing administration, which perhaps has been repudiated in the election, out of deference to the incoming administration, if for no other reason, is quite likely to do nothing.

History presents a striking illustration of the evil of this system in the period which followed Lincoln's first election. Elected in November, 1860, he could not take the oath of office and assume the reins of government until March 4, 1861. If he had been at the helm during those four months, his genius for conciliation might have prevented the formation of the Confederacy, and it is well within the bounds of possibility that the terrible Civil War could have been averted. As it was, South Carolina seceded in November, 1860, and with six other States sent delegates to a Confederate convention at Montgomery, Ala., in February, 1861. Meanwhile, the Government was drifting helplessly in the conflicting currents, with President Buchanan, whose party had been repudiated at the polls, at its helm. He did not, like Lincoln, have a mandate to deal with secession. Indeed, his only mandate was to get out, and for four months of the most critical character he was unable to either get out or to deal vigorously and authoritatively with the greatest crisis in our history. Before Lincoln stepped in, the Confederacy was formed and the terrible conflict was on.

When the Government was formed there no doubt was reason for having a considerable space of time between election and the date when the newly elected President and Congress should take office. In those days it took weeks and perhaps months to learn the results of an election, and even longer for the newly elected officers to travel from their homes to the Capital. My understanding is that the Congressional Cemetery was originally laid out largely as a burial place for governmental officials who died while serving their country here in Washington. In the early period they were too far from home to be returned. Among those interred in that cemetery are 13 Senators and 60 Members of the House.

This is merely an illustration of how conditions have changed so far as they are affected by time and distance. Now, the results of elections are known within a few hours after the polls close, and with the modern facilities of transportation the newly elected officers can travel from any part of the United States to Washington in a few days. Another reason which no longer exists is that the Constitution originally provided for the election of Senators by the legislatures of various States, which generally did not meet until after the first of the year, and oftentimes late in the spring following the election of Members of the House and the President; but since this has been changed so that Senators are now elected at the same time as Members of the House and the President.

The first two sections of the resolution now before the House are as follows:

SECTION 1. The terms of the President and Vice President shall end at noon on the 24th day of January, and the terms of Senators and Representatives at noon on the 4th day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

SEC. 2. The Congress shall assemble at least once in every year. In each odd-numbered year such meeting shall be on the 4th day of January unless they shall by law appoint a different day. In each even-numbered year such meeting shall be on the 4th day of January, and the session shall not continue after noon on the 4th day of May.

These sections of this resolution are substantially the same as the ones contained in the resolution which has recently passed the Senate, with the exception of section 2, which is a wide departure from the Senate provision and which, in my opinion, would detract immeasurably from the merits of the matter in question. Section 2 of the Senate resolution reads as follows:

The Congress shall assemble at least once in every two years, and such meeting shall begin at noon on the 2d day of January unless they shall by law appoint a different day.

The most urgent reason for this proposed change in the Constitution is to rid us of the so-called "lame duck" session, which permits Congress to legislate after many of its Members have been defeated, and who are not as responsive to the desires and wishes of the people as they otherwise might be. The resolution before us, like the one which passed the Senate, remedies this situation.

The next reason in importance which demands this change is to rid us of the short session of the Congress. At present the short session ends at noon on the 4th day of March following the election. In other words, when the hands of the clock point straight up on that day Congress is adjourned by operation of law, whether its work is complete or not, and experience has shown that this has produced an undesirable legislative condition, and one which usually ends in confusion. In the closing days of such a session, bad laws get through, meritorious proposals are defeated, and many matters of importance are not even considered on account of this situation, and the result is dissatisfaction, not only on the part of Members of Congress, but on the part of the people generally. As is said in the report submitted by the Judiciary Committee of the Senate:

Jokers sometimes get on the statutes because Members do not have an opportunity, for the want of time, to give them proper consideration. Mistakes of a serious nature creep into all kinds of statutes which often nullify the real intent of the lawmakers, and the result is disappointment throughout the country. Such a congested condition in the National Legislature can not bring about good results. However diligent and industrious Members of Congress may be, it is a physical impossibility for them to do good work. Moreover, it enables a few Members of Congress to arbitrarily prevent the passage of laws simply by the consumption of time.

An ideal situation is created for a filibuster, as a few Members, or even one Member can, when they know that Congress is to adjourn at a certain hour, consume the entire time by talking, which they would not do, and perhaps could not do if a date for adjournment was not fixed by law. It is, therefore, in view of past experience, rather remarkable that the committee would report this resolution providing:

In each even-numbered year such meeting shall be on the 4th day of January, and the session shall not continue after noon on the 4th day of May.

A limitation is placed upon this session which makes it only a slight improvement over our present system. In other words, it creates a situation only a little bit better than one which is admittedly bad. This feature of the resolution is especially remarkable in view of the fact that it passed the Senate without limitation on either session on February 13, 1923, again on the 14th day of March, 1924, again on the 15th day of February, 1926, and again on the 4th day of January of the present year, with not to exceed six votes against it on either occasion. It also was reported from the committee of this House on the 22d day of February, 1923, on the 15th day of April, 1924, and again on the 24th day of February, 1926, and on each of these occasions the proposed resolution contained no limitation upon the length of either session. What has produced this sudden change which caused the committee to include such a limitation in this present resolution? The committee report accompanying the resolution makes no explanation except one that is based upon the convenience of the members. The argument seems to be that this limitation will enable Members in campaign years to get away from Washington in time to conduct their campaigns for reelection. Surely in view of our past experience this is a matter far too important to be determined by any such considerations. There are forces in this country no doubt who desire all possible limitations upon the powers of Congress. Their interests are not the interests of the people. To say that Congress must adjourn at a certain hour, regardless of its desires or wishes, is the equivalent of saying that it does not possess the judgment or discretion to know when it should adjourn. I do not subscribe to such theory. Congress should be able and should be left free to determine when its sessions shall adjourn. I am opposed to this limitation and hope the resolution will pass the House with it eliminated.

Sections 3 and 4 of the resolution are meritorious. They confer upon the House the power of electing a President, whenever the right of choice devolves upon it, after the time fixed for the beginning of his term in the event it should not be able to choose a President before that time. Congress is also given power to provide for the case of death of both the President and Vice President elect. The present Constitution makes no provision for such contingencies, and conditions might arise where such lack of authority would cause a very embarrassing situation.

The important thing, however, vitally important to the welfare of the Republic is to abolish the lame-duck session, eliminate the short session, and provide for the commencement of congressional and presidential terms at a time after the election not so remote that the voice of the people will have been spoken in vain.

Mr. PRALL. Mr. Speaker, I have listened very attentively and patiently to many of my colleagues during two long days of debate, many of whom are in favor of again amending the Constitution, and to others in opposition. After listening to the interesting, instructive, and illuminating addresses upon the subject, I am reminded that after all it is a good old Constitution. It is beyond question the greatest document ever conceived by man for the proper government of a great Nation.

It has successfully carried us through peace times and war times—through times of prosperity and adversity.

During its 139 years of existence many proposals to change its wise and far-seeing provisions have been attempted, and with few exceptions these attempts have failed, all of which goes to prove that the representatives of the people still have faith in the wisdom of our forefathers who conceived it. It is no wonder we hesitate to change its provisions when all about us we find constantly changing chaotic conditions in other governments.

Some have said we already have amended our Constitution, and that is true. One notable amendment, won after nearly a century of effort, which has merited the commendation of the country, was the nineteenth, and which ended suffrage discrimination by extending to women the right to vote. That amendment has proven universally satisfactory and popular, but not so much can be said of the eighteenth. The latter has taken from the pockets of the taxpayers millions of dollars in money; it has been productive of graft, perjury, and other unlawful acts, including that of murder, in its attempted enforcement. The anticipated benefits did not materialize. The object sought has signally failed. The Constitution was amended in a vain attempt to force prohibition. The people want "temperance," not "prohibition." So it is apparent that mistakes may be and have been made by tinkering with the Constitution.

It has been well said in this debate that in attempting to amend the Constitution it should not be done hastily. In legislating for more than a hundred million people, conservative and deliberate rather than hasty consideration should be the rule. Snap judgment and haste should have no place in this body. One of the chief concerns of every Representative should be to discourage rather than encourage the ambitions of those who are ever ready to shoot holes through the Constitution. You may depend upon it, there is a far greater demand for a repeal of the Volstead law than is evidenced in the proposed amendment now before us.

As incredible as it may seem, there are those who would amend the Constitution to the end that the power now vested in the Supreme Court of the United States would be destroyed, by the reenactment by this House of any law which might have been declared unconstitutional by that court. What a fatal legislative mistake it would be if such an atrocious amendment should carry.

Some who favor this amendment are apprehensive lest the so-called lame ducks, upon retiring or meeting defeat in the elections, would prove a menace, or, perhaps, be no longer interested in the work of Congress. In view of what has been said on this floor, we need have no concern about that.

Men who have served in this body are not of the type who lose their patriotism or love of country. They are men who would not under any circumstances advocate or support unwise or vicious legislation because of their voluntary or enforced retirement by failure to win the elections.

Contrary to that idea it has been disclosed in this debate that some of the most illustrious Members of this House have at some time in their political careers failed to return here due to primary or election reversals. Included in this group are the late William McKinley, who thereafter became President of the United States; Hill, of Maryland; Lineberger, of California; the late Secretary of War Weeks, Postmaster General New, Speaker Champ Clark, and our own present Speaker, NICHOLAS LONGWORTH, have all served in this House as so-called lame ducks, but who is there to-day who will question one act of any of these gentlemen, or, in fact, of many others whom I have not mentioned, while serving the short session following the November elections and their failure to be returned?

The President already has the power to convene Congress at any time he considers the condition of the country demands it. He may call us together on the 4th of March following his inauguration. The beginning of the term of a Representative seems to be the crux of the resolution. The fact that Congress does not convene for 13 months after the elections does not mean that it could not convene if the conditions demanded it. Members of Congress assume the duties of their office on March 4, and at any time thereafter and before the following December, which is the time fixed, they may be called to convene. But I wonder if the people of the country want it convened earlier. Business is usually upset and uncertain during presidential and congressional campaigns. New issues develop in campaigns, and it is only after they are fought and won that the people of the country know what to expect. It requires time for them to settle down, to adjust their affairs to meet the conditions expected to prevail under a new incoming administration. Therefore the resolution before us is not vital. Its object can be attained at any time in the discretion of the President, and any President having the confidence of the people, as expressed by them in his election, may be trusted to convene Congress in special session when, and only when, it may be necessary. If that is true, and it is true, then why tinker with the Constitution? Leave it alone.

In the present chaotic condition as a result of the adoption of the eighteenth amendment after years of test, I am confident that had the country experienced the ridiculous efforts of enforcement before its adoption, that have become notorious since, its adoption now would be decidedly uncertain. Congress probably would rather consider the modification of its former internal revenue laws to bring about temperance, than to amend the Constitution in a fruitless effort to force prohibition.

Again reverting to the so-called lame duck, I would venture the opinion that if the entire administration, including the President and both Houses, were defeated in one election, it is not to be supposed that, having met defeat, it would attempt to pass laws in defiance of the wishes of the people who had voted it out of power. It would be its aim to rehabilitate the party and reestablish itself in the confidence of the people.

There has been no great demand for this amendment to the Constitution, and I believe the people generally are opposed to further tinkering with it.

We should be devoting our time and effort to locating the elusive and much vaunted Republican "prosperity" our brethren on the other side are talking about. We should solve the problem of unemployment. The people do not want the Constitution amended—they want work. The people do not want the Constitution amended—they want it observed as it was written; they want free speech, a free press, and religious liberty which spells tolerance and patriotism with a big "T" and a big "P."

Mr. SELVIG. Mr. Speaker and Members of the House, the resolution now before the House providing for a constitutional amendment straightening out the twists in congressional and presidential tenure is one of supreme importance to the country.

The many able arguments presented in favor of this resolution leave very little to be added. I desire at this time to state that I am in hearty accord with the purposes to be effected in changing the Constitution of the United States as provided for in the pending resolution.

The principal change involved is the abolition of the so-called "lame-duck" session of Congress. It is this part of the resolution that, in my opinion, is of the greatest importance to the country.

Let me briefly recall the provisions of the Constitution now in effect and the effect of the proposed changes. The Constitution went into operation on March 4, 1789, although ratification had been completed the previous September. It followed that the terms of Members of Congress and of Presidents, being fixed hard and fast as to duration, would always begin and end on March 4. The Constitution also provides that the regular sessions of Congress shall convene on the first Monday in December, with power reserved for Congress to appoint a different day. Members elected in November, therefore, do not take office until the following March 4. In the meanwhile, however, there will have been a session of Congress. This session, lasting from December to March 4, is known as the "lame-duck" session, because it contains Members who may have been defeated in November.

The proposed amendment would start the sessions of Congress as well as terms of Members on January 4. Members elected in November would begin serving in January. In this way the will of the people would go into action immediately, instead of being held in suspension while Members who were not re-elected through their own voluntary retirement or through being retired by will of their constituents continue to exercise authority.

Another result would be the abolition of the alternate short session. Instead of having a short session from December to March 4 every odd-numbered year, all sessions would begin in January and continue until Congress was ready to adjourn. It is clear that under this system many of the worst evils of the filibuster would disappear, since the possibility of effectively tying up Congress's business by protracted delay is good only where there is an imminent and forced adjournment.

The whole argument in favor of the adoption of this resolution can be summed up in the statement that it is not a sound principle for any session of Congress to be held after the people have expressed themselves in any election on any issue except by the new Congress and new Representatives coming into power as the result of that election.

At the present time a new Member elected in November of an even-numbered year does not enter upon his duties as a lawmaker on the floor of the House until the Congress convenes in December of the year following, although his term begins on the 4th of March following his election. Thirteen months elapse before he can take his seat. Thirteen months elapse before the will of the people who elected him can find expression through his voice and vote on the vital issues of the day.

The proposed amendment does away with this archaic system. There may have been a reason for it in the early years of the Republic when means of travel and communication were poor. But this condition no longer exists. Now, the results of a national election are known in every corner of the country within a few days, a few hours, even. Congress, if need be, could be assembled within a very few days after the election day.

The most urgent reason, as I see it, for the adoption of the resolution pending before the House involving proposed changes in the Constitution is to get rid of the "lame-duck" session, which permits Congress to legislate after many of its Members have been defeated, and who are not as responsive to the people as they otherwise might be.

I am opposed also to the limitation regarding the adjournment of Congress, which, in its original form, the resolution fixed at May 4. A fixed date should be eliminated. Congress should be able and should be left free to adjourn when it so chooses.

The debate on this resolution has been conducted on a high plane that reflects credit upon the membership of the House. Every phase of the problem has been presented and discussed. The people will welcome this discussion which throws light on one of the most important issues before them. Popular government will succeed only in the degree that administrative machinery is fashioned to give full expression to the people's needs and desires. I am in favor of this resolution because it is a step in bringing the Congress nearer to the public.

Mr. PEERY. Mr. Speaker, I have followed the debate on this resolution with much interest. I have a profound respect for the Constitution. I believe it should not be amended except for good cause shown, but I also have a profound respect for the amendments to the Constitution. New problems and changing conditions necessitate the adoption of amendments from time to time. If, in the march of progress, the necessity of changed conditions warrant amendments to the Constitution, I believe it is our duty to face the responsibility and, for good cause shown, vote amendments.

The debate has covered a wide range. Some of the opponents of the measure have referred to it in a rather light and cavalier fashion. Some one referred to it as a "quack measure." But can it be that such a resolution, the principle of which has time and again been overwhelmingly indorsed by the American Bar Association, is to be held in such light esteem? Is a measure like this, which has passed the Senate of the United States on three different occasions, to be dismissed by this body with a mere wave of the hand? I think not. The membership of the House on the Democratic side should not be forgetful of the fact that the Democratic Party in its last platform declared in favor of the proposition here involved.

The resolution has been voted down, but I remind the Congress that this will not finally dispose of this question. Like Banquo's ghost it will not down, and at no distant date in the future it will again be before the Congress for determination; and I predict that this measure, or one substantially similar thereto, will eventually pass the Congress.

Ours is a representative government. It is a democracy. It is a government "of the people, for the people, and by the people." The source of power is in the people. The people express their will through the medium of the ballot and their will should be carried into effect through their duly elected representatives. The people constitute their duly elected representatives their agents to voice their will and register their decision in matters of legislation. They may, in the same way that they create that agency, revoke the agency and repudiate the agent. All of this is done through the medium of the ballot box. When the people have so spoken and expressed their will that will should be executed with fidelity and with reasonable promptness. Under existing conditions this is not always done. The people register their will at the November election. In that election they may and do register their repudiation of the agency theretofore existing and yet, under existing conditions, the agent, notwithstanding such repudiation, continues to act as such from December to March 4 in matters of legislation vitally affecting their interest.

The argument going to the individuality of the Members of Congress who fail of reelection is beside the question. I want to believe that all Members of Congress, whether reelected or not, are honest and patriotic. In fact, I object to any aspersions upon these congressional ducks, whether lame or otherwise. I myself am joining the ranks—not of lame ducks, but of retiring ducks. And let us assume that their integrity and patriotism are above question. The fact remains that their views on public questions and proposed legislation may not accord with the views of their people, their constituents, from whom their commission comes. And if the views of a Congressman have been repudiated by his constituents he should give way to the next man whose views are supposed to reflect the will of his constituents. And so it is the underlying principle of representative government that is involved. It rises above the question of men or personality.

And I do not think that the negative argument that no harm has been done in the past by lame-duck Congresses is at all convincing. The further argument that Members who fail of reelection only comprise 12 per cent of the membership is likewise but a negative argument, an argument of degree. The question is, What is the right and proper method of carrying into effect popular and representative government?

Suppose the election should involve a concrete issue on farm relief or suppose there should be submitted a concrete issue on the question of flood control and the people in no unmistakable terms expressed their will on these issues, why should not their will be made effective with reasonable promptness? Why should the matter have to wait for a period of 13 months? Why should those whose agency has been repudiated have their power and authority to legislate to continue for a period extending from December to March?

I remind the Members of the House that the underlying principle here involved has, in substance, been adopted by practically all, if not all, of the States of the Union in their own State constitutions. In my own State of Virginia our constitution has been rewritten more than once. Our last constitution was adopted in 1902. My esteemed colleague, the gentleman from Virginia [Mr. MOORE], was a member of the last constitutional convention and rendered fine service therein. In that constitution we provided for the election of members of the house of delegates every two years. We provided that their terms should begin in the early part of the year following the November election. We wrote into the constitution a provision that the general assembly should meet on the second Wednesday of January immediately following their election and that the term of office of the governor should begin on the 1st of February. We also wrote into our constitution a provision that the session of the general assembly should be limited to 60 days, with a further provision that it might be extended for a further period of 30 days with the concurrence of three-fifths of the members.

Similar constitutional provisions have been adopted by many of the States. Practically all, if not all of them, provide for an early session of the legislature following the election.

They have thereby adopted in substance the fundamental principle underlying this resolution—namely, to provide a proper and prompt legislative arrangement for voicing the will of the people as expressed at the polls and through representatives of their choice and in sympathy with their views.

With the adoption of the Jeffers and Garrett amendments to this resolution, I am glad to vote for the resolution. I think it is in accord with Democratic principles and progressive thought.

Mr. MEAD. Mr. Speaker, I listened with great interest during all the debate on this proposed constitutional amendment and, while the discussion was both interesting and instructive and, although I favor summoning the Congress to earlier sessions, I can not vote for a resolution which endangers and makes uncertain the inauguration of a President of the United States.

The sentiment to advance the convening of the Congress to a date nearer to the time of election is very strong, but at the same time the American people are opposed to hasty action which may result in more harm than good. This resolution imperils the selection of a President and endangers its transference from one man to another. Under the present method, the Congress is organized and has sufficient time in which to count the electoral vote and announce its findings and also to elect a President, if called upon to do so. Therefore we must not disturb this system until a safer one is devised.

Under the provisions of this proposed resolution only 20 days are permitted for the organization of the House, the canvassing of the electoral vote, declaring its result to the country, and the election of a President by the House if such a procedure be necessary. This is not a safe method to adopt. The adoption of this resolution in its present form opens the door to the possibility of having the Nation without a President, and that

situation may lead to most serious consequences—even to the dangers of revolt and civil war.

Let us send this resolution back to the committee until such time as this most serious defect can be remedied. We must make the selection of the President a certainty beyond a doubt. Let us hold to that which has served us so well for so long a time until we find something better to offer in its stead.

Constitutional amendments are not as popular with the American people as they were before the infamous eighteenth amendment was thrust upon them. The loathsome taste of that amendment must be out of their mouths before they will be keen for further change in the fundamental law of the land. The eighteenth amendment with its twin monstrosity, the Volstead law, represents the greatest blunder ever accomplished in a representative democracy. It has failed miserably to bring about any material benefits promised by its advocates, but on the other hand it produced a disrespect for all law; it has been responsible for graft and corruption by Federal officers intrusted with its enforcement; and it has even incited to murder of our citizens in a useless endeavor to enforce an obnoxious law.

When the time arrives for the presentation of an amendment that will make the inauguration of a new President a certainty then I shall be ready and willing to give my aid and support to the adoption of legislation which will convene Congress at an earlier date.

Mr. O'CONNELL. Mr. Speaker, I have sat in this Chamber during the course of the debate and listened with great care and strict attention to these four Members who have favored us with their verbal opinions on both sides of this question.

At the outset let me say with every possible emphasis that after our unfortunate experiment with the lamentable eighteenth amendment I shall be very chary while having the honor of representing my great district in this House to further amend that immortal document, the Constitution of the United States, unless I am able to convince myself beyond a more than reasonable doubt that such an amendment will have a tendency to strengthen and not undermine the old Magna Charta. What effect will the passage and adoption of this resolution have is the decision I must make as we approach a final vote. One newspaper writer tells us in an editorial that—

> The debate in the House revealed an astounding lack of constitutional knowledge on the part of most of the speakers. The discussion revolved largely around the objection of lame-duck sessions, almost completely ignoring the more important changes that were proposed in the resolution. The allegation was repeatedly made that the country demanded these changes and that the Senate had four times approved them.

The facts are, this writer goes on to tell us, that the Norris resolution was changed twenty-six times in the course of debate in that body, finally passing practically by default as many Senators had no interest in the subject, expecting that this House or the legislatures of the States would effect its demise.

Says the New York Times editorial:

> At Washington constitutional amendments are always pullating. Till the country gets out of its mouth, if it ever does, the loathsome taste of the eighteenth, new articles will not be yearned for. The easy American habit of passing a law or adopting an amendment and blissfully awaiting a profound social and political regeneration from mere mechanical changes has come to be distrusted.

For more than 139 years this great document has governed our Republic. When we pause to consider that in all those years it has been amended so infrequently we can not but admire and revere the wisdom of the fathers who builded better than they knew. The constant efforts that have been made to limit the powers of the Supreme Court have been unalterably opposed and resisted, and it remains to-day the bulwark of our jurisdictional institution. We should approach with care and deliberation further amendments to the Constitution. We should keep in mind constantly the fact that we are making a law for more than 100,000,000 people, and that deliberate judgment should govern our every action. I will take my chance with those who are opposing this new dispensation in the full assurance that I am acting according to my oath of office and the dictates of my conscience and serving the best interests of my country and my constituency.

I am prepared to give my aid, my voice, and vote to any movement that will insure the early convening of a new Congress when those intrusted with the duty of presenting a resolution that will make certain the enactment of a law that will remove the ambiguities that are contained in the bill now before the House.

Mr. THOMPSON. Mr. Speaker, I was one of those who voted intentionally against the proposed constitutional amendment to remedy the so-called "lame-drake" session. In my experience, for five terms, in the House of Representatives, I have never been aware that the "lame ducks," erroneously termed, were a menace, or that harm ever came to the Nation because of so-called "lame drakes." The short session of the House, with the so-called lame drakes, always brought good and not bad legislation, because such legislation consisted almost entirely of appropriation bills. There was not time enough to enact further legislation before inauguration on the 4th of March. It was then that the session ended, and a new Congress and new administration began. Mr. McKinley, Mr. Cannon, Mr. LONGWORTH, Mr. Julius Cæsar Burrows, Mr. THEODORE BURTON, and a long line of other illustrious Congressmen have been lame ones themselves, but were frequently returned after the flurry was over, and the Nation had settled down to normalcy.

I voted premeditatedly to preserve the Constitution, in this respect, as it had been written by our fathers. I do not believe in tampering with the constituted law of the land.

I resolved some time ago never to vote for another constitutional amendment, and did not this time. It requires a two-thirds vote to pass a constitutional amendment, and does not require the signature of the President, so I regarded it as a serious vote.

The amendment was defeated by a vote of 209 for and 157 against. The debate in the House was of a lofty character, and some of the best speeches were made that I ever heard in the House. The best points were made by Mr. TUCKER, of Virginia, Mr. MOORE, of Virginia, ex-Governor MONTAGUE, of Virginia, Mr. TEMPLE, of Pennsylvania, Mr. TILSON, of Connecticut, and Mr. CROWTHER, of New York.

I feel that the sacredness of the Constitution was helped to be preserved by my vote, and I am proud of it. It was true that 209 Representatives were carried off their feet and voted for the amendment, and 157 kept their feet on the earth and voted to retain the Constitution as their fathers wrote it. Two hundred and nine votes plus 157 votes make a total of 366 votes cast, and, as it requires a two-thirds vote of all those present and voting, it caused the amendment to be defeated by 35 votes. But there are 435 Members of the House, and 68 did not vote at all. If all had been present and 68 Members had voted and been recorded for the amendment, there would have been but 277 votes for it, which would still lack the necessary two-thirds majority by 13 votes, of the entire membership. Since the Sixty-sixth Congress there has been a turnover of about 12 per cent of the Members and many of these were not defeated Members but those who voluntarily withdrew from public life.

Mr. MORROW. Mr Speaker, regarding Senate Joint Resolution 47, pertaining to the amendment of the Constitution fixing the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress, it would appear to me that no real fundamental change was attempted, which would in any manner affect the original document. True it is that the Constitution of the United States is our fundamental law; that all acts passed by Congress must conform to that Constitution. It is also true that amendments, other than those that attempt to clarify and simplify methods of convening and facilitating the orderly procedure of Congress might tend to weaken the stability of the original law.

In the joint resolution presented and which failed to pass by the required vote there was no need for fear that a law was being enacted which would cause trouble in the interpretation of elections of the future. There were those who felt that the present method suited best those in power now, and in order that their views in the present methods should prevail it was felt necessary that the amendment should fail and the present system continue.

The sticklers for the Constitution originally enacted, under which our Government was organized and has functioned for 139 years, believe that the Constitution was well thought out by the founders of the Nation and that no further amendment is needed at this time.

In opposition to this thought we have the action of the American Bar Association; men of the highest degree of intelligence and constitutional knowledge of any like body in the world; men trained and equipped to express correctly and intelligently a proper opinion upon this very important subject. By resolution they have spoken upon the subject and submitted a unanimous report. The report should have had weight with Congress; the principle of the Senate joint resolution was indorsed unanimously by the bar association. It has been said that lawyers are scholars in this line; certainly they are competent to offer suggestions and advice upon this important resolution.

What is needed in dealing with the Constitution is less of politics and more real thought in the interest of the people.

Of course, all that was sought in the resolution is not necessary. The present time for inaugurating the President is not far wrong. No doubt a date more suitable to weather conditions would be preferable; the inauguration of a President is a national affair and all people in the Nation have a direct interest in the event.

Many journey from a great distance in the country to be present at this national occasion. The entire populace of this city feel a great interest in the event and regard it as an epoch in the history of the Capital. Near-by residents of adjoining States journey to Washington on this day, and an open-air event should be held at a time when the weather will not be too severe for the people to take part therein.

The people of the Nation have been educated to the belief that a Member of Congress elected in November of one year should not wait until the first Monday of December of the succeeding year to take his seat as their representative. The people have spoken in the election; yet under existing law the Representatives does not take office until March 4 and in the short session of Congress there is recess from March 4 to the first Monday in December. As has been so repeatedly referred to during the discussion of the resolution, this is wrong, and while the original document carries this provision, and it has existed and been carried out for almost 140 years, yet the fact remains that this long wait is wrong and needless. Despite the argument of those opposing the resolution, the defeated member, or lame duck as he is known, can not have the same spirit in his work that he had previous to his defeat. Necessarily he must feel that if he has been faithful in his work, that he either had different views from those of his constituency or that they are not in accord with his. He knows further that he must seek other lines for his future career, and his thoughts are directed to that.

In my opinion, the most important point brought out in the discussion of the resolution was that voiced by the gentleman from Tennessee [Mr. BYRNS]. That is, that Members, knowing that the short session must end on March 4, can take advantage of that fact and under the rules existing necessary legislation can be prevented from passage; we had an example of this during the last Congress, when needed appropriations were kept from passage by filibustering in the other Chamber. There is seldom need for filibustering, anyway. When improper legislation is enacted it can be properly checked by a veto.

The question to be settled is the time of the qualification of the Members, and apparently can be solved by legislation by the fixing of a date for the second meeting of Congress in each session. Thus Members elected in November may qualify for such meeting and become active participants in the affairs of Government without waiting until the first Monday of December in the following year. Apparently it is possible to work out by law the change needed without in any manner affecting the question of the election and qualification of the President and Vice President of the United States. The change should, in my opinion, be accomplished.

Mr. GARDNER of Indiana. Mr. Speaker, there has been much discussion in the House on the joint resolution to amend the Constitution as set out in Senate Joint Resolution 47. Many newspapers favored the adoption of this resolution, and many Members of Congress advocated its passage for the purpose of eliminating the so-called "lame-duck" session of Congress. The Constitution, in Article I, section 4, second paragraph, provides:

> The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December unless they shall by law appoint a different day.

If the present so-called "lame-duck" session is a menace to the country, it can now be eliminated by the passage of a law without an amendment to the Constitution. The above provision of the Constitution has been in full force and effect for 140 years. Under that provision of the Constitution the country has prospered and has not been materially damaged. I believe a majority of the people I represent are not in favor of amending the Constitution unless there is a real demand and necessity for so doing. The more I think about amending the Constitution the more I agree with a quotation from an English statesman, expressed on the floor of the House by that able jurist, Congressman MOORE of Virginia, as follows:

> That when it is not necessary to change, it is necessary not to change.

I have a great admiration for the Constitution of the United States and am not in favor of amending the same unless there is a real demand and necessity for amending it. I see no need for amending the Constitution in order to eliminate the so-called "lame-duck" session of Congress when it can now be done by law. As to the fixing the commencement of the terms of the President and Vice President and Members of Congress, I do not see that it is very material whether the terms of these officials begin in January or whether they begin on March 4, as now provided by the Constitution. Other reasons are assigned for the adoption of this proposed amendment, but I do not think those reasons justify the amending of the Constitution. For that reason I did not vote for the passage of the resolution.

Mr. TILSON. Mr. Speaker, the debate on the Norris resolution proposing an amendment to the Constitution was a somewhat unusual one, interesting as well as instructive. It ran for three days. On the first day there was little time asked for in opposition to the resolution. The proponents had practically the entire day to explain the resolution and to give reasons why it should be adopted. As the debate progressed it became more and more apparent that the proponents were not making their case. They were unable to demonstrate the need for the change or to answer with any degree of satisfaction pertinent questions as to the probable effect of some of the provisions of the resolution. There was no concerted effort on the part of an opposition, for there was, in fact, no opposition except as it developed during the debate.

A similar resolution had passed the Senate a number of times, but generally with little or no discussion. It was generally taken for granted that as the Senate had passed it a number of times with practical unanimity it would also pass the House without difficulty. In the Sixty-ninth Congress some criticism was leveled at the leadership of the House for not allowing the resolution to come up for a vote, usually with the implied assumption that if allowed to come to a vote, it would readily pass. During the several years in which the question had been raised by the action in the Senate and the agitation of certain newspapers, little or no general interest in the House had been manifested outside of a few Members.

Much the same situation as that just described has prevailed in the present Congress, and the criticism had become even more personal than before, until, in spite of the fact that little interest had been manifested, I made up my mind that it was best to give it an early place on the program and test whether the House wished to pass it. I then began a critical study of the resolution, using such knowledge of the law as I possess, and the experience gained in more than 20 years of legislative work. The more thought I gave to the proposition the less I thought of it. I soon became convinced that it did not serve the purpose for which it was ostensibly proposed, and that it was full of danger for the future. Many other Members on both sides of the House, after studying the proposal and hearing it discussed on the floor, began to take a like view, and so the opposition grew day by day.

On the second day of the debate more time was asked in which to voice opposition to the resolution, and under the five-minute rule quite as much time was used in opposition as in favor of the resolution. The final vote, decisive as it was, probably fell far short of expressing fully the sentiments of the House at the close of the debate. Developments show that there was no genuine popular demand for the change, and that much of the manufactured agitation had been founded largely upon misapprehension of the effect of the Constitution as applied to this subject, and as to what effect such a change would necessarily have in carrying on the Government.

An analysis of the vote by which the resolution was rejected is interesting. As the question was in no wise a party question Members were entirely free to exercise their best judgment without regard to party regularity or loyalty. While the minority leader supported the resolution—with only a fair measure of his usual zeal, however—quite a number of Members on his side of the aisle, strong in debate and forceful in reasoning, opposed it. The same situation prevailed on our side of the aisle, for while the majority leader, as well as the chairman of the Appropriations Committee [Mr. MADDEN] and the chairman of the Rules Committee [Mr. SNELL], opposed it, quite a number of the very strong men on our side supported the resolution.

It is worthy of note that on the final vote only 25 per cent of the new Members voted against the resolution, which is not to be wondered at, because one of the strongest points made in favor of the resolution was that at present a new Member must wait 13 months, unless an extra session is called, before taking his seat or even the oath of office. Doubtless these 13 months seem interminable to a new Member, and if there were any practical way to eliminate this long wait it would be most desirable for their sake. It is not, however, nearly so bad as it seems to them; and after the new Member has become a veteran and looks back

upon his first term he will probably thank his lucky star that this time did intervene, so that, if possible, his people might forget many of his rash promises made while a candidate, and also that by being saved from rushing directly from the hustings to the forum he was probably saved from the chance of making a fool of himself before he had time to cool off or to get his true bearings.

The newly elected Member will also realize that the time was not lost, even the maximum time now possible, which his 13 months, because, in addition to serving his constituents in caring for their departmental work after March 4, he has time to close up his business affairs at home and properly prepare himself through travel and study to better understand and perform his strictly legislative duties when Congress convenes. Meanwhile he and the other Members elect are actually functioning in their normal between-session duties, and stand ready to legislate whenever in the judgment of the President—who was chosen by the people of all the Union—it seems for the best interests of the public. The President is not infallible; but, as I have said, he is elected by the whole country and is as deeply interested in the welfare of the entire country as anyone else could possibly be. In my judgment the country would be better off to have two comparatively short sessions of Congress, and have Congress meet at any other time only when the public interests demand it.

The resolution was naturally supported by those of that turn of mind who think that whatever is must surely be wrong and ought to be changed, and who regard all motion as progress regardless of the direction in which the movement takes place. On the other hand, it was doubtless opposed by those who take the opposite view, that whatever is is right and must not be changed. Between these extremes are included the bulk of the Membership of the House, and these were not convinced that the proposed amendment was necessary, or that if adopted it would better serve the public welfare.

The three principal reasons urged during the debate and previously in the newspapers for changing the meeting time of Congress were, first, that the time between election and the time of meeting is too long. I deny this, and give it as my best judgment that the present arrangement is the wiser and better one, whereby if the public interests demand it Congress may be brought into session at the end of four months, but if in the judgment of the President the public welfare will not be best served by an early meeting of Congress then to wait until the time now fixed in the Constitution.

The practice of foreign countries in early assembling is cited and made much of, but this is readily disposed of when it is remembered that in this respect our Government, where the legislative and executive powers are separated, is entirely different from any of those countries where the legislative and executive powers are combined so that when one ministry falls and fails to function another must promptly take its place. Who can say that this difference has not added to rather than detracted from the success achieved by our Government? The practice of foreign countries has no analogy to our own, so that arguments based upon it are without substantial foundation. It is undoubtedly true that the result of a compulsory early meeting of Congress would be that Congress would be almost continuously in session. Would the country be better off if this were the case? On the other hand, would it not be a distinct gain if the long session, so-called, might be depended upon to close not later than June 1?

The second point made against the present system is that the short second session readily lends itself to filibustering. Admitting for the sake of the argument that this is true, and that filibustering is necessarily an evil—which I shall deny—this difficulty can be readily disposed of by amending the rules of the Senate. If the prevention of filibustering is desired why should not the agitation be directed toward the application of this simple remedy rather than that of amending the Constitution? There is little danger of filibustering in the House preventing the passage of bills or the adjournment of Congress at the proper time. It might be made so in the Senate without the necessity of a constitutional amendment. Filibusters, however, are not unmixed evils and I will undertake to defend the proposition that by and large the filibusters in our history that have materially changed the course of legislation have been beneficial rather than otherwise.

The third argument, and the one upon which the entire agitation and propaganda have been based, is that Members who have not been elected to the succeeding Congress continue to sit in the short session held after the election. It is claimed that in some way or other a Congress so constituted is not responsive to the will of the people, whatever that loose phrase may mean. The truth is that a Congress does not in any material respect become less responsive to the will of the people because a few Members have failed of reelection. Such an indictment has been so often and so signally refuted that no one who has any respect whatever for himself or for the truth need longer give weight to such an argument. It was in fact abandoned during the discussion of the question in the House, because there was nothing substantial upon which to base it. The proposition can be easily defended that not only our legislators who have not chosen to be candidates, and those who failed of reelection, are as patriotic, honorable, and reliable as other Members, but it can be shown that the legislation enacted at the short sessions of Congress throughout our history ranks equally high as to quality and purpose as the legislation enacted at the first regular sessions. And it must all the while be borne in mind that all the time after four months from the date of the election the new Congress, coming directly from the people, stands ready to meet and legislate, if in the judgment of the President the public interest requires it. No one would claim that in any instance has the country suffered because the President failed to call Congress together early.

It would thus seem that the three principal pillars on which the arguments for a change in the date for the meeting of Congress are founded crumble as the light is turned upon them. Indeed, one might readily undertake to demonstrate the contrary of the three propositions: First, that the elastic period between the election and the meeting of Congress serves the purpose well and is, in fact, better than the proposed plan of constitutionally enforcing an early meeting; second, that on the whole if filibusters accomplish anything at all the result is just as apt to be beneficial as otherwise; and that even if filibustering be an unmixed evil, it can be gotten rid of by the simple process of amending the Rules of the Senate; and, third, that the "lame duck" bugaboo is not only without rhyme or reason, but that the record shows that legislation enacted at the so-called "lame duck" sessions of Congress held after the elections has been quite as wise, quite as useful, and quite as patriotic, if not better than, that enacted at sessions of Congress held immediately preceding the elections.

There is one very strong point in favor of maintaining the present arrangement whereby the outgoing President and Congress deal with the great supply bills without which the Government can not function, which should be referred to here. The Budget system which has accomplished its purpose so effectively for both economy and efficiency, has been worked out during the last seven years in harmony with our present arrangement of fiscal years and meetings of Congress. The preparation of a budget, with the appropriation and allocation of funds under it, is a complete annual cycle. The fiscal year begins July 1, and at the same time the executive departments begin preparations for submitting their estimates for the new year, which must be in the hands of the Director of the Budget by September. The Budget must be ready to submit to Congress in December. The Congress, under the present system, is fully organized and ready to deal with the Budget, the heads of executive departments who submitted the estimates are ready to explain the items touching their several departments, while the outgoing President, who is responsible for the Budget, is still in office until the appropriations based upon the Budget are made.

The Budget must be made up as I have indicated. It is almost inconceivable that a new President, and new heads of executive departments altogether unfamiliar with the Budget, should be compelled to present it to a new Congress and be expected to explain and defend its provisions, or even to assist intelligently, in translating the Budget into wise and careful appropriations. The proposed change would do much toward destroying the efficacy of the Budget system as well as the confidence of the people in this great governmental reform now so well established.

There remains one argument against the proposed change in the date of the meeting of Congress that no one has attempted to answer, and which, in my judgment, is absolutely conclusive against the proposed change. The electoral vote for President and Vice President under the new proposal must be canvassed by the new Congress within 20 days, which is the time intervening between January 4, the date fixed in the resolution for the meeting of Congress, and January 24, the proposed date for the inauguration of the new President, this period beginning just 60 days after the election. To my mind such a change would be a vital and might be a fatal mistake. It must be borne in mind that under the proposed change the House of Representatives would meet in an unorganized state. First, a Speaker must be elected. The instances in which this action has been delayed are too numerous and too well remembered in our history for anyone to ignore them. Several times it has taken weeks to elect a Speaker. When the House is somewhat evenly divided between the major parties, and party spirit runs high,

a small bloc formed for any reason would be able to prevent the election of a Speaker until its demands are met. We need only go back to the beginning of the Sixty-eighth Congress for an illustration, where, if the Presidency of the United States had been involved, a much more serious situation would have been presented.

At the beginning of a Congress, and until organized, the House of Representatives has no rules. To throw a matter upon which depends the Presidency of the United States into the House without rules would be a hazardous proceeding. Chaos might reign indefinitely. Why should we incur such a risk? Under the present system when the Congress meets after an election both bodies are thoroughly organized. The committees have been chosen and are functioning. Any action taken by either body within its proper sphere, or by the two bodies jointly, will be accepted by the people as the action of the Congress constitutionally organized and functioning. No change in the method of canvassing the electoral vote should be accepted that proposes to substitute a newly elected and unorganized body for one that is fully organized and constitutionally ready for the transaction of business.

Three times already, in our brief history, the election of a President has been thrown into the House of Representatives. In each instance the Congress in both branches was fully and completely organized, and fortunate it is for the country that such was the case. Some of these contests ran dangerously near to the time for the inauguration of the new President. If with only the speakership at stake there have been in our brief history numerous long drawn-out and bitter contests before a speaker could be elected and the organization of the House effected, what might we not expect in the future when partisan passions run high and the Presidency of the United States depends upon the outcome?

No substantial reason or purpose has been advanced for the proposed change in the meeting date of Congress that can not be met and accomplished without an amendment of the Constitution, and no sufficient reason has been given why there should be any change of date whatever. George Rothwell Brown, the brilliant columnist of the Washington Post, has accurately, though somewhat caustically, characterized the "lame duck" resolution as "the well-known quack remedy to cure the Constitution of something it isn't suffering from." The Constitution should be amended only when necessity for the change has been demonstrated, and only for the most compelling reasons. The amending clause of the Constitution itself suggests this and experience has proved it. No such reasons were made to appear during a very illuminating discussion that for three days aroused and sustained unusual interest in the House of Representatives. The proposal simply could not stand up under analysis, and so went down by a decisive vote.

Mrs. NORTON of New Jersey. Mr. Speaker, I am voting against Senate Joint Resolution 47. I have read many newspaper editorials against the resolution and some in favor of it.

Personally I am not in favor of "tinkering" with the Constitution; and evidently my constituents were not particularly interested in this amendment, as I did not receive one communication pertaining to the subject.

I read the debate in the Senate when the resolution was considered and debated by that able body, who passed it, I am told, knowing it would be defeated in the House. Three times, I understand, this amendment in many different forms has been sent to the House for consideration and three times failed to come up for action. Why? I understand many Members were afraid of it; considered it dangerous legislation; others frankly admitted it was too deep a subject to pass upon lightly; and the remaining Members' sole thought was to abolish the so-called lame-duck session.

I recall, when I was elected to Congress, I had to wait for 13 months to be sworn in office; but while I did not take the oath of office until the following December, I did carry on the duties of my office and was able to take care of my constituents in various ways.

It is difficult to foresee when the expression "lame duck" may come home. If this proposed amendment is merely to abolish this session, I fail to see why it can not be accomplished by an act of Congress rather than an amendment to the Constitution.

The Constitution, which has been in full force and effect for 140 years, provides in Article I, section 4, second paragraph:

> The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December unless they shall by law appoint a different day.

When it is not necessary to change the Constitution, why change it? I see no need for amending the Constitution in order to eliminate the so-called "lame-duck session."

In past experiences with amendments to the Constitution we find that some amendments have not worked very well; others poorly; and still later ones not at all.

Constitutional amendments are not popular with the American people, owing to the manner in which the infamous eighteenth amendment was put over. It has failed miserably; it has produced only a disrespect for all law.

I hail from the State of New Jersey, which helped frame the original Constitution. I do not believe in tampering with the constituted law of the land. New Jersey does not favor constitutional amendments. It has learned that it is easy to put in an amendment but almost impossible to take it out.

I have only finished my first term in Congress, and commencing a second. I do not pretend to know constitutional law; and yet, I was amazed by the lack of it when the resolution was before the House. The debate was not convincing; therefore, I feel that I have upheld the sacredness of the Constitution by my vote; and I am prepared to give my voice and vote to any movement to bring about the convening of Congress at an earlier date by law rather than an amendment to the Constitution.

Mr. HARE. Mr. Speaker and gentlemen of the House, it appears to me that the primary purpose of this resolution is to amend the Constitution so as to change the date for Congress to meet on or about the first Monday in January of each year instead of the first Monday in December and adjourn May 4, on every odd year instead of March 4, as now provided. This seems to be the main and about the only reason, because practically all the arguments are directed to this provision.

For my part I can see no real objection to changing the dates, but I do not see the necessity to amend the Constitution in order to do so, for every high-school boy in the country knows that Congress itself has the right to fix the dates on which it shall convene or adjourn. In Article I, section 4, of the Constitution we find the following:

> The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

It is clear, therefore, that Congress not only has the right, but the implied duty, by law, to fix the date when it will convene or adjourn. There is no necessity whatever to require the people of the States or the legislatures thereof to go to the trouble and expense of amending the Constitution, and possibly wait seven years for them to do it, in order to do what may be done right here in less than 30 minutes. As a matter of fact, the First Congress that met after the adoption of the Constitution did not meet in the first Monday in December, but pursuant to a resolution adopted by the Continental Congress convened on March 4. Since that date Congress has passed 17 different acts providing for the convening of Congress on dates other than the first Monday in December. My suggestion, therefore, is that the committee bring in a bill asking that a law be passed changing the dates, if necessary, and let us decide on the matter here and now, and not put the people or the legislatures of the various States to the trouble and expense of doing what we can do ourselves.

Mr. LETTS. Mr. Speaker, much of the debate on this proposed amendment to the Constitution would have been more appropriate to an original discussion of governmental methods. The fathers debated this very thing and, in their wisdom, put into the constitutional provision an exact answer to the proposition.

This proposed amendment was drawn originally to do away with the so-called "lame duck." A lame duck is a bird who has been defeated; a Member of Congress who has not been reelected. The lame duck now continues to serve after his defeat in November until the 4th day of March following. The proposed amendment would still permit him to serve after his defeat in November until January 4. If he wishes to do harm, he can do it in two months as easily as in four months.

The Constitution as written by the fathers provides that Congress shall convene on the first Monday in December in each year unless it shall determine to convene upon another or other dates. It would be simple enough, if occasion required, to regulate that matter by a simple resolution of Congress to convene in the afternoon of the 4th day of March. I have therefore sought the purpose of this proposed amendment. What is the occasion for it? What is wrong, and what is to be corrected?

Mr. Speaker, ours is a republic, not a democracy. The people rule through chosen representatives. They go to the polls in November and elect Members of the House and of the Senate. They do not demand immediate legislative action. What they want is wisdom in legislation. It is not the will of the people that their representatives should legislate as a matter of snap

judgment. They want deliberate action and desire that all matters of legislative consideration should be settled right.

The proposed amendment would not greatly hasten legislation upon important matters. As a matter of practical illustration, the whole country wants flood control, and it is the purpose of Congress to provide in a legislative way for such control. It has been found necessary, however, to make a careful and comprehensive survey of the flood area; Government engineers, congressional committees, individual Members of the House and of the Senate, and many public-spirited citizens have devoted themselves intensively to a study of this engrossing problem. We have not reached our conclusions and can not immediately do so. Legislation upon that important matter must rest upon well-understood facts. No great problem can be hastily considered if dealt with in a satisfactory manner. The proposed amendment would increase the volume of bad laws on our statute books.

Mr. Speaker, I find nothing in the present situation which justifies me in lending my support to this movement. The constitutional provision which is here assailed has served our purposes for 140 years and no harm has resulted from it. If no mischief exists, no remedy is required. I would not alter my house at great expense and inconvenience unless I were first satisfied that the house when remodeled would better meet my requirements. Reputable surgeons do not operate until a satisfactory diagnosis reveals an evil condition. Our forefathers intentionally provided that the manner of amending the Constitution should be rather difficult. It is the fundamental law of the land and should contain only fundamental principles of government suitable for a free people. To say that I, a Member of Congress, should vote for this resolution to allow the people through the various State legislatures to express their will is to express the desire to avoid my own responsibility. I believe in the political philosophy of the fathers. They intentionally provided that Congress should first be satisfied of the wisdom of a proposed amendment before it should be certified for ratification.

I think there is some desire in the minds of the people for this constitutional change, but the demand is not insistent. A Representative in Congress should respect the wishes of those he represents, but he should not be so sensitive as to allow his judgment to be swayed and to act other than honestly for himself and the country. The mariner does not discard his chart and compass every time an electrical disturbance bobbles the needle.

Mr. Speaker, my reflections bring to mind the demands for the referendum and the recall, for the recall of judges, and for the recall of judicial decisions. They remind me of the periodical, though insistent, demand for the abolition of the jury system. They cause me to recollect a recent campaign issue put out by an independent candidate for the Presidency, whereby he proposed to permit Congress to override the judicial action of the Supreme Court and thereby pass upon the constitutionality of its legislative acts, thus invading the province of the judiciary and destroying the independence of that important branch of our Government.

In my judgment, that campaign had a very wholesome effect throughout the country. It made the American people, for a time, at least, intense students of the American Constitution and of the history of its adoption. At the close of that campaign the people of this great country understood better than they had before the nature of that great document which stands as a guaranty of our liberties.

Mr. Speaker, our Government is composed of three coordinate branches. The strength of our Government depends upon how successful we may be in maintaining the independence of these various branches. Almost every proposed amendment would in some way or other destroy the independence of one of such coordinate branches of the Government. For my part, I shall resist the present attempt and all future efforts to amend the Constitution, except for impelling reasons which make it clear that an evil exists which threatens our liberties. No such claim is made by the proponents of this measure.

It would seem that Congress may, within its present powers, correct all the existing evils which have been pointed out in this debate. I will favor a resolution which will convene a new Congress in March following its election.

Some men say that the Constitution is not a sacred thing. However that may be, it is our heritage—a priceless possession. It is emblematic of America's gift to the world in the science of government. To hold it inviolate will best preserve our national traditions; to uselessly assault it is to destroy it. To destroy the Constitution is to break down the system of representative government.

Mr. COHEN. Mr. Speaker, I do not believe the American people as a whole are very strong for constitutional amendments and I think the majority of them feel that the Constitution, under which we have managed to get along wonderfully well for the past 140 years is good enough for them as it is without changing it.

I do feel the present system of convening Congress should be changed, but I do not think the amendment before us is the proper vehicle and that it might better be done by a law than an amendment.

I approve of the elected Member taking his seat before the passing of 13 months. Yet, while I was not sworn in as Representative of my district in New York until that length of time had elapsed, my office was open every day and my services at the command of my constituents during that interval, and I can truthfully say I was able to assist many of them in various matters of importance to them in the different departments and bureaus.

I think one of the most objectionable features of the amendment was the allowance of only 20 days to organize the House before passing upon the election of the President and Vice President, where in the history of Congress it has taken once three months, once a month, and a number of times it has taken a number of days to elect a Speaker and organize the House. In the event of the inability of the House to organize and to elect the President in the time specified, I feel the business of the community would be greatly upset, and it might even become a calamity.

I hope this change, which has been debated in both the House and the Senate in several Congresses, may be brought about so that the Constitution, so ably perfected by our forefathers, will, through this amendment, be changed to meet present conditions.

Mr. KADING. Mr. Speaker and Members of the House, this bill aims to amend the Constitution in the manner indicated by its title. The proposed amendment, among other matters, first provides for the correction of certain apparent defects and unsatisfactory conditions in our Constitution as it now exists, relative to the choosing of a President in the event the President elect dies after his election in November, and before his term in office begins on March 4 of the year following such election.

Another portion of the amendment is intended to do away with the present delay of a newly elected Member of Congress in participating in the first session of Congress after his election. Under the Constitution, as it is now, such new Member attends his first session of Congress—except in case of a special session—about 13 months after his election. Under the proposed amendment he would attend his first session of Congress, which would be in January, about two months after his election, thus eliminating the so-called lame-duck Member who voluntarily retires or who is defeated at an election from serving through an entire session of Congress after such voluntary retirement or failure to be reelected.

Under our Constitution all of the 435 Representatives in the House and 32 of the 96 Senators in the Senate are elected every two years. The election takes place in November, and the term of all such Representatives and one-third of the Senators begins on the 4th day of the following March. Each Representative so elected for a period of two years takes part in two sessions of Congress. The first is known as the long session and begins on the first Monday of December, 13 months after his election, and continues until about June following the beginning of such session in December preceding. The second session is known as the short session, which begins on the first Monday of December after new Members have been elected and continues to March 4 of the year following, when the term of the newly elected Member begins. The result of matters as our Constitution now is gives the outgoing Members one session of Congress after the new Congress has been elected and prevents the newly elected Congressman from participating in an actual session of Congress until about 13 months after his election. This is considered by me as unsatisfactory. The people generally are demanding an amendment of the Constitution so that the term of the newly elected Representatives and newly elected Senators will begin within a reasonable time after their election. This demand is heard on all sides, and is further reflected by newspaper reports and newspaper editorials.

Under the proposed amendment the terms of such newly elected Representatives and newly elected Senators would begin in January succeeding the November when elected, and would prevent retiring Representatives and retiring Senators from participating in the actual workings of a session of Con-

gress after their voluntary retirement or their retirement because of their constituents not reelecting them.

I desire to contribute a few brief remarks to that part of the amendment which proposes to eliminate such so-called lame-duck session of Congress, as I believe this is of great importance to the country. It is legislation demanded by the people, and if Congress does not enact such legislation now, it will sooner or later be compelled to yield to such popular demand and modernize the Constitution by amending the same in accordance with such demand. It appears very reasonable to me that it should be so amended now. No individual, no business institution, and no corporation would continue an employee for a period of 13 months in the most important affairs of his or its business after having served notice upon such employee that his services are no longer required. It would not be in the best interests of the employer, neither is it in the best interests of our great Government to continue a Representative in Congress for a period of time which will permit him to serve through an entire session of Congress after he has voluntarily decided to retire or has been repudiated by his constituents in refusing to reelect him.

Some of the gentlemen who spoke against this amendment on the floor of this House stated in substance that since the Constitution in its present form has not been amended for a period of 140 years that that is a good argument in favor of continuing the Constitution as it now is without amending the same. I do not consider such argument sound. There may have been a good reason for fixing this long period of time between the time of the election of Representatives and the time for them to come to Washington to attend the first session of Congress in the days when the chief means of travel was by ox team or "on horseback," but that reason certainly does not exist now, when we consider the great progress that has been made in the matter of traveling and the rapid means of travel that we possess and enjoy at this time.

We have made progress in all lines, and amending the Constitution as proposed is, I firmly believe, progress in the matter of modernizing the affairs of this great Government. If the Constitution is amended as proposed, each Congressman will participate in two sessions of Congress, the first beginning in January, shortly following the date of his election, and each of the two sessions of his term in Congress will continue until Congress adjourns, which usually is in May or later, and will give more time for the necessary attention of constantly increasing important legislation.

While ordinarily a great many of the Representatives in Congress are reelected, yet many times nearly the entire membership of Representatives of one party are turned out of office because of the policy represented by that particular party having been repudiated by the people, yet the old lame-duck Congress so repudiated under our Constitution as it now is, remains in charge of legislating for this great Government during an entire session of Congress before those who are elected favoring different policies are permitted to take part in the legislative affairs of our Government. This appears to me to be entirely impractical and wrong.

This Congress is in full possession of the facts in connection with the unsatisfactory condition of our Constitution in the event of a President elect dying before his term of office begins, and this Congress also has full knowledge of the demand of the people to amend the Constitution so as to eliminate the so-called lame-duck session, and I believe that this Congress should promptly meet the situation without delaying the matter and should at this session pass this joint resolution to amend the Constitution accordingly, so that the matter may be submitted for approval to the various State legislatures.

ORDER OF BUSINESS

Mr. TILSON. Mr. Speaker, if I may, I wish to make an announcement. The gentleman from Minnesota [Mr. KNUTSON] is going to call up a pension bill, and, so far as I know, there is nothing else this afternoon except bills coming from that committee.

Mr. WHITE of Maine. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. WHITE of Maine. May we understand that on to-morrow the radio bill, so called, will be taken up?

Mr. TILSON. It is next in order for consideration, as I understand it. The Committee on Rules has given a special rule for the consideration of this bill, and it is expected to follow the business just finished.

Mr. BLACK of New York. Does the gentleman expect to dispose of the radio bill to-morrow?

Mr. TILSON. I can not tell the gentleman.

Mr. LEHLBACH. Mr. Speaker, I would like to ask the gentleman from Maine a question. Will the gentleman agree that after the general debate is finished the committee shall rise, and further consideration of the bill go over until Monday?

Mr. WHITE of Maine. No; I can not agree to that. Here is the situation, if I may state it: To-day is the 9th of March—to-morrow is the 10th. This legislation if it is to be passed at all should be passed and be a law by the 15th day of this month. There are differences between the Senate bill and the committee action. Those differences must be reconciled either here or reconciled in conference. I think time is the very essence of this situation, and if we do not proceed to dispose of this matter in the speediest possible way we might as well not touch it at all.

Mr. CELLER. The gentleman knows that quite a number of Members will be absent. Would not the gentleman like to have them here to vote?

Mr. WHITE of Maine. That depends on how they are going to vote. [Laughter.]

Mr. BLACK of New York. Is it the gentleman's purpose to pass the bill to-morrow?

Mr. WHITE of Maine. It is my purpose, if possible, to dispose of this matter to-morrow.

Mr. CELLER. Would not the gentleman consider the wish of some Members who wish to be absent?

Mr. WHITE of Maine. I would like exceedingly to accommodate the desire of Members, but, as I have said, this is a matter that we should act upon promptly, if we are going to act upon it at all, and I feel constrained to press the matter on the House.

Mr. CELLER. The gentleman realizes that he may not be able to get a quorum to-morrow afternoon?

Mr. WHITE of Maine. If there is no quorum, we will have to deal with that situation when it occurs.

PENSIONS AND INCREASE OF PENSIONS

Mr. KNUTSON. Mr. Speaker, I call up the bill (H. R. 10141) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and so forth, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

I ask unanimous consent that it may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Minnesota calls up the bill (H. R. 10141) and asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

[H. R. 10141, Seventieth Congress, first session]

A bill (H. R. 10141) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Gladys R. Allen, widow of Marvin C. Allen, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $12 per month, with $2 per month additional on account of each of the sailor's minor children under 16 years of age.

The name of William O. Cooper, late of Fifth Battery, Iowa Volunteer Light Artillery, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Ernest W. Raper, late of Company H, Seventh Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $6 per month.

The name of Andrew C. Buker, late of Company H, Nineteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $6 per month.

The name of Samuel L. Fiste, late of Company B, Thirty-first Regiment United States Volunteer Infantry, war with Spain, and pay him a pension at the rate of $24 per month.

The name of Charles B. Wade, late of Eleventh Regiment United States Volunteer Cavalry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Ozias D. Hogue, late of Troop K, First Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Ambrose Hover, late of Company L, First Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Daniel B. Jones, late of band, Sixth Regiment United States Cavalry, war with Spain, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Paulinus G. Huhn, late of Company M, Thirteenth Regiment Minnesota Volunteer Infantry, war with Spain, and pay him a pension at the rate of $72 per month in lieu of that he is now receiving.

The name of Henry Henstorf, late of Company A, Eighth Regiment New York Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Martha E. Jones, dependent mother of John T. Jones, late of Company K, Fourteenth Regiment Minnesota Volunteer Infantry, war with Spain, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of John M. Brown, alias John Bender, late of Company H, Thirty-fourth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $20 per month.

The name of Vonny A. McClaren, late of Battery C, Ninth Regiment United States Field Artillery, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Mathew Nicholson, late of Battery H, Fourth Regiment United States Artillery, war with Spain, and pay him a pension at the rate of $20 per month.

The name of John J. Duffy, late of Service Battery, Twelfth Regiment United States Field Artillery, Regular Establishment, and pay him a pension at the rate of $20 per month.

The name of Mary Eiseser, former widow of Valentine Steil, late of Battery C, First Regiment United States Artillery, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Emma R. Walters, widow of Charles R. Walters, late of Company D, Second Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Mary A. Pickrel, dependent mother of Charles Pickrel, late of Company G, Thirty-ninth Regiment United States Volunteer Infantry, Philippine insurrection, and pay her a pension at the rate of $20 per month.

The name of Eliza Hoag, widow of David Hoag, late of Company H, Thirty-fourth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Catherine Sansom, dependent mother of Joseph Sansom, late of Company K, Twenty-sixth Regiment United States Volunteer Infantry, war with Spain, and pay her a pension at the rate of $20 per month.

The name of George Bingham, late of Company C, Eighth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of James A. Butler, late of Troop B, First Regiment United States Volunteer Cavalry, war with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Edward Shaw, late of Company K, Tenth Regiment United States Infantry, and Quartermaster Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Emily Donahoo, dependent mother of William Becker, late of Company A, Thirty-second Regiment United States Volunteer Infantry, war with Spain, and pay her a pension at the rate of $12 per month.

The name of Charles W. Nelson, late of Company I, Third Regiment Wyoming Volunteer Infantry, National Guard, border defense, and pay him a pension at the rate of $12 per month.

The name of Mamie Lewis, widow of George F. Lewis, late of the United States Marine Corps, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of John Rittner Rodgers, helpless and dependent son of John R. Rodgers, late of Company C, Second Regiment West Virginia Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of James M. Haywood, late of Company A, Blanco County (Texas) Minute Men, Indian wars, and pay him a pension at the rate of $12 per month.

The name of John Stringer, late of Battery B, First Regiment United States Field Artillery (Ninth Battery, United States Field Artillery), Regular Establishment, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Charles W. Paul, late of Company I, Eighth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $72 per month in lieu of that he is now receiving: *Provided*, That the increased rate shall not be paid to him for any period he is an inmate of a State or National soldiers' home.

The name of Charles L. Jenkins, late of Captain Orson P. Miles's company, Utah Militia Cavalry, Indian wars, and pay him a pension at the rate of $30 per month.

The name of Henry Smith, late of Company B, Twenty-second Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Annie E. Harley, dependent mother of Daniel O'C. Harley, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Sarah E. Bascomb, widow of Herbert C. Bascomb, late of Company B, Nineteenth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The name of Marie Higgins, widow of Bert D. Higgins, late of Company G, Fiftieth Regiment Iowa Volunteer Infantry, war with Spain, and pay her a pension at the rate of $20 per month.

The name of Margaret J. Easterling, widow of James M. Easterling, late of Company C, Seventeenth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month, with $2 per month additional on account of the minor children of the soldier under 16 years of age.

The name of Harold P. Waldo, late of Company B, Tenth Regiment Ohio Infantry, war with Spain, and pay him a pension at the rate of $25 per month in lieu of that he is now receiving.

The name of George R. Turner, late of Troop I, Third Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Charles Sabins, late of Sixth Battery, Iowa Volunteer Light Artillery, war with Spain, and pay him a pension at the rate of $15 per month.

The name of Kate Garrity, dependent mother of Joseph P. Garrity, late of Company A, Fiftieth Regiment Iowa Volunteer Infantry, war with Spain, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Flora E. Tyler, former widow of Samuel N. Hudson, late of Company D, Third Regiment Tennessee Volunteer Infantry, Mexican War, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The name of James G. Pearl, late of Company M, Nineteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Jefferson D. Flowers, dependent father of Thomas J. Flowers, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Joseph W. Ricket, late of Company M, Sixth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Flora Fuson, widow of William Fuson, late of Company H, Second Regiment Kentucky Volunteer Infantry, border defense, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of the minor child of the soldier until it reaches the age of 16 years.

The name of William C. Daustin, late of Company G, Sixty-ninth Regiment New York Volunteer Infantry, border defense, and pay him a pension at the rate of $30 per month.

The name of Elizabeth S. Parker, widow of John F. Parker, late lieutenant commander and commander, United States Navy, Regular Establishment, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Minnie Heath, widow of William S. Heath, late of Company L, Twenty-first Regiment Kansas Volunteer Infantry, war with Spain, and pay her a pension at the rate of $30 per month, with $10 per month additional on account of Ralph Heath, the helpless child of the soldier, in lieu of that she is now receiving.

The name of Robert McConnell, helpless and dependent son of John McConnell, late of Captain Sublett's company, Powell's battalion, Missouri Mounted Infantry, Mexican War, and pay him a pension at the rate of $20 per month, the said pension to be paid to a legally appointed guardian.

The name of George William, late of Company B, Fourth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Matthew Page, late of Company A, Eighth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Antonia Haller, widow of Harry Haller, late of Company H, Tenth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Saphrona A. Kirk, dependent mother of Henry T. Kirk, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receving.

The name of John H. Lang, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of John A. Stucker, late of the Sixth Battery, Iowa Volunteer Light Artillery, war with Spain, and pay him a pension at the rate of $15 per month.

The name of Charlie Eliton, late of One hundred and sixty-sixth Company, United States Coast Artillery Corps, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Leander Cook, late of Company C, Fourth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $14 per month.

The name of William C. Croley, late of Company D, First Battalion, United States Engineers, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Julia Ward, dependent mother of Michael J. Ward, late of Company C, Forty-third Regiment United States Volunteer Infantry, Philippine insurrection, and pay her a pension at the rate of $20 per month.

The name of William M. Noel, late of Company M, Ninth Regiment Illinois Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Fred G. Pettigrew, late of Company G, Thirteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Margaret B. Furlow, widow of James W. Furlow, late colonel, United States Army, and pay her a pension at the rate of $40 per month, with $6 per month additional for the minor child of the officer under 16 years of age, in lieu of that she is now receiving.

The name of Isabella Powell, widow of Alford Powell, late of Company K, Twenty-ninth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $12 per month.

The name of Fred G. Bruhl, late of Sixth Battery, Iowa Volunteer Light Artillery, war with Spain, and pay him a pension at the rate of $15 per month.

The name of Ella Davis, helpless and dependent child of Willis W. Davis, late of Captain Dodson's company, Lindsay's Tennessee Mounted Volunteers, Indian wars, and pay her a pension at the rate of $20 per month.

The name of Olympia T. Meena, widow of Stratios Meena, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $20 per month, with $6 per month additional on account of the sailor's children under 16 years of age, in lieu of that she is now receiving.

The name of Larkin B. Wilkins, late of Company B, Third Regiment Kentucky Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Lee Street, late of Battery C, Fifteenth United States Coast Artillery Corps, Regular Establishment, and pay him a pension at the rate of $6 per month.

The name of William M. Robinson, late of Company L, Second Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $6 per month.

The name of Cordelia Crawford, widow of Matt Crawford, late of Company C, Eighth Regiment United States Volunteer Infantry, war with Spain, and pay her a pension at the rate of $20 per month.

The name of William Crawford, late of Company I, Fourteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Glenn E. Koehler, helpless and dependent son of Adolph G. Koehler, late of Companies E and M, Twentieth Regiment United States Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Samuel F. Newson, dependent father of Samuel C. Newson, late of unassigned Coast Artillery Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Sallie Hager, dependent mother of Ernest Hager, late of One hundred and eighteenth Company, United States Coast Artillery Corps, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Alice M. Fowler, dependent mother of Clarence E. Fowler, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Claud Martin, late of Thirty-second Company, United States Coast Artillery, Philippine insurrection, and pay him a pension at the rate of $20 per month.

The name of Andrew J. Owens, late of the One hundred and seventeenth Company, United States Coast Artillery Corps, Philippine insurrection, and pay him a pension at the rate of $20 per month.

The name of Isaac A. Chandler, late of Troop A, Fourth Regiment United States Cavalry, Indian wars, and pay him a pension at the rate of $12 per month.

The name of Melda N. Jennings, late of the United States Marine Corps, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Edward D. Warner, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Charles A. Evans, late of Company G, First Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Frank W. Marsters, dependent father of George H. Marsters, alias George W. Marston, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Elem Cason, late of Company I, Third Regiment Georgia Volunteer Infantry, war with Spain, and pay him a pension at the rate of $12 per month.

The name of George T. Smith, late of Troop M, Second Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Edward W. Reichelt, dependent and helpless child of Hans W. Reichelt, late of Company G, First Regiment Texas Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month, said pension to be paid to a legally appointed guardian.

The name of James Williams, late of Headquarters Battery, Fifteenth Regiment United States Field Artillery, Regular Establishment, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Lillie Ford, widow of Ralph G. Ford, late of Headquarters Troop, Third Regiment United States Cavalry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Emilie Kutzer, dependent mother of William G. Kutzer, late of Company C, Second Regiment Texas National Guard Infantry, border defense, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Charles W. Anderson, late of Company H, Signal Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $90 per month in lieu of that he is now receiving.

The name of John M. Golden, late of Troop G, Third Regiment, United States Cavalry, Regular Establishment, and pay him a pension at the rate of $20 per month.

The name of C. A. Sahms, dependent father of Willie L. Sahms, late of Headquarters Company, Eighth Brigade, United States Army, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Dudley J. Howell, late of Company C, Hospital Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Charles L. Stewart, late of the Forty-second Company, United States Coast Artillery Corps, Regular Establishment, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Elsie M. Hayes, widow of Perley B. Hayes, late of Troop C, Second Regiment Rhode Island National Guard Cavalry, border defense, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of John J. Dewey, dependent father of Edward E. Dewey, late of Company B, Eighth Regiment United States Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Joseph K. Moore, late of Company A, First Battalion United States Engineers, Regular Establishment, and pay him a pension at the rate of $20 per month.

The name of Lillian M. Johnson, widow of Alfred T. Johnson, late of Company M, Signal Corps, United States Army, Regular Establishment, and pay her a pension at the rate of $12 per month, with $2 per month additional on account of each child of the soldier under 16 years of age.

The name of James E. Walker, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $8 per month.

The name of Rutherford B. H. Blazer, late of Company G, First Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Dora Wilson, dependent mother of William Wilson, late of Company B, Eighth Regiment Illinois Volunteer Infantry, war with Spain, and pay her a pension at the rate of $20 per month.

The name of Mary C. Baldwin, dependent mother of Claude E. Baldwin, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Harold A. Canon, late of Company I, Thirty-first Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $8 per month.

The name of Mary Ann Donley, dependent mother of John M. Donley, late of Company M, First Regiment West Virginia Volunteer Infantry, war with Spain, and pay her a pension at the rate of $20 per month.

The name of Zelia Dixon, widow of John Dixon, late of Seventeenth Company, United States Coast Artillery Corps, Regular Establishment, and pay her a pension at the rate of $12 per month, with $2 per month additional on account of the minor children of the soldier under 16 years of age.

The name of James H. McGlasson, late of Company I, Third Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Elizabeth A. Hackman, widow of Frederick Hackman, alias Brooks, late of Company C, Eighth Regiment United States Cavalry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion by Mr. KNUTSON to reconsider the vote whereby the bill was passed was laid on the table.

WINFIELD SCOTT

Mr. KNUTSON. Mr. Speaker, I call up the bill (H. R. 4115) for the relief of Winfield Scott, and I ask unanimous consent

that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Minnesota calls up the bill H. R. 4115 and asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the General Accounting Office is hereby authorized and directed to allow credit to Winfield Scott in the sum of $278.14, to cover travel and expenses in the months of August and September, 1926, incurred in connection with matters pertaining to the Pension Bureau.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider, by Mr. KNUTSON, was laid on the table.

W. LAURENCE HAZARD

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 4116, for the relief of W. Laurence Hazard, which I send to the desk and ask to have read.

The Clerk read the bill, as follows:

Be it enacted, etc., That the General Accounting Office is hereby authorized and directed to allow credit to W. Laurence Hazard in the sum of $167.52, to cover travel and expenses incurred in September, 1926, in connection with investigations of matters pertaining to the Pension Bureau.

The SPEAKER. Is there objection?

There was no objection.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

HARRIET K. CAREY

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 4117) for the relief of Harriet K. Carey, which I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the General Accounting Office is hereby authorized and directed to allow credit to Harriet K. Carey in the sum of $95.02 for travel and expenses incurred in the month of September, 1926, in connection with the investigations of matters pertaining to the Pension Bureau.

The SPEAKER. Is there objection?

There was no objection.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. QUAYLE, for an indefinite period, on account of illness.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the following titles:

H. R. 9293. An act granting the consent of Congress to the Highway Department of the State of Tennessee to construct, maintain, and operate a bridge across the Clinch River on the Sneedville-Rogersville road in Hancock County, Tenn.; and

H. R. 9843. An act to extend the times for commencing and completing the construction of a bridge across the Kanawha River in or near Henderson, W. Va., to a point opposite thereto in or near Point Pleasant, W. Va.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 4 o'clock and 56 minutes p. m.) the House adjourned until to-morrow, Saturday, March 10, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, March 10, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the north Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON PATENTS

(10 a. m.)

To protect trade-marks used on commerce, to authorize the registration of such trade-marks, and for other purposes (H. R. 6683).

EXECUTIVE COMMUNICATIONS, ETC.

400. Under clause 2 of Rule XXIV, a letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of San Francisco Harbor, Calif. (H. Doc. No. 196), was taken from the Speaker's table and referred to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SMITH: Committee on Irrigation and Reclamation. H. R. 11360. A bill to authorize the Secretary of the Interior to convey or transfer certain water rights in connection with the Boise reclamation project; without amendment (Rept. No. 865). Referred to the Committee of the Whole House on the state of the Union.

Mr. SINNOTT: Committee on Irrigation and Reclamation. S. 1186. An act to provide for the construction of the Deschutes project in Oregon, and for other purposes; without amendment (Rept. No. 866). Referred to the Committee of the Whole House on the state of the Union.

Mr. JENKINS: Committee on Immigration and Naturalization. S. 2370. An act to amend section 24 of the immigration act of 1917; without amendment (Rept. No. 867). Referred to the Committee of the Whole House on the state of the Union.

Mr. GIBSON: Committee on the District of Columbia. H. R. 6664. A bill to establish a woman's bureau in the Metropolitan police department of the District of Columbia, and for other purposes; with amendment (Rept. No. 868). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. CARTWRIGHT: Committee on Indian Affairs. H. R. 10327. A bill for the relief of Charles J. Hunt; without amendment (Rept. No. 864). Referred to the Committee of the Whole House.

Mr. HALE: Committee on Naval Affairs. H. R. 7142. A bill for the relief of Frank E. Ridgely, deceased; with amendment (Rept. No. 869). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 11776) granting a pension to Mary A. Dibble, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABERNETHY: A bill (H. R. 11916) to provide for the care and preservation of certain land and monuments in the Washington Parish Burial Ground (Congressional Cemetery); to the Committee on Military Affairs.

By Mr. SPROUL of Illinois: A bill (H. R. 11917) granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWARD of Oklahoma: A bill (H. R. 11918) providing for the construction of a sanatorium and hospital at Claremore, Okla., and providing an appropriation therefor; to the Committee on World War Veterans' Legislation.

By Mr. BURTON: A bill (H. R. 11919) to provide for the construction of a vessel for the Coast Guard; to the Committee on Interstate and Foreign Commerce.

By Mr. WAINWRIGHT: A bill (H. R. 11920) to equalize the basis for longevity pay and retirement of warrant officers of the Army; to the Committee on Military Affairs.

By Mr. WATSON: A bill (H. R. 11921) to prohibit the sending of unsolicited merchandise through the mails; to the Committee on the Post Office and Post Roads.

By Mr. BUTLER: A bill (H. R. 11922) to authorize the Secretary of the Navy to lease the United States naval destroyer and submarine base, Squantum, Mass.; to the Committee on Naval Affairs.

By Mr. GUYER: A bill (H. R. 11923) granting preference in Federal civil service employment to persons honorably discharged from the military or naval service of the United States after service in the Civil War, the Indian wars, the war with Spain, or the World War, their widows, and the wives of disabled veterans of such wars, and for other purposes; to the Committee on the Civil Service.

By Mr. KELLY: A bill (H. R. 11924) to establish a more adequate standard for admission of aliens to citizenship in the United States of America; to the Committee on Immigration and Naturalization.

By Mr. ZIHLMAN: A bill (H. R. 11925) authorizing the Commissioners of the District of Columbia to settle claims and suits against the District of Columbia; to the Committee on the District of Columbia.

By Mr. PORTER: Joint resolution (H. J. Res. 230) to provide for the membership of the United States in the American International Institute for the Protection of Childhood; to the Committee on Foreign Affairs.

By Mr. SOMERS of New York: Joint resolution (H. J. Res. 231) creating a commission to investigate the advisability of removing the navy yard now located at Brooklyn, N. Y., to a more advantageous site on the North Atlantic coast; to the Committee on Rules.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

By Mr. JACOBSTEIN: Memorial of the Legislature of the State of New York, urging Congress to pass the Cooper-Hawes bill that all prison-made goods for State or interstate be plainly marked as such; to the Committee on Labor.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CELLER: A bill (H. R. 11926) granting a pension to Elizabeth Eldard; to the Committee on Invalid Pensions.

By Mr. CONNERY: A bill (H. R. 11927) granting a pension to Melissa Bemis; to the Committee on Invalid Pensions.

By Mr. CRAIL: A bill (H. R. 11928) for the payment to certain citizens damages because of loss by fire of their property in the general mess building of the Pacific Branch of the National Home for Disabled Volunteer Soldiers when said building was destroyed by fire on March 24, 1927; to the Committee on Claims.

By Mr. GOLDSBOROUGH: A bill (H. R. 11929) to carry out the provisions of the Court of Claims in the case of Martha J. Briscoe, widow of John A. Briscoe, deceased; to the Committee on War Claims.

By Mr. KEARNS: A bill (H. R. 11930) granting an increase of pension to Mary E. Hicks; to the Committee on Invalid Pensions.

By Mr. KURTZ: A bill (H. R. 11931) granting an increase of pension to Florence Bowers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11932) granting an increase of pension to Kate C. Closson; to the Committee on Invalid Pensions.

By Mr. McSWAIN: A bill (H. R. 11933) to authorize the burial with military honors of the body of Warren G. Jernegan in Arlington National Cemetery; to the Committee on Military Affairs.

By Mr. MEAD: A bill (H. R. 11934) for the relief of Lehde & Schoenhut; to the Committee on Ways and Means.

By Mr. MERRITT: A bill (H. R. 11935) granting an increase of pension to Henry M. Conlin; to the Committee on Pensions.

By Mr. PORTER (by request): A bill (H. R. 11936) for the relief of Mrs. Fanor Flores and Pedro Flores, citizens of the Republic of Nicaragua; to the Committee on Foreign Affairs.

By Mr. PURNELL: A bill (H. R. 11937) granting an increase of pension to Mary E. Massey; to the Committee on Invalid Pensions.

By Mr. OLIVER of New York: A bill (H. R. 11938) for the relief of Frank Bayer; to the Committee on Claims.

By Mr. ROBSION of Kentucky: A bill (H. R. 11939) granting a pension to Emma Bellew; to the Committee on Invalid Pensions.

By Mr. SMITH: A bill (H. R. 11940) for the relief of C. M. Williamson, C. E. Liljenguist, Lottie Redman, D. R. Johnson, and H. N. Smith; to the Committee on Indian Affairs.

By Mr. SPEAKS: A bill (H. R. 11941) granting a pension to Caroline Allen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11942) granting an increase of pension to Mary Henderlick; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 11943) granting an increase of pension to Sarah Butterfield; to the Committee on Invalid Pensions.

By Mr. TILSON: A bill (H. R. 11944) for the relief of Louise Smith Hopkins, Ruth Smith Hopkins, and A. Otis Birch; to the Committee on Claims.

5181. Also, petition of citizens of Mount Shasta City, Calif., protesting against passage of House bill 78; to the Committee on the District of Columbia.

5182. By Mr. ESTEP: Petition of Mrs. J. D. Jackson and 93 other residents of Pittsburgh, Pa., favoring an increase in pension for the veterans of the Civil War and their widows; to the Committee on Invalid Pensions.

5183. Also, petition of Pennsylvania State Chamber of Commerce, Harrisburg, Pa., opposing the passage by Congress of House bill 6511, introduced by Representative SIROVICH, of New York; to the Committee on Labor.

5184. Also, petition of Department of Pennsylvania, Veterans of Foreign Wars, Harrisburg, Pa., indorsing the plan of President Coolidge for an adequate United States Navy; to the Committee on Naval Affairs.

5185. Also, petition of Iron City Council, No. 171, Fraternal Patriotic Americans, Pittsburgh, Pa., urging restriction of immigration and adequate provisions to enforce the immigration laws; to the Committee on Immigration and Naturalization.

5186. Also, petition of the State executive committee of the American Legion, favoring the Navy program outlined by President Coolidge; to the Committee on Naval Affairs.

5187. By Mr. FOSS: Letter of J. E. Edwards, secretary of the Southern New England Conference, South Lancaster, Mass., together with petition of 306 residents of Leominster and Clinton, Mass., protesting against the passage of House bill 78, known as the Lankford Sunday observance bill; to the Committee on the District of Columbia.

5188. Also, wire of C. S. Munn, South Lancaster, Mass., protesting against the passage of House bill 78, known as the Lankford Sunday observance bill; to the Committee on the District of Columbia.

5189. By Mr. JOHNSON of Washington: Petition of citizens of Aberdeen, Hoquiam, and Tacoma, Wash., protesting against the Lankford Sunday observance bill; to the Committee on the District of Columbia.

5190. By Mr. KETCHAM: Petition of 159 residents of Niles, Mich., protesting against House bill 78, or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

5191. Also, petition of 179 residents of Berrien County, Mich., protesting against the enactment of House bill 78, or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

5192. Also, petition of 200 residents of Benton Harbor, Mich., protesting against House bill 78, or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

5193. Also, petition of 52 residents of Eau Claire, Mich., protesting against enactment of House bill 78, or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

5194. Also, petition of nine residents of Dowagiac, Mich., protesting against the enactment of the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5195. Also, petition of 23 residents of Allegan County, Mich., protesting against the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5196. By Mr. KINDRED: Petition of the Brooklyn Chapter, Reserve Officers' Association of the United States, indorsing bill introduced by Congressman FRANK JAMES, of Michigan (H. R. 11683), providing for a new division in the War Department especially charged with the responsibility of promoting the training and development of activities of the Officers' Reserve Corps, the Reserve Officers' Training Corps, and the citizens' military training camps, and urging the enactment of this and identical bill (S. 3458) introduced in the Senate by Senator REED of Pennsylvania; to the Committee on Military Affairs.

5197. Also, Petition of Elmhurst Post, No. 298, American Legion, to the United States Congress, favoring a Navy second to none and an adequate merchant marine with fast merchant vessels to be used in foreign trade in times of peace and as protective fighting units in the event of war; to the Committee on Naval Affairs.

5198. By Mr. LANKFORD: Petition of Lodge No. 1, International Association of Machinists, in favor of House bill 7759, by Mr. LAGUARDIA; to the Committee on the Judiciary.

5199. Also, petition of Lodge No. 1 of the International Association of Machinists, in support of the Cooper-Hawes convict bill (H. R. 7729); to the Committee on Labor.

5200. Also, petition of the Mothers' Club of St. Paul Methodist Episcopal Church South, Washington, D. C., consisting of 37 members, urging the enactment into law of the Lankford Sunday rest bill (H. R. 78); to the Committee on the District of Columbia.

5201. By Mr. LINDSAY: Petition of National Foreign Trade Council, New York City, setting forth reasons why contentions of tobacco industry who oppose House bill 9195, known as the Cuban parcel post bill, are not well founded; to the Committee on Rules.

5202. Also, petition of Brooklyn Chapter, Reserve Officers' Association of the United States, indorsing House bill 11683, which provides for a new division of the War Department charged with the responsibility of promoting training and development of activities of Officers' Reserve Corps, the Reserve Officers' Training Corps, and the citizens' military training camps; to the Committee on Military Affairs.

5203. By Mr. MERRITT: Petition of sundry citizens of Connecticut, urging the enactment of legislation to increase the pensions of Civil War veterans and their widows; to the Committee on Invalid Pensions.

5204. By Mr. MORROW: Petition of Albuquerque Chapter of Woman's Christian Temperance Union, indorsing Stalker bill (H. R. 9588) providing commensurate penalties for the large bootlegger, by Mrs. Carrie Craft, secretary; to the Committee on the Judiciary.

5205. Also, petition of Journeymen Barbers International Union of America, Local No. 501, Albuquerque, N. Mex., John Carrillo, secretary, indorsing House bill 7729 and Senate bill 1940, relating to convict-made products; to the Committee on Labor.

5206. By Mr. O'CONNELL: A statement by the merchant marine committee of the National Association of Manufacturers, New York, N. Y., with reference to the American merchant marine; to the Committee on the Merchant Marine and Fisheries.

5207. Also, petition of the Clyde Products Co., Clyde, N. Y., opposing the passage of the Capper-Cole bills; to the Committee on Agriculture.

5208. Also, petition of Brooklyn Chapter, Reserve Officers' Association of the United States, Brooklyn, N. Y., favoring the passage of House bill 11633; to the Committee on Invalid Pensions.

5209. Also, petition of the National Foreign Trade Council of New York, with reference to the Cuban parcel post bill (H. R. 9195); to the Committee on Ways and Means.

5210. Also, petition of the Supreme Council, United Sons of Alaska, opposing the passage of House bill 8284; to the Committee on the Territories.

5211. Also, petition of the New York Photo-Engravers' Union, No. 1, of New York City, favoring the passage of Senate bill 2440 and House bill 9575; to the Committee on Printing.

5212. By Mr. PARKS: Petition of citizens of Ouachita and Union Counties, Ark., against compulsory Sunday observance law (H. R. 78); to the Committee on the District of Columbia.

5213. By Mr. QUAYLE: Petition of H. D. Bob Co. (Inc.), New York City, N. Y., favoring the passage of the Hawes-Cooper bill; to the Committee on Invalid Pensions.

5214. Also, petition of Brooklyn Chapter, Reserve Officers' Association of the United States, favoring the passage of House bill 11683 and Senate bill 3458; to the Committee on Military Affairs.

5215. Also, petition of the Citizens Medical Reference Bureau, New York City, opposing the passage of House bills 8182 and 11026 for coordination of health activities and Gorgas Memorial Laboratory; to the Committee on Foreign Affairs.

5216. Also, petition of the New York Council of Churches, New York City, N. Y., opposing a large naval-building program as proposed by the Navy Department; to the Committee on Naval Affairs.

5217. Also, petition of Knights of Columbus, New York State Council, for enactment of legislation providing for full Federal

responsibility in respect to future flood-protection measures in the lower Mississippi Valley; to the Committee on Flood Control.

5218. Also, addresses submitted by the Navy Yard Retirement Association, navy yard, New York, in re retirement legislation; to the Committee on the Civil Service.

5219. Also, petition of New York Photo-Engravers' Union, No. 1, favoring the passage of House bill 9575 and Senate bill 2440; to the Committee on Printing.

5220. By Mr. SHREVE: Petition of numerous residents of Erie and Crawford Counties, Pa., protesting against the passage of the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5221. By Mr. SWING: Petition of citizens of Arlington, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

5222. By Mr. THOMPSON: Petition of citizens of Defiance and Paulding Counties, Ohio, protesting against Sunday legislation for the District of Columbia; to the Committee on the District of Columbia.

5223. Also, petition of citizens of Van Wert County, Ohio, urging the passage of a Civil War pension bill; to the Committee on Invalid Pensions.

5224. By Mr. TINKHAM: Petition of Betsy Ross Tent No. 31, Daughters of Union Veterans of Civil War, for increase in pension of all Civil War veterans and widows of Civil War veterans; to the Committee on Invalid Pensions.

5225. By Mr. WELLER: Petition of the New York State Council of the Knights of Columbus, urging full Federal responsibility in respect to future flood-protection measures in the lower Mississippi Valley; to the Committee on Flood Control.

SENATE

SATURDAY, *March 10, 1928*

(Legislative day of Tuesday, March 6, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate resumes the consideration of the unfinished business, Senate Joint Resolution 46, and the junior Senator from Nebraska [Mr. HOWELL] is entitled to the floor.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. LA FOLLETTE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	Kendrick	Reed, Pa.
Barkley	Edwards	Keyes	Robinson, Ark.
Bayard	Fess	King	Sheppard
Bingham	Fletcher	La Follette	Shipstead
Black	Frazier	McKellar	Shortridge
Blease	George	McLean	Simmons
Borah	Glass	McMaster	Smith
Bratton	Gooding	McNary	Smoot
Brookhart	Gould	Mayfield	Steck
Broussard	Greene	Neely	Steiwer
Bruce	Hale	Norbeck	Stephens
Capper	Harris	Norris	Swanson
Caraway	Harrison	Nye	Thomas
Copeland	Hawes	Oddie	Tydings
Couzens	Hayden	Overman	Tyson
Cutting	Heflin	Phipps	Walsh, Mass.
Dale	Howell	Pine	Walsh, Mont.
Deneen	Johnson	Pittman	Waterman
Dill	Jones	Ransdell	Wheeler

Mr. FESS. My colleague the senior Senator from Ohio [Mr. WILLIS] is absent from the Chamber on important business. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Seventy-six Senators having answered to their names, a quorum is present.

Mr. NORRIS. Mr. President, I ask my colleague to yield while I submit a unanimous-consent request.

Mr. HOWELL. I yield for that purpose.

Mr. NORRIS. I ask unanimous consent that when the Senate completes its business to-day it shall take a recess until 12 o'clock Monday, and that, beginning at 12 o'clock Monday, all speeches on any amendment and on the joint resolution now pending shall be limited to 15 minutes, and that no Senator shall be allowed to speak more than once upon any amendment or upon the joint resolution.

The VICE PRESIDENT. Is there objection?

Mr. BLACK. Mr. President, I object to that arrangement at the present time.

Mr. HARRISON. Mr. President, I hope the Senator from Alabama will not insist upon his objection. I have been wanting to speak for some time during the discussion, and have given way to this Senator and that Senator. There is another rather important piece of legislation which is soon to be before us. It seems to me the agreement would give any Senator ample time, as it allows 30 minutes in which to speak. If we do not get some kind of an agreement we shall be here until the end of next week on the joint resolution.

Mr. McKELLAR. Mr. President, I hope, too, that the Senator from Alabama will withdraw his objection, because we have the flood relief measure coming on very soon, and it is very important to all our people. While I have wanted to speak at some length, I am perfectly willing to cut my remarks down for the occasion.

Mr. ROBINSON of Arkansas. Mr. President, I merely desire to add to what has been said that I think the time has come when some arrangement for the limitation of debate on the joint resolution should be entered into. We have had a very full discussion of the joint resolution and of some of the amendments which have been before us. I believe that nearly all Senators who desire to discuss the measure at length have already spoken. I hope the Senator from Alabama may be able to withdraw his objection.

Mr. BLACK. Mr. President, at the time I made the objection I had not seen my colleague the senior Senator from Alabama [Mr. HEFLIN]. That is the reason why I stated I objected for the present. I did not want an agreement to be reached in his absence or without my having a chance to consult with him. We have no objection.

The VICE PRESIDENT. Without objection, the unanimous-consent agreement is entered into.

The agreement was reduced to writing, as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, by unanimous consent, That when the Senate concludes its business to-day it take a recess until 12 o'clock noon Monday, and that after that hour no Senator shall speak more than once nor longer than 15 minutes upon the joint resolution S. J. Res. 46, the Muscle Shoals resolution, or upon any amendment proposed thereto.

Mr. McNARY. Mr. President, a few days ago I had inserted in the RECORD a report from the Secretary of Agriculture on the pending joint resolution. This morning I have received a very brief report from the Secretary on the so-called Willis-Madden bill, which I should like to have read at the desk by the clerk.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D. C., March 9, 1928.

Hon. CHARLES L. McNARY,
United States Senate.

DEAR SENATOR McNARY: Your letter of January 25, inclosing a copy of S. 2786, has been received. This is a bill introduced by Mr. WILLIS "To authorize and direct the Secretary of War to execute a lease with Air Nitrates Corporation and American Cyanamid Co., and for other purposes."

I am advised that the legislation proposed in S. 2786 would not be in conflict with the financial program of the President.

Sincerely yours,

W. M. JARDINE, *Secretary.*

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Farrell, its enrolling clerk, announced that the House, having considered the joint resolution (S. J. Res. 47) proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress, did not agree thereto, two-thirds of the Members not having voted in the affirmative.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 4115. An act for the relief of Winfield Scott;

H. R. 4116. An act for the relief of W. Laurence Hazard;

H. R. 4117. An act for the relief of Harriet K. Carey; and

H. R. 10141. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

PETITIONS AND MEMORIALS

Mr. ASHURST presented the petition of Mrs. Jennie McKee, of Phoenix, Ariz., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. REED of Pennsylvania presented a petition of the Philadelphia (Pa.) Board of Trade, praying for the passage of Senate bill 3434, the so-called Jones flood control bill, which was ordered to lie on the table.

Mr. FRAZIER presented a resolution of Kringen Lodge, No. 25, Sons of Norway, of Fargo, N. Dak., favoring the repeal of the so-called national-origins quota provision of the immigration law of 1924, which was referred to the Committee on Immigration.

Mr. COPELAND presented petitions of sundry citizens of the State of New York, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. FESS presented petitions of sundry citizens of Delphos and Washington County, in the State of Ohio, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. JONES presented a memorial of sundry citizens of Bellingham, Wash., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a memorial of sundry citizens of Chehalis, Wash., remonstrating against adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

He also presented a petition of sundry citizens of Clark County, Wash., praying for the passage of legislation repealing the so-called national-origins quota provision of the existing immigration law, which was referred to the Committee on Immigration.

He also presented a memorial of sundry citizens of Wenatchee, Wash., remonstrating against the passage of Senate bill 1271, the so-called migratory bird conservation bill, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Olympia and Tacoma, in the State of Washington, praying for the passage of legislation creating a Federal department of education, which were referred to the Committee on Education and Labor.

He also presented petitions of sundry citizens of Plaza, Retsil, and vicinity, in the State of Washington, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

INTERNATIONAL ASSOCIATION OF POLICEWOMEN

Mr. CARAWAY. Mr. President, in discussing associations in the District of Columbia which largely are engaged in extracting money from people away from here and spending it for the benefit of themselves and nobody else, I mentioned the International Association of Policewomen. A very excellent lady, who is connected with that association, came to me and argued with me that I had done that particular association an injustice. Without knowing much about the facts, I told her if she would write me a letter stating their side of the matter for the public, I would ask to have it included in the RECORD. Therefore I ask unanimous consent to have the letter made a part of my statement.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

INTERNATIONAL ASSOCIATION OF POLICEWOMEN (INC.);
Washington, D. C., March 8, 1928.

Hon. T. H. CARAWAY,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR CARAWAY: In reading your report, Senate 342, on the bill to require registration of lobbyists, in which you mention certain fake organizations having headquarters in Washington, I regretted to find listed the name of the International Association of Policewomen.

Our association is educational in character and aims to stimulate the appointment of policewomen of high caliber, who have training in social work, to take care of the problems of unfortunate women and children coming to the attention of the police departments. We wish to place an emphasis on finer personnel and more effective preventive measures by the police, to the end that our national crime problem shall be diminished. We answer the call for technical service and educational information in all parts of the country, from public officials, civic organizations, universities, and women's clubs. Since so many of these groups have their headquarters in Washington, it is a matter of convenience to be located here. Our presence in the Capital has no relation whatsoever to the National Congress, and, with the exception of one bill relating to the District, we have had no contact with Congress, nor is it likely that we shall have in the future.

From the names listed on this paper I am sure you will realize that we have the sympathy and understanding of people of broad civic interest and high professional standing. Knowing your fine spirit of justice, I place the facts before you, feeling sure you will wish to correct any misunderstanding which may arise from your report.

I am, most respectfully yours,

(Miss) HELEN D. PIGEON,
Executive Secretary.

CONTRACTS FOR THE AIR MAIL

Mr. ROBINSON of Arkansas. Mr. President, I ask to have printed in the RECORD and referred to the Committee on Post Offices and Post Roads a letter which has come to me from E. F. Stewart in relation to contracts for the carriage of air mail.

The VICE PRESIDENT. Without objection, it is so ordered.

NEW YORK, *March 8, 1928.*

Hon. JOSEPH T. ROBINSON,
Senate Office Building, Washington, D. C.

DEAR SENATOR ROBINSON: H. R. 10553, known as the Kelly bill, has passed the House and undoubtedly now comes to your committee.

The undersigned, long actively interested in practical aviation and formerly the officer in charge of flying at Payne Field, West Point, Miss., first appeared before your committee in 1919–20 and fathered the clause in that year's bill authorizing the Postmaster General to contract for carrying mail by airplane. This was the first legislation of its kind.

In 1927 I underbid the present contractor for the New York-Chicago air mail service an average of 75 cents per pound. I also agreed in my proposals to carry not only air mail but enough regular first-class mail to make up 20,000 pounds daily, and at 35 cents per pound. The present law authorizes the Postmaster General to contract for carrying first-class mails at not more than 60 cents per pound.

The bill now before you is the logical outcome of the past history of air mail. In plain terms, it authorizes the Postmaster General to decrease the postage rate on air mail 75 per cent.

In view of my bid of 35 cents per pound for ordinary first-class mail between New York and Chicago, the only end which the present pending legislation may accomplish is to increase the volume of business for the benefit of the holders of existing contracts for carrying air mails at the expense of the Government.

The clause permitting the Postmaster General to contract ahead for 10 years can only be designed to the same end. Aviation is making rapid strides, and even the present limit of five years is probably too long a term for the Government to contract for.

I desire a hearing when this present bill is discussed in your committee, and will be greatly obliged if you will arrange that I may be heard at that time.

Very truly yours,

E. STEWART.

DISABLED EMERGENCY OFFICERS AND ENLISTED MEN

Mr. BINGHAM. I present correspondence from the Director of the United States Veterans' Bureau, with accompanying statements and tables showing the extent of major disability, degree of impairment, number, and amount of monthly compensation payments being made to emergency Army, Navy, and Marine officers and enlisted men, and also showing the compensation status and estimated cost of retirement of emergency officers of the Army, Navy, and Marine Corps who are permanently disabled to a degree of 30 per cent or more, which I ask may be printed in the RECORD and lie on the table.

There being no objection, the matter was ordered to lie on the table and to be printed in the RECORD, as follows:

UNITED STATES VETERANS' BUREAU,
OFFICE OF THE DIRECTOR,
Washington, February 29, 1928.

Hon. HIRAM BINGHAM,
United States Senate, Washington, D. C.

MY DEAR SENATOR BINGHAM: In reply to your verbal request that you be furnished with current information relative to disabled emergency officers, as shown on page 17 of the report of the Senate Military Affairs Committee, March 5, 1926, together with similar information covering enlisted men, you are advised that there are inclosed herewith statements as of December 31, 1927, showing the extent of major dis-

ability, degree of impairment, number, and amount of monthly compensation payments being made to emergency Army, Navy, and Marine officers and enlisted men.

Very truly yours,

FRANK T. HINES, *Director.*

UNITED STATES VETERANS' BUREAU,
OFFICE OF THE DIRECTOR,
Washington, February 26, 1927.

Hon. HIRAM BINGHAM,
United States Senate, Washington, D. C.

MY DEAR SENATOR BINGHAM: There are attached for your information copies of statements showing the compensation status and estimated cost of retirement of emergency officers of the Army, Navy, and Marine Corps who are permanently disabled to a degree of 30 per cent or more. If these officers were retired with 75 per cent of their base pay, it is estimated that there would be an annual increased cost of $2,254,500 over the compensation they are now receiving.

Very truly yours,

FRANK T. HINES, *Director.*

Emergency officers rated on a permanent basis at 30 per cent or more, showing amount of compensation and cost of retirement December 31, 1927

$236,830×12=$2,841,960, annual compensation now being paid.
$4,985,100−$2,841,960=$2,143,140, annual increased cost of retirement.

This statement excludes the following arrested T. B. cases receiving a statutory $50 award where the tuberculosis has been evaluated according to the rating schedule at less than 30 per cent permanent partial: Army, 1,134; Navy, 66; Marine, 3.

REPORTS OF COMMITTEES

Mr. EDGE, from the Committee on Interoceanic Canals, to which was referred the joint resolution (H. J. Res. 175) to change the name of the Ancon Hospital in the Panama Canal Zone to the Gorgas Hospital, reported it without amendment.

Mr. BAYARD, from the Committee on Territories and Insular Possessions, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

A bill (H. R. 340) to authorize the incorporated town of Anchorage, Alaska, to issue bonds for the construction and equipment of an additional school building, and for other purposes (Rept. No. 509); and

A bill (H. R. 7367) to authorize the incorporated town of Seward, Alaska, to issue bonds in any sum not exceeding $50,000 for the purpose of constructing and equipping a public-school building in the town of Seward, Alaska (Rept. No. 510).

Mr. THOMAS, from the Committee on Finance, to which was referred the bill (S. 1768) to authorize the city of Muskogee, Okla., to remove and retain title to the boilers from the municipal hospital building recently conveyed by the city to the United States Veterans' Bureau Hospital No. 90, at Muskogee, Okla., reported it with an amendment and submitted a report (No. 511) thereon.

Mr. BARKLEY, from the Committee on Finance, to which was referred the bill (S. 1763) for the relief of the Sunny Brook Distillery Co., reported it with an amendment and submitted a report (No. 512) thereon.

Mr. McNARY, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 2830) authorizing the adjustment of the boundaries of the Carson, Manzano, and Santa Fe National Forests in the State of New Mexico, and for other purposes, reported it with an amendment and submitted a report (No. 513) thereon.

Mr. SHORTRIDGE, from the Committee on Finance, to which was referred the bill (S. 3311) to provide for advances of funds by special disbursing agents in connection with the enforcement of acts relating to narcotic drugs, reported it without amendment and submitted a report (No. 514) thereon.

Mr. FRAZIER, from the Committee on Indian Affairs, to which was referred the bill (S. 3354) for the preservation and administration of the forests of the Colville Indian Reservation, reported it without amendment and submitted a report (No. 515) thereon.

Mr. JONES, from the Committee on Indian Affairs, to which was referred the bill (H. R. 173) to provide funds for the upkeep of the Puyallup Indian Cemetery at Tacoma, Wash., reported it without amendment and submitted a report (No. 516) thereon.

Mr. THOMAS, from the Committee on Indian Affairs, to which was referred the bill (H. R. 8326) to authorize the construction of a dormitory at Riverside Indian School at Anadarko, Okla., reported it without amendment and submitted a report (No. 517) thereon.

Mr. KENDRICK, from the Committee on Indian Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 356) to amend section 2 of the act of March 3, 1905, entitled "An act to ratify and amend an agreement with the Indians residing on the Shoshone or Wind River Indian Reservation, in the State of Wyoming, and to make appropriations to carry the same into effect" (Rept. No. 518); and

A bill (S. 710) conferring jurisdiction upon the Court of Claims to hear, adjudicate, and render judgment in claims which the northwestern bands of Shoshone Indians may have against the United States (Rept. No. 519).

Mr. ASHURST, from the Committee on Indian Affairs, to which was referred the bill (S. 2306) for the relief of William E. Thackrey, reported it without amendment and submitted a report (No. 520) thereon.

Mr. McMASTER, from the Committee on Indian Affairs, to which was referred the bill (S. 3355) to authorize the cancellation of the balance due on a reimbursable agreement for the sale of cattle to certain Rosebud Indians, reported it without amendment and submitted a report (No. 521) thereon.

Mr. PINE, from the Committee on Indian Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 8542) to provide for the construction of a hospital at the Fort Bidwell Indian School, California (Rept. No. 522); and

A bill (H. R. 8543) to provide for the construction of a school building at the Fort Bidwell Indian School, California (Rept. No. 523).

Mr. BRATTON, from the Committee on Public Lands and Surveys, to which was referred the bill (S. 2535) granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe for interest paid on railroad-aid bonds, and for the payment of the principal of railroad-aid bonds issued by the town of Silver City, and to reimburse said town for interest paid on said bonds, and for other purposes, reported it with amendments and submitted a report (No. 524) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH of Massachusetts:

A bill (S. 3582) for the relief of Percie D. Jordan; and

A bill (S. 3583) for the relief of Lieut. Henry Dewey Bennett; to the Committee on Claims.

By Mr. REED of Pennsylvania:

A bill (S. 3584) allowing rank, pay, and allowances of a captain, Medical Corps, United States Navy, to the medical officer assigned to duty as personal physician to the President; to the Committee on Naval Affairs.

By Mr. HOWELL:

A bill (S. 3585) authorizing and directing the Inland Waterways Corporation to initiate water carriage upon the Missouri River; to the Committee on Commerce.

By Mr. PINE:

A bill (S. 3586) granting an increase of pension to Margaret J. McQuerry; to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 3587) granting an increase of pension to Nancy Henson; to the Committee on Pensions.

By Mr. SHIPSTEAD:

A bill (S. 3588) to amend and correct the military record of Abram Palo; to the Committee on Military Affairs.

A bill (S. 3589) to prevent the flooding of lands of the United States within the Superior National Forest in the State of Minnesota; to the Committee on Agriculture and Forestry.

By Mr. DALE:

A bill (S. 3590) to amend section 110 of the Judicial Code; to the Committee on the Judiciary.

By Mr. COPELAND:

A bill (S. 3591) granting World War adjusted compensation to Margaret A. Joyce; to the Committee on Finance.

A bill (S. 3592) to regulate the practice of the healing art to protect the public health in the District of Columbia; to the Committee on the District of Columbia.

By Mr. WHEELER:

A bill (S. 3593) to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. FRAZIER (by request):

A bill (S. 3594) to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes; to the Committee on Indian Affairs.

By Mr. BRATTON:

A bill (S. 3595) for the relief of Arch L. Gregg (with accompanying papers); to the Committee on Claims.

By Mr. HAWES:

A bill (S. 3596) granting an increase of pension to Eliza J. McKee (with accompanying papers); and

A bill (S. 3597) granting an increase of pension to Lottie F. Bentley (with accompanying papers); to the Committee on Pensions.

A bill (S. 3598) authorizing Dupo Bridge Co., a Missouri corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Carondelet, Mo.; to the Committee on Commerce.

COLUMBIA RIVER BASIN PROJECT

Mr. WHEELER submitted an amendment intended to be proposed by him to the bill (S. 1462) for the adoption of the Columbia Basin reclamation project, and for other purposes, which was ordered to lie on the table and to be printed.

CAPITAL STOCK OF INLAND WATERWAYS CORPORATION

Mr. SHIPSTEAD submitted an amendment intended to be proposed by him to the bill (S. 1760) to increase the capital stock of the Inland Waterways Corporation, which was referred to the Committee on Commerce and ordered to be printed.

WITHDRAWAL OF PAPERS—MARY WILLARD

On motion of Mr. JONES, it was—

Ordered, That the papers accompanying the bill (S. 5475, 69th Cong., 2d sess.) granting a pension to Mary Willard, be withdrawn from the files of the Senate, no adverse report having been made thereon.

DEATH OF CAPT. WILLIAM C. BYRD, UNITED STATES MARINE CORPS, OF SOUTH CAROLINA

Mr. BLEASE. Mr. President, a few days ago Capt. William C. Byrd, of South Carolina, an officer of the United States Marine Corps, was killed in an airplane accident in Nicaragua. I ask that the article which I send to the desk, which was published in the Charleston (S. C.) News and Courier in reference to him may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BYRD, MARINE PILOT, SOUTH CAROLINIAN, DIES WHEN HIS PLANE FALLS IN NICARAGUA

Capt. William C. Byrd, marine pilot, South Carolinian, graduate of the Citadel, and Sergt. Rudolph A. Frankforter, native of New York

State, were killed yesterday afternoon when an American observation plane crashed near Esteli, 40 miles northeast of Matagalpa, according to an Associated Press dispatch received here last night.

Captain Byrd married Miss Harriett Wannamaker, of Orangeburg. His mother, Mrs. George Byrd, sr., lives at Greenwood, as does a brother, George Byrd, jr., proprietor of a shoe store there. James Izlar Sims, publisher of the Times and Democrat, Orangeburg, is a brother-in-law and Tuesday received a letter from Captain Byrd mailed from Nicaragua. He was with Captain Byrd at Hampton Roads and took a two-hour ride with him just before he sailed for Central America on the airplane carrier *Saratoga* in January. The letter Tuesday was the first that Mr. Sims had had from the brother-in-law since he left the United States.

THOUGHT UNITED STATES RIGHT

Captain Byrd thought that the United States was right in intervening in Nicaragua, said Mr. Sims over long distance last night. "He went down willing to do his part to help curb the guerilla warfare."

"By armed force was the only way my brother-in-law thought any peace could be brought to the little nation. He had been sent by the United States Government there two or three years ago to help the natives organize a constabulary to maintain peace. He went back to that country this time convinced that Nicaragua would do nothing for itself and could not have peace without outside supervision. He saw in Nicaragua two bands who had rather fight than do anything else. As a marine pilot he went to do what he considered his duty."

Captain Byrd had been with the Marine Corps 12 years, and a year ago began flying. He saw service in Haiti with the United States marine guard there.

WIDOW IN CHARLOTTE

Captain Byrd's widow is now in Charlotte, N. C., visiting her sister, Mrs. W. A. Bloodworth.

It is thought that the dead South Carolinian was second in command of the United States flying forces in the little war-torn Republic. Maj. Ross E. Rowell is in charge.

Meager advices received here indicate that the accident occurred near the landing field at Esteli, and that the two men were killed instantly. The bodies will be brought to Managua.

BELIEVE PLANE STRUCK BUZZARD

MANAGUA, March 9 (Special).—The plane carrying Captain Byrd and Sergeant Frankforter was flying southward, bound from Ocotal on a test flight. It is believed it struck a flying buzzard, which broke a strut supporting the right wing, causing it to collapse when about to land on the Esteli Field.

The plane began to turn over and the aviators jumped from a height of about 250 feet, their parachutes being useless at that altitude. The plane was considered sound, having been recently overhauled.

Captain Byrd had been with the marines for 12 years, but had only about 1 year aviation service. He trained at Pensacola. Frankforter was an experienced aviator.

The two men came to Nicaragua about three weeks ago aboard the airplane carrier *Saratoga*. Byrd previously had service in this country. Frankforter leaves besides his widow three children.

MANY BUZZARDS IN NICARAGUA

Buzzards in Nicaragua are almost as plentiful as English sparrows in the United States. They seem to sense with uncanny accuracy when a battle is about to begin and often circle above moving bodies of men until an engagement, following which they sight and devour the carcasses of not only the animals slain but the humans. Marine aviators have learned to investigate wherever a swarm of buzzards are circling. There usually it is found a battle has taken place or a band of men from the brush have encamped and left the half-used carcass of some cow or wild boar slain for food. The buzzard, while not protected by law or sentiment in Nicaragua, is the national scavenger and, despite its not infrequent gruesome occupation, fills an important place in the Central American Republic which knows so little of modern methods of sanitation and apparently cares less. In the streets, on the housetops above the patios of the homes of the wealthy, as well as in the heart of the jungle, the buzzard, or zopoloti, is a familiar, albeit repulsive, figure.

Esteli, at which Capt. William C. Byrd fell to his death, is in the mountainous section of the Nicaraguan wilds, in the department of Esteli. It is a tiny village inhabited mainly by Indians or that class of Nicaraguan peasant known as the "mozo," a mixture of Indian and Spanish. The sympathies of the people in Esteli are with the Liberal Party and with Augustino Sandino, who has retired to the mountain fastness in resistance against the marines. Captain Byrd was one of the recent contingent of marines sent to Nicaragua to put an end to Sandino.

SMALL LANDING FIELD

At Esteli there is a small landing field built by orders of the marine aviation force under Maj. Ross E. Rowell. The field is a cleared space in the midst of jungle undergrowth. Barefooted, half-naked mozo with the long, curved knife of the banana cutter, the machette, hacked and slashed until a space several acres in length and possibly 2 in width had been cleared. Stumps were dug out and uprooted by hand, the earth was packed with logs, and drainage ditches constructed to make it safe in the rainy season. Sheets were driven into the ground at the four corners of the field and a white line of pounded limestone spread down the center to indicate to those in the air that a landing could be safely made there. The field is in a tiny valley between two mountain ranges and is at all times dangerous and treacherous because of the cross currents blowing down from the mountain tops or around the mountains down the valley. In this the dry season the air in Nicaragua is devoid of moisture and therefore very light. Airplanes are very hard to handle in such atmosphere, and a landing must be made at a much greater speed than in this country else the plane will drop in an air pocket, lose its flying speed, and crash. Sometimes the sun brings up moisture from Lake Nicaragua, 92 miles long, or Managua, 46 miles in length, and those moisture-laden clouds are blown by gale like winds over the mountain ranges near by. When a plane hits such a heavy cloud after flying in the lighter atmosphere, the results are loss of balance, and as the plane dives again into the light and barely supporting atmosphere the tendency is to drop suddenly, causing often temporary or complete loss of control. If such should happen as a plane was preparing to land on a space-limited field, such as at Esteli, down in a valley, few pilots could recover in time to avert cracking up.

AWARD OF CORN CUP TO DAN BICKLEY, OF LEXINGTON COUNTY, S. C.

Mr. BLEASE. Mr. President, I ask permission to have inserted in the RECORD an article from the Herald and News of Newberry, S. C., relative to the award to Dan Bickley, an 11-year-old boy of Lexington, S. C., of the Southern Railway system's corn cup, which was awarded to him as the grower of the best 10 ears of corn produced in 1927 in the eight Southeastern States served by the Southern Railway.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DAN BICKLEY, 11-YEAR-OLD BOY OF LEXINGTON COUNTY, S. C., WHO WON THE SOUTHERN RAILWAY SYSTEM'S CORN CUP IN 1927

COLUMBIA, S. C.—In the rotunda of South Carolina's historic statehouse on January 12, Dan Bickley, 11-year-old boy of Lexington County, received from the hand of Governor Richards the Southern Railway system's corn cup, awarded to him as the grower of the best 10 ears of corn produced in 1927 in the eight Southeastern States served by the Southern.

This handsome trophy was offered first in 1925 and was won by Willie Pat Boland, a corn-club boy of Newberry County, S. C. In 1926 it was won by J. A. Patterson of Rowan County, N. C., a young man just out of the State Agricultural College. The names of the three winners have been engraved on the cup as a lasting testimonial of their success.

The cup will remain in the possession of young Dan Bickley until the time for the award for 1928 arrives. The cup will be offered again this year under the same conditions as in the past. In order to contest for the cup, a grower must qualify by winning a prize at one of certain designated State and district fairs for the best exhibit of 10 ears of corn. The contest is open to all corn growers in Virginia, North Carolina, South Carolina, Georgia, Alabama, Kentucky, Tennessee, and Mississippi, without regard to age.

The exhibits which qualify by winning prizes at the State fairs will be brought to the office of the general agricultural agent of the Southern in Atlanta and will be judged by a committee of experts. The committee which made the award in 1927 consisted of Director H. P. Stuckey, of the Georgia Experiment Station; Director J. R. Ricks, of the Mississippi A. and M. College Experiment Station; and I. O. Schaub, director of extension in North Carolina.

The judges expressed pleasure and surprise at the high character of the exhibits, and in announcing their decision said:

"The growers who selected these samples showed unusual skill and are to be particularly commended for their efforts. The Southern Railway has performed a real service to southern agriculture in initiating and carrying on this contest. We wish to commend the Southern and the various fairs which have cooperated in bringing together at one central point the prize-winning samples of the various States. The competition serves an inspirational purpose that reaches many farmers. It is bound to have a very material effect in producing better corn throughout the whole region."

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. HOWELL resumed and concluded the speech begun by him yesterday. His speech entire follows:

Mr. HOWELL. Mr. President, in my remarks on yesterday respecting the pending joint resolution affecting the Muscle Shoals development, I called attention to the fact and demonstrated that, as compared with private ownership, the advantages of public ownership can and do enable an average

utility plant to be paid for within 12 years. I also afforded evidence that the advantages of public ownership apply in connection with hydroelectric power developments the same as in connection with other utilities. I compared the rates charged for domestic use for small power and for large power in Niagara Falls, Ontario, where public ownership prevails, with the rates charged by an electrical utility for similar service upon the American side of the Niagara River, in Niagara Falls, N. Y., where the people support the luxury of private ownership under legal regulation.

So far as domestic rates are concerned, it is a fact that the average charge to the consumer in Ontario is less than 2 cents a kilowatt-hour, whereas in the United States to-day under private ownership, largely subject to legal regulation, the charges are about 7.4 cents a kilowatt-hour.

I also demonstrated by the bills which I quoted that in Ontario the low rates were not merely enjoyed by domestic consumers but also by power users. I further called attention to the fact that it probably does not cost more than 6 mills a kilowatt-hour to produce electrical energy in the city of Washington and to place it on the switchboard; that in Toronto, for instance, 90 miles from Niagara Falls, that city pays the hydroelectric commission of Ontario 4 mills a kilowatt-hour for energy delivered from Niagara Falls; in short, that the low rates enjoyed in Toronto, an average of 1.7 cents a kilowatt-hour for domestic current during the year 1926, evidently were not due to the mere fact that they had the advantage of hydroelectric power, because the advantage of water power is only about 2 mills, but were due to the three advantages of public ownership, which I illustrated in connection with the publicly owned plants—water, gas, and ice—in Omaha.

Furthermore, I called attention to the fact that taxes, which are so much talked about, average here in the District of Columbia 3 mills a kilowatt-hour for energy sold. Therefore the difference in the cost to private utilities of switchboard energy using steam and paying taxes as compared with Toronto was only about 5 mills and that if the 5 mills be added to the 1.7 cents paid by the domestic consumer in Toronto it would make only 2.2 cents, as compared with the 6 cents now charged the domestic consumer here in Washington, the 10 cents charged here in Washington within the last four years, and as compared with 7.6 cents charged in Birmingham, Ala., supplied by energy purchased from the Government of the United States at Muscle Shoals 100 miles away, or about the same distance that Toronto is from Niagara Falls, at 2 mills per kilowatt-hour, whereas Toronto pays about 2.9 mills at Niagara Falls and 1.1 mills for transmission. Therefore, allowing 2 mills for transmission from Muscle Shoals to Birmingham, the cost in Birmingham of that energy supplied there at a profit—because 2 mills will afford a profit in connection with the transmission—was identical with the cost on the switchboard in Toronto; and yet in Toronto the rate in 1926 was 1.7 cents on an average to the domestic consumer, while the rate that must be paid by the consumer in Birmingham, Ala., is about 7.6 cents a kilowatt-hour. Moreover, the consumer is required to enter into a five-year contract in order to secure service.

Mr. President, in my opinion the following unavoidable conclusions are to be deduced from these facts:

First, that, inasmuch as the difference between the cost of hydroelectric and steam-electric energy seldom exceeds 4 mills per kilowatt-hour, it is evident that, so far as affecting domestic rates in this country is concerned, this difference is of comparatively small moment. What have 4 mills to do with the average rate paid in this country for domestic service?

Second, that public ownership and operation of hydroelectric power plants will avail the public little or nothing if the installation and operation of transmission lines to points of use are to be left to private enterprise, just as is done by the Government at Muscle Shoals. The Government receives but 2 mills a kilowatt-hour for energy delivered to the Alabama Power Co. at that point, which has a transmission line leading from it. The Government has no transmission line; as a consequence, it has to accept for its energy whatever the Alabama Power Co. will pay therefor, as is shown by the fact that Toronto is paying the hydroelectric commission for electric energy at Niagara Falls 2.9 mills.

Third, that we can not expect to enjoy electric rates comparable with those obtaining in Ontario without adopting public ownership of local distribution systems, as well as of power plants and transmission lines.

Fourth. That the development by the public of large, modern steam electric plants and the transmission of the energy developed to points of use, as done in the case of hydroelectric energy in Ontario, will enable large sections of the country to enjoy rates nearly comparable with those obtaining in Ontario, notwithstanding the lack of water-power possibilities.

Mr. President, the Senator from Alabama [Mr. HEFLIN] asked that there be printed in the RECORD on yesterday a letter signed by the president of the Alabama Power Co. I have not had the opportunity of analyzing the letter in detail, but there are certain features thereof to which I have given attention. On page 4403 of the RECORD of that date is found a table forming a part of this letter, in which there are enumerated 13 towns in Alabama that formerly were not served by the Alabama Power Co. In other words, the Alabama Power Co. has purchased the plants in those towns; and the president of the company in this letter sets forth the rates that were formerly charged and the rates that are now charged by the Alabama Power Co. The average population of those towns, 13 in number, is 1,816, and the average rate charged in these 13 towns, all within about 100 miles of Birmingham, is 9 cents plus.

This is a rate resulting, under such conditions, from private ownership. In Ontario, within 100 miles of Niagara Falls, I have selected 13 towns at random, the average population of which is but 1,400, or 400 inhabitants less on the average than the number in the 13 Alabama towns quoted; and what rate do we find public ownership affords these towns, supplied under similar conditions? An average of 2.9 cents, as compared with 9 cents in Alabama.

The able Senator from Kentucky [Mr. SACKETT] on yesterday cited similar facts to those that have been used by myself to show that the difference between the cost of producing electrical energy by water power and by steam is probably only 2 mills. He further went on and urged that a saving of 2 mills would not make any appreciable difference if deducted from the average domestic bill rendered throughout the country. Of course, that must be evident. Then he drew the conclusion that we should not consider public ownership and operation of Muscle Shoals because of the low domestic rates that might result to consumers because such results would be negligible—in other words, that a saving of 2 mills in cost of producing energy is of no moment to domestic consumers.

Mr. President, last year there were over 500,000,000 kilowatts of energy sold to the Alabama Power Co. by the Government at Muscle Shoals. Two mills a kilowatt-hour on this amount of energy exceeds a million dollars. A million dollars placed in a sinking fund, invested at 4 per cent, would equal the total cost of the Muscle Shoals development, $50,000,000, within 26 years.

Is this a trifle? What is the advantage of a great power, such as that at Muscle Shoals, to municipalities within practical transmitting distance? It means that no municipality served need maintain a separate power plant. All that is necessary is to maintain and operate a local distribution plant. That can be done about as cheaply per consumer in a town of a thousand inhabitants in a well-settled region as in a city of 10,000 inhabitants. Therefore a small town receiving, by transmission, energy from a great central plant such as Muscle Shoals should enjoy, under public ownership, as low electric rates as they have in the larger cities of the same region, just as, for instance, in Ontario.

This is the tremendous advantage arising from a great central power plant. Not only can cities and villages alike have the low rates which they are enjoying in Ontario—less than 2 cents a kilowatt-hour as compared with 9 cents, quoted for these 13 towns by the Alabama Power Co.—but more, for of the 284 municipalities in Ontario, served by the Hydroelectric Commission, 51 have current assets equal to their current liabilities. In other words, the debts of their plants are wiped out, or what is equivalent thereto.

As an example of what a great central electric plant, publicly owned and operated, can do for scattered communities, small and large, is the most valuable use to which we can dedicate Muscle Shoals to-day. We can do with Muscle Shoals on a smaller scale just what Ontario has done with Niagara Falls for both its urban and suburban populations.

Mr. OVERMAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. HAYDEN in the chair). Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. HOWELL. I yield.

Mr. OVERMAN. I understood the Senator to say that steam power used for the generation of electricity is cheaper than water power.

Mr. HOWELL. No; not as cheap as water.

Mr. OVERMAN. I understood the Seantor to say that steam is cheaper.

Mr. HOWELL. Oh, no. If I made such a statement, it was an error.

Mr. OVERMAN. I may have misunderstood the Senator.

Mr. HOWELL. I assume, for instance, that water power can be developed on an average for about 4 mills. That was

practically the statement made by the Senator from Kentucky [Mr. SACKETT] yesterday. I pointed out that steam power could be developed here in Washington and was being developed here, in all probability, by the Potomac Electric Power Co. for 6 mills a kilowatt-hour, including all costs, capital, and so forth; in other words, that the difference, generally speaking, is only 2 mills; but that difference of 2 mills on the output of Muscle Shoals if no more than that purchased by the Alabama Power Co. last year, would equal more than a million dollars, and that million dollars invested annually at 4 per cent, compounded, would equal $50,000,000 within 26 years.

Mr. OVERMAN. The reason why I asked the question was that the Senator referred to the possibility of steam plants being dispensed with by the communities in the vicinity of Muscle Shoals which now have their electricity furnished by steam power. Would they scrap those plants and take the Muscle Shoals power? Unless it was very much cheaper, they would not do it.

Mr. HOWELL. Of course, a small steam plant shows no such economy. I had in mind and was contemplating a large steam plant, such, for instance, as is necessary to supply the city of Washington.

Mr. FLETCHER. Mr. President, will the Senator yield?

Mr. HOWELL. I yield.

Mr. FLETCHER. If it costs 4 mills per kilowatt-hour to produce electric energy, then the Government must be losing about 2 mills per kilowatt-hour at Muscle Shoals now. They are only getting 2 mills per kilowatt-hour for their output.

Mr. HOWELL. Why, Mr. President, of course, the Government is losing money on its investment. Its total income from this plant last year was only about $1,169,000 at 2.06 mills per kilowatt-hour. It has invested in this hydroelectric plant in the neighborhood of $50,000,000, and 4 per cent on $50,000,000 would be $2,000,000 a year alone; and one of the remarkable recent developments in connection with the Muscle Shoals plant is this:

A year ago this spring I was waited upon by a delegation from the town of Muscle Shoals, Ala. They said, "We should like some of this power supplied by Muscle Shoals for our town. The Government has entered into a contract with the Alabama Power Co. under which the company can take whatever power it sees fit; however, the Government is not prohibited from selling to others and there is a surplus of energy available. We want to buy some for our distribution plant in Muscle Shoals. We have offered the War Department 4 mills per kilowatt-hour to furnish us this energy, but they refused to do so."

I asked, "Why?" Because, they stated, it is urged that if the War Department proceeds to deal with Muscle Shoals, the Alabama Power Co. might take offense, and it is the only large customer for the power. When I inquired into the matter further, I concluded that this refusal was because of a policy adopted by the administration, and hence the War Department did not dare to allow the little community of Muscle Shoals to have electrical energy at a rate twice that for which the Government is selling it to the Alabama Power Co., although the Government has energy to spare.

It is going to waste, as a matter of fact. In short, energy was refused the little village of Muscle Shoals at 4 mills a kilowatt hour, whereas the Alabama Power Co. is paying but 2 mills. Yet there is nothing in the contract with the latter company to prevent the Government from supplying Muscle Shoals if the War Department saw fit to do so.

Mr. FLETCHER. And the Alabama Power Co. does not take half of the capacity of the plant?

Mr. HOWELL. That is practically correct.

Mr. BLACK. Mr. President, will the Senator yield?

Mr. HOWELL. I yield.

Mr. BLACK. I understood that the Senator had learned the reason. I was with the delegation, and I have never been informed as to the reason why the War Department would not permit the town of Muscle Shoals to have it. The Senator did not get his information from the War Department; did he? I am asking for information, because I have been curious to know why they would not supply that power to the town of Muscle Shoals.

Mr. HOWELL. My information came from this delegation, including the mayor, as I remember, and several councilmen. Subsequently I interceded with the War Department and urged that the department could not properly refuse the request under the circumstances. However, I concluded that the department felt that it could not furnish this energy to Muscle Shoals, although it was right under the shadow of the great dam, because other neighboring municipalities might want it also, and to thus supply such municipalities would be contrary to the policy of the administration. In short, the department did not want to begin anything of the kind, because it was afraid there would be no end to it. The Alabama Power Co. is in the saddle. If we are to take care of the little municipalities throughout Tennessee, Alabama, and Mississippi, we shall have to do for them just what Ontario has done for the little municipalities of Ontario, and our failure to do so would be a lasting shame to Congress.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. HOWELL. I yield.

Mr. COPELAND. Does the Senator understand that under the terms of the Norris resolution the Secretary of War could fix the price at which the current should be sold?

Mr. HOWELL. I should assume that it would be determined by bids. The Secretary would have the bargaining power and, as I understand it, under the resolution he would be required to sell it at the best price that could be obtained, taking everything into consideration.

Mr. COPELAND. I wonder if the measure really does provide for that. That is one question that has arisen in my mind. I think it is extremely important that the Government should have its hand on the switchboard, but I am not clear, from a reading of the resolution, whether or not those municipalities and persons who receive power from the plant would receive it at a cheap price, such as the Senator suggests is being done in Ontario. Perhaps the senior Senator from Nebraska would answer the question.

Mr. HOWELL. I would be glad to have the senior Senator from Nebraska answer the question.

Mr. NORRIS. Mr. President, under the resolution the Secretary of War would be given authority without his hands being tied in any way. It seemed to me, and it seemed to the committee, that we ought to place him in the same position in which we would place a business man to whom we might turn the plant over. I do not think it would be the policy of the Government to say how much money they could make out of it. I would not like to see an amendment put on the resolution that would provide that the Secretary should not charge more than a certain price or should charge under a certain price. I think he ought to be nondiscriminatory in the sale of the power. I think that is the real intent. I have not tried to fix a price.

Mr. COPELAND. The junior Senator from Nebraska was arguing about the cheap price which the people in Ontario pay for current. That raised a question in my mind as to whether or not there was any guaranty in this measure that there would be such a cheap rate here.

Mr. NORRIS. That is not guaranteed in so many words; no.

Mr. COPELAND. Suppose there were a Secretary of War who was unfriendly to the principle of Government operation and sought to defeat it by excessive charges. Of course, I understand that the profits would go to this other work, the development of the fertilizer plant; but, nevertheless, the idea of Government operation would have a black eye if the Secretary of War charged excessive rates.

Mr. NORRIS. Yes; it would. There are a thousand other ways by which the Secretary of War could, in effect, nullify any law we might pass, if he started out to do it. I have not assumed he would do anything of that kind. I am assuming he will exercise sensible business judgment and that, in the first place, he will not try to overcharge anybody for electricity, that he will not try to see how much money he can make out of it, and he will carry out, as the law provides he shall, the intent of the law, to see that the surplus power not utilized in the manufacture of fertilizer shall be scattered over the country, within distributing distance, without discrimination against anybody. The intent of the act, I think, is very plainly set forth. But what might be a good price for electricity now might not be good in 5 or 6 or 7 or 10 years from now. I would not like to say to the Secretary of War, "You must sell the current at 2 cents a kilowatt-hour at the switchboard," or that he shall charge 4 cents, or anything of that kind. We have to depend, as a business institution would, upon the managers of this institution to carry out the intent of the law, and we have to give them discretionary power to do that. The Secretary would not carry out the intent of the law if he said, "You can not have this power for less than 10 cents a kilowatt-hour." Nobody would buy it. He would not succeed in carrying out the intent of the law.

Mr. COPELAND. Are we not likely to be met by one of these two situations: In the first place, the Secretary of War might charge a price so high that the municipalities and persons interested might not receive the current at a low price; or he might sell it so cheaply that there would not be anything left to go on with this fertilizer experimentation?

Mr. NORRIS. Oh, no; the fertilizer comes first.

Mr. COPELAND. That is safeguarded in the measure?

Mr. NORRIS. Yes.

Mr. COPELAND. The Senator has already made his reply to the other suggestion.

Mr. HOWELL. Mr. President, again I wish to emphasize the advantages of public ownership of an electric plant.

Mr. GEORGE. Mr. President, before the Senator proceeds, may I suggest to the Senator from New York, and also to the Senator from Nebraska, that the Federal Water Power Commission has jurisdiction in this case. It has jurisdiction, of course, not merely over rates, but it has jurisdiction over service, it has jurisdiction over capitalization, and, where the company developed is private, over all water-power improvements put in navigable streams or on public reservations; so that the Federal Water Power Commission has jurisdiction in this case.

Mr. COPELAND. Would it have under this resolution?

Mr. GEORGE. I was going to suggest, it could easily be given the jurisdiction to fix and regulate the rates and service.

Mr. NORRIS. Mr. President, if my colleague will yield again, I had a communication from the executive secretary of the Federal Power Commission, and I regretted very much that I had not received that communication before the committee had acted upon this resolution, and before it was brought into the Senate. He made several suggestions, one of which was that we give to the Federal Power Commission the same jurisdiction I give under my resolution to the Secretary of War. I would not have any objection to that whatever. That commission is very well equipped to handle the matter.

Mr. GEORGE. The Secretary of War is a member of the Federal Power Commission, as a matter of fact.

Mr. NORRIS. Yes; he is.

Mr. GEORGE. I merely suggest that would be a relief from all practical difficulty, and it would insure a uniform and nondiscriminatory rate.

Mr. NORRIS. If Senators think it ought to be safeguarded, while I do not want to put a limitation in the resolution that would take away the discretion, it is perfectly agreeable to me to provide by an amendment, if the Senate wants to, although I do not think it is at all necessary, that the rates and the regulation of rates, all jurisdiction about rates that shall be charged, shall be under the jurisdiction and control of the Federal Power Commission. They are equipped to do the work, they have the experts, and the Secretary of War, I assume, would avail himself, he being a member of the commission himself, of anything of that kind. If the Senate wants to be more specific, I have no objection.

Mr. SMITH. Mr. President, I want to ask the Senator, before he takes his seat, whether in the absence of any legislation specifying that the Power Commission would not do it anyway?

Mr. NORRIS. I judge it is the opinion of the Senator from Georgia that they would.

Mr. GEORGE. I think they could. They might not do so; but I think they could.

Mr. NORRIS. At least there would be no confliction.

Mr. GEORGE. There would be no confliction.

Mr. NORRIS. The Secretary of War is a member of the commission anyway. I do not think it would change the effect one particle, but I have no objection to putting the amendment on the resolution. There is always danger, however, when we are delegating authority, especially when we come in competition in a business way or semibusiness way, that by trying to be specific we take away the discretionary power, and that it will come back to trouble us on something else we do not think of at the time we pass the legislation.

Mr. COPELAND. Mr. President, will the junior Senator from Nebraska yield for one more question?

Mr. HOWELL. I yield.

Mr. COPELAND. The senior Senator from Nebraska says that the experimentation in fertilizer is provided for and that this experimentation is the first call upon the Secretary of War; but, of course, that is predicated upon the idea that he will have funds from the sale of power. If he were generous enough to sell this power at a very low rate, for the benefit of municipalities in the locality, there might not be any profit.

Mr. NORRIS. Yes; that is true, but does the Senator think, with the provision in the law as to what we are going to do with the surplus, provision made for turning it over to the Treasury, and its segregation there in this particular fund, that the Secretary of War would say, "Well, I don't want any fund there, and I will give this away"? He might do that, and, of course, if we gave jurisdiction to the Federal Power Commission, it is possible that the Federal Power Commission would be corrupt, and that they would say, "We will charge a dollar a kilowatt-hour, and just kill this thing right off." That is possible. If we should turn it over to the President, we might get a President who would do the same thing. There are a thousand ways in which anything can be killed, if we assume that the things would happen which everybody has to admit might possibly happen.

Mr. FLETCHER. Mr. President, may I suggest that the statement of the junior Senator from Nebraska seems to me to suggest some possibility that constitutes a greater danger than other things that might be mentioned. For instance, suppose we authorize the Secretary of War to complete these dams and to do this and to do the other thing. But suppose we are in the hands of an administration that does not approve of that policy, we would be right back to the present condition, that here we have power going to waste, and the department will not let the city of Muscle Shoals have one kilowatt of it, even though they offered twice as much as the Alabama Power Co. is offering for what they choose to take. If we are in that situation, where do we get by simply authorizing the doing of certain things?

Mr. NORRIS. Can the Senator from Florida suggest a way the thing could be done so that no one could imagine a condition of things that would thwart the purpose?

Mr. FLETCHER. I confess that is the great difficulty in my mind.

Mr. NORRIS. I confess I am not able to imagine such a condition. I can not draft a resolution which can not be nullified if we assume that those who are supposed to carry it out are dishonest, or that for any reason they do not want to carry it out. If I were starting in now, after all the debate has taken place, and with all the communications I have had, to draft a new resolution, I think I would provide for supervision of these rates by the Federal Power Commission rather than by the Secretary of War. I think that would be an improvement. As a matter of fact, when it comes to carrying out the measure in practical application, I do not think it would make a particle of difference, because the Secretary of War is a member of that commission, and his employees and those of the commission would be practically the same; but it would be perfectly agreeable to me to say that the Federal Power Commission shall have jurisdiction to fix these rates, or that any other board that is properly equipped for it shall have jurisdiction. We must concede that that commission is better equipped, perhaps, than any Federal board that we have.

Mr. FLETCHER. We might also, instead of merely authorizing, direct and compel the doing of things in the law itself.

Mr. NORRIS. I know we might. That is a dangerous thing to do, because we do not know what the conditions will be next year even; and we would not do it as a business proposition. We must assume, for the purpose of any legislation, that the executive officers are going to carry it out in good faith, and we know we may have a different Secretary of War to-morrow. If we should turn it over to the commission, all three members of the commission might change to-morrow, they would change with the change of an administration always; but the real experts, the men who do the work, will probably be the same from one administration to another, as has been the case in the past.

Mr. HOWELL. Mr. President, let me reiterate this fact: It does not make much difference what charge is made to a municipality for energy at Muscle Shoals, it will always be within the limit of what steam-electric power would cost, and steam power would be only about 2 mills more.

If Ontario had no Niagara Falls, if Ontario did not own 21 other hydroelectric plants besides Niagara Falls, if Ontario were in a position to purchase coal for $4 a ton and operate a steam electric plant instead of a hydroelectric plant, it could still afford service in Ontario at rates comparable to those charged to-day. Why? Because they are publicly owned, and they all would enjoy the three advantages of public ownership which I have enumerated.

Mr. President, in view of the facts presented, why should we shrink from public operation of the great Muscle Shoals power plant? We own it. We have been long committed to public ownership and operation of utilities generally. Every sewage system is a public utility and publicly owned, though there are exceptions—cities which have granted franchises for this utility. In my State, the most profitable public utility of which I have knowledge is such a sewage system.

Forty years ago the promotion of water plants was nearly as popular as the promotion of electric plants to-day. My first employment as an engineer was by a gentleman who had promoted, constructed, and rebuilt some 20 water plants. To-day there are but two major cities in the country that do not own their water systems. Public ownership and operation of this particular utility, as in the case of sewage systems, is nearly universal. Why, then, should we hesitate respecting electric

plants, whether operated by steam or water power? Is it not a fact that if, like water plants, they were not highly profitable, there would be little objection?

The electric utility business in this country is highly profitable, so profitable in fact that there has been a pyramiding of electric securities that has no counterpart save in the days of the frenzied financing of our railroads. Congress is responsible for the expenditure of about $50,000,000 upon the Muscle Shoals development. The pending resolution includes a plan that will ultimately render this tremendous expenditure worth while to the public, and especially that public within striking distance of Muscle Shoals.

However, if this resolution fails, and Muscle Shoals ultimately falls into private hands, it will not result in cheap fertilizer or the cheapenening of electric energy, distributed therefrom in any appreciable degree—in short, Muscle Shoals will continue to be just what it is to-day, a net loss so far as the people who have paid the bills for the construction of that great hydroelectric plant are concerned.

When I listen to the stock objections to public ownership and operation offered in connection with Muscle Shoals I can almost hear voices out of the dim and distant past—reverberations from the Roman forum about the time of Cæsar.

A majority of the dwellings in ancient Rome were constructed of wood and, as a consequence, a conflagration, under favoring circumstances, often swept extensive areas of the city. Fire was the terror of Rome in those days, there being no adequate provision for contending with this consuming element. Crassus, who, if he were living in the present, would have been one of the leading captains of industry, hit upon an idea in this connection. He organized a private fire brigade composed of slaves. Training his organization with great care, he equipped it with all the fire-fighting appliances known at that time, including a few of his own invention. Not only that, he stationed lookouts in various parts of the city to bring word of a threatening fire in the shortest possible time. At first thought, one might conclude that Crassus was a highly public-spirited man. But wait! When a fire broke out, Crassus, or one of his agents, and the fire brigade were promptly on the ground. Did they proceed to put out the conflagration at once? Oh, no. Instead, they sought out the owners of the adjacent threatened properties and demanded what they would take for their holdings. If the price was too high, the laconic reply was, "Let it burn." If the price meant a bargain, the fire was ordered extinguished. As a result, Crassus became the largest real-estate owner in the imperial city. Not only did he become the Astor of Rome, but the J. P. Morgan also. Subsequently, I presume, a tribune arose and urged that it was a scandal that people's property should be taken for a song as the result of threatened danger. Why not a publicly owned and operated fire department?

I said I almost could hear voices out of the dim and distant past. Yes; I imagine I can hear them now, charging that "our form of Government is not adapted to public ownership of a fire department; our present system is good enough; why change?" That "the public ownership of a fire department will increase taxes"; that "public ownership can only be inefficient and wasteful"; that "a publicly owned fire department will give poorer service than one privately owned"—and that "such a step will sound the knell of private initiative." Of course, I hear nothing about socialism, because they did not know anything about it in those days. However, public ownership ultimately triumphed, and from that time until this there have been public fire departments. Surely, history repeats itself now in connection with Muscle Shoals.

Mr. TYSON. Mr. President, I know the Senate is worn out with the discussion which we have had here so many days, but as the subject affects my State so materially I feel that it is incumbent upon me to say something in regard to it. I have listened with a great deal of interest to all that has been said. I have attended the sessions of the Senate and have listened to nearly every speaker who has spoken on the subject. I know the importance of the subject, it having been before the Senate for something like 8 or 10 years and not yet disposed of, a matter which is getting on the nerves of the American people as well as of the Senate and the other branch of Congress.

I believe that everyone who has undertaken to solve the problem has tried to solve it in the best interests of his country, but it has not yet been solved. It must be solved, and I think it ought to be solved without any further delay if it is possible to do so. In solving the problem we can not possibly solve it exactly as each one of us would like to have it solved. I have no doubt it will be a compromise solution at last, as has been said by the distinguished senior Senator from Nebraska [Mr. NORRIS], who has spoken so fully upon the subject.

The Government has at Muscle Shoals a very great investment of something like $150,000,000. Every day of delay, it seems to me, we are not only losing interest on our investment but losing still more which we might earn on that investment if we had the property properly in operation. Many bills have been brought before the Senate; some of them are perhaps good bills; but none of them have been entirely satisfactory, and certainly have not received the support of a majority of both Houses of Congress.

The joint resolution which is now before the Senate has had nearly the unanimous recommendation of the Agricultural Committee, only two members, as I understand, voting against it. I am especially interested in keeping this question before the Senate and having it concluded, for two reasons: In the first place, I have a desire as a Senator of the United States to have it settled; and, in the second place, I am greatly interested in the matter because of the profound interest my State has in it and because of the fact that delay has had a bad influence upon the industrial development of my State.

The State of Tennessee is supposed to have as much of hydroelectric possibilities as has any State east of the Mississippi River, and yet, notwithstanding that, the State of Tennessee has not developed anything like as much hydroelectric power as has been developed by many of the other States of the South. There have been filed a great many applications for permits to develop water power in the State of Tennessee during the last three years; it has been desired to develop the water power on a very large scale; but owing to the fact that the Senate and the House of Representatives could not come to any conclusion or pass any bill on the subject, or dispose of Muscle Shoals, such development in my State has been very badly retarded. There are now on file with the Federal Water Power Commission 37 different applications for permits to develop water power in the State of Tennessee, and yet not a single permit has been granted during the last three years.

I wish to read to the Senate a list of the applicants for such permits, in order to show that they have not been asked for by one big power corporation but by a number of them. Three have been asked for by the Holston River Power Co.; 3 by the Tennessee Eastern Electric Power Co.; 5 by the Tennessee Hydroelectric Co.; 4 by the Union Carbide Co.; 11 by the East Tennessee Development Co.; 1 by Allen, Slining & Spaulding; 1 by H. A. Spaulding; 4 by the Federal Power Co.; 1 by Robert G. Gordon; and 4 by the Eastern Tennessee Electric Co. There are altogether 20 sites, and 37 applications for the 20 sites, and yet no permits have been granted during the last three years.

However, I am glad that the Senator from Nebraska [Mr. NORRIS] has at last put before the Senate a joint resolution that with certain amendments I hope will accomplish a solution of this problem. That Senator more than any other Senator, perhaps, has been responsible for the delay in the development of Muscle Shoals. I do not claim that he has not acted in the best interest of the country as he saw it, but whatever effect his activity may have had on the country at large, it has had, as I see it, a very bad effect upon the State of Tennessee.

In order to show the amount of power which has been developed in Tennessee in comparison with other States that have no such amount of water-power possibilities as has Tennessee, I wish to read the record as contained in Geological Survey Bulletin 20804, under date of February 11, 1928:

Developed powers in Southeastern States: Virginia, 141,471 horsepower; North Carolina, 643,768; South Carolina, 574,478; Georgia, 463,453; Kentucky, 142,255; Tennessee, 177,425; and Alabama, 646,423.

In other words, we are behind all but two of the other great Southern States that have possibilities of power development, that condition having been due partly to the fact, perhaps, that the Tennessee Basin has not been fully surveyed; but largely, if not mostly, due to the fact that Muscle Shoals has not been developed.

The joint resolution which is before the Senate provides for a method of disposing of Muscle Shoals. In the first place, it provides for completing the dam. That is considered very important, and I am strongly in favor of that. It will take about $8,000,000 to do that work, and about a million dollars more to complete the steam plant. It is not necessary, however, to complete that development unless it shall be desired to do so, as already a very large amount of horsepower can be developed there provided the steam plant is run regularly, which I understand has not been done during the last two years since the Government has been operating it.

The second section of the joint resolution provides that the current generated shall be sold to States, counties, municipalities, and so forth; and the preference shall be given to such

States, counties, and municipalities purchasing the current. That may be a very good provision, and it does give an advantage, in a sense, to States and to such municipalities as may want to buy current; but it is further provided that the current must be equitably distributed among the States within transmission distance. While I am in favor of giving every State that wants to obtain power as much of a preference as can be given, and at the same time conform to good business methods, I doubt very seriously if these conditions can be carried out—that is to say, giving preference, and at the same time equitably distributing the power—for the reason that there are necessary limitations, and I think much confusion will ensue. However that may be, I am satisfied to vote for such a measure if it can be carried into effect.

Mr. President, we are undertaking to change the nature of this great plant; that is to say, it was built for the purpose of producing fertilizer for the farmers in time of peace and to manufacture nitrates for explosives for the Government in time of war. What is proposed under this joint resolution is to change the nature of the plant and to make it largely a power plant, and to make the fertilizer feature merely incidental. There is no bill that has recently been brought before the Senate which proposes to place the production of fertilizer on a parity with power production. Even the cyanamide bill, which is not now before the Senate but has been considered by the committee, makes the fertilizer feature secondary, because it is made conditional, whereas the production of power will go on continuously and, if the power can be sold, will be a continuing operation. There are conditions in all the measures which have been presented to Congress, as I understand, which will make fertilizer a secondary consideration.

Mr. President, we are faced with the problem of determining what is the best method of disposing of Muscle Shoals. I do not believe that all of the power that can be generated there is necessary in the manufacture of fertilizer; that is to say, we will have a great deal of surplus power even if we manufacture fertilizer to the utmost limit of 40,000 or 50,000 tons of nitrate, as is provided for in the most favorable bills that have been presented.

The pending joint resolution provides that the Secretary of War shall operate the plant at Muscle Shoals. It is a question whether or not the plant should be leased for power purposes or whether it should be operated by the Secretary of War, which amounts, of course, to its operation by the Government. From what has been said here, we must consider whether we are going to undertake to make of Muscle Shoals a plant at which to demonstrate how to manufacture and distribute electric power as cheaply as possible, or whether we are going to try to get out of it as much as we can in the interest of the farmers of the country by manufacturing fertilizer as cheaply as possible.

My idea about the operation of the Muscle Shoals property is this: As I have said, we will not require anything like the power that will be generated there for the manufacture of fertilizer. At the same time, I want to see as much fertilizer manufactured there as can be manufactured and sold to the farmers.

I know that they are not going to buy fertilizer unless it can be bought under as favorable conditions and as cheaply as it can be bought from private manufacturers. If we can make it cheaper there and sell it to the farmers, I want to see that done, whether by private operation or by Government operation. I do not know whether it can be done there so as to make fertilizer cheaper, but I think we ought to make the effort to see if it can be done. I am in favor of the most extensive experimentation, either by private or by Government operation, in order to ascertain what is the best method of manufacturing fertilizer and whether it can be manufactured there, either on a small scale or a large scale, in such a way as to make it available more cheaply to the farmers.

But, in addition to all that, there is a very great amount of power that can be generated there, and if the plant is properly administered and the money received from the sale of the surplus power is properly applied, I think, possibly, the farmers can be very greatly aided in securing cheaper fertilizer than they have heretofore ever been able to obtain.

Mr. President, the question is whether we are going to undertake to operate this plant as a power proposition on business principles, or whether we are going to undertake to sell the power at a price that will be satisfactory to certain people, at a lower price than could be obtained if we should go out in the open market and sell it to the highest bidder. That is the question. Shall we sell it now to the highest bidder and get the greatest amount of money out of it, or shall we sell it for such price as will be satisfactory to certain people who may have the idea that the Government ought to sell it cheaper than would anybody else? Considering it as a business proposition, the thing to do is to sell it at the market price. My idea about selling anything is that it should be sold at the market price. When the Government undertakes to sell anything else it sells it at the market price. If it has land anywhere in the country or supplies which it desires to dispose of, it obtains the best price it can for such land or such supplies; and that is my idea as to the operation of the power plant at Muscle Shoals—to get a fair and reasonable market price and use all of the surplus money which may be obtained, first, in taking care of interest on the investment at Muscle Shoals, and then applying all the surplus to the manufacture, experimental or otherwise, of fertilizers for the benefit of the farmer.

Mr. BRUCE. Mr. President——

The PRESIDING OFFICER (Mr. COPELAND in the chair). Does the Senator from Tennessee yield to the Senator from Maryland?

Mr. TYSON. I yield to the Senator from Maryland.

Mr. BRUCE. Rather than sell it, why might the Government not lease this great property under such conditions and terms as might be thought best for the purpose of promoting the production of power or of fertilizer or what not? In other words, why might not the Government deal with it just as cities now so often deal with property rights they have in their streets? Cities give long leases with a provision that, after a certain time, the title to the property shall revert to the city, and in the meantime the lessee or the grantee of the franchise, of course, pays annual rentals to the city. That practice we pursue most satisfactorily in the city of Baltimore.

In addition to what the city derives by way of compensation from public franchises in its highways, some years ago the city of Baltimore constructed a number of large docks and piers for the accommodation of the commerce of the port of Baltimore. Those docks and piers have been leased, and the commerce of the port has been very much promoted thereby, and the city has received, of course, annual rentals from the spaces leased. It seems to me such a plan would be much more satisfactory than an outright sale of the Muscle Shoals property, for then the title to the property would be gone forever from the public, and nobody would know just what uses it might be put in the future. It might be very difficult to tie the property up with such restrictions and conditions as to carry out the public purpose that might have inspired the transaction.

The main thing that I am opposed to in this case, if the Senator will pardon me for a moment, is Government operation. I have no faith in it, and I think that it has loaded down this Muscle Shoals situation from the beginning like the Old Man of the Sea. The only real reason why some satisfactory solution of this Muscle Shoals question has not been reached already is because these visionary suggestions of one kind or another, originating in theories of Government operation, have been brought forward and have made any practical disposition of the property impossible. If that element had not come into the case, I think that long, long ago the property would either have been sold by the Government, as is now being suggested by the Senator, or, better still, would have been leased by the Government. I think the sooner we cut adrift from all these suggestions about Government operation the better.

Mr. TYSON. I had not intended to say that I wanted to sell the property, Mr. President.

Mr. BRUCE. The Senator used the word "sale."

Mr. TYSON. I only used the expression "sale of the power," not of the property.

Mr. BRUCE. Oh, I misunderstood the Senator. I ask him to excuse me.

Mr. TYSON. I would not think of either selling it or leasing it for any long term of years.

Mr. BRUCE. I think it would even be a great deal better to sell it—inadvisable as that would be—than to have it operated by the Government, because I know that such operation will simply result in inefficiency and waste and in deficits from year to year. I agree with the Senator, however, in thinking that there is no occasion to sell the plant. The right thing, in my judgment, is to lease it on proper rentals and subject to proper conditions and restrictions of every kind, and with a clause for recapture after the end of 40 or 50 years. That is the time which is usually fixed in Baltimore, if my memory does not fail me, when we lease franchises in the public streets. At the end of the lease the title to the property reverts to the city.

Mr. SIMMONS. Mr. President——

Mr. TYSON. I yield to the Senator.

Mr. SIMMONS. Let me ask the Senator from Maryland a question. Does the Senator mean that he would lease this power without any restrictions as to what use should be made of it?

Mr. BRUCE. No, Mr. President; I do not mean to say that, because there would appear to be some special uses to which the property might be profitably turned. Perhaps it might be applied to a threefold purpose: To the production of nitrates, if that be deemed expedient; to the production of power; and to the production of fertilizers.

Mr. SIMMONS. The Senator realizes, does he not, that one of the greatest needs of the farmer to-day is a cheaper fertilizer, and that means a cheaper nitrate than we now are able to get, or have been in the past able to get; and does not the Senator think that the Government, owning this great power plant, in case it should lease it, should provide specifically and unequivocally for the use of it to such an extent as may be found practicable for the purpose of manufacturing a cheaper nitrate?

Mr. BRUCE. I have no objection at all to that, provided the operation of the property passes into private hands, with the superior efficiency and economy that always attaches to private operation.

Mr. SIMMONS. Would the Senator go further than that and agree that the primary purpose specified in such legislation as Congress may see fit to enact should be the production of fertilizer?

Mr. BRUCE. Yes; I would, provided, as I say, the property passed under private control. I would object to that as far as Government operation was concerned, first, because if I am not wrong Government operation is very inefficient and wasteful, and, secondly, because it is not fair to the people of the United States that the Government should come into competition with private enterprise. If the Government rates were really lower than they should be, lower than working conditions justified, of course the deficit would have to be made up, not by the people who were in the immediate vicinity of Muscle Shoals alone but by the entire people of the United States; or, in other words, by the Treasury of the United States. The result would be just the result that has followed from the Government subsidization of the Mississippi Barge Line. New Orleans, because of its site on the Mississippi, derives very considerable advantage from that barge line, which is conducted at a loss by the Government; but it does so at the expense of the other great Atlantic seaports, including Baltimore.

Mr. McKELLAR. Mr. President——

Mr. SIMMONS. But the point I wish to call to the Senator's attention is this: While it would be probably true, as he said, that that part of the power that was used in making a mixed fertilizer might give an advantage to the local customer which the more distant customer would not enjoy, the proposition that I am in favor of contemplates two things: First, that we shall make nitrogen, and then that we shall mix not all of that nitrogen with other elements so as to make a perfect fertilizer, but that we may secure the concentrated nitrogen. The volume of that is small, and the freight on that nitrogen to the most distant part of the United States would be very inconsiderable, and it would be probably less than the rate for which nitrogen obtained from Chile can be carried to the more distant parts of the country. I would provide for both those conditions: First, mixed fertilizer for the use and benefit of those who lived within a reasonable radius, and were able, therefore, to bear the freight rate; secondly, the manufacture of nitrate alone, that may be shipped without much cost to the most distant parts of the country, so that every section of the country would enjoy the benefits of cheap nitrogen.

Given cheap nitrogen, the farmer is going to get cheap fertilizer; and one of the greatest problems that confronts agriculture to-day is that of cheap fertilizer. Take the barren hills of western North Carolina that formerly were considered hardly worth cultivation. They are now producing crops that are far above the average produced in the richest natural soils of this country. Why? Because the people of those regions have learned how to apply fertilizer to the soil to the best advantage, and to improve the soil gradually and rapidly, so that they are producing large crops. When, however, the fertilizer is so high that it takes an unreasonable proportion of the profits from the cultivation of the crop to pay for the fertilizer, it does not result in the net benefit to the farmer which he has a right to expect.

If the Senator will pardon me a little bit longer, during the war, when the question of large production was one of great emergency, we started this scheme at Muscle Shoals to produce nitrogen from the air, with the hope of producing it more cheaply than the cost if imported Chilean nitrates. That was no reason why we could not get nitrates from Chile during the war. There was no blockade against us, no impediment in our shipping facilities, with reference to that country; and the first act that we passed upon this subject specifically dedicated this plant to the production of nitrates from the air, so that the farmer might eventually get cheap fertilizer.

The war closed. We ceased to use the plant. Private industry did not supply what was necessary in order to give the farmer cheap nitrates, and private capital having failed in its opportunity and its duty to furnish the farmer with a cheap nitrogen we are now discussing the old question, whether it is not now the duty of the Government, by some plan, to use this particular property which belongs to it, and which it paid for, so that the farmer may get what he needs so much, and which would be a greater relief to him to-day, I will say to the Senator, than a lower freight rate.

The farmer has many problems. High freight rates constitute one of his problems, and a serious one; but the most serious problem that confronts the farmer in my country, and I think in other sections of the country where they are using fertilizer at all, is the high price of nitrates, which makes the high price of mixed fertilizer; and the amount that he has to pay for it operates to reduce his net profits to such an extent that it leaves him scarcely sufficient for a mere living.

Mr. BRUCE. I will say to the Senator from North Carolina, if the Senator from Tennessee will excuse me just one moment, that if this property should be leased to private parties I am absolutely in favor of the farmer being given a preferential claim on its benefits.

Mr. SIMMONS. I am very glad to hear the Senator say that.

Mr. TYSON. I wish to say, in that connection, that I have not stated that I am in favor of Government operation except as a last resort. My idea—and I have offered an amendment to the pending joint resolution to that effect—is that the Secretary of War should lease the plant, and, failing to find a satisfactory lessee, then he should operate it.

I am in favor of private operation wherever it can be done as well as or better than Government operation; but there are times when the Government has to operate, and whenever that time comes and we have something that is necessary to be done, and we can not get anybody else to do it satisfactorily, then my idea is to have the Government do it as a last resort.

It may be the case here that we can not properly and satisfactorily lease this property. If we can not do it, then I want to see the Government operate it to the very best advantage in the interest of the farmer and make all the fertilizer it can at the lowest price it can, and sell the power that is surplus at the best price it can, and get all the money it can, and use it in the interest of the farmer. The idea of taking this plant—after we have all heard so much about dedicating it to the farmers of this country for manufacturing fertilizer—and making it into a philanthropic exposition of what can be done in the manufacture and sale of power, it seems to me is not a proper one. If we want to go into the power business and show what can be done with power, let us do it, and dedicate a power development to that particular object and not to fertilizer.

Mr. BRUCE. Mr. President, may I interrupt the Senator just a moment?

Mr. TYSON. Certainly.

Mr. BRUCE. Does the Senator think there would probably be any real difficulty about leasing this property to private parties if the Government took the proper steps to do it?

Capital is very eager to utilize water powers throughout the country, and we all know at what a tremendous pace the development of water power has gone in recent years. If the Government would frame its suggestions properly and invite bids for leases, it is inconceivable to my mind that, with the enormous amount of capital we have in the United States and the spirit of enterprise that is rife in the United States, the Government would not be able to lease the property, subject to proper restrictions and conditions, to private business agencies.

Mr. TYSON. I think it is going to be a very difficult thing to lease this property, in so far as the manufacture of fertilizer is concerned. I do not think there will be any difficulty in leasing it in so far as power is concerned. I believe that the Government can get plenty of lessees for the power, because that is something that can be sold and is being sold regularly at a profit, and you can not ordinarily get people to go into business unless they feel they are going to make a profit; but nobody has yet been able to show that a profit can be made in the manufacture of fertilizers at Muscle Shoals.

Mr. BRUCE. Does not the Senator think that if private parties could not make a profit out of the plant, the Government could not do so? What reason is there to believe the Government could make a profit out of any enterprise out of which private parties could not make a profit?

Mr. TYSON. No effort has been made at Muscle Shoals to manufacture fertilizers, and we have had bids on the part of

the Cyanamid Co. during two sessions of Congress. The Associated Power Cos. came here and made a bid at the last session of Congress, but neither one of the bids was at that time accepted. As to whether or not they could have made fertilizer at a profit, I do not know. They assumed they could make it at a satisfactory profit if they had the power as a subsidy; but there is no question in my mind that every bid we have ever had before Congress has been a subsidy bid, because nobody has up to the present been willing to go down there and take over the fertilizer plant and undertake to make fertilizer and sell it to the farmers, even though we were willing to furnish the power at a very low price.

As I understand it, the Senator from Nebraska has introduced a bill which would permit the Federated Farmers' Union to use nitrate plant No. 2 without a single dollar of expense for rental and give them other things which would be valuable to them. Yet, so far as I know, they have made no effort to accept this proposition. Therefore it is a question now whether we can manufacture fertilizer at Muscle Shoals or not. My idea is that we ought to make the effort. The Government is the only one that can or will make the effort, and I think we ought to spend some money in trying out that effort before we say it can not be done.

Last year the Senator from Illinois [Mr. DENEEN] made a speech in regard to the manufacture of fertilizer at Muscle Shoals, in which he showed that at that place nitrates could be manufactured by the synthetic process at $94 a ton, that ammonia could be manufactured at $156 a ton, and that if the synthetic process were used at any other place in the United States it would cost $96 a ton, or $2 a ton more than to manufacture at Muscle Shoals. That is only an estimate. Nobody knows exactly what can be done until it is tried out.

If that is the case, it seems to me that Muscle Shoals, after all, is not an impossible place for the manufacture of fertilizers, and as it has been dedicated to the farmers of the country, I think we ought to try it out, whether by private operation or by Government operation.

Mr. BAYARD. Mr. President, I want to ask the Senator a question if he will yield.

Mr. TYSON. I yield.

Mr. BAYARD. The Senator is speaking continually—and most of our colleagues have been speaking all the way through—about the manufacture of fertilizer. As a matter of fact, when the Government first installed the plant at Muscle Shoals, or started to install it, it was for the sole purpose of extracting nitrogen from the air, was it not?

Mr. TYSON. To be used for the manufacture of explosives in time of war.

Mr. BAYARD. That was one of the bases of phosphate, as they call it.

Mr. TYSON. Not the basis.

Mr. BAYARD. It is one of the bases of fertilizer, is it not?

Mr. TYSON. It is combined with phosphate.

Mr. BAYARD. The resolution of the Senator from Nebraska [Mr. NORRIS] provides for doing more than that. One object is to get out the nitrate, and the other is to have a fertilizer plant, using the nitrate as one of the mixtures in making up the fertilizing product. Is not that correct?

Mr. TYSON. I understand the Senator from Nebraska desires through his resolution for experimentation in the manufacture of nitrates, and then in the combination of these nitrates with other fertilizer ingredients, making fertilizer and distributing it throughout the country, as far as possible, to aid the farmers in ascertaining just what kind of fertilizer is best for each farmer to use on the particular kind of soil on which he has to use fertilizer.

Mr. BAYARD. Yes; but the Senator from Nebraska wants the operation to be conducted on the basis of the manufacture of general farm fertilizers. Is not that right?

Mr. TYSON. I understand the resolution also provides for experimentation plants for the manufacture of nitrates or phosphoric acid—whatever is necessary in the manufacture of fertilizer.

Mr. BAYARD. As a matter of fact, historically speaking, the Government took this place over and established a plant primarily for the purpose of extracting nitrates to be used for governmental purposes simply, and thereafter, when the opportunity is presented now by the Government no longer having that use for the plant, the idea has been to take over that plant and to manufacture not only nitrates but fertilizers as well.

Mr. TYSON. I understand so.

Mr. BAYARD. And all at Government expense.

Mr. TYSON. The Government's idea was to manufacture fertilizers in time of peace.

Mr. BAYARD. But it was not originally the idea to manufacture fertilizers in time of peace; it was simply to produce nitrate, was it not?

Mr. TYSON. I understand it was to manufacture nitrate to be put into fertilizers for the farmers in time of peace, and I assume that there was also to be a manufacturing plant at Muscle Shoals for the production of fertilizers.

Mr. BAYARD. A general fertilizer plant, notwithstanding the fact that the only thing gotten out of the plant by the actual operation was nitrate from the air, and that they would have had to buy and bring together and mix all the other ingredients going into fertilizer?

Mr. TYSON. I understand that is the only thing we have there now, a plant to manufacture nitrates, and nothing more.

Mr. KING. Will the Senator yield?

Mr. TYSON. I yield.

Mr. KING. Mr. President, I have understood that the resolution before us, offered by the Senator from Nebraska, sought to utilize Muscle Shoals for power purposes rather than for the manufacture of fertilizers. I have understood that the issue presented for determination by the Senate was whether Muscle Shoals, including the power to be developed from additional dams in the Tennessee River, was to be devoted to the production of hydroelectric energy which was to be sold by the United States to the people residing in that vicinity, or whether the needs of the farmers were of primary and paramount importance and the power developed at Muscle Shoals and vicinity should be used to manufacture nitrogen and various forms of fertilizers for agricultural purposes. I do not want to misinterpret the position of my friend the Senator from Nebraska, but I had supposed from the discussion in which he participated that his position was that the power developed and to be developed was to be distributed for lighting and heating purposes and that if there was any surplus that it might be used by the Government for experimental purposes in connection with the production of nitrogen from the atmosphere.

I call attention to the fact that the Government has already expended millions of dollars in its efforts to obtain nitrogen from the air. Plant No. 1, costing more than $13,000,000, was employed to develop nitrogen. Several millions of dollars in addition were expended in these experimental activities. The whole sum has been wasted. If I understand the Senator from Tennessee, he contends that the Senator from Nebraska does not make the production of power the principal purpose of this bill or that he regards as of paramount importance the production of nitrogen as the basis of fertilizers. Mr. President, if the Senator from Tennessee is correct, I have not understood the arguments in support of the pending resolution. I have understood from its advocates that a "Power Trust" exists and that electric energy is to be developed at Muscle Shoals for the purpose of furnishing cheaper power to the people and breaking the so-called power monopoly. I have understood from the debate that it was intended by the supporters of this bill that the Federal Government should spend millions of dollars to build power plants and distributing systems; to furnish electricity to the people to illume their houses and streets and to aid them in their industrial enterprises; that in this undertaking it was to be hampered by no State laws or the utilities commission of any State. It was to generate power, sell and distribute the same, without regard to private corporations or the limitations fixed by State laws or by State commissions set up for the purpose of regulating power rates. If I am in error in the conclusions which I have reached respecting the purpose of this bill, I shall be glad to be set right.

Mr. TYSON. I understand that is the position of the Senator from Nebraska, so far as power is concerned; but I think the Senator from Nebraska at the same time desires also to do everything he can to see that the farmer gets nitrates that will be suitable for fertilizer, and that we experiment in such a way so that the farmer will get the very best results from the manufacture of fertilizer that can be had, and that the money which is to be received from the sale of power is to be used for the benefit of the farmer. I think the Senator from Utah has not given the Senator from Nebraska credit for the full idea of this resolution.

I agree with him in so far as his idea about power is concerned. I think he has it exactly right, but I agree with the Senator from Nebraska in so far as he goes in the matter of aiding the farmer in the manufacture of fertilizer. I do not think he goes far enough.

Mr. KING. Mr. President, will the Senator permit a further inquiry?

Mr. TYSON. I shall be glad to.

Mr. KING. I think the Senator's statement corroborates my interpretation of the position of the Senator from Nebraska.

He wants the Government to use Muscle Shoals for the generation of power which is to be sold to private corporations and to individuals, and the proceeds thereof, or a portion of the same, may then be devoted to experimentation for the purpose of obtaining nitrogen from the air; but power is the great object; the generation of electric power is the primary thing in view. If revenue is derived from its sale, then it can be used by the Government to produce nitrogen. However, in the meantime we are to appropriate $2,000,000 out of the Treasury to be available for use by the Department of Agriculture for further experimental purposes by that department.

Mr. TYSON. I do not think the Senator goes far enough. A part of section 6, subdivision (b), provides:

> To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants.

Providing there is enough revenue to be derived from power. It also provides:

> Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program;
>
> (c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce; and
>
> (d) To contract with said farmers and farm organizations to pay the special costs and losses, etc.

Mr. KING. Does the Senator think Congress will turn over to the Department of Agriculture, or some other executive agency, its investments at Muscle Shoals, and all the power potentialities of the Tennessee River, in order that the same may be used by such department or agency, or lease by it, for the generation of power—the power so developed to be sold, and the proceeds, or a part thereof, to be devoted to the manufacture of fertilizer, and that it will supplement the funds derived from the sale of power by large appropriations from the Federal Treasury, for the purpose of building fertilizer plants, and organizing distributing agencies, to carry to all the farmers of the country the fertilizers so manufactured?

Mr. TYSON. Mr. President, I do not see why a reasonable amount of money should not be used in that way. We are spending now, through the Agriculture Department, $143,000,000. I do not believe it will take more than $5,000,000—that is just a guess, or an estimate—for the Secretary of Agriculture to put up all of the experimental plants that would be required.

So far as I am concerned, I do not believe in having more than two or three of these experimental plants for the extraction of nitrogen from the air, because I think that with the plants that have already been established throughout the country, like the one at Hopewell and the one at Charleston, we will be able to see at what cost nitrogen can be bought or fixed by the synthetic process. So that only 1 or 2 or 3, perhaps, of these experimental plants are needed.

The greatest difficulty in all business is distribution. Very few people seem to realize the great cost of distribution. Any kind of manufacturing plant can manufacture, and they can determine what it will cost to manufacture, they can find out all of the elements of manufacturing; but after a thing is manufactured a market must be found for it, and if a market can not be found at a profitable price, there is no use manufacturing the product. That is the great difficulty in connection with this particular problem which people do not seem to appreciate. They seem to have the idea that the generation of power cuts a great figure in the cost of power delivered in the home. The power can be manufactured by steam at 4 mills per kilowatt-hour almost anywhere in this country. It can be manufactured at the mouth of the coal mines at 2½ mills per kilowatt-hour.

In fact, we can manufacture power cheaper at the mouth of a coal mine than we can in almost any hydroelectric plant in the country. That being the case, we have to find a sale for it, we have to find a market for it, we have to put it in every man's home at the place where he can use it at the time he wants it. People do not seem to realize that that costs an enormous amount of money, and that we have to have the service ready, that we have to have all the power that you or I or anyone else will require right at the switch at the time we want it. It costs money to do that. Unless we have it right there we are not giving service. We may develop the power we want to at a certain price, but we do not know until we have had experience what it will cost to distribute it. The hardest thing in the world is to find a market. We are trying now in this country to find markets all over the world for our manufactures, and we can not find them. If there is any unemployment in this country, it is due to a lack of markets and a lack of distribution; and until we learn how to distribute what we manufacture we never can accomplish the end successfully.

Mr. KING. Mr. President, will the Senator yield further?

Mr. TYSON. Certainly.

Mr. KING. Does the Senator mean to leave the impression, and I ask for information, that because of the difficulties of distribution which, of course, includes transportation, which I concede, because there are difficulties, financial and otherwise, in carrying all commodities to every part of the country, that the Government of the United States should, therefore, become a manufacturer of fertilizers and a distributor of them? That would mean organizing transportation companies or agencies, the building of warehouses, and the establishing of huge distributing organizations. I think that we have the most efficient railroad system and, therefore, the best distributing system in the world, the cheapest per ton-mile, and the facility with which freight and all forms of commodities are carried to all parts of our country by railroads and auto trucks is remarkable. And we are developing our internal waterways, and by so doing it is thought that rates will be reduced and transportation facilitated.

I hope that the Senator does not mean that if the Government undertakes the task of distributing fertilizers and commodities the problems of transportation will vanish like mists before the rising sun, or that the Government can distribute cheaper or better or more efficiently than private enterprise.

Mr. TYSON. Not at all. I know that the Government can not distribute as cheaply as private parties ordinarily do. But this is a problem we have to face. We have a farm problem in the country. The farmers are complaining more than any other set of business men in the country. We have a Department of Agriculture that is costing us $143,000,000 annually. We have an agricultural and mechanical university or college in every State in the Union and we are helping them. Those institutions have county agents who go out, and it costs the States of the Union a great deal of money to maintain them. What are they doing? They are trying to teach the farmer how to farm better than he has farmed before. It is our duty, as I see it, if we are going to be efficient, to teach the farmer the very best methods, to teach him the most intelligent methods that can be taught.

The fertilizer proposition, as everybody admits, is the most important proposition to-day, perhaps, before the farmer. Why should not the Government, if it is going to teach him in other ways, teach him how to use fertilizer satisfactorily, how to use it by the very best methods possible? I think that it is as much a duty of the Government to educate the farmer in how to farm as it is to educate him in books or in any other way. As a matter of fact, if I were to be asked which is the most necessary education in this country to-day, I would say that to learn how to farm best would be the finest education a farmer could have.

Mr. KING. Mr. President, will the Senator suffer another interruption?

Mr. TYSON. I am glad to do so.

Mr. KING. I concede what the Senator said about the importance of the agricultural problem and the importance of the farmers knowing how to farm. My opinion is that the farmers know far more about farming than some of the so-called experts in agriculture, and some who are offering panaceas and remedies for the purpose of curing all agricultural ills.

Mr. TYSON. Does the Senator mean to say that the farmers have not been helped by the Agricultural Department?

Mr. KING. No; I concede that it has rendered important service to the cause of agriculture, but I have thought that the department has suffered too much from bureaucracy, and that it has at times been too ambitious for power and too indifferent to the rights of the States and individuals therein. In some cases I have believed that incompetent and inefficient persons have been employed in the department, and that some officious employees have effected knowledge which they did not possess, and a rather contemptuous attitude toward practical industries, and competent farmers whose knowledge of the problems of agriculture is greater than such officious persons. It is obvious that the Department of Agriculture, with the millions which it is expending, is accomplishing good and rendering valuable service to the agriculturists of our country; that the farmers are obtaining all the benefits which they should in view of the huge expenditures of the department there is diversity of opinion.

However, I interrupted the Senator to inquire whether it is his position that in order to obtain fertilizer the Government must engage in the manufacture of the same and in its distribution. The Senator knows that scientific and business men are engaged in the production of fertilizer, not only in the United

States but in other countries. Hundreds of millions of dollars have been invested in various countries by corporations and individuals to produce nitrogen and to manufacture and distribute to the farmers of this and other countries fertilizers for the purpose of replenishing exhausted soils.

The great output of nitrates from Chile undoubtedly has prevented larger capital investments in the United States as well as in other countries for the production of fertilizers. When nature has produced it and it can be obtained cheaply, capital, of course, will be hesitant in engaging in the manufacture of that which nature has produced. However, it has been demonstrated that nitrogen can be obtained from the atmosphere at a relatively small cost, and as a result the exports from Chile to some countries have practically ceased, and private capital in those countries has supplied that which formerly was furnished by Chile.

Germany, a few years ago, as the Senator is aware, imported hundreds of thousands of tons of Chilean nitrates annually. But the German chemists and scientists discovered the nitrogen fixation process, and German companies are now supplying the agriculturists of their country with needed fertilizers.

As I said yesterday, I visited in Germany in 1923 a number of privately owned plants which were producing thousands of tons of nitrogen annually. Some of these plants used the synthetic and others the cyanamide process. German agriculture is rapidly developing, and German manufacturing plants owned by private persons and corporations are supplying the soil needs of the farmers. In the United States private capital is producing nitrogenous and other products required for plant life. Capital is available for the production of fertilizer, and capital will cheapen the cost and make available for the farmers of our country the character of fertilizers required by them.

The farmers of the United States are not so helpless and inefficient and lacking in ability and courage as some would have us believe. They have contributed to the progress and development of our country. They are not asking favors or demanding paternalistic or socialistic experiments. The farmers of our country have been and are now individualists. They believe in initiative, in personal independence and freedom. All they desire is equal opportunity, economic, industrial, and political. They are opposed to special privileges and to discriminations; they want a square deal, nothing less and nothing more. They do not want Federal bureaucrats to assume that they are incapable of walking and that, therefore, the Federal Government must put crutches under their arms. The farmers are readers and thinkers. From the farms come the strongest men in our country.

There are some employees of the Government and some who want to be employed by it, and some who make a living by agitation and propaganda and by affecting great solicitude for the farmers and wage earners, who are importunate in their demands that the Government shall own and operate the railroads and the merchant marine, the mines and smelters; that it shall build all sorts of manufacturing plants and engage in many forms of private business. They would convert the Government into a big business machine and the people into automatons to be moved by Federal direction.

I believe in the American people, in the American farmer, and in the American business man. They are competent to govern themselves and to run their own business. They do not want the inefficient hand of federalism laid upon their shoulders. We have reached the highest standard of efficiency through individualism, and the highest achievements in industry obtained by any people have been reached in the United States through our democratic institutions, not through socialism or by the Federal Government owning or controlling or supervising the lives or the business of the people.

Mr. SMITH. Mr. President, will the Senator yield?

Mr. TYSON. I would like to answer the Senator from Utah. However, I yield.

Mr. SMITH. If the Senator will just let me make one observation I shall be glad. I do not think any Senator on this floor is afraid that any initiative the Government may take will ever stop private initiative. What the Senator from Tennessee and others of us who are interested in the matter are contending for is not so much the Government continuing permanently in the operation, but certainly continuing long enough to demonstrate to us the practicability of it at a reasonable cost. We can not get any of these matters so long as the processes are owned and controlled and developed by private enterprise. There is not a man on this floor who knows anything about the cost of the new process of transmitting messages by radio. I happen to be a member of the Committee on Patents, and there is not a member of that committee who can of his own knowledge know what the instruments and processes of broadcasting will cost. All he can know is the price that is said to be a reasonable one. The Government dedicated Muscle Shoals to the one vital thing of producing this ingredient, nitrogen, and I believe it is our duty to develop the process until we know what can be done and at what price it can be done.

Mr. TYDINGS, Mr. BRUCE, and Mr. HARRIS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Tennessee yield; and if so, to whom?

Mr. TYSON. I should be glad to yield to the junior Senator from Maryland for a short question, but I will never get through my speech if I have half a dozen speeches by other Senators every time a question is asked. I do wish Senators would limit themselves to a question. I yield first to the junior Senator from Maryland, who rose first.

Mr. TYDINGS. As I understand the Norris resolution, the main purpose is to generate power and sell it to communities near Muscle Shoals. Assuming that the incidental part of it, or even the main part of it, is the fertilizer business, I would like to ask the Senator whether he is in favor of permitting the Federal Government to engage in the manufacture and sale of electricity unregulated, not subject to State laws, not subject to price fixing.

Mr. TYSON. I will come to that subject later on, if I only have the opportunity.

Mr. TYDINGS. Without any regulation whatsoever, in conflict and competition with private capital which has gone in as the pioneer and developed the subject?

Mr. TYSON. I would say decidedly no.

Mr. TYDINGS. I would like to ask the Senator this further question: If the Norris resolution is adopted, will not that state of affairs come into existence?

Mr. TYSON. I think not. It may, so far as the Norris resolution is concerned, but if we pass it here I do not think anybody can come into my State with a transmission line and sell electricity in the State of Tennessee without the consent of the State, nor could they do it in any other State in the Union.

Mr. TYDINGS. I would like to call the Senator's attention to the fact that in the Constitution one of the 18 special grants of power given to Congress is the right to regulate interstate and foreign commerce. Taking electric current from Alabama into Tennessee is certainly interstate commerce, and no State can impose any restriction on it, because the courts have overwhelmingly held that any tax on interstate commerce is in fact a power which they have no right to assume. Here we have the Federal Government. We can not tax the Federal Government by State law. We will have the Federal Government coming into the State of Tennessee free of tax, free of regulation, paying out of the Treasury of the whole American people any deficit that may accrue, and directly in conflict with all the private enterprises which have been pioneers and have risked their money to build up the business.

Mr. TYSON. If that is the case, I hope the Senator will offer an amendment which will cure that defect. I shall be very glad to vote for it, because I do not want to have anybody coming into my State who does not get in there on the same basis that every other person or corporation does.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Iowa?

Mr. TYSON. I yield.

Mr. BROOKHART. I would suggest that this matter of regulating the United States Government is a new proposition to me. I did not know it needed regulation. I presumed we would like to have the States regulate the business as the business comes into the States. In fact, Government regulation of the thing is the strongest and most extreme regulation that could be had.

Mr. TYDINGS. Mr. President, will the Senator yield again?

Mr. TYSON. I yield.

Mr. TYDINGS. I would like to call the attention of the Senator from Iowa to the fact that the Government, when it is experimenting in the making of munitions and shells at the various places he mentions, is not selling those things to the American people? They are not in competition. They are developing a business which is essentially a governmental business.

I would also like to say in answer to the Senator from Iowa that he will recall from his reading of the Constitution that there are 18 specific grants of power given, and among them is the regulation of interstate and foreign commerce and a provision that no State can tax any interstate commerce. The Supreme Court of the country has held that time and time again. If current is taken into Tennessee or Iowa, it must come in without the State having the slightest color of right to do anything in its regulation, fixing of price, distribution, or anything else.

Mr. BROOKHART. The point I am making is——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Iowa?

Mr. TYSON. I yield.

Mr. BROOKHART. I have so much confidence in my Government that I think it is going to do the square thing in Alabama and in every other State. I do not think there is any such thing as regulating the Government.

Mr. TYDINGS. The Senator misses the point.

Mr. BROOKHART. The Senator from Maryland raised the question of constitutional power.

Mr. TYDINGS. Yes; but the Senator misses the point. My point was—and the Senator has agreed that I am right—that there is the Federal Government, on the one hand, unregulated, untaxed, uncontrolled, and, on the other hand, there is private capital regulated, taxed, and controlled. Does the Senator think it would be fair for an individual who has put his money into business to be subjected to that kind of competition?

Mr. TYSON. Mr. President, I want to say to the Senator from Maryland that there is now pending before the Senate an amendment offered by the senior Senator from Mississippi [Mr. HARRISON] which provides for the regulation by the States. I am for that amendment, and I am not for any measure that does not carry regulation by the States. Furthermore, I do not believe that any measure can pass the Senate that does not carry the authority for State regulation.

Mr. TYDINGS. I appreciate what the Senator from Tennessee is saying, and, in the main, I am with him; but if he will bear with me just for one minute more I should like to point out that such regulation would be absolutely unconstitutional, and I will explain why in just a moment. If the State may undertake such regulation then, in the case of a man who had a pair of mules in Virginia and wished to sell them to a man in Maryland, the legislature of that State could pass a bill imposing a tax on mules coming from Virginia, and every State could have its own export and import taxes on commodities. In the end we should not have any regulation of interstate and foreign commerce by the Government. If the Senator will read the debates on the framing of the Constitution, he will find that when that clause of the Constitution was considered the power was expressly given to Congress in order to prevent a chaotic condition and one State hamstringing and keeping out the commerce of another State.

Mr. TYSON. Does the Senator mean to say that if we pass the pending joint resolution containing a provision that power transmitted from one State to another may be regulated by the States it would be unconstitutional?

Mr. TYDINGS. Does the Senator refer to Federal power?

Mr. TYSON. Does the Senator mean to say if we include a provision in the joint resolution that the power which is transmitted from one State to another may be regulated by the States that that would be unconstitutional?

Mr. TYDINGS. Yes, sir. I will explain that to the Senator, and the Senator, I think, will agree with me. If a State may tax interstate commerce for one purpose, it may tax it for another purpose, and if it is unconstitutional to tax interstate commerce, whether it be in the shape of mules or grain or coal or anything else, it would be just as unconstitutional when it comes to power.

Mr. TYSON. How would the Senator remedy that defect?

Mr. TYDINGS. I intend to vote against the power provision of this measure for two reasons: In the first place, to attempt to regulate power so produced would result in no regulation at all, because the Supreme Court would hold such action on the part of a State to be unconstitutional. Therefore, the States not being able to regulate it, it would be put on the same plane with private capital. So I shall be forced to vote against the entire joint resolution.

Mr. TYSON. Has the Senator from Maryland no remedy for the objection which he suggests?

Mr. TYDINGS. Yes. The Federal Government might produce power and sell it at the switchboard so that anybody could buy it.

Mr. TYSON. I wish to say to the Senator from Maryland that that is exactly what the amendment which we are now considering provides for. It provides for selling power at the switchboard.

Mr. TYDINGS. But I wish to call to the attention of the Senator from Tennessee the fact that even though the Federal Government did produce the power and did sell it at the switchboard, the State of Alabama, in my judgment, could not tax it, could not regulate it. It might, perhaps, tax the bed of the river; it might, perhaps, find some color of property tax, but it could not tax the interstate commerce in any way whatever.

Mr. TYSON. I do not understand that it would attempt to tax interstate commerce.

Mr. BROOKHART. Mr. President, will the Senator from Tennessee yield to me?

Mr. TYDINGS. Mr. President, I venture to say, in order to clear up that point, that if this question shall be taken, as it will be taken, to the Supreme Court, in my humble judgment the court will not be very long in deciding that if the power to regulate does not exist for one purpose the proposition can not be turned around and the power given for that same purpose. The proposition must stand or fall upon its own merits.

Mr. TYSON. Does the Senator from Maryland intend to say that if the power were sold at the switchboard an individual or a private company or a corporation or a municipality could not take their transmission lines to that point, with the consent of the utilities commission of the State, and get power and transmit it out of the State?

Mr. TYDINGS. The Senator from Tennessee misses my point. What I said was that if the Federal Government shall generate electricity, the State of Alabama can not regulate the Federal Government, no matter how many amendments may be placed in the joint resolution. Here is the junior Senator from Alabama [Mr. BLACK], himself an eminent lawyer, and enjoying a reputation as such in Alabama, and I do not think he would contend that if the Federal Government goes down to Alabama and produces electricity and sells it at the switchboard the State of Alabama can come along and tax and regulate that electricity. Certainly I believe the Senator will concede that it would be a very dubious proposition, and might be decided either one way or the other by the courts.

Mr. BROOKHART. Mr. President——

Mr. BLACK. Mr. President, will the Senator yield there for a question?

Mr. TYSON. I yield first to the Senator from Iowa [Mr. BROOKHART].

Mr. BROOKHART. Mr. President, I have had a little experience with the question just raised by the Senator from Maryland [Mr. TYDINGS] in regard to the power to regulate commerce. Congress always has the power to regulate interstate commerce any way it wants to. It may do so through the machinery of the States if it so desires.

Mr. TYDINGS. Oh, no.

Mr. BROOKHART. It might even submit to taxation.

Mr. TYDINGS. Let the Senator give me an illustration of where it has ever been done and I will agree that he is right.

Mr. BROOKHART. The States have always regulated it when the Government did not act.

Mr. TYDINGS. Cite me one instance where any State has regulated interstate commerce and I will sit down. The Senator can not name one in the whole history of the country.

Mr. BROOKHART. Take intrastate railroad rates. The States have always regulated them until act of Congress on the subject has been passed.

Mr. TYDINGS. Oh, no; the States have only regulated such commerce within the State's limits, which is an entirely different thing.

Mr. BROOKHART. I understand that; but they have regulated such rates and they have affected interstate commerce.

Mr. TYDINGS. Oh, no.

Mr. BROOKHART. However, I do not care anything about that. The point I am trying to make is that the idea that we can not trust the Government properly to regulate such a matter as this and give a square deal to the people and the States and everybody else is quite new to me.

Mr. TYDINGS. We can trust the Government, but the State of Alabama has no power to regulate the interstate commerce of this Nation.

Mr. BROOKHART. It ought not to ask for that power and does not want that power, but it ought to trust the Government the same as the rest of us do—and it will, I apprehend—and the Government's regulation, which will be the best regulation which can be provided.

Mr. BLACK. Mr. President, will the Senator now yield to me?

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Alabama?

Mr. TYSON. I yield to the Senator from Alabama for one minute.

Mr. BLACK. Mr. President, with reference to Alabama, I have long since decided that Alabama's voice as to the disposition of this great natural asset which exists within its borders is very feeble in so far as giving effect to its desires is concerned. I have heard criticized on the floor of the Senate a citizen of Alabama on the ground that he expected his property to be enhanced in value by reason of this asset——

Mr. TYDINGS. The Senator does not mean to suggest that I said that?

Mr. BLACK. And that that was one of the reasons why his great-grandfather moved there many years ago. I have heard, further, that we have no right to tax any water power, a natural asset of the State; but that the State has to tax the farmers of Alabama and let them pay taxes on their farms while the power is shot out to every State within transmission distance.

Mr. TYDINGS. May I interrupt the Senator right there?

Mr. BLACK. I will yield in just a moment.

Mr. TYSON. Mr. President, I will have to ask Senators to give me a little time, in order that I may get through.

The PRESIDING OFFICER. The Senator from Tennessee declines to yield.

Mr. TYSON. No, Mr. President; I do not decline. I will yield to the Senator from Alabama.

Mr. BLACK. I will be glad if the Senator will let me finish what I was saying. I have also heard that the States that are not within transmission distance of Muscle Shoals are prepared now to have an amendment offered providing that the profits received from Muscle Shoals shall be equally divided among those States that are not within transmission distance. Since all of the States are equally entitled to everything that Alabama has within its borders, so far as Alabama is concerned, I assume that it has no right of taxation or anything else.

Mr. TYDINGS. Mr. President——

Mr. TYSON. I now yield to the Senator from Maryland.

Mr. TYDINGS. Mr. President, I should like to remind the Senator from Tennessee—and I believe he will appreciate the logic of the situation—how it was that Congress was given the power to regulate interstate and foreign commerce and why it is that a State can not regulate such commerce. For example, when our country was first formed and we had only 13 States, each one of them had restrictive laws in order to build itself up at the expense of its neighbors. Therefore when we came to be a united country the people realized that they could never stimulate commerce if each State had the right to tax the products of the other States in any way whatsoever. So authority was given to the Federal Congress, the body of which we are Members, to regulate interstate and foreign commerce. The Senator can at once see that if Alabama or Tennessee had the right to tax electric power it would have the right to tax coal coming in, or any other commodity of interstate commerce, and that would lead to a breakdown of the Union. That was the thought underlying the provision of the Constitution. I thank the Senator for his courtesy in yielding.

Mr. TYSON. I think, Mr. President, that if there is such a defect in the joint resolution, it ought to be remedied. If we have to accept the views of the Senator from Maryland on the subject, I do not see how we can operate Muscle Shoals at all without violating the laws of all the States that are within transmission distance. It may be that that is the case, but I hope we will manage to find some way by which we can operate Muscle Shoals and distribute the power that may be generated there.

Mr. President, I had not expected to discuss the fertilizer question so early in my address. I wish to go back a little now and say something about power, which seems to have been the main subject of the discussion in the minds of many Senators and especially in the mind of the Senator from Nebraska [Mr. HOWELL].

I think a great many people will be very much disappointed at the results of the operation of Muscle Shoals so far as the reduction in the price of power is concerned. I should like very much to be able to think otherwise; but, in view of the fact as I understand the joint resolution, that it provides only for the distribution of power to municipalities in the States and other organizations that want it at wholesale rates and not in a distributive way, I can not see how that will reduce the rates for electricity to the consumer below what those rates are now; certainly it will not do so in Tennessee unless the cities themselves shall take over their distributing plants and themselves distribute the current to customers.

The junior Senator from Kentucky [Mr. SACKETT] made this very clear when he said that steam plants could now generate electricity about as economically, if not more so, than it can be produced by hydroelectric processes. If any city in my State wishes to have a municipal plant, there is no reason why it should not have one; that is to say, if it is willing to put up the necessary capital and willing to build the necessary distributing plant and power house.

Take the city of Memphis, for instance, where my colleague [Mr. MCKELLAR] lives. I understand that some people think that Memphis might be able to obtain cheaper electricity if Muscle Shoals is operated and they have an opportunity to secure electricity from that source. I can not see how that can be done simply because Muscle Shoals is operated; I can see how it can be done if they go ahead and build their own power plants and distributing plants.

I have a telegram from the Public Utilities Commission of the State of Tennessee. I asked them at what price electricity was being generated in the city of Memphis by the power company or the distributing company now engaged in business there. To my surprise, they wired back and said that the generating cost of power at Memphis is 3.6 mills per kilowatt-hour. Including maintenance it costs 4.1 mills.

That is very cheap power, especially in view of the fact that the city of Memphis is at least 200 miles from the nearest coal mines that I know of. If power can be generated that cheaply at Memphis by any power company which has a plant which perhaps has been put in for five or ten years, any new plant, perhaps, could make it cheaper than that plant does. Therefore if the city of Memphis wants cheaper power there is no reason on earth why it should not get it, whether Muscle Shoals is operated or not. If it buys power from Muscle Shoals, either the Government or the city of Memphis or some combination of cities must build a transmission line, and, as I understand, being 150 miles away, a transmission line will cost not less than two to three million dollars. In addition to that, it will cost a good many millions of dollars to build a distributing plant in the city of Memphis, to say nothing of the great amount of inconvenience which will be had in the event a new plant is built in the city of Memphis, or in any other city, for that matter.

Mr. MCKELLAR. Mr. President, will my colleague yield to me?

The PRESIDING OFFICER (Mr. HARRIS in the chair). Does the Senator from Tennessee yield to his colleague?

Mr. TYSON. I do.

Mr. MCKELLAR. My colleague has given some very interesting figures about the cost of electricity in Memphis—4.1 mills, I believe, less than half a cent—and that includes depreciation and matters of that sort. As a matter of fact, the power company at Memphis is selling electricity to the general public at 10 cents a kilowatt. The spread is the difference between half a cent and 10 cents to the great body of consumers at Memphis, Tenn. Does not the Senator think that is too wide a spread between the cost of the current and the price to the consumer?

Mr. TYSON. Mr. President, as far as that is concerned, I do not know; it is impossible for me to state, not having all the facts before me. It looks to me as if it is a high price for power, a high price for electricity. I wish we could lower it. It seems to me we ought to lower it; but if we are paying too much, it is the Public Utilities Commission of Tennessee, it seems to me, that ought to see that it does get lowered. It is their job, and they ought to attend to it. I do not know whether they are doing their duty or not; but they are either failing to do their duty or they have been deceived in some way.

I assume that these gentlemen are honest. I believe they are. I believe they are fairly efficient. This thing has been going on not only in Memphis but all over my State. I should like very much to see electric light and power charges greatly reduced in the State of Tennessee, but I do not see how the operation of Muscle Shoals is going to do it.

Let us take the city of Nashville. The city of Nashville is paying 8.3 mills per kilowatt-hour for the power which they are buying at the gates of the city and then distributing. I consider that a very high price for wholesale power, and yet they seem to be paying it. If they can distribute power at a less price than they are distributing it now, which is about 9 cents for the average consumer, I can not understand why they do not build their own plant. They ought to do it if they can reduce the cost of power and the cost of electricity anything like what has been said by the Senators from Nebraska to be possible.

As a matter of fact, I am very confident that no city of any size in Tennessee or in Alabama or in Georgia will build a single municipal plant in order to get power from Muscle Shoals, because of the fact that they are not going to make the great outlay necessary for putting up a distributing plant; they are not going to go into debt for the purpose of building a transmission line and then driving out of business all of the people that are now in business there.

Take the city of Birmingham: I have information to the effect that a year or two ago they had two distributing systems in Birmingham. One was owned by private parties and the other was owned, I think, by the Alabama Power Co. The private distributing plant finally went out of business, because they could not sell power as cheaply as it was being sold by the Alabama Power Co.

Take my own town of Knoxville, Tenn.: We have coal mines within 30 miles of the gates of the city. I have bought coal laid down at the furnace for manufacturing purposes in the city of Knoxville for $1.25 a ton. That was good steam coal. You can buy good steam coal there to-day, laid down at the furnace, for $2 a ton. We can manufacture electricity in Knoxville at least 1 mill per kilowatt-hour cheaper than it can be manufactured in the city of Memphis; and yet, notwithstanding that fact, the city of Knoxville have not even considered the matter of putting up a municipal plant. It may be that they have exercised bad business judgment in not doing it, and yet they do not do it. So I am confident that Knoxville would not put up a municipal plant, and that is the only way in which the cost of power could be reduced to the consumer. They now pay 7½ mills per kilowatt-hour, wholesale. Of course, the cost of power to the consumer might be reduced 3 or 4 mills, but that would not be material, and nobody would consider the matter.

So, Mr. President, I believe that the Senator from Nebraska and every other one who feels that the operation of Muscle Shoals is going to reduce the cost of power to anybody except perhaps those who buy it wholesale is making a great mistake. I wish it could be so; and it may be that what has been brought out here in the Senate—the knowledge that they are getting power for 2 mills a kilowatt-hour in Ontario—may induce the people in these various cities to feel that they can put up a distributing plant and thereby reduce the cost of power to their citizens; but that is the only way in which it can be done unless the Government of the United States itself goes into the distributing business and distributes power all over that country. It can do it. I will admit that the Government of the United States, if it wants to go into the distribution of power to the consumer all over the country, in my judgment can do it cheaper than any corporation can do it, for the reason that it can get money at lower rates, and I believe it can have fairly efficient management.

But, Mr. President, if we undertake to distribute the power from Muscle Shoals to all of the various cities within transmission distance, we can see very well what an enormous outlay it would involve; and if we start in there it would have to go throughout the whole country ultimately, because if we start at Muscle Shoals there is no reason why we should not go as far as the limits of the country extend. If the Government goes into the business of giving cheaper power or electricity to the people in one section, it ought to do it in every section.

So I regret very much, Mr. President, that I am not able to agree with those gentlemen who think that the operation of Muscle Shoals is going to be of any great benefit to the people who live within transmission distance, except in so far as they are going to be able to get more power, and thereby have it better distributed, and through the fact that since there is more power to call on there is a greater amount of development and more power to be sold, and it may be possible to reduce the price, because there is more than can be sold; but as long as we have all the power that we can sell, and everybody is after it, as has been the case in the South for the last several years, I do not believe we are going to reduce the cost of power very much.

The Senator from Alabama [Mr. BLACK] a few days ago, in making his address, stated that he did not think there was any particular demand for that power. Mr. President, I think he made a very great mistake in that respect. I want to read just a short extract from the Commercial Survey of the Southeast, published by the Department of Commerce in 1927, page 113. It is shown there that in the 12-year period, from 1914 through 1925, manufacturing in the Southeast increased in greater proportion than for the United States as a whole, the percentage of increase in the value of manufactured products in the Southeast being 203 per cent, compared with 159 per cent for the country as a whole. Then it goes on to show the great increase in the amount of power, of kilowatt-hours used in those sections. It is stated that reports of the Geological Survey show that the output of power in the six States of North Carolina, South Carolina, Florida, Tennessee, Alabama, and Georgia increased from 3,820,281,000 kilowatt-hours in 1923 to 6,911,421,000 kilowatt-hours in 1927—in other words, almost double, or an increase of 78.6 per cent, compared with 46.8 per cent increase in the same period for the Nation as a whole.

So, Mr. President, that shows that we are in need of power down there; and in my opinion all of the power that can be generated at Muscle Shoals can be sold. Of course, it can not be sold in a day, because of the fact that it requires consumers as well as producers; and if an attempt were made to sell 220,000 horsepower at once it would perhaps be a little bit of a glut on the market. But it can be and will be absorbed, in all probability, in the course of one or two years, if made available for the manufacturers and the consumers in that section of the country, especially within transmission distance, which is 250 miles, which will take in the heart of the fastest-growing section of this country to-day.

Mr. President, I feel that we can get a great deal of money out of the operation of Muscle Shoals as a power proposition; and I want to show to the Senate the great possibilities of the amount of money that can be gotten out of operating Muscle Shoals and selling the power and selling it at a reasonable price, 3½ mills per kilowatt-hour. I am giving you an estimate made by Mr. Merrill, who is the secretary of the Federal Water Power Commission, and I think perhaps knows as much about power as any man in the country.

He shows, Mr. President, that with Dam No. 2 and the 60,000-kilowatt steam plant, on the basis of 3½ mills per kilowatt-hour for the primary power, 3 mills for part of the secondary power, 2 mills for another part, and 1 mill for still another part of the secondary power, we would have a total income of $4,500,000 a year just from that alone, and that the net income at the highest expense would be $1,657,000; that the maximum annual profit would be $3,759,000, and that the average annual profit would be $2,530,000.

If we go ahead and build Dams Nos. 2 and 3 and complete them, the average annual profit will be $3,591,000. If we should build Cove Creek Dam, as is provided in the Cyanamid bid, there will be a possibility of an average annual profit of $7,228,000.

So, Mr. President, it will be seen what an enormous amount of money could be realized if this plant were operated to its full capacity and the electricity sold at more reasonable prices than it is now being sold anywhere in Tennessee or Georgia or Alabama, so far as I know, wholesale. That enormous revenue could be used for the benefit of manufacturing fertilizers for the farmers.

That is an enormous amount of money—$7,000,000—and if it were used for the benefit of the farmers of the country, in my judgment, in the manufacture of fertilizer and helping to distribute it, it would be of incalculable value. Of course, we may not get that every year, but we will get an average, when the plant is run at full capacity, of from three to seven million dollars.

I do not want to take too much time, but I do want to say something about the Cyanamid bid.

Mr. BLEASE. Mr. President, I would like to ask the Senator a question for information.

Mr. TYSON. I yield.

Mr. BLEASE. I have listened very attentively to a good deal of the debate on this resolution, and am trying to learn something about the proposition. Does the Senator really believe that if this plant were operated and manufactured fertilizer it would bring fertilizers to the farmers of this country at any cheaper price?

Mr. TYSON. Mr. President, I doubt it very seriously. I want to be very frank about it. I do not know that it can be done. I think the only way in the world that we can find out—and this is my idea—is to make an experiment, to go ahead and try the matter out, and then we will be able to say what can be done, and not until then.

The farmers throughout this country feel that fertilizers can be manufactured at Muscle Shoals cheaper than the price at which they are now buying them. I doubt it very seriously. I talked to one of the experts in the Agricultural Department yesterday, and asked him whether under any process known to-day used in the most economical manner, we could make any reasonable reduction in the price of fertilizers to the farmer. He admitted to me that he doubted very seriously whether we could reduce the price of fertilizers more than $1 a ton. That is not much; that is very little. But he does not know; he has had no opportunity to do anything to enable him to find out on an experimental basis.

That is why I say that this resolution does not go far enough. I know very well that you can not manufacture in a small way and manufacture economically. You have to do it in a big way. You can reduce the price of any product anywhere from 10 to 20 per cent by manufacturing it in a large way, and fertilizers have to be manufactured by somebody in a large way in order to determine just what the cost of those fertilizers is.

We have to have a fund to use, and this would bring in the fund without any extraordinary expense to the Government. I have no prejudice for or against any process. I have heard the cyanamide process discussed here, and I have heard the synthetic process discussed. As a matter of fact, I do not know very much about either one of those processes, and from the amount of questions that have been asked in the Senate in

the last two weeks about these matters, I doubt very seriously whether anybody in the Senate, with one or two exceptions, does know anything about it.

I do not think it is necessary for us to know much about it. What we want to do is to put it in the hands of experts and let them do the very best that can be done. We can not undertake to go into all of the chemical details here as to what is nitrogen or what not. What we have to do is to put the matter into the hands of men who can properly handle it, and handle it in the most economical way, and then let them report back.

I want to have an opportunity to have an experiment on a large scale. I believe that Muscle Shoals is about as good a place to have that experiment as any other place. We own the property there; we have all the buildings, all the paraphernalia. It is true we have no very good plant, but if we are going to erect a plant anywhere, why should we not erect one at Muscle Shoals and try the experiment out there? Then the farmers of the country will realize that we have kept faith with them. If we do not put a plant of some size at Muscle Shoals and try the matter out there, the farmers of this country will always say that we did not keep faith with them. It has been said that the cyanamide process is obsolete. I will say this for the cyanamide process, without knowing anything about it, that no process can be obsolete that is now producing as much nitrates or as much ammonium or phosphates as is the cyanamide process. That process evidently is a success. Whether or not it is the most successful process I do not know.

It has been said that the synthetic process is the most successful of all the processes. That may be true, I do not know, but the only way by which we may know is for us to try it out, to put this experiment upon a large enough scale of production that we can see what can be done, and at what cost it can be done. Otherwise we never will know.

There are a great many different amendments suggested to this resolution. I have offered two. I have suggested one in regard to the power proposition. My amendment provides for the leasing of the power plant and the sale of the power to the very best advantage by the Secretary of War. Failing that, that he is to operate and sell the power to the very best advantage.

In view of the fact that the Senator from Mississippi has his amendment pending, and it is so much like the one I have on the table, I am going to support the amendment of the Senator from Mississippi, and I intend to vote for his amendment when it comes up. I do not know what my course will be after that, if it should be voted down.

I am deeply interested in what is known as the Willis-Madden bill. I believe that if we do not pass the Norris resolution we will have the Willis-Madden bill before us. It is going to be pressed at this session of Congress, in my judgment, if we do not pass the Norris resolution, amended or unamended. I believe that those gentlemen who are behind that bill are going to make a great effort to pass it in the House, and if it does pass there, of course, it will come over to the Senate.

I am not sure that the cyanamide process can not be made a success. As I said, I think at the place it is being used it is a success, and whether or not it can be made a success at Muscle Shoals remains to be seen.

I want to say something now about the Willis-Madden bill. We have heard a great deal about producing fertilizers at Muscle Shoals in large quantities. The public at large believes that under the Willis-Madden bill whatever subsidy it might give to the Cyanamid Co. would result in their producing fertilizers on a large scale. I say that that might be done. It is possible that fertilizers might be produced on a large scale by the cyanamide process under the Willis bill, but there is nothing in it that guarantees that. The only thing in the world that it guarantees is that after they have taken all the power that can be produced at Muscle Shoals, that can be produced after Dam No. 3 is built, after they have come up into Tennessee and taken the very best that we have up there, after they have gobbled up practically everything that is worth having in the Tennessee Basin, then they are willing to build a plant that will have a capacity of 10,000 tons a year. It will be three years before they have to build that. At the end of the third year they must have that ready. Then they produce 10,000 tons, and they put it on the market at cost plus 8 per cent, and if they can sell 10,000 tons for three successive years at cost plus 8 per cent, then they will build another addition to the plant, which will have a capacity of 10,000 tons. Then, after they have sold the 20,000 tons for three successive years at cost plus 8 per cent, they will build another plant. So that there will be three years to start with before they will have to build anything; there will be six years before they will have to build a second plant; and we may never get a second plant. I doubt seriously, Mr. President, whether they ever will be able to manufacture nitrates and sell them at the rate of 10,000 tons a year at 8 per cent above cost.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. TYSON. I yield.

Mr. HEFLIN. That is what I meant yesterday when I said that I would not support the Willis-Madden bill as it now stands. I want to amend it in many particulars, and the Senator is now mentioning some of the particulars in which I want to amend it. I am willing to join with the Senator and any other Senator to perfect that bill and make those people do what we want down there.

Mr. TYSON. I sympathize most deeply with the Senators from Alabama in their desire to have a great fertilizer plant at Muscle Shoals. I think they are entitled to it. I think the State of Alabama is entitled to have some consideration at the hands of Congress, because of the fact that the water that goes down the Tennessee River ought to be Alabama's water to a certain extent. It has more interest in that water from the time it reaches Alabama until it leaves it than any other State. It owns the bed of that river, and I think it ought to have special consideration. It is true the Government built this great dam there for war purposes in time of war, and for the manufacture of fertilizer in time of peace. Now they are proposing to go up and take another dam, without the permission of Alabama, and use all the water as they deem best. I think Alabama has some rights there. They also want to go up and take what we have in Tennessee, and I think Tennessee has some rights up there, too, and I am going to fight for those rights right here on the Senate floor whenever it is necessary.

Mr. President, I believe this plant should be built there. But to go back to the amount of fertilizer that can be produced, just think of 10,000 tons of nitrate. It is proposed with that 10,000 tons to make 40,000 tons of fertilizer. It will take 18 years, under the terms of that contract, before they ever come up to 48,000 tons. We are talking about wanting a lot of fertilizers for the farmers of the country, and it will be 18 years, under the terms of the Willis-Madden bill, before there ever can be 48,000 tons unless they want us to have it, and we can never get more than 10,000 tons for the reason that if they should fail to sell 10,000 tons in any one year at 8 per cent above cost, then they have to keep on and start in and have three successive years, and it might be a hundred years before they would ever have to make more than 10,000 tons of nitrates.

Not only that, but they are only called on to keep 2,500 tons on hand. Whenever they can not sell it at 8 per cent above cost, 2,500 tons is all they are required to keep on hand.

Mr. BLACK. Mr. President, in the Military Affairs Committee an amendment has been agreed to, according to my understanding—and I do not care to discuss the Madden bill now—to meet the exact point which the Senator suggests, about waiting over a long period of time, providing a recapture clause in case the matter extends over a long period. I think the Senator and I are very much agreed on the necessities of the bill.

Mr. TYSON. There is one other question I want to touch on, because the Willis-Madden bill has been discussed here by Senators, and many of them appear to be in favor of it. I want to show what a delusion and a snare it is. I have shown, perhaps, enough already, as far as that is concerned; but under that bill there will be the greatest subsidy men ever had in this country. I showed that there would be $7,000,000 profit on the power at 3½ mills per kilowatt-hour. They have to have 8 per cent profit on all of the fertilizers that they manufacture. If they can not sell it at 8 per cent profit, they do not have to sell it at all; and they can get seven and one-half million dollars a year of profit from the power alone with an investment of $5,400,000 that they have to put in the steam plant. In other words, they are making 150 per cent a year, according to the statement and the report made last year by the Committee on Military Affairs of the House.

Let us go up into Tennessee and see what they are doing there. Not satisfied with taking Muscle Shoals, not satisfied with gobbling up the greatest single dam in the United States, they insist upon having Dam No. 3 in the State of Alabama 15 miles above there, where they insist upon having 250,000 more horsepower installed for their benefit. Then they go up into Tennessee and have the great Cove Creek Dam built for their benefit, which will produce 200,000 horsepower more. In other words, the sum total, the maximum of installed horsepower, under the terms of the Willis-Madden bill, will be 1,220,000 horsepower, from which they can get from $7,000,000 to $10,000,000 of profit every year, and we are practically

giving it to them for 4 per cent and taking 100 years to get our money back at that. If anybody is satisfied with that sort of proposition, then I can not see how he can say he is doing anything in the interest of the people.

The Willis bill provides that they shall have Dam No. 3, and that dam has to be built immediately. But the Government of the United States, under the terms of the bill, has five years within which it can go into the State of Tennessee and build a reservoir at Cove Creek which will cost the Government $37,000,000. They have five years within which to determine whether they will go or not, and in the event they do not choose to go, then the company has three years within which to determine whether it will build Cove Creek Dam. In other words, we in Tennessee, under the terms of the Willis bill, are compelled to wait perhaps eight years before we can get our power site developed.

Mr. President, I think the Cyanamid Co., if it wants to do the fair thing, if it really means business, should be satisfied if it got even Dam No. 2, because it would then be receiving an enormous subsidy. We would be giving away twice as much as can be produced at Dam No. 2, which is the most extraordinary proposition I have ever known sensible men even to consider. I can not understand how men can consider such a proposition. It is the most monstrous thing I have ever known sensible men even to think about.

I have endeavored to advise the Senate of the enormity of the proposition, and I hope that every Senator will read the report, after long hearings, made on page 1069 of the hearings before the Committee on Military Affairs, House of Representatives, Sixty-ninth Congress, second session. If anyone can come here then and vote for the bill conscientiously, I submit that he has a very different kind of mind than mine.

Here we are going up into Tennessee. That is what I object to especially. If they will go down to Muscle Shoals and give us a fair proposition, taking all the power necessary, we can develop at Muscle Shoals all the power that they will require even if we use the electric process in making phosphoric acid. I am informed that we do not need any electricity to make phosphoric acid. We can take sulphuric acid and put it on phosphate rock and get phosphoric acid. There is a camouflage in that thing. They can do that and thereby increase the cost of the fertilizer, and increase it to such an extent that they can not sell it, and then they will not have to make any more.

The Senator from Alabama said to me the other day, in reply to a question, that it would take 180,000 horsepower to make the phosphoric acid required. As I understand it, we have here two processes, known as the wet process and the electric process. If we use the wet process we do not have to use a single kilowatt of power in making phosphoric acid. Notwithstanding the Federal water power act provides that anyone who gets a permit has only three years in which to determine whether he will go ahead and build a dam under the permit, yet the bill provides further that they are to go up into my State and have five years within which they may determine whether or not they will take a permit on three great power sites in my State which will produce 100,000 horsepower more. Think of it, Mr. President. If all of that power should be given to these people they will have 55 per cent of the installed power of all the States of Virginia, North Carolina, South Carolina, Georgia, Alabama, and Tennessee in the year 1926. Talk about power trusts. We have heard Senators speak of power trusts and of being afraid that a power trust would gobble up something, and yet here are Senators deliberately considering the question of giving the greatest amount of power that any corporation now owns or operates to a power trust.

Mr. BLACK. Mr. President, will the Senator yield?

Mr. TYSON. I yield.

Mr. BLACK. I think the Senator is mistaken about that. The Alabama Power Co. now has more power alone than the total primary horsepower of all these dams put together. Of course, I do not mean installed.

Mr. TYSON. I am speaking about installed horsepower.

Mr. BLACK. I am talking about actual primary horsepower. Cove Creek would only give 20,000 horsepower according to the testimony of the engineers.

Mr. TYSON. I am basing my statement on the report made by the Committee on Military Affairs of the House last year, on which we have to act.

Mr. BLACK. That is installed horsepower.

Mr. TYSON. Yes; but they say that 78 per cent of that horsepower will be available all the time. We have to consider, when we get Cove Creek finished, Dam No. 3 finished, and all these other things finished, that every time we have a dam constructed we store that much more water, and we double and treble the value of many of the water-power sites below, and the farther down we are the more benefit we get or can have.

Here are 180,000 horsepower that they can use if they want to—or as much as they please of it—in the manufacture of the cyanamide, and they can charge it up as cost and will never have to make more than 10,000 tons of fertilizer from now until judgment day.

Mr. President, I have tried to put before the Senate my viewpoint of the situation. I have done it rather unsuccessfully, because I have not been allowed to proceed in an orderly way. I regret exceedingly that I have not been able to present the matter in the order in which I would like to have done, but I hope I have done it in such a way as to show that I am for any process that can make fertilizer at Muscle Shoals in an economical way and so that the farmers will get it at a reasonable price.

I have prepared an amendment which I intend to offer to the Norris resolution which provides that when the best process is found by the Secretary of Agriculture under the experimentation which we are now conducting that immediately he shall undertake to lease the plant at Muscle Shoals under certain conditions, so as to manufacture fertilizer as cheaply as possible and shall sell it upon a reasonable basis; and failing in that, the Secretary of Agriculture himself shall erect a plant or change over the present one and that he shall manufacture at least 5,000 tons of nitrates by 1931 and 5,000 additional tons of nitrates each year thereafter, provided the same can be sold. I have that amendment lying on the table. I expect to offer it at the proper time. I believe that the small processes which we have will not amount to much and that unless we go on to a large scale we never will know whether we can produce fertilizer at Muscle Shoals in a cheap way or not. It has its advantages. Later on it will have more advantages. When these rivers are made navigable coal can come down there and we can transport all the products made at Muscle Shoals to all parts of the country by water. It seems to me, if we have the right process, there is no reason why Muscle Shoals should not be one of the big fertilizer plants of the country.

Mr. BLACK. Mr. President, I merely wish to suggest, in line with the statement of the Senator from Tennessee that they could use the process which is the cheapest, that a great deal has been said about Doctor Cottrell and what he thought about the cyanamide process. I want to read in connection with that statement what Doctor Cottrell said about it yesterday:

> Doctor COTTRELL. At the present time cyanamide nitrogen sells in the market at a little lower price than nitrogen in other forms. You can buy it at a lower price, generally, than you can the other forms.
>
> Mr. GARRETT of Texas. Why?
>
> Doctor COTTRELL. Because it can be produced in that form more cheaply than it can in the other forms, and the cyanamide plants are operating and they are willing to operate on that market as their chief market.

A little later he was asked this question by Congressman JAMES:

> You said a little while ago that to-day the cyanamide people are underselling other people, and you included the synthetic ammonia process, did you not?
>
> Doctor COTTRELL. It is in the other forms of nitrogen.
>
> Mr. JAMES. They are underselling those?
>
> Doctor COTTRELL. Yes, sir.

I just wanted to call attention to that statement of Doctor Cottrell's as relating to an obsolete process and one that is now out of date.

Mr. HARRIS. Mr. President, I wish to remind the Senator from Tennessee that the principal reason the Government is developing Muscle Shoals for the manufacture of nitrates, used to make munitions in time of war and fertilizer in time of peace, is because our country is the only one in the world of any size that has no such plant.

During the war we were entirely dependent upon the nitrates purchased from Chile and it took one-fourth of all our tonnage in order to supply munitions to our soldiers and sailors.

In peace times we are to manufacture fertilizer to be sold to the farmers at cost and experiment in the manufacture of fertilizer with the hope of making it much cheaper than at present.

By using this plant to make fertilizer in time of peace it would enable our Government to use this plant to manufacture munitions any day our country should declare war. It is not only a help to the farmer, but a protection to our Government should we become involved in war, which I pray God may never be again.

Senators on the other side of the Chamber who are opposing the development of Muscle Shoals are free in their criticism of this legislation because they claim it puts the Government in business. Every year our Government appropriates millions

of dollars for experiments in making arms and munitions, but none of these Senators ever criticize the Government for doing that.

Some Senators seem to criticize everything that is suggested here that will benefit the farmers, who are in terrible financial condition. Some of them claim that the Government can not manufacture fertilizer cheaper than the fertilizer companies. If these fertilizer companies are not afraid of our Government cheapening fertilizer to the farmers, why is it they and the Water Power Trust have kept a lobby here for years trying to defeat Muscle Shoals legislation?

I think the water power and fertilizer companies have shown poor judgment in trying to destroy the Muscle Shoals legislation, which is the hope of the farmers; for the more prosperous the farmers are the more prosperous will be these companies. When the farmer prospers everything else is benefited.

Congress should adopt this legislation at this session. It is an outrage that it has been delayed so long. Congress has helped the manufacturers, the railroads, and many others, and it is time something was being done for the farmer.

I ask permission to have printed in the RECORD in connection with my remarks a letter from the Secretary of the Navy and a letter from the Ordnance Department of the Army with the accompanying statement, showing the Government activities in the manufacture of arms, munitions, and so forth.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, February 29, 1928.

MY DEAR SENATOR: There is forwarded herewith a list of articles manufactured at the various navy yards. In addition to this list, the following articles are manufactured by the Navy:

Guns and mounts complete and binoculars at Washington Navy Yard.

Torpedoes and primers at Newport.

Powder at Indianhead.

At the naval aircraft factory, Philadelphia, are manufactured spare parts for old types of planes, floats, aircraft trucks, catapults, experimental aircraft accessories, confidential or secret installations of aircraft, and one or two experimental aircraft per annum.

At the naval clothing factory, Naval Supply Depot, Brooklyn, N. Y., clothes stops; jumpers, blue, dress; overcoats; trousers, blue, dress.

At officers uniform shop, Naval Supply Depot, Brooklyn, N. Y., all items of outer uniform for officers and chief petty officers, except shoes and equipment, which latter items are, however, carried for sale.

Marine Corps Depot of Supplies, Philadelphia. The Marine Corps manufactures for its own use the following:

Clothing, including uniform coats; overcoats; trousers; drawers, knee; pajamas; leggins; flannel and cotton shirts. Tentage, including tent poles and tent pins. Equipment, including infantry packs; leather belts; clothing bags; hand carts; dispatch cases; barracks chairs; field cots; field desks; trunk lockers; flags; target frames; mosquito nets; field ovens; buckets; garbage cans; water cans; sheets; pillow cases; clothing rolls; mattress covers; clothing boxes; packing boxes; signboards, recruiting; bake pans; mess benches; mess tables; machine-gun carts; and steel lockers.

There are probably other activities not herein mentioned, but can not be thought of just at the moment.

Sincerely yours,

CURTIS D. WILBUR.

Hon. W. J. HARRIS,
United States Senate, Washington, D. C.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ORDNANCE,
Washington, February 29, 1928.

Hon. WILLIAM J. HARRIS,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In compliance with your telephone request there are transmitted herewith data showing the ordnance establishments and the functions of each, together with the amount of money spent in the fiscal year 1927 at each of the manufacturing arsenals.

If any further information is required this office will be pleased to send it to you.

Very truly yours,

C. T. HARRIS, Jr.,
Major, Ordnance Department, United States Army,
Executive Assistant.

List of Ordnance establishments, their functions, and date acquired

Establishments	Functions	Date acquired or established	Ordnance funds expended in the fiscal year 1927
Manufacturing arsenals:			
Frankford Arsenal, Philadelphia, Pa	Manufacture of small-arms ammunition, all types; metal components of artillery and trench warfare ammunition; fire control and range finding instruments, including optical parts; manufacture and storage of gauges for small-arms ammunition, fire-control instruments, and drop bombs; reserve storage for fire control, optical and timing instruments; issue of small-arms ammunition and fire-control instruments.	May 27, 1816	$2,269,731.00
Picatinny Arsenal, Dover, N. J	Experimental ammunition development plant; manufactures powder, high explosives, and metal components, and loads ammunition and bombs; development station for military pyrotechnics. Storage of explosives and ammunition.	—— —, 1880	1,608,929.00
Rock Island Arsenal, Rock Island, Ill	Manufactures artillery matériel, including gun carriages, limbers, and caissons; tanks and tractors. Has plant facilities for the manufacture and repair of small arms and machine guns. Reserve storage for artillery 6-inch caliber and smaller; for all small arms, machine guns, and other Infantry weapons; tanks and tractors. Issues ordnance supplies to troops of the Fifth, Sixth, and Seventh Corps Areas, and ammunition for the Sixth and Seventh Corps Areas.	July 11, 1862	1,016,351.00
Springfield Armory, Springfield, Mass	Manufactures United States rifles, spare parts, appendages and bayonets; repairs all types of small arms, including rifles, revolvers, machine guns, and automatic rifles; inspects and stores all gauges for small arms, including gauges for machine guns, automatic rifles, pistols, and revolvers; inspects ordnance materials purchased at Colt's Patent Fire Arms Manufacturing Co., and other plants, and maintains in storage complete equipment for manufacture of caliber .45 pistols.	Apr. —, 1778	606,856.00
Watertown Arsenal, Watertown, Mass	Manufacture of gun forgings, seacoast gun carriages, railway mounts, and projectiles; steel, iron and nonferrous castings; stores and issues parts for seacoast artillery carriages and target material. Operates testing laboratory and is location of the Ordnance School.	Feb. 8, 1816	643,343.00
Watervliet Arsenal, Watervliet, N. Y	Manufacture of light and heavy cannon and accessories	—— —, 1813	371,538.00
Nitrate plants, Muscle Shoals, Ala	Maintenance of plant in stand-by condition for manufacture of ammonium nitrate by the cyanamide process. Sixty thousand (60,000) kilowatt steam-electric power plant under lease to and in operation by the Alabama Power Co.	Oct. 9, 1917	73,121.00
Proving grounds, Aberdeen Proving Ground, Md	Proof-firing of guns and carriages; acceptance and development firing of artillery ammunition and aerial bombs; acceptance and development firings of small arms and small arms ammunition and miscellaneous experimental work; development tests of tanks, tractors and trailers; storage, repair and maintenance of artillery, tractors, and tanks.	Dec. 14, 1917	660,797.00
Depots:			
Augusta Arsenal, Augusta, Ga	Storage and issue of ordnance matériel other than ammunition for the Fourth Corps Area; makes minor repairs to ordnance matériel.	Nov. 19, 1826	----------
Benicia Arsenal, Benicia, Calif	Stores and issues ammunition and other supplies for the Ninth Corps Area, and collects and forwards ordnance supplies for the Army insular possessions and Alaska. Overhauls and repairs ordnance equipment of troops in Ninth Corps Area.	Oct. 10, 1862	----------
Charleston Ordnance Reserve Depot, Charleston, S. C.	Storage of war reserve ammunition; issue of ammunition to Fourth Corps Area	June 3, 1918	----------
Curtis Bay Ordnance Reserve Depot, Curtis Bay, Md.	Permanent storage of war reserve ammunition and components. Stores and issues ammunition for Third Corps Area and Fifth Corps Area.	Oct. —, 1917	----------
Delaware Ordnance Reserve Depot, Pedricktown, N. J.	Storage of war reserve ammunition	Oct. —, 1918	----------
Erie Ordnance Reserve Depot, La Carne, Ohio	Storage and maintenance of tractors, automotive vehicles, and heavy artillery. Proving facilities are available in case of emergency.	Mar. 25, 1918	----------

List of Ordnance establishments, their functions, and date acquired—Continued

Schenectady General Reserve Depot, Schenectady, N. Y.	do		

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred to the Committee on Pensions:

H. R. 4115. An act for the relief of Winfield Scott;

H. R. 4116. An act for the relief of W. Laurence Hazard;

H. R. 4117. An act for the relief of Harriet K. Carey; and

H. R. 10141. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

SURVEY OF AMMUNITION STORAGE

The PRESIDING OFFICER (Mr. HARRIS in the chair) laid before the Senate a communication from the Acting Secretary of War, transmitting, pursuant to law, a report of the proceedings of the joint board composed of officers of the Army and Navy to survey ammunition storage facilities and their points of location, which was referred to the Committee on Military Affairs.

RECESS

Mr. FESS. Mr. President, in accordance with the agreement entered into earlier in the day, I move that the Senate take a recess until 12 o'clock noon on Monday.

The motion was agreed to; and (at 3 o'clock and 15 minutes p. m.) the Senate, pursuant to the agreement previously entered into, took a recess until Monday, March 12, 1928, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

SATURDAY, *March 10, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou who givest to all men liberally, diminish all evil desire and give mastering strength to the one impulse of pure love. The tender and the mighty God longs for us to have the best. Oh, how wonderful it is for us to have visions, how great it is to do, but the grandest of all is to be. O take the indifferent and the chilled hearts of men and warm them; take their determined wills and soften them. Banish all unworthy fear; and may every to-morrow bring them into a new and beautiful relationship with Thee. We must serve Thee before we can be glad. Turn our frailties into strength and our disobedience into loyalty. Let us hear the loving litany of the pilgrim's chant. Be before us, with us, and after us. In the name of our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

DATE OF FIRST SESSIONS OF CONGRESS

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, after the vote on the resolution yesterday and following the advice of the wise men of Congress, I have introduced a bill this morning in keeping with the provisions of the Constitution which would change the date of meeting of the first session of Congress to March 4, following the election on the first Monday of December. This would do away entirely with the lame-duck Congress, and I hope to have the sincere support of the gentlemen who urge that as a remedy instead of a constitutional amendment.

Mr. KVALE. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. KVALE. Mr. Speaker, I had planned to introduce a bill like the one introduced by the gentleman who has just preceded me. But when I went to confer with my good friend the gentleman from New York [Mr. LAGUARDIA] about some points in my bill I found to my surprise and pleasure that he was just finishing the drafting of his bill. Hence, I shall not introduce any bill but give my wholehearted support to his bill.

The majority floor leader [Mr. TILSON] has stated during the discussion on this resolution that Congress can meet on March 4 if it passes a law fixing that as the date for convening. That is true. Then I ask, Will the majority floor leader use his power in this House to have the bill just introduced enacted into law?

Will there be a need for an early session of the Seventy-first Congress? In my humble judgment there will be an urgent need for it. The House Agriculture Committee is meeting these

days in executive session, in secret session, if you please. Vague rumors indicate that the committee will report out either a bill with the equalization fee eliminated, which agriculture does not want, or one containing the equalization fee but otherwise, so emasculated as to be of no use to agriculture. In other words the present outlook is that the committee will report out a bill which will not be a bill for the relief of agriculture but a bill for the relief of the Republican Party.

If the present occupant of the White House, Mr. Coolidge, should be the occupant at that time—which heaven forbid—we know definitely that he would not convene the new Congress. If Providence or fate should decree that a fine English gentleman by name of Herbert Hoover should be the occupant—the which may all the gods forbid—we know we would postpone the convening of Congress for four years if in his power to do so. If Al Smith is in the White House at that time some of us are fondly hoping he would call the new Congress together, but we have no way of forming an opinion or even of making a good guess. For in his clamlike silence on national and international issues he has nothing to say.

If we could have Senator NORRIS, or Senator JIM REED, of Missouri, or Congressman AYRES, of Kansas, in the White House, we would be assured an early session for consideration of farm relief and for the revision of the iniquitous Fordney-McCumber tariff schedules. But because we do not know who is to move into the White House next March, let us take time by the forelock and meet the contingency now while we may.

In other words, the majority floor leader has made his bet. You will pardon the use of these terms, I know. I have never played poker; but I have seen and heard it played for two weeks while convalescing at Tom Taggart's French Lick Springs, And, in the parlance of the game, this bill will call the bluff of the gentleman from Connecticut. What does he hold? Let him put his cards on the table. [Applause.]

PARLIAMENTARY SITUATION—WHITE AMENDMENT

Mr. GARRETT of Tennessee. Mr. Speaker, I desire to call attention to the situation in regard to the RECORD of yesterday. The gentleman will remember that the situation when the proposed constitutional amendment was being considered was as follows: The resolution that was made in order by the special rule was the Senate resolution. By the terms of the rule it was provided that the resolution proposed by the House committee as a substitute should be read for amendment, and it was so read and amended. The RECORD does not show that the House amendment was substituted in Committee of the Whole for the Senate proposition.

Of course, it is not material except as a parliamentary proposition. I presume that it would have been cured anyway by the manner in which the question was put after the Committee of the Whole had dissolved and the subject matter had been reported to the House.

Mr. SNELL. Mr. Speaker, will the gentleman yield for a question?

Mr. GARRETT of Tennessee. Certainly.

Mr. SNELL. Let me read from page 4429 of yesterday's RECORD, from the bottom of the second column:

> Mr. TILSON. Mr. Speaker, a parliamentary inquiry.
>
> The SPEAKER. The gentleman will state it.
>
> Mr. TILSON. Is this the formal submission of the amendment to the Senate resolution?
>
> The SPEAKER. As the Chair understands, this is the formal submission of the amendment, but not of the resolution itself.

Would not that show that the Senate resolution was considered by the House?

Mr. GARRETT of Tennessee. I presume so. I presume that the defect was cured by the proceedings in the House. But as a matter of fact, if you look to the proceedings in Committee of the Whole immediately above that, there was no formal substitution by vote in Committee of the Whole of the White substitute. At any rate, Mr. Speaker, it is immaterial, the proposition having been defeated. It might raise some question if the proposition had carried, but it is not of consequence now.

But I would like to do this, Mr. Speaker: Unless I am confused as to the procedure, the Senate resolution having been defeated, there will not be now any official print of the matter showing the exact resolution upon which the House voted. I think perhaps it may be of interest at some time to those who may study the question in the future and the debate upon it that there should appear in a concrete way the exact proposition as it was voted upon by the House. I therefore ask unanimous consent that I may extend my remarks in the RECORD, in which I will incorporate the exact proposition as it appeared before the House.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. BLANTON. That may be of great importance to this extent, that unless it were shown definitely that the White amendment as amended was an amendment of the Senate proposal the Senate proposal is still left before the House unacted upon. It ought to be definitely understood.

Mr. GARRETT of Tennessee. I think any question about that was cured by the proceedings in the House after the committee was dissolved.

Mr. BLANTON. Then it is definitely understood that the White amendment as amended is an amendment to the Senate proposal?

Mr. GARRETT of Tennessee. Yes. The RECORD does not show the formal adoption in the Committee of the Whole of the White amendment.

Mr. RANKIN. I hope the gentleman will extend his remarks in that part of the RECORD where the question arose, so that there will be a chronological statement to that effect.

Mr. GARRETT of Tennessee. Very well. I will do that.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by printing the White amendment to the Senate resolution.

Mr. GARRETT of Tennessee. Yes; the thing that the final vote in the House was taken upon.

The SPEAKER. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. Under the leave so granted I include the following, prepared by Mr. Tyler Page, the distinguished Clerk of the House, from the official records of the House:

Senate Joint Resolution 47, Seventieth Congress, first session

IN THE HOUSE OF REPRESENTATIVES,

March 9, 1928.

The House considered and amended the Senate joint resolution by striking out all after the resolving clause and inserting the so-called White amendment as a substitute, which latter as amended in the Committee of the Whole House on the state of the Union was reported to the House and agreed to. Upon the question on agreeing to the Senate joint resolution as amended by the White substitute it was decided in the negative, two-thirds not voting in favor thereof.

The following is the text of the original Senate joint resolution:

"Joint resolution proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice president and Members of Congress and fixing the time of the assembling of Congress."

For which the White amendment as amended was a substitute:

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment of the Constitution be, and hereby is, proposed to the States, to become valid as a part of said Constitution when ratified by the legislatures of the several States as provided by the Constitution:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 15th day of January, and the terms of Senators and Representatives at noon on the 2d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 2d day of January, unless they shall by law appoint a different day.

"SEC. 3. If the House of Representatives has not chosen a President, whenever the right of choice devolves upon them, before the time fixed for the beginning of his term, then the Vice President shall act as President, as in the case of the death or other constitutional disability of the President. The Congress shall by law provide for the case of the failure to choose the Vice President before the time fixed for the beginning of his term, declaring what officer shall then act as President, and such officer shall act accordingly until the House of Representatives chooses a President or until the Senate chooses a Vice President.

"SEC. 4. This amendment shall take effect on the 15th day of October after its ratification."

The following is the text of the White amendment, as amended in Committee of the Whole House on the state of the Union and in the House, but which was rejected on the final vote:

"That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 24th day of January, and the terms of Senators and

Representatives at noon on the 4th day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall be on the 4th day of January, unless they shall by law appoint a different day.

"SEC. 3. If the President elect dies, then the Vice President elect shall become President. If a President is not chosen before the time fixed for the beginning of his term, or if the President elect fails to qualify, then the Vice President elect shall act as President until a President has qualified; and the Congress may by law provide for the case where neither a President elect nor a Vice President elect has qualified, declaring who shall then act as President or the manner in which a qualified person shall be selected, and such person shall act accordingly until a President or Vice President has qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice devolves upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice devolves upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 30th day of November of the year following the year in which this article is ratified.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the States within seven years from the date of the submission hereof to the States by the Congress, and the act of ratification shall be by legislatures, the entire membership of at least one branch of which shall have been elected subsequent to such date of submission."

LEAVE OF ABSENCE

Mr. DICKINSON of Iowa. Mr. Speaker, I ask unanimous consent that my colleague, Mr. DOWELL, be given an indefinite leave of absence, on account of illness.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

SENATE BILLS REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. 2827. An act granting the consent of Congress to the States of South Dakota and Nebraska to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.; to the Committee on Interstate and Foreign Commerce.

DESIGNATION OF SPEAKER PRO TEMPORE FOR TO-MORROW

The SPEAKER. The Chair designates the gentleman from Ohio [Mr. COOPER] to preside to-morrow at the memorial exercises.

STATEMENT OF THE PRESIDENT OF HOWARD UNIVERSITY

Mr. CLARKE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a letter and statement in response to a query raised in the House the other day.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection?

Mr. CLARKE. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following letter and statement received by me from the president of Howard University, Washington, D. C., referring to a question recently raised by me during debate in the House:

OFFICE OF THE PRESIDENT, HOWARD UNIVERSITY,
Washington, D. C., March 8, 1928.

Hon. JOHN D. CLARKE,
House Office Building, Washington, D. C.

MY DEAR MR. CLARKE: I wish to thank you for your word in the House of Representatives yesterday, raising the question whether the Honorable Mr. TARVER, of Georgia, had made any effort to check up and find out whether I was correctly quoted in the article read into the RECORD by him. I note his answer, "I have not."

If the gentleman from Georgia had made inquiry, I would have gladly furnished him with direct quotations from recent public utterances, bearing a meaning quite otherwise than the one interpreted to the House by him.

Even well-meaning reporters often misquote and misinterpret. The article in the Afro-American was not a direct quotation but an interpretation made two weeks after the delivery of the address concerned. I am sending you herewith a direct and written statement summarizing views which I have often expressed in public. I call your special attention to the underlined portion of the quotation from my inaugural address, in paragraph 3, on page 2. If you feel at liberty to read this statement in the hearing of the Congress, I shall be very glad, and I believe that the best interest of our country may be well served therein.

With cordial regards, I am,

Sincerely yours,

MORDECAI W. JOHNSON, *President.*

ON AMALGAMATION

By Mordecai W. Johnson, president Howard University

When the distinguished Representative from Georgia made mention of the article in the Baltimore Afro-American, which represented itself as giving my views on the amalgamation of the races, the question at issue was the annual appropriation of the Congress to Howard University. For 50 years the Congress has made an annual appropriation toward the expenses of Howard University. It has done so, I believe, in consideration of the clamant and urgent educational needs of the colored people of the United States, with a genuine desire to help in their fundamental educational development. I do not for a moment believe that the Members of the Congress, facing such needs—and they are still clamant and urgent—would refuse to make that appropriation because of any view on a debatable public question which might happen to have been expressed by an administrative officer of the institution concerned, however much they may themselves be led to disagree with that view.

Moreover, if it should happen to be true that I did recommend to a New York audience the adoption of amalgamation as an expedient for the solution of our American race problem, I do not believe that there would be any dangerously precipitate haste on the part of the American people to adopt that program. Twenty-nine States have already considered this question and have made laws which make intermarriage between the races illegal; and even in those States where such laws have not been made, by far the vast majority of the white and colored people have persisted in the habit of marrying members of their own race. In these States interracial marriage has been the unusual exception.

The fact is, however, that I have made no such recommendation to the American people. On the contrary, I have repeatedly expressed in private and in public, in the North and in the South, in the East and in the West, both voluntarily and in answer to questions, a contrary hope. In no place was this more plainly done than in my inaugural address as president of Howard University, delivered in the presence of an audience approximating 10,000 people, white and colored, June 10, 1927. In this address I said:

"I hope and I do not conceal my hope that his destiny—the destiny of the negro—will be entire public equality, entire good-willed cooperative relations with every element of the American population, and that he will be especially understood by those men who have been his former masters and who have been accustomed to make him a slave. I hope that he will be delivered entirely from every form of public servitude and that he will be redelivered spontaneously by his own consent into a willing slavery to the common good. * * * I hope that this will be a moral accomplishment, not by amalgamation or by any expedient of any kind, even though that expedient should be brought to pass to-morrow morning. Amalgamation would be a beggarly solution of a problem which is essentially moral, and which should be settled in a way which will result in the strengthening of the moral will of both of the peoples engaged in the enterprise. I want my country to conquer all of the inhibitions connected with blackness and all of the fears connected with blackness, but I want the original blackness there and I want that blackness to be unashamed and unafraid."

I did not make this statement on June last in order to satisfy or to placate any body of sentiment represented anywhere in the United States. I have no citadels to gain or to hold that require subterfuge of any kind. It has been and continues to be my custom to speak straightforwardly and in love and to abide the consequences. This inangural statement I repeated, in different language, at New York, and gave my reasons for it. These reasons do not include any manner of concession to the belief that the negro is an inferior human being and that intermarriage with him would naturally bring an inferior human product. I am certain that the burden of proof lies heavily upon those who assume this. It is not competently supported by biological or anthropological findings and is patently refuted by the achievements of mulattoes in the United States, among whom Booker T. Washington was one.

Nor is my position on amalgamation merely an outgrowth of considerations of expediency, though I recognize that the weight of considerations of expediency would be against intermarriage in the greater portion of those sections of the United States where negroes in large numbers live. Under complex modern conditions marriage is a difficult venture under the most favorable circumstances. Two young people of differing races, starting out in wedlock in a community where the majority of both races would be deeply unsympathetic to the venture, would be enormously handicapped and would be likely to come to grief. Their children, moreover, would be obliged to suffer grievous pain in social relationships.

My position with regard to amalgamation is based primarily upon spiritual and cultural considerations. The 12,000,000 negroes in the United States are spiritual hostages of Africa, in the midst of civilization. As long as there are 150,000,000 Africans who are living under economic and political disadvantage, scarcely knowing what modern educational opportunity is, the black people of America can not suffer themselves to be amalgamated with however so effective a group of white people, for their own advantage. It is their business, in my judgment, to make the utmost possible struggle to commend themselves to the confidence of the American people by their labor and by their intellectual and spiritual competency as black men and to use their utmost powers to persuade the United States of America toward a sympathetic and constructive world policy helpful to the fundamental development of the people of Africa. We are ambassadors, as it were, for a hundred and fifty million black people, a living and, I hope, a persuasive exhibit of the possibilities resident in them, and while being utterly loyal to the country of our residence, it is our duty to enlist the rich and world-wide competence of our Nation in the most helpful possible cooperation for the development of the continent and people of Africa.

I am strongly of the belief also that the black skin of the American Negro is a badge of rich historical experience different in temperament and in spiritual quality from the general run of the experience represented by the white skin, and that it is worth while for the black people of America and of Africa to develop the deepest self-conscious pride in that experience and to bring it to civilized expression, if it is at all possible to do so, with undiminished individuality. I believe that this experience, culturally developed, has a contribution to make to the civilization of America and of western Europe (and indeed to the world), which these sections of the human race will be glad to receive, and the unique existence of which they will be glad to promote, in the long run, without exploitation or domination of any sort.

"And in the last place, black and brown are beautiful to me. I do not envisage a world where there shall be a single mongrel color but a world of black and yellow and brown and white, rich like a garden, a world in which widespread reverence for human life as such will make men not only content to see and to live beside human beings of different colors but will fill them with a sense of romantic adventure as in conversation, spiritual, intellectual, and artistic intercourse and travel, they set out to discover and to appreciate the virtues and beauty of the human soul under all manners of skin color and cultural environment. That day may be a long time away. It will hardly come in its fullness during my lifetime and the lifetime of the distinguished Representative from Georgia. But those who would dogmatically assure us that it can not come, and who on the basis of this prognostication would turn us away from the path of justice, cooperative helpfulness, and mercy which may lead to it must not for their own sakes and for their children's sakes be allowed to persuade us. For my own part, it appears to me to be not only the duty but the supreme opportunity of this Nation to promote the education of the emancipated colored people and of the disadvantaged whites, who under the slave régime never had opportunity for education, as rapidly as both may be done, and at the same time. Men and women of white and black groups who have been made intelligent through educational processes which bind them to their country in gratitude and turn them toward each other in mutual respect can not fail to be better agents in the solution of the difficult human problem confronting us in America.

"Not only on the public platform but in my quietest moments, when I entertain my inmost heart's desire, I am always loyal to the best interests of both these groups. I entertain no hope for the American Negro which involves the destruction or loss of any part of the precious heritage or possibilities of the white people of the South. They have not me to fear. It is God whom they and the Nation must fear, because of slavery and its aftermath. I pray and work daily to the end that this fear may be turned into thanksgiving for us all."

THE RADIO SITUATION

Mr. GARBER. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill H. R. 2317.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. CHINDBLOM. What is the subject matter of the bill?

Mr. GARBER. Radio.

The SPEAKER. Is there objection?

There was no objection.

Mr. GARBER. Mr. Speaker, the air is the common birthright of all the people and should not be permitted under any circumstances to be monopolized for the selfish interests of any group or section. A survey of actual conditions at the present time evidences an alarming growth of monopoly and discrimination which absolutely demands drastic and immediate action to protect the interests of the people.

THE FIVE RADIO ZONES

Under the terms of the radio act of 1927, for administrative purposes the United States and possessions were divided into five radio zones, as follows:

First zone: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, the District of Columbia, Porto Rico, and the Virgin Islands.

Second zone: Pennsylvania, Virginia, West Virginia, Ohio, Michigan, and Kentucky.

Third zone: North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi, Arkansas, Louisiana, Texas, and Oklahoma.

Fourth zone: Indiana, Illinois, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas, and Missouri.

Fifth zone: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, the Territory of Hawaii, and Alaska.

DISCRIMINATION IN ADMINISTRATION OF LAW

A cursory glance at the following table showing an analysis of broadcasting licenses by zones reveals unmistakably the trend of present development and the arbitrary exercise of power in the allocation of stations, power, and wave lengths without due regard to the interests of the public:

Analysis of broadcasting licenses

	Population	Population (per cent)	Area (square miles)	Area (per cent)	Number of stations	Total station power in watts	Percentage of station power	Stations with over 1,000 watts
Zone 1	24,378,131	22.73	129,769	3.63	138	213,055	35.30	10
Zone 2	24,337,341	22.69	247,517	6.93	115	116,805	19.34	8
Zone 3	24,826,050	23.14	761,895	21.33	102	47,105	7.80	4
Zone 4	24,492,986	22.83	658,148	18.42	215	164,870	27.31	30
Zone 5	9,213,720	8.59	1,774,447	49.68	131	61,785	10.24	8
Total	107,248,228	100	3,571,776	100	701	603,620	100	60

My own State, Oklahoma, is located in the third zone. This zone has a greater percentage of population of the United States than any of the other zones and is second in area. Yet it has fewer stations, only four of which have more than 1,000 watts power, and its total station power is less than that of one single station in the city of New York! The total station power of the first zone is nearly five times as great as that of the third zone, and zone 5, the next lowest zone in terms of watt power, outstrips the third zone by 14,680 watts, has twice as many stations with over 1,000 watts, and yet its population per cent is only 8.59 compared to 23.14 per cent for the third zone! What possible justification can there be for such manifest discrimination against the Southern States? It is but one phase of the development of monopolistic control in the industry which, in ruthless disregard of the principles of equity and justice, feeds and fattens upon the rights of the masses of the people!

THE MENACE OF MONOPOLY

The radio monopoly is the largest, most effective, most dangerous monopoly in the world. It threatens the very existence of our democratic form of government, its tentacles reaching out to control the entire system of modern communication, public opinion, the press, the parties, and the Government itself! The market assets of the members of the Radio Trust, including the subsidiaries of the American Telephone & Telegraph Co., aggregate about $5,000,000,000.

How is this trust seeking to monopolize the air?

First. By obtaining for the broadcasting stations of its chains the best wave lengths which have been cleared for them by the Radio Commission.

Second. By controlling all the "hook ups" between chain stations as well as the "hook ups" between the transmitters, whether chain stations or independents, and the program presentation from outside of their own studio.

Third. By monopoly by the manufacturer of all broadcasting machinery, thus requiring broadcasters to get licenses from the trust before they can have their stations built or equipped.

Fourth. By a monopoly of patents for radio receiving apparatus, under which they collect dividends or royalties from the manufacture of three-fourths of the receiving sets built in the United States.

Fifth. By an attempt to obtain control of the important short wave lengths.

Sixth. By acquiring control of inventions relating to television, telephotography, distance actuation, and all radio discoveries.

As early as March, 1923, the dangerous growth of monoply in the radio industry was recognized when the House unanimously passed a resolution requesting the Federal Trade Commission to investigate and report on the existing situation. As a result the Commission, on its own motion, filed a complaint charging that the General Electric Co., American Telephone &

Telegraph Co., Western Electric Co., Westinghouse Electric & Manufacturing Co., the International Radio Telegraph Co., United Fruit Co., Wireless Specialty Apparatus Co., and the Radio Corporation of America—

have been and are using unfair methods of competition in commerce—

And that—

the respondents have combined and conspired for the purpose and with the effect of restraining competition and creating a monopoly in the manufacture, purchase, and sale in interstate commerce of radio devices and apparatus and other electrical devices and apparatus, and in domestic and transoceanic radio communication and broadcasting.

PRACTICAL FAILURE OF THE LAW

The radio act of 1927 recognized this evil in the inclusion of paragraph 2 of section 9 of the act, which reads:

In considering applications for licenses and renewals of licenses, when and in so far as there is a demand for the same, the licensing authority shall make such a distribution of licenses, bands of frequency of wave lengths, periods of time for operation, and of power among the different States and communities as to give fair, efficient, and equitable radio service to each of the same.

But through inconsequential controversy as to the exact meaning of the provision, whether it imposed the obligation upon the Commission to distribute stations, power used, and wave lengths equitably among the States or whether it directed the Commission to so locate stations and to so distribute power and wave lengths to them that there might result equitable service to the people in the different parts of the country, this provision of the law, which was intended to safeguard the rights of the public, has been practically nullified. Allocations of stations, wave lengths, and power have been made, not in accordance with either interpretation of the law but in the interests of commercialism and monopolistic control.

INDEFENSIBLE EXERCISE OF FAVORITISM

There are three monopoly stations in the East with 50,000-watt power each, one with 30,000, and one with 15,000-watt power, while west and south of Pittsburgh there is only one station with as much as 15,000-watt power, and in all that vast region only one other station has as much as 10,000-watt power. Thirteen monopoly stations in the East have a station power of 214,000 watts, more than 35 per cent of the total power of the 701 stations, compared with 389,620 watts granted to the other 688 stations. And nine of these monopoly stations, with a total power of 206,500 watts, are on the 25 cleared channels or wave lengths between 600 and 1,000 kilocycles, the most desirable allocations procurable. Seventy-eight stations on these 25 cleared channels have a total licensed power of 323,700 watts, while the other 623 stations, with a total power of only 279,920 watts, are crowded together on the remaining 64 less valuable wave lengths, or an average of more than 9½ of these latter stations on a wave length.

Illustrations of the pernicious spread of monopoly might be multiplied. The hearings of the committee having the problem under consideration are filled with them, official data authenticated by the Federal Radio Commission itself. The intent of the law enacted has been flagrantly violated, injustices predicated upon a mere technicality of interpretation, and the entire field of legitimate radio development strangled in the coils of monopoly. It is a situation which never should have been allowed to occur and for our negligence we are paying dearly.

BREAK THE COILS OF MONOPOLY

Immediate remedial legislation is imperative. Senate 2317, amending the radio law, in addition to extending the life of the Radio Commission for one year, substitutes the following paragraph for paragraph 2 of section 9 of the present act, and places the responsibility for the equitable development of the radio industry with the Commission in such terms that there can be no possible misinterpretation or perversion of the law:

The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

Such an amendment is the protection which experience has shown to be necessary to protect the people against the woeful machinations of monopoly.

PAID ENEMIES OF JUSTICE

The gigantic Radio Trust is making every effort to defeat this legislation, or to emasculate it so as to protect its own selfish interests. Its paid lobbyists are busy in the Capitol, and the misrepresentations of its propagandists have created widespread apprehension as to the effects of its enactment. They have carried on an insidious campaign to defeat the measure by assertions that it would result in the revocation of many licenses and the decreasing of power allotted.

THE AX TO SPECIAL PRIVILEGE

The alarm is reasonable only in those few high-powered monopoly stations in congested areas which have operated to crowd the smaller independent stations off the air or to force them into such disadvantageous positions on the dial that they are practically silenced. To other States and sections of the country the measure would grant increased privileges and power, and the ultimate result would be a reorganization of the radio field to give the maximum of service to the greatest number of people, recognizing that while many of the programs coming from the big city stations are of general interest, they have no inherent value, either in merit or in the universality of their appeal, over the programs broadcast from the smaller, independent stations. It would reconstruct the radio industry to insure to the people their privilege of choosing their entertainment, break the bands of the monopoly which bind the industry, and secure for the public the essential freedom of the air!

CONFERENCE REPORT—WAR DEPARTMENT APPROPRIATION BILL

Mr. BARBOUR. Mr. Speaker, I call up the conference report on the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes.

The Clerk read the title of the bill.

Mr. BARBOUR. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from California asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 14, 17, 23, 24, 27, 38, 51, and 52.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 5, 6, 7, 12, 13, 15, 16, 18, 19, 20, 28, 29, 30, 31, 32, 34, 35, 40, 41, 44, 46, 47, 48, 49, and 53, and agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$69,740"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$10,274,278.50"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,464,551"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$529,500"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "as amended by the act approved February 18, 1928, and including $310,000 for Walter Reed General Hospital as authorized by the act approved February 18, 1928,"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: ", and in addition to the sum of $1,736,619, there is hereby reappro-

priated the following unexpended balances of continuing appropriations: 'Cantonment construction, Panama Canal,' $204,546.61, and 'Sites for military purposes,' $241,932.39, in all, $446,479, to be available for the following as authorized by the act approved February 18, 1928: Steel hangar, $39,500, and addition to radio hut, $6,979, Hawaiian Islands; and construction of landing field, Albrook Field, Canal Zone, $400,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: ", and in addition to the sum of $11,257,445, there is hereby reappropriated for expenditure for bombardment planes and their equipment, spare parts and accessories, the sum of $580,000 of the unexpended balance of the appropriation for 'Army Transportation, 1926'"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In lieu of the sum "$425,000" proposed in said amendment insert the following: "$150,000"; and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: ": *Provided*, That the number of trainees shall not exceed the number which can be trained by the expenditure of this sum and"; and the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "except the pay and allowances of officers and of enlisted men of the Regular Army who are on duty in any capacity in connection with the national matches and the Small Arms Firing School, and except the subsistence of enlisted men of the Regular Army who are not members of authorized teams, which pay, allowances, and subsistence shall be paid from other funds appropriated for that purpose"; and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$825,000"; and the Senate agree to the same.

Amendment numbered 50: That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended to read as follows: "Sites for military purposes, $93,736.92"; and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$89,191.48"; and the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$876,395.73"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 25, 26, 39, 42, and 45.

HENRY E. BARBOUR,
FRANK CLAGUE,
JOHN TABER,
Managers on the part of the House.

DAVID A. REED,
W. L. JONES,
F. E. WARREN,
WM. J. HARRIS,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and embodied in the accompanying conference report as to each of such amendments, namely:

On Nos. 1 and 2: Appropriates for the Army War College under the General Staff Corps, as proposed by the Senate, instead of under The Adjutant General's Department, as proposed by the House.

On Nos. 3 and 4, relating to military post exchanges: Appropriates $69,740, instead of $67,740 as proposed by the House and $98,140 as proposed by the Senate, thereby eliminating 20 additional hostesses for corps areas at $1,500 each, proposed by the Senate, but leaving 13 hostesses at $1,740 each, as proposed in the House bill, and providing $2,200 for traveling expenses of that number instead of $200, as proposed by the House.

On Nos. 5, 6, and 7, relating to pay of the Army: Appropriates $51,563 additional, as proposed by the Senate, for rental allowances to correct an error in the House bill, and restores the interchangeable status of the allotment for payments for officers' mounts as authorized by law, as proposed by the Senate.

On Nos. 8, 9, and 10, relating to the purchase, transportation, and subsistence of horses and mules for the Regular Army under the appropriations "Regular supplies of the Army," "Transportation of the Army," and "Horses for Cavalry, Artillery, etc.": Provides for 2,300 horses and 1,700 mules, instead of 2,400 horses and 1,981 mules as proposed by the Senate and 2,150 horses and 1,450 mules as proposed by the House.

On Nos. 11, 12, and 13, relating to new construction at military posts: Appropriates $5,084,000, as proposed by the Senate, instead of $4,874,000, as proposed by the House, thereby adding $310,000 for new construction at Walter Reed General Hospital, authorized by the act of February 18, 1928, and eliminating $100,000 for barracks at Scott Field, Ill. The amendments as agreed upon also provide, as proposed by the Senate, that the construction work under the act of March 3, 1927, may proceed as modified by the act approved February 18, 1928, and insert a limitation prohibiting the expenditure of any of the funds for work at Scott Field.

On Nos. 14, 15, and 16, relating to seacoast defenses: Strikes out the reappropriation of $50,000, proposed by the Senate, for fire-control apparatus in connection with antiaircraft batteries in the United States; inserts a reappropriation, proposed by the Senate, making $54,000 available for fire-control apparatus for antiaircraft batteries in the insular possessions; diverts the allotment of $31,060, carried in the House bill, for rehabilitating the cable controlling the mine defenses at Panama, and adds to that sum a reappropriation of $68,940, as proposed by the Senate; making a total of $100,000 for fire-control equipment of antiaircraft guns.

On Nos. 17, 23, and 24, relating to the Signal Corps, Medical Department, and Field Artillery activities: Makes provision for tuition of officers detailed as students at civil educational institutions under the appropriation "Incidental expenses of the Army," as proposed by the House, instead of under the separate appropriations for each department, as proposed by the Senate.

On Nos. 18, 19, 20, 21, and 22, relating to the Air Corps: Eliminates $187,000, as proposed by the Senate, for new work in connection with airships and makes the textual corrections in the bill to accomplish the purposes of the elimination; reappropriates $446,479 from unexpended balances of previous appropriations for the construction of a landing field at Albrook Field on the Canal Zone to cost $400,000, a steel hangar and an addition to a radio hut in Hawaii, to cost $39,500 and $6,979, respectively, as authorized by the act approved February 18, 1928, instead of reappropriating a total of $1,018,000, as proposed by the Senate, for miscellaneous construction in Panama and Hawaii; and reappropriates $580,000, instead of $1,160,000 as proposed by the Senate, for additional bombing planes to augment the number of 23 provided by the bill as it passed the House.

On Nos. 27 and 28, relating to the National Guard: Appropriates $2,328,553, as proposed by the House instead of $2,436,300 as proposed by the Senate, for compensation of help for care of animals and equipment, thereby eliminating the increase of $107,747 proposed by the Senate for leaves of absence for caretakers; and appropriates $5,263,150 as proposed by the Senate instead of $5,180,650 as proposed by the House for arms, equipment, etc., so as to provide $82,500 additional for 500 horses.

On Nos. 29, 30, 31, 32, and 33, relating to the Organized Reserves: Appropriates $2,583,667, as proposed by the Senate, for pay and allowances instead of $2,657,000 as proposed by the House; appropriates $463,614 for mileage and traveling expenses, as proposed by the Senate, instead of $371,750 as proposed by the House; makes provision, as proposed by the Senate, for the purchase of blank forms heretofore furnished from Regular Army appropriations; for expenses of camps, makes a direct appropriation of $1,539,650 and a reappropriation of $150,000, instead of a direct appropriation of $1,539,650 and a reappropriation of $425,000 as proposed by the Senate, and a

direct appropriation of $1,534,169, as proposed by the House. The effect of the agreements on the Senate amendments is to establish a harmonious relationship in the appropriations for pay, mileage and travel, and camp expenses so as to provide for the training of approximately 19,348 reserve officers and to supply omissions in that respect in the bill as amended on the floor of the House to provide for the training of 20,000 officers. Of the reappropriation of $150,000, agreed upon by the conferees, $68,601 is added to the direct appropriation of $1,539,650 to fill out the amounts needed to provide camp expenses to care for the 19,348 officers and $81,399 is added to increase the number of flying hours from 15,000, as provided in the House bill, to a figure slightly in excess of 16,500.

On Nos. 34 and 35, relating to the Reserve Officers' Training Corps: Appropriates $2,970,000, as proposed by the Senate, instead of $2,953,500, as proposed by the House, in order to provide 100 additional horses, and eliminates the proviso, inserted by the House, prohibiting the use of training-camp funds for the employment of hostesses.

On No. 36, relating to citizens' military training camps: Strikes out the language, inserted by the Senate, providing that the appropriations shall be available to train not to exceed 40,000 trainees and inserts a substitute to provide that the number to be trained shall not exceed the number which can be trained by the expenditure of the appropriation.

On Nos. 37 and 38, relating to the national matches: Modifies the language inserted by the Senate to make it clear that the appropriation for the national matches should not be charged with the pay and allowances of officers and enlisted men of the Regular Army who are on duty in any capacity in connection with the national matches and the Small Arms Firing School or with the subsistence of enlisted men on such duty who are not members of authorized teams; strikes out the mileage rate, inserted by the Senate, for travel of authorized teams, leaving the subject matter of such amendment to be dealt with in connection with amendment 39, which will come up for separate action in the House.

On No. 40: Appropriates $32,000, as proposed by the Senate, for improvements at the Chalmette National Cemetery, Louisiana.

On No. 41: Appropriates $53,026, as proposed by the Senate, instead of $48,841, as proposed by the House, for the Gettysburg National Military Park.

On No. 43: Appropriates $825,000, instead of $590,000 as proposed by the House and $900,000 as proposed by the Senate, for the construction of roads, trails, and bridges in Alaska.

On No. 44: Improves the text of the appropriation for reimbursement to the city of Miami for harbor improvements, as proposed by the Senate.

On Nos. 46, 47, and 48, relating to the National Home for Disabled Volunteer Soldiers: Appropriates $200,000, as proposed by the Senate, for additional buildings and equipment as authorized by law for the Pacific branch at Santa Monica, Calif.

On Nos. 49, 50, 51, 52, 53, 54, and 55, relating to the covering of certain unexpended balances of appropriations back into the Treasury: Makes adjustments in the several items to accord with the action taken on Senate amendments proposing the use of certain of such balances for Army activities during the next fiscal year, the result of such action being to cover back into the Treasury a total of $876,395.73, instead of $254,874.73 as proposed by the Senate and $1,445,814.73 as proposed by the House.

The committee of conference have not agreed to the following amendments:

Nos. 25 and 26: Providing $1,000 additional pay for the constructing quartermaster at the Military Academy.

No. 39: Relating to the appropriation for expenses of national rifle matches.

No. 42: Providing for the preparation of plans, without competition, for the monument at Kitty Hawk, N. C.

No. 45: Relating to the appropriation of $1,500,000 for reimbursement of funds contributed by local interests in connection with the floods of 1927 on the Mississippi River.

HENRY E. BARBOUR,
FRANK CLAGUE,
JOHN TABER,
Managers on the part of the House.

Mr. BARBOUR. Mr. Speaker and gentlemen of the House, the statement of the managers on the part of the House fully and completely reports the action which was taken by the conferees on this bill. However, it might not be out of order to touch on a few of the high spots of the conferees' action so that the House may more fully understand just what the conference bill provides.

The total amount carried in the War Department appropriation bill, as agreed upon by the conferees, is $400,361,640.50. This is $8,580,627.50 more than was recommended by the Bureau of the Budget. The Senate added $5,360,706 to the bill as passed by the House. In conference the Senate receded from items amounting to $1,785,644.50 and the House receded from items amounting to $1,533,061.50. After the bill passed the House estimates were received from the Bureau of the Budget amounting to $2,042,000 and they are represented in the Senate amendments to that amount. The Senate receded on comparable items in about the same amount as the House, in fact, the amount covered by the amendments upon which the Senate receded is a little more than the amount covered by the amendments on which the House receded on items exclusive of those supported by budget estimates.

One of the principal changes in the bill as agreed upon by the conferees was that providing for more horses and mules for the Army. As the bill passed the House it provided for 2,150 horses and 1,450 mules. The Senate increased this number to 2,400 horses and 1,981 miles, and the conferees agreed on 2,300 horses and 1,700 mules.

Mr. McCLINTIC. Will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. McCLINTIC. I notice that the Senate has increased the number of horses and mules. Are they for the Cavalry?

Mr. BARBOUR. They are for the Cavalry, Artillery, Engineers, and all of the branches of the Army that use horses and mules.

Mr. McCLINTIC. Does the gentleman think that horses will supplant the use of motor-driven vehicles or that motor-driven vehicles will supplant the use of horses in future wars?

Mr. BARBOUR. I will say to the gentleman from Oklahoma that is a question which is now being studied by the War Department. I do not think that in the immediate future, at any rate, motors will entirely supplant horses and mules. There are many places at the present time where motors can not go, and then we might have military activities in the wintertime where the snows are deep and then horses and mules could be used to much better advantage than could motors.

Mr. McCLINTIC. Does not the gentleman think that instead of increasing the number of horses and mules it would be better to decrease the number, having in mind that motor vehicles increase speed, increase efficiency, and decrease the cost of the maintenance of this branch of the service?

Mr. BARBOUR. If we were certain of all those facts at this time, possibly the gentleman would be right. The amount of the increase in this bill is not an increase of the total number of horses and mules in the Army; it will not much more than take care of their losses during the fiscal year 1929, even if it will go that far. Many of these horses and mules at this time have reached rather advanced ages, some of them—in fact, many of them—being 18 and 20 years of age and even older. This provision in the bill will not any more than take care of the losses, and I doubt very much if it will do that.

Mr. McCLINTIC. The reason I have raised this question is that I read in the press that the Cavalry was going to motorize all of their units, and having that in mind——

Mr. BARBOUR (interposing). The Cavalry?

Mr. McCLINTIC. The Cavalry; yes. That it was going to motorize different units, not all of the units but certain of the units.

Mr. BARBOUR. Does not the gentleman refer to the Artillery?

Mr. McCLINTIC. Well, it might have been the Artillery, but anyhow, it was my thought that the quicker we motorize the Artillery and Cavalry the more efficiency we would have for our Army and the quicker we would decrease the cost of keeping up this branch of the service, and I was hoping that the gentleman, being at the head of the committee or in charge of this bill, instead of being in favor of increasing costs along this line, would be in favor of decreasing the costs, having in mind the keeping up of the efficiency of this branch.

Mr. BARBOUR. I will say to the gentleman from Oklahoma that the number of horses and mules as agreed upon by the conferees and now carried in the bill is not as great as the number recommended by the Bureau of the Budget.

Mr. COLLINS. Will the gentleman yield?

Mr. BARBOUR. I yield to the gentleman from Mississippi.

Mr. COLLINS. I think the gentleman ought to let the gentleman from Oklahoma know that losses not only cover death and incapacity of animals but likewise sales of animals.

Mr. BARBOUR. Yes; some of the older horses are sold and disposed of in various ways when they are no longer serviceable, and as stated a moment ago it is very doubtful if the

number now carried in the bill will even make up for the losses during the fiscal year of 1929.

Mr. McCLINTIC. Another reason I raise this point is that a great many of our people throughout the country are wondering why we are still maintaining horse-drawn vehicles and using horses for men in the Army to ride when they know they can be transported four or five times as fast by the use of motor-driven vehicles.

Mr. BARBOUR. That is true, under certain circumstances, but there are places where you can not use motors and you still have to resort to the use of horses and mules. As I mentioned a moment ago, in certain sections of the country in the wintertime, the snow is so deep that it is impossible to use motors, and we must have a certain number of horses and mules until we know definitely that we have something that will do the work as well or better.

Mr. McCLINTIC. I am sure the gentleman and I are both driving at the same point, which is efficiency.

Mr. BARBOUR. Yes.

Mr. McCLINTIC. I can not conceive of any place at the present time where we would need horses to take care of a situation in this country where there are excessive snows; that is, in case of war.

Mr. BARBOUR. At the present time, that may be, but there might be such a situation. That is offered only as a suggestion of a situation that might arise.

Mr. McCLINTIC. I can not conceive of any place where we could use horses better than motor-driven vehicles. Of course, in certain countries of the world there might be a situation arise where we would have to climb mountains, but that is so far removed in my mind that I can not understand why we would have to have more horses or more mules in the future than we have at the present time.

Mr. BARBOUR. At the present time it is not possible to use motors efficiently at all places along the Mexican border. There are many places down there where they still have to use horses. Let me also say to the gentleman that when the House subcommittee brought the bill in we reduced the number of horses and mules recommended by the Bureau of the Budget. The Senate put the number of horses and mules back to the number recommended by the Bureau of the Budget. We have agreed in conference on less than the Senate provided and less than was recommended by the Bureau of the Budget.

Mr. McCLINTIC. Does the gentleman have in mind the approximate number of horses that will be available for each man in the Cavalry?

Mr. BARBOUR. Well, there is a difference of opinion on that. Some contend that the number of men in the Cavalry and Artillery, who should be mounted, are not mounted; and others say that there is more than one horse for every man that should be mounted.

Mr. McCLINTIC. Then I will ask the gentleman this question: How many horses are assigned to each officer in comparison with each man in the Cavalry?

Mr. BARBOUR. My understanding is that each officer is entitled to one horse. If he wants to provide additional horses, he is entitled to buy them himself, and an officer below the grade of major is allowed a certain amount of money for not to exceed two horses he owns himself in lieu of the Government purchasing those horses.

Mr. McCLINTIC. If he is allowed a certain amount of money in lieu of the Government purchasing horses, does he get that money for his personal use if he does not buy horses?

Mr. BARBOUR. No; it is only where he buys and owns his own horses.

Mr. McCLINTIC. Then, even if he is entitled to a certain amount of money, he can not draw that money and utilize it for other purposes, unless——

Mr. BARBOUR. Not unless he owns his own horse or horses; and that applies only to officers below the grade of major. From the grade of major up, even if they own their own horses, they do not get any additional money.

Mr. McCLINTIC. I simply want to make the concluding suggestion that I hoped we can reduce this character of expense in the future.

Mr. BARBOUR. Let me say to the gentleman that there is a study of this subject being made in the War Department at the present time, and, as suggested by the gentleman a short time ago, certain Artillery units are being motorized. The corps artillery is or is being motorized. The divisional artillery is still horse-drawn, but the whole subject is receiving the consideration and study of the War Department, having in mind the very suggestions the gentleman from Oklahoma has made.

Mr. COLLINS. If the gentleman will permit, the gentleman recognizes the fact we have about a horse and a half for every man in the Cavalry.

Mr. BARBOUR. According to some estimates.

Mr. COLLINS. Is not that so?

Mr. BARBOUR. I am not prepared to say that is so.

Mr. COLLINS. The gentleman does not deny it?

Mr. BARBOUR. No; I do not deny it. Neither do I affirm it. Some of the testimony offered before the committee is to the effect that we have not even one horse for every man who should be mounted.

Mr. COLLINS. I do not think the gentleman can make that statement, because we have a fraction over 7,000 men in the Cavalry and we have over 9,000 horses to start with.

Mr. BARBOUR. But many of them are not used as saddle horses.

Mr. COLLINS. Then, in addition to that, we have the mules.

Mr. BARBOUR. Yes.

Mr. COLLINS. And in addition to that we are appropriating $250,000, at $150 a horse, which would run over 2,000 horses.

Mr. BARBOUR. My recollection is quite clear that some of the Cavalry and Artillery officers testified——

Mr. COLLINS (continuing). So we have more than a horse and a half for every man in the Cavalry.

Mr. BARBOUR. My recollection is quite clear that some of the officers of the Cavalry and Artillery testified before the committee that there was not one horse for every man who should be mounted in the Cavalry and Artillery.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. WAINWRIGHT. Is there any army in the world to-day seriously contemplating doing away entirely with cavalry or with horse-drawn artillery?

Mr. BARBOUR. According to my information there is not.

Mr. SPEAKS. Will the gentleman yield?

Mr. BARBOUR. I will.

Mr. SPEAKS. Under the present law 48 drills per year are scheduled for the National Guard. It is known at the present time that a defieiency will exist for the current year, and also for the following year, 1929. Has any arrangement been made to meet this emergency?

Mr. BARBOUR. I will say that as far as 1929 is concerned I do not think it can be said definitely that there will be a deficiency. There are figures available that would indicate that there will be a deficiency. That is one of the hardest things the War Department has to estimate, because it can not be foretold how many men will attend the drills during the fiscal year, and there are so many uncertain elements that it can not be determined definitely.

The amount carried in the bill was intended to provide for 48 armory drills. I think that was the intention of the House. It was the intention of the Senate and was stated on the floor of the Senate by Senator REED that it was the intention to hold 48 armory drills during the fiscal year of 1929.

Mr. SPEAKS. I agree with the gentleman that it is very difficult to determine in advance the number of men who will report for drills on which payment is based. However, almost three-quarters of the fiscal year 1928 has expired, and it is apparent that there will be a deficiency. I desire to know what arrangement will be made to take care of it?

Mr. BARBOUR. That is a matter for a deficiency appropriation bill; that would not come in this bill.

Mr. SPEAKS. Drill pay for the National Guard is involved in the bill, and it is evident that a deficiency will occur in this item for the current year, and it is important to know what arrangement will be made to meet it?

Mr. BARBOUR. That has nothing to do with this bill. That is a situation that will have to be met when it comes before us definitely and in the regular way.

Mr. SPEAKS. I understand; but I want to get the information in the RECORD so that at the proper time the House and the country may understand that we are requiring men to attend 48 drills per annum and at the same time fail to appropriate sufficient money to pay them for this service.

Mr. BARBOUR. I do not think we have failed to appropriate sufficient money. That is a matter to be considered in connection with a deficiency bill.

Mr. SPEAKS. On the floor of the Senate the question was raised, and Senator REED, basing his statement on the report of General Summerall, admitted that there would be a deficiency for the last quarter of 1928. We are requiring men to attend these drills; if they fail to do so they are punished, so it is important that we appropriate the money necessary to pay

them for services rendered in accordance with their enlistment contract.

Mr. BARBOUR. Does the gentleman say there has been any refusal to appropriate sufficient money?

Mr. SPEAKS. No; but I am endeavoring to ascertain what plan you have in mind for meeting the deficit in the current year.

Mr. BARBOUR. The gentleman is talking about a deficit that will occur in the fiscal year 1928. There is a deficiency bill coming along, and that matter will, of course, be taken up in the consideration of that bill.

Mr. SPEAKS. That is the information I have been endeavoring to secure.

Mr. NEWTON. Will the gentleman yield?

Mr. BARBOUR. I will.

Mr. NEWTON. I want to inquire in reference to the change as to the Organized Reserves appropriation. What is the practical effect of the several changes that have been made between the House bill and the Senate bill?

Mr. BARBOUR. The effect with reference to the Reserve Officers' Training Corps is that we provide 100 more hours than the House bill carried. There was an amendment adopted by the House raising the number of Organized Reserves trainees to 20,000, or 4,000 more than recommended by the subcommittee. The House amendment provided for the pay but not for the mileage of the additional 4,000 trainees. The Senate took from the pay item practically enough money to cover the mileage.

Mr. NEWTON. They cut down the number of trainees and added it to the mileage?

Mr. BARBOUR. Yes; and the result is that there will be fewer than 20,000 trainees; but the reduction is small in comparison to the total number, and everyone who trains will receive his mileage.

Mr. NEWTON. What changes did they make with reference to the Organized Reserves that are in the Air Corps?

Mr. BARBOUR. We increased the flying hours from 15,000, as carried by the House bill, to 16,500, or 1,500 additional flying hours.

Mr. STOBBS. Will the gentleman yield?

Mr. BARBOUR. I will.

Mr. STOBBS. What was done with reference to the citizens' military training camps?

Mr. BARBOUR. The same amount of money is provided that was carried in the 1928 bill—$2,801,240. Last summer they trained something like 38,000, because they had a carry-over fund. This year we provided the same amount with the idea that they should train 35,000 trainees. The Senate incorporated an amendment in the bill, which provided that with this sum not to exceed 40,000 trainees should be trained. The conferees agreed on an amendment which provides that with this sum carried in the bill not to exceed the number that can be trained under this amount shall be trained.

Mr. STOBBS. Then there is an increase made in the appropriation provided by the Senate amendment?

Mr. BARBOUR. No; the appropriation was not changed at all.

Mr. STOBBS. The practical result is going to be that if you can train more than 35,000 trainees, all well and good.

Mr. BARBOUR. All well and good.

Mr. STOBBS. And the amount that is agreed to is based on the estimate of taking care of 35,000 trainees?

Mr. BARBOUR. Yes.

Mr. O'CONNELL. And possibly 40,000.

Mr. BARBOUR. There is no limit. The Senate amendment provided not to exceed 40,000 trainees, and the conferees agreed that there should be no definite number mentioned.

Mr. WAINWRIGHT. Mr. Speaker, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. WAINWRIGHT. I asked the gentleman to yield simply for the purpose of stating that the number of applications for this training this year already is nearly four times as many as at this time last year. The statement was made during the debate upon the bill, when it was in the Committee of the Whole House, that the demand for this training by the young men of the country was increasing from year to year. I have figures supplied by The Adjutant General that up to March 1 this year in the various corps areas 8,815 boys had applied for this training, as against 2,929 up to March 1 of last year.

Mr. BARBOUR. It may be that they are getting their applications in earlier this year. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Amendment No. 25: Page 51, line 7, after the figures "$4,000," insert "constructing quartermaster, in addition to his regular pay, $1,000."

Mr. BARBOUR. Mr. Speaker, I ask unanimous consent that amendments Nos. 25 and 26 be voted upon together, because they relate to the same thing. No. 26 is a correction of the total.

The SPEAKER pro tempore (Mr. TILSON). The gentleman from California asks unanimous consent that amendments 25 and 26 may be voted on together. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report amendment No. 26.

The Clerk read as follows:

Amendment No. 26: Page 51, line 11, strike out "$50,192" and insert "$51,192."

Mr. BARBOUR. Mr. Speaker, I move that the House recede and concur in Senate amendments Nos. 25 and 26.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 39: Page 68, line 13, strike out the figures "$500,000" and insert "there is hereby reappropriated the sum of $500,000 of unexpended balances of appropriations and in amounts as follows: 'Citizens' military training camps, 1925,' $100,000; 'Reserve Officers' Training Corps, 1925,' $290,000; 'Reserve Officers' Training Corps, 1926,' $110,000."

Mr. BARBOUR. Mr. Speaker, I move to recede and concur with an amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Mr. BARBOUR moves that the House recede from its disagreement to the amendment of the Senate No. 39 and agree to the same with the following amendment: At the end of the matter inserted by said amendment insert the following after the sum "$110,000": "; which funds are in full for the conduct, operation, and maintenance of the national matches and the competitions and Small Arms Firing School held in conjunction therewith, except as may be specifically provided for in other appropriations: *Provided*, That members of authorized civilian teams traveling by train or automobile may be paid travel allowance at the rate of 5 cents per mile, which shall include subsistence while traveling, for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the national matches and for the return travel thereto: *Provided further*, That the payment of travel pay for the return journey may be made in advance of the actual performance of the return travel."

Mr. SPEAKS. Mr. Speaker, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. SPEAKS. This amendment refers to the national matches, which was thoroughly discussed by the membership. I note that while the appropriation is apparently made to carry on the matches as agreed to by the House, it depends somewhat on unexpended balances remaining in certain items back as far as 1925. Is it possible that large sums of money are available for the uses of the department after the lapse of four years' time?

Mr. BARBOUR. Oh, yes. This money is in the Treasury. The effect is the same as if a direct appropriation were made, because the money is there.

Mr. SPEAKS. It is surprising to me, and I think it will be somewhat new to the Members generally, to know that large sums of money are lying dormant to the credit of departments for a period of four years. Is there any system of checking up departmental activities whereby the House might know exactly the amounts unexpended at the close of each fiscal year?

Mr. BARBOUR. Yes. We get statements of that kind from the War Department, and if the gentleman will look at the last two pages of the bill he will find a list of repealed appropriations, based on a statement furnished to the subcommittee by the War Department, of unexpended money. The House repealed those appropriations, but the Senate struck out some of the items repealed by the House and used them for reappropriation in connection with other items.

Mr. SPEAKS. Then we have the assurance of the chairman that the funds appropriated from unexpended balances are actually available for the purposes intended?

Mr. BARBOUR. Oh, yes. Otherwise we would not have attempted to carry them in the bill.

The SPEAKER pro tempore. The question is on agreeing to the motion.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 42: Page 79, line 24, insert: *"Provided,* That not to exceed $5,000 of this sum may be expended for the purchase of plans, drawings, and specifications for the erection of this monument by open competition, under such conditions as the commission may prescribe."

Mr. BARBOUR. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The SPEAKER pro tempore. The question is on the motion of the gentleman from California that the House recede and concur in the amendment.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next Senate amendment.

The Clerk read as follows:

Senate amendment No. 45: Page 84, line 17, insert:

"FLOOD RELIEF

"Flood relief, Mississippi River: For the reimbursement of funds contributed by local interests to the Mississippi River Commission, and used for emergency levee construction and repair work on the lower Mississippi River on account of the flood of 1927, $1,500,000, to be immediately available and to be expended by the Mississippi River Commission: *Provided,* That the provisions of the flood control act approved March 1, 1917, in so far as they forbid expenditures by the Mississippi River Commission for levee work unless local interests contribute one-third the cost thereof, shall not apply to emergency levee work done, or to be done, on account of the flood of 1927."

Mr. BARBOUR. Mr. Speaker, I move that the House recede and concur.

The SPEAKER pro tempore. The gentleman from California moves that the House recede and concur in the amendment. The question is on agreeing to that motion.

The motion was agreed to.

SPECIAL ORDER TO ADDRESS THE HOUSE

The SPEAKER pro tempore. Under the special order the gentleman from Massachusetts [Mr. LUCE] will be recognized for 20 minutes. However, if the gentleman from Massachusetts will withhold, the Chair is informed that there is some question as to what the special order of the House is. The Chair will have to examine it. Does the gentleman from Massachusetts have any recollection of just when the order was made on the day he was granted time?

Mr. LUCE. My recollection is that the gentleman from Illinois [Mr. MADDEN], who made the request, included in it no specifications beyond what appears on the face of it.

The SPEAKER pro tempore. Does the gentleman from Illinois [Mr. MADDEN] recall his request in connection with the special order?

Mr. MADDEN. My request was that the gentleman from Massachusetts [Mr. LUCE] and myself should be given 20 minutes each immediately after the reading of the Journal and the disposition of matters on the Speaker's table. That would bring us now in order, it seems to me.

The SPEAKER pro tempore. The Chair's attention has been called to the fact that a question had been raised.

Mr. MAPES. Mr. Speaker, if the Chair will refer to page 4108 of the RECORD of March 5, 1928, he will see that the request of the gentleman from Illinois as first made provided that the gentleman from Massachusetts and the gentleman from Illinois should have time when it would not interfere with the regular business of the House.

Mr. MADDEN. It does not say that.

Mr. MAPES. That is the request. I read from the RECORD:

Mr. MADDEN. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from Illinois rise?

Mr. MADDEN. Mr. Speaker, I rise to ask unanimous consent that on the first occasion after the reading of the Journal and when it will not interrupt any other business that 40 minutes be accorded to the gentleman from Massachusetts and myself to discuss the question against which I objected a few moments ago.

But in putting the request by the Speaker pro tempore no such limitation was put upon the request.

The SPEAKER pro tempore. The Speaker pro tempore specifically requested that the gentleman put his request a little more definitely, which the gentleman proceeded to do in the next paragraph.

Mr. MADDEN. I asked that on the first occasion after the reading of the Journal and the business will not be interfered with I might address the House on Saturday. Objection was made because it might interfere with the business. It was agreed upon every hand that Saturday should be the day.

Mr. CHINDBLOM. Mr. Speaker, I suggest that this is a matter of resolution; it is an order of the House, and the Journal ought to be conclusive. The debate in the RECORD may be illuminating, but this is not in the nature of a colloquy. It is a resolution entered by unanimous consent.

The SPEAKER pro tempore. The Chair is informed that the RECORD simply shows the order as put by the Speaker pro tempore. I read:

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that on Saturday next, after the special orders and disposition of other business on the Speaker's table, the gentleman from Massachusetts [Mr. LUCE] may be allowed to speak for 20 minutes out of order, and that the gentleman from Illinois may be permitted to speak for 20 minutes out of order. Is there objection?

There was no objection.

Mr. LEHLBACH. Mr. Speaker, is it not a fact that it was a special order which the House gave consent which was put to it by the Speaker? The language of the gentleman is not governing, but the proposition to which the House gave consent and which the Speaker submitted to it governs.

The SPEAKER pro tempore. The Chair takes that view of the case and so rules, and recognizes the gentleman from Massachusetts for 20 minutes.

Mr. JOHNSON of Washington. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. Does the gentleman from Massachusetts yield to the gentleman from Washington?

Mr. LUCE. Yes.

Mr. JOHNSON of Washington. Following the request of the gentleman from Illinois and the gentleman from Massachusetts, I made a similar request. I take it that I shall be permitted to follow the gentleman from Illinois [Mr. MADDEN]?

The SPEAKER pro tempore. The Chair so understands.

Mr. MADDEN. My understanding is that I shall be permitted to answer the objections that these two gentlemen wish to make to certain methods of procedure in connection with the consideration and reporting of bills, and because of the desire to discuss that phase of it I agreed that I would discuss it with them. My contention is that I have a right to answer the statements made by these two gentlemen.

Mr. GARNER of Texas. The gentleman will have to take his time as it was fixed by the House at the time. The gentleman from Massachusetts will speak 20 minutes and then the gentleman from Illinois will speak 20 minutes.

Mr. MADDEN. At the time it was understood that we were each to speak for 20 minutes on a given subject.

Mr. JOHNSON of Washington. But I did not couple my request with the request made by the two gentlemen. I asked for time independently and asked that I might follow them, and the RECORD will so show.

The SPEAKER pro tempore. The Chair will follow the order.

Mr. GARRETT of Tennessee. Mr. Speaker, I suggest the absence of a quorum.

The SPEAKER pro tempore. Evidently there is no quorum present.

Mr. SNELL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 45]

Aldrich	Cramton	Hancock	McFadden
Allen	Curry	Harrison	Magrady
Anthony	Darrow	Hastings	Martin, Mass.
Arentz	Davey	Haugen	Menges
Bankhead	Deal	Hawley	Merritt
Beck, Pa.	Dempsey	Hull, Morton D.	Moore, Ohio
Beck, Wis.	De Rouen	Hull, Wm. E.	Moore, Va.
Berger	Dickstein	Hull, Tenn.	Morin
Bloom	Douglas, Ariz.	Igoe	Nelson, Wis.
Boies	Doutrich	Irwin	Norton, N. J.
Bowman	Dowell	Jacobstein	O'Connor, N. Y.
Browning	Doyle	Johnson, Ill.	Oliver, N. Y.
Buckbee	Drewry	Johnson, Ind.	Palmer
Burdick	England	Johnson, S. Dak.	Palmisano
Bushong	Fish	Kelly	Parks
Butler	Fitzgerald, Roy G.	Kendall	Peery
Byrns	Fort	Kerr	Quayle
Campbell	Free	Kiess	Rathbone
Carley	Fulmer	Kindred	Robsion, Ky.
Carter	Gallivan	Knutson	Sabath
Christopherson	Golder	Kunz	Sanders, N. Y.
Collins	Goldsborough	Larsen	Sears, Fla.
Combs	Graham	Leatherwood	Sirovich
Connally, Tex.	Hall, Ill.	Leech	Stedman
Connolly, Pa.	Hammer	Linthicum	Strong, Pa.

Strother	Thompson	Weller	Wood
Sullivan	Tinkham	Welsh, Pa.	Woodrum
Sweet	Updike	White, Colo.	Wyant
Taylor, Tenn.	Wason	Wingo	Zihlman

The SPEAKER pro tempore. Three hundred and eighteen Members have answered to their names, a quorum.

Mr. SNELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent to proceed for one minute.

The SPEAKER pro tempore. The gentleman from Maine asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. WHITE of Maine. Mr. Speaker, I simply desire to state for the information of the House that I shall move to rise when general debate is concluded upon the radio bill or before that time. In other words, I shall not attempt to reach a vote on the radio bill this afternoon.

The SPEAKER pro tempore. Under the special order of the House the Chair will recognize the gentleman from Massachusetts [Mr. LUCE] for 20 minutes.

THE BUDGET BUREAU

Mr. LUCE. Mr. Speaker, we have in the House a small group of men who are performing a most valuable service. They have undertaken the disagreeable and laborious task of studying minor legislation in order that they may make objection to anything which they think ought to be called to the notice of the House.

In what I have to say I have not the slightest word of criticism for them, but rather would take this chance to express my individual gratitude to them for their services.

On the last consent day prior to that of this week one of these gentlemen objected to the consideration of a bill from the Committee on the Library on the ground that the report did not show it had been submitted to the Director of the Budget. As a matter of fact, and as I told the House, there had been consultation with him, but it developed that no formal report had been received. The delay of two weeks only in part caused the disturbance of my mind that followed, for as I reflected upon it I became more and more convinced that there was here the most important occasion for the attention of the House. So last Monday, again on consent day, I undertook to address myself to the subject at what I will frankly admit was an inopportune moment. The gentleman from Illinois [Mr. MADDEN] was perfectly justified in objecting to my continuing. I accept his objection cheerfully, and all the more cheerfully because the result was that he secured from the House this opportunity for the discussion of a question far more serious in point of principle than that to which we have just devoted three days, for the question here involved is that of the separation of the powers and the independence of the legislative branch of the Government.

When the Budget bill was under discussion in 1919 the gentleman from Illinois made a simple and admirable statement as to the purpose in creating the office of the Director of the Budget. He said:

> The Bureau of the Budget is simply a clerical force placed at the disposal of the President of the United States to furnish him with information as to how he shall make up the estimates for expenditures to be required for the conduct of the Government for any given year.

Now, see what has happened, quietly, without the recognition of the House itself and without the knowledge of the public. It came about through the issuance of an Executive order, as I understand it, requiring the heads of departments to submit to the Director of the Budget any request for information that might come to him from a committee of the House. The result was that the Director of the Budget has made due response. In all that I may have to say there is nothing personal. I make no strictures upon the Director of the Budget. I am acquainted with him; I admire him and esteem him, and I am grateful for his efficient and patriotic public service. These are not remarks of blame or criticism, unless there be blame of ourselves.

The consequence is that many of the reports coming to the House from committees now contain the statement that the proposal is—or is not—in conflict with the financial program of the administration.

The importance of the situation lies in the fact that this virtually gives the Director of the Budget the whip hand over a large part of the work of the House. This follows from the fact there are but four ways in which most of the committees may secure consideration of their proposals. One is Calendar Wednesday, an institution that is dwindling. In this Congress already there have been 14 Wednesdays. Only 8 of the 46 committees have been reached, and 3 of them, those on Elections, seldom have any business. Thirty-eight committees remain with only 23 more of probable Wednesdays to be put at their command. It is manifest that in this Congress, as for several sessions back, more than half the committees will have no opportunity to bring their measures before the House of their own initiative.

The second chance is through suspension of the rules. The Speaker, wisely and properly, is very reluctant to grant motions to suspend, because that means limited debate, no full consideration, no opportunity for amendment, no protection against surprise.

The third opening is found in a special rule from the Committee on Rules. This must be reserved for the bills of particular importance, those promising sharp controversy. Only about 25 such rules are granted in each Congress, which means that recourse to them is beyond the reach of the great mass of business of medium or minor importance.

The only other avenue is the Consent Calendar, which is habitually taken up but twice a month. As of course all gentlemen here know, on reaching a bill the first time one man may by objecting prevent action; the second time, a fortnight or more later, three men.

One of the small group of objecting martyrs, as I like to call them and believe they are, has informed the House of his intention to object to the consideration of any measure relating to finance that does not contain a formal report from the Director of the Budget. Another takes much the same ground.

It follows that the door of the Consent Calendar will hereafter be closed to any proposal involving directly or indirectly any expenditure great or small, to be made soon or late, unless the verdict of the Director of the Budget appears in the accompanying committee report.

Does it not become important, then, when this concerns by far the greater part of the measures advised by our committees, to consider the wisdom of this demand by objectors on Consent Calendar days?

Let me disclose the perplexities of the present situation, the uncertainty and confusion that prevail, the need for some rule, standard, or common agreement, by illustrations from bills now pending or that have recently been passed.

Here, for example [holding up a bill], is a curious anomaly. The Assistant Secretary of State asked the Director of the Budget on the 7th of December if, in his judgment, we should pay the French Government for damage caused by one of our naval vessels. On the 16th the Secretary sent to the President a letter, printed here in the committee report, informing the President of the fact that the Director of the Budget had said that this was not inconsistent with the financial program of the Government. Then on the next day the President transmits to the Congress a special message advising that this be done.

I do not want to ridicule, but I can not refrain from pointing out that the President sent this special message to Congress after he had been informed by the Secretary of State that the Budget Director said this was not inconsistent with the President's own program. [Laughter.]

Let us observe some of the committees that are in danger through the progress of this system. Here is the Committee on Agriculture sending in a proposal to buy more land for a nursery, without any report from the Director of the Budget.

Here is another from the same committee of much more importance, a bill to provide more money for extension work by the agricultural colleges. Three days ago I watched it pass the House after barely 10 minutes of discussion, and not a word of objection, although its cost will mount in three years to almost a million and a half a year, and the accompanying committee report made no mention of the Director of the Budget. Thus freakily works the present system, or lack of system.

Here is the Committee on Interstate and Foreign Commerce with a bill authorizing payment of compensation to certain officers of the Panama Canal, without any report from the Budget.

Here is the Committee on the Judiciary with a bill authorizing the creation of new judgeships, with no report from the Director of the Budget.

Here is one from the Committee on Labor, creating a division of safety in the Bureau of Labor Statistics, with no such report.

Here is one from the Committee on Public Buildings and Grounds creating a commission to be known as the commission for the enlarging of the Capitol Grounds, with no report from the Budget.

Here is one from the Committee on Printing fixing the salary of the Public Printer, with no report from the Director of the Budget.

Here is one from the Committee on Military Affairs correcting a military record, and therefore exposing the Treasury to a charge for pensions or otherwise, and another of the same sort.

Here is a third from the same source, all without the approval of the Director of the Budget.

Here is one from the Committee on Coinage, Weights, and Measures authorizing the coinage of 100,000 medals in commemoration of the achievements of Col. Charles A. Lindbergh. No report from the office of the Budget.

Here is one amending the aviation pension act, with no such report.

Here is one from the Committee on Naval Affairs. I have been calling your attention mostly to small things and you may say de minimis lex non curat—the law takes no account of the little things—and that we should not stickle over minutiæ. But here is the great naval bill that has just come in, a measure contemplating $274,000,000 of expenditure, with no report from the Director of the Budget.

Mr. BRITTEN. Will the gentleman yield for a question?

Mr. LUCE. Certainly.

Mr. BRITTEN. The gentleman, of course, knows that that program is not in conflict with the administration's financial policy and that a report on it was made by the Bureau of the Budget. The mere fact it does not accompany the report does not indicate there was none made.

Mr. LUCE. One of the things I am trying to bring out is that the gentlemen who are watching the Consent Calendar, in demanding that the statement of a report from the Budget Bureau be included in the committee report are not in harmony with the views of various committees of the House.

Here are two reports to which I would particularly call your attention.

One is the report accompanying the Interior Department appropriation bill for 1929, brought in by the gentleman from Michigan [Mr. CRAMTON], wherein are proposed increases over the Budget estimates, all told, amounting to nearly $300,000. It contained no statement that this is in accordance with the presidential program. You may say that the Budget itself was the presidential program. But weeks had elapsed, and it might have been that there was occasion for a change.

Here is one from the gentleman from Illinois [Mr. MADDEN] reporting the great Treasury and Post Office Departments bill, where increases amounting to almost a million dollars above the Budget estimate were involved, and he did not inform us whether they had been submitted to the Director of the Budget and were in accordance with the presidential program.

I do not criticize that—but what is sauce for the goose is sauce for the gander. [Applause.]

Ah, more than that, it is undoubtedly true that subordinates to the Director of the Budget—because the director could not attend to the details, and nobody ever dreamed that the President would risk health and life in the attempt—that subordinates whose identity we do not know, to whom we can not present the pertinent facts, before whom we have no hearing, are making legislative decisions.

I have here an example, an instance where the Committee on Mines and Mining was blocked on the ground that certain claims should not be sent to the Court of Claims for adjudication because that would be inconsistent with the financial program of the administration.

I am told by a member of the Committee on Military Affairs of an instance where somebody in the Bureau of the Budget took advantage of this opportunity to compel the War Department to change a policy.

My friend from Illinois told me that this is an academic question. If he knew how many Members of the House had come to me and commended my course in opening up the subject, if he knew the difficulties that embarrass the legislating committees, and especially their chairmen, he never would think it an academic problem. It is a practical, present problem. We desire his judgment, we desire to know what to do. We ought to act alike. We want to know what is our moral, ethical, spiritual, political, and constitutional duty. My judgment is that it is not the duty of a legislating committee to consult the Bureau of the Budget or pay attention to its report to anybody else. I think it is the duty of the Appropriations Committee. We of the legislating committees are not concerned with the question of when it may be proper and timely to spend the money. Our task is to determine the wise thing to do. We have another committee, that on appropriations, for the express purpose of saying when the expenditure may be timely, whether it ought to be done later or now. Looking over the broad circle of governmental activity, that committee is to say whether the thing should be done now.

Of course, we of the legislating committees try to save the money of the people. We try never to recommend extravagance in appropriations. It cuts me to the quick when men tell the country from this Chamber that we are all wastrels, trying to scrape everything we can out of the Public Treasury. I deny that. [Applause.]

I would my voice could carry from the Atlantic to the Pacific in order that it might reassure the people and tell them that the Members of Congress are at least trying to do their duty. We try in the committees to have some sense of proportion in the matter of economy. We believe we make wise recommendations. They may or may not all be wise. The legislating committee is to concern itself with policy and principle, the appropriating committee with prudence and proportion. It is the appropriating committee that should consult the Bureau of the Budget.

Sir, scrupulous regard for the hands of the clock forbids my going further in the matter of details. In the few moments that I have remaining let me say that this country of ours grew out of the struggle between the colonial governors and their assemblies. The War of the Revolution was the result of attempt by the Executive to infringe the prerogatives of the legislative branch.

The right of independent decision by the representatives of the people is the corner stone of this Republic. The declaration of that right is the guardian and protector of our liberties. Let us not watch idly, without due reflection, without at least some consideration, the insidious progress of a system, habit, custom, or whatever you may call it that will deprive us of our rights, that will invade our responsibilities, that, if unchecked, will in the end destroy the American system of government. [Prolonged applause.]

The SPEAKER pro tempore (Mr. MICHENER). The Chair recognizes the gentleman from Illinois [Mr. MADDEN] for 20 minutes.

Mr. MADDEN. Mr. Speaker and gentlemen, if this were a contest in oratory, of course, I would not presume to compete with the distinguished gentleman from Massachusetts [Mr. LUCE]; but this is a discussion of facts, and I presume that I am quite as capable of stating the facts as is the gentleman from Massachusetts, although I may not be able to do it as well. I was very much pleased to note the enthusiasm displayed by the House when the gentleman from Massachusetts called attention to the fact that the chairman of the Committee on Appropriations only a few days ago, when reporting the Post Office-Treasury appropriation bill, had increased it $1,000,000, and that that had been done without any consultation with the Director of the Budget.

Mr. GREEN of Iowa. No; he did not say that.

Mr. MADDEN. Well, practically that. He said there had been no report. Every item that was carried in the bill was submitted to the Committee on Appropriations by the Budget before the Committee on Appropriations began the consideration of the question at all, and while there may have been a total increase of a million dollars in some particular items in the bill, the facts are that the bill carried $8,230,000 less, when the committee got through with it, than it did when the estimates came from the Budget. Do we hear any applause from that? Not a bit.

Mr. Speaker, I think that what we need first in this question is a restatement of history, and I shall presume to say what I have to say based upon that. First, a brief history of the chaotic practice relative to appropriation and authorization legislation before the budget system was established. The President was not required by law, and in fact could not under the law have much to do with the submission of any kind of a financial program. That is the first proposition. He was not charged with the responsibility of the finances of the Government until the Budget act was passed. The heads of departments and bureau chiefs were supreme in the preparation of estimates and no one anywhere, outside of the department itself, had any authority to say what the total to be recommended by the executive branch should be. The Secretary of the Treasury performed a perfunctory ministerial duty of gathering together all of the practical and idealistic estimates of all heads of departments and bureaus, and forwarded the unrelated, uncoordinated, extravagant mass of figures to Congress to unscramble.

The Congress was no better organized to receive the heterogeneous mess which came to it than was the executive branch of the Government which sent it in.

This procedure continued through the war period and helped to accentuate the wastefulness which characterized that period of our history. With the close of the war came a demand from the American people for drastic retrenchment from the inflation of the war, a reduction of taxation, and a return to normal governmental activities. Congress responded to this demand, and in formulating legislation to help bring the exaggerated

governmental costs down to a sane basis passed the Budget and Accounting Act of 1921.

The Budget and Accounting Act made two very important requirements: (a) It compelled the President of the United States, for the first time by definite law, to become responsible for a program of estimates and expenditures to be submitted to Congress and to harmonize that program with the estimated receipts. This was a distinct advance over the previous practice where he took only a cursory interest in expenditures. (b) It curtailed the individual freedom of departments and bureaus to submit to Congress any requests for appropriations that they might conceive to be necessary or desirable.

There are two ways of increasing the cost of the Government—(1) by increasing the existing appropriations, and (2) by the enactment of new legislation which either requires new appropriations or the increase in an existing appropriation.

The President, soon after the passage of the Budget and Accounting Act in June, 1921, realized that unless attention was paid to requests for legislation emanating from the executive departments which would cause an increase in expenditures that it would be almost futile to perform his duties under the new law with respect to direct appropriations. Accordingly, in December, 1921, President Harding directed the issuance of what is known as Budget Circular No. 49.

With the permission of the House, at this point I insert a copy of this Circular No. 49:

(Circular No. 49)

TREASURY DEPARTMENT,
BUREAU OF THE BUDGET,
Washington, December 19, 1921.

TRANSMISSION TO CONGRESS OF ESTIMATES OR REPORTS INVOLVING APPROPRIATIONS

To the heads of departments and establishments:

1. The Budget and Accounting Act, 1921, provides in part as follows:

"SEC. 201. The President shall transmit to Congress on the first day of each regular session the Budget, which shall set forth in summary and in detail—

"(a) Estimates of the expenditures and appropriations necessary in his judgment for the support of the Government for the ensuing fiscal year; except that the estimates for such year of the legislative branch of the Government and the Supreme Court of the United States shall be transmitted to the President on or before October 15 of each year, and shall be included by him in the Budget without revision."

* * * * * * *

"SEC. 203. (a) The President from time to time may transmit to Congress supplemental or deficiency estimates for such appropriations or expenditures as in his judgment (1) are necessary on account of laws enacted after the transmission of the Budget, or (2) are otherwise in the public interest. He shall accompany such estimates with a statement of the reasons therefor, including the reasons for their omission from the Budget."

2. To insure that all estimates or requests for appropriations originating within the executive branch of the Government are presented in the manner prescribed in the Budget and Accounting Act, 1921, it is further provided in section 206 of said act that:

"No estimate or request for an appropriation and no request for an increase in an item of any such estimate or request * * * shall be submitted to Congress or any committee thereof, by any officer or employee of any department or establishment, unless at the request of either House of Congress."

3. The language of section 206 relates only to estimates or requests for direct appropriations or increases in items of prospective appropriations. But it is necessary for a full compliance with its spirit that all requests or recommendations for legislation, the effect of which would be to create a charge upon the Public Treasury or commit the Government to obligations which would later require appropriation to meet them, should be first submitted to the President before being presented to Congress. It is therefore directed:

(a) Before any request or recommendation of this character, originating in or sponsored by any executive department or independent establishment of the Government, is sent to either House of Congress, or to any committee thereof, it shall first be submitted to the Director of the Budget, who shall make recommendations with respect thereto to the President. And no such request shall be submitted to either House of Congress, or to any committee thereof, without having first been approved by the President. When so approved, the request or recommendation to either House of Congress, or to any committee thereof, shall recite the fact that such approval has been obtained.

(b) Whenever any request or measure proposing legislation, with the purpose or effect set forth above, shall be referred to any executive department or independent establishment for advice or expression of opinion thereon, the head of the executive department or independent establishment concerned shall ascertain, through the Director of the Budget, whether or not such recommendation, request, or measure is in accord with the financial program of the President. And such advice or expression of opinion when transmitted shall include a statement whether the proposed legislation is or is not in such accord.

(c) That copies of such requests, recommendations, or proposed measures referred for advice as in subparagraph (b) shall be promptly furnished to the Director of the Budget for the information of the President.

By direction of the President.

CHARLES G. DAWES,
Director of the Bureau of the Budget.

The Budget and Accounting Act does not contain any specific reference to legislation which authorizes appropriations, nor is there in that act any specific authority for the issuance of the circular. The act, however, does provide—

under such rules and regulations as the President may prescribe every department and establishment shall furnish to the bureau such information as the bureau may from time to time require.

Legislation which emanates from the executive departments must, as a matter of course be justified; and when sent up to a committee, it should be the duty of the committee to return it if the department has not already given satisfactory reason for asking for the legislation for further information. Does anybody object to information in connection with legislation pending or passed? It seems to me that our first duty, and our greatest pleasure, should be the acquisition of all the information that will place any light upon any subject that may come before us for consideration. Is that against the dignity of a Member of the House? Does it take any of his rights away? Does it restrict him in his right to think? There is no obligation upon the part of a Member of the House, or on the part of a committee of the House, even though they have the information supplied that would lead them to an intelligent conclusion, to accept the information. They can act as wisely or unwisely as they think proper to act. It may be that they will reach a wise conclusion without information, but they will be more certain to reach a wise conclusion if they have the information on which to base a judgment.

It is the practice now of committees of the House to refer bills to the various departments and bureaus for report. What objection can there be if one further step in such report procedure is taken, when additional expenditures are called for, and the bill referred to the agency which represents the President in matters affecting estimates, appropriations, and expenditures to determine his views thereon?

Congress should be willing, in the enactment of legislation, to get accurate information and views from the President on these matters as well as from the head of a department, the chief of a bureau, or a subordinate in the remote corner of a department somewhere.

Had the President any right to issue that circular? Had he a right under the act to make the regulations requiring that certain things should be done? Do we complain because the President acted efficiently? Are we chagrined because, forsooth, the agency employed by the President to accumulate information upon which he may act intelligently and patriotically has done its work well? Are we opposed to an efficient Government? If we are, all we have to do is to go back to the old chaotic conditions we found before the Budget and Accounting Act was passed. Has the President of the United States under the Budget Act been wise? Has he acted economically; has he been patriotic; has he performed his duty; has he assumed legislative authority which he did not possess? What is it about which we complain then? Is it because the President, in order to carry out the responsibility that we have placed upon his shoulders under the Budget Act, insists that he shall have the information which will enable him to perform his duty intelligently? Do we complain because of any special indignity that we may think is imposed upon us because we have to get information?

Are we opposed to the President's efficiency? Has there ever been a man anywhere, in any place, President or otherwise, who has proven his worth more than President Coolidge has under the conditions imposed upon him by the Budget and Accounting Act? [Applause.]

Now, the act goes further than merely placing this responsibility upon the President, for it prohibits any officer or employee of any department or establishment of the Government from submitting any request or estimate for appropriation to the Congress or to any committee unless either House—not a committee—unless either House should request such a submission. The President is the executive head of the entire Government. The heads of the departments are members of his Cabinet. He can require reports from them on matters affecting their respective departments.

Do we object to the President possessing a knowledge of the things that are being done by the heads of the departments

over which they preside? Can anybody object with any good reason to the President requiring the head of every department to scrutinize everything that comes within his jurisdiction, so that he may make a faithful report to the Chief Executive of the Nation? Do we want the Government conducted on systematic lines? If we do, we will not complain that the President requires the heads of his departments to have knowledge of the facts.

Now, the Constitution of the United States requires the President of the United States to keep the Congress of the United States advised as to the state of the Union. How can he keep them advised unless he gets the facts? He can not know unless he has agents at work acquiring the information upon which he may advise us. We all know that the President can not do all these things himself; and I repeat, that the Budget Director or the Budget Bureau is only the agency appointed by the President and authorized by the Congress to obtain such information as will enable the President of the United States to reach an intelligent conclusion upon the important and vital questions that come under his jurisdiction under the law.

Is there any objection to that? Why should he not be empowered to do it? Why should he not have that agency? Why should he not instruct that agency and have the right to tell every department chief under the Government to submit the information that they have acquired in the conduct of the affairs under their charge to his agent, the President's agent, the Director of the Budget, so that the Director of the Budget, the President's agent, may be in a position to analyze the facts in the case for the President's intelligent consideration? There can not be any objection to that.

Now, what does the circular do? Before any establishment or department of the Government shall send to the Congress a recommendation for legislation which has originated in the department or establishment, such a request must be submitted to the Bureau of the Budget, for the reason that I have just stated, and for the recommendation of the President; and no such request for legislation can be submitted to Congress, and properly so, without first having the approval of the President.

Now, that does not stop any Member of the House from originating any legislation. If he has the capacity to write a bill on any subject, nobody will interfere with his right. He can introduce the bill. He does not have to consult the President or the Director of the Budget. He can do what he pleases, if he can get votes enough to pass it, without any consideration from anybody on the outside.

Any request or measure proposing legislation requiring the expenditure of money and referred to any department for report must, before it is returned to Congress or a committee, be referred to the Bureau of the Budget to ascertain whether it is in accord with the President's program with relation to the finances.

Is that proper or is it improper? The President is required, for example, in the Budget he submits to Congress to state what the expenses of the Government are to be. He reports then what the income of the Government is to be. Between the report of the income and the outgo the President fixes the activities in which he thinks the Government should engage. And it may well be that after we have appropriated what money there may be between the two lines, the income and the outgo, legislation involving billions—that may be a somewhat exaggerated statement, to put it that way—but millions beyond the income may be brought in.

Now, is it any part of the President's business to find out whether we are going beyond the income? Would you like to see a deficit created by any chance from not having a coordinated system of activities within the Government whereby every right of the taxpayer and every right of the Member representing the taxpayer is safeguarded?

It is not binding, as I said, on any Member of Congress to ask for information from a department. The information from the department is not binding. The Member of Congress has the supreme right under his authority as a Member of Congress to act as he pleases. He may not act wisely, but that is for him to decide. These reports give Congress information on the financial state of the Government which otherwise we possibly would not have.

The Budget circular is in the interest of coordination and an economic conduct of the affairs of the Government, and is disliked sometimes because in some cases it curtails opportunities to bring about the appropriation of money which could not be obtained through regular Budget procedure.

In this connection, I want to place here in the RECORD an extract from a report on a bill referred to one of the executive departments for its comment and opinion. The bill is not a consequential bill nor is there any significance to the amount of money proposed to be authorized by the bill, but a departmental attitude toward the Budget and the procuring of funds for departmental activities is made quite apparent by the department's comment, which is as follows:

> While it is true that the provision of law cited above gives a general authorization under which an estimate for the project could be submitted without necessity for additional legislation, I favor the bill for the following reasons: It is desirable to construct the storehouse in question. The enactment of this bill into law will indicate the specific approval of Congress for this particular project and will presumably render it easier to secure appropriations therefor in the future. The proposed legislation has been submitted to the Director of the Bureau of the Budget. He advises that if I consider the legislation necessary before I would be justified in submitting an estimate for the project in question, my report on this bill would not be in conflict with the financial program of the President. As indicated above, I do not consider that legislation is absolutely necessary, but do consider that it is desirable in order to make it easier to secure an appropriation for this particular project.

I am not an advocate of the House of Representatives surrendering its prerogatives. I do believe that when Congress secures advice and information from the so-called spending agencies of the Government as to the advisability of enacting certain legislation which calls for the expenditure of money we may well at the same time have the views of the President, through his Budget agency, as to the relation the legislation may bear to the financial situation of the Government. The practice under the operation of this circular can be improved. Even the Budget system itself is not thoroughly perfected. Our Government operated for over a hundred years without such a system, and we can not expect that in the space of seven years in which it has been in effect to have a procedure that will be perfect or that will not perhaps invoke just criticism. My hope and aim in connection with the Budget system has been for a gradual evolution and development that will constantly improve the intelligent and economical handling of the Government's financial problems. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Washington [Mr. JOHNSON] for 20 minutes.

Mr. JOHNSON of Washington. Mr. Chairman, ladies and gentlemen of the House, I feel greatly honored in that I follow the two gentlemen who have preceded me in the discussion of so important a subject as the Bureau of the Budget and its effect on the House of Representatives. Representatives LUCE, of Massachusetts, and MADDEN, of Illinois, are among the giants of the House, each very earnest in his desire to serve the people, each painstaking and thorough in his work here. [Applause.] The debate has been highly illuminating. Perhaps I can add little to it; I shall, of course, not attempt to comment on the able presentation made by the gentleman from Illinois [Mr. MADDEN].

From the time the Bureau of the Budget Act was placed in operation, about seven years ago, I have observed each year the increasing power of the Bureau of the Budget, until now I am inclined to believe that the Bureau of the Budget is developing into a third house of Congress, with more power under certain conditions than the Senate and the House. [Applause.] In my opinion, the Bureau of the Budget not only exercises a veto power prior to legislative action but a power more formidable than the Executive veto. I believe also that the Bureau of the Budget has turned down proposed constructive legislation not because such legislation is in opposition to the financial policy of the President but because such bills of House or Senate are repugnant to the views of the coordinating officers of the Bureau of the Budget. [Applause.]

We have a fine official in the present Director of the Bureau of the Budget. We created the position; gave great power. We were doubtful then; but we needed a budget system, and we were promised that there would be no abuse of power. It is not my purpose to criticize the director. He is acting as best he can in a trying position, but under him are a number of coordinators loaned from other services—from the Army, Navy, and elsewhere. They are serving without additional pay and act as a coordinating service, and I find that that service, under the director, undertakes to write bills, undertakes to revise bills sent down by chairmen of committees, has its own views as to what is right and what is wrong as to legislation, and undertakes to advance its views. If that is so, then that bureau is in fact exercising a legislative as well as an executive function. Every schoolboy knows that the Constitution di-

vides our Government into three coordinate branches—legislative, executive, and judicial—of equal dignity, but each a check on the other. Is it not beginning to appear that we have developed a fourth branch, the Bureau of the Budget, which each year steps a little further beyond its advisory capacity and a little more into the control of legislation?

Each year we hear the appeal to economize on paper clips, blotters, and the like, even the backs of envelopes. But if in so doing we weaken the representative form of government, what have we gained? Neither is it fair that Congress shall also be charged with extravagance, or that Secretaries of departments and Assistant Secretaries shall be always saying to the people and to individual Members, "You are quite right; we need this or that; but we can not do a thing until Congress acts." And we ourselves, gentlemen, seem to have let things come to a pass where we really can not act without great strain, great stress, and great opposition to the Budget, all of which, I assure you from personal knowledge, is not easy to bring about.

Mr. Speaker, I have been informed by a number of chairmen since this debate was announced that bills which they did not think were contrary to the financial policy have been referred to the department, and thence, under orders, sent to the Bureau of the Budget, only to be returned with a line at the bottom that the bills were in opposition to the President's financial program.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes; certainly.

Mr. LAGUARDIA. Is it the fault of the Budget Bureau or the submissiveness of the chairmen?

Mr. JOHNSON of Washington. Well, the chairmen want to be fair rather than entirely submissive, and chairmen desire to act in harmony with the general legislative program.

Mr. LAGUARDIA. Then they could report their measures and bring them up, could they not?

Mr. JOHNSON of Washington. Chairmen are undertaking to do that; but please consider the hurdles ahead of such bills. Chairmen of nonprivileged committees have but few ways of getting bills up for consideration by the House—a rule, suspension of the rules, or by unanimous consent. The gentleman from Massachusetts [Mr. LUCE] has explained our troubles along that line.

Let me inform the gentleman from New York that there has just been reported from the committee of which I have the honor to be chairman a bill reorganizing the immigrant inspectors' service and making certain pay increases. Such a bill has passed the Senate. It was referred to the House Committee on Immigration and Naturalization. It has been ordered favorably reported by that committee without amendment.

That bill involves an increase in the pay of immigrant inspectors of about $150,000 the first year. The bill has never seen the Bureau of the Budget. It is not even acquainted with that arm of the Government.

Mr. LAGUARDIA. Does not that bill show that the Bureau of the Budget is simply advisory and not binding on this House?

Mr. JOHNSON of Washington. If that bill ever gets up on the floor, we will have a fine chance for a test. But, as chairman, I will have only certain limited ways to get that bill up; and that bill is proper, needed legislation.

Mr. MOORE of Virginia. Will the gentleman permit a question?

Mr. JOHNSON of Washington. I yield.

Mr. MOORE of Virginia. A little while ago we had before us an appropriation bill which, I think, the gentleman sought to amend by increasing the appropriation for the pay of inspectors. That matter was brought before the House, and nothing which the Bureau of the Budget had done or nothing that the Appropriations Committee had done prevented that from being voted on. The amendment was voted down, but the gentleman had full opportunity to secure an expression from the House.

Mr. JOHNSON of Washington. The gentleman is not quite correct. The proposal to increase the pay of inspectors was not up; an amendment to increase the lump sum for the Immigration Service, including the border patrol, was proposed and met heavy opposition from the Appropriations Committee, whose members proposed that our committee bring legislation authorizing increased expenditures.

Mr. MOORE of Virginia. But the fact remains that the gentleman had full opportunity to bring that matter to the attention of the House and secure an expression from it.

Mr. JOHNSON of Washington. Under the five-minute rule; and defeated on the ground that neither Budget nor Appropriations Committee had facts to warrant the proposed increase.

Mr. MOORE of Virginia. But the gentleman had the right to do it and did bring the proposition before the House.

Mr. JOHNSON of Washington. Yes; as best I could, and when I undertook to move to recommit I was not even recognized as leader of that particular movement. Oh, there is more than one way to skin a cat. Gentlemen know how little can be accomplished by amendments proposed under the five-minute rule. Gentlemen will find in the CONGRESSIONAL RECORD time and time again in the past several Congresses where members of the Appropriations Committee have warned Members in the Committee of the Whole House on the state of the Union that they are wasting time in offering amendments and discussing them under the five-minute rule. All of this tends, I think, to weaken the House; to weaken the will to attend the sessions when appropriation bills are under consideration, and ultimately to weaken the committee. Chairmen have no desire to fall outside the breastworks. Teamwork is desirable. Cooperation and good feeling are necessary, but no one wants a perfunctory House of Representatives simply to keep step and march along. [Applause.] Frank discussion is necessary. The rights of committees can be preserved. I have a case in point. Bills were introduced in the Senate—one, Senate 1576, a bill to authorize the Secretary of the Treasury to transfer certain forfeited vessels and vehicles to other executive departments. The other is H. R. 11188, a bill to provide for the transfer to the Department of Labor of certain forfeited vessels and vehicles.

Notice that these bills are not identical, as the Senate bill provides for the transfer of certain forfeited or seized vehicles and vessels to several departments, whereas the House bill provides for their transfer to one department, the Labor Department, meaning that certain vehicles seized and given into the custody of the Treasury Department should go to the Immigration Service.

The Senate bill was sent to the Secretary of the Treasury for a report, and that report to Senator SMOOT carried the customary concluding line:

> It may be added that this department is advised by the Director of the Bureau of the Budget that the proposed legislation is in conflict with the financial program of the President.

The House bill was referred to the Committee on Ways and Means, and the chairman, the gentleman from Iowa [Mr. GREEN], sent it down to the Treasury Department, and back came a letter calling attention to the report on the Senate bill—they are not identical, mind you—with this old familiar line:

> It may be added that the department has been advised by the Bureau of the Budget that the proposed legislation is in conflict with the President's financial program.

The House bill was an entirely different bill and had been prepared after an understanding in the Committee on Immigration and was introduced by the gentleman from Vermont [Mr. BRIGHAM], and when I found that the gentleman from Iowa, the chairman of the Ways and Means Committee, had this report I undertook to investigate. I learned with respect to the report on the House bill that the bill had not been sent to the Bureau of the Budget at all, but that the Treasury Department had assumed that because there had been this adverse report as to the financial policy with regard to the Senate bill they were justified in adding it to the report on the House bill. That was a mistake, but it hung a millstone on the neck of the House bill.

I am now informed that the department is undertaking to withdraw its letter to the distinguished chairman of the Ways and Means Committee, and that the gentleman in this Budget coordinating service, under the director, who, I am inclined to think, is in sympathy with the movement to increase the effectiveness of the immigration patrol, has prepared another letter dated about five days ago; and this letter is on the desk of the Director of the Budget, waiting for him to return to the city to sign it and send it up here and get it on record in the gentleman's committee.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. JOHNSON of Washington. I yield.

Mr. GREEN of Iowa. I simply want to add that, whether there was a mistake or not, I was not disposed to accept the letter which the gentleman has read, because the bill that was introduced and referred to the Ways and Means Committee plainly is one that would save money, and how it could possibly come in conflict with the President's financial policy was more than I can imagine.

Mr. JOHNSON of Washington. I thank the gentleman. The gentleman speaks exactly to the point. This bill in all probability is a bill making for economy, yet it gets the "kibosh" in advance from the Bureau of the Budget, when, as a matter of fact, it is entirely a matter for a committee of the House to decide, and later for the House to decide in Committee of the Whole.

Mr. BLACK of Texas. Will the gentleman yield?

Mr. JOHNSON of Washington. I yield to the gentleman.

Mr. BLACK of Texas. Is there anything to prevent the committee from so deciding notwithstanding the recommendation of the Bureau of the Budget?

Mr. JOHNSON of Washington. No; because this particular bill is in the hands of the Ways and Means Committee—a privileged committee. But bills of this kind in other committees have a long, hard row to follow to get before the House itself. The committee of which I am chairman has not been called on a Calendar Wednesday probably for six years—so far back I can not remember the last time it was called. We are not a privileged committee. How can small bills be brought up except by unanimous consent? When they are brought up in that way, is not the Budget millstone of nonapproval—whether right or wrong—hanging about their necks? That is the whole point of it. Why some zealous gentleman will call out, "I object" before an explanation can be made. The gentleman from Massachusetts has explained that phase in detail.

Mr. SIMMONS. Will the gentleman yield?

Mr. JOHNSON of Washington. I can not yield now because my time is running rapidly.

I have here a statement which I will ask permission to place in the RECORD, showing the number of automobiles seized under the prohibition laws and their disposition. You will find that the Customs Service and the prohibition officials receive many of these seized automobiles. They drive out in these districts right alongside of immigration inspectors who have Fords or Chevrolets paid for at full price by the Government. The average price of automobiles sold at auction is $104 each. In other words, those machines that are practically junk are sold and those that are good are kept for two of the services, and when we undertake to bring in a bill which would allow them to be transferred to the Immigration Service we find that the coordinating service in the Bureau of the Budget has been trying to write a bill of its own and that ours is said to be against the financial program.

I made further inquiry; and how do you suppose they bring it in conflict with the financial program? They say a certain service has the use of seized automobiles, and therefore they must have gas, and if they buy gas it costs money, and if it costs money then it is in opposition to the President's program. [Laughter.]

But the Immigration Service is allowed by law to buy a limited number of new automobiles. They do buy them, and they have to buy gas, and that costs money, which comes out of the lump-sum appropriation for the Immigration Service. That service runs short every year, which causes it to do what it is doing right now—mark time, slow down, discontinue arrests for want of money to deport.

Incidently, let me say that the officers of the Labor Department are not very keen about this bill to let them have a few secondhand seized cars, after the Treasury Department has had its pick for itself and has sold the salable ones for $104 each.

Mr. Speaker, in conclusion let me say that if the Members of the House knew how the protective service of the Immigration Bureau is breaking down they would demand immediately the passage of a bill to remedy the situation. For instance, take the El Paso district, composed of several hundred miles along the Texas border from El Paso west, and including all of the State of Arizona. This one district is allowed $50,000 a year for deportation purposes, except steamship fares, and this $50,000 is divided into quarters and each quarter must last three months. This district now has no money under its allotment to hold hearings, as required by law, in the cases of aliens arrested for deportation; no money even to hold them overnight in jail. What is the result? The Immigration Service arrests certain aliens—possibly criminals or insane—then turns them loose, and after July 1, when they get some money from the new appropriation, will try to pick them up again. Is this economy? No; it is wasting money.

The district at Helena, Mont., covering a wide area on the northern border, is allowed $150 a month for deportation purposes. It has one inspector to go out over that great district. If he travels he is allowed $6 a day and if he is out 10 days he uses up $60 of the monthly allotment and uses railroad fare in addition. So when he gets his man he has nothing to deport him with. He turns him loose. Then there is also the Birmingham, Ala., district, which is also close-hauled. If a committee of the House finds these things out, where shall we go? To the Budget or to the House?

In the Newport, Vt., district the inspectors have set free 50 alien deportees within the last few months for want of money to provide for their deportation. They were aliens probably deportable; one is insane and certainly deportable. He is now in a State insane asylum. Is there any economy in that?

The Immigration Service does not like these facts to be publicly known. It increases their difficulties. But aliens pass the word quickly from one to another. Pressure at the borders increases. Why should not the public know? Why should not Congress know? Why does not the Budget know? It does, in my opinion.

The Immigration Service is the one service that the more it does for the Government and the people, the less chance it has to do for itself. It receives a lump sum. It is always spent. There is never any money for promotion, for improvement, for repairs, or for advance. Officials can not appear before committees voluntarily. What information we get has to be "corkscrewed" from reluctant witnesses who each time they answer pointed questions are afraid they have put their necks on the block awaiting the fall of the guillotine's knife, fearful of that order against talking "under penalty of separation from the service." Gentlemen, when Congress set up the Bureau of the Budget it never intended that any such thing should happen. [Applause.]

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent to proceed upon this subject for 15 minutes. The chairman of the Committee on Merchant Marine and Fisheries has announced that he does not intend to try to press the radio bill to a conclusion, and I trust that it is not unduly infringing on the time of the House.

The SPEAKER pro tempore (Mr. TILSON). The gentleman from Tennessee asks unanimous consent that he may proceed for 15 minutes on the subject that has been recently discussed in the House. Is there objection?

Mr. MICHENER. Reserving the right to object, and I shall not object, I give notice that I will object to any further requests for this afternoon.

Mr. GARRETT of Tennessee. Let me be perfectly frank—if it is interfereing with the business that ought to go on I shall not insist upon it. I do not want to interfere with the proper business of the House. It will be no offense to me if any gentleman objects. [Cries of "Go on!"]

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. Mr. Speaker, the discussion this morning has caused my mind to run back over a period beginning probably some 15 years ago, and to a particular individual who for a considerable part of that time loomed very large in the House of Representatives and the country. I refer to the late John A. Moon, who for so long a time was a Representative from my own State of Tennessee.

Judge Moon was always a determined foe of the establishment of the Budget. Many of the things that have been related here this morning as having occurred since the institution of the system were clearly envisioned by him in the days when he was opposing its establishment.

Possibly it will be of some interest to the House as a matter of history to recount some of the activities before the Budget system was actually adopted.

I think during the first Congress of which my party was in control, the Congress elected in 1910—certainly if not then, in the succeeding Congress—our party undertook through caucus action to deal with this question. When I say caucus action I mean that there was appointed a committee of the caucus composed altogether of members of our party to give study to the question.

That committee was appointed to make a report to the caucus. My recollection is the first report was almost immediately laid on the table.

At a succeeding Congress we again renewed the question in caucus. I recollect that I had the honor of being temporary chairman of the caucus and had the duty of appointing the budget committee of the caucus. I remember very distinctly of having appointed Mr. Swagar Sherley as chairman, and Speaker Clark and Mr. John Fitzgerald were made members of it, and others I do not now recall. They gave great study to the question. It may have been in a way a mistake to try to reach it by caucus action, but that was the plan then adopted, and the work done by the caucus committee was extremely valuable, for some of the gentlemen who were on the caucus committee were later on the regular committee that brought in the Budget law.

Mr. MADDEN. The gentleman from Tennessee, Mr. BYRNS, the gentleman from Texas, Mr. GARNER, and Claude Kitchin.

Mr. GARRETT of Tennessee. Yes; quite a number who had been on the old caucus committee. Another thing interesting as a matter of history which I recall is that the Budget proposition substantially as it stands now was passed during the

closing days of the Wilson administration, and it met with a veto of President Wilson.

By the way, President Wilson was extremely interested in the development of the Budget system. I think that it will be found that he referred to it in two or three of his messages, where he urged it. He vetoed it on the ground that it undertook to take from the President the power of removal of the Comptroller General. He rested it purely on the constitutional ground that it was an improper interference with the authority of the President himself. This was not personal to himself, for he was then about to retire. It was regarded by him as a trespass upon constitutional Executive power and duty.

Mr. MOORE of Virginia. And the Supreme Court has approved that principle.

Mr. GARRETT of Tennessee. Yes; the Supreme Court has since approved of his position in that respect. I think the gentleman from Virginia [Mr. MOORE] was one and I another of those who voted to pass it, the veto notwithstanding. I have heard that when President Harding—I do not know whether it is true or not—who signed the law, when he came to meet it under his responsibility as Executive, was extremely reluctant to approve it with that provision in it. As a legislator he had been committed to the proposition, however, and, at any rate, he did sign the bill, whatever his state of mind may have been.

It seems to me, Mr. Speaker, that there is not only a proper place, but a very great need for the Budget system; but always this must be borne in mind: It must be, and it must be so regarded, strictly a part of the executive branch of the Government, and never permitted to become a part of the legislative branch. [Applause.] There is no criticism of the President of the United States for conferring with the Director of the Budget either in advance of recommending legislation or subsequent to legislation having been passed, and while it is before him for consideration as to whether he will attach his signature to it or veto it. The President of the United States is at entire liberty in ethics to consult with whomsoever he may choose as to the matter of recommending legislation or as to the matter of vetoing or signing a bill that has been passed by the Congress. That is within the Executive sphere; but that, my friends, which is creating apprehension is the feeling that there is too much of a tendency to, in some way, place before the Budget questions of policy that ought to be determined by the legislative branch alone. [Applause.]

Mr. MADDEN. Mr. Speaker, will the gentleman permit an interruption there?

Mr. GARRETT of Tennessee. Yes.

Mr. MADDEN. I just want to say that it has been the policy of the Committee on Appropriations since I have been chairman of it, under the Budget, never under any circumstances to allow the Budget to interfere with the rights of the members of the committee either in reducing or raising the recommendations of the Budget. [Applause.]

Mr. JOHNSON of Washington. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. JOHNSON of Washington. Notwithstanding the fine statement of the chairman of the Committee on Appropriations, the chairmen of other committees, prompted by the interest of harmony and party organization, and so on, find themselves greatly embarrassed when they undertake to act in opposition to what might be the policy of the Committee on Appropriations. That is the trouble.

Mr. GARRETT of Tennessee. Let me say this in connection with the President taking the advice of the Director of the Budget. As I say, he is perfectly within his rights in doing that. I confess I can hardly understand why a bill such as one of those referred to by the gentleman from Massachusetts [Mr. LUCE], coming from the Department of State, to pay France or some French company for damages to a ship, should have been referred to the Director of the Budget, because the only statement of the Budget would be that it was or was not inconsistent with some sort of a financial program.

I can not understand why a thing of that sort should be referred to the Director of the Budget. If this Government owes France or some citizen of France something, the question of whether or not it is in accordance with somebody's financial program ought not to enter into the consideration of the case. It reminds me of a court decision said to have been rendered during the reconstruction days in Tennessee. We then had some judges who were not quite so learned in the law as some we had before and some we have had since. I think it is in the Supreme Court reports of my State that one circuit judge down there undertaking to construe the obligation of a married woman under some act of the legislature finally held that she was liable, provided the jury should find that the plaintiff could collect the judgment. [Laughter.] I do not understand why things like that should be referred to the Budget, but it is within the right of the President to do it. Here is the thing I want to emphasize for the benefit of the Budget, and it is important to the Budget itself. I do not undertake to say that the Budget has of itself come into legislative proposals voluntarily or projected itself into legislative matters without being invited into them. If the latter is the situation—that is, if an invitation has been given—why then it is up to the chairmen of the committees, and to the committees themselves, to be extremely careful upon what subject they invite the opinion of the Director of the Budget or of the Budget Bureau. If they give away their own powers, they are not only doing their committee an injustice, but they are violating the rights of the House itself while agents thereof. [Applause.] It is important, extremely important, to have a Budget system. I think this discussion of this morning, independent of the speech now being made, ought to be of considerable benefit upon this question. It is very important to have the Budget. It is infinitely more important, I would say, if you have to come to a choice between the two, that the legislative branch should preserve its independence, but there is no reason why there should be a conflict between the two. It is entirely consistent with absolute legislative independence to have a Budget which will function to the benefit of the country. The only thing is that we need ourselves to be careful to respect the rights that are theirs, and to be careful to see that our own rights are not infringed upon by them in any way whatsoever. [Applause.]

FEDERAL RADIO COMMISSION

The SPEAKER pro tempore. The Chair recognizes the gentleman from Michigan [Mr. MICHENER].

Mr. MICHENER. Mr. Speaker, by direction of the Committee on Rules, I present the following privileged resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 2317, continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed three hours, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. MICHENER. Mr. Speaker, this rule has the unanimous support of the Committee on Rules. No time has been asked by the members of the committee. There is no desire on the part of the members of the committee to discuss the rule. I, therefore, move the previous question.

Mr. GARNER of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GARNER of Texas. Looking at the RECORD, my recollection is that the gentleman from Ohio [Mr. BRAND] had unanimous consent to address the House for 30 minutes after these other speeches that had been agreed to and the disposition of business on the Speaker's table. Does the Chair rule that this resolution constitutes "business on the Speaker's table" that would take the gentleman from Ohio off his feet or vitiate his right to address the House for 30 minutes?

The SPEAKER pro tempore. The Chair has examined very carefully the colloquy and the statement made by the Speaker when the unanimous-consent request in question was made. The Chair has also talked with the Speaker himself in regard to it, and we are agreed that it is clear from the entire colloquy that it was the intention of the House that the speech of the gentleman from Ohio [Mr. BRAND] should immediately follow the completion of the radio bill. I do not know what the Speaker's action would be, but if the present occupant were in the chair at the time he would hold that at whatever time the radio bill is completed the gentleman from Ohio would be entitled to 30 minutes, because I believe that this was the intention of the House at the time the permission to speak was originally granted.

Mr. BRAND of Ohio. Mr. Speaker, is that the ruling of the Chair?

The SPEAKER pro tempore. The Chair can not say what the Speaker will rule when the question arises, but the Speaker did say to the present occupant of the chair that his interpretation of the rule, so far as the gentleman speaking to-day is

concerned, was that it should be only after the completion of the radio bill.

Mr. DICKINSON of Iowa. Was it not stated in the colloquy that the radio bill would probably be concluded in time? Is not that implied in the record, there, that the gentleman from Ohio is to speak on Saturday?

The SPEAKER pro tempore. Clearly so; but the radio bill is not yet finished.

Mr. MICHENER. Mr. Speaker, the Chair has stated the situation, and I move the previous question.

Mr. DICKINSON of Iowa. Mr. Speaker, I make a point of order, if you are going to do anything of that kind.

According to the record here, the gentleman from Ohio is entitled to the floor at this time under the Rules of the House, and we will have a decision here on that.

The SPEAKER pro tempore. There is a resolution pending, having been brought before the House by the Committee on Rules, and the gentleman from Michigan [Mr. MICHENER] has the floor. The Chair rules that he can not be taken off the floor for the purpose indicated by the gentleman from Iowa.

Mr. MICHENER. I do not want to force anything upon the House, but the matter has been investigated and the present occupant of the chair has fully discussed the matter with the Speaker, and the gentleman from Ohio [Mr. BRAND], as I understand it, understands the situation and has agreed to it.

Mr. BRAND of Ohio. Mr. Speaker, will the gentleman yield?

Mr. MICHENER. Yes.

Mr. BRAND of Ohio. I have not agreed in any way. I think the record is exactly the opposite.

Mr. DICKINSON of Iowa. Mr. Speaker, I make the point of order——

The SPEAKER pro tempore. Does the gentleman from Michigan [Mr. MICHENER] yield?

Mr. MICHENER. Yes.

Mr. DICKINSON of Iowa. I make the point of order that when the other time expired under the order to speak here it was the duty of the Chair, under the record as it now stands in the CONGRESSIONAL RECORD, to recognize the gentleman from Ohio, and not the gentleman from Michigan, when they were both on their feet at the same time and asking for recognition.

Mr. BEEDY. The Chair has ruled on that point.

The SPEAKER pro tempore. The Chair has already ruled.

Mr. DICKINSON of Iowa. No. The Chair has ruled that he has recognized the gentleman from Michigan.

The SPEAKER pro tempore. That also is correct.

Mr. DICKINSON of Iowa. But I make the point of order that it was the duty of the Chair under the record to recognize the gentleman from Ohio.

Mr. MICHENER. I would like to propound a question to the gentleman from Ohio. Was the gentleman from Ohio on his feet and demanding recognition to be heard at this time?

Mr. BRAND of Ohio. I was when you demanded recognition.

Mr. MICHENER. Mr. Speaker, I move the previous question.

The SPEAKER pro tempore. The gentleman from Michigan moves the previous question. The question is on agreeing to that motion.

The question was taken, and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DICKINSON of Iowa. Mr. Speaker, I demand a division.

The SPEAKER pro tempore. A division is demanded.

The House divided; and there were—ayes 46, noes 75.

The SPEAKER pro tempore. The previous question is not ordered. The gentleman from Michigan has the floor.

Mr. DICKINSON of Iowa rose.

The SPEAKER pro tempore. For what purpose does the gentleman from Iowa rise?

Mr. DICKINSON of Iowa. I object to the vote on the ground of no quorum being present.

Mr. RAMSEYER. Mr. Speaker, I do not know what the gentleman from Ohio [Mr. BRAND] has on his mind. [Laughter.] I am frank about that. But we are confronted now with a situation, and not a theory. The motion for the previous question has been voted down, and evidently some Members have more advance information on what is to be said by the gentleman from Ohio than I have. I think that the gentleman's right to address the House should be settled by unanimous consent.

Now, Mr. Speaker, I conferred with the present occupant of the chair as to the construction of the colloquy up at the desk. I was one of the gentlemen there in the group when it was talked over. There is some doubt as to the meaning of the colloquy. There can be no question about that. Although I did not arrive at the same conclusion as the Speaker pro tempore, yet I can see that the Speaker or anybody else reading that over could arrive at a different conclusion than the one arrived at by me after a careful reading of the colloquy. I think we ought to settle the right of the gentleman from Ohio to the floor in some way by unanimous consent. [Applause.] I think we ought to yield to the gentleman from Ohio to prefer his unanimous-consent request.

The SPEAKER pro tempore. Does the gentleman from Michigan yield?

Mr. MICHENER. Yes.

Mr. BRAND of Ohio. Mr. Speaker, I ask unanimous consent to speak for 30 minutes.

The SPEAKER pro tempore. At the present time? When?

Mr. BRAND of Ohio. Immediately.

Mr. MAPES. Mr. Speaker, reserving the right to object, I will ask the gentleman from Ohio about what subject?

Mr. BRAND of Ohio. The Ohio primary and Herbert Hoover.

Mr. MAPES. If the gentleman from Ohio is going to bring the Ohio campaign into the House, I ask to be coupled with the gentleman's request a request that the gentleman from Ohio [Mr. BURTON] be allowed 30 minutes immediately following the speech of the gentleman from Ohio [Mr. BRAND]. [Laughter and applause.]

The SPEAKER pro tempore. The Chair will put the two requests together.

Mr. MICHENER. Mr. Speaker, reserving the right to object, what will be the position of the rule provided these requests are granted?

The SPEAKER pro tempore. It would simply be suspended. The House, by unanimous-consent order, will have suspended the consideration of the rule, and the gentleman from Michigan will have to call it up again.

Mr. MICHENER. The gentleman from Michigan will have the floor at the conclusion of the speeches made by the two gentlemen?

The SPEAKER pro tempore. Certainly. The Chair would so understand.

Mr. MICHENER. I withdraw the reservation.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to proceed now for 30 minutes, and the gentleman from Michigan asks unanimous consent that the gentleman from Ohio [Mr. BURTON] may have 30 minutes immediately following him. Is there objection?

Mr. BRITTEN. Mr. Speaker, I object. [Cries of "No!" "No!"] Mr. Speaker, reserving the right to object, my sole reason for objecting at this time is because the country is demanding this radio legislation. They are demanding it from San Francisco to New York. I object.

The SPEAKER pro tempore. Objection is heard.

Mr. RAMSEYER. Will the gentleman yield?

Mr. BRITTEN. Yes.

Mr. RAMSEYER. The gentleman is a man of discerning powers and he knows the state of mind of the House at this time. It is that these speeches have got to be disposed of.

Mr. BRITTEN. Mr. Speaker, it is evident that the House is in the mood to receive this debate, so I withdraw my objection. [Applause.]

The SPEAKER pro tempore. Is there objection?

Mr. NEWTON. Mr. Speaker, reserving the right to object, why can not this matter go over until Monday and dispose of this radio bill at once? [Cries of "No!" "No!"] That was the thought and the intention of the House when this proposition was agreed to without objection. We ought to proceed with this important piece of legislation, complete it, and then, if there is some dirty linen to be washed, wash it, if need be, but not until then.

The SPEAKER pro tempore. Is there objection?

Mr. NEWTON. I object.

The SPEAKER pro tempore. Objection is heard. The gentleman from Michigan has the floor.

Mr. BRAND of Ohio. Will the gentleman yield?

Mr. MICHENER. Yes.

Mr. BRAND of Ohio. Mr. Speaker, I ask unanimous consent to proceed for 30 minutes on Monday after the reading of the Journal. [Applause.]

Mr. MAPES. Mr. Speaker, reserving the right to object——

Mr. LEHLBACH. Mr. Speaker, I will have to object to that. On Monday we are going to consider and pass the radio bill. This afternoon it will do no harm, but on Monday this legislation is in order.

Mr. BRAND of Ohio. Mr. Speaker, will the gentleman from Michigan yield further?

Mr. GARNER of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. Does the gentleman yield for a parliamentary inquiry?

Mr. MICHENER. Yes.

Mr. GARNER of Texas. Would it be in order for the Chair to recognize some one to move that the gentleman from Ohio [Mr. BRAND] have 30 minutes and that the gentleman from Ohio [Mr. BURTON] have 30 minutes?

The SPEAKER pro tempore. It would not be in order.

Mr. GARNER of Texas. The recognition of the Chair might give us an opportunity to submit the motion if anyone desired to make it.

The SPEAKER pro tempore. The gentleman from Michigan has the floor.

Mr. GARNER of Texas. Would the Chair be willing to recognize some one to make that motion?

Mr. DENISON. Mr. Speaker, I ask for the regular order.

Mr. BRAND of Ohio. Will the gentleman from Michigan yield?

Mr. MICHENER. For a question.

Mr. BRAND of Ohio. I ask unanimous consent to proceed for 30 minutes whenever the radio bill is concluded, even though I have to go into the next day.

The SPEAKER pro tempore. If the present occupant of the chair should happen to be in the chair at that time, he would rule that under the consent granted it was the intention of the House that the gentleman from Ohio should have 30 minutes upon the completion of the radio bill. To the present occupant of the chair this is the clear intention of the order of the House.

Mr. MAPES. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. BURTON] may have 30 minutes, or the same amount of time as is consumed by the gentleman from Ohio [Mr. BRAND], immediately following the speech of the gentleman from Ohio [Mr. BRAND], whenever it is made.

Mr. BRAND of Ohio. Mr. Speaker, I second that request.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. MICHENER. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. WHITE of Maine. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes; and pending this motion, Mr. Speaker, I desire to make some arrangement with respect to a division of the time. Under the rule there is one hour and a half of debate upon each side, and it happens that the chairman of the committee is in favor of the bill and also the ranking minority member is in favor of the bill. I shall be very pleased to agree to yield one-half of the time allotted to this side to some Member who is opposed to the bill and who may control on this side the time in opposition to the bill.

Mr. LEHLBACH. If the gentleman will yield, I suggest that one-half of the time on this side, to be consumed by those opposed to the bill in its present form, be allotted to the gentleman from Michigan [Mr. CLANCY], a member of the committee.

Mr. CELLER. What will be the disposition of the time with reference to this side?

Mr. LEHLBACH. We will reach that in a moment.

Mr. WHITE of Maine. Has the gentleman on that side any suggestion to make as to control of the time?

Mr. DAVIS. I will say that, of course, if I am allowed to control the time on this side I shall give the opposition their half of the time.

Mr. LEHLBACH. Would it not be better, I suggest to the gentleman from Tennessee, that the same arrangement be made on the other side of the aisle that is made here, and have one-half of the time in the control of a Member in opposition to the bill. Of course, I do not question at all——

Mr. DAVIS. I want to state there was so much confusion I did not hear just what the gentleman stated about the time. I may say that suggestion will be perfectly satisfactory, and the ranking minority member opposed to the bill is the gentleman from New York [Mr. LINDSAY], and, of course, I will be very pleased for him to control the opposition time, and if the gentleman is not here——

Mr. CELLER. Apparently the gentleman from New York is not in the Chamber. Will somebody else be designated in his absence?

Mr. LEHLBACH. I suggest his colleague the gentleman from New York [Mr. CELLER] be designated for the time being, to turn the time over to the gentleman from New York [Mr. LINDSAY] when he appears.

Mr. DAVIS. That is satisfactory.

The SPEAKER pro tempore. The gentleman from Maine asks unanimous consent that the time on the majority side be controlled by and equally divided between himself and the gentleman from Michigan [Mr. CLANCY], and that on the minority side one-half of the time be controlled by the gentleman from Tennessee [Mr. DAVIS] and the other one-half by the gentleman from New York [Mr. LINDSAY], and that in the absence of the gentleman from New York [Mr. LINDSAY] such time be controlled by the gentleman from New York [Mr. CELLER]. Is there objection to the request?

There was no objection.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Maine [Mr. WHITE].

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes, with Mr. CHINDBLOM in the chair.

The Clerk read the title of the bill.

On motion of Mr. WHITE of Maine, the first reading of the bill was dispensed with.

Mr. WHITE of Maine. Will the gentleman from Tennessee use some of his time at this point?

Mr. DAVIS. Yes. Mr. Chairman, I yield 10 minutes to the gentleman from Oklahoma [Mr. MCKEOWN], a member of the committee.

Mr. MCKEOWN. Mr. Chairman, ladies and gentlemen of the committee, the controversy arising in this bill is over the language contained in the amendment of section 4, which reads as follows:

> The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to the population and area.

When the radio legislation first came before Congress it was undertaken in order to protect the rights of the several States to provide an equal distribution of wave lengths and power. This was the policy pursued by the Congress, and language was placed in the act that was thought at that time to be sufficient to safeguard all parts of the country and put them on the same footing, but this interpretation has not followed.

I want to say to the members of the committee that I have here communications from associations and individuals in the city of New York, where the greatest amount of power has been allocated, to show that before the Radio Commission was provided for this whole chaotic condition and criticism of the Commerce Department was brought about deliberately. For instance, I have clippings from newspapers showing they were saying that everything was in a chaotic condition at the time the control of power was in the Department of Commerce, and that they brought about that chaotic condition by the use of a fluke tube that was permitted to be shifted from one big station to the other, so they could not be located and caught.

This chaotic condition was brought to the attention of the people, of course, by the whistle and the noise and all those things that were carried on from these stations, and there came the cry for the creation of a commission.

I was one of the Members of Congress who was opposed to a commission. I have long since made up my mind that commissions ought not to be constituted, and if we have to have such work done bureaus should be established under some department head that is responsible to the administration. I am opposed to the commission form of administering the affairs of this Nation.

However this may be, I want to say that this combination, which consists of the Westinghouse Co., General Electric, the American Telegraph & Telephone Co., the Radio Corporation, and the American Broadcasting Co., has a monopoly of this situation with a capital investment of $3,000,000,000.

Now, what has taken place? In the allocation of power or wattage the first zone has secured a very much larger proportion of power than any other zone.

Here is what has taken place in the country: So much power has been granted to the large stations, to the chain stations, that they are absolutely crowding the small, independent stations off the air. If you turn on your receiver when they are going full speed and spreading the whole dial, you can not get a par-

ticular small station. As a matter of fact, the use of the high power is absolutely unnecessary.

You can take the population in the first zone as an example. There they have 193,000 watts. In the third zone, a larger area with a greater population, they only have 45,000 watts allocation. When you go to the commission and ask for more power they say, "We haven't got it."

The truth about it is the big chain stations under the American Broadcasting Co. are freezing out the college stations, the farmer stations, that send out farm information and cause confusion on the air, so that you can not get anything except Silvertown cord tires, Palmolive soap, Maxwell House coffee, and a dozen other articles of merchandise. They say they are producing it in the interest of art. The commissioners say that in the distribution of power we do not need to have any big stations in the country. One says our big stations furnish magnificent programs. Well, I will say that every night it is the same program—Wrigley's chewing gum, with the same tunes and the same music all the time. They have wonderful artists, but that does not justify the Congress in turning over everything to these people.

Now, let me call your attention to other places. Take Maine, which is about off the map——

Mr. BEEDY. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. BEEDY. Is the gentleman advocating the enactment of this legislation to solve the difficulties he has described?

Mr. McKEOWN. Yes; and I want to show you why.

Mr. BEEDY. I am interested in what the gentleman is going to say about Maine.

Mr. McKEOWN. Well, Maine is in the upper country—here is New England, Connecticut, Massachusetts—I do not believe they have Maine on the list. [Laughter.]

Mr. BEEDY. Then I am opposed to the list. [Laughter.]

Mr. McKEOWN. You have so little power they do not put it in the list. Here is what takes place. We have contended that under the present law there was plenty of power if fairly allocated. There is no disposition on my part toward trying to tear down or destroy any good improvements or to impede it in any way. That is not the purpose of the committee. But we say we want a fair and equitable distribution of power and wave lengths, and that is all we ask for.

The commission has construed an equitable distribution to mean from the standpoint of the listener. If he can have a receiver in Arizona that can hear New York, that is enough for him, and they say that is a fair and equitable distribution.

Up in New York they complain to me and say they have written the Representatives from New York—I do not know whether it will have any effect—protesting against this situation. They say in New York City the thing is so thick with broadcasting stations that they can not hear anything but "Hello, everybody."

We are asking to pass this legislation so that the commission will not do as it has in the past, ignore all the rest of the country and let the few stations in New York and Chicago dominate the whole broadcasting country.

Mr. LAGUARDIA. What assurance have you that they will do it?

Mr. McKEOWN. Because this legislation calls for an equal allocation in the zones. We say that as between the people of each zone there will be an equitable allocation.

Mr. LAGUARDIA. That sounds reasonable.

Mr. HUDSON. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. HUDSON. The gentleman said he was asking the House to pass the legislation—suppose the House refuses to pass the legislation; what will happen?

Mr. McKEOWN. If you do not adopt this amendment and pass this bill to continue the commission?

Mr. HUDSON. If we pass no legislation, then the commission automatically goes out.

Mr. McKEOWN. No; they become the appellate board.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CELLER. I yield the gentleman three minutes more, out of my time.

Mr. HUDSON. Will it not automatically throw the control back into the Department of Commerce?

Mr. McKEOWN. It would, with this board still in existence as an appellate board with power in the Department of Commerce to transfer everything to the commission.

Mr. HUDSON. It would revert to the Department of Commerce?

Mr. McKEOWN. And send it over to the commission as a reviewing board.

Mr. CELLER. Is the gentleman dissatisfied with the radio audition in his own State?

Mr. McKEOWN. My State is down there where we have spent some four or five hundred thousand dollars trying to have the voice of Oklahoma sent up here to this country, because we enjoy hearing the voice of New York, but we can not do it, because they have put two stations right up here in the northeast part of the country that drown us out.

Mr. CELLER. Did not the gentleman say in the hearings on page 226 that he could hear the broadcasting from Habana, Cuba; Montreal, Canada; from Seattle and from New York City? And does not that indicate a rather wide range of receptivity? Would not the gentleman be satisfied with that sort of a service.

Mr. McKEOWN. But I say to the gentleman that the broadcasting situation is a two-handed game. I am not satisfied to sit there and listen to your city without you listening to me. [Laughter and applause.]

Mr. CELLER. But suppose I say to the gentleman that New York does not want to hear Oklahoma?

Mr. McKEOWN. Then we may not want to hear New York, either.

Mr. STRONG of Kansas. Mr. Chairman, will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. STRONG of Kansas. The report refers to five zones, but I do not find any place where this committee report tells of the States in the different zones. Will the gentleman put into the RECORD the States that are in the different zones?

Mr. McKEOWN. Yes.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. DAVIS. If the gentleman from Kansas and other gentlemen will look at the CONGRESSIONAL RECORD of March 5, 1928, page 4238, he will find the zones by States, population, and the number of stations and the total station power.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

Mr. CLANCY. Mr. Chairman, I yield 10 minutes to the gentleman from Massachusetts [Mr. GIFFORD].

Mr. GIFFORD. Mr. Chairman, as a member of the committee I am not opposed to extending the life of the Radio Commission for another year, but I am opposed to the amendment to the Senate bill which has been reported by our committee. It was shown on the floor of this House a year ago that there was great need for the creation of a Radio Commission. Fear was expressed that a gigantic monopoly was growing up within the industry and that it ought to be curbed. The necessity for a Radio Commission for other reasons was expressed, and one was, therefore, established. This commission recently came before our committee and asked for another year of existence. We inquired of them what they had accomplished. We found that they had done very little; that they had no settled policy, resulting from various causes, such as that most of the members of the commission had not been confirmed; that they even had to borrow offices in which to establish themselves; and that because of the failure of last year's final deficiency bill they had lacked necessary appropriations.

In fact, it did not seem that they had accomplished anything in particular. We asked them if they had read the debates in the House and in the Senate upon the basis of which the commission was created. Several replied that they had read but little of them. We suggested that before interpreting the law even the Supreme Court would, on occasion, read the debates which had been held in Congress to learn of its intent. We particularly questioned them as to their plans and what their policies might be for another year. We found that they had no very definite policy in mind. They wished to clear some more lanes and seemed to feel that they were to be experts in radio transmission and had lost sight of their judicial capacity in determining policies. Although there was already a provision in the law that there should be an equitable division of radio service they have thus far seemed to interpret this as being a service affecting only listeners-in and not also the rights relating to the equitable division of broadcasting stations over the country.

The right of a community to have a small broadcasting station so that it might send out local news by radio seemed to have been ignored. The commission was reminded that the United States had been divided into five regional zones as equal as possible, with a commissioner from each zone to see that fair play was exercised in all five. We found that they had taken away no licenses previously granted; that they had renewed each and every one for 60 days at a time and intended to keep on renewing them every 60 days during the coming year. That they had not grappled with questions of the kind which we desired to be settled, such as whether prior rights, or vested rights, might be claimed by concerns which had been

early in the broadcasting field. That is an issue which they seem to have expressly avoided. Their efforts have been exerted rather toward clearing lanes and regulating the amount of power to be used. The committee has decided that we should establish a policy. It was thought that under the act passed last year equitable allocation of broadcasting licenses and wave lengths would be considered, but little attempt has been made to carry out this provision of the act.

The proposed amendment granting exact equal allocation of the 89 available wave lengths and of equal station power would seem to be an exact physical division which would be impractical if not, indeed, impossible. We must agree that it is impossible, although the committee report discloses that it does not mean exactly that. The claim is made that it means "as nearly as possible," but the language is explicit. Therefore, to pass this amendment would be highly dangerous. In any event, this ought not to be done until there is a strong demand for service from those zones, and as yet the demand is not sufficient to warrant an equal allocation. We should not pass such a mandatory clause as appears in the amendment which has been placed on the Senate bill.

What has already been done by the Radio Commission and what, apparently, they propose to do in the coming year does not appeal favorably to me, although I shall vote for the extension of their time. I should, indeed, be very glad to have radio control and supervision transferred back to the Department of Commerce and the commission required to act merely in a judicial capacity, as contemplated by the radio act. From the slow progress that has been made to date I can see that the commission will be back next year saying, "this must be done so gradually that we need still another year's extension of life," and so on afterwards. But in view of the fact that they really have been laboring under serious handicap the past year I am willing to vote them one year more.

But I am certainly opposed to this mandatory provision ordering them to do something that is probably not possible and is assuredly not advisable. In the present development of this industry we ought not to go that far in an attempt to make conditions more equitable.

Mr. JONES. Will the gentleman yield?

The CHAIRMAN. Will the gentleman yield?

Mr. GIFFORD. Yes.

Mr. JONES. The gentleman does not agree with the statement that has been made to the effect that New York can not learn anything from any other sections of the country and, therefore, they do not want to listen to them?

Mr. GIFFORD. No. I could not in fairness have any objection to taking away power from some of the zones which have more than their share. I hope that the day will soon come when listeners-in who wish to hear something besides jazz and entertainments of that nature will be considered. This is a great art and should in considerable measure supplement the work of the newspapers. Every community which desires a broadcasting station of small power—50 watts, perhaps—that would be affected from 10 to 25 miles, but not over, should be entitled to its use for an hour or so daily to learn of the activities of their own locality. They should not be forced to listen merely to music or entertainment paid for by advertisers from far-distant sections. This is altogether too important a medium of communication to be used entirely to gratify entertainment seekers.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. GIFFORD. Yes.

Mr. CELLER. I take it, then, that the gentleman does not agree with the language of the report of the committee to the effect that the allotments must be made mathematically?

Mr. GIFFORD. I can not agree with it, because the language is exceedingly specific. It can not be done. Why put in here something which can not be accomplished? I should be willing to amend it by providing for equal allocation in as far as it is consistent with the present development of the industry. But, knowing what the commission has already done, I fear that there will not be an equitable distribution of stations and that legislation to accomplish this would at some time be needed.

Mr. NEWTON. Mr. Chairman, will the gentleman yield?

Mr. GIFFORD. Yes.

Mr. NEWTON. It is the gentleman's idea that, so far as this particular section is concerned, no change in the law is required?

Mr. GIFFORD. I think that the present law as to distribution and service could be clarified and that justice could be done to radio stations as well as radio listeners. The act may need amending, but it would seem foolish to prescribe an equal allocation of wave lengths and station power.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. CELLER. I will ask the Chair to notify me when I have consumed 10 minutes.

The CHAIRMAN. The Chair will do so.

Mr. CELLER. Mr. Chairman and gentlemen of the committee, I believe that the life of the Radio Commission should be extended another year. Many difficult and important problems surround the art of the radio, and the Radio Commission should have proper and ample time to work out these difficulties and come to a proper solution of them. For that reason I am not opposed to the forepart of this bill, which seeks to extend the life of the commission. I believe, however, that the last section of the bill is the one that taints the bill, and should have no place whatsoever in it.

I believe, furthermore, that the present act, approved so recently, in 1927, is ample to take care of all the ills and all the troubles that some Members of this House are complaining about. The radio act of 1927 provided, briefly, that there shall be an equitable distribution of radio service in the various five zones. The country, as you know, is divided into five zones. Complaint has been heard on many sides that some of these zones have an insufficient amount of stations and station power. But I can see no reason why the Radio Commission should of necessity be blamed because some of the zones are deficient in that power, because you must reflect, gentlemen, that radio stations existed long before the Radio Commission sprang into being and the so-called disparity between sections of the country as to stations existed long before 1927.

We have had stations and they have been broadcasting on the air since 1920, seven years before we had the Radio Commission, and it is very strange that the complaint comes from those communities and States which did not establish or erect radio broadcasting stations in general prior to the enactment of the radio act. The predominating sections or zones, as far as stations and station power are concerned, are those which had men in them who were courageous enough and were willing enough to invest their funds in the establishment of these stations before the Radio Commission sprung into being. So we must not blame the Radio Commission if this difference or disparity has developed. It has been a natural development. From what I can gather from the reports of the Radio Commission and conversations with them they have sought with might and with main to allow a natural development of radio. They have sought to allow the art of radio to spread and grow with as little unnatural restraint as possible, consistent with carrying out an "equitable distribution of service" as the act of 1927 provided.

Now, the amendment which the committee has made to the Senate bill, to my mind, will put the radio art into a straitjacket; it will cramp its development; it will retard its progress, and instead of doing anything worth while for radio it will make it more chaotic and will make confusion worse confounded. It will wreck radio.

This particular amendment provides that—

> The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

Let us analyze this amendment.

> The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act (the act of 1927) of broadcasting licenses, of wave lengths, and of station power.

It changes the idea of "equitable service" as in the parent act, and says there shall be a numerical, mathematical, and equal division of broadcasting licenses, wave lengths, and station power among the five zones.

The amendment continues as follows:

> And within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

No discretion is given anyone; no discretion is given to the Radio Commission as far as the zones are concerned; the language is mandatory, and I quite agree with the previous speaker that the Radio Commission is given an administrative duty to divide equally the licenses, the wave lengths, and the station power among the five zones. Then when it comes to the zones themselves, the Radio Commission—

> shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

Now, gentlemen, if I may give you an example, it is just like having a sort of large radio pie and endeavoring to divide that radio pie into five equal parts and to give a one-fifth equal part to each of the five radio zones, as it were. Suppose you sit down to a table and there are children and adults at that table. I am sure you would not be very likely to give an equal piece of pie to the child as you would to the adult. I do not mean to imply that the zone 3 is necessarily like unto a child, but I will say this: That as far as industry, commerce, radio population, and as far as enterprise is concerned with reference to broadcasting, and as far as willingness was concerned to enter this field—and facts are facts, gentlemen, and you can not change them—certain sections are not as fortunate as others. Some are smaller in all these items than others, through causes probably beyond their control. Because of these different conditions in the different zones it would be absurd to treat each zone in identical fashion. Because of these different conditions, and without any reflection upon any zone, you can not give each zone an equal slice of the radio pie.

I am willing to do everything in my power as a Member of this House to induce some of those States which were, shall I put it, "backward in coming forward" with the erection of stations and the establishment of this greater station power, to get what may be due them.

You might as well say that there are a certain number of telephones and telegraph facilities in this country and therefore you must divide the telephone and telegraph into five equal parts and divide them equally among five different zones, disregarding all of the peculiar conditions of industry, commerce, and so forth, that might obtain in the various five zones. Somebody has put it very facetiously in an editorial in the Washington Herald of this morning, a part of which I am going to read to you. The writer of this editorial suggests:

> The enactment of a law taking over the licensing of automobile drivers by the Federal Government and the allocation of license numbers in accordance with State lines or in five zones. It is easy to see that the traffic problem would immediately disappear from the streets of our cities, because New York, for instance, would not be entitled to any more licenses than Alexandria, say, or Laurel. Consequently, New York City would have no more automobiles than in those towns and the streets would be clear.
>
> Of course, this would eliminate quite a lot of business concerned in trucking and bus lines, etc., and would practically destroy the automobile business. But think of the lives that would be saved. And think of the number of people who will be maimed or crippled for life next year who might be saved from pain and suffering!

That is an absurd situation, but it is quite analogous to what this Davis amendment aims at. We might take all of the automobiles and all of the auto facilities and divide them into five equal parts and then say that those parts shall be distributed equally among the various zones.

An important test as to what station power and as to the number of stations that should exist in a zone is not the actual population of the zone, but the radio population. I have figured the receiving sets in zone 1, which is New York, New Jersey, Maryland, Delaware, District of Columbia, and New England, with the receiving sets of zone 3, the southern zone. Receiving sets are a good indication of radio population. Of the 554 total of stations—zone 1 has 95 and zone 3 has 88. Most of the complaining has come from zone 3, yet on the basis of radio population New York would seem to be entitled to its 95 stations, with its radio sets of 1,440,100, in comparison to the 88 stations of zone 3, with its radio sets of 1,037,950.

Receiving sets, January 1, 1927

ZONE 3		ZONE 1 (EXCLUSIVE OF PORTO RICO AND VIRGIN ISLANDS)	
Texas	277,550	New York	655,850
Oklahoma	100,750	New Jersey	193,700
Arkansas	52,000	Maryland	81,900
Louisiana	83,200	Delaware	13,650
Mississippi	49,400	District of Columbia	42,900
Alabama	68,250	Connecticut	79,950
Tennessee	97,500	Rhode Island	43,550
Georgia	91,750	Massachusetts	239,200
North Carolina	91,550	Vermont	21,550
South Carolina	48,100	New Hampshire	27,650
Florida	77,900	Maine	44,200
Total	1,037,950	Total	1,444,100

This comparison surely does not offer great cause for complaint.

Permit another index of the greater radio population of zone 1 over zone 3, although the actual population of zone 3 is greater than zone 1.

The annual volume of radio business done in zone 1 was $26,209,000. The annual volume of radio business done in zone 3 was $6,665,000. By radio business is meant the sale of radio stocks, including receiving tubes, rectifying tubes, dry batteries, storage batteries, sets, and so forth. These figures were compiled by the electrical-equipment division, Bureau of Foreign and Domestic Commerce, at Washington, D. C., with the cooperation and assistance of the radio division, National Electrical Manufacturers Association. They took the stock in hands of radio dealers January 1, 1928, and compared those stocks in hands of radio dealers as of October 1, 1927.

Thus zone 3 sells less than 25 per cent of the radio stocks sold in zone 1. That gives little cause for great complaint, if zone 1 has more stations and more station power than zone 3. It needs more because it has a larger radio population.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. CELLER. Yes.

Mr. JOHNSON of Texas. The gentleman does not think it fair, does he, to have the allocation to zone 3 of only 4 stations having over 1,000 watts, when zone 1 has 10 and zone 4 has 30 high-powered stations, especially when the population in zone 3 is in excess of these other zones?

Mr. CELLER. I will answer that in this way. I quite agree that the gentleman has some cause for complaint, but I say he approaches the situation with a wrong remedy. There is a remedy for the situation—giving the Radio Commission due time within which zone 3 may be gradually given more stations and power.

Mr. JOHNSON of Texas. Where should we approach it?

Mr. CELLER. The gentleman ought to let the Radio Commission have time. You have not given them enough time; you have hamstrung the Radio Commission; you have given them no money, you have given them no personnel; two of the members of the commission died, unfortunately, and one of them resigned. Only one has been confirmed by the Senate. What is the psychology that animates men who have not been confirmed? Suppose your official life hung by a thread, you would not do your work whole-heartedly. Congress took away the structure of the Radio Commission from under their feet; they have nothing to stand upon. The failure of the deficiency appropriation left them no money, no staff. You give them nothing and yet you expect everything from them.

Now, give the Radio Commission an opportunity. Give it a square deal. Then you will get results, and I say, in addition, that very likely some 300 stations—I believe I can justly glean this from the hearings—some 300 stations might be removed from the air for cause, for legal cause. When they have been accused and haled on the carpet and charged with wave jumping and charged with violation of the regulations and of the statutes, then, I say, you can take away their stations and their station power legally and then assign those stations to zone 3 or one of the other zones that may be complaining. Then you will have some fair and equitable adjustment of the situation. But you can not at one fell swoop immediately demand the drastic remedy of cutting down to a ruinous extent station power of important stations rendering national service and reaching listeners all over the country.

The Davis amendment forces the Radio Commission to accept one of the following three choices or plans:

First. Equalization of zones on level of third zone's present total applications.

This would be decreasing the maximum zones to the level of the minimum zones.

Second. Equalization of zones on level of present highest-powered zone.

This would be increasing the minimum zones to the maximum zones.

Third. Equalization of zones by averaging power and stations.

We will discuss these three plans in a moment.

Following are the number of stations and total powers now in use in the five zones, the figures showing the local maximums which may be operated simultaneously:

	Power, watts	Stations
First zone (New England and East)	202,000	95
Second zone (Pennsylvania, Michigan, Ohio, Kentucky, etc.)	103,700	93
Third zone (Southern States)	45,600	88
Fourth zone (Middle West States)	139,000	166
Fifth zone (Pacific States)	60,600	112
Total	560,000	554

Let us examine these three choices of plans. Since the Davis amendment specifies that allocations shall be "equal between

zones," the conclusion is to be drawn that the power in use in any zone can not exceed that in use in the lowest zone. At the present time the third zone has 45,570 watts in use. Adding to this all power increases and new stations now applied for in this zone, assuming that these were to be immediately granted—although the Nation's wave lengths are already far overcrowded—the power in this third zone would even then not exceed 55,000 to 60,000 watts. The power available for each of the other zones would therefore be as in the first choice, to wit:

Equalization of zones on level of third zone's present total applications

	Power, watts	Stations
First zone	60,000	100
Second zone	60,000	100
Third zone	60,000	100
Fourth zone	60,000	100
Fifth zone	60,000	100

Equalization on the above basis would involve drastic cutting of powers in several zones and many States, and the elimination of many stations which are now rendering good service.

In answer to objections against the foregoing interpretation, it has been explained that "equalization" might, perhaps, better be brought about by increasing the deficient zones up to the level of the maximum zone. Although the present overcrowded condition of the other channels is recognized by every radio listener, and the unwisdom of adding any more stations or power is obvious, let us compute what this interpretation of "equalization upward" would mean in the already overtaxed national situation and bring ourselves to the second choice, to wit:

Equalization of zones on level of present highest powered zone

	Wattage		Stations	
	Increase	Future	Increase	Future
First zone	None.	202,000	71	166
Second zone	98,300	202,000	73	166
Third zone	156,400	202,000	78	166
Fourth zone	63,000	202,000	None.	166
Fifth zone	141,400	202,000	54	166
Total, United States	459,100		276	

Such a solution of "equalization," by keeping the present maximum in one zone and filling up the other zones to its level, would thus involve adding 276 stations and an increase of 460,000 watts, practically doubling the power in the present broadcasting band. If the wave lengths are now overloaded and heterodynes now exist, it can be imagined what the 276 additional stations, averaging 1,700 watts, would do. Incidentally, about $20,000,000 would be required to build these 276 additional stations; and, of course, the supervising authority can not order them built, except as local citizens elect to invest the very large amounts involved in building each station.

The third choice—to wit, equalization of zones by averaging power and stations—proposes that the clause be interpreted in the sense of averaging present total power among all the zones, arriving at "equalization by both reductions and increases." Upon this basis, the present total simultaneous power of, roughly, 550,000 watts would be averaged among the five zones—110,000 watts to each and 110 stations to each—as follows:

	Power		Number of stations	
	Change necessary	Result	Change necessary	Result
First zone	Cut 92,000	110,000	Add 15	110
Second zone	Add 5,300	110,000	Add 17	110
Third zone	Add 64,400	110,000	Add 22	110
Fourth zone	Cut 29,000	110,000	Cut 56	110
Fifth zone	Add 49,400	110,000	Cut 2	110

Either of the preceding proposals for cutting the power and number of existing stations (under choices or Plans I and III) will react seriously on the present radio stations of States which are now rendering important service to vast populations in other States surrounding their own transmitters. The effect on such States will be as follows, the figures being proportional to "both population and area" for the respective States, as the clause specifies:

Effect on States of redistribution of station licenses and powers

	Present facilities		Equalization to lowest level		Equalization to average of United States	
	Power	Stations	Power	Stations	Power	Stations
New Jersey	49,000	25	4,200	9	6,500	14
New York	119,000	67	14,300	27	22,000	40
Massachusetts	19,000	18	4,050	10	7,500	16
Pennsylvania	57,000	33	16,000	30	24,000	48
Ohio	23,000	25	10,500	24	16,000	36
Illinois	55,000	70	10,500	20	16,000	30
Iowa	26,000	18	6,000	12	9,000	18
Nebraska	8,200	14	4,300	8	6,400	12
Missouri	14,000	18	6,600	12	10,000	18
Minnesota	20,500	14	6,000	12	9,000	18
Colorado	8,270	12	1,400	8	6,400	12
New Mexico	5,050	3	2,900	5	4,400	8
Washington	10,700	19	2,900	5	4,400	8
California	26,000	50	12,000	23	18,000	34

The above data was supplied by Commissioner Caldwell.

From this list it is evident that whether the clause is interpreted to "equalize" zones on the basis of redistributing the present total power or by cutting down the zones with excessive power to the levels of the least-equipped zone, serious damage will be done to existing stations in States which have been radio leaders in serving the listeners of the Nation.

One of the members of the commission states that equalization may deprive listeners it is intended to aid.

He says that we must think in terms of programs quite as much as power. To illustrate: Five States in the fifth zone, with an area of over 550,000 square miles, now use a total of 3,000 watts power in their stations, many of which operate only one hour a day. Lack of talent and no demand for the time they have to sell, because of the limited audience reached, are the two reasons why more stations are unnecessary in that region, and will probably not be built for some time.

The people in these States are certainly entitled to good radio programs, but of necessity they must get them from stations broadcasting in other States. If the State having the powerful stations, program material, and audience, should be required to reduce its wattage to that of one of the five States above referred to, then the listeners in these five States would actually be deprived of radio programs because of the reduction of power at the station where the program is originated.

If the State having the power, audience, and program material be allowed to continue to use the amount of power now employed by its stations, then we would have what would appear to be an unfair distribution of power as between States, but one which would resemble in appearance the condition which exists now between the five different zones. Yet, as a matter of fact, the listeners in the five States referred to would be receiving satisfactory radio reception, getting local programs from their own stations, plus programs from the more congested areas, where more talent is available, for the supplying of entertainment and educational programs.

Said commissioner continues, and states that from the foregoing it is seen that to equalize the radio zones by increasing powers or stations, will deprive listeners of radio service through setting up a chaos of interference and heterodynes. To equalize by cutting zones to any low or intermediate level will reduce the radio service now enjoyed by millions of listeners. Such a change would make listening more difficult and unsatisfactory, and would require more expensive running sets on the part of many who now have the cheapest of home apparatus.

Mr. JONES. Will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Texas.

Mr. JONES. The gentleman concedes that conditions are bad in zone 3 and in some other sections; does the gentleman expect us to be satisfied with a mere continuation of the exact situation which now prevails?

Mr. CELLER. No.

Mr. JONES. How can we hope to get relief from merely an extension of the same activities that are now in existence?

Mr. CELLER. By a little patience and allowing the commission time. The gentleman loses sight of the fact that the commission has done a good piece of work up to this time, as I shall point out to you momentarily. They have tried to remedy the situation but you have not given them a chance.

Mr. JONES. They gave the whole pie to one boy.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. CELLER. I yield to my colleague.

Mr. LAGUARDIA. Assuming, in order to distribute this power equally in the zones of the various sections of the country, this must be carried out to the loss and detriment of the city from which the gentleman and I come——

Mr. CELLER. There is no question about that.

Mr. LAGUARDIA. The gentleman would be willing to do that?

Mr. CELLER. I would be willing to take away considerable power from the city of New York or even New York State, but I am not going to stand idly by and see that done at one fell swoop and without notice and without any opportunity to accommodate ourselves to the situation.

Mr. LAGUARDIA. The gentleman does not contend that any individual or any company, notwithstanding the fact they may have operated for seven years, has any vested right in the air.

Mr. CELLER. I differ in that regard from my colleague. I think there is a vested right, and I shall point it out if I have the time, and if I have not the time I will put it in the RECORD.

Mr. JONES. If the gentleman is not satisfied with the amendment, why does not the gentleman offer something that will gradually work out a different plan and gradually change the situation?

Mr. CELLER. I shall offer that when the proper time comes.

Mr. JONES. I would like for the gentleman to explain on what theory these men have their vested rights at the expense of the whole people, which would tend to interfere with and deny the rights of the whole people?

Mr. CELLER. I will come to that in the regular course of my remarks here to-day. Your questions do not allow me to proceed orderly. I shall come to "vested rights."

Now, gentlemen, the commission has been doing some good work and we must not lose sight of that. I have examined carefully the hearings and we are told, for example, that one-third more of the States have had their channels cleared. This is quite a step in advance. Commissioner Pickett states that 39 States have now choice high-powered wave lengths.

They have gone a great way toward removing what is known as "local blanketing." Where you have a high-powered station like WEAF in New York or WJZ in New Jersey, these stations have gone into the suburbs and no longer is there that drowning out and practical destruction of the efficacy of the small-powered station within the locality where these high-powered stations exist. WEAF has gone something like 25 miles out of New York City on Long Island to a place called Belmore, and we are told that WJZ has gone to Boundbrook, which is some distance from the metropolitan area. That was an advance and other stations will follow. In addition to this one of the commissioners stated that 90 per cent of the heterodyning has been removed. Heterodyning, without going into the technical features thereof, roughly, is so-called "interference."

Now, by their efforts in changing locations and forcing stations to split wave lengths they have minimized the amount of interference. I want to stress the fact this afternoon that they should have their due.

Let me read some significant passages from the hearings—page 208—as follows:

Mr. BRIGGS. Do you believe because there has been a centering of certain broadcast activities in highly populous communities they should be allowed to remain there, without regard to the equitable distribution throughout the United States?

Commissioner PICKARD. I believe that actions speak louder than words in this case, and I am going to answer your question by saying that within the last 60 days I have removed five Chicago stations from a very desirable wave length, and that clear channel has been replaced by a Kentucky station. In another instance another wave length from Chicago has gone to a State which has been low in its quota—Indiana.

Mr. BRIGGS. In other words, the effort of the commission, so far as you are concerned, is being directed and will be directed to making an equitable distribution of the broadcast bands or assignments of wave lengths?

Commissioner PICKARD. Yes, sir.

And at page 231:

Commissioner PICKARD. To some extent the stations that should be heard clearly, I will admit that 90 per cent of them are being heterodyned, because that station or stations on adjoining channels are not on their assigned frequency. I will not agree, however, there has been no improvement. I think there has been 100 per cent improvement in listening conditions throughout the country.

I believe that is what they are trying to do, place the good wave lengths and increase the power in sections that need the increase of power and better stations, and if given a chance, given some sort of encouragement, they will satisfy and accommodate all parties.

Mr. ROMJUE. Will the gentleman yield?

Mr. CELLER. I will yield to the gentleman.

Mr. ROMJUE. In the early part of the discussion the gentleman said something about the rights of stations that were started seven years before the commission was appointed. Will the gentleman give us his idea on the question of vested rights? We do not believe that they have any vested rights.

Mr. CELLER. I will come to that. Here is a situation in the so-called zone 3, taking in the Southern States.

Mr. MANLOVE. If the gentleman will yield, is it not possible to bring in a map here showing these zones, for the purpose of illustration while the discussion is going on?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CELLER. I yield myself 10 minutes more. I would like to bring in a map if I had one, but I have none.

Mr. DAVIS. Will the gentleman yield?

Mr. CELLER. I will.

Mr. DAVIS. As I understand the reduction is to follow the reduction of each zone to 45,000 now held in the third zone?

Mr. CELLER. Bring the power down to the lowest level? If you bring the maximum down to the minimum to my mind that is one of the choices or plans under the wording of your amendment.

Mr. DAVIS. Did not the gentleman say a while ago that in zones that nobody would want it cut down?

Mr. CELLER. I did not say that. I say nobody would want to increase the lowest to the highest, because that would be scientifically impossible, because the bucket is already overflowing—the radio bucket.

Mr. DAVIS. It is no more scientifically impossible than to do it the other way.

Mr. CELLER. Would you want to make a wholesale reduction of the stations?

Mr. DAVIS. No; we do not want a reduction; we want the neglected areas of this country, including 44 States, to be given their quota.

Mr. CELLER. I am willing to answer that situation. In conversation with somebody in authority I discovered that the South has not availed itself of the opportunity in that regard.

Mr. JONES. There are applications, but they could not get the licenses. I could give the gentleman the names of a lot of places that would like the privilege of broadcasting or an increase of power.

Mr. CELLER. I want to be fair, and I do not want to be unfair. Take for example the State of Tennessee, at Memphis they have a 580-kilocycle station with a power of 500 watts. They requested an increase to 5,000 watts, but the request did not come from the station; it was left to the commissioner to go down and ask them to increase the power. This was WMC.

With reference to another station at Atlanta, Ga., one of the commissioners went down to that station and said, "You are deficient in power; come forward with an application and we will grant it to you." And they did not even come forward with the application for increased power. The same thing resulted in an application made by a member of the commission to station WSMB in New Orleans. That was an application from the commission itself to that station to come forward and ask for an increase in power. But they did not come.

The Radio Commission, I am informed, has agreed tentatively to grant in zone 3 the majority of applications on file for construction permits for new stations. I herewith submit a list by States of these applications now on file. This list I received from two members of the commission:

CONSTRUCTION PERMITS

NUMBER OF NEW APPLICATIONS IN THE SOUTH, BY STATES

Arkansas

Charles W. McCollum, McGehee, 50 watts on a frequency of approximately 840 kilocycles.

First Church of the Nazarene, Little Rock, 1,000 watts on a frequency between 1,090 and 800 kilocycles.

Berean Bible Class, Little Rock, 15 watts on a frequency of 1,150 kilocycles.

Florida

Home Appliances Corporation, Fort Myers, 250 watts on a frequency of approximately 1,410 kilocycles.

Southern Radio Co., Tampa, 200 watts on a frequency of 1,363 kilocycles.

Robb & Stucky Co., Fort Myers, 100 watts on a frequency of approximately 1,090 kilocycles.

Georgia

R. E. Martin, Columbus, 50 watts and kilocycles optional.

Kent's furniture and music store, Tifton, 15 or 20 watts on a frequency of 1,140 kilocycles.

Louisiana

A. H. Nigocia, New Orleans, 5 watts on a frequency of 740 kilocycles.

C. C. Crawford, Haynesville, 50 watts on a frequency of 710 kilocycles.

Feazel Motor Co., Ruston, 1 watt and kilocycles are optional.

Mississippi

Woodruff Furniture Co., Hattiesburg, 10 watts on a frequency of 1,200 kilocycles.

J. Pat Scully, Greenville, 100 watts on a frequency of 1,090 kilocycles.

North Carolina

Wilmington Radio Association, Wilmington, 50 watts on a frequency of approximately 1,330 kilocycles.

A. J. Kirby Music Co., Gastonia, 50 watts on a frequency of 1,363 kilocycles.

Oklahoma

The Full Gospel Tabernacle, Tulsa, 500 watts on a frequency of 1,360 kilocycles.

L. A. Sims, Tulsa, 250 watts on a frequency of 1,200 kilocycles.

The Radio Service Co. of Oklahoma City, Oklahoma City, 15 watts on a frequency of 700 kilocycles.

Elk Radio & Electric Shop, Elk City, 250 watts on a frequency of 999 kilocycles.

Lyman M. Edwards, Enid, 500 watts on a frequency of 960 kilocycles.

South Carolina

Paul S. Pearce, Columbia, 15 watts on a frequency of 1,270 kilocycles.

Tennessee

Tennessee Broadcasting Association, Nashville, 150 watts on a frequency of 1,200 kilocycles.

Christian Church, Dyersburg, 50 watts on an optional frequency.

Bristol Radio Co. (Inc.), Bristol, 50 watts on a frequency of 940 kilocycles.

Claude V. Andrews, Union City, 10 watts on a frequency of approximately 770 kilocycles.

Elbert Wood, Morrison, 15 watts on a frequency of 1,340 kilocycles.

Texas

Matthewson-Pelz Music Co., Marshall, 15 watts on a frequency of 1,130 kilocycles.

John Milford Baldwin, Fort Stockton, 50 watts on a frequency of approximately 860 kilocycles.

C. O. Lorenz, San Antonio, 100 watts on an optional frequency.

Eagle Publishing Co., Goldthwaite, 50 watts on a frequency of 550 kilocycles.

M. L. Cates, Georgetown, 100 watts on a frequency of 1,290 kilocycles.

Highland Heights Christian Church, Wichita Falls, 750 watts on a frequency of — kilocycles.

Virginia

Clement W. Hanbury, jr., Norfolk, 500 watts on a frequency of 30.1 meters.

Richmond Development Corporation, Roanoke, 1,000 watts on a frequency of 1,030 kilocycles.

The Radio Commission has also agreed tentatively to grant the applications of all stations requesting changes. These applications, on the following list received from two of the commissioners, are:

CONSTRUCTION PERMITS

OLD STATIONS REQUESTING CHANGE

Louisiana

WCBE: Joseph H. Uhalt, New Orleans. This station is operating on a frequency of 1,320 kilocycles with a power output of 5 watts, and is requesting a frequency of 1,320 kilocycles with a power output of 500 watts.

KWKW: Three thousand five hundred watts.

Mississippi

WCOC: Crystal Oil Co., Columbus. This station is operating on a frequency of 1,300 kilocycles with a power output of 250 watts, and requests the same frequency with a power output of 500 watts.

North Carolina

WPTF: Durham Life Insurance Co., Raleigh. This station is operating on a frequency of 550 kilocycles with a power output of 500 watts, and requests a frequency of 720 kilocycles with a power output of 1,000 watts.

Oklahoma

KFJF: National Radio Manufacturing Co., Oklahoma City. This station is operating on a frequency of 1,100 kilocycles with a power output of 750 watts and 1,000 watts from 6 to 6 p. m., and requests the same frequency with a power output of 15,000 watts—really want 5,000.

KVOO: Southwestern Sales Corporation, Tulsa. This station is operating on a frequency of 860 kilocycles with a power output of 1,000 watts, and requests the same frequency with a power output of 5,000 watts.

Tennessee

WMC: Memphis Commercial Appeal (Inc.), Memphis. This station is operating on a frequency of 580 kilocycles with a power output of 500 watts, and requests the same frequency with a power output of 5,000 watts.

WLAC: Life & Casualty Insurance Co., Nashville. This station is broadcasting on a frequency of 1,330 kilocycles with a power output of 1,000 watts, and requests a frequency of 1,330 kilocycles with a power output of 5,000 watts.

Texas

WBAP: Carter Publications (Inc.), Fort Worth. This station is operating on a frequency of 600 kilocycles with a power output of 5,000 watts, and requests a frequency of 650 kilocycles with a power output of 5,000 watts.

KTAP: Robert B. Bridge, San Antonio. This station is operating on a frequency of 1,310 kilocycles with a power output of 20 watts, and requests a frequency of 1,250 kilocycles with a power output of 250 watts.

WDAG: J. Laurance Martin, Amarillo. This station is operating on a frequency of 1,140 kilocycles with a power output of 250 watts, and requests the same frequency with a power output of 1,000 watts.

KPRC: Houston Printing Co., Houston. This station is operating on a frequency of 1,020 kilocycles with a power output of 500 watts, and requests the same frequency with a power output of 1,000 watts.

KFJZ: Henry Clay Allison, Fort Worth, formerly owned by W. E. Branch, is operating on a frequency of 1,200 kilocycles with a power output of 50 watts, and requests only the change in name.

WRR: City of Dallas, Dallas. This station is operating on a frequency of 650 kilocycles with a power output of 500 watts, and requests a frequency of 850 kilocycles with a power output of 5,000 watts.

KGRC: Eugene J. Roth, San Antonio. This station is operating on a frequency of 1,360 kilocycles with a power output of 100 watts, and requests the same frequency with a power output of 500 watts.

KFYO: Kirksey Bros. Battery & Electric Co., Breckenridge. This station is operating on a frequency of 1,420 kilocycles with a power output of 15 watts, and requests the same frequency with a power output of 100 watts.

KGCI: Liberto Radio Sales, San Antonio. This station is operating on a frequency of 1,360 kilocycles with a power output of 100 watts, and requests the same frequency with a power output of 500 watts.

Virginia

WSEA: Virginia Beach Broadcasting Co. (Inc.), Norfolk. This station is operating on a frequency of 1,140 kilocycles with a power output of 500 watts, and requests a change of location from Norfolk to Portsmouth, Va.

Mr. BULWINKLE. Mr. Chairman, will the gentleman yield?

Mr. CELLER. All these applications filed with the Radio Commission from zone 3 we find involve no great amount of power. Apparently there is no great demand for new stations and power in zone 3.

Mr. DAVIS and Mr. BULWINKLE rose.

Mr. CELLER. Zone 3 does not want many new stations. It seems as though the Members of Congress in that section want to avail themselves of stations and station power, and not the constituents whom they represent.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. CELLER. Yes.

Mr. DAVIS. I do not know where the gentleman gets those figures that he is reading, but the Committee on the Merchant Marine and Fisheries had the Radio Commission file with the committee—and it is printed in the hearings—a statement of the applications that have been made from the States and zones to the commission for new stations, and the power they ask for, and the existing stations that desired and requested an increase in power, and that shows that there are enough applications on file for additional power from the third zone to raise it up to its pro rata of the present national power. I have put that in the RECORD, and if the gentleman will read my speech he will see that that is true.

Mr. CELLER. I procured these lists from two members of the commission. These are not my lists. Mr. Chairman and gentlemen of the committee, we sit here and hardly realize the difficulties of the Radio Commission. They have been pilloried, and I think unjustifiably. For example, let me leave off a bit

from zone 3 and go to another zone. The State of Nevada has not yet made a single application for a radio station. I am reading now from the testimony of Commissioner Lafount, at page 344 of the hearings. He says there that there are only two or three small stations in Idaho, Wyoming, and Montana, and many of the Mountain States; that no applications are being made, and because of that it would be unfair to hold up all of the power and all of the distribution of wave lengths and simply await the arrival of applications from those States. That is the rub of the situation. Why should the enterprising States who have the station power and the stations await until the others awaken to their sense of responsibility and make these applications for increased power?

Mr. LaGUARDIA. The gentleman would not have the larger States usurp the rights of the smaller States?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CELLER. I yield myself five more minutes. I would not have the larger States discriminate against the smaller States, but within a reasonable period time will solve all of these difficulties and the Radio Commission will bring about a situation satisfactory to all parties.

Mr. HUDSON. If the gentleman contends that these are vested rights, then when would these States get a chance?

Mr. CELLER. I shall come to that question.

Mr. SANDLIN. Mr. Chairman, will the gentleman yield?

Mr. CELLER. Yes.

Mr. SANDLIN. Does the gentleman expect to put into the RECORD those applications from the South?

Mr. CELLER. Yes.

Mr. SANDLIN. That the commission told the gentleman had been granted?

Mr. CELLER. The commission told me had been tentatively granted and in the ordinary course of time would be granted.

Mr. SANDLIN. What will the gentleman put into the RECORD with regard to station WKH?

Mr. CELLER. I will include in the enumeration all of the stations that the commissioners said had been tentatively granted but for which no formal orders had yet been made.

Mr. SANDLIN. Since my conversation with the gentleman I have talked with Judge Sykes, who is now in the gallery, and he tells me that they have not been tentatively granted.

Mr. CELLER. I do not want to get into a matter of veracity as between Judge Sykes and myself. I shall put into the RECORD what I was told and the contents of papers handed me.

Mr. SANDLIN. I want the RECORD to be straight on it.

Mr. CELLER. I shall put into the RECORD exactly what I told the gentleman from Louisiana.

Mr. SANDLIN. I want to get into the RECORD that Judge Sykes told me no such agreement had been made.

Mr. CELLER. The gentleman has it already in the RECORD.

Mr. VINSON of Kentucky. Will the gentleman put into the RECORD the names of those stations the commission told point blank there was no use to make application for increased power?

Mr. CELLER. I have no knowledge of such stations.

Mr. VINSON of Kentucky. I think that is the situation.

Mr. CELLER. I have no knowledge of it.

Mr. VINSON of Kentucky. I think the gentleman has very little knowledge of conditions in the country.

Mr. CELLER. I answer that I have no knowledge of that specific situation.

Mr. STOBBS. There have been so many tables floating around as to the reduction in the different States, I ask the gentleman the source of that table that he made.

Mr. CELLER. The Radio Commission.

Mr. STOBBS. And that is the final authority?

Mr. CELLER. Yes. I shall put into the RECORD for the benefit of the gentleman under leave to extend a discussion of the subject of vested rights of radio stations that existed prior to the coming into being of the Radio Commission, and I ask, gentlemen, if they want to know more about it, to read that Monday.

Mr. JONES. I ask the gentleman to discuss whether or not he thinks there is such a thing as a vested right in a monopoly?

Mr. CELLER. I shall be very glad to discuss vested rights; but, of course, there is no vested right in monopoly.

Mr. KENT. And I suppose the gentleman is in favor of a very good broadcasting station in Houston, Tex., is he not?

VESTED RIGHTS

Mr. CELLER. If anyone has used the ether for a period of time, he has a vested right to continue that use subject to regulation by the United States Government.

A study of the term "regulation" raises the question: Does the power to regulate include the power to prohibit? It is my opinion that it does not.

However, assuming that my opinion is incorrect and that the power to regulate does include the power to prohibit, my opinion, then, is that when the power to prohibit is enforced, just compensation must be given.

Congress for the first time assumed control of radio communication under its power to regulate interstate commerce by the act of 1912 (37 Stat. L. 302).

Section 1 of this act required the obtaining of a Federal license before engaging in radio communication. The act of 1912 proved inadequate and unsatisfactory, as the following cases will show:

> Under the law of 1912, the duty imposed upon the Secretary of Commerce in issuing licenses to operate radio stations was a purely ministerial one—the only discretion reposed in him was in selecting a wave length within the limitation prescribed in the act, which in his judgment would result in the least possible interference. (Hoover *v.* Intercity Radio Co., 286 Fed. 1003.)

In response to a letter from the Secretary of Commerce asking for a definition of his powers and duties under the act of 1912, the Attorney General of the United States, on July 8, 1926, replied that the act of 1912 did not confer authority upon the Secretary of Commerce to refuse applications for licenses, assign wave lengths, or limit power or time of operation (35 Opp. Atty. Gen. 126).

The new legislation to supply the defects of the 1912 law was approved on February 23, 1927, and is known as the radio act of 1927 (Public, 632, 69th Cong).

As was said at the beginning, Congress assumed control of radio communication under its power to regulate interstate commerce.

Quoting from Opinions of Attorney General, volume 35, page 128, we have the following:

> There is no doubt whatever that radio communication is a proper subject for Federal regulation under the commerce clause of the Constitution. (Pensacola Telegraph Co. *v.* Western Union, 98 U. S. 1, 9; 24 Opp. 100.)
>
> And it may be noticed in passing that even purely intrastate transmission of radio waves may fall within the scope of Federal power when it disturbs the air in such a manner as to interfere with interstate communication. (Minnesota rate cases, 230 U. S. 352.)

A very recent case holding that radio broadcasing is interstate commerce is that of Whitehurst *v.* Grimes, reported in Twenty-first Federal (second series), 787.

Section 1 of the act of 1927 made operation of a station unlawful without the obtaining of a new license, and this even though the station was operating under license granted under the 1912 act. Under the 1912 act, licenses were indeterminate as to time and revocable for cause. The new act did not declare a cause in ending them. It merely made further operation under them unlawful.

Section 11 of the act of 1927 reads in part:

> If upon examination of any application for a station or for the renewal or modification of a station license, the licensing authority shall determine the public interest, convenience, or necessity would be served by the granting thereof, it shall authorize the issuance, renewal, or modification thereof in accordance with such finding.

The commission thus grants or denies the application upon its determination as to whether or not public convenience, interest, or necessity will be served by the operation of the station.

The significance of these words when applied to the radio situation is rather vague. Not more so, however, I think, than when used in State statutes and applied to public utilities. They comprehend public welfare. (286 Ill. 582.)

There is one difference, however, between the radio act and State public utility laws: The radio act is directed in part against persons already engaged in commerce while the public utility laws of the States are mainly applied against persons preparing to enter commerce.

Taken by itself, requiring a license to engage in commerce is within the constitutional powers to regulate commerce. Colorado *v.* United States (271 U. S. 153).

Should the commission, however, refuse to issue a license to a station existing before the law, the question of vested rights of such owner arise.

It is the opinion of the writer that if anyone has used the ether for a period of time, he has a vested right to continue that use, subject to regulation by the United States Government.

This opinion is based upon a fair construction of the language of section 5 of the act of 1927, as deduced from a reading of

that section, together with a study of the history of this provision.

Section 5 provides that—

No station license shall be granted by the commission or by the Secretary of Commerce until the applicant therefor shall have signed a waiver of any claim to the use of any particular frequency or wave length or of the ether as against the regulatory power of the United States, because of the previous use of the same, whether by license or otherwise.

The history of this provision shows that on July 3, 1926, Congress passed Joint Resolution 125, which became law on December 8, 1926. This resolution provided that no license or renewal should be granted—

unless the applicant therefor shall execute in writing a waiver of any right or of any claim to any right, as against the United States, to any wave length or to the use of the ether in radio transmission because of previous license to use the same or because of the use thereof.

When the radio act of 1927 was enacted this resolution was specifically repealed by section 39 of the radio act, and the new language of section 5, quoted above, was substituted.

It will be noted that in the language of the joint resolution enforced prior to the radio act the applicant for a license had to sign a waiver of any right or claim to any right as against the United States, while in the new radio act now in force the waiver is as to any claim as against the regulatory power of the United States.

Under the language of the resolution it seems to the writer that the licensee would become a mere tenant at will of the Government, and that under the resolution the Government could at any time order him to desist; and if so, he would have no legal right to continue and would have no remedy other than his constitutional right to just compensation.

The language of the new radio act, however, modifies the provision of the resolution and merely says that the applicant for license must sign a waiver of right as against the regulatory powers of the United States.

I deem the language as modified by the act of 1927 to mean that the licensee is merely subject to "regulation" by the Government.

If a radio station has been established under the law of 1912, and its license has not been revoked "for cause" as provided for in that act, it would seem to the writer that he would have a vested right to continue to use the ether under the new 1927 act, subject only to the regulatory power of the United States.

I am of the opinion that Congress under section 5 can subject the station owners to any reasonable regulations deemed necessary for the public welfare, but that it can not arbitrarily abrogate all privileges.

The radio act of 1927 is intended to be a regulatory and not a prohibitory measure.

The title of the radio act reads:

An act for the regulation of radiocommunications, and for other purposes.

The constitutional authority vested in Congress under the commerce clause is to regulate interstate and foreign commerce—of which radio is a part—not to prohibit it.

The right of Congress to prohibit commerce absolutely as a phase of regulation has been before the Supreme Court in a number of cases. The court stated in several decisions that the power to regulate includes the power to prohibit entirely. In accordance with this principle, it upheld acts of Congress prohibiting the transportation of lottery tickets (the Lottery case, 188 U. S. 321) and the food and drugs act prohibiting the transportation of impure foods and drugs (Hipolite Egg Co. *v.* U. S., 220 U. S. 45).

It was this absolute power of prohibition which was relied upon to support the child labor law prohibiting the transportation in interstate commerce of certain classes of drugs manufactured by child labor.

But in its opinion declaring the child labor law unconstitutional (Hammer *v.* Dagenhart, 247 U. S. 251, 271) the court differentiated the cases above referred to. The contention was made that they established the doctrine that the power to regulate includes the authority to prohibit the movement of ordinary commodities. The court, however, said that the contrary was the fact, since these cases rested upon the character of the particular subjects dealt with; that in each of them the use of interstate transportation was necessary to the accomplishment of harmful results; and that proper regulation of interstate commerce could be brought about only by prohibiting the use of its facility to effect the evil intended. The court proceeded to say that neither was such a purpose disclosed by the act under consideration, nor was the character of the article transported such as to make prohibition necessary.

There was a very strong dissent, based mainly upon argument that the power to regulate is absolute, the power to prohibit necessarily included within it, and that it is for Congress alone to determine the propriety of its exercise.

This decision is not a denial of the complete power of Congress to regulate interstate commerce. It is a holding that in the exercise of that power Congress must confine itself to regulation, and may not, under the cloak of regulation, grasp powers not delegated.

The above quotation is quoted from pages 72 and 73 of Mr. Stephen Davis's book on the Law of Radio Communication, 1927. Mr. Davis is Solicitor of the Department of Commerce.

Assuming, however, that the power to regulate does include the power to prohibit, the station owner can still stand upon his constitutional rights and maintain that the commission in revoking his license is taking private property without just compensation, in violation of the fifth amendment to the Federal Constitution.

If a license for an existing station is refused, the commission would not take the property of the owner, in the sense of an actual physical seizure. It would still remain in the possession of its owner, even though the value of the property would be practically destroyed—it might be thus contended that the constitutional provision against taking private property without due process has been avoided.

The only value of property lies in the use that may be made of it. It may be said generally that the forbidding of an individual to use his property is equivalent to a taking of it, and that deprivation of use violates the constitutional guaranty to the same extent as would an actual physical seizure or destruction of the property itself. The Supreme Court of the United States has expressed itself on the general subject as follows:

It would be a very curious and unsatisfactory result if in construing a provision of constitutional law, always understood to have been adopted for protection and security to the rights of individuals as against the Government, and which has received the commendation of jurists, statesmen, and commentators as placing the just principles of the common law on that subject beyond the power of ordinary legislation to change or control them, it shall be held that if the Government refrains from the absolute conversion of real property to the use of the public, it can destroy its value entirely, can inflict irreparable and permanent injury to any extent, can, in effect, subject it to total destruction without making any compensation, because in the narrow sense of that word it is not taken for the public use. Such a construction would pervert the constitutional provision into a restriction upon the rights of the citizens, as these rights stood at the common law, instead of the Government, and make it an authority for invasion of private right under the pretext of the public good, which had no warrant in the laws or practices of our ancestors. (Pumpelli *v.* Green Bay Co., 13 Wall. 166, 177. See also Chicago Board of Trade *v.* Olsen, 262 U. S. 1; Village of Euclid *v.* Ambler Realty Co., 47 Sup. Ct. 115; Corneli *v.* Moore, 267 Fed. 456.)

The above quotation is quoted from page 68 of Mr. Stephen Davis's book on the Law of Radio Communication, 1927.

The Supreme Court of the United States has declared the rule as to the necessity for compensation in the following language:

"If in the execution of any power, no matter what it is, the Government, Federal or State, finds it necessary to take private property for public use, it must obey the constitutional injection to make or secure just compensation to the owner. (Cherokee Nation *v.* Southern Kansas Ry., 135 U. S. 641, 659; Sweet *v.* Rechel, 159 U. S. 380, 399, 402; Monongahela Navigation Co. *v.* United States, 148 U. S. 312, 336; United States *v.* Lynch, 188 U. S. 445.) * * * Upon the general subject there is no real conflict among the adjudged cases. Whatever conflict there is arises upon the question whether there has been or will be in the particular case, within the true meaning of the Constitution, a taking of private property for public use. If the injury complained of is only incidental to the legitimate exercise of governmental powers for the public good, then there is no taking of property for public use, and a right to compensation, on account of such injury, does not attach under the Constitution." (Chicago, Burlington & Quincy Ry. Co. *v.* Drainage Commissioners, 200 U. S. 561, 593.)

The American Bar Association made an interim report on radio legislation in December, 1926. It discussed the bills then pending in Congress with particular reference to the constitutionality of refusing licenses to existing stations without affording compensation. It urged the inclusion of provisions which would compensate the owners of stations so closed, the money necessary to be derived from a tax on those licensed. In support of that suggestion the committee said:

* * * To close stations in which large sums of money have already been invested is obviously a drastic provision. We do not believe that the courts would uphold as constitutional legislation which permitted such closing, either directly or indirectly, by way of declining to issue new licenses, unless just compensation were paid * * *. The committee believes its suggestion is sound in law for the following reasons:

"a. The 1912 statute permitted everyone to obtain a license. As we have stated before, the Secretary had no discretionary power and he could be mandamused to compel the issuance of the license. The licenses were not for any stated term and could be revoked only for frauds. The companies with established business under such a situation had a right to believe that their investments could not be destroyed by the mere repeal of the 1912 law * * *.

"c. The obligation of the Federal Government to pay just compensation for closing an existing radio station was recognized in the joint resolution of July 16, 1918, which permitted the President to take over radio stations during the time of war, but only upon payment of just compensation. It is to be noted that even when this power was repealed, on July 11, 1919, the compensation provisions were specifically continued.

"d. The committee sees no newer constitutional authority for depriving the citizens of property rights under the pending legislation than was included under the 1912 legislation."

The above quotations are taken from pages 66, 70, and 74 of Mr. Stephen Davis's book on the Law of Radio Communication, 1927.

It is therefore fair to assume that the Radio Commission would not have the right to take away the power, to any great extent, of a station, if that taking away would destroy the general utility or purpose for which the station was erected, unless compensation were provided. You can not say that by destroying the use of the station you do not destroy the station. If you take away the use, you take away the property. This can not be done without compensation. I do not sympathize personally with these conclusions, but they are conclusions nevertheless, which are inescapable.

PROGRAMS

The charge has often been made that jazz so fills the air as to drown out better class of music and educational features, and that New York stations primarily give the country nothing but jazz. I deny this. An examination of the better stations in New York, for example, will show that the program is varied and appeals to all tastes, and that jazz does not predominate. I shall herewith insert the events on the air for to-day, Saturday, March 10, for stations WEAF, WJZ, and WOR. I have taken this information from to-day's New York Times:

WEAF

6.45 a. m.: Tower exercises.
8: Federation devotions.
8.15: Parnassus Trio.
8.30: Cheerio; talk; music.
10.45: Hoyle Trio.
11: Elizabeth Hilyer, soprano.
11.15: Household talk.
11.30: S. Selkowitz, piano.
11.45: Talk, Grace Smith.
12 m.: Elizabeth Hilyer, songs.
12.15 p. m.: Virginia Dudley, soprano.
12.30: G. O'Connor, ukelele.
12.45: Waldorf-Astoria Orchestra.
1.45: Foreign Policy Association luncheon; Oil, its international complications. Speakers: Herbert Feist, Henry K. Norton.
3.30: Parnassus Trio.
4.30: Blind Association talk.
5: Fisher Orchestra.
6: Waldorf-Astoria music.
7: South Sea Islanders.
7.30: Statler's Pennsylvanians.
8.15: Intercollegiate Glee Club contest.
11: Park Central Orchestra.

WJZ

12.30 p. m.: Park Central music.
1.30: Winegar's Orchestra.
2.30: Weather reports.
2.35: Venetian Gondoliers.
3.30: The Tennesseeans.
4.30: Tea Timers.
5.15: Savoy tea music.
6: Manger Orchestra.
6.55: Summary of programs.
7: Longines time; Norman Hamilton, poems.
7.15: Astor Orchestra.
8: RCA hour; New York Symphony Orchestra.
9: Philco hour; Gypsy Love.
10: Longines time; Keystone Duo, with balladers.
10.30: Dorothy Howe and the Merry Three.
11: Slumber music.

WOR

6.45 a. m.: Colgate hour.
8: Sessions chimes; news; reports.
2.30 p. m.: Play—Violin Maker of Cremona.
3: Sessions chimes; Betty Goodman, soprano.
3.15: Ben Gordon, tenor.
3.30: Roseland tea music.
6: Radio Students' Clinic.
6.15: Shelton Ensemble.
6.40: Something about everything.
6.45: The Happy Girl.
7: Shelton Ensemble.
7.30: Levitow's dinner dance.
8: Sessions chimes.
8.01: Interview—John V. A. Weaver.
8.15: Modern Meistersingers.
8.45: H. Hedden, piano.
9: Bamberger Little Symphony.
10: Saturday's Children.
10.45: Roseland Orchestra.
11: News; weather.
11.05: Roseland Orchestra.
11.30: The Witching Hour.

Now, I insert to-morrow's (Sunday) radio programs of these three stations. These programs speak for themselves. There is not one item of jazz on the Sunday programs:

WEAF

1 p. m.: Chamber music.
2: Interdenominational Church; speaker, Dr. William H. Pephart.
3: Young People's Conference; How to Be Born—Dr. D. A. Poling.
4: Men's Conference; Youth and Its Problems—Dr. S. Parkes Cadman.
5.30: Acousticon hour; old-time musicale.
6: National Symphony Orchestra.
7: Francis Paperte, soprano.
7.20: Capitol Theater musicale.
9: Our Government—David Lawrence.
9.15: Howard time.
9.16: Atwater Kent hour; Richard Crooks, tenor; double male octet.
10.15: Biblical drama, Judas Iscariot.

WJZ

9 a. m.: Children's hour.
1 p. m.: Gold Strand hour.
2: The Roxy Stroll.
3: Jospe Woodwind Ensemble.
3.30: Devorney Nadworney, contralto; Herbert Borodkin, viola.
3.55: St. George's vespers; Harry Burleigh, spirituals.
5.30: National religious service—Rev. Harry Emerson Fosdick.
6.30: Cook's travelogue—Southern Italy; time; summary.
7: Aeolian organ recital.
7.30: Vocal duets.
7.45: Lenox string quartet.
8.15: Collier's hour; talk—Lieut. Commander Sloan Danenhower, Submarine Rescue and Salvage Devices; symphony orchestra.
9.15: Paula Heminghaus, contralto.
9.30: Vibrant melodies.
9.45: Arion male chorus; time.
10.15: Don Amaizo, musical sketch.

WOR

3 p. m.: Judson symphonic hour.
4: American singers.
4.30: United Military Band.
5: Garden talk—H. S. Ortloff.
7.45: Evening musicale.
8.45: Randall Hargreaves, songs.
9: Emerson hour.
9.30: With the masters.
10: Cathedral hour.

While Saturday's program contains several orchestras, they are of the higher type.

If the Davis amendment goes into effect programs would grow flat and uninteresting. Take away unduly station power from New York, Philadelphia, Chicago, and Pittsburgh and you prevent a national program. The center of musical art is in New York. There is located the Metropolitan Opera Company, the Philharmonic Orchestra, New York Symphony Orchestra, string quartettes of international renown, and so forth. New York thus readily provides the highest type of radio entertainment. The other evening I heard over the national broadcasting chain a condensed version of Verdi's opera, La Traviata, with Bori, Gigli, and De Luca, three of the famous Metropolitan Opera House singers. It was one of the most exquisite renditions I have ever listened to. It was heard all over the country. Destroy the high-powered stations in the large cities and

you make impossible the broadcasting of such an opera. It is difficult to understand how the country would be able to hear the President's message or the important speeches of the candidates in the coming presidential campaign without large-powered stations.

Complaint is made about indirect advertising and how merchants and producers foist their wares by indirect advertising on the radio public, but this can not be helped. It is one of the disadvantages inherent in the situation. Nearly all broadcasters lose money. Only by selling time to advertisers may they recoup some of their losses. On the other hand, some of the most beautiful programs have been given us under the auspices of national advertisers, to wit, the Edison hour over WRNY, the Atwater Kent hour, and the Victor Talking Machine hour, and many others.

The CHAIRMAN. The gentleman from New York has one minute remaining.

Mr. CELLER. Mr. Chairman, I yield back the balance of my time.

Mr. DAVIS. Mr. Chairman, I yield five minutes to the gentleman from North Carolina [Mr. ABERNETHY].

Mr. WHITE of Maine. And I also yield to him five minutes.

The CHAIRMAN. The gentleman from North Carolina is recognized for 10 minutes.

Mr. ABERNETHY. Mr. Chairman and gentlemen of the committee, I hope gentlemen will give me their attention, because I see we are favored this afternoon with the presence of the members of the Radio Commission of the United States. They are up in the gallery, and I am very glad they are here to hear this discussion. I, for one, have nothing to say against any individual member of the commission. As a matter of fact, they have promised me in my section about what we wanted. Whether or not we get it is, of course, something to be determined in the future. [Laughter.] Some of the members are not confirmed and some are, so I do not desire, with the Radio Commission present, to make any fling at any one of them individually. I want to say, so far as the member of the commission who represents the South is concerned Judge Sykes—that I have the very highest respect for his ability and his integrity. But the trouble is, gentlemen, that Judge Sykes is the only man who has been confirmed; and what fight could he alone make against the great Empire State of New York when they are seeking so much and making so much noise? [Laughter.]

Talk about pie. That is a very comprehensive word.

Mr. DENISON. What kind of pie?

Mr. ABERNETHY. The gentleman from Maine [Mr. BEEDY] talked about pie. Now, let us see what Maine gets. I am not sure if he is in the Chamber at this time. If so, he might raise an issue between the North and the South. [Laughter.]

Mr. BEEDY. I said I thought that in the division of the pie I should favor the children, because as they are growing up they need more pie. [Laughter.]

Mr. ABERNETHY. You get 850 watts and New York gets 162,000 watts. How will you have an equitable division in a case like that?

Mr. BEEDY. New York makes so much noise that the receiver can not get in on a program.

Mr. ABERNETHY. I have a constituent who has never been in New York, and he once said he would be damned if he believed there was any such place. [Laughter.] That, of course, was before the day of radio.

Maine gets 850 watts; New Hampshire gets 650 watts; Massachusetts, a little more favored, gets 19,565, and that is less than Massachusetts is entitled to under the amendment proposed by the committee. Connecticut gets 2,100. Rhode Island gets 2,750. New Jersey, the home of our friend Mr. LEHLBACH, gets 17,280, but they do not seem to be asking for any more because they are under the protecting wing of the great Empire State of New York. Little Delaware, a very small State, gets 100 watts. Maryland gets 5,700. The District of Columbia gets 11,750, and poor Porto Rico gets 500; while New York, with 63 stations, gets 162,500 watts. That is the first zone.

I do not blame the gentleman from New York for wanting to keep all the pie. They not only want that pie, but from the way they are agitating throughout the country, they apparently want more pie. [Laughter.]

Mr. HOUSTON of Hawaii. How much does Hawaii get?

Mr. ABERNETHY. I do not think you get anything.

Mr. HOUSTON of Hawaii. Then I am not for that amendment. [Laughter.]

Mr. ABERNETHY. Mr. Chairman and gentlemen, there is nothing unfair in the Davis amendment. Mr. DAVIS is a man for whom Congress has great respect and admiration, and I commend the speech he made on March 5 on this great subject. And, in passing, I want to pay a tribute to the chairman of this committee [Mr. WHITE], the gentleman from Maine. [Applause.]

I am a new member on the Committee on the Merchant Marine and Fisheries. Like the gentleman from Oklahoma [Mr. MCKEOWN], I never was in favor of giving this control of the air to a commission; but, following the leadership of men like Mr. WHITE and Mr. DAVIS, and understanding that there was confusion in the air and that it needed some regulation, they put me to sleep. It would not have made any difference whether they did or not; they passed the bill. [Laughter.]

Now what have we? We have the chairman of the Committee on the Merchant Marine and Fisheries fighting for this amendment. Why? Because he is a fair man and wants to keep faith with this House. He wants to keep faith with the country at large. He is not in favor of two or three big stations controlling all the power and sending out radio at $6,000 an hour for Lydia Pinkham's remedy and Pink Pills for Pale People. That is what you have now. Yes; and Wrigley's chewing gum, and Smith's cough drops, and Silver Cord tires, and occasionally David Lawrence gets on the air.

I was down in my home town the other day and my boy had bought a radio set, and I was trying to get some stations. I had heard of one that Mr. DAVIS had over in Tennessee, and I started at zero and went as far as the dial went, and every time I got on the dial I would hear about Lydia Pinkham's remedy and pink pills for pale people, and I never did get Judge DAVIS's station, and I do not really believe he has one at Nashville. [Laughter.]

Mr. CELLER. Does the gentleman think that the radio station can be kept going without this advertising?

Mr. ABERNETHY. I will say to the gentleman that the Governor of North Carolina asked the Members of the House from North Carolina to vote down the amendments offered by the gentleman from Oklahoma [Mr. MCKEOWN] and the gentleman from Tennessee [Mr. DAVIS] on the assurance that North Carolina would get consideration. We have one little station in the city of Raleigh that has 500 watts, and we have been promised 500 more, with the suggestion that probably the time might be divided. I think that if Judge Sykes has the power given to him he is going to make a fight for us; but the trouble is he can not make it if you do not give him the power. Just write this Davis amendment in here and divide this power equally between the five zones.

Take the great western country. The fifth zone has only 61,785 watts, while one station alone in New York has 50,000 watts. That is the situation with reference to the whole western coast, and I am talking to you men from that western country. Now listen. Zone 4 has 164,870 watts while the State of New York alone has 162,500 watts. The southern zone, the third zone, has 47,000 watts, and second zone has 106,000 watts.

Now, gentleman, nobody wants to cut down the power. Nobody wants to destroy these big stations; nobody wants to take away from the people their right to hear jazz, but we want this commission to understand that as far as the balance of the country is concerned that it has the direct mandate from Congress that when we write a radio law that there shall be an equal distribution throughout the country that they should meet that, and not come here and say they can not do it, and they should not fill the papers full of aspersions against Congress, as some of them have done, and I do not refer to Judge Sykes, either. [Applause.]

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. CLANCY. Mr. Chairman, I yield five minutes to the gentleman from Massachusetts [Mr. TREADWAY].

Mr. TREADWAY. Mr. Chairman, this proposed legislation seems to me to be again an example of the conflict between theory and practice. For one I am for practice in preference to theory. Unless section 4 is in some way taken out of this bill—and that section, as we all know, calls for an equal allocation—I shall be opposed to the whole bill. Rather than see that section adopted I would prefer that we go back to the old method of having radio under the Department of Commerce.

In addition to that, it seems to me that the suggestion of the continuation of a failure is a poor policy. Whatever the excuses may be, it is a well-recognized fact that the Radio Commission as such has been a total failure. One need but read the report of the committee submitted with this bill to be convinced of that fact. It can not function, and has but one member legally authorized to act, but you are asked to continue in office for another year, in order that it may try to make good, an organization that we all know has not made good.

Besides that, I think it is a great mistake to have temporary control over a permanent job. Radio has come to stay in this

world, and yet here we propose to continue an organization for one year only in order to care for a permanent proposition that ought to be in the hands of a permanent bureau or department. Therefore I think if it were practical we ought to start at the beginning and do away with this so-called commission and put radio control into the hands of some definite and permanent organization of the Government.

Further than that, I am not one of those scared by the talk of monopoly or big business. The people of this country to-day do not care a continental how radio comes to them or who is providing it for them, so long as they get it.

As a listener-in and not as a scientific student of the subject I am convinced that the only way to get results is through the large stations. It is a favorite pastime of this House to talk about monopoly and big business, but big business, whether in the form of the corporations that have put large sums of money into the establishment of these stations or in the form of concerns that are buying the time of those stations and employing the highest-priced talent, is giving results to the people of the country, and that is what the people want.

We did suppose that under the control of the commission confusion on the ether would be done away with, but let anyone listen in to-night and see whether they have accomplished anything in the way of doing away with confusion.

Therefore I can see no object whatever in trying to bring about the equal distribution of wave lengths or anything else having to do with radio. These big companies are giving service to the people, and when I say "giving" I mean just what the word "giving" means—they are giving the service absolutely without charge. There has been no way yet discovered that I have heard of whereby the listener-in can be charged for that service, and until that time does come the great corporations and the large purchasers of time should have the privilege and the right to distribute free to the people of this country the best concerts and the best intelligence they can get, and that is the only way we can get them. I am therefore opposed to the equalization clause in this bill.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. WHITE of Maine. Mr. Chairman, may I inquire of the gentleman from Michigan how many other speakers he has?

Mr. CLANCY. Mr. Chairman, the chairman's side has 70 minutes remaining.

Mr. WHITE of Maine. Oh, no.

Mr. LEHLBACH. Will the gentleman yield?

Mr. WHITE of Maine. Yes.

Mr. LEHLBACH. I made an inquiry of the timekeeper and found that the gentleman from Maine [Mr. WHITE] has 40 minutes and the gentleman from Tennessee [Mr. DAVIS] 30 minutes. That leaves 70 minutes for the proponents of this proposition. Those opposed to this proposition have a total of 38 minutes remaining, so that the proponents have almost twice as much time remaining as those who are opposed to the proposition. Now, it seems to me to be fair and equitable that we should not be called upon to use any more time until the time is more nearly equal.

Mr. WHITE of Maine. The gentleman's statement is interesting and I take it to be true, but it is not responsive to the question I asked. I wonder if the gentleman would indicate how many speeches he has on his side yet to be made.

Mr. LEHLBACH. Will the gentleman again yield?

Mr. CLANCY. Yes.

The CHAIRMAN. The Chair would like to inquire whose time is being used.

Mr. LEHLBACH. No time is being used because this is on an inquiry directed to the Chair as to the time.

The CHAIRMAN. The statement of the assumption as to time is correct.

Mr. LEHLBACH. The proponents of the bill have 32 minutes more than those who are opposed to it. It is now 23 minutes after 4 o'clock. When the 32 minutes are used, it will be five minutes of 5 o'clock. So it is obvious that the opponents of the bill have no more speeches this afternoon.

Mr. WHITE of Maine. Mr. Chairman, it is true that I have at my control 40 minutes. It is also true, I believe, that the gentlemen opposed to the bill on this side have 32 minutes.

Mr. CLANCY. Thirty minutes.

Mr. WHITE of Maine. I wonder if we could arrange it so that if I utilized 10 minutes now the gentleman would utilize some more of his time?

Mr. LEHLBACH. Mr. Chairman, it is not a matter of how the time is divided on this side of the aisle, but how the time is divided between the opponents in the committee here and the proponents in the committee here. That is the only way to look at it, and that is 70 minutes on one side and 38 minutes on the other.

Mr. WHITE of Maine. Is the gentleman willing to use some of his time at this time?

Mr. CLANCY. No.

Mr. WHITE of Maine. Does the gentleman from Tennessee desire to use some time now?

Mr. DAVIS. I can yield time now.

Mr. DENISON. If the gentleman will permit, if nobody wants to talk, why not go ahead and read the bill?

Mr. GARRETT of Tennessee. Is the gentleman agreeable to a suggestion?

Mr. WHITE of Maine. I would be very happy to have one.

Mr. GARRETT of Tennessee. It is now 4.25 and lacks 35 minutes of the usual time for rising, and this is Saturday——

Mr. WHITE of Maine. I accept the suggestion. I had it in mind myself to move that the committee rise, but I will withhold that motion for a few moments. I understand the gentleman from Tennessee wants to utilize some of his time now and I give notice that at the termination of the next speech I will move that the committee rise.

Mr. DAVIS. Mr. Chairman, I yield 10 minutes to the gentleman from Virginia [Mr. BLAND].

Mr. BLAND. Mr. Chairman and gentlemen of the committee, I should not ask to go on this afternoon except for the possibility that I can not be here Monday and I should like to make some suggestions as to this legislation.

I think we ought to approach the consideration of this legislation with a realization of the fact we are dealing with one of the most important matters that can come before the Congress for its consideration at this session. The mere question of extending the life of the commission or of writing this amendment into law might not itself be so important, but we are dealing, gentlemen, with an art, the extent of which, the scope of which, the far-reaching effect of which, we can not realize now, and of which we have absolutely no comprehension.

When we pick up the daily newspapers and see that upon some wave bands pictures are radioed across the ocean; walk down our streets and see cars moved—as we have within the last few days—by the application of radio; when we go to the newspapers and see the statement that there are inventions that will permit the lighting of houses, the cooking of our food, and the use of power in various directions, we must realize, gentlemen, that we are dealing with something more than the mere matter of transmitting a jazz program over the radio for the entertainment of a temporary audience.

We are dealing with an art that the commissioner, the only commissioner who has been confirmed, Judge Sykes, says is so rapidly changing and so far-reaching that he can not, and we can not, tell what changes may be brought forth in the course of a year.

At the hearings Judge Sykes said:

> I do not think that any of us can possibly say what another year will bring forth in radio. It is developing so very rapidly that I would hate to attempt to prophesy what the conditions would be in another year.

Realizing that, this Congress wrote into law in the dying or closing days of the last Congress provisions to the effect that there should be assignments and allocations that would be equitable. Section 9, among other things, said:

> In considering applications for licenses and renewals of licenses, when and in so far as there is a demand for the same, the licensing authority shall make such a distribution of licenses, bands of frequency of wave lengths, periods of time for operation, and of power among the different States and communities as to give fair, efficient, and equitable radio service to each of the same.

This language is contained in the existing law, but what is the situation? We find that in the interpretation of this language two lines of thought have arisen in the commission. The one line of thought, as expressed by Commissioner Sykes, was in direct accord with the views that were expressed on this floor, in the committee, and in the Congress at the time the law was enacted. But there is another interpretation that has come into the commission, the interpretation for which Commissioner Caldwell, of New York, would appear to stand, and that interpretation is in favor of high-powered stations and is in favor of equitable service as read only in the light of service to the listener.

Judge Sykes, at the hearings, said:

> Now, there is some difference of opinion as to the construction of that particular clause of the act. A great many people for whose opinions I have the highest regard and respect, eminent lawyers, have this idea, as I understand, of that clause of the law—that if a State

and a community in a State are getting good radio service from stations in other States, then that State and community are getting good radio service; and, therefore, that State or community is being served and, as a State or community in a State, is not entitled to a radio station. That is not my opinion of this clause of the law. My opinion of that clause is it means it was put there to give to the States their pro rata quota of radio stations and to communities in States, and that has been my insistence as a member of the Federal Radio Commission on the construction of that section of the law.

Commissioner Caldwell's views are illustrated in his answer to an inquiry by Judge DAVIS if it was his idea that whatever power would be employed should be equitably distributed or that it should be concentrated at a few places. Commissioner Caldwell said:

Certainly, from the standpoint of giving purely radio service and good radio service to listeners; that is my understanding of the purpose of the law and is the basis on which I have worked on the commission. I feel that both must be considered. There is a place for the relatively high-powered station and there is also a place for the local station rendering a local service.

Commissioner Caldwell's interpretation of the law is further evidenced by his answer.

I believe it will be in the public interest to have at least four or five high-powered stations on the chain, widely distributed geographically. In other words, there is a proper use for the high-powered chain station on the air, one around Chicago, one in the Southwest, and perhaps one in the South, because this commission has undertaken through these chains to bring to every home in America a clear program, and as long as we have merely local stations such clear programs are impossible.

According to the interpretation that if programs reach all listeners, equitable service is provided, if the listener in Tennessee, if the listener in Texas, if the listener in Georgia, if the listener in Missouri, if the listener in the West is able to get a jazz program, if he is able to get something put on by a high-powered station in New York he has obtained the equitable service to which he is entitled under this act. That is the necessary and logical deduction that follows from the interpretation which the commissioner has given.

That interpretation not only comes as an expression from him but it comes by the operations of the commission itself. The result is that this committee, in the consideration of this question, has determined that the commission shall recognize that in radio as in law, equality is equity, and we have written that into the law.

Gentlemen, bear in mind another thing that the interpretation complained of will result in building up in this most important art one of the most enormous monopolies that has existed in the history of this Republic. First, let me call your attention to the fact that there is to-day pending in the Federal courts of this country an action instituted on behalf of the Federal Trade Commission seeking to bring to bar the Radio Corporation of America, the General Electric, and the Westinghouse companies on a charge that they have pooled their patents in violation of the law against trusts and monopolies. The evidence shows that the National Broadcasting Co. is organized and owned by the Radio Corporation of America, the Westinghouse, and General Electric. According to the evidence, the high-powered broadcasting stations cause the greatest interference. They are more far-reaching than any other station. Commissioner Sykes said:

The greater the power, of course, the more interference you have from the carrier wave.

Commissioner Caldwell supported this view. What is the situation? We have KDKA, a Westinghouse station, at Pittsburgh, Pa., with 50,000 watts. WEAF, of New York City, owned by National Broadcasting Co., with 50,000 watts; WGY, of Schenectady, N. Y., owned by the General Electric, with 50,000 watts; WJZ, of Boundbrook, N. J., owned by the National Broadcasting Co., with 30,000 watts; and WGN, an independent station at Chicago, with 50,000 watts. These are in a congested section, and yet in other sections of the country there is very low power. We contend that this is not equitable distribution. We contend that if this congested area will bear this and other wattage, surely other sections can be increased.

Mr. CELLER. Will the gentleman yield?

Mr. BLAND. I will.

Mr. CELLER. With reference to the national program in the presidential campaign and the high-powered stations——

Mr. BLAND. I can conceive that certain national programs might be exceedingly dangerous at times to any party. More than that, I can conceive that the high-powered station monopoly might pass into the hands of propagandists for propaganda purposes, and into the hands of special interests for the advertisement of particular commodities. Favored interests thus afforded an exclusive opportunity to advertise their goods in all sections of the country could work a great injustice to the more local commerce in different sections of the country. [Applause.]

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. WHITE of Maine. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON having taken the chair as Speaker pro tempore, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes, and had come to no resolution thereon.

PERMISSION TO ADDRESS THE HOUSE

Mr. GREEN of Iowa. Mr. Speaker, I ask unanimous consent that at the conclusion of the disposition of a matter which the gentleman from Illinois [Mr. DENISON] has, the gentleman from Florida [Mr. GREEN] be permitted to address the House for one minute.

The SPEAKER pro tempore. Is there objection?

There was no objection.

THE AGRICULTURAL SITUATION

Mr. WILLIAMS of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the agricultural situation.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. WILLIAMS of Missouri. Mr. Speaker and Members of the House, agriculture is the basic industry of the Nation, and the farmer was the pioneer in the field of material progress and development. In the beginning he tilled the soil and raised, garnered, and threshed or cribbed the grain; he milked the cows and made the butter and fed the chickens and gathered the eggs; he raised the hogs and did his own butchering; he built his own house, crib, and stable with the aid of his neighbors; he sharpened his own plows and shod his own horses; he mended, and often made, his own shoes; the wife carded the wool and spun the yarn and wove the cloth and made the garments for family use. The man on the farm and the good housewife did it all. They were the ones who were subjected to the hardships and dangers of pioneer life. The ones who cleared the forests and built the cabins. The ones who endured privations and hunger and disease and want. They blazed the trail; they were the pathfinders.

As settlements were formed and communities grew division of labor and diversity of employment came. There grew up the blacksmith, the carpenter established himself, the weaver set up his loom, the cobbler built his shop and the trader his store. Out of these and other primitive forms of endeavor have developed the highly complex and complicated industrial, commercial, and financial system of the present. In their place immense and highly technical and intricate industrial plants have been established. Great entangling webs of commerce, transportation, and communication have been extended. A massive, involved, and difficult system of credits and finance has been developed. Labor has become highly efficient and discriminating. The specialist has acquired a degree of skill and dexterity that is little short of miraculous. It is said that there are 185 distinct operations in the making of a shoe. While the farmer has advanced from his primitive stage and now enjoys many comforts and some of the luxuries of life, he has not been able to keep up with the procession. A little while ago he was the leader in the business, financial, social, and political affairs of the country, but now he has dropped behind. Notwithstanding the fact that he was the pioneer in the field, that his occupation was the original, basic, fundamental one from which all others emanated and grew, in spite of all that he has been outstripped in the race. The parent industry remains attached and tied to the soil. The dominant, basic industry, the one to which Washington and Jefferson retired in their declining years, has been overshadowed by the others. In the swirl of these intricacies and complexities the farmer has been lost, and his voice can not be heard above the babble of the markets and the clanging and the shrieking of the shops.

While there has been a great increase in the wealth of the country in the period from 1920 to 1925, it is estimated that the value of farm lands and products has fallen off $30,000,000,000. In my own State of Missouri there are over 2,000,000 acres less in farm lands than there were in 1920, while the value of farm property has depreciated 36 per cent. Farm-mortgage indebtedness has increased, wages are higher, taxes are more, transportation rates have grown, and the purchasing power of the

farmer's dollar has fallen far below par. He is the only one in the scheme of things that pays the freight both ways and has nothing to say about the price which he receives for the products he sells or for the goods which he buys. If he takes a basket of eggs or a few pounds of butter or a half dozen chickens to a country or town store to sell, he inquires of the clerk in the store how much he is paying for the articles mentioned. The clerk consults the prices given in the daily paper—prices fixed by men and conditions in the centers of trade over which the farmer has no control and with which he has nothing to do—and the clerk then tells the farmer that he will receive a certain per cent below the market price for his goods, which price the farmer must take. Then if the farmer wants to purchase a pair of overalls, a garden rake, or a few pounds of sugar, the clerk again hands out the price which is fixed thousands of miles away without any thought or consideration for the farmer. If the farmer should chance to have a carload of hogs or hay or wheat to sell, he pays the freight on his products to their destination—a freight fixed by the railroad under the direction of the Interstate Commerce Commission—and unloads them upon a market fixed by commission merchants, boards of trades, or other agencies unknown to the farmer. He must accept the price fixed by them. He then wants to buy a binder or a mower. He goes to the dealer and there pays a price fixed by some one in some way unknown to the farmer, and then pays the freight on the machine when it is delivered at the railroad station.

In the last few years laws have been enacted with special reference to and in aid of other groups of our population and other industries and institutions. The railroad act of 1920 practically insures the railroads of the country a net income of 6 per cent on their investment. It provides a revolving fund out of which money may be taken to aid the weaker and, it may be, the poorly managed roads. Under this law during the last three years the railroads have been prosperous. They may fix the rates at such a price as to insure an adequate income to them, and the farm pays it. It is necessary to establish and maintain the railroads of this country on a stable and a secure basis, and to make our transportation system ready, secure, and efficient. No one would urge that it be crippled or handicapped. But what about the farmer?

The Federal reserve bank act, the greatest piece of financial legislation in all time, created the Federal Reserve Board, with large powers over the contraction and expansion of currency and credit and the establishment of interest rates. This board in a great measure controls the banking policy and the financial condition of the country. While the farmers have shared in the general benefits derived from this law, it was enacted primarily for the purpose of regulating and benefiting the banking interests of the country, and has been so used. I would not detract from the beneficent results flowing from its operation. But why not a law having the interest of the farmer in view?

In recent years labor as a group has secured beneficial legislation. Employment bureaus have been established, a Labor Board for the settlement of labor disputes has been created. Strict immigration laws have been enacted, laws which prevent the inflow of foreign labor to be brought into competition with American labor. Labor needed these laws. Everybody except the most case hardened is glad that we have them. Even with these laws unemployment is great and labor conditions are not good in many places. These laws may not have brought complete relief but they have been helpful and were enacted in the interest of and at the suggestion and solicitation of labor. Farmers are now asking relief. What shall we do?

The Government created the Shipping Board to establish, maintain, and operate a merchant fleet to carry on our commerce and transport our goods to the ports of the world. Under that act we have maintained and increased our commerce with the nations of the earth. Whatever is our final policy, whether the Government shall maintain and operate our merchant marine or whether it shall be owned and maintained by private enterprise, it will be done at great expense to the Government. If our commerce is to be maintained, if our goods are to be carried in American vessels and our flag kept flying on the sea, then Government aid must be had. Everyone is in favor of securing our trade relations and developing our merchant marine, even to the extent of special legislation along that line, but why not give some special attention to the farmers' needs?

Many of the industrial concerns, the great factories of the country, are enjoying the benefits of special legislation in the form of a high protective tariff. They are operating behind a high legislative wall of protection, which prevents them from coming into competition with the outside world and which enables them to charge exorbitant prices for their products and accumulate inordinate profits. It is generally conceded that our present tariff law is a detriment to the farmer in two respects. In the first place it has hampered the foreign market of the American farmer by reducing its purchasing power. The tariff is so high that none of the foreign nations can sell their goods here. If they can not sell their goods, they can not buy the farmers' products. By excluding their goods from our market we have excluded our farm products from their market. In the second place the present high tariff has increased the cost of production of farm products. There are many who believe that a readjustment of our tariff schedule will bring relief to the farmer. Decrease the cost of living and of production and at the same time enlarge the foreign market so that it may absorb the farm surplus of this country and thereby raise the price. That the present tariff system, so far as the farmer is concerned, has broken down is generally admitted. That the tariff rates are effective as to the farmer will not be seriously contended. All those who believe in a protective tariff and are now asking for farm relief, admit that the tariff rates are not now effective as to farm products, and ask that legislation be enacted to make them effective.

The Republican platform of 1924 stated:

> We pledge the party to take whatever steps are necessary to bring back a balanced condition between agriculture, industry, and labor.

Here is a recognition that there is not an even balance; that there is something wrong; that the agricultural industry of the country is not on an economic level with other enterprises. And again—

> the Republican Party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industries to insure its prosperity and success.

Here is a very frank, honest, and plain statement that the farming interests were out of balance with other industries and that the enactment of legislation, the passage of law, was necessary and pledged in order to bring about an economic equality between agriculture and other industries. Our present tariff law was in effect then, and had been for two years, but it had not brought an even level or an economic equality to agriculture.

The American farmer raises a large surplus of all his basic products which he must export and sell in foreign countries on a world market. The placing of duties on goods which we export has no practical effect. Why should we import wheat from Canada, except it may be a comparatively small amount of certain varieties, and pay 42 cents per bushel tariff when wheat of the same kind and variety is selling on the Winnipeg and Minneapolis market at the same price? How can this country be flooded with Canadian wheat when both countries are exporting millions of bushels and selling at the same price in a world market?

Is there any danger of the Canadian farmer selling his wheat to the American farmer at 42 cents a bushel less than he can get at home? Or is there a chance of the American consumer paying the Canadian farmer 42 cents more per bushel for his wheat than he would pay the American farmer? What is true of wheat is true of all basic agricultural products. Oh, it is true that a small quantity of these various products are imported usually for some special use, but the amount is so small compared with the amount produced here and the amount exported as to not make a ripple on the economic sea. The fact is that the tariff rates on farm products are not effective and are of no benefit to him. The further fact is that the farmer derives no benefit from the placing of farm machinery on the free list. In the first place all the materials of which the implements are constructed are on the protected list and by reason of that, farm machinery has more than doubled in price in the last few years. Again practically no farm implements or machinery of the kind used by the American farmer are manufactured outside the United States and very little is imported and almost all that along the Canadian border. In 1926 there was 17 times as much farm machinery exported from the United States as there was imported into it and the amount imported was less than one-fifth of 1 per cent of the amount in use here.

According to the report of the Department of Commerce in the year 1926, there was not imported a single plow, cultivator, threshing machine, binder, mower, rake, planter, drill, or tractor, through the customs office of the great city of St. Louis, of almost a million people, and in the very center of the greatest agricultural section of our land.

Agricultural implements on the free list is a delusion and a snare.

> It is as a tale, told by an idiot. Full of sound and fury, signifying nothing.

With the high tariff rates protecting the industries of the country and increasing the cost of living and the cost of production for the farmer, and at the same time limiting and curtailing his foreign market and thereby forcing the price of his products downward; with the tariff rates on farm products inoperative and the farm machinery free list a mere sop, it is time that an economic inequality be recognized between agriculture and other industries, and a remedy sought. One of two things seems evident. The tariff rates should be made operative and effective as to farm products or there should be an intelligent readjustment of our tariff rates so as to equalize more nearly the benefits which may accrue to both industry and agriculture.

The National Industrial Conference Board and the Chamber of Commerce of the United States of America appointed a business men's commission on agriculture to study conditions of agriculture and suggest measures for its improvement. This committee was composed of men representing the big industrial, banking, and transportation business of the country.

Men who were thoroughly saturated with the high-protective tariff policy as applied to our industries. The chairman of that commission was that distinguished Missourian, Charles Nagel, Secretary of Commerce in Mr. Taft's Cabinet, an apostle of a high-protective tariff. This commission, after considering the improvement of farm conditions through tariff readjustment and showing that a lowering of the tariff wall would reduce the cost of production for the farmer and give him an enlarged foreign market for his surplus, made this statement:

> In view of these considerations, the commission believes that the time has come to give serious thought to the question of whether, under the prevailing conditions of American industry, agriculture, and international trade the benefits of the protective-tariff system are fairly enough distributed as between industry and agriculture to make for a stable balance in our national economy and protect the long-time interests of the Nation.

This from the high priests of protection.

I am one of those who believe in a readjustment of our tariff rates. Not that it should be done in the spirit of reckless abandon. But rather that the job be undertaken in a calm, intelligent, fair, and equitable manner, with the interests of the whole country in view and not a particular section or a special industry. Develop a policy that will distribute the load if economic burdens are to be borne. Establish a system that will permit all to share equally in the benefits and blessing which may accrue.

It seems at this time that no general revision or adjustment of the tariff rates can be undertaken. Then it would appear proper to undertake by appropriate legislation to set in operation the machinery to assist the farmer in taking care of his surplus products and in stabilizing his market. In view of the fact that other enterprises and other groups have received legislation in their interest it is not amiss to enact laws which will at least put agriculture on an equality with other industries.

If it requires the formation of a farm board and the establishment of an equalization fee, as contended by some, or the issuing of export debentures or certificates, as claimed by others, some plan should be undertaken. It is said that the plan will not work. Boards for the regulation and assistance of other industries have been a success. Let us try. It is claimed that it is a subsidy. This is denied. But even so, it is no more of a subsidy than that already granted to some other enterprises. It is contended that the plan will take large sums of money from the Treasury for its maintenance. It may and probably will require the expenditure of some of the Government's revenue. It would not be the first time that the Government has spent money in its various activities and in its efforts to help. It is better that it cost a great deal than to have the basic industry of the country seriously crippled or destroyed, for—

> A bold peasantry, their country's pride,
> When once destroyed can never be supplied.

The farmer is not asking for a subsidy, but only for an equal opportunity and a fair chance. There is no more energetic, frugal, and thrifty class than the farmers, no more honest and patriotic, hospitable, and loyal people than they. They are deserving of more consideration and entitled to the highest place in the economic development of our country.

The farmers of this land must not become "hewers of wood and drawers of water." Their condition can no longer be ignored. Their rights must be recognized and their needs respected. Born and reared on a farm in southeast Missouri, I grew to manhood under the arduous labors and heavy tasks of farm life. Coming as I do from the farm, I know the needs and the longings, and can feel the pulse beat and catch the vision of these people. I can see them in the early days of spring as they follow the plow in the furrowed fields and prepare the soil for the seed time; I can see them toiling from early morn till eventide under the burning heat of a July sun to garner their grain; I can see them in the frosty days of Autumn, pulling the corn from the stubborn stalk, and amidst the drifting snow and blinding sleet of winter, feeding and tending their stock. Amidst it all they have set their face toward the future, looking and longing and hoping for the dawn of a better and a brighter day. They have the greatest hopes and the noblest aspirations for those things that are highest and best and most beautiful in life. These hopes must not be crushed; these aspirations must not be destroyed.

AIR MAIL SERVICE

Mr. TREADWAY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a letter I addressed to the Postmaster General and his reply thereto, with some statistical tables relating to the transcontinental airplane service.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. TREADWAY. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

On February 25 last I inquired of the Postmaster General how closely the scheduled Air Mail Service between the East and the Pacific coast was being maintained. I append hereto our correspondence, as well as the data furnished by the Postmaster General. From the latter it will be seen that the service is being operated remarkably close to schedule:

FEBRUARY 25, 1928.

The POSTMASTER GENERAL,
Washington, D. C.

DEAR SIR: I frequently note in the New York papers the air-mail schedule to the Pacific coast. I suppose the records show how nearly the schedule is maintained. If any statistics are available for, say, the last three months, I should be glad to have them, as well as any other details regarding the service that might be of interest.

Very truly yours,

ALLEN T. TREADWAY.

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., March 5, 1928.

Hon. ALLEN T. TREADWAY,
House of Representatives.

MY DEAR MR. TREADWAY: I have your letter of February 25, in which you refer to the transcontinental air mail schedule and desire to be furnished with statistics covering the same.

I take pleasure in inclosing herewith a three months' record of the arrivals at each terminal of the transcontinental route. There are also inclosed several tables showing the amount of mail carried, miles flown, etc., on all routes in the country.

Very truly yours,

HARRY S. NEW, *Postmaster General.*

Statement showing arrivals of the transcontinental route at New York and San Francisco during the months of September, October, and November, 1927

Left San Francisco—	Due New York—	Arrived New York—
Sept. 1, 8.45 a. m.	Sept. 2, 4.45 p. m.	Sept. 2, 4.00 p. m.
Sept. 2, 8.50 a. m.	Sept. 3, 4.45 p. m.	Sept. 3, 4.47 p. m.

[1] Cleveland, Chicago, or Salt Lake sections dispatched because of impossible flying weather between the termini and such point.

While a better schedule can be maintained in the summer months than in the winter months, the above three months can be taken as a fairly good average.

LEAVE TO ADDRESS THE HOUSE

Mr. LaGUARDIA. Mr. Speaker, I ask unanimous consent that on the next Consent Calendar day, March 19, 1928, I may address the House for 15 minutes upon the scope and purpose of the Consent Calendar.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent that on the next Consent Calendar day, immediately preceding the calling of the Consent Calendar, he be permitted to address the House for 15 minutes. Is there objection?

There was no objection.

BRIDGE ACROSS OHIO RIVER AT MOUND CITY, ILL.

Mr. DENISON. Mr. Speaker, by direction of the Committee on Interstate and Foreign Commerce, I call up the bill (H. R. 66) authorizing B. L. Hendrix, G. C. Trammel, and C. S. Miller, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Mound City, Ill., with Senate amendment thereto, and move that the House concur in the Senate amendment.

The Clerk read the Senate amendment.

Mr. DENISON. Mr. Speaker, the amendment consists in the correction of a printer's error.

The SPEAKER pro tempore. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

BRIDGE ACROSS MISSISSIPPI RIVER AT HICKMAN, KY.

Mr. DENISON. Mr. Speaker, I call up the bill (H. R. 7921) authorizing A. Robins, of Hickman, Ky., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Hickman, Fulton County, Ky., with a Senate amendment, and move that the House concur in the Senate amendment.

Mr. COOPER of Wisconsin. Mr. Speaker, by what right does the gentleman bring up these measures?

Mr. DENISON. These are House bills that have passed the House and have also passed the Senate, to which the Senate have made small amendments. They are now on the Speaker's table.

Mr. LAGUARDIA. They are all bridge bills?

Mr. DENISON. Yes.

The SPEAKER pro tempore. The gentleman has the right to call them up. The Clerk will report the Senate amendment.

The Clerk read the Senate amendment.

The SPEAKER pro tempore. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

BRIDGE ACROSS OHIO RIVER AT GOLCONDA, ILL.

Mr. DENISON. Mr. Speaker, I call up the bill (H. R. 7183) authorizing C. J. Abbott, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Golconda, Ill., with a Senate amendment thereto, and move to concur in the Senate amendment. The Senate amendment consists in merely inserting the words "section 4," which was left out by mistake.

The Clerk reported the Senate amendment.

The SPEAKER pro tempore. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

BRIDGE ACROSS OHIO RIVER AT RAVENSWOOD, W. VA.

Mr. DENISON. Mr. Speaker, I call up the bill (H. R. 6073) granting a permit to construct a bridge over the Ohio River at Ravenswood, W. Va., with a Senate amendment thereto, and move to concur in the Senate amendment. I might state that there were two errors made in the bill as it passed the House. In order to correct those two errors the Senate struck out the House bill and inserted a new bill, correcting those two errors. The amendment is quite long, and I ask unanimous consent to dispense with the reading of it, but that it be printed in the RECORD.

Mr. GARRETT of Tennessee. It is just one amendment? A complete bill?

Mr. DENISON. Yes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Senate amendment is as follows:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at a point suitable to the interests of navigation, at or near Ravenswood, W. Va., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of tolls so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of West Virginia, the State of Ohio, any public agency or political subdivision of either of such States within or adjoining which any part of the bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interest in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of tolls shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, shall, within 90 days after the completion of such bridge, file with the Secretary of War, and with the highway departments of the States of West Virginia and Ohio, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, shall make available all records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER pro tempore. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

THE CANAL ACROSS FLORIDA

The SPEAKER pro tempore. Under the order the Chair recognizes the gentleman from Florida [Mr. GREEN].

Mr. GREEN of Florida. Mr. Speaker and fellow Members of the House, while the Congress has under consideration flood control legislation, which is so necessary, it occurs to me that we should at this time consider the advisability of the ultimate completion of the Boston-Rio Grande Intracoastal Canal program. I shall speak with particular reference to the canal across Florida, which is a link in this great intracoastal waterway chain. To briefly summarize, we will begin with the Cape Cod Canal, connecting Cape Cod Bay with Buzzards Bay. You will recall the Sixty-ninth Congress authorized the purchase of this portion of the intracoastal waterway at an expenditure of several million dollars. We will next mention

the project from Delaware River to Chesapeake, Delaware, and Maryland. This waterway, usually known as the Chesapeake & Delaware Canal, is a sea-level canal extending from Reedy Point on the Delaware River about 41 miles below Philadelphia, Pa., to the junction of Back Creek and the Elk River, about 4 miles west of Chesapeake City, Md., a distance of about 19 miles, with a branch channel extending from Delaware City, Del., for a distance of 1.8 miles to the junction with the channel from Reedy Point, Del. The drainage area is about 65 miles. This canal formerly was private property, operated as a toll canal, beginning July 4, 1829. The total original cost was $2,250,000, of which $450,000 was paid by the United States, $100,000 by Pennsylvania, $50,000 by Maryland, and $25,000 by Delaware, and the remainder by citizens of three States. It was purchased by the Government for $2,514,289.70. It is about 12 feet deep and 90 feet wide.

In connection with this we might in passing mention the inland waterway from Chincoteague Bay, Va., to Delaware Bay at or near Lewes, Del.; also waterway on the coast of Virginia. Next we have an inland waterway from Norfolk, Va., to Beaufort, N. C. The existing project provides for an inland waterway with a depth of 12 feet at mean low water between Norfolk, Va., and Beaufort Inlet, N. C., a distance of 206.28 miles, with bottom width varying from 90 feet in land cuts to 300 feet in open water. The estimated cost for new work, revised in 1925, is $8,000,937, exclusive of amounts expended under previous projects. The latest, 1916, approved estimate for annual cost of maintenance is $85,000.

The next link in the chain is inland waterway from Beaufort, N. C., to the Cape Fear River, including waterway to Jacksonville, N. C. The existing project provides for a waterway 12 feet deep at mean low water, with a bottom width of 90 feet, extending along the coast from Beaufort, N. C., to the Cape Fear River, a distance of 93 miles. The estimated cost of new work, made in 1926, is $5,800,000, with $150,000 annually for maintenance.

The division engineer, southeast division, was charged with the duty of making preliminary examinations and survey provided for by the rivers and harbors act of January 21, 1927, as follows, and reports thereon will be later received:

First. Intracoastal waterway from Cape Fear River, N. C., to Georgetown, S. C.

Second. Intracoastal waterway from Cape Fear River, N. C., to the St. Johns River, Fla.

It is hoped by advocates of the Boston-to-Rio-Grande intracoastal waterway, that these surveys will warrant the Board of Engineers in making a favorable report upon this last project and thus providing for the endless chain from Boston to Florida.

The 1927 act also provided for preliminary examination of the canal across Florida from Cumberland Sound on the Atlantic, by way of the St. Marys River, Georgia-Florida, Okefenokee Swamp, Georgia, to Suwannee River, St. Marks River to St. Georges Sound. This is the project about which I shall talk to you a little later. By the way, this survey will go on from St. Georges Sound to the Mississippi River; however, this latter portion has been surveyed previously.

Mr. ROMJUE. Does that in any way involve the general waterway program in which the Mississippi and Missouri Rivers are included?

Mr. GREEN of Florida. Indirectly it does. It is a part of the comprehensive program. I believe we should have the cooperation from the States in the Mississippi Valley and those on the east coast in order to ultimately perfect it.

The next link in this great intracoastal waterway chain is the Louisiana-Texas intracoastal waterway from the Mississippi River at or near New Orleans, La., to Corpus Christi, Tex. The existing project is 348.97 miles via the northerly or Plaquemine route, and 280.17 miles via the southerly or Harvey Canal route. The estimated cost of the new work of the 9 by 100 feet waterway authorized in 1927, exclusive of amounts expended on previous projects, is $9,752,000, including $500,000 for a dredge, with $185,000 annually for maintenance. This was adopted January 21, 1927.

The last and final link in the chain of the intracoastal waterway is in Texas, from Corpus Christi to Point Isabel, including Arroya, Colo., to Missouri Pacific bridge, near Harlingen. My purpose in mentioning all of these connecting projects of this waterway is to, if possible, bring to the attention of my colleagues the relation and importance of the proposed Florida canal in connection with this waterway, and thus you will see the Florida canal is all necessary and essential to the ultimate development of this great artery of commerce.

During the last session of Congress the intracoastal waterway from Jacksonville, Fla., to Miami, Fla., was authorized at an expenditure of $4,221,000. This project, when taken over and developed by the Government, will serve as a great feeder for Florida's Cross-State Canal, as you understand this canal goes down the east coast of Florida, connecting, by minor canals and by railroads, with the interior of the State.

House bill 8742, as introduced by me during the Sixty-ninth Congress, provided for a preliminary survey of the Cross-State Canal. It will be interesting to my fellow Members to know that this bill became a law and that the board of engineers are now making this survey. In 1927, upon the recommendation of the Florida State Canal Commisison and others interested in this project, the Legislature of the State of Florida made an appropriation for cooperation by the State of Florida in the above-mentioned survey. The Florida State Canal Commission were very fortunate in being able to secure as Florida's engineer in this survey project Gen. Harry Taylor, formerly chief of the Board of United States Army Engineers. General Taylor is now working with the Federal engineers in this survey. I am informed that the survey is going along very satisfactorily and that chambers of commerce and other organizations are offering splendid cooperation. Later we are going to ask the Congress to appropriate sufficient funds to dredge this barge canal.

According to report of the Chief of Army Engineers, made several years ago, I believe about 1880, the canal would be approximately 226 miles in length; but by the utilization of the St. Marys River and the Suwannee River, of the Okefenokee, and all other streams, the actual canal to be cut would be slightly over 100 miles in length; the number of locks required would be approximately eight on the Atlantic side and six on the Gulf side; but said locks would not have to be built in flights. The character of the soil would permit quick and cheap construction, it being sandy loam on the Atlantic side, a soft muck through the swamp, and sand and soft limestone on the Gulf side; and the estimated cost of the canal—at that time—would be only a little over $8,000,000 for a lock barge canal 9 feet deep and 100 feet wide at the bottom.

Of course, the canal should be more than 9 feet deep, say, 12 feet, to take care of heavy barges; and while the cost of building has greatly increased since this date, there has been improvement in machinery and more scientific methods of engineering have developed; therefore, my contention now is that the canal can be constructed at a cost which will be negligible compared with the great benefits accruing from same.

Mr. EDWARDS. Is this the canal proposed through the lower part of Georgia, across the State of Florida?

Mr. GREEN of Florida. Yes.

Mr. EDWARDS. At what point in Georgia is it proposed to start the canal?

Mr. GREEN of Florida. It starts at Cumberland Sound, on the Atlantic Ocean, and goes down the St. Marys River, and I am very glad to state that the efforts of my friend from Georgia [Mr. EDWARDS] in this behalf are very much appreciated.

At Cumberland Sound, the east end of the proposed canal—Fernandina, Fla.—is found one of the best harbors on the Atlantic coast. At St. Georges Sound, the west end of the proposed canal, also are to be found splendid harbor facilities. From Cumberland Sound up the St. Marks River to the Okefenokee Swamp is about 61 miles. With locks and canals across the Okefenokee Swamp to the Suwannee River, a distance of about 45 miles, thence down the Suwannee River in a general westerly direction a distance of 50 miles to about Charles Ferry, thence from Charles Ferry by canal a distance of about 70 miles, you have arrived at St. Marks, on the Gulf, and in the vicinity of the Okefenokee Swamp sufficient water, in my opinion, is accumulated for operation of locks and also to obtain sufficient depth of streams.

This canal would bear an almost incalculable amount of commerce. Naval stores, kaolin, and a large amount of manufactured lumber would move through this canal. The tonnage of these products exported in 1921 exceeded 150,000 tons, valued at more than three and a quarter million dollars. These products and their exportation have doubtlessly doubled since 1921. Probably $2 per ton would be saved in transportation charges by this canal. Of course, I will not take time to enumerate the various other items of commerce which would pass through this canal, but I may state the items above mentioned would form only a meager part of the total.

When we take into consideration the great saving of coal and other fuels, and the transportation of same, and the transportation charges saved on the total, and also the ever-increasing volume of tonnage to be transported and the inability of the railroad facilities—although they are good—to rapidly, cheaply, and economically transport this tonnage, then it is conclusive that our waterways should be more fully developed.

Commerce and traffic in general is ever increasing. Measured in ton-miles, commerce doubles about once in a decade, or possibly a little longer. Of course, the Nation is experiencing at this time a rather dull traffic movement, same caused by general conditions brought about by reaction from unusual economic conditions just after the war, and to a lesser extent, by the uncertainty of business which is always the case just before presidential election; and while traffic is a little dull at this time, in my opinion we may reasonably predict that within three years, at least, the Nation will experience a healthy improvement in commerce. Judging the future by the past, we may expect within the next few years an unusual traffic congestion, and it is altogether possible that railroad and hard-road facilities will not be able to cope with the situation. Thus, looking to the future, as we are compelled to do, makes it more imperative that the Congress develop its waterways. I recall a very short while ago the great demand for building materials, and, in fact all items of commerce, was so great in Florida until it was impossible for transportation agencies to meet the demand; indeed, it was necessary to place an embargo. Now, my friends, if a general transportation emergency should in the future spread over our Nation you can see wherein it would be necessary to fully develop our water-transportation possibilities.

The older countries of the world have found it necessary to fully develop their water-transportation facilities. Europe, with some 3,584,000 square miles of land has now approximately 28,000 miles of nominally navigable waterways, while the United States, with some 3,028,000 square miles of area, has possibly 2,500 miles of developed waterways. The truth of this contention is revealed in the difference in the commerce of the countries. Before the war, almost any of the leading European nations had a greater volume of commerce than that of the United States. In 1912, for this single year, Germany's foreign commerce was $853,000,000 greater than that of the United States. Holland and Belgium combined are as large as the State of West Virginia, with a population of some 15,000,000, and had a foreign trade which before the war exceeded that of the United States by over $200,000,000. Of course, these conditions may not be as marked since the war as they were immediately before the war, but it leads us to realize that the United States is slow in foreign commerce as compared to the countries of Europe. This condition may not apply as to our domestic commerce, but both foreign and domestic commerce is certainly stimulated by developing our inland waterways. The Ohio River, for instance, is a smaller river than the Rhine. Previous to the year 1914, the Rhine was bearing over 55,000,000 tons of traffic a year; the Ohio River probably has never carried 20,000,000 tons in one year. I could cite many other instances showing that America is, comparatively speaking, asleep with regard to the development of her inland waterways.

To prove conclusively that it pays to develop waterways and dig canals, I will call your attention to the commerce which is now passing through the Panama Canal. During the first 15 days of February, 1928, 307 commercial vessels and 3 small non-seagoing launches transited the Panama Canal. The tolls collection on these amount to $1,271,850.47; the average daily toll collection $84,788.15. For the first seven and one-half months' period of the current year, beginning July, 1927, and ending February 15, 1928, the tolls collected at the Panama Canal amount to $17,416,407.37.

The cost of maintenance of the Panama Canal is neglible compared to the benefits obtained through it. When we take into consideration the fact that it cost $375,000,000 to construct the Panama Canal and that in seven and one-half months nearly seventeen and one-half million dollars were collected, it is easy to see how profitable to the country and to the people it is to construct canals. In this canal transportation above mentioned millions of dollars were saved for the public as compared to what rates would have been had it been necessary to transport by rail or roads. Of course, my friends, I do not predict that the Florida canal would be of anything like the importance as is the Panama Canal, but I do believe that the comparison as to cost and benefits which would accrue from its construction may well be considered in connection with the Panama Canal.

Mr. O'CONNOR of Louisiana. And will the gentleman also express himself upon the proposed ship canal across Florida and Louisiana?

Mr. GREEN of Florida. A ship canal would, of course, be better, but more expensive; but I hope to see the time when the ship canal will be a reality.

This canal would save in distance from the Atlantic to the Gulf approximately 1,000 miles. Of course, Mr. Speaker, the saving the long distance is not all; in this same proportion it would save in time and in money. Calculate, if you please, the cost of transporting the vast tonnage which annually goes from the upper Gulf ports—New Orleans, Mobile, Pensacola, Apalachicola, Galveston, and others—to the Atlantic Ocean. Calculate the charge of transporting this tonnage 1,000 miles and you will find that in just a few years this amount will be greater than would be the cost of constructing this barge canal from Fernandina, on the Atlantic, to St. Georges Sound, on the Gulf.

Mr. Speaker, I think that it is time the Congress exercised in governmental affairs and expenditures of money belonging to the Government and our taxpayers the same prudence, wisdom, care, and frugality, as is exercised in personal affairs. It is inevitable that this barge canal will eventually be constructed, so why not let the Government go to it at once? We all know that the construction of the Panama Canal was looked upon by many for a long time as an impossibility and as a proposed waste of money and time; and probably nothing could have dislodged this erroneous idea, except the actual construction of the Panama Canal. But so complete has been the success of the project and so vast has been the saving in the cost and time of transportation through this canal until now the American people wonder why it was not earlier constructed. The Panama Canal is indispensible to the welfare of American and world commerce, besides being so essential in time of war; likewise, a canal across Florida would be of incalculable benefit and economy in commercial transportation and would well serve its purpose in time of war.

The growth of America in the past 20 years has been phenomenal, her manufactured products have increased from $15,000,000,000 to over $60,000,000,000, her food products have increased from less than $3,000,000,000 to over $10,000,000,000, her mineral products have increased from about one and one-third billion dollars to $6,000,000,000, her imports and exports amount to $2,450,000,000, and reports for 1924 show increase to $8,200,000,000. The bank clearings were $438,000,000 for 1924, or four times that of 20 years ago, and bank deposits have increased in like proportion, and $43,000,000,000 were deposited in the banks of the United States in 1924. These amounts are ever increasing. In 1927 deposits were $51,612,000,000 and bank loans were $37,131,000,000.

Much has been said recently relative to national flood control; in fact, no other problem, in my opinion, should and will claim more careful thought and attention of Congress than will our national flood-control program. In the ultimate perfection of our national flood-control program it occurs to me that it will be well for us to look well into the development of our inland waterways. All the States of the great Mississippi Valley are affected by the Mississippi River; likewise this great valley would be affected by the proper utilization of the Mississippi River and its tributaries for transportation. Then this great Mississippi Valley section can justly, in turn, look to the Congress to open a canal through the State of Florida and thus provide for their incoming and outgoing commerce this shorter number of miles.

A great advantage will be accorded to the northeastern section of our country through the construction of the Florida canal in that it will give this section of our country a short all-water route to and from the lower Mississippi Valley; therefore I call upon the Members of the Congress from the Mississippi Valley and from the eastern shore of the United States, as well as those States of the Southeast, to concentrate their efforts with us for favorable action by the Congress for an appropriation with which to construct this canal.

The commerce of the United States has obtained stupendous proportions. A total of 531,614,691 tons of freight, exclusive of lighterage, constituted the water-borne commerce reported from continental United States and Alaska in 1926. About 76 per cent of this was domestic commerce and the balance foreign commerce. Of the foreign commerce, 76,324,861 tons represented exports and 50,078,928 tons represented imports. American vessels carried 478,019,944 tons in 1926, which showed an increase of more than 44 per cent for the last 10 years. Thus you will see the necessity of the Congress of the United States looking to the future welfare of our country and establishing economical and practical methods of transportation.

The vast wealth and resources of the United States altogether warrant an expansion in waterways development. The President of the United States has expressed himself in no uncertain terms on the question and advocates development of our waterways, and I firmly believe the Congress is ready to appropriate money for opening of rivers, dredging of canals, and establishing of adequate harbor facilities.

The Florida canal has long been a dream of all Florida citizens and is now thought of by our entire country. Its construction is absolutely essential to the future's full commercial development, and I believe we will soon see the time when

barges will load raw products in the lower Mississippi, pass down to New Orleans, on by way of intracoastal canal to Mobile and Apalachicola, on across Florida to Fernandina, thence on up a coastal canal to the markets of the East, then reload with manufactured products of the East and make their return pilgrimage. When this is done America will realize an even greater growth and prosperity than she has experienced during the past 20 years.

The commerce of Florida has increased to a much greater extent than has the general commerce of the United States, and I believe it well to advise my colleagues at this point that the amount of revenues saved to my State alone would in due course of time pay for the construction of this canal. No other State is experiencing such wonderful strides along general agricultural and horticultural lines as is the State of Florida. Florida ships so much of the produce sold in the northern market. In 1926 Florida's crops were worth $85,805,000; in 1927, $88,676,000. Compared with the country as a whole the 1927 value of Florida crops was greater than Maryland, West Virginia, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Delaware, Wyoming, New Mexico, Arizona, Utah, and Nevada. The total of the South's crops at $3,612,130,000 is nearly 40 per cent of the total value of all crops in the United States in 1927. Of course, all of Florida's crops are not sold on the market, but a large portion is sold. During the last shipping season, from September 1, 1926, to July 31, 1927—11 months—Florida shipped 91,002 carloads of fruit and vegetables. Thousands of carloads of fruit and vegetables are consumed at home.

Florida produced in 1926 81 per cent of the entire Nation's production of grapefruit; eggplants, 59 per cent; table cucumbers, 41 per cent; snap beans, 38½ per cent; peppers, 61 per cent; celery, 32 per cent; tomatoes, 24 per cent; early Irish potatoes, 10 per cent. Florida produces almost all of the other common vegetables, but in a lesser percentage.

The citrus fruit is one of Florida's greatest industries. Florida has 274 car-lot packing houses. She has 70,000 acres planted to grapefruit trees, 50,000 of which are bearing. She has 160,000 acres planted to orange trees, 95,000 of which are bearing, different varieties producing grapefruit and oranges for the market at different times of the year. For example, the early varieties of oranges placed on the market from November to January are such as Parsons, Temples, and Enterprise; midseason varieties, from January to March, seedlings and pineapples; later varieties, from March to January, Valencias, Lue Gim Gongs, and others.

Another of Florida's most lucrative products is strawberries. It furnishes the entire country with early strawberries. Plant City and other places in its vicinity begin shipping as early as November or December. My own city of Starke begins shipping a little later and sends to cities north of Florida millions of dollars' worth of strawberries annually. Sanford, Fla., is a great producer of celery. It is estimated that $6,000,000 worth of celery will be shipped from there this season. Nearly 2,000 carloads of celery have already been shipped from Florida this season. I shall not undertake to enumerate the other products of Florida which would augment the great volume of commerce which would pass through this canal.

The entire Southeast is now experiencing a great growth and industrial development. The States of Alabama, Florida, Georgia, and South Carolina, as well as other Southern States, show great increases in the volume of manufactured products. In 1914 these four States manufactured $652,072,110 worth; in 1925, $1,842,036,000. Since 1925 they have increased even more. In this section of the country there is an abundance of raw material, an unusually good year-round climate, hydroelectric power, an ample supply of labor, and those other conditions which contribute to a permanent manufacturing section.

In 1880 less than 5 per cent of America's cotton was used in southern mills; now approximately 30 per cent of all the cotton produced in the United States is converted into manufactured products by southern mills. No other section of the country is gaining in textile, tobacco, naval stores, and other manufacturing enterprises as is the Southeast. This section of the country undoubtedly is the modern and the last industrial frontier; therefore we can safely predict that the so-called local use of the Florida canal will grow greater and greater as the years pass on. The cross-State Florida canal has been indorsed by almost all of the officials of Florida, by the Florida Legislature, and the Georgia Legislature; in fact, the Georgia Legislature has ceded to the Federal Government the right of way for the canal. The Georgia Congressmen and Senators are heartily in accord for the project; in fact, scores of organizations through the southeastern part of our country have indorsed the project.

I predict that the Congress will soon agree that America must reach the zenith in development, transportation, and commerce and will appropriate sufficient money to utilize America's water arteries of commerce, including the cross-Florida canal. Money wisely spent to foster water transportation always nets splendid dividends, and, in my opinion, there is no more worthy project now before the American people than is this one.

This proposed canal, aside from its national and international importance, will develop one of the most fertile, prosperous, and thriving sections of the country; and may I remind you that last year the State of Florida alone contributed to the Federal Government more than $46,000,000 in the way of Federal taxes, so will it not be just and fair for the Congress in turn to annually expend a portion of this money for the development of a waterway which would not only mean much to Florida, but to the entire Nation. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Florida has expired.

HOSPITALIZATION FACILITIES IN SOUTHERN CALIFORNIA

Mr. CRAIL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein a letter written by Earl Merifield, liaison officer of the Disabled American Veterans of the World War, to Brig. Gen. Frank Hines in regard to hospitalization facilities in southern California.

The SPEAKER. Is there objection?

There was no objection.

Mr. CRAIL. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following letter from Earl Merifield to General Hines:

NATIONAL HEADQUARTERS,
DISABLED AMERICAN VETERANS OF THE WORLD WAR,
LIAISON SERVICE,
Los Angeles, Calif., February 6, 1928.

Brig. Gen. FRANK T. HINES,
United States Veterans' Bureau, Washington, D. C.

MY DEAR GENERAL HINES: I am given to understand that you, as a member of the Federal Board on Hospitalization, will soon have under consideration the allocation of certain funds appropriated by Congress for the erection of additional hospital facilities for the use of the United States Veterans' Bureau. I note that you will have before you at the time of your deliberation numerous requests from all parts of the country for additional beds, and I know that you will be glad to have all the information possible as to the needs of the various sections. I am, therefore, taking the liberty of writing you in order that you will be acquainted with the conditions in southern California.

I have for the past three and one-half years represented the Disabled American Veterans of the World War as a full-time liaison officer in the regional office of the United States Veterans' Bureau in Los Angeles, and have naturally been in close touch with the hospital needs of this section. Every winter since the closing of the United States Veterans' hospital at Arrowhead Springs in June, 1924, we have been faced with the situation of having more men needing hospital care than there were beds available. Notwithstanding that statistics show an increasingly large number of ex-service men needing hospital care each year, southern California has received no additional facilities. It is true that two new hospitals have been built in this section in the past two years. However, this has not increased the number of beds. When the tubercular hospital at San Fernando was built the hospital at Camp Kearny was closed. The new hospital has 200 tubercular beds, while Camp Kearny had nearly 400 at the time of closing, and yet the bureau pointed with pride at what they had accomplished to relieve the situation. When the new main hospital at Soldiers' Home was opened last spring the old one was closed, and within 90 days the new hospital was filled to capacity. The hospital at Arrowhead that was closed in June, 1924, had 125 beds. No provisions were made to take care of the extra load caused by the closing of this hospital.

The Veterans' Bureau has the authority to hospitalize veterans at the United States naval hospital at San Diego. This hospital is located 140 miles from Los Angeles, and only ambulatory cases can be sent there, as the distance is too far for acute and emergency cases to travel. The hospitalization of ex-service men at this hospital is unsatisfactory. The naval hospital is controlled by naval regulations and the Veterans' Bureau has no jurisdiction over it.

For the past three months the Los Angeles bureau office has had a waiting list of the names of men requiring hospitalization. The number has varied from 5 to 25. The list to-day contains the names of 14 infirmary tubercular cases, 3 ambulatory tubercular cases, and 3 general medical and surgical cases. I am informed by medical authorities at both tubercular hospitals, at the Soldiers' Home and at San Fernando, that it will be at least 90 days before they will have sufficient infirmary beds to take care of those on the list. The turnover on infirmary cases is very small and only usually as a result of the death of a patient or a terminal case being sent to his home. Ambulatory tuberculars can be taken care of in from 1 week to 10 days and the men on these lists needing general medical or surgical care are

emergency cases, their condition being too serious to permit them being sent to San Diego. There has been as high as 10 of these on the list this winter. This waiting list does not show a true picture of the hospital needs as there are many men who, when told that there are not hospital facilities, either enter a private hospital or get along the best they can, depending in many cases upon the county and various organizations for relief and care.

It has been necessary many times this winter to call on the Los Angeles County hospital to take care of our emergency cases. This is resented by both the men and the community who feel that the Government should care for those ex-soldiers and that the burden should not be put on the county. There have been times this winter and in the past when some of these cases have appealed to well-known business men in the city and even to city officials, asking them to intervene in their behalf and try to get them hospitalized. This does not help for a better understanding between the public and the Veterans' Bureau. The various service organizations have done all they can to bring the seriousness of the situation to the proper officials.

In summing up the situation, provision must be made for additional tubercular beds in this vicinity. At the time San Fernando was built it was promised that additional beds would be provided later. This is needed now, and also there is an immediate need for a number of beds, to be put under the jurisdiction of the Veterans' Bureau, to take care of the general medical and surgical cases that can not travel to San Diego.

My organization will appreciate your careful consideration of this information. I assure you that I have not overestimated or overemphasized the situation, and I am sure that an investigation of the daily reports from the local Veterans' Bureau and the hospitals in this territory will confirm my statements.

Respectfully yours,

EARL MERIFIELD,
Liaison Officer, Southern California.

Attested by—

WILLIAM J. SHIRLEY,
Commander Quentin Roosevelt Post, No. 5,
Disabled American Veterans of the World War.

EARL PINNEY,
Adjutant Quentin Roosevelt Post, No. 5,
Disabled American Veterans of the World War.

RADIO LEGISLATION

Mr. ROMJUE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the pending radio bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. ROMJUE. Mr. Speaker and Members of the House, the question involved in the radio situation is one that has arisen, of course, within the last few years, and one which has not been working satisfactorily, at least for the past several months.

As far back as about 1920 the first real effective radio broadcasting began to be generally put into operation. And the Radio Commission to have charge of the radio situation was selected and designated by President Coolidge during 1927. Prior to the passage of the radio act early in the year 1927, and when it was apparent that some legislation would be had on the subject, there was great discord among the listening stations throughout the country—confusion on every hand and everywhere. Scarcely anyone at that time was getting radio programs satisfactorily. Shortly prior to this great drive for legislation, however, programs were coming in much more satisfactorily than they were and than they did immediately prior and at the time the legislation was sought. Certain interests of the country which were apparently desirous of creating and maintaining a monopoly in the radio business took it upon themselves, so far as they were able to do so, and they did it quite effectively, to create all the discord and confusion possible among the listeners throughout the country so that the listeners would insist on the legislation then proposed being passed, although not one person in a hundred thousand had an opportunity to read and to know just what the proposed legislation was. Of course, it worked just like the interests that were seeking to establish a monopoly desired it to work. That is, it caused a great many of innocent people throughout the country to insist that the proposed legislation be passed, when as stated before, not one out of many thousands had an opportunity to know just exactly what it was.

I happen to be one of those who did not believe that the program as outlined and desired by certain radio interests at that time, which seemed to have the approval and consent of Mr. Coolidge, would work to the interests of the public, and I did not believe it would prove satisfactory. The great mass of the people, in my opinion, had simply been hoodwinked, fooled, and deceived by certain monopolistic interests of the country into making a request for something that they would find in the end they did not really want. Since that time it has been proved that those who shared along with me this same opinion have found our judgment of this matter thoroughly confirmed, for since that time a few of the larger radio interests of the country seem to have pooled their interests in an effort to maintain and operate the radio broadcasting in their own interests, without regard to the listeners and the smaller radio operators elsewhere in the United States, and by the policy which these few radio pooling interests have followed many smaller radio stations have been practically suppressed and the average citizen scattered throughout this land, who has always felt that he had a reasonable right to the use of the atmosphere, finds so far as any practical view of the situation is concerned that he has been almost denied that right.

Of course, it will be admitted that some of the most powerful and large radio stations first began operation in centers like New York and New England, and it is now claimed by some that a few of these larger stations from this section of the country have vested rights in the air. That is, there are some of them who claim that they have acquired by their earlier operation what may be called a prescription right, that is being first in the activity, that other stations ought not now to arise up elsewhere and cross their path in any particular. In the first place I deny that any one or a group of a few of the larger radio operating stations have acquired any such right, and I maintain that they can not acquire and retain such a right contrary to the public interests and public welfare of the general population of the United States. They have no more right to claim for themselves such a vested right as would exclude all operation stations in centers of smaller population than a pioneer who first rode a pony across the plains of Uncle Sam's vast landholdings in an early day would have had the right to claim that by reason of his first trip over such plains he had acquired a private right which he could hold for himself to the exclusion of the entire public. However, the claim of a few of the larger radio stations that they have such vested right to appropriate the air for their own purposes in line with their industries, reiterates the time-worn, selfish, and sordid manifestation too often exhibited by some of the human race to take because one can, and to keep, if possible, because they have the power to do so.

Month by month and year by year during the present administration of this Government's affairs, the citizen of this country who has been observant has found the policy to be one of giving more power to the powerful, more wealth to the wealthy, at the same time withholding from the weaker that which in many instances appears to be his just due, and shackling at every step those who are unable to protect themselves. So persistent is this policy being followed in this country that for the past few years the average citizen living in the agricultural belt of this country has found taxes mounting on his land, while he is shouldering the burden of discriminating laws, such as the high protective tariff, which takes from him a portion of that which he has earned by the sweat of his brow, and transfers it to that same section of the country in which has arisen the powerful monopolistic Radio Trust.

The present radio proposal should have written into the law that the licensing authority be compelled to make an equal allocation to each of the five radio zones of wave lengths and station power, and that within each zone the commission should be required and compelled to make a fair and equitable allotment among the different States and the people thereof.

A great amount of the disturbance is coming from the chain stations, and one reason of this dissatisfaction and discord is the fact that a large number of stations at present are hooked up in a chain and they carry over a different wave length the same program, so that in the entire chain of stations anyone who does not desire to hear the chain program has no place on the dial left to switch in.

If the commission selected by President Coolidge feels that it is necessary to have the chain stations certainly they ought to be required to operate on the same wave length; that is, all stations in the chain. This would leave an opportunity for listeners who desire to hear other stations to listen in without disturbance to their programs. It is quite apparent why the few larger radio stations want to operate the chain system on different wave lengths, by the different stations operating on the same program at the same time in the chain of stations, such a policy enables the chain stations to make a large amount of money out of their advertising programs, whereas they advertise everything for sale that they choose to advertise in that manner and for which they are paid.

Of course, it can not be said that every large radio station is operating unfairly and against the public interest, but many of them are now in one of the most gigantic monopolies that there is in the country, and it will prove to be greater, more sordid, and more selfish, and it is to be hoped that the President of the United States will remove from any board any man

whom he has appointed or will appoint who does not promptly manifest a strong and compelling desire to serve the public first, before the monopolies and special interests of the country are served.

How much we may expect that, at the hands of Mr. Coolidge, one man's guess is probably as good as another's, as the farmers of our country have gone bankrupt day after day and foreclosed in their homes, and the smaller banks throughout the Mid West have crashed, while the President has watched increased profits turning into the pockets of the protected industries of the country.

With the provisions written into the law, as it should be, providing that the people of the different States of this country are to have equal allocation and consideration and treatment in regard to wave lengths and power of stations, the board whom the President has appointed or hereafter does appoint, will have power to secure for the listeners everywhere fair treatment and consideration. If the listeners fail to get this service, the fault will be in the first instance with the board itself, which has control and charge of the matter, and if the failure to get fair treatment and consideration continues, the fault will lie, under the provisions of the legislation, with the President of the United States, and it will be his duty in case of such failure to remove offending members of the board and to select men to execute the duties of the commission who are more interested in the average man than they are in monopolies.

ADJOURNMENT

Mr. WHITE of Maine. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 48 minutes p. m.), in accordance with the order heretofore made, the House adjourned until to-morrow, Sunday, March 11, 1928, at 2 o'clock p. m.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Monday, March 12, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the north Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON MILITARY AFFAIRS

(10.30 a. m.)

To safeguard national defense; to authorize, in the aid of agriculture, research, experiments, and demonstration in methods of manufacture and production of nitrates and ingredients comprising concentrated fertilizer and its use on farms (H. R. 10028).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

A meeting to consider the private bills upon the committee calendar.

EXECUTIVE COMMUNICATIONS, ETC.

401. Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting draft of a bill to provide relief for the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased, was taken from the Speaker's table and referred to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. FOSS: Committee on the Post Office and Post Roads. H. R. 11279. A bill authorizing the Postmaster General to establish a uniform system of registration of mail matter, and for other purposes; without amendment (Rept. No. 870). Referred to the Committee of the Whole House on the state of the Union.

Mr. VESTAL: Committee on Patents. H. R. 6103. A bill to amend an act entitled "An act making appropriations for sundry civil expenses of the Government for fiscal year ending June 30, 1884," and for other purposes; with amendment (Rept. No. 871). Referred to the Committee of the Whole House on the state of the Union.

Mr. HILL of Washington: Committee on Irrigation and Reclamation. H. R. 7029. A bill for the adoption of the Columbia Basin reclamation project, and for other purposes; with amendment (Rept. No. 872). Referred to the Committee of the Whole House on the state of the Union.

Mr. FISHER: Committee on Military Affairs. H. R. 10310. A bill authorizing the Secretary of War to convey a certain portion of the military reservation at Fort McArthur, Calif., to the city of Los Angeles, Calif., for street purposes; without amendment (Rept. No. 873). Referred to the Committee of the Whole House on the state of the Union.

Mr. HICKEY: Committee on the Judiciary. H. R. 6687. A bill to change the title of the United States Court of Customs Appeals, and for other purposes; with amendment (Rept. No. 874). Referred to the House Calendar.

Mr. McLEOD: Committee on the District of Columbia. H. R. 6844. A bill concerning liability for participation in breaches of fiduciary obligations and to make uniform the law with reference thereto; with amendment (Rept. No. 875). Referred to the House Calendar.

Mr. McLEOD: Committee on the District of Columbia. H. R. 8558. A bill relating to giving false information regarding the commission of crime in the District of Columbia; without amendment (Rept. No. 876). Referred to the House Calendar.

Mr. McLEOD: Committee on the District of Columbia. H. R. 8915. A bill to provide for the detention of fugitives apprehended in the District of Columbia; without amendment (Rept. No. 877). Referred to the House Calendar.

Mr. McLEOD: Committee on the District of Columbia. S. 2310. An act supplementary to, and amendatory of, the incorporation of the Catholic University of America, organized under and by virtue of a certificate of incorporation pursuant to class 1, chapter 18, of the Revised Statutes of the United States relating to the District of Columbia; without amendment (Rept. No. 878). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. LEAVITT: Committee on Claims. H. R. 8487. A bill to adjudicate the claims of homestead settlers on the drained Mud Lake bottom, in the State of Minnesota; with amendment (Rept. No. 879). Referred to the Committee of the Whole House.

Mr. LEAVITT: Committee on Claims. H. R. 10192. A bill for the relief of Lois Wilson; with amendment (Rept. No. 880). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. S. 2657. An act for the relief of George W. Boyer; without amendment (Rept. No. 881). Referred to the Committee of the Whole House.

Mr. BULWINKLE: Committee on Claims. H. R. 4619. A bill for the relief of E. A. Clatterbuck; with amendment (Rept. No. 882). Referred to the Committee of the Whole House.

Mr. HUDSPETH: Committee on Claims. H. R. 7079. A bill for the relief of John Golombiewski; without amendment (Rept. No. 883). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 11944) for the relief of Louise Smith Hopkins, Ruth Smith Hopkins, and A. Otis Birch, and the same was referred to the Committee on Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SCHNEIDER: A bill (H. R. 11948) for the hospitalization of persons discharged from the United States Navy or

Marine Corps who have contracted tuberculosis in the line of duty while in the naval service; to the Committee on Naval Affairs.

By Mr. GAMBRILL: A bill (H. R. 11949) to regulate and fix rates of pay for certain employees of the Bureau of Engraving and Printing; to the Committee on the Civil Service.

By Mr. NELSON of Maine: A bill (H. R. 11950) to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck, at the town of Stonington, Me.; to the Committee on Interstate and Foreign Commerce.

By Mr. BYRNS: A bill (H. R. 11951) to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes"; approved August 25, 1919, as amended by the acts of March 6, 1920, and February 27, 1926; to the Committee on Public Buildings and Grounds.

By Mr. DICKINSON of Iowa: A bill (H. R. 11952) to amend the grain futures act; to the Committee on Agriculture.

By Mr. JAMES: A bill (H. R. 11953) to authorize the sale under the provisions of the act of March 12, 1926 (Public, No. 45, 69th Cong.) of surplus War Department real property; to the Committee on Military Affairs.

By Mr. LaGUARDIA: A bill (H. R. 11954) appointing the time for the meeting of Congress; to the Committee on the Judiciary.

By Mr. GIBSON: A bill (H. R. 11955) to provide for erection of public buildings for the customs and immigration services on the Canadian and Mexican borders; to the Committee on Public Buildings and Grounds.

By Mr. HOUSTON of Hawaii: Joint resolution (H. J. Res. 232) to provide for annexing certain islands of the Samoan group to the United States; to the Committee on Insular Affairs.

By Mr. MacGREGOR: Joint resolution (H. J. Res. 233) to permit admission within quota of wives and minor children of declarants who have been admitted into the United States prior to July 1, 1924; to the Committee on Immigration and Naturalization.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND: A bill (H. R. 11956) for the relief of W. M. Seawell; to the Committee on Claims.

By Mr. BRAND of Ohio: A bill (H. R. 11957) for the relief of Maj. Thomas J. Berry; to the Committee on Claims.

By Mr. CANFIELD: A bill (H. R. 11958) granting an increase of pension to Arrena Rairdon; to the Committee on Invalid Pensions.

By Mr. COCHRAN of Pennsylvania: A bill (H. R. 11959) granting an increase of pension to Mattie L. Smith; to the Committee on Invalid Pensions.

By Mr. COLTON: A bill (H. R. 11960) for the relief of D. George Shorten; to the Committee on Claims.

By Mr. CONNOLLY of Pennsylvania: A bill (H. R. 11961) granting a pension to Joseph Gasiorowski; to the Committee on Pensions.

By Mr. COOPER of Ohio: A bill (H. R. 11962) granting an increase of pension to Flora Young; to the Committee on Invalid Pensions.

By Mr. CRAIL: A bill (H. R. 11963) for the relief of Leo B. Thome; to the Committee on Military Affairs.

Also, a bill (H. R. 11964) for the relief of Charles Wilson; to the Committee on Military Affairs.

Also, a bill (H. R. 11965) granting a pension to George Patterson; to the Committee on Pensions.

Also, a bill (H. R. 11966) granting a pension to Rebecca Phillip Clark; to the Committee on Invalid Pensions.

By Mr. DENISON: A bill (H. R. 11967) granting an increase of pension to Nancy Georgia Yancey; to the Committee on Invalid Pensions.

By Mr. GARBER: A bill (H. R. 11968) to permit Charles O. Pearson to make an additional homestead entry; to the Committee on the Public Lands.

By Mr. KING: A bill (H. R. 11969) granting a pension to James G. Voris; to the Committee on Pensions.

By Mr. KUNZ: A bill (H. R. 11970) granting an increase of pension to Jennett McWade; to the Committee on Invalid Pensions.

By Mr. McKEOWN: A bill (H. R. 11971) granting an increase of pension to Mary L. Miller; to the Committee on Invalid Pensions.

By Mr. McLEOD: A bill (H. R. 11972) granting an increase of pension to Fanny G. Pomeroy; to the Committee on Pensions.

Also, a bill (H. R. 11973) granting an increase of pension to John T. Petty; to the Committee on Pensions.

Also, a bill (H. R. 11974) for the relief of Joseph Simon; to the Committee on Claims.

Also, a bill (H. R. 11975) for the relief of Purse Bros.; to the Committee on Claims.

By Mr. REECE: A bill (H. R. 11976) granting an increase of pension to John E. Crum; to the Committee on Pensions.

Also, a bill (H. R. 11977) granting a pension to Ellen Moody; to the Committee on Invalid Pensions.

By Mrs. ROGERS: A bill (H. R. 11978) granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service; to the Committee on Naval Affairs.

By Mr. THOMPSON: A bill (H. R. 11979) granting an increase of pension to Percy Stites; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5226. By Mr. ARNOLD: Petition from citizens of Olney, Ill., in favor of the Civil War pension bill; to the Committee on Invalid Pensions.

5227. By Mr. BACHMANN: Petition of Copestone Chapter No. 12, Royal Arch Masons, Grafton, W. Va., protesting against the passage of Senate bill 1752, known as the Oddie bill; to the Committee on the Post Office and Post Roads.

5228. Also, petition of Mystic Lodge No. 75, Ancient Free and Accepted Masons, and Grafton Lodge, No. 31, Independent Order of Odd Fellows, Grafton, W. Va., protesting against the passage of Senate bill 1752, known as the Oddie bill; to the Committee on the Post Office and Post Roads.

5229. By Mr. BACON: Petition of Joseph Greenfield and other citizens of Long Island, N. Y., protesting against House bill 78 and all other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5230. Also, petition of A. A. Melin and other citizens of Smithtown, Long Island, N. Y., protesting against House bill 78 and all other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5231. By Mr. BECK of Pennsylvania: Petition of Philadelphia Board of Trade; to the Committee on Flood Control.

5232. By Mr. BOIES: Petition signed by citizens of Onawa, Monona County, Iowa, protesting against the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5233. By Mr. COCHRAN of Pennsylvania: Petition of Ellen Ruland, of Grand Valley, and 39 other residents of Forest and Warren Counties, Pa., protesting against the passage of House bill 78 and any other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5234. By Mr. ESLICK: Petition of Mrs. J. C. Carlisle and others, of Dickson, Tenn., protesting against compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5235. Also, petition of W. C. Dickerson and others, of Dickson County, Tenn., protesting against compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5236. By Mr. EVANS of Montana: Petition of Lodge No. 138, of the Danish Brotherhood of America, of Butte, Mont., protesting against the national-origin quota or any further reduction in the Scandinavian quota; to the Committee on Immigration and Naturalization.

5237. By Mr. GALLIVAN: Petition of H. P. Converse, of H. P. Converse & Co., 141 Milk Street, Boston, Mass., recommending passage of House bill 5772, known as the day labor bill; to the Committee on the Judiciary.

5238. By Mr. GARBER: Resolution of Oklahoma Woman's Christian Temperance Union, by Mrs. Abbie B. Hillerman, 112 South Olympia, Tulsa, Okla., in protest to the impeachment of Judge Franklin E. Kennamer, of the northern district of Oklahoma; to the Committee on the Judiciary.

5239. Also, letter of O. O. Hammonds, State health commissioner, Oklahoma City, Okla., in support of Parker bill (H. R. 11026); to the Committee on Interstate and Foreign Commerce.

5240. Also, letter of J. W. Snodgrass and Mrs. A. M. Snodgrass, route 7, Perry, Okla., urging the enactment of Berger pension bill; to the Committee on Pensions.

5241. By Mr. HICKEY: Petition of Edward Moritz and other citizens of South Bend, Ind., against the passage of the compulsory Sunday observance bill; to the Committee on the District of Columbia.

5242. By Mr. HOGG: Petition of William H. Hackett and 90 other citizens, of Fort Wayne, Ind., protesting against passage of the Lankford bill; to the Committee on the District of Columbia.

5243. By Mr. KUNZ: Petition of citizens of Chicago, Ill., protesting against the enactment of compulsory Sunday observance legislation, and particularly House bill 78, known as the Lankford bill; to the Committee on the District of Columbia.

5244. Also, resolution of city council of the city of Chicago, requesting amendment of the Volstead Act and the taking of a referendum vote on the question of the repeal of the eighteenth amendment to the Constitution of the United States; to the Committee on the Judiciary.

5245. By Mr. LINDSAY: Petition of Chamber of Commerce, Muncie, Ind., favoring an American merchant marine on the basis of private ownership and operation, and favoring passage of the White bill; to the Committee on the Merchant Marine and Fisheries.

5246. Also, petition of the New York State Federation of Labor, Albany, N. Y., protesting against the passage of House bill 11137, and urging this action in behalf of American Association of Masters, Mates, and Pilots; to the Committee on the Merchant Marine and Fisheries.

5247. Also, petition of Association of Commerce, Sheboygan, Mich., protesting against the Jones bill, providing for the further development of the American merchant marine, and favoring the White bill, especially the section providing for the transfer of cargo from Government ships to those of private ownership; to the Committee on the Merchant Marine and Fisheries.

5248. By Mr. MAGRADY: Petition of Frank C. Arms and 170 other citizens of Riverside, Pa., protesting against House bill 78, and all other proposed compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5249. By Mr. NEWTON: Petition of C. E. Powers, of Minneapolis, and others, against compulsory Sunday observance; to the Committee on the District of Columbia.

5250. By Mr. O'BRIEN: Petition of the citizens of Clarksburg, W. Va., against the passage of House bill 78, or any other bill enforcing the observance of the Sabbath; to the Committee on the District of Columbia.

5251. Also, petition of the citizens of Clarksburg, W. Va., protesting against the passage of House bill 78, or any other bill enforcing the observance of the Sabbath; to the Committee on the District of Columbia.

5252. By Mr. O'CONNELL: Petition of the Southern California Chapter, the Disabled Emergency Officers of the World War, favoring the passage of the Fitzgerald bill; to the Committee on World War Veterans' Legislation.

5253. Also, petition of the city of Charleston, S. C., Bureau of Port Development, favoring the passage of the Crisp bill (H. R. 8221), with reference to southern agriculture; to the Committee on Irrigation and Reclamation.

5254. By Mr. RAMSEYER: Petition of residents of Wapello County, Iowa, remonstrating against chain-station control of the radio; to the Committee on the Merchant Marine and Fisheries.

5255. Also, petition of residents of Grinnell, Iowa, protesting against the passage of House bill 78, or any other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

5256. By Mr. ROMJUE: Petition of J. C. Bradley et al., of Ethel, Mo., against passage of House bill 78; to the Committee on the District of Columbia.

5257. By Mr. SELVIG: Petition of A. I. Peterson and five farmers and residents of Kittson County, protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

5258. Also, petition of W. M. Stecht and 27 farmers and residents of Polk County, Minn., protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

5259. Also, petition of W. H. Buck and 14 farmers and residents of Marshall County, Minn., protesting again the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

5260. Also, petition of John H. Coulter and 38 farmers and residents of Polk County, Minn., protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

5261. Also, petition of George O. Olson and 33 farmers and residents of Fisher, Minn., protesting against the passage of House bill 6465, the purpose of which is to place Mexico and Canada on a quota basis; to the Committee on Immigration and Naturalization.

5262. By Mr. SINCLAIR: Petition of 48 citizens of Berthold, Carpio, Hartland, and Tagus, N. Dak., favoring Senate Joint Resolution 47, proposing an amendment to the Constitution fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress; to the Committee on Election of President, Vice President, and Representatives in Congress.

5263. By Mr. WATSON: Resolution passed by the Washington Camp, No. 33, Patriotic Order Sons of America, favoring the immigration act of 1924; to the Committee on Immigration and Naturalization.

5264. By Mr. WINTER: Petition of voters of Laramie, Wyo., to bring to a vote a Civil War pension bill; to the Committee on Invalid Pensions.

HOUSE OF REPRESENTATIVES

SUNDAY, *March 11, 1928*

The House met at 2 o'clock p. m., and was called to order by the Speaker pro tempore, Mr. COOPER of Ohio.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Holy Spirit, help us to rise from the mist and gloom of human sorrow to where we can almost see through the vistas to the upper world. Through the night and into the morning, while the veil hangs dark between, let not the bell be tolled; allow not the dirge of winter. Let it be rung and sound it forth from the distant hills. It strikes the tones of lengthened hope—the springtime of heaven. Arise, O Lord, on the breast of eternity and let us hear through the shadows the glad note of the day dawn: "Lo, it is I, be not afraid." We pause. There is no response to the call! One has been withdrawn from the sum of human existence. He has carried the burden and he leaves a song. This Chamber has witnessed his life filled with devotion to duty; here is the path he so faithfully trod. He never quenched a single taper that glowed on the human altar. Ah, this mortal has put on the glory of immortality. There shall be no night there; and they need no candle; neither light of the sun; for the Lord God giveth them light and they shall reign forever and ever. Through Jesus Christ our Lord. Amen.

The SPEAKER pro tempore. Without objection the reading of the Journal of yesterday's proceedings will be deferred.

There was no objection.

THE LATE REPRESENTATIVE A. E. B. STEPHENS

The SPEAKER pro tempore. The Clerk will report the special order for to-day.

The Clerk read as follows:

On motion of Mr. COOPER of Ohio, by unanimous consent—

"*Ordered*, That Sunday March 11, 1928, at 2 o'clock p. m. be set apart for memorial exercises in commemoration of the life, services, and character of the late Hon. A. E. B. STEPHENS, former Representative from the second district of Ohio."

Mr. MOORE of Ohio. Mr. Speaker, I offer the following resolution.

The Clerk read as follows:

House Resolution 135

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. A. E. B. STEPHENS, late a Member of this House from the State of Ohio.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of these exercises shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolutions were unanimously agreed to.

Mr. TATGENHORST. Mr. Speaker, may I give my tribute to those which are to be given? Let me briefly review the life of that noble man whom we here do reverence. Col. A. E. B. STEPHENS was born in Hamilton County, Ohio, June 3, 1862, the son of S. Kyle Stephens, of Civil War fame, and Minerva Smith Stephens. Educated in the Cincinnati public schools and a graduate of Chickering Institute, he became a teacher at the age of 20. After serving in educational fields for about 12

years, he became interested in politics, and was appointed administrator of a stamp tax levied by the Federal Government to pay the costs of the Spanish-American War. Thereafter he held the offices of clerk of courts and deputy county treasurer in Hamilton County, meanwhile studying law at night, and eventually being admitted to the bar. But the call of public service was too strong, and he was again elected as clerk of courts, where he served three successive terms. In 1916 he retired from politics to resume his law practice, but in 1918 the Republican Party drafted him to run for Congress. He was elected by a large majority, which increased each term, until, at his last election, although he had been ill and unable to campaign, he polled 10,000 votes more than his opponent.

He had been an advocate of home ownership for more than a quarter of a century and served as president of the Miami Township Building & Loan Co. for 27 years, and as director of the Hamilton County League of Building Associations for several years. From 1901 to 1903 he was a captain in the Ohio National Guard and, after a retirement of seven years, served as colonel for a year. In 1915 he was elected national commander in chief of the Sons of Veterans, United States of America.

He served for four consecutive terms in the House of Representatives, and was elected for a fifth time during his last illness. His friends were overwhelmed with grief when they learned that he was fatally ill. He, himself, demanded to know the truth about his condition, and when he was frankly told that he could not recover he once again revealed himself as a true soldier and statesman. He put his house in order and calmly waited until the great All Father announced adjournment.

His burial day witnessed a great outpouring of the people he had so nobly served. They came from the neighboring cities, counties, and States to pay homage to this great soldier and statesman, this kind and dutiful son, this loving and beloved husband and father. They came from far and near, from every station of life—the rich and the poor, the great and the insignificant—all to pay homage to one whom they knew and loved, one they admired and respected, one they believed and trusted—"BUZZ" STEPHENS, their neighbor, their friend; a true, loyal, patriotic American. And their feelings are well summed up in the following editorial by Colonel Moore, of the editorial staff of the Enquirer, who knew Colonel STEPHENS for 35 or 40 years:

[From the Enquirer, Sunday, February 13, 1927]

A WORTHY CITIZEN

The death of Representative A. E. B. STEPHENS, which occurred Saturday morning, was not unexpected. It came, nevertheless, as a shock to a multitude of friends, who had been hoping against hope that he might somehow win his gallant fight for the life which long had been so useful to his city, State, and country.

"BUZZ" STEPHENS—for so he came familiarly to be called by intimate, admiring friends—will sadly be missed, for he was so vital, so buoyant a part of life—life filled with laughter, cheer, and all friendliness, with opportunities for service. And "BUZZ" STEPHENS possessed both inclination and capacity for that service which makes this world a better world.

Genial, courageous, capable, sympathetic, with Celtic warmth to fire his purposes and inspire his idealisms, he was a success within the true meaning of the word. He possessed that wealth which is the immemorial heritage of those who have realized that God is good and the world worth while. He knew the love of home and children—the real love—and this is much. His record as a man, citizen, and public servant is one without reproach. His requiem will be breathed by many, and it will be soft with the sighs of a haunting regret, but thrilled with a pride and tenderness born of memories more enduring than are chaplets woven for the brow of living achievement.

In the death of Mr. STEPHENS, Cincinnati, Hamilton County, the State, the Congress, and the Republic lose a citizen whose life honored and ennobled them in conspicuous wise.

Mr. McSWEENEY. Mr. Speaker and my colleagues, I would, indeed, be recreant to my better nature if I did not avail myself of this opportunity to express the appreciation I have always felt for the life and character of Mr. STEPHENS. I regret that my opportunity to view his life was through the narrow vista of a short acquaintance. The few sessions of Congress in which I had the opportunity to know him gave me just a short acquaintance, but I find that short acquaintance proved to me that the dominating characteristic of his beautiful nature was friendship.

I remember when our colleague JOHN RANKIN, of Mississippi, delivered that beautiful eulogy on the life of Mr. Little he said that friendship was the vine that scaled the party wall and shed its fragrance on both sides.

If I may carry the metaphor further, I would like to say the tentacles of that vine of friendship go into the cracks and crevices of the wall—they go into the soft mortar and the plastic brick and finally disintegrate the wall.

And so to-day we sit here and express ourselves for the regard of Mr. STEPHENS, and so the party wall crumbles apart, and over it the trailing vines of friendship grow.

We are proud of his achievements. To his gracious wife I know that nothing can be of any comfort to her now except the memory of the delightful years of their happy life, but I hope she will allow us gathered here to in some way abridge her anguish and grief and have that beautiful assurance that Mr. STEPHENS added greatly to the sum of human joys and that with God's grace we may exemplify his life, which was worthy of exemplification.

Mr. MOORE of Ohio. Mr. Speaker, how feeble are words at a time like this. We think, in the inspiration of a great occasion or when enthusiasm runs rife, we can command the proper words to express ourselves, but could we call upon a limitless vocabulary, I am sure, in time of sorrow like this, when we try to speak about our friends, words seem inadequate to express our feelings of bereavement, sympathy, and appreciation. However, as one who loved the departed, I should like to add my word of appreciation for the beauty of this life and for the opportunity that I have had of being one of his friends and being able to call him my friend. Some sit before me who came into the Sixty-sixth Congress, when Mr. STEPHENS first came here. I can recall meeting him for the first time in that spring of 1919—tall, handsome, upstanding, commanding, a man of many parts, who would attract attention, and did, wherever he went. In the House Office Building his office was near mine, and day by day as he went down the corridors he frequently stopped with a word of good cheer. I shall ever remember the kindness, the sympathy, the warmth and geniality of my friend "BUZZ" STEPHENS. But he is gone, and he needs no word of mine to endear him to you or for him to have the place he rightfully occupies in the community and in the country.

I had the honor, the sad honor, to be a member of the funeral party that went out to his home when we laid him to rest, amid a sea of flowers and in the presence of a host of friends who gathered at his beautiful home, at a beautiful spot along the Ohio, to do him reverence and honor. A fatal malady sorely afflicted him, but, unafraid and without complaint, he bore his suffering bravely. I was impressed with what his faithful wife and devoted children report he said when he was told about his affliction. He said in substance:

Let no one worry about this; I have enjoyed life; I have had many of its pleasures and have seen many of the beauties of life, with few of its sorrows and displeasures, and now I can but uncomplainingly bear the things that have come to me.

Brave indeed, but just like him, and so out there amid his friends in that little village close by the great city of Cincinnati, with the pastor of the church to which he belonged and where he had served, in a beautiful service he was laid to rest. I can remember the many evidences of friendship at the funeral and the esteem in which the people held him. We stood on the great, spacious lawn, with neighbors and friends, just as has been said, the rich and the poor, the young and the old. They all loved him because he loved them all. Along the way, in the magnificent dwelling or the humble hut, I could see his portrait in the window draped with the badge of mourning. Many were the evidences in that little village of the esteem in which his neighbors and friends held him.

None knew thee but to love thee,
None named thee but to praise.

So I pause to-day to pay my tribute of appreciation to "BUZZ" STEPHENS. He did impress this chamber, not in the way some men seek to impress it, by the spectacular, but rather by that quiet, careful, painstaking attention to business, the faithfulness, the constancy that become men who really do things; and on the Naval Affairs Committee, and in the business of the House, we found him faithful in attention to duty, always trying to serve his constituency as he thought represented their views. True, we differed upon some questions, but I am sure it was always an honest difference; fighter that he was, partisan as he was, he was always fair and kindly and could see another's viewpoint.

I take it these are some of the things that helped him to achieve success here as well as elsewhere, and so we leave him. "To live in hearts we leave behind is not to die," and so we shall think of our friend. His handsome figure is gone, but we can still see it. His voice is stilled, but we can still hear it, with its kindly notes of warmth and sympathy, as he looked

out into the future, unafraid. As we approach the springtime, full of hope and cheer, we think of him as the poet speaks, I believe, in the Chambered Nautilus:

Build thee more stately mansions, O my soul,
As the swift seasons roll!
Leave they low-vaulted past!
Let each new temple, nobler than the last,
Shut thee from heaven with a dome more vast,
Till thou at length art free,
Leaving thine outgrown shell by life's unresting sea!

"BUZZ" STEPHENS, as he was familiarly called, was patriotic, sincerely so. The son of a Civil War veteran, that gallant group have lost a sincere friend in his passing. As national commander of the Sons of Veterans I had the opportunity once in the city of Philadelphia to observe how that organization loved and honored him. He manifested great interest in the National Guard and everything that was for our defense. We shall miss him here; he will be missed everywhere, and yet we shall not forget him. While we may forget some things, yet those things that made up the real Colonel STEPHENS are lasting and enduring—personality, sympathy, warmth, genialty, courage, faith. They are all attributes of character that are eternal and endure.

Mr. CROSSER. Mr. Speaker and friends, as I regard them, extravagant eulogies discredit the lives and virtues of those whom they are supposed to praise. Too often the desire on the part of the panegyrist to attract attention to his own ability as a mental gymnast or juggler of words diverts attention from the person whose undoubted virtues it is the ostensible purpose of the speaker to emphasize. I shall, therefore, in the few words I shall speak, endeavor to avoid committing that sin.

Unfortunately it was not my privilege to know Congressman STEPHENS intimately, but I did know him sufficiently well to recognize in him some of the essential virtues characteristic of a true man. One of his characteristics which particularly attracted me was his innate modesty. I remember a clear thinker once saying to me that he knew of no quality so attractive to him, in a man, as modesty. If that is true, then we can truly say that Mr. STEPHENS was a most attractive person, because he was indeed modest. Another characteristic, which, during my short acquaintance with him, impressed me was his sincerity. He did not pretend agreement when he did not agree. He was, however, always genial and fair toward those with whom he disagreed. To be known for unwavering sincerity should be the constant aim of every man.

All who knew Mr. STEPHENS recognized the fact that he had a genuine love for his fellow men. He was not, however, one who discussed his service to others or chattered about his altruism or of what he planned to do for the welfare of humanity. In his modest way he was happy in serving without talking about his service. That is evidence of genuineness.

When we live the principles of unity and brotherhood our influence will be felt by others and no language will be needed to make known the fact. It is generally the failure to express in fact the principle of true brotherhood that leads men to boast of their brotherly qualities.

Mr. STEPHENS and myself differed on many subjects. I was opposed to some things that were dear to his heart. But he was actuated by good motives and thought he was right, and anyone who does what he thinks to be right is a true man.

I might sum up what I might call the modus of Mr. STEPHENS's life in Van Dyke's words:

Who seeks for Heaven alone to save his soul
May keep the path, but will not reach the goal;
While he who walks in love may wander far,
Yet God will bring him where the blessed are.

In other words, Mr. STEPHENS was not concerned in achieving a place in what are called the celestial regions. He had a better understanding of the Divine scheme. He instinctively felt that the infinitely good Creator must have made all that He made truly good, and so our brother STEPHENS intuitively recognized the good in every fellow man and loved them accordingly.

We mourn unnecessarily, at times, the seeming extinguishment of those whom we love. We should realize the truth of Longfellow's words:

There is no death: what seems so is transition.

Mr. WOODRUFF. Mr. Speaker, I was not so fortunate as many have been to have known "BUZZ" STEPHENS during many years of his life. Judging from what I knew of him during the last few years of his service here, I am of the opinion that those who were so fortunate as to have known him during all the years of his maturity were fortunate, indeed.

I knew him first in the House of Representatives as a serious-minded, dignified Member, a man intensely interested in everything taking place herein. It was not until I became a member of the Committee on Naval Affairs that I had an opportunity to know him as he really was. In working with him there, not only with the entire committee but also as a member of several subcommittees, I learned to know his kindness of heart and the deep sympathy and understanding which prompted him to do many things. I learned to know the seriousness with which he accepted the obligations of office.

It was my privilege to take a trip of inspection with him as a member of the Committee on Naval Affairs. On this trip, lasting two months and a half, I was with him night and day. I learned then that nothing, no matter how unimportant, in connection with the matter he had under consideration or under investigation was too insignificant for his most serious consideration. I think, and the members of our committee on that tour of inspection sometimes felt that we were devoting too much time to little, unimportant things, but upon the completion of the work Mr. STEPHENS, who was ranking member on the committee and as such was chairman of the same during this tour of investigation, prepared and submitted to the entire Committee on Naval Affairs a report of that trip, which is a classic. The great chairman of the Committee on Naval Affairs, the beloved and honored gentleman from Pennsylvania [Mr. BUTLER], upon reading that report, asked that it be printed in full and be made a permanent record of the committee, to which reference could be made at any time in the future.

In my association with Mr. STEPHENS I learned to know all the many fine qualities of the man. I learned to love him for what he was. I learned to know of his great courage, a courage that at the last caused him to look death in the face with a smile, and I am sure that when the time came for him to enter the great realm of eternity, he trod that path as he had all others with his head erect and his heart unafraid.

Mr. CHINDBLOM. Mr. Speaker, I would feel recreant to the memory of a very dear friend if I did not avail myself of the opportunity to speak a word, upon this occasion, about our universally beloved late colleague, the Hon. A. E. B. STEPHENS, of Ohio.

I was one of a considerable number who came to the House at the same time as did Colonel STEPHENS. We arrived together to attend a special session of the Sixty-sixth Congress in the month of May, 1919. Soon after my arrival I had an opportunity to make a trip to the United States Naval Academy at Annapolis. It was on that occasion that I began to get acquainted with Congressman STEPHENS. We came home from that trip together, we lived in the same hotel for some months, and from that time forward we found ourselves in close association and in quite uniform agreement in our work in the House of Representatives.

I join in all that has been said about his kindly and genial nature, his lovable personality, the droll wit and humor which frequently characterized his speech, the common-sense view that marked his judgment—all of those characteristics of the average American which are known the world over and have given him a reputation for frankness, integrity, uprightness, and reliability.

I did not serve with him on committee, but I saw much of him in the House. He was constant in attendance and in attention. I can almost see him now coming over and sitting down beside me and saying: "CARL, what do you think about this proposition?" After I had told him, he would say "Well, I am thinking about it," and he was constantly "thinking about it," constantly giving the best of his clear and discerning thought to the many perplexing questions that arose.

After all, the men who give such attention to the work of the Congress are the valuable men here. Flashes of debate attract the popular attention—moves of parliamentary procedure are interesting to the audience in the gallery and to the readers of the RECORD, but we who have served in the House for a little time know that the great work of the Congress is done in the standing committees, and that the final fruits of our labor grow upon the tree of diligence, constant attention, and intelligent application.

The friendship and affection which Colonel STEPHENS and myself established in the course of time extended to our families. We in our household have felt the keenest regret and sorrow that he should be taken away, and his surviving family have our deepest sympathy.

There may have been those who did not fathom the genuine sincerity of our beloved brother, his geniality may have hidden to some the deep seriousness of his mind and soul, but I had

some opportunity for understanding the depth of his nature, and it was not surprising to me to learn that when the time came for the great test he was unafraid, ready, and willing to look forward to the great unknown with equanimity, hope, and satisfaction. His life had been clean and wholesome. He had been a useful citizen. He had served his country well in civil and military capacity; he was an able legislator, a wise counselor, a steadfast friend; God bless his memory.

Mr. BEGG. Mr. Speaker and colleagues, we have come together this afternoon to memorialize the passage of one of our colleagues, the Hon. A. E. B. STEPHENS, familiarly known to all his friends as "BUZZ." If our only purpose was to say nice things about his memory, I question whether were he conscious of our actions he would advise us to do it.

His record is completed, his achievements are all done. Nothing that one of us who are left behind will say or do can add one iota to his history.

I like to think that were he conscious of this afternoon's proceedings he would hope that by our acting together we might each of us pick something from his life as an inspiration for us for the remainder of our days.

With that thought in my mind, my friends and colleagues, "BUZZ" had two or three traits of character that I think may be an asset to any man. His fidelity to purpose was one, his ability to meet difficulty head foremost with a smile on his face was another. His ability to take what I call a man's punishment without flinching was another trait of character that I think is admirable in any individual. He was honest, of course. He was courageous and conscientious. Those things are to be expected in us all, but only the real men have that ability to be punished in life and come up after disaster hits us.

Fidelity to purpose is one of the most needed traits of men in public life. Personally, I think there is nothing, certainly not in my small experience in life, that so tends to weaken a man in the performance of those duties that he believes conscientiously to be right as to be placed in the position of a representative of his people. Not once to my memory, regardless of what the apparent danger to the individual might be, did "BUZZ" STEPHENS ever fail to vote his convictions. In other words, he smilingly faced the issue and voted as he believed was for the best interests of all the people.

His ability to take punishment—I mean by that to strive for something and then fail—with ability to come up after being disappointed in acquiring that which he desired, came to the fore many times on the floor of Congress, and I recall very definitely one time his sitting on the front seat when he had some measure which he was vitally interested in. After meeting rebuff after rebuff, he came right back smilingly and said, "I am going to keep on until ultimately I accomplish the passage of this bill," and that he did. There is nothing in life that is a bigger asset to a man than that particular trait of character. He had it supreme. I have been told by those who were close to him in the last hours of his illness that he showed that same courage, uncomplaining through all his suffering in his last illness; and I am sure that if the rest of us leave this afternoon determined to emulate to the best of our ability those traits of character which were best in our colleague, the rest of our days will be more courageously filled with the fruits of life that are satisfactory to the individual, and that society will profit by our having been permitted to be a part of it, as it did for his having been permitted to live in it.

Mr. CROWTHER. Mr. Speaker and colleagues, it was my privilege to be a Member of the Sixty-sixth Congress, and enter this body with Colonel STEPHENS. To say that I enjoyed his friendship over a period of years is putting it altogether too lightly. There were many marked characteristics in this departed colleague of ours. I think if there was one outstanding characteristic of "BUZZ" STEPHENS, it was that when he told you something you could depend that it was absolutely true, and truth is a mighty necessary factor in this day and generation, when men for ulterior purposes and motives discuss subjects with you without a real regard for the truth. "BUZZ" STEPHENS knew the joys of service. He knew the happiness of doing things for other people. He could sink himself, his individuality, into almost oblivion if it was for the good of somebody else. One of the great poets said:

Hope not the cure of sin 'til self is dead.
Forget self in love's service,
And the debt thou cans't not pay
The angels shall forget.

I think he exemplified that sentiment in his attitude toward his fellow men and toward his great and tremendous constituency.

The grim reaper stops at the door of every man's house sooner or later. The messenger on the pale horse comes and delivers his message, and none can gainsay him. We all must travel to the great bourne from which no traveler has ever yet returned, and after all, all that we can do is, as our good colleague STEPHENS did, try to get the most out of life, not for your individual self, but by trying to make life a little bit easier, a little bit brighter, a little bit happier for somebody else. After all, that is really all that is worth while.

I have expressed myself on previous occasions to the effect that it would be a splendid thing if once during the session of this Congress we might have a memorial Sunday, when we might have the well of this House decked with flowers, when we might have an organ, or orchestra, and have two or three of the old hymns sung, when we might have a memorial sermon and a memorial address, when we might pay tribute to the memory of our departed colleagues and have this Chamber crowded with all the Members and their friends. I think it would be well if we should hold a general memorial service to the memory of all who have departed, once during the year. Some day I hope that that idea may be perfected and that we may have a service of that character. Just remember that sooner or later our names must appear on the list of the departed; our friends shall gather;

And each shall mourn in life's advance
Dear hearts, dear hopes, untimely killed,
Shall grieve for many a forfeit chance,
And longing passion unfulfilled.

Mr. THOMPSON. Mr. Speaker, Congressman AMBROSE EVANS BURNSIDE STEPHENS and I came to the Sixty-sixth Congress in 1919, both for our first term. We were more than mere colleagues and soon became attached. "BUZZ," as he was popularly known, was a jovial, good fellow and soon became a favorite in congressional circles.

Although he was a native of southern Ohio and I a native of northern Ohio, we seemed to be tarred with the same stick. We were both born in 1862—I January 24 and he June 3. We both spoke the same language; had the same ideals and the same German constituency. Why should not we be drawn together? Both had the same political beliefs and belonged to the same party and were trained under the same political leaders. We were both machine-made men and in the early days trained under McKinley, Foraker, Dick, and Hanna.

He was a lawyer, a graduate of the Cincinnati Law School, while I was a graduate of the university of hard knocks and was the proprietor of a country newspaper. He was admitted to the bar in 1894, while I had acquired my newspaper in 1889, a few years before, and was a contemporary of Harding. He was elected clerk of courts for three terms, while I was a Warwick, making officers in northern Ohio. I had served my term in the Ohio National Guard long before he became captain and quartermaster of the First Infantry of the Ohio National Guard. I mention these facts to show that we naturally became friends by the similarity of our lives, which lasted until death did us separate.

He loved his fellow man. Electing him a Representative in Congress did not change him or make him arrogant. He was always the same kind and considerate "BUZZ" STEPHENS, no difference what his rank in life. That was the way he seemed, and was indeed.

In the House he was accorded the high honor of serving on the national Naval Affairs Committee and at the time of his demise he had attained high rank. And now I wish to pay his memory the sincere and modest tribute of a friend and comrade. It is a significant and pleasing thing that we should gather here in these historic halls for this purpose, where so many crises in the Nation's history have been met, and where the great moments of our beloved colleague were spent.

Mr. Speaker, man can not contemplate the flowers and trees, the hills and valleys, the sun and stars without awakening in his breast the fervid hope of the life beyond.

We are not philosophers; the mazes of theology and the processes of theosophy are to us a mystery; but we can discern beyond the twilight zone which separates the existence here from that beyond the spirit of the teachings of the Nazarene.

We feel an intuitive sense of mighty power, of exalted ideals, of an inexplicable grandeur in nature, and we soliloquize.

Ah, we think, surely if the Power above breathes into the rosebuds the bloom which fills the winds of the valley with

richest fragrance, it is more than chance that the assembled thoughts and hopes and aspirations of men should furnish the hidden motive power that drives the turbine and builds a city.

If nature's alchemy, in the first biting frosts of late summer, will change the mountain forest into a variegated screen for the curious and reflective to ponder over, surely the triumph of this same Master Hand is the marvelous blend of the babel of the human race.

And when the autumn is come and the sear and yellow leaves of the mountain wood glide through the chill November air to light upon the polished steel railroad rails at the mountain's foot to be crushed to bare and sapless skeletons, if the oak and the poplar and the pine will live to reproduce their wonder panorama for generations yet unborn, will the Divine Father leave neglected the souls of men when in their autumn time they shake off the barren hulks that formed the biding places for their short sojourn here?

And when the blasts of winter come, if the Father of Fathers in His all-wise and omnipotent power will cuddle the willow and the rosebud and the palm in nature's protecting robe, and hold forth the prospect of returning summers, will He withhold the promise of the life beyond to the still soul waiting in the grave?

Ah, no! Let us rather believe that the beneficent Creator, who fixes the seasons and the stars, who dispenses the rainfall and the dew, who scatters the pollen to perpetuate the green verdure of mother earth, will find some sweet haven of rest for the tired soul whose earthly span has been devoted to the guardianship of the Master's creation.

Death but marks the terminal of earth's journey and is the transition state to prepare the neophite for initiation into the ethereal splendor of the never-ending day. The finite mind can not comprehend its metaphysical state or encompass its boundless sphere.

Earth's milestones are but weak and linkless chains with which the mortal mind is impotent to reach through the cavern of eternity's fugitive goal. Our day's fleeting sunshine and night's dazzling incandescence are but the glow and flickering of uncertain beacons on the way to the perpetual radiance of the palace in the skies. Earth's broken reeds and shrill flageolets can only form the listening ear to drink the perfect harmony of the celestial choir.

We reach for salvation; it moves away. We grope for understanding; the mind fails. We build by the rule and guide of the prophets and philosophers, and when we would crown the superstructure it crumbles and is gone.

Men whose dominant life's note is accomplishment of salvation for their own souls are but self-serving ambassadors, who treat in a language unspoken by the Creator; but he who holds self as an infinitesimal being save as he may commingle his impulses and aspirations with the universal scheme must become an indispensable part of the general plan.

Speaking for my colleagues in Congress assembled here on this occasion, we wish to extend our sympathy to the wife, daughters, and other relatives of our beloved colleague and comrade, and to say to you that amidst your heavy burden of sorrow you must recognize the right to feel a just pride in future years that no man in Ohio history will occupy a higher place on the roster of honor and that few men have ever contributed a more substantial and definite service to his fellow men than did AMBROSE EVANS BURNSIDE STEPHENS.

Mr. DRANE. Mr. Speaker, it is considered a privilege that I should be permitted to come here to-day to pay tribute in loving memory of one who was for years one of my close personal friends.

I met him the day he came to be a Member of the Sixty-sixth Congress, and in a few days found that he had been assigned to duty with the Committee on Naval Affairs, to which I was also attached, and thus began a friendship between two men of opposite political faith which lasted through all the years which followed and ended only when I followed him to his last resting place on a hillside in the county of his nativity.

That he was a man of the people was demonstrated in an unmistakable manner when I saw the "mourners go about the streets" in Cincinnati, in North Bend, where he had lived his life, and in a number of villages through which the long cortage slowly wended its way to the "narrow house," where he now sleeps the sleep of the just. The people along the way in unnumbered thousands were from the farm, the factory, the small shop. They wore the apparel of workingmen; their doors were closed; their windows were darkened; their sorrows was depicted on their faces. The streets, the lawn, the open spaces were full to overflowing of these people among whom he had "lived and walked and had his being."

The outstanding characteristic of the man in his social relations with his fellow man was kindness—his was a genial soul; it radiated sunshine and was best portrayed in song and story. I have seen it demonstrated as we journeyed together from Hampton Roads to Panama, to far-away Hawaii, in California with his Masonic brethern, with whom he particularly loved to mingle, and here at the Capitol where he oftentimes provoked a smile just by the force of his genial nature.

In his official life he was thoughtful, thorough in his work, with an analytic mind, always stern and unbending in anything having the least suspicion of waste, extravagance, or wrongdoing. Among his fellows he was regarded as a "good Congressman"; going about his daily work in the same earnest way as though this work might be for his own personal business. He was respected and loved by the members of his committee, from the venerable chairman thereof to the youngest member, and it was a sad day to them when he left them a vacant chair.

I best love to remember him as a close personal friend, who was loving and kind and true; who ministered unto me on my bed of pain and sickness; who smiled at my joys and dropped a tear when he knew of my sorrow. Thus, I love best to remember him and this memory will always abide with me.

We were not of the same political faith, but in all things essential, when love of country was involved, we found that we were as one. On the 12th day of February, 1927, in his home, where the Ohio makes its big "north bend," he fell upon sleep and the cycle of his life was complete. The old year was dead, the new year had just begun and winter held its icy sway. The fields were bleak and cold and o'er the landscape was but little to remind one of the busy toil of the husbandman, because the crops had been garnered, and all that remained of the harvest was the corn in the shock, and so he came to his end—

in a full age, like as a shock of corn cometh in in his season. (Job v: 26.)

Mark the perfect man and behold the upright: for the end of that man is peace. (Psalms xxxvii: 37.)

Mr. UNDERWOOD. Mr. Speaker, it is with hesitancy that I contribute a word to the life and character of our departed colleague. It is always difficult to speak of a dead friend. These splendid eulogies to this splendid man make us all feel as if we were in the presence of a hallowed spirit, and we are. Ohio has mourned the loss of many illustrious sons, but, Mr. Speaker, I dare say no finer tributes have been paid to a deceased colleague of our delegation and none have been more deserved.

When I first entered the House five years ago, "BUZZ" STEPHENS was one of the Members to whom I was attracted. He became my friend; I was his. I had an ardent admiration for his fine qualities. With our offices located on the same floor and but a few doors apart, I soon learned from contact with this estimable gentleman that he was big of heart and big of mind, with a poise that definitely decided his actions and a judgment to chart his own course. His feet were always on the ground, his head never above the clouds. His life was full of activity and service. He has left a splendid heritage to his family, his friends, his State and his country.

We all know by experience that the path to public favor is not a royal road. No man enters it and survives who bends to every breeze that blows. We always respected the views of our deceased friend as the views of an honest public servant. It was not necessary for us to agree with them to respect them.

"BUZZ" STEPHENS served his constituency well. He endeavored to serve his people but it can be truthfully said he never surrendered his conscientious views. His conclusions were the result of investigation and reflection. They were not based upon fleeting sentiment but the courage of his convictions. This trait we all admired and respected.

Our State and Nation has lost a man whose views were not sectional but nation-wide. His was a useful life full of friends and love for his fellow-men that made for him a constantly increasing circle of friends. We are in the presence of the life record of a true and noble man. I knew and respected him as a candid, courteous, and courageous gentleman and friend, not on particular occasions and in certain things, but at all times and in all things.

Others are better qualified to speak more in detail than I. I shall not attempt to do so. I hesitantly add my own humble tribute of admiration and respect to those which will be so much more fittingly expressed by others on this floor. We mourn

his death as a distinct loss to this body, to our beloved State and to the Nation. The death angel beckoned; our colleague, Hon. A. E. B. STEPHENS, was called from the tide of this world's aspirations, its hopes and its victories, into the great beyond. As we pause in the pathway of life and ponder, there is no death, as has been aptly said:

Death is but the door through which we pass
To meet those gone before;
'Tis but the stopping of the mortal breath,
The spirit passes on.
There is no death.

Mr. SWING. Mr. Speaker, I desire to add my voice to the voices of my colleagues in paying tribute to the life, work, and character of our late colleague, A. E. B. STEPHENS. It was my privilege to serve for four years with him on the Committee on Naval Affairs, during which time we traveled together on several trips of inspection, which brought me into closer acquaintance with him than would otherwise have been my privilege. I found, as all of us found, that Mr. STEPHENS was not a man to force his friendship upon you, but if you sought it and won it, you found a friendship which was lasting and worth while.

He was never a man who sought the spotlight. Quiet, retiring, and unassuming in manner, yet he possessed reserve, power, and courage whenever occasion required, and he did not hesitate to take a position for what he thought was right and maintain it tenaciously and energetically to the end.

As a statesman he was thorough and painstaking, honest and conscientious in his work. As a friend he was loyal and sincere and a source of comfort and encouragement. He was older in service and older in years by a good deal than myself. He represented the district in which my family tree spread its roots and reared its principal branches.

He knew more about my family than I knew myself. Perhaps for this reason he kindly assumed guardianship over me on my arrival in Congress and gave me much friendly advice and encouragement. The merry twinkle of his eye, which we all have seen so many times, bespoke a kindly heart which sought happiness, not for himself alone, but also for those about him, for he was one of those who were happiest when making others happy.

One can not think of our friend "BUZZ" STEPHENS without also thinking of his beloved wife, because she was part and parcel of his life and contributed directly to his success. She entered into his hours of labor as well as into his hours of recreation.

The pleasure of knowing her added to the pleasure and value of the friendship of her husband. "BUZZ" STEPHENS had occasion to visit my district in California a number of times and he was known and loved there in the same way as he was known and loved in Ohio.

If I had the power to give expression to the promptings of my heart, or if I were the master of words, I would weave them into a wreath of everlasting flowers and place them beside his name and memory as my tribute to a friend; but lacking that power I humbly but sincerely speak these few words in token of my affection for a man who loved his fellow men and who, in turn, was loved by them.

Mr. MURPHY. Mr. Speaker, we have gathered here this afternoon to pay our tribute of love and esteem to the memory of our former colleague and dear friend, Hon. A. E. B. STEPHENS, who was summoned into the great beyond on February 12, 1927. And as we gather here a great question arises before us, and that question is "What is life?" One writer very beautifully expresses it thus:

Life is a beautiful shell,
Thrown up by eternity's flow,
On time's bank of quicksand to dwell
And a moment of loveliness show.
Gone back to its element grand
Is the billow that brought it ashore,
See! Another is washing the strand
And the beautiful shell is no more.

Another writer who has thought much describes life as—

A little loving and a great deal of sorrowing, some bright hopes and many grievous disappointments, some gorgeous Thursdays when the skies are bright and the heavens blue, when Providence bending over us in blessing gladdens the heart almost to madness, many dismal Fridays when the smoke of torment beclouds the mind and darkens the soul.

The gorgeous Thursdays and the dismal Fridays are all alike to our beloved dead. Our hearts are beating a little faster because they are aching with sorrow for the relatives of our friend and colleague who has been summoned into the misty beyond, and so we see that—

There is no flock, however watched and tended,
But one dead lamb is there.
There is no fireside howsoe'er defended
But has one vacant chair.

And so this afternoon we look out for a little while over that boundless sea on whose bosom all sails are outward bound and trust that the barque that bears our departed may be wafted by soft perfumed breezes over calm seas into a safe haven. The future is God's—to-day is ours, and we are again reminded that only in the temple of memory can we find the picture and the records of the good deeds done by our departed friend, and so we take them down from memory's walls and hold them up as beacon lights to those who are traveling on to the end that we, too, may be remembered, realizing that the impressions made on the human heart and mind outlive and outlast anything that could be carved on cold graystone. The desire to be remembered has ever been a ruling passion in the heart of man. Every page of history proves this great truth. The desire not to be forgotten spurs on ambition to attempt the greatest tasks with the hope that when we are gone our names may be held in grateful remembrance by our fellow men. That hope urges on the strong to greater efforts and adds its strength to the arm and brain of the weak.

Love of wealth, power, position—all have back of them the hope that when the struggle is over and history is written our names and deeds will not be forgotten.

Even the Savior of Mankind gives evidence of this strong desire of the human heart when on that last memorable night He called His beloved disciples together and broke bread with them, saying: "Do this in remembrance of me."

Many years ago a young German musician fell madly in love with a lady of higher station in life than his own, so one day while visiting his sweetheart he bade her farewell, saying he was going to go away to a distant land where he would make a name and a fortune such as could place him on an equality with her, and then he would again return and claim her hand. So one day he returned and he and his sweetheart were happily married, and one day during their honeymoon they were strolling along the beautiful banks of the River Rhine and spying a delicate little blue flower blooming near the edge of the water and desiring to secure some of these winsome little flowers for his bride, he ventured and secured the flowers, but the bank gave way under him and he was carried out with the swift waters to certain destruction, and seeing that he could not get back again to shore he tossed the little blue flower to his loved one, saying "Forget me not," and thus was the name of the little blue flower, known in Germany as the "Mouse ear," changed to the name "Forget me not," and so this modest little blue flower memorializes the desire of a human heart to be remembered.

And so as we ponder at these memories the thought comes to us: For what do we want to be remembered? What did we do yesterday—last week—last year—yes, to-day? While we now live and understand, what have we done—now, as we examine ourselves, don't you think we could live a little better—be a little more pleasant—practice a little more secret charity—be a little broader in our views—speak a few more kind words as we travel down toward the setting sun—smile as we go through life and all our troubles will vanish like the mists before God's beautiful sunlight, and all we meet will be happier because we passed this way?

You gave on the way a pleasant smile,
And thought no more about it.
It cheered a life that had been dark the while,
Which might have wrecked without it.
And so for that smile and fruitage rare
You'll reap a crown sometime—somewhere.

Generations of men will appear and disappear as the leaves of the trees and the multitude that throngs the world to-day will disappear as the footprints on the sands of the seashore.

We rarely think of the great event of death until the dread angel casts the shadow of its wing across our pathway and silences the voice and robs us of the companionship of those we love. We dread to think of the journey through the dark valley, although it may lead to the place we call Paradise. And so the ripening process of human lives goes on and, I trust, will make us sweeter and more mellow toward the faults and foibles of our fellow creatures and inspire in us a desire to help some time-worn and discouraged fellow being to a nobler and better life.

Since the dawn of light, man has vainly sought to peer through the mystery that we call death. In vain have we listened for some message from the misty beyond. In vain has man tried to bribe the inexorable Charon to ferry a soul back to this side of the river. Occasions such as this are the outgrowth of that human longing not only for fellowship in life but comfort in death; when we are brought face to face with the grim tyrant that "Rides the pale horse" we grasp for the hand of our friend and colleague. We are all taught that death is nothing more than a rebirth upon some Elysian shore. When we turn with reverent pause and tearful eye on the memories of the past, while we realize that the places that knew our friend and colleague will know him no more, and while those living friendships that cheered and warmed the cockles of our hearts are now but recollections pure and sweet, we also realize "That never morning wears to evening but some hearts do break," for man is born to die.

With sympathy for the friends and relatives of our departed colleague, we turn again to cheering the living, to pointing out for emulation the shining marks whom death has claimed, and to stretching forth the helping hand to aid the struggling friend, hoping ever that our lives may prove a beacon light whose rays falling athwart life's channel may guide the bark of God's children clear and safe of the reefs and shoals of adversity and malice direct into that harbor whose placid waters shall form a haven safe from all hostile winds. And so we resume our everyday tasks, glad in the promise of that eternal springtime when God shall wipe away all tears from our eyes and death shall be no more.

It seemeth such a little way to me
Across to that strange country, the beyond,
And yet not strange for it has grown to be
The home of those of whom I am so fond.
It seems to grow familiar and most clear
As journeying friends bring distant regions near.

So close it lies that when my sight is clear
I think I can almost see the gleaming strand.
I know I feel those who have gone from here
Come close enough sometimes to touch my hand.
I often think but for our veiled eyes
We should find Heaven right round about us lies.

I can not make it seem a day to dread
When from this dear earth I shall journey out,
To that still dearer country of the dead
And meet the friends so long dreamed about.
I love this earth yet shall I love to go
And meet the friends that wait for me, I know.

I never stand before a bier and see
The seal of death set on some well-loved face
But that I think of one more to welcome me
When I shall cross the intervening space,
Between this land and that one over there.

And so for me there is no sting to death,
And so the grave has lost its victory,
It is but crossing, with abated breath
And white set face, a little strip of sea
To meet the loved ones waiting on the shore
More beautiful, more precious than before.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. McSWEENEY] will please take the chair.

Mr. McSWEENEY assumed the chair as Speaker pro tempore.

Mr. COOPER of Ohio. Mr. Speaker, we have met this afternoon to honor and pay tribute to one of our Members who has passed away from the trials and cares of earthly life.

In paying tribute to the life and memory of Congressman STEPHENS, I count it an honor to offer a few words at this time.

It was my good fortune to have had a close personal acquaintance with him during his eight years of service in this House.

He was a man of deep convictions, intensely devoted to his congressional work, and never permitted selfish or political issues to set aside his convictions on important public questions.

I believe it can truthfully be said of him that during his service in Congress he tried at all times to represent the people of his district, State, and Nation regardless of political views or station in life.

One of the pleasant recollections I shall take with me when I retire from Congress will be the great privilege I have had in the personal acquaintance with such men as "BUZZ" STEPHENS.

But there comes a time in all of our lives when we must part with loved ones who have been near and dear to us.

The Divine Maker in His wisdom saw fit to sound taps and call to the colors above this soldier and statesman.

He has passed away from the busy life of turmoil and strife to rest in peace.

No word of mine can bring him back again, nor can I bring much comfort to the sorrowing loved ones left behind, only to say that we do have the promise of Him, the Supreme Ruler of all, that some day we will be united once again with those who were ever near and dear to us in earthly life.

Through the death of our colleague and friend a good and upright man has passed away. Peace be to his soul.

Mr. COOPER of Ohio resumed the chair as Speaker pro tempore.

Mr. MOORE of Ohio. Mr. Speaker, I ask unanimous consent that all Members may have leave to revise and extend their remarks on the life and character of the late Representative A. E. B. STEPHENS.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

ADJOURNMENT

The SPEAKER pro tempore. In accordance with the resolution previously adopted, and as a particular mark of respect to the memory of the deceased, the House stands adjourned until 12 o'clock to-morrow.

Accordingly (at 3 o'clock and 38 minutes p. m.) the House adjourned until to-morrow, Monday, March 12, 1928, at 12 o'clock noon.

SENATE

MONDAY, *March 12, 1928*

(Legislative day of Tuesday, March 6, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the President of the United States.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Hess, one of his secretaries, announced that the President had approved and signed the following joint resolution and acts:

On March 8, 1928:

S. J. Res. 66. Joint resolution authorizing an additional appropriation to be used for the memorial building provided for by a joint resolution entitled "Joint resolution in relation to a monument to commemorate the services and sacrifices of the women of the United States of America, its insular possessions, and the District of Columbia in the World War," approved June 7, 1924.

On March 9, 1928:

S. 1455. An act to grant extensions of time under coal permits;

On March 10, 1928:

S. 771. An act providing for the gift of the United States ship *Dispatch* to the State of Florida;

S. 2483. An act to revive and reenact the act entitled "An act granting the consent of Congress to the State of Illinois and the State of Iowa, or either of them, to construct a bridge across the Mississippi River, connecting the county of Carroll, Ill., and the county of Jackson, Iowa," approved May 26, 1924;

S. 2545. An act to authorize the sale of certain lands near Garden City, Kans.;

S. 2698. An act granting the consent of Congress to the State of Vermont to construct, maintain, and operate a free highway bridge across an arm of Lake Memphremagog at or near Newport, Vt.; and

S. 2801. An act granting the consent of Congress to the New Martinsville & Ohio River Bridge Co. (Inc.), to construct, maintain, and operate a bridge across the Ohio River, at or near New Martinsville, W. Va.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes; that the House

had receded from its disagreement to the amendments of the Senate numbered 25, 26, 42, and 45 to the said bill and concurred therein; and that the House had receded from its disagreement to the amendment of the Senate numbered 39 and agreed to the same with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 6073) granting a permit to construct a bridge over the Ohio River at Ravenswood, W. Va.

The message further announced that the House had agreed to the amendment of the Senate to each of the following bills:

A bill (H. R. 66) authorizing B. L. Hendrix, G. C. Trammel, and C. S. Miller, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Mound City, Ill.;

A bill (H. R. 7183) authorizing C. J. Abbott, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Golconda, Ill.; and

A bill (H. R. 7921) authorizing A. Robbins, of Hickman, Ky., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Hickman, Fulton County, Ky.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edwards	La Follette	Shipstead
Barkley	Fess	McKellar	Shortridge
Bayard	Fletcher	McMaster	Simmons
Bingham	Frazier	McNary	Smith
Black	George	Mayfield	Smoot
Blease	Glass	Metcalf	Steiwer
Borah	Gooding	Neely	Stephens
Bratton	Gould	Norbeck	Swanson
Brookhart	Greene	Norris	Thomas
Broussard	Hale	Nye	Tydings
Bruce	Harris	Oddie	Tyson
Capper	Harrison	Overman	Wagner
Caraway	Hawes	Phipps	Walsh, Mass.
Copeland	Hayden	Pittman	Walsh, Mont.
Couzens	Heflin	Ransdell	Warren
Curtis	Howell	Reed, Pa.	Waterman
Cutting	Johnson	Robinson, Ark.	Watson
Deneen	Jones	Sackett	Wheeler
Dill	Kendrick	Schall	Willis
Edge	King	Sheppard	

The VICE PRESIDENT. Seventy-nine Senators having answered to their names, a quorum is present.

APPROPRIATIONS FOR THE WAR DEPARTMENT

The VICE PRESIDENT laid before the Senate the action of the House of Representatives receding from its disagreement to the amendments of the Senate numbered 25, 26, 42, and 45 to the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, and receding from its disagreement to the amendment of the Senate numbered 39 to the bill, and agreeing to the same with an amendment as follows:

At the end of the matter inserted by said amendment insert the following: "; which funds are in full for the conduct, operation, and maintenance of the national matches and the competitions and Small Arms Firing School held in conjunction therewith, except as may be specifically provided for in other appropriations: *Provided*, That members of authorized civilian teams traveling by train or automobile may be paid travel allowance at the rate of 5 cents per mile, which shall include subsistence while traveling, for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the national matches and for the return travel thereto: *Provided further*, That the payment of travel pay for the return journey may be made in advance of the actual performance of the return travel."

Mr. REED of Pennsylvania. I move that the Senate agree to the amendment of the House to the amendment of the Senate numbered 39.

The motion was agreed to.

PETITIONS

Mr. FLETCHER. I present two petitions of citizens of the State of Florida and ask that the wording of the petitions be printed in the RECORD without the names, and that they be appropriately referred.

There being no objection, the petitions were referred to committees as indicated below and ordered to be printed in the RECORD without the names attached, as follows:

UNITED STATES ENGINEER OFFICE,
Jacksonville, Fla., February 24, 1928.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

SIR: We, the undersigned Federal employees at Jacksonville, Fla., respectfully request that you support H. R. 6518, the Welch salary increase bill, and H. R. 492, the Lehlbach bill, a bill to abolish the Personnel Classification Board.

The reason for this request is that the salaries of Federal employees have not kept pace with the increased cost of living, and it is impossible for the average Federal employee to support a family in comfort.

Respectfully,

_____ _____

Referred to the Committee on Civil Service.

TAMPA, FLA.

To the Senate and House of Representatives of the United States:

We believe in immigration restriction as necessary to maintain the unity and safety of our country, and that in order to maintain restriction immigration quotas should be on a fair and impartial basis, discriminating for and against nobody. Accordingly we favor the maintenance of the national-origins system, basing quotas on the entire population—native and foreign born alike—and we strongly oppose quotas based on the number of foreign born in this country at any given time, because that system excludes all native-born Americans in determining the quotas and is so grossly discriminatory that if continued it will throw all immigration restriction into disrepute. We oppose, also, attempts by alien blocs to mangle or repeal the native-origins provision in order to obtain unfair quotas for their native countries.

Respectfully submitted.

Referred to the Committee on Immigration.

Mr. COPELAND presented a resolution of Harold Wilmot Post, No. 137, the American Legion, of Gloversville, N. Y., favoring adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

Mr. NEELY presented petitions of sundry citizens of Huntington and Tyler County, in the State of West Virginia, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. BARKLEY presented petitions of sundry citizens of Morganfield, Earlington, and Christian County, Ky., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

REPORTS OF COMMITTEES

Mr. NYE, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 8311) to provide for the naming of a mountain or peak within the boundaries of the Lassen Volcanic National Park, Calif., in honor of Hon. John E. Raker, deceased (Rept. No. 525); and

A bill (H. R. 9031) to provide further for the disposal of abandoned military reservations in the Territory of Alaska, including Signal Corps stations and rights of way (Rept. No. 526).

Mr. FRAZIER, from the Committee on Indian Affairs, to which was referred the bill (S. 3128) to amend section 3 of the act approved April 12, 1926 (44 Stat. L. 239-240), with reference to suits involving Indian land titles among the Five Civilized Tribes, reported it without amendment and submitted a report (No. 527) thereon.

He also, from the same committee, to which was referred the bill (H. R. 8831) to provide for the collection of fees from royalties on production of minerals from leased Indian lands, reported it with an amendment and submitted a report (No. 528) thereon.

Mr. HOWELL, from the Committee on Claims, to which was referred the bill (H. R. 4203) for the relief of A. S. Guffey, reported it without amendment and submitted a report (No. 529) thereon.

Mr. WATERMAN, from the Committee on Claims, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

A bill (S. 1428) for the relief of R. Bluestein (Rept. No. 530); and

A bill (S. 1899) for the relief of Clifford D. Ham, collector general of customs, administrator of Corinto Wharf, Republic of Nicaragua (Rept. No. 531).

Mr. WATERMAN also, from the Committee on Claims, to which was referred the bill (S. 2706) for the relief of Arthur C. Lueder, reported it with amendments and submitted a report (No. 532) thereon.

Mr. BLACK, from the Committee on Claims, to which was referred the bill (S. 1368) to extend the benefits of the employees' compensation act of September 7, 1916, to Martha A. Hauch, reported it without amendment and submitted a report (No. 533) thereon.

Mr. STEPHENS, from the Committee on Claims, to which was referred the bill (S. 1500) for the relief of James J. Welsh, Edward C. F. Webb, Francis A. Meyer, Mary S. Bennett, William McMullin, jr., Margaret McMullin, R. B. Carpenter, McCoy Yearsley, Edward Yearsley, George H. Bennett, jr., Stewart L. Beck, William P. McConnell, Elizabeth J. Morrow, William B. Jester, Josephine A. Haggan, James H. S. Gam, Herbert Nicoll, Shallcross Bros., E. C. Buckson, Wilbert Rawley, R. Rickards, jr., Dredging Co., reported it without amendment and submitted a report (No. 534) thereon.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HALE:

A bill (S. 3599) granting a pension to Julia E. Randall (with accompanying papers); to the Committee on Pensions.

By Mr. WALSH of Massachusetts:

A bill (S. 3600) granting an increase of pension to Mary E. Barnes; to the Committee on Pensions.

By Mr. SACKETT (for Mr. GOFF):

A bill (S. 3601) granting an increase of pension to Hulda V. Anderson (with accompanying papers); to the Committee on Pensions.

By Mr. CARAWAY:

A bill (S. 3602) to quiet title and possession with respect to certain lands in Faulkner County, Ark.; to the Committee on Public Lands and Surveys.

By Mr. McNARY:

A bill (S. 3603) for the relief of Clara Brunelle; to the Committee on Finance.

By Mr. WATSON:

A bill (S. 3604) granting a pension to Hannah A. Polen; and

A bill (S. 3605) granting an increase of pension to Jennie Corbly; to the Committee on Pensions.

By Mr. WATSON (for Mr. ROBINSON of Indiana):

A bill (S. 3606) granting an increase of pension to Eliza Kellams;

A bill (S. 3607) granting an increase of pension to Mary W. McClung; and

A bill (S. 3608) granting an increase of pension to Louisa E. Howard (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 3609) granting an increase of pension to Charlotte Ingersoll Tucker; to the Committee on Pensions.

By Mr. WHEELER:

A bill (S. 3610) to create a Federal Child Relief Board, and for other purposes; to the Committee on Education and Labor.

By Mr. SHIPSTEAD:

A bill (S. 3611) authorizing the board of county commissioners of Itasca County, Minn., to construct, maintain, and operate a free highway bridge across the Mississippi River at or near the north line of section 35, township 144 north, range 25 west; to the Committee on Commerce.

A bill (S. 3612) granting a pension to Guy H. Noe; to the Committee on Pensions.

By Mr. PHIPPS:

A bill (S. 3613) granting an increase of pension to Lucie Irvin (with accompanying papers); to the Committee on Pensions.

By Mr. SACKETT:

A bill (S. 3614) granting an increase of pension to Elizabeth Hatfield (with accompanying papers); to the Committee on Pensions.

A bill (S. 3615) for the relief of Capt. George R. Armstrong, United States Army, retired (with accompanying papers); to the Committee on Military Affairs.

By Mr. McNARY:

A joint resolution (S. J. Res. 111) authorizing the acceptance of title to certain lands in the counties of Benton and Walla Walla, Wash., adjacent to the Columbia River bird refuge in said State, established in accordance with the authority contained in Executive Order No. 4501, dated August 28, 1926; to the Committee on Agriculture and Forestry.

By Mr. JONES:

A joint resolution (S. J. Res. 112) authorizing the Secretary of War to lend tents and camp equipment for the use of the housing committee for the convention of the American Legion for the Department of Washington, to be held at Centralia, Wash., in the month of August, 1928; to the Committee on Military Affairs.

AMENDMENTS TO FLOOD CONTROL BILL

Mr. RANSDELL submitted amendments intended to be proposed by him to Senate bill 3434, the flood control bill, which were severally ordered to lie on the table and to be printed, and, on request of Mr. RANSDELL, to be printed in the RECORD, as follows:

On page 1, line 4, after the word "valley," insert the following: "including all parts of the main river and its tributaries now under the jurisdiction of the Mississippi River Commission."

On page 2, line 21, after the word "Congress," insert the following: "*Provided further,* That surveys shall be made between Point Breeze, La., and Cape Girardeau, Mo., to ascertain the best method of securing flood relief in addition to levees, and recommendations thereon shall be submitted by the board to Congress before any flood-control works other than levees and revetments are undertaken on that portion of the river: *Provided further,* That all spillways constructed under the provisions of this act shall be regulated and controlled and the lands adjacent to the flood ways shall be as fully protected as those on the main river."

On page 5, line 21, after the word "interests," insert the following: "Just compensation shall be paid by the United States for all property used, taken, damaged, or destroyed, including all property located within the area of the spillways, flood ways, or diversion channels herein provided, and the rights of way thereover, and the flowage rights thereon: *Provided, however,* That this shall not apply to rights of way required to be furnished by the local communities under the provisions of section 3 hereof."

AMENDMENTS TO AGRICULTURAL APPROPRIATION BILL

Mr. FLETCHER submitted amendments intended to be proposed by him to House bill 11577, the Agricultural Department appropriation bill, which were severally referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 27, line 20, strike out "$40,000" and insert in lieu thereof "$50,000";

On page 32, line 3, strike out "$47,780" and insert in lieu thereof "$55,000"; and

On page 46, line 18, strike out "$15,000" and insert in lieu thereof "$30,000."

SOIL SURVEY OF HILLSBOROUGH COUNTY, FLA.

Mr. FLETCHER (for Mr. TRAMMELL) submitted the following resolution (S. Res. 166), which was referred to the Committee on Printing:

Resolved, That there be printed 2,000 copies of the Soil Survey of Hillsborough County, Fla., for the use of the Document Room of the United States Senate, after such revision as may be deemed necessary by the Bureau of Soils of the Department of Agriculture.

CONTRIBUTIONS TO REPUBLICAN CAMPAIGN FUNDS

Mr. ROBINSON of Arkansas. Mr. President, I do not wish to delay the disposition of the pending resolution, but I am prompted by press reports of a letter addressed by the Senator from Idaho [Mr. BORAH] to former Senator Butler, of Massachusetts, present chairman of the Republican National Committee, and the testimony lately presented before the Committee on Public Lands and Surveys of the Senate, to submit some observations respecting the present aspect of the investigation of the leasing of naval oil reserves.

Recent testimony in a branch of the inquiry pertaining to that subject discloses peculiarly disgusting corruption. The Senator from Montana [Mr. WALSH] and his associates long ago revealed the infamous betrayal of their public trust by two former Cabinet members, Secretary Fall and Attorney General Daugherty, and the incompetency and assinine stupidity of former Secretary of the Navy Denby. That committee also disclosed the determination of two prominent captains of American industry, Mr. Blackmer and Mr. O'Neil, of the Midwest Refining Co. and former chairman of the board of the Standard Oil Co. of Indiana, respectively, to expatriate themselves in order to conceal the details of a deal which has many of the aspects of common larceny.

Quite recently a towering figure in American finance and industry, Mr. Stewart, chairman of the board of the Standard Oil Co. of Indiana, by refusing to answer questions propounded by the committee, to which it appears common honesty would have prompted him to respond, defied the authority of the

Senate and challenged the power of the courts of the United States.

Mr. Stewart was unanimously reelected chairman of his board, and some time ago, about the 6th of December, Mr. Sinclair was given a vote of confidence by representatives of the oil industry.

The latest chapter in the story, so humiliating to the country, is that Mr. Sinclair's efforts to corrupt were not confined to Cabinet officers and captains of industry, but extended also to the national political organization of the Republican Party, whose administration first permitted, then apparently aided, and at last concealed infamous plunder of the public and the shameful prostitution of its agents and servants.

Mr. Will H. Hays, chairman of the Republican National Committee in 1920, and in that capacity responsible for a large deficit in the party funds, resulting from an orgy of spending scarcely exampled in the history of partisan politics, received $160,000 as a contribution from Mr. Sinclair. Mr. Hays secretly received $85,000 in Liberty bonds from that chief beneficiary of the fraudulent transactions by which the naval oil reserves were bartered away, and proceeded by methods common to crooks with efforts to exchange the bonds with prominent Republicans for cash.

Such records as were kept warrant the conviction that the whole transaction was corrupt. The testimony of Mr. Hays before the committee in 1924 compels the conclusion that he deliberately concealed the use by him, as political chairman, of the bonds obtained from Mr. Sinclair, and in that sense subjected himself to a possible charge of perjury.

Quite lately, before the committee, when at last the slimy transaction was further in part divulged, Mr. Hays is quoted as saying:

> I did not volunteer about the Government bonds. I was not asked about that.

Every witness when sworn declares that he will "tell the truth, the whole truth, and nothing but the truth." True nobody asked him then direct questions as to whether Liberty bonds were received from Mr. Sinclair in 1924 to help pay the deficit or at other times, but in that year, when testifying, it appears that he was asked whether Mr. Sinclair had contributed more than $75,000 to the Republican committee deficit of 1920, and he answered "no." His testimony now discloses $85,000 in Government bonds, in addition to the $75,000, as a contribution, making a total of $160,000.

The sum of $50,000 in bonds received from Mr. Sinclair was sent by Mr. Hays to Mr. Mellon, who, it appears from his statement, was asked for a contribution. The method pursued by Mr. Hays aroused suspicion on the part of the Secretary of the Treasury. Mr. Mellon stated in his letter to the Senator from Montana [Mr. WALSH]:

> Subsequently Mr. Hays telephoned me one day that he was sending me by special messenger a package containing valuable documents, and that he would see me shortly and would explain the transaction. The package contained, as nearly as I can remember, $50,000 in Liberty bonds.

What was the purpose of thus attempting to dispose of the bonds? They were first-class securities, readily marketable, and could easily have been disposed of for cash on the market. When Mr. Hays called on Mr. Mellon and explained the transaction the latter returned the bonds to Mr. Hays and made a cash contribution of $50,000, the equivalent or nearly that of the value of the bonds.

When before the committee recently the former chairman of the Republican National Committee testified that $60,000 of the bonds were sent to Mr. Upham, $75,000 to Senator DU PONT, and $25,000 to the late John W. Weeks, Secretary of War in President Harding's Cabinet. Why did Mr. Hays then make no mention of having sent bonds to either Mr. Mellon or to Mr. Butler? Who is the "Butler" referred to in the memorandum in the testimony of Mr. Hommel, on which appear the names of Weeks, "Andy," "Butler," and du Pont? When will Mr. Hays divulge the whole story? Will he contradict or corroborate the testimony of Secretary Mellon? How can he restore himself in the public confidence and respect or relieve his party from the odium of having sold itself to the willful despoilers of the Nation?

The letter published in to-day's newspapers addressed by the Senator from Idaho [Mr. BORAH] to former Senator Butler, of Massachusetts, the present chairman of the Republican National Committee, suggesting that the whole transaction was tainted with corruption, and also suggesting that the contribution of Mr. Sinclair be returned to him, if complied with, might be helpful to the party politically, but it could not repair the wrong done to the public in accepting funds from such a source and under such conditions.

It might also be mentioned in this connection that if the organization of the Republican Party is to reform by returning campaign contributions, admittedly corrupt, it may not find itself restricted to restoring to Mr. Sinclair what it took from him as the price of treachery to the Nation; it may have to restore other contributions.

An election carried by such influences may well be expected to reflect such administrative policies as actually prevailed following that election, policies that have been only partially and very reluctantly reformed.

Mr. ROBINSON of Arkansas subsequently said: Mr. President, in connection with the remarks I just made I ask leave to have printed in the RECORD, as a part of my remarks, two newspaper reports, one respecting the letter to which I referred, addressed by the Senator from Idaho [Mr. BORAH] to Chairman Butler, and the other having reference to the letter addressed by Secretary Mellon to the Senator from Montana [Mr. WALSH].

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

[From the Washington Post of Monday, March 12, 1928]

HAYS IS SUMMONED ON SINCLAIR BONDS; BUTLER TO APPEAR—CHAIRMAN WIRES WALSH HE RECEIVED NO OIL CONTRIBUTIONS—MELLON MAY TESTIFY BEFORE COMMITTEE—BORAH WANTS FUNDS RETURNED TO ERASE "HUMILIATING STIGMA" ON PARTY

Leaders in two Republican presidential campaigns will appear to-morrow before the Senate Teapot Dome committee to tell what they know about the disposition of Liberty bonds obtained from Harry F. Sinclair in 1923 for political purposes.

Will H. Hays, Postmaster General in the Harding Cabinet, will be recalled to explain omissions in his previous testimony regarding disposition of the $260,000 in bonds which Sinclair gave him.

William M. Butler, chairman of the Republican National Committee, who directed the Coolidge campaign in 1924, will be asked to repeat under oath a telegram sent last night to Senator WALSH, committee prosecutor, in which he declared he had never received any bonds "or any contributions" from Hays or Sinclair.

MELLON MAY APPEAR

In addition there is a possibility that Secretary Mellon may be called also to give under oath the statement made in his letter to Senator WALSH last night that although Hays had attempted to pass $50,000 of the Sinclair bonds along to him, he (Mellon) had declined to receive them.

While these developments were taking place, Senator BORAH, of Idaho, made public a letter to Chairman Butler, urging him to return all money received by the Republican Party from Sinclair, declaring that as the record now stands "the whole transaction had in view an ulterior and sinister purpose." The Senator said he had received a reply to the letter, which was written on March 5, but that the reply was unsatisfactory. Thereupon, he added, he wrote Butler again, but so far has received no answer.

Efforts of the committee to-morrow will be turned to finding out what became of the $260,000 which Sinclair gave Hays in the form of Liberty bonds of the Continental Trading Co.

One of the points which the committee will seek to clear up is whether Hays ever offered any bonds to Chairman Butler. The chairman in his telegram to Senator WALSH merely stated that he had received none.

RECEIVED NONE, BUTLER WIRES

"I never received any bonds or any contributions from Will H. Hays or Mr. Sinclair," his telegram said, "and I have no records of memorandum under my control relating thereto, or concerning contributions to the Republican National Committee during 1922 and 1923. I have never met Mr. Sinclair and do not know him."

He added that he would appear before the committee to-morrow.

Hays, who has testified that he personally solicited from Sinclair the funds Borah would have the party return, made no reference in his two previous appearances to either Mellon or Butler in connection with the handling of the bonds. The trail to the Treasury was picked up only yesterday from a somewhat mysterious memorandum in the handwriting of a man now dead—John T. Pratt, of New York City—who made heavy contributions to the Republican campaign funds during his lifetime.

FIVE NAMES ON MEMORANDUM

At the bottom of this memorandum which had to do with a Continental Trading Co. bond transaction and a donation to the Republican political chest, appeared the names of Fred W. Upham, Weeks, Andy, Butler, and DU PONT. The "Andy" was taken by the committee to refer to Secretary Mellon, and the record immediately was sent to him. He then wrote to Senator Walsh as to the transaction.

The Senate investigation assumed that the word "Butler" referred to William M. Butler, and a telegram was sent to him asking him to

appear at the hearing to-morrow. There is no evidence that the former Massachusetts Senator did receive any of the Sinclair bonds, but it is now definite that all of the others whose names Pratt wrote on the memorandum did have some knowledge of them.

When he was recalled to the stand 10 days ago, Hays revealed for the first time that besides the $75,000 Liberty bond donations from Sinclair that he testified about in 1924, the lessee of Teapot Dome gave him an additional $185,000 in the shape of a loan to be used in securing any remaining deficit and enabling the national committee to announce when it met in December, 1923, to select the 1924 convention city that the deficit had been taken care of.

HAYS'S STATEMENT TO THE COMMITTEE

In a carefully prepared statement, which he read to the committee, the man who directed the Harding campaign in 1920 said he had sent $60,000 of the bonds to the late Fred W. Upham, then treasurer of the Republican committee; $25,000 to the late John W. Weeks, War Secretary in the Harding Cabinet; and $50,000 to John T. Pratt. He said he returned the remaining $50,000 to Sinclair as it was found they were not needed. The Senate investigators assume this is the $50,000 that Mellon refused to handle after Hays had explained the party financing plan to him.

This division accounted for the whole $185,000, of which $100,000 finally was returned to Sinclair, but not in the form of the same bonds which he delivered to Hays in New York City only a short time after the Continental Trading Co. had wound up its affairs and taken a profit of $3,080,000 in the oil deal with the late A. E. Humphreys, of Denver, and the Sinclair Crude Oil Purchasing Co. and the Prairie Oil & Gas Co.

In its examination Saturday of the records and memoranda taken from the personal files of Pratt, the Senate committee found direct trace of only $25,000 of the Sinclair bonds. These were cashed for Pratt by an agent of Charles Pratt & Co. and the money deposited in a special fund Pratt had set up in the United States Mortgage & Trust Co. and against which a check for $50,000 was drawn in favor of Upham.

HAYS'S ERROR SURMISED

Members of the committee suggested to-day that perhaps Hays was in error in his recollection that he sent $50,000 of the bonds to Pratt; that perhaps only $25,000 of them went to him and the other $25,000 were sent to some one else.

In his letter to Chairman Butler, Senator BORAH said:

"MY DEAR MR. CHAIRMAN: The investigation of the oil scandal has now disclosed beyond peradventure that the Republican Party received large sums of money, or securities, from Mr. Sinclair, which the Republican Party can not in honor or decency keep. As the evidence now stands this money was not given as an ordinary campaign contribution. The whole transaction, even the payment to the representative of the party, had in view an ulterior and sinister purpose.

DEMANDS REPUDIATION BY PARTY

"No political party is responsible as a party for the wrongful transactions of individual members who in secret betray it, but when the transaction becomes known to the party it must necessarily become responsible if it fails to repudiate the transaction and return the fruits thereof.

"I feel that this money should be returned to the source from which it came. We can not in self-respect or in justice to the voters in the party keep it. To do so is to say that political parties are above the law and exempt from the ordinary precepts of morality. I venture the opinion that there are plenty of Republicans who will be glad to contribute from $1 up to any reasonable sum to clear their party of this humiliating stigma, and that all you will have to do is to indicate that course.

"I am perfectly sure your conception of clean politics will view this matter in the light I have suggested.

"Very respectfully,

"WM. E. BORAH."

[From the Washington Post of Sunday, March 11, 1928]

SECRETARY MELLON REFUSED SINCLAIR BONDS FOR $50,000—TREASURY HEAD SAYS HE RETURNED SECURITIES OFFERED BY HAYS—LATER CONTRIBUTED $50,000 TO PARTY—DOME COMMITTEE WIRES BUTLER TO TAKE STAND; FILM CZAR WILL BE RECALLED

Secretary Mellon informed the Senate Teapot Dome committee last night that he received $50,000 of the $260,000 of Liberty bonds which Harry F. Sinclair advanced to cover part of the deficit of the Republican National Committee in 1923; but that he had refused to retain the bonds in exchange for a like contribution.

The Treasury Secretary disclosed that the bonds had been sent to him by Will H. Hays, former chairman of the Republican National Committee, and that when Hays subsequently called upon him to explain the purpose he had declined to keep them as suggested. He added that he had returned the bonds to Hays and shortly thereafter made a contribution in the same amount from his own funds.

$50,000 HIS ONLY GIFT

Mellon wrote that this was the sum that he had intended to give when he was first asked to contribute to the fund being raised to clean up the Republican deficit. He also informed the Senate committee that this was the only contribution he had made to the national campaign fund of 1920, exclusive of $2,000 given during the campaign.

The Secretary's letter, addressed to Senator WALSH of Montana, prosecutor of the Senate inquiry into what became of the Continental Trading Co. Liberty bonds profits from the now celebrated Humphreys oil deal, was written after the Senator had forwarded to him the record of hearings held by the committee earlier in the day in which appeared the name "Andy" along with that of "Weeks," "Butler," and "du Pont."

NAMES ON MEMORANDUM

These names were written on a memorandum of the late John T. Pratt, of New York City, showing that he had handled $25,000 of the Liberty bonds and had sent a check for twice that amount to the late Fred W. Upham, then treasurer of the Republican National Committee.

After the committee adjourned Senator WALSH sent to the Treasury Secretary the exhibits produced before the committee relating to the Pratt transactions and including the memorandum bearing the four names.

"I know nothing whatsoever concerning these transactions," Mellon wrote, "nor do I have any knowledge as to the contributions to the Republican National Committee by Mr. Pratt.

RETURNED BONDS TO HAYS

"I desire to take this occasion, however, to state to you all facts relating to my contributions to the Republican National Committee.

"Some time in 1923 I was asked to contribute to the fund then being raised to clean up the deficit of the Republican National Committee. I said I would help, but no amount was specified. Subsequently Mr. Hays telephoned me one day that he was sending me by messenger a package containing valuable documents and that he would see me shortly and explain what was involved. The package contained, as nearly as I can remember, $50,000 in Liberty bonds.

"There had been no previous understanding of any kind as to sending me bonds, and until I saw Mr. Hays later I had no knowledge as to the purpose in sending them to me. Nor did I have any knowledge as to contributions in the form of bonds.

"When Mr. Hays called shortly thereafter he told me he had received these bonds from Mr. Sinclair and suggested that I hold the bonds and contribute an equal amount to the fund. This I declined to do. Accordingly I at once returned the bonds to Mr. Hays.

MADE $50,000 CONTRIBUTION

"At the same time, or shortly thereafter, I made a contribution of $50,000 of my own funds, which was the amount I had intended to contribute, and which, incidentally, is the only contribution made by me to the national campaign fund of 1920, exclusive of $2,000 contributed during the campaign."

When Hays was recalled before the committee last week he testified that $60,000 of the bonds went to Upham, $75,000 to Senator T. COLEMAN DU PONT, of Delaware, and $25,000 to the late John W. Weeks, War Secretary in the Harding Cabinet, but he made no mention of having sent any to either Mellon or to "Butler."

Members of the committee could only speculate as to the identity of "Butler," mentioned in the Pratt memorandum, but they assumed that the reference was to William M. Butler, chairman of the Republican National Committee.

Hays's testimony last week was that Sinclair gave $75,000 to the Republican Committee outright and advanced another $185,000 in Liberty bonds to secure part of the committee deficit. He said that the $75,000 was sent to DU PONT to retire a note in the Empire Trust Co., of New York City.

Detailing then what became of the $185,000 "advance," Hays said $60,000 went to Upham, $25,000 to Weeks, and $50,000 to Pratt, and that he returned the remaining $50,000 to Sinclair. Presumably this was the $50,000 which he sent to Mellon and which the Treasury Secretary said he returned.

Senator WALSH said that Hays would be recalled to explain his failure to tell the committee that he had sent $50,000 of the bonds to Mellon. The prosecutor also announced that he had sent a telegram to William M. Butler inviting him to appear before the committee at the next meeting next Tuesday.

The names "Andy" and "Butler" in the Pratt note appeared between those of the late John W. Weeks, War Secretary in the Harding Cabinet, and Senator T. COLEMAN DU PONT, of Delaware, both of whom now are known to have handled some of the $260,000 of Continental Trading Co. Liberty bonds which Harry F. Sinclair, lessee of Teapot Dome, turned over to Will H. Hays late in 1923 for use in extinguishing or securing the deficit of the Republican Party organization.

MEMO DEALT WITH BONDS

Pratt himself handled $50,000 of these bonds, according to testimony given recently by Will H. Hays, who busied himself in wiping out the deficit, most of which was contracted while he was chairman of the national committee in the 1920 campaign. The memorandum, which apparently was addressed to Pratt's secretary, dealt with a payment of $50,000 which the New York financier made to the late

Fred W. Upham, of Chicago, treasurer of the Republican committee from 1918 to 1924.

There has been no previous suggestion that either Secretary Mellon or former Senator Butler had anything to do with any of the Continental bonds and committeemen realized that the two names on the Pratt memorandum might refer to entirely different persons. Mellon then was Secretary of the Treasury, but Butler had not then been made chairman of the Republican committee.

$50,000 PAYMENT TRACED

The Pratt memorandum was read into the record after Senator WALSH, of Montana, the prosecutor, had developed from other papers from Pratt's files that the $50,000 payment had been made to Upham out of a special fund the financier had set up in the United States Mortgage & Trust Co., $25,000 of which came from the sale of that amount of bonds identified as having been purchased for the account of the Continental Trading Co. out of that concern's profits in the now celebrated Humphreys oil deal.

V. E. Hommel, cashier of the Charles Pratt & Co., in which John T. Pratt held an interest, was on the stand and he and Senators read the finely written script with the aid of a magnifying glass. He said it apparently was addressed to Pratt's secretary. It was on a very small piece of paper across the top of which was written: "25 1,000 3½ 1st Libs."

PAPER LACKED SIGNATURE

Hommel said this referred to twenty-five $1,000 Liberty bonds.

The memorandum began "N. B.," and said:

"Received this Nov. 27, 1923, and had it cleared through C. P. & Co. (Charles Pratt & Co.). It is not on my books. Money was deposited in United States Mortgage & Trust Co. Check sent 9 a. m. Nov. 29."

There was no signature, but immediately under the memorandum was the name "Fred W. Upham." In the lower right-hand corner appeared these names, written one under the other: "Weeks, Andy, Butler, du Pont."

On the left-hand side of the sheet, one under the other appeared the figures $36.50, $2,500, and $50,000.

Hommel was able to make out all of the names readily except the "Andy." He said that might be "Candy" or it might be "Andy." He could not suggest why the names were on the memorandum.

Edmund De T. Bechtel, counsel for the Pratt estate, after examining the memorandum with the glass, said the word looked like "Andy," but that it might also be "Gandy." The latter is a name appearing in the book "Revelry," which purports to describe the oil scandals and other events of the Harding administration.

Bechtel told the committee that a thorough search of the Pratt files had been made, and that no other papers had been found which might shed light on the meaning of the names on the sheet.

Before taking up the Pratt political financial affairs the committee heard from Irl G. Hipsley, of Chicago, former secretary to Upham, that the one-time treasurer of the Republican committee early in 1924 destroyed all of the records of the committee's financial affairs from the year 1918 through the year 1922, except the card indexes, which, he said, showed the contributions.

SEEKS TO TRACE RECORDS

Hipsley was not certain whether the records for 1923 and early 1924, in which year Upham quit as national treasurer, had been turned over to William V. Hodges, who succeeded Upham, or whether they were destroyed after the Upham estate was settled up in 1926. Hodges has testified that they were not turned over to him.

Incidentally, Hipsley testified that Upham was "riding Will H. Hays pretty hard" in 1922 and 1923 to have him assist in clearing up the party deficit, which was placed at $1,800,000 in 1923.

The committee members went over some additional reports from its field investigators, but Senator NYE said there was nothing of a startling nature in them.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Alabama [Mr. HEFLIN] to the amendment proposed by the Senator from Mississippi [Mr. HARRISON].

Mr. HARRISON. Mr. President, I desire to modify my amendment in section 3, on page 2, line 14, after the word "needed," by inserting "otherwise for the manufacture of commercial fertilizers and."

Mr. SMOOT. How will the amendment read if it shall be thus modified?

Mr. HARRISON. If modified as I have requested, section 3 then will read:

It is hereby declared to be the policy of the Government and the Secretary of War is authorized to dispose of the current generated at Muscle Shoals for public use equitably among the States within transmission distance, except as provided in section 8 herein, and except so much of such current as may be needed otherwise for the manufacture of commercial fertilizers and to light and operate the locks and canals in and about Dam No. 2 and the Government property at and around Muscle Shoals—

And so forth.

The VICE PRESIDENT. The amendment of the Senator from Mississippi will be modified in accordance with his request.

Mr. HARRISON. Mr. President, the Senator from Alabama [Mr. HEFLIN] has offered an amendment to my amendment which I think will not be necessary in view of the modification I have just suggested to my amendment. For that reason I hope the Senator from Alabama will not press his amendment.

Mr. President, I shall occupy the attention of the Senate for only a few moments. I have but 15 minutes to speak on the amendment, and I wish to confine my remarks to what is proposed by the amendment I have offered to the Norris joint resolution. It has nothing in the world to do with the fertilizer features of the joint resolution. Those are in the latter part of the joint resolution of the Senator from Nebraska. I only seek to amend three sections of the joint resolution, namely, those sections that pertain to the distribution of power.

May I say, Mr. President, that while some might try to create the impression that this is a power proposal, there is nothing of that sort in it. I care not whether or not I may be styled as one of the "power adherents"; I try in the discharge of my duties to look at the facts of the case and not to become an extremist one way or the other in the effort to reach a practical solution of the problem presented.

The power that is sought to be distributed by the Norris joint resolution, as well as by the amendment to that resolution which I have proposed, is the surplus power over that which is necessary to make fertilizer either through the synthetic process or the cyanamide process. So I am dealing here only with surplus power at Muscle Shoals.

The question arises in the consideration of the subject, What is the difference between the Norris proposal and the one I have submitted? The Norris proposal seeks to give to the Secretary of War the authority to lease the surplus power. He can, under its provisions, lease such power to municipalities, States, counties, corporations, partnerships, or individuals. My amendment proposes to authorize the Secretary of War to lease it to municipalities or corporations engaged in public-service activities; that is, to such corporations as come under the regulation of the public-service agencies of the States. It will be noted, therefore, that anyone engaged in any kind of business under the Norris proposal would have an opportunity to contract for or lease from the Secretary of War the power at Muscle Shoals, while under mine only municipalities and those corporations engaged in the distribution of power under the regulations of States would have the right to acquire it. There is the main difference between the Norris proposal and the amendment which I have offered.

He goes further, and he says that in the lease of this surplus power municipalities, counties, and States shall receive a preference. I have eliminated the States and counties, because they use no power to amount to anything. Municipalities do. I see no reason why preference should be given to municipalities in the leasing of this surplus power. In my State—and I take it in Alabama, in Tennessee, and in the other States within transmission distance—for the most part they have already, by a vote of the people, gone out of the business of municipally owned power distribution and have leased their power plants to these power companies. In my State not all, but practically all, have done that.

Mr. JONES. Mr. President, will the Senator permit an interruption?

Mr. HARRISON. Yes.

Mr. JONES. Does the Senator think that under the Norris provision a lease could be made to a lessee that would not be subject to the public service commission?

Mr. HARRISON. There is not any doubt about it; and under mine they are subject to regulation by the regulatory agency.

As I was going to say, two power companies entered my State three years ago. All the municipalities then owned their own plants. Within that three years' time these companies have in most instances acquired control, not because they went in and browbeat the municipalities and knocked them in the head and took the plants away from them, but because the taxpayers in those communities voted to sell the plant. The

companies may have paid more money than they should have in some instances, and doubtlessly they did; but that is the fault of the people who voted the proposition through.

Mr. SIMMONS. Mr. President, may I ask the Senator a question?

Mr. HARRISON. Yes.

Mr. SIMMONS. Have the municipal plants in the Senator's State, as a matter of fact, been leased to some local corporations which have transmission lines extending only a limited distance out from the city and are merely local distributors?

Mr. HARRISON. In my State they have not. The fact is that there are two power companies there. One is the Mississippi Light & Power Co. and the other is the Mississippi Power Co. The Mississippi Power Co. is a subsidiary of the Alabama Power Co. They are connected up with the lines of the Alabama Power Co.

Mr. SIMMONS. They are not merely local distributors?

Mr. HARRISON. Oh, no. They are not local at all. They belong to a comprehensive system.

Mr. SIMMONS. I was apprehensive that they were possibly somewhat like some plants in my own State that either buy the municipally owned plant or buy power from the municipally owned plant and distribute it within a radius of 50 or 60 miles.

Mr. HARRISON. No.

Mr. SIMMONS. They are local distributors; and I was apprehensive that the Senator might have a lot of local distributors of that kind in the region where this great power is located, and that there might be but one real large distributing plant there, namely, the Alabama Power Co., and that the result would be that this power would either have to be leased to local distributors or leased to the Alabama Power Co., one of the two.

Mr. HARRISON. Mr. President, in providing for this lease, if the Secretary of War should desire to do it, either to municipalities or to a public service corporation, I have included this additional paragraph in section 3, which denotes the policy of the Government:

> It is hereby further declared to be the policy of the Government that in case of any such sale or lease to a public-service corporation the amounts paid to the Secretary of War by such corporation shall be considered by the public service agencies of the several States in regulating the rates charged by such corporation to the consumers.

Mr. President, I say frankly that since the Government has gone to this enormous expense of building dams and locks and everything at Muscle Shoals, and creating this power, I see no reason why we should give it all to any particular locality. I would not deprive them of all of it. I would allow them, and my amendment does, to obtain their equitable part of the surplus power that is generated at Muscle Shoals. They can get that. They should get no more. Every other municipality and the people within the transmission distance, 300 miles out from Muscle Shoals, would have an opportunity of obtaining their equitable part of this power. There should be no discrimination between municipalities. All should have the same right to obtain power. Under my amendment they have that right.

The Senator from Alabama the other day talked about this being a fight between the farmers and the power companies. It is not that, Mr. President. I have stood here for eight years fighting to obtain the manufacture of fertilizer at Muscle Shoals first; and, secondly, for the equitable distribution of the surplus power at Muscle Shoals. I still adhere to that theory; but if we are going to distribute the surplus power I think the communities outside of the Muscle Shoals district should have an opportunity of obtaining it, as well as the people at Muscle Shoals.

I have no fault to find with the people of Muscle Shoals. It is natural that they should want all of this power. They are situated close to it. They have made efforts to obtain the power there. They want nitrate plant No. 2 in operation there because it will give employment to the people. I wish it could be operated. I will not say that I wish the times had not progressed to the extent of making it unprofitable to operate it, but I do say that under the synthetic process, as the experts tell us, fertilizers can be made cheaper than they can be made under the cyanamide process. Nitrate plant No. 2 was constructed to meet conditions during the war. At that time they knew nothing about the synthetic process. It was made for the utilization of the cyanamide process; and experts tell us that it is impossible to use it and make cheap fertilizer at this time.

That, however, is a question about which we may differ. I am talking about the disposition of the surplus power at this time. I know that last year the community at Muscle Shoals, where I believe there are 52 houses constructed, came to the Secretary of War with the Governor of the State of Alabama and an influential delegation from that community and, if I am not mistaken, the junior Senator from Alabama [Mr. BLACK] joined them. They appeared and had a long hearing before the Secretary of War on an application to obtain for Muscle Shoals an unlimited amount of power.

In their application they did not say "10,000 horsepower." They did not say "50,000 horsepower." They applied for an unlimited amount of horsepower for the little community of Muscle Shoals. Why did they not bring in Sheffield and Tuscumbia and Florence? It was because some power was being given to those people through power companies; but the little community of Muscle Shoals, where it is said that only 52 houses have been constructed, was the one that made application for this power.

I say, Mr. President, that if there should be a distribution of surplus power it ought to be equitably distributed to all the communities within transmission distance, without discrimination as to rates, without discrimination as to service, and without discrimination as between this municipality or that municipality.

Mr. McKELLAR. Mr. President, I desire to speak to the amendment offered by the Senator from Mississippi [Mr. HARRISON].

This has been a long-drawn-out controversy. I offered the first Muscle Shoals amendment that was ever offered about Muscle Shoals while a Member of the House and a member of the Military Affairs Committee, away back in 1915 or 1916. At that time we got a provision authorizing the expenditure of $20,000,000 for the purpose of beginning the establishment of a plant such as we now have at Muscle Shoals. My original amendment designated the specific place of Muscle Shoals; but, as Senators who were then and now in the Senate will recall, when the bill came over here it was thought best to leave out the place and insert a provision that the President of the United States should select the place. That was put through, and Muscle Shoals was selected by President Wilson.

Mr. President, this dam, the steam plant, the houses, the cyanamide plants, and all other property acquired by the Government at Muscle Shoals cost the Government the enormous sum of $85,000,000. The dam itself and its equipment and the steam plant and its equipment cost $51,000,000.

It will be remembered that when our Republican friends came into power on March 4, 1919, the dam was not then completed, and they refused to appropriate the money to complete it on the ground, as stated by the distinguished senior Senator from Utah [Mr. SMOOT], that the dam would be a liability instead of an asset to the Government.

It will also be remembered that sometime afterwards Henry Ford made his celebrated offer, which galvanized the plant into life again, and our Republican friends then appropriated the necessary money to complete the plant. Mr. Ford's proposal remained unaccepted for some time, and later on he withdrew it. We people down South had large visions of what Mr. Ford would do with the plant if he received it. It was thought by many that he would remove a big plant from Detroit down there. At any rate, we all got under the glamour of the Ford millions, I suppose, and urged the Congress to accept his offer for it. But that is all water passed over the mill, and we need not further consider it.

Since Mr. Ford withdrew his offer there has been a bitter and rather relentless fight going on as to who should get the plant—the associated power companies on one side and the Cyanamid and Carbide companies on the other.

In the Congress there are a great number of Members who desire that the water-power companies should receive this great property at a rental that will probably not pay the cost of maintenance and without any suggestion of reduction of rates to the users of current, honestly believing the Government should not operate the plant for any purpose. If they had gotten their bid through it would have meant that the Government would have turned this great enterprise over to the private companies, with the people getting no benefit out of it. If the people have to pay the same price for their current whether it is generated by steam or by water power, they can not feel much concerned as to who gets Muscle Shoals.

The bid of the Cyanamid Co. is quite as indefinite. If it was accepted, in my judgment there would be no cheaper fertilizers manufactured for the farmers and no reduction of price of current. In other words, were we to accept either the bid of the Cyanamid Co. or of the Associated Power Cos. it would amount to an enormous gift or subsidy by the Government to the lessee.

Mr. President, the original bill contained the following provision. I understand that the amendment was offered by the Senator from South Carolina [Mr. SMITH] in the Senate:

> The plant or plants provided for under this act shall be constructed and operated solely by the Government and not in conjunction with any other industry or enterprise carried on by private capital.

Mr. President, I think we ought to follow the agreement that was made at that time with the American people in the act of 1916. I believe that for the last 10 years the plant has been used in a manner that was not authorized by law; but, be that as it may, the three great purposes of this plant were, first, that it should be used at all times by the Government for making nitrates for war purposes whenever they were necessary. In other words, it was argued—and well argued—that we should not have to be dependent upon Chile for the nitrates to make explosives; and a provision of that kind should be in this measure. In the next place, we dedicated that plant to the farmers of the country in order to manufacture cheaper fertilizers, and that should be the next provision in this measure. We should utilize every kilowatt of power, if it is necessary, at that plant to make cheaper fertilizers for the farmers of the country, and I have offered an amendment providing just that.

Mr. President, I am one of those who do not believe that the original joint resolution of the Senator from Nebraska—many of the provisions of which I favor—goes far enough in the manufacture of fertilizers for the farmer. I think we ought to take one step more; and so I have drawn an amendment along that line, which I shall offer at the proper time:

(e) Whenever the Secretary determines that it is commercially feasible to produce any such fertilizer, it shall be produced in the largest quantities practicable, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

(f) The Secretary is authorized to make alterations, modifications, or improvements in existing plants and facilities, and to construct and operate new plants and facilities, in order to properly effectuate the provisions of this section.

In the joint resolution proposed by the Senator from Nebraska, an experimental fertilizer plant is authorized to be established by the Secretary of Agriculture. As I understand the provision of the bill in this regard, this plant is purely an experimental plant and depends upon the future action of Congress for its scope and activities.

Mr. President, I would much prefer a stronger provision as to fertilizers. I think we could well go much further than does the provision of the joint resolution. I think we should direct the establishment of a plant there to manufacture fertilizers whenever a method is found under which there will be produced cheaper fertilizers.

The addition of these subsections, Mr. President, are to my mind necessary. I think we should use the power developed there to aid agriculture in compliance with the original act and in compliance with the fertilizer situation as we now find it. We all realize that fertilizer is a necessary aid to farming. We must keep our lands in a state of fertility. The present prices of fertilizers are exorbitant. I am inclined to think that the Senator from Nebraska is correct, that we are simply now on the threshold of success in methods of economically taking nitrogen from the air. Therefore in the beginning this plant ought to be experimental. But as soon as the economical processes are ascertained then we should go vigorously to work to help the farmers of the Nation to obtain cheaper fertilizers, and with these amendments added I think the bill will go a great way in that regard, much further than we could go, if we should accept any of the suggestions that have been offered for manufacturing fertilizers in this plant.

My understanding is that the Senator from Nebraska will accept that amendment. With what he already has in the joint resolution, and with that amendment added, in my judgment, there will be established a great fertilizer factory at Muscle Shoals that will do the farmers of this country infinitely more good than if it were turned over to the Cyanamid Co. or any other private company to manufacture fertilizer. In addition I want to suggest to my good friends, the two Senators from Alabama, Mr. HEFLIN and Mr. BLACK, that such a plant will be of far greater value to the towns near Muscle Shoals than if the Cyanamid proposal was adopted.

So, Mr. President, I hope that after providing, first, for the Government needs in time of war and for running the locks in peace time, in the second place we shall use all the power both at the steam plant and at Dam No. 2 that may be necessary for the manufacture of fertilizers, to the end that the farmers of this country shall get cheaper fertilizers.

Originally we dedicated this plant to that purpose away back yonder in 1916. We ought to stand by the agreement we then made with the American people; for I want to say to you as a Member of the House at that time, offering the original amendment, fully cognizant of what was going on, that we never would have gotten that bill through for the organization of this great plant if we had not made that contract with the people of America in the bill. If we had then said that we expected as soon as the plant was completed to turn it over to some private company the bill never would have passed.

So, Mr. President, I want to state again that, in the second place, I am fully and wholeheartedly for a provision for the use of any amount or all of this power for the manufacture of fertilizer.

Mr. TYSON. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from Tennessee yield to his colleague?

Mr. McKELLAR. I will yield in just a moment. The method makes no difference with me. Let these men in the Department of Agriculture experiment, let them adopt what process they like, but manufacture by the best and cheapest method so as to get all the fertilizer necessary for the farmers.

I now yield to my colleague.

Mr. TYSON. I understand that some Senators seem to feel that this plant was not intended to be used in the manufacture of fertilizers but solely for the manufacture of nitrates. In view of the fact that my colleague was present at the time the original act was under consideration and knows about it and helped to pass it, I would like to ask him if his understanding was that the plant was intended to be used not only for the manufacture of nitrates, but that the plan was to go further and manufacture fertilizer as well?

Mr. McKELLAR. The act specifically says so; there can not be any misunderstanding about it. It is in plain language. In the act the word "fertilizer" is used, and, of course, it was constructed for the purpose of manufacturing fertilizer in times of peace. So much for that feature of it.

I now come to the surplus-power provision. Some say that we ought to give this power to some private company. I believe the Cyanamid Co. has a bid here for it, and the water-power companies had a bid here for it. These are all estimable gentlemen; I have no word of criticism of them; they are looking out for their best interests; but I do not think that the Congress of the United States ought to turn this surplus power over to any of these companies unless we can not make it useful to the public generally, and with that statement I am content to let that rest.

What should we do with the surplus power? The Senator from Nebraska has accepted an amendment in substance in line with the amendment I shall now read, which I think fully covers the situation. It is my substitute for section 2 of the bill and reads:

The Secretary of War is hereby authorized and empowered to sell the current generated at said steam plants and said dam to States, counties, or municipalities desiring the same according to the policies hereinafter set forth, and to carry out said authority the Secretary of War is authorized to enter into contracts for such sale for a term not exceeding 25 years from the date of the contract, and until May 1, 1929, such States, counties, or municipalities purchasing said current for distribution to citizens and customers shall have the exclusive right to apply for and receive said current. If no application is made by any county, State, or municipality by May 1, 1929, or if any of said current has not been applied for by States, counties, or municipalities, then, if the Secretary of War is convinced that such States, counties, or municipalities do not desire said current, he is hereby authorized to sell the current generated at said steam plant or said dam, or such thereof as may remain, to corporations, partnerships, or individuals for a period not exceeding 10 years, according to the policy hereinafter set forth, and at all times, subject to the right of the Government, to take over said property in time of war: *Provided*, That between the date of approval of this act and May 1, 1929, the Secretary of War is authorized to sell current by the month to States, counties, or municipalities, corporations, partnerships, and individuals, but with a preference to States, counties, and municipalities.

Mr. President, the people of our locality are paying too great a price for their electric current. It ought to be cheaper. Wherever there is an abundance of water power as there is in this locality, the price of current has been greatly reduced to the consumer. In Canada, where the Government operates the power plants, the maximum cost to the individual consumer is less than 2 cents. In a number of cities in the West where the water power is plentiful the maximum is about 5½ cents. In Tennessee, Alabama, Georgia, North Carolina, and South Carolina the maximum price is 12½ cents. This price is out of all proportion to the cost of the current. I am not an advocate of Government operation of power plants. I would prefer that the Government should not come in competition with private industry, but when private companies fix their prices so that it constitutes such an enormous tax on the people, I think it is the duty of the Government to step in and stop these extortionate prices.

I have said to representatives of the power companies in east Tennessee that I shall not object to their getting sites in

east Tennessee for the construction of their dam, provided, first, that they should agree to construct these plants speedily so as to put the power on the market; second, that they submit to Government control of their stock and bond issues; third, that they agree to build transmission lines to all parts of our State and give Tennessee a preference in the sale of their current; and, fourth, that they make the maximum price of their current not exceeding 5 cents a kilowatt. To my mind these proposals are so reasonable that they ought to commend themselves to any fair-minded company, but the companies have refused to meet these suggestions. This I greatly regret. In the long run, I believe it would be not only immensely beneficial to the consuming public but would cause industries to be built up in our State and redound to the interest of the power companies as well as to the consumers. It is inconceivable, Mr. President, that the power companies can not themselves see that the public will not permit these exorbitant prices to be indefinitely continued. There are 11 great sites on the Tennessee River and its tributaries in my State which would produce an enormous amount of power, and these are the sites which are desired by the power companies; but what good would the development of this water power be to the people if the power companies are allowed to make the unconscionable returns that they are now making on their steam power?

So that I favor giving the States, counties, and municipalities a preference, just as is now provided in the Federal water power act.

Mr. CARAWAY. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. CARAWAY. Has the Senator given any thought to the possibility of States and counties being unable, under their constitutions or forms of government, to purchase this power?

Mr. McKELLAR. Yes. I have found that the State of Tennessee and its counties and municipalities have the power to purchase, or the legislature can authorize them to purchase, and I understand the State of Arkansas, its counties and municipalities, especially the municipalities, have that right. I want to say further to the Senator from Arkansas that, as I understand it, the amendment he has offered with relation to the use of the cyanamide plant at Muscle Shoals will be accepted by the author of the joint resolution.

A number of us from near-by Southern States have been in conference with the Senator from Nebraska [Mr. NORRIS], the author of the pending resolution, and I think we are substantially agreed, so far as we are concerned, about certain provisions of it. The amendments which will be offered by the Senator from Nebraska to his resolution will be substantially agreeable to a number of us on this side.

To restate: First, I think that any contract made in reference to this property should be made with the reservation of the full right of the Government to take over the property in time of war without the payment of any compensation. This was the primary purpose of its building, and in the time of war there should be no handicaps; but the Government ought to take it over without let, hindrance, or compensation and use it for war purposes. Of course, such power as may be needed to operate the dams should be reserved.

Second, I believe that in times of peace such of the power as is necessary should be used for the purpose of securing cheaper fertilizers to the farmers. This was the secondary purpose of its construction. That purpose is wise, as I have heretofore tried to point out, and no disposition of the property should be made that does not fully carry out this purpose. If I believed that the best way to accomplish this purpose was to turn the shoals over to the fertilizer companies, whose every interest is to increase the price of fertilizers rather than to decrease them, I might be in favor of some modified form of Cyanamid bid; but, believing that if we are to get cheaper fertilizer it will only come by experimentation by the Government and as the result of experimentation, I am not in favor of turning it over to others; but, in the interest of the farmers, I believe that such fertilizer plants should be conducted by the Government, whose duty it is to look after the interest of the farmers under this law.

In the third place, Mr. President, I have long believed that the surplus power should be sold by the Government in such a way as to do the greatest good to the greatest number of our citizens. In accordance with the policy laid down in the Federal water power act, I think that the States, counties, and municipalities should be given the preference in any sales of this surplus power. If they do not want to buy cheaper power, if they prefer that the power should be sold to private companies and their citizens required to buy from these private companies, I think we as trustees should give these public bodies the preference; and if the power is not sold to them, then it should be sold to private corporations or individuals or partnerships.

Mr. CARAWAY. Mr. President, I come in conflict with my colleagues here with regret. I have had hopes in the past that we might find a lessee for this plant who would be satisfactory, but that time has passed. The only proposition before the Senate that can succeed, if we want to get rid of this Muscle Shoals proposition, is that embodied in the resolution of the Senator from Nebraska [Mr. NORRIS]. Of course, many of us would like to change it, but we realize that the resolution can not be rewritten here on the floor of the Senate, and we have to follow one theory or the other.

The amendment offered by the Senator from Mississippi [Mr. HARRISON] is really a substitute. It can not fit in and form a part of the Norris resolution. It is an independent measure, giving to the Secretary of War the power to lease this property, without any restrictions upon him as to what he shall receive for it or what uses shall be made of it by the lessee. It is the broadest measure that has ever been offered in the Senate for the disposal of Muscle Shoals to anybody who could convince the Secretary of War that he was a desirable contractor.

I myself have no patience with the charge that somebody is trying to favor a power trust or a fertilizer trust. Such a charge as to any Senator, of course, is not true. I would not for a minute indulge in such an intimation as to the Senator from Mississippi. The desire of all of us is to dispose of Muscle Shoals in the best way possible. But I feel certain that there can be no disposition of that plant along the lines suggested by the Senator from Mississippi.

In the eight years that have elapsed since this matter first came before the Senate no one has come forward with an offer which was satisfactory to the Senate. The amendment of the Senator from Mississippi is a proposition to give to the Secretary of War the power to do, without any restrictions, whatever he may see fit to do with Muscle Shoals. I do not believe the Senate is willing to intrust the Secretary of War with such large power.

Mr. HARRISON. Mr. President, will the Senator yield?

Mr. CARAWAY. I yield.

Mr. HARRISON. I know the Senator wants to be absolutely fair. Sections 2, 3, and 4 as I propose to amend them are not greatly different from the same sections in the Norris resolution. The Senator from Nebraska also seeks to give the Secretary of War authority.

Mr. CARAWAY. Yes; but he undertakes to couple with that a statement of the uses that should be made of the proceeds from the sale of the power.

Mr. HARRISON. My amendment would not disturb that at all.

Mr. CARAWAY. I think, under the amendment offered by the Senator from Mississippi, section 2, if the Secretary of War should see fit, he could make an absolute disposition of the plant to anybody, at any price at which he saw fit to lease it, and it would be absolutely gone.

Mr. HARRISON. We will have the power, and the Senator from Nebraska offers to lease it for 10 years also.

Mr. CARAWAY. I think, if the Senator will pardon me, there is a very radical difference between the two.

Going beyond that, however, the Senator from Nebraska has agreed to accept an amendment sponsored by me, which I believe has met with the approval of quite a number who agree with our theory, that would dedicate a part of this power to the use of plant No. 2 for the making of fertilizer to be disposed of to the farmers at absolute cost. So that if the Norris resolution, with the amendment suggested, which he says he is willing to accept, shall become the law, immediately then the pledge we have made to the American people since the war, that we were going to dedicate plant No. 2 to the manufacture of fertilizer, will go into effect. If the amendment of the Senator from Mississippi should prevail, that, of course, would not happen.

As I see the Senator's amendment—and I am not criticizing the Senator for his position, because it is practically the one he has been maintaining all the time—he would put this plant into private control under a lease that would give to the lessee absolute control of it.

I do not agree that merely writing into the resolution a provision that the distribution of power shall be subject to the regulatory bodies of the various States, would confer any additional power upon those bodies. In other words, Congress can not say to the regulatory body of Alabama, Mississippi, Tennessee, or Arkansas, "You shall do certain things," because they are not official bodies of the Federal Government, and are not subject to control by the Federal Government. If, under the Norris resolution, the power shall be leased, it will go into the States, and it will be subject to the control of the regulatory body of

each State, if it has one, whenever there is an effort to distribute the power among the users of power in the State. But the mere fact that we shall say that any official body shall do a certain thing would not make it do it. That provision would not add anything to it, nor would the leaving of it out detract anything from the measure.

I hope the amendment of the Senator from Mississippi, which is a complete and entire act in itself, will not prevail, because if it should prevail, there would be no use calling it an amendment; it should be called an act to empower the Secretary of War to dispose of Muscle Shoals. I take it he will do that if he can find somebody to whom he can sell it satisfactorily. If not, under the amendment offered by the Senator from Mississippi, he would be authorized to sell at the switchboard the entire power. It would in effect say, "Let plant No. 2 stand idle, let our friends, the people, go unrelieved, but sell the entire power to anybody who wants to buy, and no fertilizer be made."

Mr. GEORGE. Mr. President, during the first few months of my service the Senate had under consideration the Underwood Muscle Shoals bill. I offered an amendment to that bill, which was finally adopted. This amendment provided that all the power not used for manufacturing fertilizer should be distributed equitably within economic transmission distances of the Muscle Shoals plant. The Underwood bill provided for the manufacture of fertilizer; first, by a private lessee, if one could be found; second, by the Government, if a private lessee could not be found; the surplus power to be distributed as provided in the amendment offered by me in either event. In this form the bill passed the Senate. In conference, the purpose of the amendment was destroyed and the private lessee, in my judgment, was subsidized by the value of the surplus power, less the low price offered to the Government. I voted against the conference report or bill and for the bill then proposed by the Senator from Nebraska [Mr. NORRIS].

At a later date in the Senate, the Senator from Alabama [Mr. HEFLIN] urged a resolution providing for the appointment of a committee to receive bids for Muscle Shoals, the bidders to agree to manufacture fertilizer in amounts not less, and upon terms not higher than the original Ford offer. I again proposed my amendment. Other Senators offered similar amendments; and the debate followed upon the amendment of the Senator from Arkansas [Mr. CARAWAY]. Upon its adoption, the resolution was passed. The Cyanamid bid was submitted, I believe, to the committee named under the resolution, and is now before the Senate. This bid, if accepted, would subsidize the lessee, the private company, with surplus power which it might localize at Muscle Shoals and use it for any purpose. I do not favor the acceptance of that bid, and hence am opposed to the Willis bill.

The resolution now offered by the Senator from Nebraska [Mr. NORRIS], as he is willing to perfect it, carries out the purpose of the original act. Muscle Shoals power plant is to be retained by the Government and operated by the Government for the purpose of making munitions in time of war, and the chief element in commercial fertilizer for the use of the farmers in peace times. Also, since there may be and will be a surplus of power over and beyond the power required for fertilizers, the surplus is to be sold by the Government directly to cities, towns, villages, counties, and States. If these do not wish the power, or if any power remains after such lessees within transmission distance of Muscle Shoals have been supplied, individuals and corporations may take it. The distribution is to be equitable within transmission distance, so that one State may not absorb all the power to be distributed. The rates are, of course, to be uniform and nondiscriminatory between all users under the Norris resolution as now perfected. I shall support the resolution.

I oppose Government ownership and operation of business properly classed as private business. I regard the generation and distribution of electric power and the making of fertilizer and fertilizer materials as private business. Muscle Shoals is an exceptional instance. The Government acquired and improved this property at public expense for a necessary purpose of Government—the common defense of the country in war. The Government should own the power plant and property at Muscle Shoals. It should operate it. We should not allow it to pass into private hands to swell private profits. At this time there are two imperative reasons, especially, why the Government should retain not merely ownership, but complete possession and control of this property.

First: American agriculture is in the last ditch, and has been for several years. Commercial fertilizers, when artificial fertilizers are required, constitute a land tax equal practically to the fair rental value of the land itself.

Whether the fertilizer manufacturers are exacting unreasonable prices for their products; whether they are making enormous profits, as charged in some quarters, the fact remains that the cost of fertilizer is a heavy and continuing charge upon all farmers, whether landowners or tenants. No private company has offered to, or will, in fact, reduce materially the cost of fertilizers to the farmer. All have proposed to make and sell fertilizers at cost plus 8 per cent profit, but all have had an eye single to the great profits on the use or sale of electric power over and beyond the amount necessary for manufacturing fertilizer. The present bidder can afford to take a loss on all the fertilizers it proposes and binds itself to make if it is allowed to recoup that loss out of the profits derived from other uses of the power at low cost.

Whether Senator NORRIS is correct in his conclusions, actual operation by the Government will demonstrate; and if we can make fertilizer at a cost below present and general prices, the Norris resolution will give to the farmer more fertilizer than the cyanamide bill—far more. Our promise to use Muscle Shoals for the benefit of the farmer should be made good.

Second: There will be some power to distribute over and beyond necessary requirements for fertilizers. It has been charged both in this body and in the press that a great Power Trust exists in the United States; that it is exacting unreasonable prices for electric energy and is selling its securities based upon nothing more substantial than water in its properties, and that the States have failed and are powerless to control the abuses to which the people are subjected. Whether these charges are true; whether there are good power companies and offending companies, the fact remains that the rates are relatively high in many sections of the country, and that electric energy or power is now a necessity in the life of the people.

If we hold Muscle Shoals and generate and distribute power from that plant, we will provide the yardstick by which the States and the people can measure the rates paid to private companies. My position is that the Federal Government should not encroach further upon the power of the States; that we should not further centralize power in Washington, but with our own property, developed at the expense of all the people of the country, we should be able to make it impossible for private companies to overcharge the people. I do not believe that the private companies, whether power companies or fertilizer companies, will be unjustly deprived of fair returns on their actual investments, because the Government will certainly find it necessary to charge for its products a fair and reasonable price, based on cost, and the Congress will not adopt a policy deliberately destructive of private property and legitimate investment.

Federal regulation within constitutional limits can not give to the farmers and to the users of electric power the protection which we may guarantee to them through the just use by the Government of its property at Muscle Shoals.

I favor the Norris resolution not because it will provide less fertilizers to the farmers but because it will give to the farmers more fertilizers, if possible, at a lower cost than any bill yet offered; not because it will work injury to the producers of electric power who have made the major contribution to our progress, especially in the Southeast, but because it will place the people who must use power upon equal footing with these great organizations.

Mr. SMITH. Mr. President, in a speech last week I outlined my idea of this legislation and what is needed to effectuate the purpose of the original national defense act. I now wish to call the attention of the Senate to the fact that just before the introduction by me of my amendment to the national defense act I had occasion to go down to the Ordnance Department to make inquiry as to whether there was a sufficient supply of nitrogen on hand to justify them in parting with some of it for the use of agriculture. The price had risen to something like $100 a ton for 18 per cent nitrogen in the form of nitrate of soda imported from Chile. I found that we were solely dependent, to all intents and purposes, upon the Chilean nitrate beds for the defense of the country. The basis of all explosives is nitrogen. It is the element that is essential in all explosives. I found that our Government had less than a two-weeks' supply of that necessary ingredient for ordinary practice purposes. It subsequently developed that they had to enter into a cooperative buying movement with the Allies in order to get a sufficient amount of that very necessary ingredient to prosecute the war.

I think I am well within the facts when I state that had Germany, or any of those allied with her, succeeded in blocking the importation of nitrates from Chile we would have been estopped effectually from any participation whatever in the war. For that reason, and for the other reason which involves its necessity for agriculture, I took the opportunity to say about it that our country should, as far as possible, avail itself of

the new discovery of a process by which this very necessary ingredient might be taken from the air. It so happens that the very basis of the explosive upon which we are dependent for the defense of our country is the basis of all fertilizers by which we feed the country.

Mr. HARRIS. Mr. President——

The PRESIDING OFFICER (Mr. McNARY in the chair). Does the Senator from South Carolina yield to the Senator from Georgia?

Mr. SMITH. I yield.

Mr. HARRIS. The Senator will no doubt recall that as soon as we declared war on Germany, Germany threatened Chile and told her not to let us have any further nitrates.

Mr. SMITH. Yes; that is true. Our national defense is, of course, a matter of the first consideration. It so happens as an historical fact that Germany, being cut off from her importations of Chilean nitrate, had to depend upon the genius and inventive power of her people to supply herself with this ingredient and did perfect a process by which she could meet the necessities for a continued war.

Mr. SIMMONS. Mr. President, will the Senator yield?

Mr. SMITH. Certainly.

Mr. SIMMONS. Is it not a fact that Germany, before she entered into the war, had completed that process and was able when the war started to manufacture nitrogen from the atmosphere sufficient for her military purposes, and that, therefore, when she went into the war she relied probably as much upon her ability to cut off the supply of her adversaries from Chile, while she could supply herself by this process of extracting nitrogen from the air, as she did upon her superior military preparation?

Mr. SMITH. Yes. It is well to state that she had a process by which she might meet expensively her needs for nitrate, but during the war and subsequent to the war she has refined the process until she has startled the world with her showing of the small use of power necessary to produce a unit of nitrogen.

But the basic fact remains that until we have established in this country a sufficient process, the capacity of which is sufficient to supply us at all times, and particularly in time of war, we are still dependent upon a foreign country for our national defense. Therefore I do not think any Senator should be willing to vote to turn over to a private corporation the power to determine whether or not our country shall be adequately provided with this essential ingredient in case war should occur.

We ought to see to it that the dedication of this plant in the original act shall be religiously observed in both the elements of national defense and the element in aid of agriculture. The question of whether or not it shall go to a power company or whether we shall lease it to a private corporation is tantamount to saying that we propose to turn over to private individuals the preparation of those elements essential to our defense. We had as well turn over to private individuals the drilling of an army and the equipping of a navy as to do that, because the drilling of the Army and the equipping of the Navy comes to naught if we have not the wherewithal to make them effectual in time of war. Underlying the building of the Navy, underlying the drilling of the Army are the ingredients to make the Army and the Navy effective. I claim that this one ingredient is the basis upon which rests the superstructure of all defense proceedings. We should not jeopardize it by leasing it and turning it over to private individuals.

Now, coming down to the specific subject which is before us at this time, as to what measure we should pass, I desire to say that the joint resolution of the Senator from Nebraska [Mr. NORRIS] meets with my approval, because there is incorporated in it a provision that the power developed at Muscle Shoals shall be used to the fullest extent to produce and distribute fertilizer or fertilizer ingredients. I hope that every Senator on this floor who wants to aid agriculture in its most vital need will support and vote for the passage of that joint resolution. The production of power is purely incidental. If those in charge at Muscle Shoals shall do their duty there will not be left sufficient power to distribute for power purposes for anybody to quarrel over. The fact of the business is, in view of the rapid development of power projects throughout the whole country, that Muscle Shoals could be left idle without any appreciable effect upon the supply, price, or distribution of power, but it can not be left idle without detriment to agriculture. If the Government shall see to it that the processes of production, the amount of production, and the price of fertilizer shall be determined, together with provision being made for the vital necessity of having ready at all times a plant that will furnish sufficient nitrogen for the defense of the country, we might forget the power and leave it out.

I have deplored the fact that the great power companies seem to ignore the current needs of agriculture, and also seem to ignore the defenseless and helpless condition of this country, if it shall not provide itself with an adequate supply of the very basis of explosives. In the mad scramble of the exploiters of hydroelectric power we have forgotten that; we have allowed the issue to become clouded, and have devoted ourselves here for years to the determination of whether or not this power company or that power company should have control of this plant, and should incidentally experiment to determine as to whether or not they could manufacture explosives to defend the country or could help those who feed the country. We should have addressed ourselves to a determination of this problem along the lines to which it was dedicated—to the defense of the country and the upbuilding of agriculture. We have not done so; we have not properly discussed it. I do not know whether that has been because a majority of Senators have not directly felt the almost intolerable burden which is placed upon agriculture in the major section of the whole Atlantic seaboard because of the exactions of the fertilizer producers of this country. I have no quarrel with them; I have not investigated them; but I do know, as the Senator from Georgia [Mr. GEORGE] has stated, that the cost of the fertilizer which is necessary for each acre exceeds the rental of farm property and destroys the profit of the South Atlantic farmer.

For that reason I hope that every friend of agriculture will see to it that the joint resolution introduced by the Senator from Nebraska shall now be passed in its amended form. Let us remember that the element of power is purely incidental and should never have been discussed on this floor in connection with Muscle Shoals unless it had been demonstrated that nitrogen could not be produced for the benefit of agriculture or that it could not be produced for the defense of our country. We should not turn this plant over to an industry that is already established and requires no experiment, namely, the industry engaged in the production and distribution of power. Nobody has got to experiment with that; it is standardized; it has reached the point where it is one of the going concerns of the country. The production of nitrogen, however, in a form available for agriculture, is not standardized; the production of nitrogen in a form available for the making of explosives has not been standardized; and yet we have devoted years and years here to the discussion of whether the power at Muscle Shoals shall be turned over to a private corporation as a power project or whether the Government shall distribute power, and have lost sight of the main object of the introduction and prosecution of this entire piece of legislation. I, therefore, hail with delight the fact that the prospects are that at this session we shall at last make a beginning to bring about the necessary protection of the country and shall at the same time aid agriculture.

Mr. BROOKHART. Mr. President, I shall not enter upon a discussion of the amendment of the Senator from Mississippi [Mr. HARRISON]. I am opposed to that amendment and believe that the preference to municipalities in so far as it relates to the distribution of power should be maintained. I wish briefly to discuss some of the methods of opposition to the pending joint resolution.

I think Woodrow Wilson's idea that this great project should be dedicated to the purposes of national defense in time of war and to agriculture in time of peace deserves the approval of every thinking American. I believe it is one of the great pioneering ideas that emanated largely from the brain of Woodrow Wilson; but in the Senate of the United States the man who has made the fight to give that idea form and expression and practical application in the law is the Senator from Nebraska [Mr. NORRIS].

When I first came to the Senate I watched him in his persistent struggle for this idea of Government development and operation in the interest of all the people. It seemed to me at that time that there was little hope that he ever could succeed. I watched him proceed against all sorts of odds; I saw the distinguished leader on the other side of the Chamber voicing the views of the administration in an attempt to turn this great Government development and natural resource into the hands of private capital and private monopoly. It seemed that all the forces of the country were united to bring about that result, and yet they did not succeed. Through session after session that fight has proceeded, led at all times persistently by the Senator from Nebraska, who has never varied and never wavered from his point of view, that this great natural resource belonged to the people of the United States and that it must be administered for the purpose for which it was originally dedicated by the people. We are now at the threshold of victory, I think, and, in my opinion, there has been no greater fight and no greater victory in the history of the United States Senate if the result for which the Senator from Nebraska has contended shall be accomplished.

In my judgment, the turn of progressive principles is upon the proposition of whether or not we shall trust and believe in our Government to do for its people the things it owes to them. I think the glory of the flag itself rests upon that belief and that confidence in the Government of the United States. I am not one of those who are willing to criticize the Government for inefficiency in economic matters. Where it has an economic duty to perform, I stand ready to make it efficient and to make it benefit in the highest degree the people under its flag.

As against this idea, and perhaps at the bottom of the charge of alleged governmental inefficiency, is the opposition of private business, organized for profit, organized all the time to defeat every governmental movement in the interest of the common people of the United States. That organization has been active in this fight at this time. I have here one of the documents against this proposition put out in my own State, and I presume similar documents have been put forth in other States. This document purports to show a list of some 27 public-utility companies which have been bought in my State by the Power Trust, and then it proceeds to recite a detail of the reduced rates to the people of the State as the result of turning these plants over to private enterprise. Of course, the acquiring of these plants meant a centralization of control; it meant economies, and it naturally meant a reduction of rates; but if the government of the State and the municipalities in cooperation had organized to do the same thing, the reduction might have been much greater than that shown in the document issued against this proposition by the public utility companies.

I, therefore, asked Mr. Judson King to make a comparison of the rates and charges of these private companies in Iowa, operating in the particular towns referred to in my State, with the rates and charges of the publicly owned company in Ontario, Canada. I will read one of those comparisons as affecting Farmington, Iowa, a town with which I am perfectly familiar, and Markham, Ontario.

Farmington, Iowa, has 1,086 population, while Markham, Ontario, has 941 population. For 10 kilowatt-hours at Farmington, Iowa, the rate of the private company is $1.40—the figures in this table are given in dollars and cents and as it is easy to compare the difference in cost of the services—while at Markham, Ontario, it is $1.

For 15 kilowatt-hours the price is $2.10 at Farmington, Iowa, and $1 at Markham, Ontario.

For 20 kilowatt-hours per month the price at Farmington, Iowa, is $2.80, and $1.20 at Markham, Ontario.

For 30 kilowatt-hours the price is $4.05 at Farmington, Iowa, and $1.65 at Markham, Ontario.

For 40 kilowatt-hours per month the price is $5.15 at Farmington, Iowa, and $2.10 at Markham, Ontario.

For 50 kilowatt-hours per month the price is $6.25 at Farmington, Iowa, and $2.41 at Markham, Ontario.

For 75 kilowatt-hours per month the price is $8.50 at Farmington, Iowa, and $2.86 at Markham, Ontario.

I therefore want to call the attention of my friends at Farmington, Iowa, to the fact that they have made a great mistake in turning over their public plant to private enterprise, instead of joining in cooperation with the other cities of the State, or instead of asking the State, as the Province of Ontario has done, to provide this central organization.

I ask unanimous consent to insert in the RECORD a table of all of these 27 cities in Iowa.

The PRESIDING OFFICER. Without objection, it is so ordered.

The table is as follows:

MORE INFORMATION ABOUT THOSE REDUCED RATES

Cost of service in 27 Iowa towns that have sold their municipal plants to an American private superpower system, and cost of service in 27 comparable towns that are served by the public Ontario hydrosuperpower system

[With an estimated increase of 30 per cent on the Ontario bills for 75 kilowatt-hours to cover: 10 per cent for taxes, 10 per cent for profit, 10 per cent for propaganda, election expenses, and other incidentals]

Towns	Population	Kilowatt-hours used per month							Extra 30 per cent
		10	15	20	30	40	50	75	
Arion, Iowa	242	$1.40	$2.10	$2.80	$4.90	$5.45	$6.75	$10.00	------

Mr. BROOKHART. Much discussion has been had upon the processes of making fertilizer in these plants at Muscle Shoals. I shall not enter into a discussion of that phase of the problem. However, I desire to offer for the RECORD some editorials from the farm papers of the United States. The farm papers seem now to be well informed as to these differences in processes, and they seem to be supporting in a large measure the Norris joint resolution. The papers which I shall offer have a combined circulation of 4,963,931 farmers, which means a majority, perhaps, of the farmers of the United States. There would, of course, be some duplication in that total number.

These editorials consist of an editorial from the Progressive Farmer; an article by Wheeler McMillen from Farm and Fireside; an editorial from Farm Life, Spencer, Ind.; an editorial from the Farm Journal; an editorial from Hoard's Dairyman; a second editorial from Farm Life; an editorial from the Progressive Farmer; a second editorial from the Progressive Farmer; an editorial from The Farmer, of St. Paul, Minn.; a second article by Wheeler McMillen; an article by Dr. Gus W. Dyer in the Southern Agriculturist; and a second article from Doctor Dyer.

The PRESIDING OFFICER. Without objection, the articles will be inserted in the RECORD.

The matter referred to is as follows:

[From the Progressive Farmer, published at Raleigh, N. C., circulation 475,488]

NEW PROCESSES INSURE CHEAPER NITROGEN

Recent discussions in the United States Senate and elsewhere regarding Muscle Shoals and the new discoveries for nitrofixation have an interest for every farmer who spends a dollar for fertilizer.

As the Progressive Farmer has previously indicated, these discoveries not only affect the proper disposition of Muscle Shoals but will have a marked effect on the way southern farmers fertilize their crops in future years.

Heretofore our ready-mixed fertilizers have contained two to four times as much phosphoric acid as nitrogen, and equally as much potash as nitrogen, 8–2–2, 10–3–3, and 12–4–4 having been standard formulas. From this commonly accepted ratio of plant foods one would naturally suppose that phosphoric acid is the most important plant food of the three, and that potash is equally as essential to increased crop yields as nitrogen. That is not true. Nitrogen is our most important plant food because it is the plant food that in most cases gives the greatest in-

crease in yield. The ordinary ready-mixed fertilizer, therefore, has not had its plant foods balanced or proportioned in such a way as to give maximum results.

The overemphasis on superphosphate (acid phosphate) has been rather natural under the circumstances. First, the fertilizer manufacturer really produces only one of the materials that goes into his mixed goods. That is phosphoric acid, which is in the form of superphosphate. The nitrogen and potash he must obtain elsewhere. Potash comes from Germany and France. Nitrogen we get in the form of nitrate of soda from Chile, or sulphate of ammonia from the coke ovens of this country, or as tankage and other by-products of packing houses. Having to purchase their nitrogen and potash, American fertilizer manufacturers naturally went rather light on these materials and used large quantities of their own homemade phosphoric acid. It is only human that they were inclined to do this.

But there is another reason why the ordinary mixed fertilizer contains too much phosphoric acid and not enough nitrogen for best yields. Nitrogen is the most expensive plant food. It costs three to four times as much per pound as either phosphoric acid or potash. When a fertilizer mixture contains the nitrogen that it should carry for best results, the cost per ton or per sack is considerably more than in the case of mixtures low in nitrogen. Since many of our farmers used to buy fertilizer by the sack instead of by analysis, the mixture that sold best was the one that cost least per sack. Of course, in recent years farmers have tended to buy higher grade fertilizers, but even these high-grade mixtures usually have an improper balance as regards the three plant foods. In spite of the fact that nitrogen has been as expensive as it has been in the past, we could have obtained better returns per dollar spent on fertilizers if we had used considerably more nitrogen and less phosphoric acid.

But all the foregoing discussion leads up to the change that is taking place in the nitrogen situation. Every indication points to cheaper nitrogen and this means that more nitrogen will be used in our fertilizer mixtures from now on. When considerably more nitrogen is used crop yields will show a marked increase and cost of production will be reduced.

A brief review of the whole situation would bring out these facts. For years most of our commercial nitrogen came to us from Chile, some 4,500 miles away, as nitrate of soda. It cost considerable money to dig the caliche, as the raw nitrate material is called, out of the ground, refine it, pay the Chilean Government a heavy export tax, and then transport the refined product, nitrate of soda, to America. By the time the nitrate of soda reached us it was a rather expensive product, and the nitrogen it contained cost so much that farmers would not use enough of it to get the best yields. Later on sulphate of ammonia, another nitrogen fertilizer, was obtained as a by-product of coke ovens, but without materially lowering nitrogen costs.

In more recent years, however, commercial nitrogen has been obtained from still another source. We have known for years that the air is full of nitrogen. The problem has been how to fix it (or catch and hold it) so that it might be used as a fertilizer. We have known that the legumes gather this air nitrogen, but they put it in the soil right where they grow. It can not be used to feed other crops on other fields. Hence it has been up to man to find a way to take nitrogen from the air and so combine it with other elements as to put it in sacks as commercial fertilizer. Having known for the last 150 years that a bolt of lightning changes air nitrogen into a form that permits it to be used by plants, after it is brought to the earth in rain or snow, scientists conceived the idea of applying electricity to the air to produce ammonia. This ammonia which contains the nitrogen obtained from the air is then combined with other materials in order that its nitrogen may be sacked up and used as a fertilizer.

The first successful effort to work out this process was made at Niagara Falls. However, it was soon found that this method of fixing air nitrogen requires such a tremendous amount of electrical power that only those countries with large supplies of cheap power could afford to use the process. Hence, Norway has been the only country that has ever made a commercial success of the process.

Later on, in 1906 to be exact, the cyanamide process, another method of fixing air nitrogen, was worked out, and by 1918 there were 36 cyanamide plants in the world.

On top of these developments, each of which marked a forward step in the use of air nitrogen for fertilizer, there came still another one. Two Germans—Fritz Haber and Carl Bosch—found a still better method of fixing air nitrogen. By this Haber process the amount of power required is so low that cheap power is not vital to its success. In fact, Germany has been using coal as the source of power. Just how this is done is of no great interest to our readers, but the important point is that this method is four times as cheap as the arc process, which is used in Norway, and considerably cheaper than the cyanamide process, which is a method of fixation used by the larger of the two plants at Muscle Shoals.

Germany, using the Haber process, has largely taken the lead in air-nitrogen fixation. She is not only making all the nitrogen needed at home but is now selling it in the markets of the world in competition with nitrate of soda and by-product sulphate of ammonia. She is making a mixed fertilizer containing air nitrogen especially for sale in the United States, and it is reported that she plans to establish nitrogen-fixation plants in this country.

The United States, which five years ago had no plants for the fixation of air nitrogen, now has seven plants, with a combined capacity of 80 tons a day. In time the air nitrogen from these plants will find its way into the fertilizer market, and the competition for the farmer's trade in nitrogen will become even more keen.

This trend toward the greater use of air nitrogen has not gone unnoticed by the producers of Chilean nitrate of soda. They are improving their methods and plan to sell cheaper in order that they may meet the competition of air-nitrogen producers. Caliche, the Chilean raw material, is now being mined with machinery instead of by hand, and other processes have been developed by which lower-grade caliche may be made use of.

Furthermore, each producer now sells independently instead of through one central sales agency. The Chilean Government is being pressed to lower its export tax of $12 a ton. By these means nitrate producers hope to meet all other competitors.

For statesmen the point of importance in all this is that farmers can now get nitrogen cheaper from other sources than from a cyanamide plant at Muscle Shoals; hence, Muscle Shoals has again become a power rather than a fertilizer-making center. For farmers the point of importance is that these new developments mean cheaper nitrogen, and cheaper nitrogen will mean crop yields at lower cost per unit. To the South, which uses more fertilizer than all the rest of America put together, and to all our host of fertilizer users, this situation is especially encouraging.

[From the Farm and Fireside for July, 1927]

WHY NITRATES ARE GOING TO BE CHEAPER

By Wheeler McMillen

(The prices of nitrogen, phosphorus, potash—three plant-food necessities farmers have to buy when soils grow feeble—are of vital concern. Read this account of tremendous changes taking place in the nitrogen situation.)

You may as well be prepared to witness within the next few years, whether you now use commercial fertilizers on your land or not, certain developments that are likely to affect your yields and costs to a degree now little dreamed of.

The binder in replacing the cradle, and all the mechanical improvements of the last 75 years, perhaps have been of no greater importance than what is ahead of us now in fertilizers. Fertilizers are going to be cheaper and better.

Nitrogen is the element that will cut our costs and increase our yields. Events are happening nowadays with regard to nitrogen that literally are changing the currents of world history.

A silly fight has been waged for years in Congress over Muscle Shoals, in which farm organizations have taken part, in the belief that Muscle Shoals is important as a source of nitrogen for fertilizer. While this wordy battle has been going on, Muscle Shoals has passed absolutely out of date as regards fertilizer production. Practically it was out of date before the fight began.

A new German process for fixation of nitrogen from the air is responsible.

The three most important plant constituents which crops remove from the soil are nitrogen, phosphorus, and potash. Of these, crops take out more nitrogen than phosphorus or potash. Nitrogen is much the most expensive to replace. Farmers put in long days of hard work hauling manure, and a long year in their rotation growing clover, in order to put nitrogen back into the soil.

Commercially, nitrogen in the past has been too expensive for farmers to buy in sufficient quantities except for a few highly specialized crops. More soils are short of nitrogen than of the other elements. This deficiency is a principal cause of our low-average crop yields in this country.

The air is full of nitrogen, but most plants can not feed on nitrogen from the air. It must be in the soil. In the air above a single section of land, one square mile, are 20,000,000 tons of nitrogen. And there are 200,000,000 square miles of the earth's surface.

Yet with millions of tons of nitrogen right on top of your farm, until very recently if you wanted some for your crops you had to send a ship 4,400 miles to Chile to get it. Down there, far below the Equator, is the world's only great natural deposit of nitrogen. Having a monopoly, Chile has furnished 40 per cent of her government revenues by a tax on the export of nitrates.

Clover and other legumes, as every farmer knows, take some nitrogen out of the air and leave it in the ground.

Scientists have also known for 150 years of another way by which a little nitrogen gets into the soil from the air. They knew that a bolt of lightning "fixes" (that is, converts into a chemical compound) some atmospheric nitrogen which rain and snow later carry into the soil. So they reasoned that perhaps they could apply electricity to air and keep the process under such control that the nitrogen could be captured and put in sacks.

Two American chemists in 1901 devised the first plant in the world for this purpose at Niagara Falls, where electric power was abundant.

The first commercial success, however, was achieved two years later in Norway where power was even cheaper. That plant is still running, passing air through an electric furnace and finally fixing the nitrogen. But this method, known as the "arc" process, takes such an enormous amount of power—67,000 kilowatt-hours for every ton of nitrogen—that it has not been very practicable outside of Norway.

By 1906 another process, the cyanamide, developed in Germany and Italy, went into commercial operation with an output gradually increasing year by year. By 1918 there were 36 of these plants in the world, most of them in Europe, the biggest of all being at Muscle Shoals, although it was never operated except for a short test run. Nitrogen is an absolute necessity in making explosives, so during the war great expansion in the production of nitrogen compounds took place in many countries.

While these things were going on two Germans, Fritz Haber and Carl Bosch, found a method that did not require electric power. While numerous variations have been put into use, essentially the process consists of extracting hydrogen from steam by the chemical action of glowing coke and passing a mixture of this and nitrogen of the air under a pressure twenty times as great as that of the ordinary steam boiler at a temperature of dull-red heat over certain solid substances which cause the hydrogen and nitrogen to combine, forming ammonia.

The important fact is that this method is four times as cheap as the original arc process and so much cheaper than the cyanamide process that many great foreign companies are transforming their old factories to adopt this new Haber-Bosch process, also known as the direct synthetic-ammonia process.

This discovery is the event that I asserted was literally changing the currents of world history. What to you as an American farmer is of greater importance is that it foreshadows a time, not so far ahead, perhaps, when you can buy nitrogen for your soil so cheap that you can afford to use what you need and can grow high yields on fewer acres at better profits.

The world nor American farmers are now solely dependent upon Chile for nitrogen. In fact, so cheaply can it be produced by the new process that 200 tons were exported a few months ago from Germany to Bolivia, the next-door neighbor of Chile!

Germany is manufacturing at the rate of 600,000 tons of nitrogen per year. In this country we have used in a year only 240,000 tons. German farmers are adopting the new forms of cheap nitrate fertilizers so rapidly that in that country it is predicted no food will have to be imported at all within a very few years.

Three circumstances may be pointed out here, each of direct concern to American farmers:

1. Germany has nitrogen to sell in the United States and is selling some here in spite of tariff barriers. Last year around 30,000 tons came to us from Germany and some thousands of tons from other countries. Of course, not all of this is for fertilizer. Also it is known that Germany is making investigations looking to the erection of nitrogen manufactories in the United States to use her new processes. As conditions permit, we may find ourselves buying increasing quantities from Germany.

2. Producers of Chilean nitrates, alarmed some years ago by the threats of synthetic nitrogen, set about to improve their own methods. One of the principal companies operating in Chile now announces the entire substitution of machine methods for handwork in collecting the caliche, the raw material; and announces that they have found out how to turn 90 per cent of the caliche into merchantable nitrates instead of only 65 per cent as formerly.

These improvements make available the lower grades of raw material, which before could not be used. This may increase by as much as 75 per cent the nitrate resources of Chile. These new processes will be for the use of all the Chilean producers. Renewed pressure is being exerted to get the Chilean Government to lower the export duty.

Anyway, there is to be real competition between Chilean and artificial nitrogen, competition that promises to lower prices materially. Moreover, the Chileans have abandoned their former combined sales agency and each producer is now selling independently.

3. Of most importance, American capital is erecting plants in the United States to manufacture nitrogen from the air by methods of French origin very similar to the new German process. One such plant, already making about 25 tons a day, is under a program of expansion that contemplates eventual production of 300 tons a day, nearly twice the capacity of Muscle Shoals. This is the Lazote (Inc.) plant at Bell, W. Va., near Charleston. Lazote (Inc.) is a subsidiary of the du Pont powder interests. Its first job will be to supply nitrogen for explosives, but agricultural nitrogen is foreshadowed. Another company has announced plans for a large plant at Hopewell, Va.

After the war the Government established the fixed nitrogen research laboratory, now in the Department of Agriculture. The task of this laboratory is to conduct research looking to building up the nitrogen industry in America. Extraordinarily valuable work is being done by the scientists there.

Thus far we have discussed the essential developments in the nitrogen situation itself. Putting the nitrogen into fertilizer and the fertilizer into your fields is yet another story.

When you buy a 100-pound sack of, say, 4–8–4 fertilizer you are buying 16 pounds of actual plant food—nitrogen, phosphorus, and potash—and 84 pounds of carrier. The extra 84 pounds may have some value to you as lime but not enough to pay freight on. In a sense they are the container, like the sack, for your 16 pounds of real plant food. You could not have the fertilizer elements shipped to you without the container, nor could you distribute it on your field. But you have to pay freight on that 84 pounds of container and lift it around.

The freight and handling costs on our ordinary fertilizers are over a fourth of the total costs of the fertilizer.

These new developments with nitrogen promise that we may have eventually much more highly concentrated fertilizers. I have seen, for instance, one of the new German fertilizers, urea, which is 46 per cent nitrogen.

Another new complete German fertilizer, its formula 16–32–16, carriers 64 per cent of plant food. We shall have fertilizers in which the chemists have made one fertilizing element act as the carrier for another. All of which goes to point to the coming time when a farmer will not have to pay freight on and wrestle with 84 pounds of little value to get 16 pounds of plant food. It may be that highly concentrated fertilizer materials will be shipped over the long freight hauls to your local mixing plant, cooperative perhaps, where they will be conditioned enough to apply evenly and work properly. The savings in freight and handling charges may be as important as—or more so—the reductions in nitrogen prices.

One point was stressed repeatedly by every authority with whom I have discussed this situation—that the rapidity with which the new nitrogen industry in the United States develops from now on will depend to no small extent upon farmers themselves. Farmers will soon have to accustom themselves to using more concentrated fertilizers and to prepare themselves to adopt the more exact methods required for the higher types.

[From the Farm Life, Spencer, Ind., December, 1927, circulation 1,111,368]

TIME TO SETTLE IT

Congress will be struggling with Muscle Shoals again, and it is high time to settle the matter. Probably the power of this big plant will be sold to the power companies. It was originally built for a nitrate plant, but chemistry has shown a better way to get fertilizer. Nitrogen is now obtained synthetically from coal at only a fraction of the cost of water power, and Muscle Shoals seems to be a back number, so far as the farmer is concerned. But the revenue derived from selling Muscle Shoals power might and should be used for the benefit of agriculture, in the development of an American nitrate industry, so that the farmer could have cheaper fertilizer and the Government an abundant supply of explosives in case of emergency. Thus the vast sum spent at Muscle Shoals will not be altogether wasted nor diverted from its original purpose.

[From the Farm Journal, Philadelphia, Pa., May, 1927, circulation 1,354,803]

WHY MUSCLE SHOALS NO LONGER MATTERS

The Farm Journal long ago lost interest in Muscle Shoals as a producer of cheap nitrogen plant food, commonly known as fertilizer.

Those of our folks who are also "constant readers" know why we came to this conclusion. Newer readers, however, may not be so informed, and may be interested in our reasons.

They are as follows:

Nitrogen "fertilizer" does not, at present commercial prices, return its cost when used with proper quantities of phosphorus and potash in standard rotations, including clover.

The delivered cost of nitrogen would have to be lowered to something like 5 or 6 cents to make it profitable for the average farmer to use.

Muscle Shoals is not well adapted to the production of cheap nitrogen from the air.

The popular idea that fixation of air nitrogen is somehow tied up with cheap water power is 10 years out of date.

Cheap air nitrogen by the most modern processes now depends on a cheap supply of hydrogen gas rather than cheap power. There are many manufacturing sites more suitable for the purpose than Muscle Shoals.

The above list of facts does not, by any means, tell the whole story. But it is enough to indicate why the Farm Journal does not now regard the disposition of the Muscle Shoals plant as a matter of importance to agriculture.

[From Hoard's Dairyman, Fort Atkinson, Wis., February 10, 1928, circulation 127,324]

FERTILIZER AT MUSCLE SHOALS

The question as to what should be done with the power of Muscle Shoals has been widely discussed for several years. Certain farm leaders have advocated that the Government take this power and manufacture fertilizer for the farmers. Others have urged the Government to sell this power to some corporation that would make fertilizers.

The problem of what disposition to make of the power of Muscle Shoals has been discussed at many conferences and there was a wide difference of opinion. It would seem now that the problem has solved itself so far as the production of nitrogen fertilizer is concerned. In the last few years a new process for producing synthetic nitrogen has been perfected, and cheap power is a minor factor in its cost. Secretary Jardine, after having a thorough investigation made, reports:

"In fixing nitrogen from the atmosphere the art has rapidly changed from the original arc process, where cheap electric power was a dominint factor, to the later synthetic ammonia process requiring only one-sixteenth of the power of the former, and where coal and economic position are of much more importance than electric power by itself. We are convinced that there are cheaper methods of manufacturing fertilizer than under the set-up at Muscle Shoals. A sound solution of Muscle Shoals would be to dispose of this power to the best advantage and utilize the income in the broad solution of fertilizer problems."

We wonder if in the face of these facts some of our farm organizations will continue to urge Congress to enact a law that will permit the Government or private corporations to manufacture nitrate fertilizers. It occurs to us that if we are to solve our agricultural problems or, for that matter, deal intelligently with any of our national questions, we must first have accurate information, but this fundamental requisite for dealing intelligently with problems does not seem to enter the minds of some people.

[From Farm Life, Spencer, Ind., February, 1928, circulation 1,111,368]

MUSCLE SHOALS

An Alabama friend takes exception to our December editorial on Muscle Shoals. We said that this huge plant is a back number as far as fertilizer is concerned. We added that the best course would be to sell the power and use the income to develop a cheap supply of fertilizer. Our Alabama friend fears that we have been ensnared by "propaganda put out by the Power Trust." He wants "a fine article on Muscle Shoals" in our next issue, and says that the influence of Farm Life is too great to be used in misleading farmers. We are sorry that we can not gratify the writer of this friendly letter. We would be misleading our readers if we published what he asks. Apparently he favors the plan indorsed by certain farm leaders of turning Muscle Shoals over to a private concern, which, these leaders say, would make cheap nitrogen there for farmers. However fine that sounds, it's an empty hope.

A POWER PLANT

The nitrate plants at Muscle Shoals were built to use the cyanamide method, and newer ways are much cheaper. They make the cyanamide method just about obsolete. Secretary of Agriculture Jardine says so, along with many others who should know. In fact, much the same thing was testified before Congress at the time of the Ford offer by the same farm leadership that now argues we will get cheaper fertilizer by turning Muscle Shoals over to a private concern. Certainly progress in lowering nitrogen-making costs has not gone backward since then. All the facts point to Muscle Shoals as a power plant and not an economical fertilizer factory. Let's not be fooled and maybe wake up to find that we have parted with the huge power there for a promise of fertilizer that can not be made good. The job for Congress is to dispose of Muscle Shoals so that its power resources will bring the largest value to the American people.

[From the Progressive Farmer, February 11, 1928]

WHAT SHALL WE DO WITH MUSCLE SHOALS?

Again this year, as for years past, one of the most frequently debated topics is, "What should be done with Muscle Shoals?" The American Farm Bureau is still favoring the bid of a certain company which proposes to use part of the power to manufacture nitrogen by the process regarded as best established when the Muscle Shoals plant was built.

A few years ago this would undoubtedly have been the right thing to do. Now, however, authorities assure us that far better and less expensive methods of nitrogen making have been established. The American Farm Bureau seems to have taken a position on the basis of out-of-date processes and information. Now its officials and members, through a mistaken sense of loyalty, seem to be sticking to this old position rather than advance with advancing information. And other important developments may be just around the corner.

All in all, there seems only one fair and sensible thing to do with Muscle Shoals. This birthright of the American people should not be sold for a mess of pottage. Congress should not turn it loose in a fit of impatience and desperation. Rather Congress should recognize that this whole problem both of nitrogen making and power development may be still in a formative stage. Certainly throughout an experimental period, if not permanently, the Government should itself operate Muscle Shoals, ascertain just what is the wisest use of this gift from the Almighty, and accept bids from private interests (if at all) only after the best engineering skill at our command works out a proper policy of utilization.

[From the Progressive Farmer, January 21, 1928]

MUSCLE SHOALS ONCE AGAIN

The question of what to do with Muscle Shoals will again come before Congress during its present session. Congress has been talking about Muscle Shoals for years; it remains to be seen whether it will do anything about the matter. After all these years of discussion, barren as far as action is concerned, it seems clear to the Progressive Farmer that Muscle Shoals as a fertilizer proposition is no longer of vital importance to the farmer. The idea in developing Muscle Shoals as a fertilizer project was to cheapen the cost of nitrogen to the farmer. No matter what disposition Congress makes of Muscle Shoals, much cheaper nitrogen for the farmer seems just around the corner. Since new discoveries in the manufacture of air nitrogen make it certain that nitrogen is to be much cheaper in the near future, regardless of what is done at Muscle Shoals, it would be an economic crime for the Federal Government to hand over the tremendously valuable power rights at Muscle Shoals in return for the manufacture of a limited amount of cheap fertilizer.

Every bid that has ever been made for the properties at Muscle Shoals has been predicated on the desire to monopolize the huge amount of power developed there. One can very well afford to make a limited amount of fertilizer in the now out-of-date Muscle Shoals plant, and even sell it below the cost of production, if he is given permission to use the remainder of the power, which is the greater part of it, as he sees fit. This is just what every bidder for the properties has had in mind.

The Federal Government should hold on to Muscle Shoals, developing its power possibilities to the utmost and regulating the use to which the power is put. In other words, the Government should see that the power at Muscle Shoals is put to the most economical use and made to serve the best interests of the people as a whole. If a fertilizer concern wishes to use some of this power for the manufacture of fertilizer, let it purchase the power from the Federal Government at a reasonable price. But perish the thought of turning Muscle Shoals, lock, stock, and barrel, over to some one concern to use to its own selfish advantage merely in return for a promise of cheap fertilizer. Why sell a birthright for a mess of pottage?

[From the Farmer, St. Paul, December 31, 1927, circulation 153,733]

MUSCLE SHOALS AGAIN

The disposition of the Muscle Shoals power project, developed by the United States during the recent war and now standing idle, is again occupying the attention of Congress. The Madden bill, which proposes the leasing of this power to private interests for the manufacture of fertilizer nitrogen, to be sold at cost to farmers, has been indorsed by the American Farm Bureau Federation. The Muscle Shoals project is a plum that has been sought by power interests for a number of years. Henry Ford at one time made an offer for its lease. To date Congress has not been able to agree on the acceptance of any one of the proposals offered.

There has been considerable discussion in the press of late to the effect that farmers and farm organizations are being imposed upon by the power companies who seek Muscle Shoals, not for the manufacture of fertilizer but purely from the standpoint of monopolizing this source of cheap power. These critics say that the old methods of extracting nitrogen from the air by the use of huge power such as is available at Muscle Shoals are now obsolete, newer and cheaper methods having been recently developed. These same critics go on to state that the power interests of the United States are quietly but surely gathering into one huge monopoly all of the sources of electric power. They point out that a decade or a quarter century hence the people of the United States will wake up to find themselves in the grip of a huge Power Trust more powerful than any organization of business interests ever perfected in this country. Muscle Shoals is merely one of the pawns in the game. Warnings of this sort are at least worth considering.

Regarding Muscle Shoals as a source of cheap fertilizers, we are interested in a recent statement from Secretary Jardine, of the Department of Agriculture, which reads as follows:

"In fixing nitrogen from the atmosphere the art has rapidly changed from the original arc process, where cheap electric power was a dominating factor, to the later synthetic ammonia process requiring only one-sixteenth of the power of the former, and where coal and economic position are of much more importance than electric power by itself.

"The much-discussed Muscle Shoals project of the United States Government, based on electric power, could furnish but one-fifth of the nitrogen used in commercial fertilizers in the United States and eight-tenths of 1 per cent of the nitrogen used by our farmers.

"Research and development have vastly altered the situation, and it has been difficult for the public to recognize the changed conditions. We are convinced that there are cheaper methods of manufacturing fertilizer than under the set-up at Muscle Shoals. A sound solution of Muscle Shoals would be to dispose of the power to the best advantage and utilize the income in the broad solution of the fertilizer problems."

With this statement coming from a reliable source, and considering also the numerous warnings about the plans of the power companies, it would be well for farmers to consider the Muscle Shoals argument in its true light.

[From the Farm and Fireside, Springfield, Ohio, December, 1927, circulation 1,237,197]

THE MUSCLE SHOALS HUMBUG—IT'S TIME FOR FARMERS TO STOP THE USE OF THEIR NAME TO PULL CHESTNUTS OUT OF THE FIRE

By Wheeler McMillen

Nitrates for fertilizers can not be made profitably at Muscle Shoals. This fact has long been known to the nitrate experts of the country, whose findings have been freely published.

Yet session after session Washington lobbies have been urging farmers to write their Congressmen and pass resolutions in behalf of this or that Muscle Shoals offer "to make cheap fertilizer." In plain words, the influence of farmers has been used as a cat's-paw in efforts to pull the meaty power chestnut out of the Muscle Shoals fire.

Behind all this is a story of shrewdness and stupidity, of blindness and deception, of "fooling the farmer" that is painful to tell. Farmers are hard to fool when they have the facts, but they have not had the facts about Muscle Shoals. Their hopes have been falsely raised, their influence has been misused, and their confidence abused.

Of the many offers made to Congress for Muscle Shoals, all agreeing to manufacture nitrates for fertilizer, we do not believe that any has been made because the interests concerned desired to manufacture fertilizer. It would appear that the offers have been for the purpose of getting control of the water power, which is valuable.

The Wilson Dam and the nitrate plants at Muscle Shoals were erected to meet the great war-time need for nitrates in explosives. The Nation could not afford to depend upon imported nitrates in time of war. At the time no process for fixation of atmospheric nitrogen was fully developed in America except the cyanamide process, which requires plentiful and cheap electric power. So the properties were erected to manufacture nitrates for explosives in war time and for fertilizers in peace time.

After the war America learned details of how Germany had supplied herself with nitrates. She did it with the newer synthetic ammonia process, requiring little power but much coal. Before the war Germany had to import 125,000 tons a year. Now, beyond her own increased uses, she makes 150,000 tons to export. This process, described in Farm and Fireside for July, 1927, is much cheaper than the cyanamide process.

Within a shorter period than has already elapsed since the Muscle Shoals controversy started the United States may not only have nitrates sufficient for all our home uses, but also nitrates to export. Down at Hopewell, Va., an enormous plant is already in process of construction, and all the contracts for its completion are let, where nitrates for fertilizers will be made by the synthetic process. Read carefully the following authorized statement issued by the owners of the new plant:

"Allied Chemical & Dye Corporation for the past five years has had in operation a laboratory plant, involving an investment of approximately $4,500,000, devoted to the manufacture and intensive study of fixation-nitrogen products.

"This work to date justifies the initiation of new installation, of large capacity, with a view to producing from raw materials available in the United States fixation-nitrogen products in quantities sufficiently large to enable the United States eventually to be independent of importation of these products as units of fertilizers, as well as making the United States independent of importation during periods of war.

"The economics as to location and technical process at Muscle Shoals not proving of interest, the company has acquired a large acreage, accessible to both rail and deep-water carriers, at Hopewell, Va., for the location of the first installation."

This concern has spent four and a half million dollars to study and perfect for use here the synthetic process. Now it is spending several times that number of millions in preparing for production on so large a scale that it will be able to supply the entire needs of this country and have a surplus to export.

Note the last paragraph. "The economics, as to location and technical process, at Muscle Shoals not proving of interest," the statement reads.

In plain words, after a thorough study of the Muscle Shoals proposition, one of America's biggest corporations not only found no possibility of making fertilizer economically at Muscle Shoals but is so thoroughly convinced that no one else can make nitrates there economically that it is going ahead with a multimillion-dollar plant. No such investment would be risked if there was any likelihood that fertilizers made at Muscle Shoals ever could undersell their Hopewell products.

In the face of this development, in the face of the insistence of almost every air-nitrate expert in the country, including the fixed-nitrogen research laboratory of the Government, that nitrate fertilizers can not be made cheaply at Muscle Shoals, and despite the fact that cyanamide plants abroad are being converted into synthetic-ammonia plants, certain farm organization representatives have continued to tell farmers that Muscle Shoals will yield them cheap fertilizers.

These men first were for Government operation of Muscle Shoals. Then they fought for the Ford offer and at that time introduced testimony before Congress that the cyanamide process was obsolete. After Ford blandly withdrew his offer without explanation these men and their organization indorsed the offer of a cyanamide company. This offer the organization's Washington representatives now vigorously support.

The competition of cheaper method has made Muscle Shoals a myth and a will-o'-the-wisp so far as cheap fertilizers are concerned. Cheaper nitrates are coming to the American farmer by way of competition between German importations, Chilean importations, and domestic manufactures by the synthetic ammonia, coal-using process. Cheap coal, not cheap electric power, is now the important factor.

No company can make nitrates in the obsolete Muscle Shoals plant and compete in price. Various of the offers either depend upon the likelihood that no court would compel the continuance of fertilizer manufacture at a loss, upon technical loopholes, upon charging the necessary loss upon a minimum amount of fertilizer as part of their rental for the valuable power, or upon making a minimum amount in some other way, since fertilizer is a condition for getting the power.

The fertilizer tail to the Muscle Shoals power kite has been a convenient line and bait with which to kid the farmers. Every interest that has set its covetous eyes upon that great and useful power has seen the possibility of using the farmers to help influence Congress in its behalf. Only Congress has power to determine what shall be done with Muscle Shoals, so the question is unavoidably political and farmers are a large body of people with political influence and votes.

There is not space here to make an analysis of the various bids submitted for Muscle Shoals and such a discussion would be beside the point anyway. The point is that everyone who thoroughly understands the Muscle Shoals situation is fully aware that it is a power proposition, for the use of which the Government should make the wisest possible arrangement for the public interest. Whatever the final settlement of the matter, the interests of the Government and the public should be properly conserved. The farmers' only concern in the problem is their concern as citizens to that end.

"The truth about Muscle Shoals" was told by L. E. Call in the October, 1924, Farm and Fireside, where he said that the cost of producing nitrogen at Muscle Shoals would be prohibitive.

The political influence of farmers should not be prostituted to subserving the efforts of any interest coveting the possession of a national natural resource. Particularly shameful is the utilization of that influence before Congress without an adequate understanding by farmers of the facts concerning the proposals in behalf of which their good name is used. And still more pernicious is the deception of farmers by creating amongst them a false hope.

[From the Southern Agriculturist, March 1, 1928, Nashville, Tenn., circulation over 500,000]

MUSCLE SHOALS AND FERTILIZER—FLOOD CONTROL

By Dr. Gus W. Dyer

MUSCLE SHOALS AND FERTILIZER

Muscle Shoals was developed by the Government primarily to supply nitrates for war purposes. At this time large electric power was the one essential condition in producing nitrogen, and the Government wanted nitrogen. A secondary consideration was to dedicate this plant to the cause of agriculture after the war and use it in the interest of cheaper and better fertilizer. Since the use of large electric power was the only effective method known at that time for producing nitrogen, of course, they expected that this plant would continue to produce nitrogen after war as it did during the war. But in peace time the nitrogen would go into fertilizer rather than in explosives.

But in the meantime the Germans discovered a new process for producing nitrogen. This is known as the synthetic ammonia process. By the synthetic process nitrogen is produced by coal instead of by electric power. By this process nitrogen may be produced wherever coal may be had, whereas abundance of cheap electric power is the one essential of the old method. The cost of manufacturing nitrogen is substantially less by the synthetic process, it is claimed, and in addition to this factories may be located nearer the farmer, since coal is the only essential condition, and thereby a great saving in freight charges is effected.

The synthetic process was used successfully by the Germans during the war, and it has become so extensive in that country since the war that the Germans are not only supplying their own demands for cheap

nitrogen but are shipping considerable quantities to this country and are selling nitrogen to us at a profit, notwithstanding the high tariff rates against nitrates.

But the Germans have no monopoly on this new method. It is not secret. It may be used by anybody.

In plain language, we have discovered a cheaper and better way to produce nitrogen since the Muscle Shoals power was developed, and the result is that Muscle Shoals as a fertilizer producer is out of date.

One proof of this is the fact that no responsible corporation seeking control of Muscle Shoals will agree to use the process to produce fertilizer. They don't want it for this purpose. About all any of them promise is to produce fertilizer if they find it profitable. This is all Henry Ford would promise. The Federal Government is the only business organization in this country that is stupid enough to ignore economic facts and economic laws and fight a losing battle in the field of industry. The Federal Government can do this because it can pay the losses out of the taxes of the people, and it has unlimited power to collect the taxes needed for the purpose.

Another proof is the fact that the farseeing and capable du Ponts have built a synthetic ammonia plant at the mouth of a coal mine in West Virginia; and at Hopewell, Va., the Allied Chemical Corporation is now erecting the first unit of an enormous nitrate plant in which the synthetic (coal) process will be used for producing nitrate. It is estimated that this first unit will cost $35,000,000, and the company has bought land for five additional units. The annual output of this plant is estimated to be 200,000 tons of nitrogen. Muscle Shoals can produce only 40,000 tons annually.

FUGITIVES FROM INFORMATION

In view of the fact that a cheaper and better process for producing nitrogen has been discovered than the process used at Muscle Shoals, it is rather strange that certain leaders in the farm movement are still storming for the operation of Muscle Shoals to produce cheap fertilizer. It is characteristic of the theorist and the ignorant and the demagogue to ignore economic facts and laws, but this is never done by capable business men. Some agitators, in the words of the late Senator Carmack, seem to be "fugitives from information" with reference to Muscle Shoals and cheap fertilizer. It is hardly necessary for some of them to run from that against which they are immune.

Cheap fertilizer can not be gained by driving a hard bargain with somebody. Neither can it be obtained legitimately by act of Congress. The price of fertilizer, like the price of everything else in the competitive field, is fixed by natural laws, and it is stupid to ignore this fact. The theorist or the man grossly ignorant of business is the only man who thinks that the Government may produce fertilizer at a price cheaper than the competitive price.

The price of nitrogen is going to be determined by competition between the different nitrate plants in this country, which must also compete with German and Chilian imports. There is no legitimate way to produce nitrate at Muscle Shoals cheaper than the price fixed by these natural laws, and every intelligent business man knows this.

* * * * * * *

RESEARCH AND CHEAP FERTILIZER

The original purpose of the Government with reference to the use of Muscle Shoals for producing cheaper fertilizer should be carried out. Under present conditions this can not be done successfully by operating the plant for the production of nitrogen. The operation of another nitrate plant at Muscle Shoals, either by Government or by a private corporation, can not, it is believed, in any legitimate way reduce the price of nitrogen.

The opportunity for cheaper nitrogen—cheaper fertilizer—is not in some particular location, not in the nature of a contract made with somebody, not in any particular kind of operation of the plant, but in the field of research and experiment. Corporations realize this, and they spend enormous sums of money for research and experiment. The Government may make a big contribution to the cause of cheaper nitrogen by supplementing the work of the corporation in the field. Work of this kind is unmistakably within the proper scope of governmental activities, and is that which gives the greatest promise of substantial results in reducing the price of fertilizer to the farmer.

Muscle Shoals should be disposed of at the earliest date possible, and every dollar of rental or profit from the plant should be dedicated to the work of research and experiment in the field indicated.

CONGRESS AND BIG BUSINESS

Congress has had Muscle Shoals on its hands for 10 years, and through the whole period it has been laboring hard to dispose of it. But notwithstanding the fact that the people have been anxious from the beginning to have some disposition made of this great asset, and notwithstanding the fact that a number of responsible corporations have been anxious to pay huge sums to the Government for the use of this plant, Congress as yet has not been able to find any way to let it go, although Congressmen are anxious to dispose of it. Now they are considering extending the "disposing period" 10 years longer, perhaps in the hope that in the meantime some constituency will forget itself and send a business man to Congress who can tell them how to turn loose.

FLOOD CONTROL

The administration plan for flood control is that the States touching the area affected pay 20 per cent of the cost of construction, estimated to be $296,000,000, and in addition to this pay the whole cost of rights of way.

The States affected should at once accept the administration plan of prorating costs. But the settlement, in all fairness, must look back as well as forward.

It is conceded by all that the problem of flood control is the problem of the Federal Government. Hence the responsibility for flood control is on the shoulders of the Federal Government. If this is true to-day, it was true generations ago. If the Federal Government had done its duty in the past, the people in the flooded area would have been saved from the suffering and loss that have overwhelmed them from time to time, and there would be no flood problem to-day.

In struggling to carry a burden that belonged to the Federal Government all these years, haven't these people paid their share? In working out an equitable distribution of costs these people should be given credit for the millions they have spent in trying to carry the burden that was not theirs, but the burden that belonged to the Federal Government. Thus they should be given credit for the loss in property and human life and human suffering, a loss that can hardly be estimated; a loss incurred by them, due to the failure of the Federal Government to do its duty. In this distribution of cost the Federal Government should give recognition to the fact that the people in the flooded area were charged up with a considerable portion of the $200,000,000 lost by the Federal Government in the last few years in the shipping industry trying to help somebody somewhere on land or sea. Just who it was, if anybody, that received aid as a result of this $200,000,000 loss is not very clear. Thus the Government should give consideration to the fact that these people have been taxed with a large part of the billion dollars, perhaps, the Federal Government has scattered throughout the Philippine Islands without fear of punishment or hope of reward. It is the misfortune of the people along the Mississippi that they can not qualify as Filipinos.

It is little short of gross presumption that the Federal Government, after sleeping on its job all these years, should begin its activity by trying to place an unwarranted and unbearable burden on the people who at great cost to themselves have been carrying the Government's burden while the Government was asleep. Are these people to be penalized for the vicarious sacrifices they have made?

THE INTERSTATE COMMERCE COMMISSION DISCRIMINATES AGAINST THE SOUTH

By Dr. Gus W. Dyer

FARMERS ARE INTERESTED IN COAL PRICES

Farmers are big consumers of coal. Whatever affects the price of coal affects the farmer. Freight rates and passenger rates are largely determined by the price of coal, since coal is a large part of the cost of transportation. Coal is a big factor in the cost of farm machinery, wire fencing, building material, automobiles, trucks, etc.

In the competition between the coal mines of Pennsylvania-Ohio and the southern coal mines for the supply of lake cargo coal in recent years the southern mines have won the larger part of the business. The loss of business to the Pennsylvania-Ohio mines has moved the Interstate Commerce Commission to reduce the railroad rates on coal from their mines to lake ports to the point of giving these mines a differential advantage over their southern competitors. To meet this handicap the southern railroads hauling coal from southern mines reduced their rates 20 cents per ton on coal hauled to lake ports. The Interstate Commerce Commission has refused to allow the southern roads to make this reduction. The plain purpose of the Interstate Commerce Commission in these rulings is to so regulate the production of coal through the manipulation of railroad rates that business may be turned from southern coal mines to Pennsylvania-Ohio mines. It is estimated by the Wall Street Journal that the amount of business thus turned to these mines from the southern mines will amount to from $50,000,000 to $60,000,000 annually.

The Interstate Commerce Commission is not here criticized for exercising its power in fixing railroad rates. The charge against the commission is that in fixing these rates on coal it did not determine the rates on the legitimate basis of rate fixing, but that its fixed purpose was to bestow a special privilege on one group of producers over their competitors, in order that they might take a large amount of business away from those competitors, who had won this business in an open market under conditions of free competition.

The position here taken is that any such exercise of Government as this is not only unwarranted, but is antagonistic to our whole theory of the functions of Government.

THE PURPOSE OF GOVERNMENTAL REGULATION OF BUSINESS

The purpose of legitimate regulation is not to give any sort of special protection to any particular individual or group of workers, to any industry or section, but to guarantee freedom of contract between all groups that have business relations with each other, and prohibit any individual or group from obstructing the legitimate freedom of any other individual or group. To carry regulation to the point of giving any sort of special protection to one competing group against another is not only un-American, but is antagonistic to the fundamental theory of Americanism. To give such protection is to repudiate the American theory and philosophy of freedom. It is not the prerogative of public officials in charge of the regulating machinery of Government ever to consider the consequences of freedom on those to whom it is guaranteed any more than it is the prerogative of a judge in a court of justice to consider the consequences of justice. The freedom of all affected is the goal toward which all regulating machinery must point. This is the very essence of our philosophy. To doubt it, and seek to modify it, is to deny the faith on which our institutions are founded.

Since the commission now interprets its power to regulate railroad rates to extend to the regulation of the industries, as coal mines, that furnish the tonnage for transportation, there is hardly any limit to the autocratic power of this political group over industry.

Is it possible that the American people are willing to confer on a subordinate branch of the Federal Government the power of life and death over American industries, the power to drive consumers from the markets of their choice, and compel them to buy in other markets against their interests, the power to turn business through a manipulation of railroad rates, from one community to another, from one group of competitors to another?

In one ruling of this agent of the new American autocracy, the Wall Street Journal estimates that from $50,000,000 to $60,000,000 annually will be turned away from the producers who gained this business in open competition through superior efficiency over the less efficient producers who lost this business because they could not give the service to the consumers that their competitors were able to give. The cost of taking this business from the more efficient and giving it to the less efficient will be assessed on the consumers. It is difficult to estimate the loss to those industries in the South whose owners built up this business under a hallucination that they had a constitutional right to sell their coal, under conditions of freedom, on any market under the American flag.

ELECTRIC POWER AND THE FARM

A few years ago the only significance electricity had for the farmer was that it made it incumbent on him, as he saw it, to make large investments in lightning rods to protect his family and his stock against its deadly attacks. Electricity is now going to the country in a new rôle, not as a destructive enemy but as a constructive servant. It goes into the country not to lay additional burdens on the farmer, but to take the heaviest burdens from the farmer's shoulders and carry light and music and joy and life to the farmer's family.

In the first place, it is the electric current, the electric power from the big power dams, that is playing a big part in decentralizing industry and sending the factory back to the country. It is this that solves the power problem and the light problem for practically every small town and village, and opens the way for industrial development. It is no longer necessary for factory owners to give the coal problem serious consideration in the location of their plants. Electric power may go anywhere and everywhere at a small cost of transportation.

The electric current from the power dams is revolutionizing living conditions in the country home. It is solving many problems that seemed to be impossible of solution a few years ago. There is hardly a single convenience or luxury in the city home to-day that may not be had in the country home at a moderate cost. The country home, in addition to electric lights, may have hot and cold water through the house automatically supplied from the well by the electric current. The washing, ironing, churning, milking, and even cooking may be carried on by electricity, and Frigidaire brings luxuries that ice could not supply.

As we develop the unlimited water power of this country and convert it into electricity, and perfect electrical appliances, the cost of electricity doubtless will be so reduced that all these conveniences will be in the easy reach of the average family.

We are rapidly approaching the day when the country home will have all of the essential conveniences of the city, together with many other things essential to a real home that the city can never give. The development of electricity enables country people to hold on to all that made the country home great in the past, and at the same time enjoy all that modern civilization has contributed to this fundamental institution of Christian civilization.

The family in the country home on a good road, supplied with telephone and radio, may enjoy all the privileges of seclusion—and these are valuable privileges—and at the same time be in close touch with the outside world. The family may enjoy all the advantages of isolation without being isolated.

The paramount interest of the farmer in Muscle Shoals, and the rapid development of electric power everywhere is, or should be, not in some fancied connection between electric power and cheap fertilizer, but in the fact that electric power is the big factor in bringing industries nearer his home and hence giving him a local market for his products, and in addition, will supply his home with those conveniences and luxuries that formerly have been possible only to those who live in town.

THE GREAT SIN OF CONGRESS

The great sin of Congress is not wrong action but inaction. The chief trouble is not that it does the wrong thing but that it won't do anything. When confronted with big problems Congressmen prefer to do nothing rather than do something that might be unpopular. They demonstrate the essential weakness of any delegated group to assume that responsibility that is essential to the solution of big problems. They don't know how to let go!

Congress should launch the movement for the protection of American agriculture, and should do it at once. Further delay is hazardous. To prostitute this problem to the service of a political expediency is to become a traitor to American civilization. It is better to act and fail in a case like this than not to act. It may be necessary to suffer several failures before final success is achieved, and it is important to get these out of the way as quickly as possible.

At the present rate of political inefficiency it will take so long to dispose of Muscle Shoals that when the day finally comes the South may find it profitable to advertise it to the tourists of the world as a rival of Niagara Falls, as one of nature's greatest mysteries.

Mr. MAYFIELD. Mr. President, the Consolidated Southwestern Rate cases, Nos. 13800, 13535, and 14880 were submitted to the Interstate Commerce Commission on June 19, 1925. A decision in these cases was rendered by the commission on April 5, 1927. It required nearly two years for the commission to render a decision in these cases. The order that the commission issued under the decision in these cases included certain reductions in rates on vegetables which were to have gone into effect on December 5, 1927. About eight months after the decision in these cases was rendered the effective date of the tariffs was postponed by the commission until January 3, 1928. A further extension to April 3, 1928, was granted, and I understand that still another extension has been granted, and the reduced rates on vegetables moving from the Rio Grande Valley in Texas will not go into effect until May 16. The vegetable crop of the Rio Grande Valley is now moving, and our truck farmers are still required to pay freight rates which the Interstate Commerce Commission said nearly a year ago were excessive and ought to be reduced.

As part of my remarks on this matter, Mr. President, I ask unanimous consent to have printed in the RECORD a letter I received from the R. V. Dublin Co., shippers of produce and vegetables, Jacksonville and Laredo, Tex.

The PRESIDING OFFICER (Mr. JONES in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

THE R. V. DUBLIN CO.,
Jacksonville and Laredo, Tex., February 26, 1928.

Senator EARLE B. MAYFIELD,
Washington, D. C.

DEAR SENATOR MAYFIELD: The structure of railroad rates in the Southwest is all but criminal. The Interstate Commerce Commission is bound to have known this for years, and we can not understand why the shippers and the public in the Southwest are denied relief. It appears that the railroad companies have the upper hand and are able to influence the Interstate Commerce Commission and thereby maintain a power over the commission that enables them to keep the country choked down and driven almost to a point of desperation. Agricultural producers in the Southwest are on a ragged edge and are practically bankrupt, for no other reason than that they are robbed of at least two-thirds of the value of their vegetables and perishable products in the way of freight rates.

Permit me to give you some light on this subject:

Southwest Texas is now moving a big vegetable crop; cabbage are bringing our truck farmers from six to eight dollars per ton, while the average freight on this cabbage to all consuming markets is $35 per ton. Our truck growers are receiving 25 cents per bushel for beets and carrots, while the average freight rates to all consuming markets is 90 cents to $1.10 per bushel basket. Our growers are receiving 40 to 45 cents per bushel basket for spinach, while the average freight rate on this spinach to all consuming markets is 40 cents per bushel basket.

Southwest Texas will ship approximately 20,000 cars of perishable vegetables this season. The average freight per car will run not less than $400 in round figures. The railroads will reap a revenue of $8,000,000 and maybe up to $9,000,000 or $10,000,000, whereas the growers of these products will, on a fair estimate of market values, receive around two and one-half to three millions of dollars.

Sometimes I think the Interstate Commerce Commission is misled in the testimony given by the carriers on handling of perishable products. The carriers claim that an extreme hazard attends the transportation of perishable vegetables and that claims are quite numerous. I know this is incorrect when volume is taken into consideration. The transportation of perishable freight has become sound and so efficient that claims are a negligible percentage as compared to the high-class rates in effect. I know this by years of shipping experience. My firm moves on an average of 1,500 to 2,000 cars of perishable vegetables each year, and I assure you that we have not filed and collected claims to the amount of one-half of 1 per cent of the base rates in any season. The carrying stability of these products along present methods are so sound and efficient that we do not have occasion to file but very few claims. Now, my contention is that the class rate should be materially lowered on our line of commodities, because the carrying method of these products has been so perfected and so sound as to carry the very least degree of hazard.

May I ask, why has the Interstate Commerce Commission been so generously extending the time of the effective date of the reduced rates in the Southwestern Consolidated cases? The commission has postponed the effective date of these reduced rates two or three times.

First, From December to February; then again to April 3, and now until May 16. In this respect it would appear that the railroad companies have figured out just exactly enough time to cateh the entire southwestern Texas move before rate reductions are finally granted. To my mind it is the most pitiful slap and the rankest form of ignoring the public's dire need of relief that has ever come under my observation. It is possibly ignorance on the part of the Interstate Commerce Commission, as I can not believe that such an unreasonable burden would be willfully put on the agricultural producers of this important and vast industry when they are struggling for existence—then to think to that production from mother earth is the first and basic foundation on which all peoples depend.

I am wondering if it is not possible that we may yet get quick relief and move the remainder of the southwestern important vegetable crops which feed a very large portion of the United States. If we are refused quick relief, then will the commission in the end, when the rates finally go into effect, grant a reparation order that we may be refunded that part of the unreasonable rate that has been demanded and collected by the railroad companies?

In all of my statements and views, as outlined in this letter, I would not have you believe that I am a pessimistic squealer, because such is not the case. I tell you, personally, that I have a good business and may be quite comfortable in a financial and material way; but when I look out upon the most of our agricultural producers and see them in their dire need of relief, that their long hours of labor might bring to them at least a moderate compensation, it makes my heart ache. The great body of interstate commerce commissioners are perfectly ignorant of the drudgery and dire circumstances of our great masses of agricultural producers who are standing, helpless, at the hands of the greatest Government in the world, and I am wondering if you and I, and our great body of Government officials, who are clothed with power and authority, will stand by and see a continuation of these conditions?

The railroads are the big octopus in the picture. Will we permit agriculture to be carried to its death?

Very truly yours,

THE R. V. DUBLIN CO.,
By R. V. DUBLIN.

Mr. SHEPPARD. Mr. President, in connection with the subject of fertilizer I feel sure that the Senate will be interested in a statement of the progress which is being made by the Government in its efforts to discover potash deposits in the United States.

Geologists advise us that every indication points to the existence of large potash deposits in southwestern United States.

The presence of potash in Texas was first intimated in 1912, when Dr. J. A. Udden, of the Texas Bureau of Economic Geology and Technology, found 5.4 per cent of potassium, calculated as chloride, in brine samples taken at a depth of about 2,200 feet in a boring by the S. M. Swenson estate at Spur, in Dickens County, Tex. Endeavoring to verify this discovery, Doctor Udden tested many samples from different depths in this well. While most of these showed no potash, traces of potash were found in two samples taken at depths of somewhat more than 2,000 feet. However, no potash-bearing mineral could be located in these two samples. Later Doctor Udden ascertained that deep borings had been made near Amarillo, Tex., in which much salt had been encountered. He visited the locality of these borings, searched the dumps, and found small particles of reddish salts yielding on analysis 6.14 to 9.23 per cent of potash calculated as potassium oxide (K_2O). Again he was unable to identify any potash-bearing salt, but he reached the conclusion that potash-laden minerals were associated with the heavy Permian salt beds of west Texas, and he so announced in publications of the Texas bureau already mentioned. These discoveries by Doctor Udden confirmed not only his own assumptions, but those of many other geologists who had studied the Texas Permian region.

Next came a test boring by the United States Geological Survey at Cliffside, near Amarillo, Tex., followed through succeeding years by cooperative action between the Texas bureau and the United States Geological Survey in following up wildcat oil drilling and in securing and testing samples. In February, 1921, D. D. Christner, joint representative of the bureau and the survey, found a potash mineral in the Bryant oil well in Midland County, Tex. This mineral was analyzed by the survey and was found to be polyhalite, a potash mineral such as exists among the potash minerals of the great German-French field. This was the first discovery in the United States of a mineral of this kind, one of a class technically known as the Strassfurt potash-bearing minerals. Then ensued other discoveries of polyhalite in widely distributed wells principally south of the Panhandle region. Late in 1921 the Texas bureau, according to my information, was compelled to drop exploration through lack of funds. The United States Geological Survey kept up the work. Oil was found in Reagan County, Tex., and this led to a rapid increase of wells drilled for oil in the probable potash territory and the discovery of further indications of potash. It is interesting to note that discoveries to date indicate the existence in west Texas and in New Mexico of a potash-producing area about 300 miles long, 150 miles wide, containing about 45,000 square miles. This area promises to be the only serious rival on the earth of the vast German-French potash development. Polyhalite has been found in no less than 70 oil wells throughout 18 counties in the Texas portion of this area and in 6 oil wells in 3 counties in New Mexico. Sylvite, another European potash mineral, has been located in a salt dome in Matagorda County, Tex., but the depth at which it was found, 4,800 feet, is too great, I am advised, for commercial purposes. Perhaps it may yet be found there at depths commercially practicable.

While we are familiar with the probable limits of the potash-bearing area, we do not yet have definite knowledge as to how many potash beds there are or how thick, rich, and extensive the individuals beds are. Most of the wells have indicated the existence of more than one bed and some have yielded potash-bearing material resembling substantially the lower grades of imported potash salts and the bulk of the potash salts of the mines of the German-French area, which are the largest in the world and which produce by far the larger part of the world's present supply. In fact, this German-French area may be said to have a virtual monopoly of the potash supply of the globe.

Drillings in Upton County, Tex., have disclosed an upward arching of salt beds within about 500 feet of the surface, with potash-bearing beds not far below these, the most accessible yet found. Accordingly the Geological Survey has selected two sites in the southwestern part of Upton County for further exploration and study at this time. The deeper structures are also to be studied and explored, as it is probable that they contain some of the richer beds, but this will be done later.

In addition to the methods of exploration already described, a form of drilling known as core drilling must be used in order to determine whether potash exists on a practical commercial basis. The core drill shows the number, thickness, and character of specific potash beds at any location and also makes available samples of such character as to make possible chemical and mineralogical studies bearing on methods of concentration and recovery. Core drillings properly distributed will make it possible to define minable areas and to estimate volumes of available tonnage with a fair degree of exactness.

The fundamental importance of potash to American agriculture, industry, and life is so well known as to require no discussion here. Above all, it is an essential element in plant food and is absolutely necessary to the sustenance of human as well as animal life. For several years I urged Congress to enact a bill I had introduced for a more intensive study of the situation, including the drilling of wells for potash. I wanted an expenditure of $500,000 a year for five years. On June 25, 1926, Congress finally passed my bill in modified form, allowing $100,000 a year for five years.

Amendments were made in the course of passage which were found to be unworkable in practice, amendments relating to conditions on which the Government was to conduct the work in cooperation with local interests. This made it necessary to confine the Government's efforts during the first year to the Federal public lands in New Mexico, where promising results have followed.

Mr. President, within the last two weeks the United States Geological Survey has made the announcement that the thickest bodies of potash salts yet revealed by Government tests

have been found in the third Government well drilled in Eddy County, N. Mex. The survey has recently completed analyses of samples selected from the core of this well which show that within 1,500 feet of the surface nine beds or groups of beds of possible commercial interest were encountered. One of these, at a depth of about 1,466 feet, is 8 feet 10 inches thick and contains 11.08 per cent of potash in the sample received. Other noteworthy beds range in thickness down to 2 feet 3 inches and in potash content from 8.50 to 13.68 per cent in the samples as received.

I am pleased to state that the act has since been amended so that the work may proceed in Texas, where there is no Federal public domain, independently or in cooperation with local interests there or in any other State. Under the act the United States Geological Survey of the Department of the Interior and the Bureau of Mines of the Department of Commerce have charge for the Government of potash exploration. The survey finds the best locations and drilling operations are managed by the Bureau of Mines. Be it remembered that the studies in connection with oil wells both in New Mexico and Texas continues without abatement.

Many factors enter into the question of a potash industry for the United States. It must be shown by core drilling or actual mining operations that a large tonnage of potash-bearing minerals is present at one or more localities and that it can be mined and concentrated at reasonable cost. Marketing conditions must next be considered and freight rates studied.

One might well indulge the hope that capital might be amassed on such a scale as to set up immediately in the United States an organization which could compete in all markets with the German-French combine. Immediate development of this nature can not be definitely relied upon, however, in connection with the potash industry, and we must look rather for modest beginnings and a gradual but certain growth.

The most significant initial effect of the disclosure of large volumes of potash in the Southwest will be the prevention of extortionate rises in the prices of foreign potash. Efficient, dominant, imperialistic as the foreign potash power may be, it will refrain from raising prices sufficiently high to tempt capital into the immediate development of potash in the United States, and our farmers will profit from the start, and, in fact, are already so profiting. The entire amount to be expended by the Federal Government in the five-year program could easily be equaled in one year by a moderate increase in the price of potash from overseas. It is the most effective insurance we may for the present possess against aggression and extortion by a foreign combination.

Mr. President, the probability that we are on the eve of the discovery of a tremendous home supply of potash is an additional argument for a course which will lead us to retain a great development like that at Muscle Shoals for further fertilizer experimentation under the control of the Government.

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	McKellar	Shipstead
Barkley	Fess	McMaster	Simmons
Bayard	Fletcher	McNary	Smith
Bingham	Frazier	Mayfield	Smoot
Black	George	Metcalf	Steck
Blease	Glass	Neely	Steiwer
Borah	Gooding	Norbeck	Stephens
Bratton	Greene	Norris	Swanson
Brookhart	Hale	Nye	Thomas
Broussard	Harris	Oddie	Tydings
Bruce	Harrison	Overman	Tyson
Capper	Hawes	Phipps	Wagner
Caraway	Hayden	Pittman	Walsh, Mass.
Copeland	Heflin	Ransdell	Walsh, Mont.
Couzens	Howell	Reed, Pa.	Warren
Curtis	Johnson	Robinson, Ark.	Waterman
Cutting	Jones	Sackett	Watson
Deneen	Kendrick	Schall	Wheeler
Dill	La Follette	Sheppard	Willis

The PRESIDING OFFICER. Seventy-six Senators having answered to their names, there is a quorum present.

Mr. BLACK. Mr. President, I ask unanimous consent to insert in the RECORD a letter received by me from Mr. W. F. McFarland concerning certain figures with reference to Muscle Shoals and its value and the value of the power when translated into fertilizer.

The PRESIDING OFFICER. Is there objection?

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *March 12, 1928.*

Senator HUGO L. BLACK,

332 Senate Office Building, Washington, D. C.

DEAR SENATOR: According to United States Commerce Department Reports, page 114, volume 2, No. 4, dated January 23, 1928, the power requirement for manufacturing 2,000 pounds of fixed nitrogen by the process for which the Muscle Shoals plant No. 2 was built is 9,090 kilowatt-hours. (Explanation: 9,090 kilowatt-hours divided by 8,760 hours in year equals 1.03 kilowatt-years.)

Let us use this amount of power in making the comparison between the benefits to be derived from distributing Muscle Shoals power at the lowest domestic rate quoted by Senator NORRIS—1.63 cents per kilowatt-hour—and the benefits to be derived from using the power for manufacturing nitrogen for fertilizers.

For comparison with the rate of $0.0163 we use a bill of recent date for 551 kilowatt-hours consumed by a citizen of Florence, Ala., near Muscle Shoals, which figured out shows that a rate of $0.0286 per kilowatt-hour was charged. This current was supplied by a large public utility serving that city.

For example, we figure the 9,090 kilowatt-hours required to manufacture a ton of nitrogen at $0.0286 per kilowatt-hour amounts to $259.97. The same amount of power figured at $0.0163 amounts to $148.16, which shows a saving to the consumer of electricity of $111.81.

This represents the saving that would, without doubt, result every time domestic consumers used 9,090 kilowatt-hours of electricity, if Senator NORRIS'S measure, providing for Government distribution of power at Muscle Shoals is adopted.

Please bear in mind that in making this comparison, a rate based on the purchase of a small amount of electricity is compared with the purchase of a large amount of nitrogen. Also that the delivered price of both commodities at Muscle Shoals is used.

Let us now see what amount the farmers would save every time they bought 2,000 pounds of nitrogen, which Doctor Cottrell testified in the hearing before the House Military Affairs Committee, March 9, 1928, could be manufactured and sold at Muscle Shoals for 0.06 cent per pound.

Farmers at Muscle Shoals are now paying $64 per ton, or 20.6 cents per pound, of pure nitrogen for Chile nitrate, containing 310 pounds of pure nitrogen.

Two thousand pounds of nitrogen at 20.6 cents per pound amounts to $412. The same amount of nitrogen at 6 cents per pound amounts to $120, which shows a saving to the farmer of $292, or $180.19 more than is saved the electric consumer on this amount of power.

Should amount of power be sold to the consumers at 2 mills per kilowatt-hour, it would cost the consumer only $18.18, a saving of $241.79. But that saving is $50.21 less than the farmer would save on his nitrogen.

Should the electricity be delivered to the consumer without cost, the saving to the farmer would still be $32.03 more than the saving to the consumer of electricity.

Saving in freight is another most important item. When the phosphoric acid plant is installed the maximum capacity of plant No. 2 will be 382,000 tons of fertilizer material containing 233,000 tons of plant food in the form of ammonia and phosphoric acid. The proportion would be 50,000 tons ammonia and 183,000 tons phosphoric acid, which plant foods would be combined to make 382,000 tons of amo phos.

This concentrated fertilizer would contain four times as much plant food as the commercial fertilizer now in use. Therefore, for the purpose of ascertaining the saving in freight, the 382,000 tons of concentrated fertilizer must be multiplied by four. Figured on the basis of an average freight rate charge, of $3.50 per ton, there would be a saving in freight of $4,011,000. This saving alone is in excess of what the 167,000 horsepower now available at Dam No. 2, and the steam plant could be sold for at the switchboard.

(Expanation: One hundred and sixty-seven thousand horsepower equals 125,250 kilowatts.)

Yours very truly,

W. F. MCFARLAND.

Mr. BLACK. Mr. President, I desire to take just a very few minutes on the pending amendment, to explain one or two suggestions which have been made.

In the first place, I wish to say that I am thoroughly in sympathy with the diagnosis given by the Senator from Georgia [Mr. GEORGE] of the situation, but I do not agree, I regret very much to say, that the amendment offered by the Senator from Arkansas [Mr. CARAWAY] will bring about the results which the Senator from Georgia has pictured. As a matter of fact, it is my judgment, after careful study of this amendment and the original resolution offered by the Senator from Nebraska [Mr. NORRIS], that it would not result in giving any fertilizer to the farmer.

I make this statement because the Senator from Nebraska [Mr. NORRIS] stated on this floor several days ago that the manufacture of fertilizer would be under the supervision of Doctor Cottrell. Doctor Cottrell testified before the Committee on Military Affairs of the House last week that he could not, with the appropriation which is suggested in this measure, manufacture fertilizer. That is exactly what Doctor Cottrell testified and I have his testimony here before me. Therefore to state that merely by putting in the joint resolution a provi-

sion that the Secretary of Agriculture shall do something which he himself testifies he can not do is nothing more than a mere vain and empty gesture. It is all right to draw nice pictures about the farmer getting fertilizer from the proposition as it is now suggested; but, as a matter of fact, the man upon whom the duty would be placed by the joint resolution has already stated absolutely and definitely and positively that he can not do it. That is his evidence before the Committee on Military Affairs of the House, from page 26, of which I now read:

The CHAIRMAN. Is it feasible for the plant to be operated without additional expenditures by the Government?

Doctor COTTRELL. No. I think it would take an expenditure by the Government to get that going and in operation by any plan, more certainly than has been proposed yet.

It is absolutely humanly impossible to go down there and operate that plant on an appropriation of $2,000,000, as has been suggested by the Senator from Georgia.

Again, the amendment of the Senator from Arkansas [Mr. CARAWAY] provides that if the Secretary of Agriculture determines that it is commercially possible to produce fertilizer he shall do so. The right-hand man of the Secretary of Agriculture, about whom the Senator from Nebraska [Mr. NORRIS] has been commenting, testified before the Military Affairs Committee of the House on last Friday that it is not commercially feasible to manufacture fertilizer; so we would put up to a man, who has already decided that it can not be done, an instruction to manufacture fertilizer when he determines that it is commercially feasible.

I agree with what the Senator from Georgia [Mr. GEORGE] and the Senator from South Carolina [Mr. SMITH] said about the necessity for manufacturing fertilizer, but under the amendment suggested by the Senator from Arkansas [Mr. CARAWAY] it can not possibly be done. Mr. Cottrell himself made two statements. First he said that he can not do it with the appropriation provided, and, secondly, he said that which I have just read to the Senate. In other words, he said it is not commercially feasible and can not be done.

Under the amendment submitted by the Senator from Arkansas, if the Secretary of Agriculture determines it is commercially feasible to produce fertilizer by the cyanamide process, then the plant shall be used for the production of fertilizer; but Doctor Cottrell testified last Friday that it is absolutely impossible to do it. So we would be saying to the man who has said that it can not be done, "If you can do it, will you do it?"

I agree thoroughly with the statement which was attributed to the Senator from Nebraska [Mr. NORRIS] last Friday in an interview purporting to have been given by him to a newspaper reporter, that the Caraway amendment still means nothing but an experiment.

I stated in the beginning of the discussion that so far as power is concerned, if we may be given fertilizer there will be no quarrel as to the surplus power, not because I think it is right or legally defensible to attempt to legislate, by mandate, prosperity from one section of the country to another section of the country. I have heard a good many times here in the last few weeks statements about equalizing prosperity, and yet one of the principles of men concerned in commerce and trade is that any section is entitled to that natural advantage which God gave it when He made this great country of ours. But under this proposition it is proposed that Congress, taking the power which flows through the State of Alabama shall say, "We will legislate that this power must be equitably distributed between the various States. We will give you (Alabama) no taxes, we will give you no supervision, we will give you nothing." Even though the Supreme Court of the United States has expressly held that the flow of a stream and the bed of a stream belong to the State and do not belong to the Federal Government, this body proposes by legislative enactment to say to the State, "The Government is bigger than you and more powerful. Your voice is weak. We will take this asset which was given to your citizens who went there to get the advantage of it, and we will by legislative mandate distribute it into other States and thus equalize the prosperity which ought to go to the people in your locality and the people who live next to the banks of that stream."

We have heard a great deal about flood control. We have heard the argument made that the Government ought to pay every cent that it takes to protect the Mississippi Valley from the overflow of the Mississippi River and to protect the adjacent lands from floods in the future. I agree that that is correct, but I make this statement: If Mississippi or Arkansas or Missouri has any right to come into the State of Alabama and say, with reference to our power which has been rolling on there for centuries, that she demands that the prosperity which comes from that power shall be distributed equitably to Mississippi and Arkansas and Missouri, then I say it is wrong and unjust to tell the Government of the United States it must pay every dime of improvements on the great Mississippi. So far as I am concerned, I believe that very thing should be done. Do not misunderstand me. But suppose it raises the price of lands bordering on the Mississippi River or in the Mississippi Valley, then we ought to have a legislative decree that the increased profits which comes from the raising of the price of those lands by flood control shall be equitably distributed among all the other States. We ought to go a step further in the amendment and provide as follows: Some States are not within transmission distance. Why not divide the profits that come from the proposition among the other States not within transmission distance? They say their money helps to pay the taxes.

The basic proposition is that since the days of the early settlement of this country, when a man went to the banks of a running stream and established a little mill run by water power that power was his. He could not be disturbed by judicial or legislative decree to extend that power over certain territory where commerce did not naturally carry it. The waters of the Tennessee at Muscle Shoals is a part of the interior of the State of Alabama, as the waters of any stream which flows through any of the Western States is a part of one of those States. When an attempt is made to take the power which flows through any stream, when the Government never has had any right to manufacture power, a right which is subservient to the State under the Supreme Court opinion, and say, "We will distribute it to the various States by legislative mandate," we are doing exactly what the Senator from Mississippi [Mr. HARRISON] said he did not believe in. We are invading the rights of the State and making of it a conquered province, the like of which has not been seen since the days of slavery in the provinces that were under the subjection of the Roman yoke.

What is the State? Has it no right at all? It can not get any taxes under this plan. Somebody has to pay the taxes. Where should the taxes come from? If they do not come from industry, where will they come from? They will have to come from the poor, hard-working, overburdened farmer. Yet we are told that any person or corporation or government that is big enough may come into the State of Alabama and put its hands on that which is justly ours and take from us the right to collect taxes and rob the State of Alabama of the last right which has been left it under the rapidly disappearing rights of the sovereign States of America.

That is the issue which has to be met in this Nation. It is not peculiar to Alabama, but it refers to other States, and when it is met we will have to take into consideration the fact that the Supreme Court of the United States has repeatedly held that the flow of that stream and the bed of it belong to the State. If it is proposed to add an amendment like that which is here proposed, it is the duty of the Congress to enact a law at once which will provide that every power site which is developed in the Nation shall have attached to its enabling act a rider to the effect that the power must be equitably distributed among the States as far as it can be transmitted.

How much will you give the State? Will you give it power according to its population? Will you give it power according to the division of its population, white and colored? Will you give power according to its wealth? Will you give power according to its lack of potential water powers? Will you give power according to its property? Will you give power according to the number of farms in the State? Who is going to decide what is an equitable distribution of that which God Himself gave Alabama and placed within her boundaries before she became a State in this Nation? Alabama did not surrender that power to the Federal Government. She has never surrendered it. The Federal Government may be big enough and strong enough to take it, but it will get it because of its power and not because of any right which has been declared by statute or otherwise.

Let me make it clear that I am not complaining that the Federal Government does not have the right to make that river subject to navigation. That is all right. But when it goes beyond the principle of control of navigation it goes too far. The decisions of the Supreme Court of the United States, which, thank God, has not yet been divided by any partisanship question, where an attempt has been made to take away from a State that which rightly belongs to it, have decreed that the stream which flows through Alabama or Nebraska or Nevada or any other State belongs to that State. Therefore I have no apology to make for coming here to the Secretary of War and asking that the town of Muscle Shoals be given a part of that power.

I claim that the people who settled there by the banks of the Tennessee long before there was any agitation in this body for

an equitable distribution of that power have the right to demand that which nature has given them and which rightly belongs to them. We might as well go down into the State of Georgia and demand that the fruit trees and the peaches be equitably distributed between the States because, forsooth, of the fact that the Government experts have helped to grow the fruit. We might as well go down into Mississippi and declare that the balmy breezes which blow over the Gulf shall be equitably distributed among the various States. We might as well go over to Alabama and say that the rain which blesses that State, coming from heaven, does not come from Alabama alone.

Perhaps those clouds have been wafted through the sky, and maybe that water has been soaked up from the ocean or from streams far removed and which flow through another State, and therefore the rain that falls and produces the crops belongs to other States and does not belong to Alabama or Arizona or Nevada or Mississippi; and therefore we should say that we will distribute those crops equitably between the States.

It might also well be said that we will condemn equalization of prosperity when judicially determined by the Interstate Commerce Commission, but that the next day we will calmly and nonchalantly hold an inquest over the assets of Alabama, and one of us will say, "We want this," and another one will say, "We want that"; and another one will say, "No; Memphis should not have more of Alabama's power than Atlanta, and you must see to it that the people of Atlanta have their full share." Somebody else would say still another thing. But the fact remains that that part of the Tennessee which flows through the State of Alabama is dedicated to Alabama. Under the decision of the Supreme Court of the United States, in the case of the Colorado River, it was held that the water which flows through a State belongs to the State. But here we will adopt a new principle, reverse the decrees of God Almighty, and we will hold that the divine edict is no longer of any value or any worth. We will revise it so as to provide that if Georgia grows more peaches than Alabama because of having better soil, Georgia must divide with Alabama. If Alabama has coal mines which were put there a long time ago, we will judicially declare that that coal must be distributed equitably over the 48 States of the Union.

My friends, when that occurs and the States cease to have the last little vestige of right to control that which is theirs, let us do away with separate stars in our flag; let us not have any of them separately; but let us run them all into one great star that shall glow like a big, glittering, electric light bubbling forth, illuminating all the other stars. There will be no need for any separate stars. They mean nothing. The separate States mean nothing. If we want to interfere with their rights, we will do it. That is the proposition we have before us.

The PRESIDING OFFICER. The Senator's time on the amendment has expired.

Mr. BLACK. Very well; I desire to speak just a moment or two on the joint resolution itself.

The PRESIDING OFFICER. The Senator may proceed.

Mr. BLACK. I have made this statement for the following reasons: If Congress will dedicate that plant to fertilizer purposes, as we believe it should be, there will be no quarrel as far as we are concerned as to the distribution of the surplus power, even though we believe it is wrong, unconstitutional, illegal, and destructive of such sovereignty of the people to have our assets distributed among the various States. We will not quarrel with you about that, however. But so long as it seems to be only a question of having some big superpower company to distribute power, either by Government operation or otherwise, if we are going to make this a power proposition, then we ask first that Alabama's rights shall be respected, because if they are not respected here I have the utmost confidence and faith in that supreme tribunal which is established for the purpose of recognizing the rights even of the humblest individual, and that somewhere, somehow, some time that provision or that sentiment which seeks to take from one State that which is its own because there is power to do it will be stricken down and Alabama will have her sovereign rights recognized, unless sovereignty has faded into insignificance and has sunk down so lowly that no longer does a State have the right to raise its head and stand erect in the sisterhood of States and say: "I am a sovereign State in a group of sovereign States in the United States of America."

Mr. HEFLIN. Mr. President, I want to suggest to my colleague that, under the rule, having started on his other 15 minutes, he has 13 minutes left, and he had better use the remainder of his time or he will lose it.

Mr. HARRISON. Mr. President, as I understand, a Senator may use his 15 minutes at any time, may he not?

The PRESIDING OFFICER. No. The Chair understands the Senator may speak once on the bill and once on an amendment; so that if the junior Senator from Alabama should speak two minutes on the bill and then yield the floor he would exhaust his time on the bill. The question is on the amendment proposed by the Senator from Alabama [Mr. HEFLIN] to the amendment of the Senator from Mississippi [Mr. HARRISON].

Mr. HARRISON. On that I ask for the yeas and nays.

Mr. BLEASE. Mr. President, I have endeavored to listen attentively to the argument on this question, because I have been hearing of Muscle Shoals for a great many years. I have reached the conclusion that others are just about in the same fix that I am; that is, that they do not know anything about this proposition. It is a mere matter of experiment, it is a guess, it is the toss up of a coin as to whether or not it will be a success. I am fully convinced that this talk about the farmer getting cheaper fertilizer or being aided by the proposed utilization of Muscle Shoals is just about like all the other propositions that have been offered to the farmer, by which he has been made to pay the bill for the prosperity of other people. I do not believe from what I have heard and listened to here, and what I have heard elsewhere, that the experiment of turning this property over to the Government is going to be of one cent's value to the farmers of this Nation.

I do not care to make a speech on the subject, but I simply wish to state my position. I believe in the doctrine of State rights; I am in full accord with what the junior Senator from Alabama [Mr. BLACK] has said; and I propose to vote that Alabama shall retain that which is hers, although I may be the only Senator who casts such a vote.

However, I should like to ask, in my time, that the clerk read an article on farming. If the Senate shall ever be able to aid in promoting the principles of agriculture which the boy referred to in the article applied, this country will be in a much better condition.

The PRESIDING OFFICER. In the absence of objection, the clerk will read, as requested.

The Chief Clerk read as follows:

[From the News and Courier, Saturday Morning, March 10, 1928]

SAME ACRE YORK CORN PATCH MAKES MORE THAN HUNDRED BUSHELS FOR THREE SEASONS—THRICE WYLY CAMPBELL, 16-YEAR-OLD CLUB BOY OF SOUTH CAROLINA, WINS STATE 4-H CHAMPIONSHIP—BANNER YIELD COMES IN 1927 WITH 133.3-BUSHEL PRODUCTION

ROCK HILL, March 9 (Special).—York County has a new Jerry Moore in the person of Wyly Campbell, 16 years old, who has for three consecutive years won the State championship in the 4-H Boys' Corn Club in South Carolina, and who has demonstrated that where proper methods are applied, York County and South Carolina can compete with any section in the production of corn.

Wyly, who is the son of J. M. Campbell, substantial farmer and business man of Tirzah, has not won the championship for three years by default. There has been plenty of good, stout competition, and Wyly has had to be on his toes, as it were, to come under the wire a winner three times. He has had to work hard and to use sound methods. He feels, however, that he has been well rewarded.

According to L. W. Johnson, county agent, Wyly has for three consecutive years produced over 100 bushels of corn an acre on the same piece of land. In 1925 his production was 129¾ bushels on an acre; in 1926, a very dry year, he produced 105½ bushels an acre, and in 1927, a season of ample rainfall, he produced 133.3 bushels on 1 acre.

"The soil on which these remarkable yields have been made," said Mr. Johnson, "is a strip of clay loam bottom land with good under drainage. Wyly has grown a crop of vetch each year and in the spring the vetch has been thoroughly cut with disk and tractor and turned under to supply humus and nitrogen. The secret of Wyly's success has been cover crops, good preparation, intelligent fertilization and cultivation, and good seed and side dressing with quick-acting nitrogen. In 1927 Wyly planted Goodman's prolific seed from seed carefully selected from the field the previous year. The method used in making these very large yields of corn has not been expensive and has been absolutely in line with those farm practices which all recognize as sound and practical, but for some reason too few farmers have actually followed.

"In 1927 Wyly planted his corn in 3½-foot rows. The fertilizer used before planting was 200 pounds acid phosphate, 100 pounds cotton-seed meal, 100 pounds Kanit, and 200 pounds 9–3–3. When the corn was about six weeks old it was given a side dressing of 200 pounds nitrate of soda an acre, and about a week later was given a second side dressing of 200 pounds of nitrate of soda an acre. The seasons were favorable throughout the growing period and the yield was 133.3 bushels of corn an acre at a cost of 23 cents a bushel.

"Wyly gave his corn frequent and shallow cultivations to keep down the weeds and grass. These consistent high yields of over a hundred

bushels of corn an acre for three successive years on the same plat of land show the possibility of corn production in South Carolina, where the land is filled with humus and well supplied with nitrogen."

Wyly, who is very modest with his success, won gold medals in 1925 and 1926, and in 1927 was given a trip to Florida and Cuba by the Chilean nitrate and soda educational bureau. This trip he made in February in company with other crop champions of the South.

Mr. HEFLIN. Mr. President, I ask that the clerk may read in my time the amendment which I have offered to the amendment proposed by the Senator from Mississippi [Mr. HARRISON].

The PRESIDING OFFICER. The clerk will read.

The CHIEF CLERK. In the amendment of the Senator from Mississippi [Mr. HARRISON], on page 3, after line 5, it is proposed to insert the following new section:

SEC. —. All contracts for lease of the Muscle Shoals power properties or for the sale of the power therefrom shall provide that whenever, upon recommendation of the president of the American Farm Bureau Federation, the national master of the National Grange, and the president of the Farmers Educational and Cooperative Union, the President of the United States shall decide that the Muscle Shoals power is needed for the manufacture of commercial fertilizers, either through the use of nitrate plant No. 2 or otherwise, said power shall be subject to recall for the manufacture of such fertilizers, and any such contract for lease or sale executed by the Secretary of War shall be subject to cancellation by the President when in his judgment the needs of agriculture shall require it.

Mr. HEFLIN. Mr. President, the first vote will come upon my amendment to the amendment which has been offered by the Senator from Mississippi [Mr. HARRISON]. I invite the attention of the Senator from Mississippi to the position that he took regarding the Ford bid. I hold in my hand the minority report upon that measure, which was signed by the late Senator Ladd, the Senator from South Carolina [Mr. SMITH], Senator HARRISON, Senator CARAWAY, and myself. We used the following language in regard to the regulatory power that should be exercised at Muscle Shoals in connection with the manufacture of fertilizer:

He—

Referring to Mr. Ford—

agrees to a policy of regulation by the consumer through a board of nine voting members, seven to be selected from the three leading national farm organizations—

And so forth.

I have drawn my amendment to the amendment in keeping with the provision which the Senator from Mississippi, myself, and others favored at that time. It selects three members from the chief farm organizations of the country, which I think is fair and proper.

Mr. President, the amendment which I have proposed to the amendment offered by the Senator from Mississippi will test the sentiment of the Senate as to whether or not fertilizer shall be made at Muscle Shoals. If we put it in the power of the proposed board, which shall be appointed, as I suggest, by the President, to say that power at Muscle Shoals shall be used for the purpose of making fertilizer, then we know that fertilizer will be made there. If we confer upon the board the right to say that power shall cease to be used for other purposes in order to make fertilizer in keeping with the promise made the farmer, fertilizer is sure to be made at Muscle Shoals.

I wish to invite the attention of Senators to the fact that the joint resolution of the Senator from Nebraska provides that the money obtained by the sale of power shall go to the upkeep of the property, and for depreciation, and for the construction of transmission lines. All those things will have to be done out of the proceeds derived from the sale of power before fertilizer for the farmer is ever considered at all. If after the construction of transmission lines, which must be paid for by the sale of power and which will cost between seventy-five million and one hundred and fifty million dollars, there shall be any money left, then in that far-off day Senators will pause and consider, incidentally, the fertilizer needs of the farmer.

The amendment proposed by my good friend, the able Senator from Mississippi, deals with power. It provides for the equitable distribution of power. The Senator goes a long way in his amendment to interfere with the rights and the interests of the people of Alabama, and particularly at Muscle Shoals. His amendment provides that, after the power necessary to run the plant and to light up the premises about the plant shall have been utilized, there shall be an equitable distribution of the surplus power in the States roundabout.

Mr. HARRISON. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Mississippi?

Mr. HEFLIN. I have only 15 minutes.

Mr. HARRISON. I am sure the Senator wishes to be fair.

Mr. HEFLIN. Yes.

Mr. HARRISON. But the Senator is not fair when he restricts my amendment as he has stated. The amendment provides that only the surplus power shall be distributed after the requirements of section 8 shall have been taken care of, including nitrate plant No. 1, and the amendment has been modified by inserting the words "or otherwise necessary for the manufacture of commercial fertilizers."

Mr. HEFLIN. The amendment of the Senator denies the people of Florence, the people of Sheffield, the people of Tuscumbia, and the people living on both sides of the river the right to buy power at that plant. Under his amendment no citizen of my State may obtain power at that plant, which is located in Alabama, until Mississippi shall have had a share, as well as Georgia and Tennessee. There is no provision in his amendment to allow an industry of any kind to be run in Sheffield or the other cities named; under his amendment it could not be done.

Mr. HARRISON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield further to the Senator from Mississippi?

Mr. HEFLIN. I can not yield to the Senator for a speech, because my time is limited.

Mr. HARRISON. Alabama, of course, would get her equitable share of it.

Mr. HEFLIN. "Get our equitable share of it!" That is a most remarkable and ridiculous position to take. The people living in the community, many of whom were born there, citizens of a sovereign State, the great State of Alabama, who are using Muscle Shoals power now, under the amendment of the Senator from Mississippi would have it taken away from them in order to give a slice of it to Mississippi, to Georgia, and to Tennessee. It would be an amazing and a ridiculous position for this great law-making body to take. The idea of straying off upon such an unheard-of, unfair, and unsound proposition! "Equitable distribution!" Why, according to their definition of that term, as my colleague [Mr. BLACK] has so ably said, you ought to distribute the rainfall equitably. Where the rainfall is heavy in one section and light in another, tax the people to transfer it to the other section in order that there may be an "equitable distribution."

Mr. HARRISON. Mr. President, does not the Senator know that he and his former colleague, Senator Underwood, voted for that when the Underwood bill was up for consideration?

Mr. HEFLIN. No, sir.

Mr. HARRISON. Well, they did.

Mr. HEFLIN. No; I did not vote for any such proposition. I never would have taken the power away from the locality where it was needed. We wanted a fair distribution of surplus power and after we get the power needed to make fertilizer and after the people in the community are served, if there should be some power left, of course, I should want anybody who wanted it to have it rather than to have it remain idle. But the Senator is denying the people of my State in that locality the right to have power to run an industry of any kind, a cotton factory, or to use in their homes, and that is like denying them air to breathe, water to drink, and food to eat. It is a most amazing proposition!

If the Senator from Mississippi wants fertilizer, if he has not permitted the idea of dividing up power in order to get some of it from Muscle Shoals in Mississippi to become paramount with him and to dominate him rather than the interest of the farmer, I want him to accept my amendment, so that we will make it certain that fertilizer will be made for our farmers at Muscle Shoals. There is no doubt about this amendment making it certain. If you put the heads of the three great farm organizations of this Nation in position to demand and direct that power at Muscle Shoals shall be used to make fertilizer, the farmer's interests will be taken care of; but when you vote that down, you say by your votes that you are not going to make a fertilizer proposition out of it primarily, but that you are going to make a power proposition out of it primarily; and you say more, that if there is any power left finally, you will let the farmer have a little of it for fertilizer experiment stations.

Senators, let us not try to deceive ourselves, and the farmer is not going to be deceived. He and his friends can come to the CONGRESSIONAL RECORD and find out what has transpired here to-day.

You provide in the Norris resolution to sell power for 10 years, and without this amendment you can not withdraw it

and use it to make fertilizer, and you postpone doing anything for the farmer for 10 long years and make no provision to use power to make fertilizer there. We have already had him waiting 8 years, and now, under this resolution, you are going to defer action for 10 years more; and listen: In that time every transmission line necessary to consume all that power will have been constructed, and fertilizer at Muscle Shoals will be out of the question. We all know that. When you talk about making fertilizer they will say, "Why, you have no power. This power is being used for other purposes. Mississippi is getting some of it; Georgia is getting some of it; Tennessee is getting some of it. There is no power left to make fertilizer for the farmer." All of these States can get all the power they want from other power plants in Alabama and from Tennessee and Georgia.

Mr. President, unless my amendment is adopted, and unless the attitude of some of these Senators is changed, we might as well designate this performance at this session of Congress as the blow that killed all hope of making fertilizer for the farmer at Muscle Shoals. It is disposing of him ultimately. The only chance in the Nation that he has to have cheap fertilizer made is at Muscle Shoals. I see friends around me from the Southern States going off and holding conferences around here, parceling out among themselves this power at Muscle Shoals for power purposes and not thinking of fertilizer for the farmer at all. I am pained to see that.

I am reminded of the little boy whose mother had died. His father had married again and had three or four children by his second wife. This little fellow had to do all the chores about the house, and had a pretty hard time. He missed his dear mother and tender love and care. His father went to town and bought shoes for all the children. He brought back to the children by the second wife nice soft little shoes, with pretty strings for the little girls and brass-toed boots with red tops for the other little boys; and to the boy by the first wife, the older boy, he brought a very rough pair of brogan shoes. The boy sat over in the corner, put them on, and the tears ran down his face as he looked at the other children with fine, comfortable shoes on their feet. His father said to him when he got his shoes on, "Do they hurt you, son? I see you are crying." The boy said, pointing to his little, sad heart, "They don't hurt my feet; they hurt me in here."

It hurts me in here to see the farmers of the Southland, already pillaged and plundered to the point where they are selling cotton under the cost of production, to be treated as they are about to be treated here to-day. The Fertilizer Trust has recently raised the price of fertilizer $5 a ton. Here is an opportunity to deliver the farmers from the Fertilizer Trust and deliver them by keeping our promise to them. Congress is obligated to do that; and here you are, some of you, holding conferences for the purpose of arranging for the distribution of power at Muscle Shoals, and you are about to leave the farmer out entirely. You are seeking to put through this body a power resolution pure and simple. The record must show the truth, and the farmers will know the truth when they read the record of what is taking place here to-day.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Alabama [Mr. HEFLIN] to the amendment of the Senator from Mississippi [Mr. HARRISON].

Mr. HEFLIN. I ask for the yeas and nays.

Mr. HARRISON. Mr. President, does the vote come first on the amendment of the Senator from Alabama?

The PRESIDING OFFICER. The Chair understands that that is an amendment to the amendment of the Senator from Mississippi, and therefore the vote comes first on it.

Mr. HARRISON. I am permitted to talk on that amendment, then.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. HARRISON. I shall not occupy the floor more than about a minute.

The PRESIDING OFFICER. The clerk advises the Chair that the Senator from Mississippi has already spoken once on the amendment.

Mr. HEFLIN. I ask for the yeas and nays.

Mr. BARKLEY. May we have the amendment stated?

The PRESIDING OFFICER. The yeas and nays are called for.

The yeas and nays were ordered.

Mr. SMITH. Mr. President, before the vote is taken I ask that we may have stated the amendment offered by the Senator from Mississippi, and the amendment to that amendment.

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from Mississippi and then the amendment to that amendment of the Senator from Alabama.

The CHIEF CLERK. The modified amendment of the Senator from Mississippi reads as follows:

SEC. 2. In order to secure equitable distribution of Muscle Shoals power, according to the policies herein set forth, the Secretary of War is hereby empowered and authorized to lease the said power plants or to sell at the switchboard the current generated at said steam plant and said dam to municipalities and corporations authorized by law to distribute and sell electric current for general public use under public regulations; and to carry out said authority the Secretary of War is authorized to enter into contracts for such lease or sale for a term not exceeding 15 years from the 1st day of January, 1929: *Provided*, That no municipality shall receive a greater amount of power than upon the principle of equitable distribution that it is entitled to receive.

SEC. 3. It is hereby declared to be the policy of the Government and the Secretary of War is authorized to dispose of the current generated at Muscle Shoals for public use equitably among the States within transmission distance, except as provided in section 8 herein, and except so much of such current as may be needed otherwise for the manufacture of commercial fertilizers and to light and operate the locks and canals in and about Dam No. 2 and the Government property at and around Muscle Shoals, subject to regulation provided by the laws of said States and without unfair discrimination between municipalities or as to rates or service between users of such current.

It is hereby further declared to be the policy of the Government that in case of any such sale or lease to a public-service corporation the amounts paid to the Secretary of War by such corporation shall be considered by the public-service agencies of the several States in regulating the rates charged by such corporation to the consumers.

SEC. 4. In order to place the Secretary of War upon a fair basis for making such contracts and for receiving bids for the sale of such current, if in his opinion it is necessary therefor, he is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such current, to construct, lease, or authorize the construction of transmission lines for the sale of current within transmission distance in any direction from said Dam No. 2 and said steam plant.

The Senator from Alabama proposes to amend the amendment by adding as a new section, after line 9, on page 3, the following:

SEC. —. All contracts for lease of the Muscle Shoals power properties or for the sale of the power therefrom shall provide that whenever, upon recommendation of the president of the American Farm Bureau Federation, the national master of the National Grange, and the president of the Farmers Educational and Cooperative Union, the President of the United States shall decide that the Muscle Shoals power is needed for the manufacture of commercial fertilizers, either through the use of nitrate plant No. 2 or otherwise, said power shall be subject to recall for the manufacture of such fertilizers, and any such contract for lease or sale executed by the Secretary of War shall be subject to cancellation by the President when in his judgment the needs of agriculture shall require it.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Alabama [Mr. HEFLIN] to the amendment of the Senator from Mississippi [Mr. HARRISON] as modified. On that amendment the yeas and nays have been ordered. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. FESS (when his name was called). I am paired with the senior Senator from Michigan [Mr. FERRIS], who is absent. Not knowing how he would vote on this question, I withhold my vote.

Mr. FLETCHER (when his name was called). I have a general pair with the junior Senator from Delaware [Mr. DU PONT]. I understand the Senator from Delaware would vote as I shall vote on this question if he were present, and I therefore feel at liberty to vote. I vote "yea."

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Connecticut [Mr. MCLEAN], who is unavoidably absent. Not knowing how he would vote if he were present, I withhold my vote.

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote on this question, I withhold my vote.

The roll call was concluded.

Mr. LA FOLLETTE. I desire to announce that my colleague the junior Senator from Wisconsin [Mr. BLAINE] is paired with the junior Senator from Utah [Mr. KING]. If my colleague were present he would vote "nay" on this amendment to the amendment.

Mr. BRATTON. I have a pair with the junior Senator from Indiana [Mr. ROBINSON]. I have been advised that if the Senator from Indiana were present he would vote as I intend to vote. I therefore am at liberty to vote, and I vote "nay."

Mr. BROUSSARD. I have a pair with the senior Senator from New Hampshire [Mr. MOSES]. Not knowing how he would vote on the amendment to the amendment, I withhold my vote.

The result was announced—yeas 11, nays 58, as follows:

YEAS—11

Barkley	Fletcher	Kendrick	Sheppard
Black	Harris	Mayfield	Thomas
Blease	Heflin	Neely	

NAYS—58

Ashurst	Edge	Metcalf	Steck
Bayard	Frazier	Norbeck	Steiwer
Bingham	George	Norris	Stephens
Borah	Gooding	Oddie	Swanson
Bratton	Greene	Overman	Tydings
Brookhart	Hale	Phipps	Wagner
Bruce	Harrison	Ransdell	Walsh, Mass.
Capper	Hayden	Reed, Pa.	Walsh, Mont.
Caraway	Howell	Robinson, Ark.	Warren
Copeland	Johnson	Sackett	Waterman
Couzens	Jones	Schall	Watson
Curtis	La Follette	Shipstead	Wheeler
Cutting	McKellar	Simmons	Willis
Deneen	McMaster	Smith	
Dill	McNary	Smoot	

NOT VOTING—25

Blaine	Gerry	King	Robinson, Ind.
Broussard	Gillett	McLean	Shortridge
Dale	Glass	Moses	Trammell
du Pont	Goff	Nye	Tyson
Edwards	Gould	Pine	
Ferris	Hawes	Pittman	
Fess	Keyes	Reed, Mo.	

So Mr. HEFLIN's amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on the amendment of the Senator from Mississippi [Mr. HARRISON], as modified.

Mr. HEFLIN. Mr. President, I discussed my amendment to the amendment offered by the Senator from Mississippi. Would I have the right now to discuss his amendment, under the unanimous-consent agreement?

The VICE PRESIDENT. The Senator would have 15 minutes.

Mr. HEFLIN. Mr. President, I am utterly astounded at the result of the vote that has just been taken. I can see in the result of this vote the death-knell of the interest of the farmer, so far as fertilizer is concerned. The farmer's interest has been lost in the shuffle here. The power idea prevails.

I had hoped that amongst all the power projects of the United States, with millions and millions of developed and undeveloped horsepower, this project at Muscle Shoals, with 80,000 horsepower at the dam and about 80,000 at plant No. 2, would be devoted to the interests of the farming population of America. Especially did I hope to see that done when the original Muscle Shoals law set out specifically that the power to be developed there should be used for the purpose of making nitrates for the Government in the time of war and fertilizer for the farmer in time of peace.

We promised the farmers that we would do that. Those of us who supported the Ford bid committed ourselves to that proposition and we tried to keep faith with the farmer. Later on, when I have more time, I am going to put our report in the RECORD, showing what we promised to do, in order that the farmers of the South, North, East, and West may know just who forgot them on this occasion, and just who remembered them when they had the opportunity to serve them. Senators, I can not refrain giving expression to the conviction that the farmer will be betrayed if this measure passes.

The Senate has had notice that it is a power proposition, pure and simple. Under the resolution of the Senator from Nebraska transmission lines for the distribution of power, not fertilizer, are to be constructed in every direction where power can be transmitted, and those transmission lines are to be paid for out of the sale of the power. Do Senators believe that there will be any money left to make fertilizer for the farmer? It will cost $12,000 a mile to construct those transmission lines. It is variously estimated that they will cost from $75,000,000 to $150,000,000. Where does the farmer come in? What provision is made for the protection of his interests?

Does anybody presume upon the ignorance of the farmer, and think that he will not be able to know the truth? Do those who favor this measure think they can deceive him by telling him they provide for the making of any appreciable amount of fertilizer in this Norris resolution? They are providing for experiment stations, but we already have them. We have passed that point in connection with Muscle Shoals. We have nitrate plant No. 2 already. We have exhibited in this Chamber nitrates made there. That plant's capacity is 40,000 tons of fixed nitrogen a year. The farmer who reads this RECORD will know that. It is not necessary that experiments should be made in regard to that. Instead of providing in this resolution and in the amendments for the making of fertilizer, provision is made for the distribution of power. The distribution of power is the controlling force with the supporters of this resolution. They have forgotten the cotton farmer and the grain farmer and their fertilizer needs.

Oh, Mr. President, I note with sadness and disappointment this division and disagreement in the ranks of the farmers' friends on this side. When the Ford bid was before us we stood shoulder to shoulder and side by side fighting for the adoption of that bid. What happened? Mr. Ford became disgusted on account of just such tactics on the part of others that we see here to-day on our side among Southern Senators. He got tired of waiting, and finally became so disgusted that he withdrew his bid and retired from the scene, and now the same sort of tactics are being carried on again, on this side as well as among some on the other side, in an attempt to fool the farmer, and at the same time turn it over to the power companies. There is just enough mention of fertilizer in the resolution to make it possible to attempt to deceive him, although there is no provision in it for making fertilizer.

I repeat, the farm organizations of the country are against the Norris resolution—they know what they want. I hold in my hand a telegram like scores that have come to me and others here. This is from Anniston, Ala. Last week I read one from Selma, down in south Alabama; this one is from the northern part of the State. It reads:

ANNISTON, ALA., *February 27, 1928.*

Hon. J. THOMAS HEFLIN,
United States Senate:

Norris Government operation proposal for Muscle Shoals promises no fertilizer for Alabama farmers. We urge you fight for Cyanamid offer as contained in the Willis-Madden bill.

CALHOUN COUNTY FARM BUREAU.

The Willis-Madden bill has in it a provision for the making of fertilizer for the farmer. That is the primary consideration in it, and in this resolution power is the primary consideration. There is no provision for the production of fertilizer in this Norris resolution, except incidentally, on a small scale, at some little experiment station.

Senators, it hurts me and makes me sad at heart to see this procedure followed when I know that it is the last hope the farmer has for the manufacture of cheap fertilizer as against the robber prices of the Fertilizer Trust. Mr. President, I want to believe that the Fertilizer Trust's influence is not felt here. I do not want to believe that the Power Trust influence is making its power felt here to-day. I do not know. I do not want to impute any improper motives to anybody, but I know that the farmer's fertilizer has been forgotten and that the farmer himself has been struck down and he is now being carried to the operating table, where he will be duly chloroformed before a major operation is performed on him by the power company's surgeons. I do not expect him to survive the operation. Let the responsibility rest with those who have brought this awful thing about.

Mr. TYSON. Mr. President, I offer an amendment to the amendment, which I send to the desk.

The VICE PRESIDENT. The clerk will read.

The CHIEF CLERK. On page 1, line 5, after the word "board," insert the words "so as to secure a reasonable return to the United States"; on page 2, line 17, strike out the word "said" and insert the word "the"; on page 3, at the end of line 9, insert:

If any question shall arise as to what is equitable distribution of power, either under a lease or by Government operation of the said power plants, the decision of the Secretary of War, if called on to make a decision by any party at interest, shall be final.

Mr. HARRISON. Mr. President, may I say to the Senator that I have no objection to any of his suggestions?

Mr. TYSON. I understood the Senator would accept the amendments.

The VICE PRESIDENT. The amendment will be modified to that effect.

Mr. BLACK. Mr. President, I desire to amend by moving to strike from the amendment of the Senator from Mississippi the last section that the Senator from Mississippi has agreed to accept. I want to strike out that part which leaves it to the Secretary of War to act as the final arbiter in parceling out the assets of the State of Alabama.

Mr. HARRISON. The amendments have not been adopted. I said I have no objection to them. They have to be voted on, I presume. The Senator can speak in opposition to them.

The VICE PRESIDENT. Under the statement of the Senator from Mississippi the Chair understood the amendments submitted by the Senator from Tennessee were accepted by him, and his amendment is modified to that extent.

Mr. BLACK. Mr. President, I would like to suggest merely this: Of course I feel sure that my motion will be very promptly

voted down, but I desire to call attention to the fact that some day, somewhere, some other State is coming up against the same proposition. It is a question of taking the assets of Alabama and dividing them equally between the States. I do not see how any Senator can stand here now or hereafter and ask the United States Government to contribute 100 per cent for the flooded districts of Mississippi, Louisiana, Missouri, and other States, and at the same time stand here and vote to take away from Alabama its natural assets. Senators tell me that they have a right to ask the Government pay 100 per cent of the costs of flood control which gives the farmers in their State a benefit of such Government work, and that these same States may come in later and demand a division of the power produced in Alabama, plucking off power here and there, and leaving it to the Secretary of War to determine how much of the assets of Alabama shall go to each separate State.

That is exactly what we are asked to vote on now. If Senators believe in the equalization of prosperity, if they believe in taking a part of the Muscle Shoals power given to Alabama by nature and give it to Mississippi, if they believe a wonderful agricultural State should be made great industrially by a transfer of power to such State, if they believe in taking from Alabama that which is its own, when the time comes for the application of the principle to their State I hope they will stick to it. Then, after we do that, let us enact the same kind of law with reference to the Pennsylvania, Kentucky, or West Virginia coal mines. Let us provide that all the coal that is mined in Kentucky, Pennsylvania, and West Virginia has to be equally distributed between the States, whether the regular channels of commerce provide for it or not.

Let us then reverse the laws of commerce and trade. Let us do away with commerce and with the principles which have governed in the sale of commodities, and let us tell Maryland, which boasts of a great harbor, "You have no right to the peculiar benefits of that harbor. You must divide them up among the people of the Nation." Let us say, "Divide up your produce out in Nebraska with the people of Alabama. We demand that the people of Oregon divide with us their lumber and divide it in equal amounts between the States." If this proposition is maintained, as I suppose it will be, Senators are merely voting to equalize prosperity between States differently endowed by nature by reversing the laws of commerce and trade.

Mr. HARRISON. Mr. President, the Senator's argument is that if we adopt the amendment, we should say that the profits from the coal sold from the coal fields of Pennsylvania should go to the people of the United States. His other illustration had to do with peaches that are grown over in Georgia, and that they shall be distributed among all the people of the whole United States. Here is a project at Muscle Shoals that was developed at the expense of the Federal Government. It is so different from coal and peaches. A navigable stream was taken and, through the expenditure by the Federal Government of $52,000,000 of the taxpayers' money, this dam was constructed. It was done at the expense of the Federal Government. The State of Alabama was glad, and welcomed the undertaking. The illustration which the Senator gives is not analogous at all.

I submit that the surplus power over the amount that is required for the manufacture of fertilizer should be equitably distributed. That is all my amendment proposes. It does not affect the fertilizer features of the Norris resolution in the slightest. Indeed, the amendment which we have just disposed of, and with which action of the Senate the distinguished Senator from Alabama [Mr. HEFLIN] has found fault, was not necessary, and that was the reason why the Senate did not adopt it. In the amendment which is now pending I have provided that all the power that is necessary to be used at nitrate plant No. 1 shall be excepted, and all that which is used to operate the locks and furnish the lighting of Government property shall be excepted. Indeed, I went further, at the suggestion of the Senator from Alabama, and said that all over the power otherwise needed in the manufacture of commercial fertilizer shall be excepted. In other words, only the power above that which is required for the manufacture of fertilizer is included in the amendment, which provides for the equitable distribution of it.

Mr. HEFLIN. Mr. President, may I ask the Senator a question?

Mr. HARRISON. I yield.

Mr. HEFLIN. Where is there going to be any other power after the power is used for other purposes?

Mr. HARRISON. If they were to make 40,000 tons of fixed nitrogen at Muscle Shoals, I do not believe there would be any surplus power. But if we build Dam No. 3, which I hope some day will be built; if we build Cove Creek Dam, which I hope in time will be built, there will be upward of over 500,000 primary horsepower, plenty to be equitably distributed.

Mr. HEFLIN. Would the Senator favor using all the power to make the fertilizer that the farmers require?

Mr. HARRISON. I would not favor the use of 500,000 primary horsepower.

Mr. HEFLIN. I am talking about what they have now, 160,000 horsepower.

Mr. HARRISON. Of course I would favor it. I voted for it time after time when it came up in connection with the Ford bid and in connection with the Underwood bill. The Senator, in the consideration of those propositions, stood with those of us who now stand for the equitable distribution of power, and voted for such an amendment.

Mr. HEFLIN. No; I voted for the manufacture of fertilizer.

Mr. HARRISON. The Senator voted for the amendment of the Senator from Georgia [Mr. GEORGE] and for the amendment of the Senator from Arkansas [Mr. CARAWAY], both of which provided for the distribution of surplus power.

Mr. HEFLIN. I have never voted to divide what was left with anybody else at all.

Mr. HARRISON. That is all I am trying to do.

Mr. HEFLIN. The Senator is asking for the division of power the first thing, and no manufacture of fertilizer is contemplated in the amendment.

Mr. HARRISON. The Senator is very much mistaken. I expressly exclude all power that is used for the manufacture of commercial fertilizer.

Mr. HEFLIN. But the Senator is not directing that it be used to make fertilizer.

Mr. HARRISON. That is covered by the resolution of the Senator from Nebraska. I am not affecting those provisions at all yet. When we get through with the pending amendment, we will take up the fertilizer features of the joint resolution itself.

Mr. HEFLIN. There is nothing in the joint resolution that forbids them to make fertilizer.

Mr. HARRISON. We will reach that when the pending amendment is disposed of.

Mr. TYSON. Mr. President, I want to say that in offering my amendment my only idea was to try to make it impossible to have a squabble about what was equitable distribution. I do not undertake or desire to take anything from Alabama that Alabama does not own or have. Somebody ought to be able to say what is equitable distribution. The Secretary of War is the one charged with making the lease, and my idea was that we should leave it to him to determine what is equitable distribution. Otherwise we might not have anybody to determine what was equitable distribution. That is the only idea I had about it. If there is any idea that there is going to be any injustice to Alabama, I have no desire to press that part of the amendment. I simply wanted to relieve the situation.

Mr. BLACK. Mr. President, will the Senator yield?

Mr. TYSON. In just a moment. It merely provides that there shall be some means of determining what is equitable distribution. That is the first proposition in the amendment, and it was my idea to clear up the matter so that it would be known that the Secretary of War should have the right to determine what is equitable distribution. I now yield to the Senator from Alabama.

Mr. BLACK. I would like to ask the Senator if he would be willing to have an amendment added to the next legislative enactment here by which power is authorized to be generated in Tennessee which shall provide that the power must be equitably divided between the various States?

Mr. TYSON. I do not think that is a question necessary to be answered here, because the Muscle Shoals Dam is a property which belongs to the Government of the United States; otherwise we would not be undertaking to dispose of it.

Mr. BLACK. Does the Senator believe that because it belongs to the Government of the United States, as he contends, the Government has any right to go there and take it for power purposes to the exclusion of the State of Alabama?

Mr. TYSON. That will have to be decided later. If the State of Alabama owns the power and Muscle Shoals Dam, the law will give it to her. I am not willing to say it belongs to her, because I do not know. We are assuming that it belongs to the United States Government, and that the Congress has the right to dispose of it.

Mr. BLACK. Then I understand the Senator favors the provision about the equitable distribution of power for all power that is generated at Muscle Shoals.

Mr. TYSON. To the extent that it is not to be used for fertilizer purposes.

Mr. BLACK. And he opposes building Cove Creek Dam by the Government for the use of power in Alabama?

Mr. TYSON. I have not opposed the building of Cove Creek Dam by the Government. I have opposed the delay of the Government in either building it or permitting somebody else to do something about it.

Mr. HEFLIN. Mr. President, I wish the Senator would withdraw his amendment to the amendment of the Senator from Mississippi.

Mr. TYSON. I am perfectly willing to withdraw it if there is any particular objection to it. My only idea was to clarify the situation and I do not see why it is not a good thing.

The VICE PRESIDENT. Does the Senator from Tennessee desire to withdraw his amendment?

Mr. TYSON. No.

The VICE PRESIDENT. The question is on the amendment of the Senator from Alabama [Mr. BLACK] to strike out the provision of the Senator from Tennessee modifying the amendment of the Senator from Mississippi.

The amendment to the amendment was agreed to.

Mr. NORRIS. Mr. President, I assume we are about to vote on the Harrison amendment?

The VICE PRESIDENT. The question is on agreeing to the Harrison amendment as modified.

Mr. NORRIS. Before we do that I want to take a few moments to explain what, in my judgment, would be the result. I, of course, concede, to begin with, that the Senator from Mississippi is moved by the very best motives in offering the amendment, but regardless of that it is my judgment that if the amendment is agreed to it will result in the power companies getting all the surplus power at Muscle Shoals. The joint resolution pending, which the committee has reported, provides for giving preference to municipalities, counties, and so forth. The amendment of the Senator from Mississippi takes away that privilege.

The joint resolution further provides that the Secretary of War shall have authority to lease the entire works to anybody. Let us see what would happen if he undertook to lease the property. There might be something different happen, but in all probability, as I see the situation, there is only one bidder that could lease the power and that is the Alabama Power Co., or some of its associated corporations. The Senator's amendment provides that the Secretary of War can make that kind of a lease. It takes away from the people who are going to use this power as consumers, in my opinion, every possibility of a reduction in rate. They are getting that power now through the Alabama Power Co. and I understand that not in a single instance anywhere within transmission distance of Muscle Shoals has the Alabama Power Co. given a penny of benefit to the consumer because of the cheap electricity that it gets at Muscle Shoals.

If a lease were made, and the Alabama Power Co. or one of its associated companies should get it, what reason have we to expect there would be a reduction of rates, although the Senator's amendment, it is true, provides if a transmission company such as the Alabama Power Co. should obtain the lease, and then distribute the power, that the proper authorities of the State in which it was distributed would have a right to take into consideration the price which the Alabama Power Co. paid in regulating rates for electricity in that State.

I have read within the last two or three days—I think some Senator put it into the RECORD—an official opinion of the commission, I do not know its legal name, in Alabama, that has authority over all the electric-light rates in a case where an attempt was made by a consumer to get a reduction of rates, because it was alleged that the Alabama Power Co. was getting its power or a large portion of it so cheap from Muscle Shoals, but the commission dismissed the application entirely and said it could not take that into consideration.

In my opinion, there will be no reduction of electric-light rates anywhere if this amendment shall be agreed to. No municipality, no organization of any kind under the laws that may hereafter be enacted by any of the States in the vicinity of Muscle Shoals will be able to get a penny's reduction on a single kilowatt. I have on my desk an amendment which after consultation with a number of Senators, I am going to offer to the original joint resolution, providing that farm organizations instituted for the purpose of distributing electricity among farmers and not for profit, as well as municipalities, shall have the right to get electricity from Muscle Shoals. The amendment will also provide—which I think is already practically in the original joint resolution—if municipalities do not take all of the power and some of it is left and distributed through corporations, who resell it to consumers, that they shall not charge the ultimate consumer a price that will be in excess of what the Federal Power Commission shall say is a fair and reasonable price. I do not know any other way to insure to the consumer a fair price, unless municipalities, farm organizations, and other associations which may be formed under the statutes of the different States, shall organize for the purpose of distributing current and not for the purpose of selling it for profit. I know of no other way to give to the consumer the benefit.

Therefore, Mr. President, it seems to me that if the amendment offered by the Senator from Mississippi [Mr. HARRISON] shall be agreed to, the effect of the joint resolution, so far as concerns power that shall go to the people, is killed and that all possibility of people getting any benefit from it is dead.

Mr. HEFLIN. Mr. President, will the Senator from Nebraska let me ask him a question?

Mr. NORRIS. I yield.

Mr. HEFLIN. The Senator from Nebraska suggests giving the Federal Power Commission the right to regulate in the State the rates for power sold at Muscle Shoals. Does the Senator think the Federal Government has that authority, and the State has declared that it has the power to regulate all current sold in the State?

Mr. NORRIS. No; I do not claim that, but the Federal Government, having the electricity, can say to anybody who is going to resell it, "We will not sell it to you unless you will agree to give the consumer a benefit that shall be determined by the Federal Power Commission." There is not any question about that. It will sell it subject to the regulation by the State commission; I admit that.

Mr. HEFLIN. Mr. President——

Mr. NORRIS. But the Government can say, for instance, to the Alabama Power Co., "If you buy this power and sell it to the people of Birmingham, Ala., you shall not charge the consumer in Birmingham a price above a certain amount that the Federal Power Commission shall fix as reasonable." If they do not agree to that, the Government will not sell them the power.

Mr. HEFLIN. Would there not, then, be a conflict between the Federal power and the State power?

Mr. NORRIS. No; I do not think there would be any conflict unless the State power should insist that the Alabama Power Co. should charge more than a just and reasonable rate as fixed by the Federal Power Commission.

Mr. HEFLIN. If the State commission were to do that, then the people would have their remedy in putting in another commission to represent them.

Mr. NORRIS. They might. I should think they would. I should be glad if they would.

Mr. HEFLIN. My position is that if the Federal Government goes in there to dispose of the power in any way it will have engaged in commerce, and the minute it attempts to dispose of power or has anything to do with it, it comes under the jurisdiction of the State. So there is a conflict between State and Federal power under the Senator's joint resolution.

Mr. NORRIS. I do not think there is any conflict; but that question does not arise on the Harrison amendment; that will come when I offer the amendment to which I have referred, which I shall offer at the suggestion and request of a number of Senators who think that the rights of the people are not sufficiently safeguarded.

Mr. MAYFIELD. Mr. President, does the proposed amendment of the Senator from Nebraska use the words "just and reasonable rates"?

Mr. NORRIS. Yes; I think so.

Mr. MAYFIELD. The Constitution would allow the company such rates regardless of any statute.

Mr. NORRIS. Yes. The vote that is to be taken now is on the Harrison amendment. I have mentioned this as showing that we are going to have an opportunity to vote on an amendment which, I think, will give to the consumer a fair and just rate after the production of fertilizer shall have been taken care of. I am ready to vote, so far as I am concerned.

Mr. HARRISON. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. LA FOLLETTE (when Mr. BLAINE'S name was called). Making the same announcement concerning my colleague and his pair as on the last roll call, I desire to state that if he were present he would vote "nay" on this amendment.

Mr. BROUSSARD (when his name was called). I have a pair with the senior Senator from New Hampshire [Mr. MOSES]. I understand that if present he would vote on this amendment as I intend to vote. Therefore I am at liberty to vote, and vote "yea."

Mr. FESS (when his name was called). I am paired with the Senator from Michigan [Mr. FERRIS]. I understand that if he were present he would vote "nay." I transfer my pair to the senior Senator from Massachusetts [Mr. GILLETT] and vote "yea."

Mr. FLETCHER. Making the same announcement as to my pair as before, I vote "yea."

While I am on my feet I desire to say with reference to my colleague [Mr. TRAMMELL] that he is unavoidably absent. I will let this announcement stand for the day.

Mr. GLASS (when his name was called). I have a pair with the senior Senator from Connecticut [Mr. MCLEAN]. I am informed that if he were present he would vote "yea." If I were permitted to vote, I should vote "nay."

Mr. KING (when his name was called). I have a general pair with the junior Senator from Wisconsin [Mr. BLAINE]. I transfer my pair with him to the junior Senator from Florida [Mr. TRAMMELL], and vote "yea."

Mr. MCMASTER (when his name was called). I have a pair with the senior Senator from Missouri [Mr. REED]. I am informed that if he were present on this question he would vote "yea." If I were permitted to vote, I should vote "nay."

Mr. TYSON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote on this question, I withhold my vote. If at liberty to vote, I should vote "yea."

The roll call was concluded.

Mr. BRATTON. I have a general pair with the junior Senator from Indiana [Mr. ROBINSON]. In his absence I withhold my vote. If at liberty to vote, I should vote "nay" on this question.

Mr. OVERMAN (after having voted in the negative). I inquire whether the senior Senator from Wyoming [Mr. WARREN] has voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. OVERMAN. I have a general pair with the senior Senator from Wyoming. As he has not voted, I withdraw my vote.

The result was announced—yeas 25, nays 45, as follows:

YEAS—25

Bayard	Edwards	King	Swanson
Bingham	Fess	Metcalf	Tydings
Blease	Fletcher	Ransdell	Watson
Broussard	Greene	Reed, Pa.	Willis
Curtis	Hale	Sackett	
Deneen	Harrison	Smoot	
Edge	Hawes	Stephens	

NAYS—45

Ashurst	Frazier	McNary	Smith
Barkley	George	Mayfield	Steck
Black	Gooding	Neely	Steiwer
Borah	Harris	Norbeck	Thomas
Brookhart	Hayden	Norris	Wagner
Bruce	Heflin	Nye	Walsh, Mass.
Capper	Howell	Oddie	Walsh, Mont.
Caraway	Johnson	Phipps	Waterman

Couzens	Kendrick	Sheppard	
Cutting	La Follette	Shipstead	
Dill	McKellar	Simmons	

NOT VOTING—24

Blaine	Gillett	McMaster	Robinson, Ark.
Bratton	Glass	Moses	Robinson, Ind.
Dale	Goff	Overman	Shortridge
du Pont	Gould	Pine	Trammell
Ferris	Keyes	Pittman	Tyson
Gerry	McLean	Reed, Mo.	Warren

So Mr. HARRISON'S amendment as modified was rejected.

The VICE PRESIDENT. The joint resolution is before the Senate as in Committee of the Whole and open to amendment.

Mr. CARAWAY. Mr. President, I offer an amendment, which I ask to have stated; and I call the attention of the Senator from Nebraska [Mr. NORRIS] to it.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 5, after line 10, it is proposed to insert the following:

SEC. 9. (a) The Secretary of Agriculture is authorized and directed to utilize nitrate plant No. 2 for experiments in the production of fertilizers by the use of the cyanamide process to determine whether it is or is not commercially feasible to produce fertilizers by such process. If the Secretary of Agriculture determines that it is commercially feasible to produce fertilizers by the cyanamide process, then such plant shall be used for the production of fertilizers by such process in the largest quantities practicable, and the fertilizers so produced shall be disposed of at the lowest prices practicable to meet the agricultural demands therefor and effectuate the purposes of this resolution. In the utilization of nitrate plant No. 2 the Secretary of Agriculture shall avail himself of power in the same manner as provided in section 8.

And, following that, to change the section numbers.

Mr. NORRIS. Mr. President, as far as I am able to do so, I accept that amendment.

Mr. HEFLIN. Mr. President, I just want to call attention to the fact that while this amendment of the able Senator from Arkansas [Mr. CARAWAY] is an improvement over section 8 of the Norris joint resolution, it is not what we want and what we are entitled to have in the way of fertilizer at the hands of the Senate. If we are going to pass this measure with section 8 in it—and that is the only section that has any reference, of consequence, to fertilizer—we ought to acknowledge frankly that we are not providing for the making of fertilizer. Permitting the Secretary of Agriculture to decide whether or not he wants to make it there is not worth five cents to the farmer. We ought to direct that fertilizer be made there, and we ought to put it in the law, whatever the bill or resolution, that when they fail to make fertilizer they forfeit their lease on Muscle Shoals.

Senators, we all know, and the country knows, that unless we put in such a provision we are not in earnest about making fertilizer for the farmer at Muscle Shoals.

Let us not deceive ourselves, and let us not try to deceive the farmer. The Senator's amendment will improve this measure in some particulars. I have been told by men who know something about the business that it will cost over $100,000,000 to construct transmission lines out from Muscle Shoals. You are going to make the Government pay for that, and you can not make fertilizer until after that is done; and after you do that you will not have a dollar left or any power left to make fertilizer at Muscle Shoals.

Mr. BRUCE. Mr. President, I should like to ask the Senator from Arkansas whether I am correct in inferring that his amendment contemplates the production of fertilizers by the Government itself. Is that so?

Mr. CARAWAY. Mr. President, if I may answer the Senator's question in a little detail, the amendment provides that they shall at once commence the use of plant No. 2 for the production of fertilizer. If it develops that it can be made by the cyanamide process, then the plant will be dedicated to that purpose as long as the Government shall have charge of Muscle Shoals. That is the purpose of the amendment.

Mr. BRUCE. Is not the cyanamide process a patented process?

Mr. CARAWAY. We have the use of the patent for it.

Mr. BRUCE. The Government has?

Mr. CARAWAY. Yes.

Mr. BRUCE. I was not aware of that.

Mr. TYSON. Mr. President, will the Senator yield? Do I understand that the Government has the right to use that process?

Mr. CARAWAY. That is my understanding.

Mr. TYSON. In making fertilizer? I understood that that was only for the manufacture of explosives.

Mr. CARAWAY. The same process by which nitrates are extracted from the air to make explosives is used to extract them from the air to make fertilizer, or any other use you want to make of the material.

Mr. SACKETT. Mr. President, will the Senator yield to me?

Mr. CARAWAY. I have not the floor. The Senator from Maryland has the floor.

Mr. SACKETT. Will the Senator from Maryland yield to me a moment?

Mr. BRUCE. I will yield the floor entirely in a moment. The Cyanamid Co., which primarily owns the cyanamide process, is a Canadian company, is it not?

Mr. CARAWAY. I do not know, Mr. President.

Mr. BRUCE. I understand that it was incorporated in Canada.

Mr. HEFLIN. Mr. President, it is an American company, officered by American citizens, and owned by American citizens.

Mr. BRUCE. I am not asking by whom it is officered or by whom it is owned. I am asking by what sovereignty it was created.

Mr. CARAWAY. I have not that information.

Mr. HEFLIN. It was organized in Canada, as I understand. They tried to set up business in Alabama on the Coosa River, and the President vetoed a bill that we passed through Congress allowing them to construct a dam there. Then they went over into Canada; but they are American owned and officered.

Mr. BRUCE. The company was created in Canada? That is the corporate situs?

Mr. SHEPPARD. Mr. President, I understand that the company was chartered by the State of Maine.

Mr. BRUCE. That is contrary to the statement made here lately that it was a Canadian company.

Mr. HEFLIN. Yes; I misunderstood the Senator. What I meant to say was that they went to Canada to do business. I think they were chartered under the laws of the State of Maine.

Mr. BRUCE. Is the Senator from Texas certain that this is a Maine corporation?

Mr. SHEPPARD. I feel certain of it. It is my distinct recollection that it was chartered by the State of Maine or some other American State.

Mr. BRUCE. I ask that because of course if the corporate situs of the corporation is Canada, all franchise taxes resulting from its operations would flow into the treasury of Canada, and so would other taxes, perhaps, and not into the Treasury of the United States. It does seem that in consideration of the fact that Canada is so jealous of American competition that she is unwilling for any power to be transmitted from Canada across the boundary line between that country and the United States, we ought to be a little slow about according any special privileges of any kind to Canada in connection with Muscle Shoals or anything else.

Mr. HEFLIN. Mr. President, I should like to say to the Senator that Mr. Bell, the president of the company, lives in New York; and if they get Muscle Shoals they will send their agents down there, and it will be operated as an American proposition purely.

Mr. FLETCHER. May I interrupt the Senator to say that the Air Nitrates Corporation is organized and exists under the laws of the State of New York. The American Cyanamid Co. is a corporation organized and existing under the laws of the State of Maine.

Mr. BRUCE. I am much obliged to the Senator.

Mr. SHEPPARD. So I stated.

Mr. SACKETT. Mr. President, I should like to ask the Senator from Arkansas a question for the information of the Senate. If this amendment is adopted, what amount of money would it be necessary for the Secretary to expend to put that plant in shape to carry out this amendment?

Mr. CARAWAY. Of course, an appropriation will have to be made to do that. I do not know what it will cost.

Mr. SACKETT. Does the Senator think it would be less than $10,000,000?

Mr. CARAWAY. I have not any information. I do not care to guess at it. I do not know.

Mr. SACKETT. It seems to me we ought to know something about the cost of an amendment we are putting on a measure of this character.

Mr. CARAWAY. The Senator was very eager to lease the plant to some people when we were fixing to expend, according to their estimate, $76,000,000, and according to the best estimates of other people about $300,000,000. He was not at all concerned about that; and that was all to be turned over to a private individual.

Mr. SACKETT. Nevertheless, this is a different proposition.

Mr. CARAWAY. Oh, I know it is. This is a place where the farmer is actually going to have done for him what we said we would do when we built that plant. We said we would dedicate it to the manufacture of high explosives in time of war and of fertilizers in time of peace. I know, and the Senator from Kentucky knows, that if there had been any doubt in the mind of Congress, when the act originally authorizing the construction of the Wilson Dam was passed, that that program would be carried out, there would have been no Wilson Dam.

Mr. SACKETT. That is very true; but times have changed since then.

Mr. CARAWAY. And if my friend from Alabama, who was so concerned about having Alabama's rights invaded, had read the discussion when the bill was up he would have found out that the people who were most interested in having the Government make that expenditure were the people from Alabama.

I want to say to the Senator from Kentucky that I have never been enamored of Government ownership and control of private business. My whole record will bear me out in that statement. I have been just as anxious to have something done with Muscle Shoals along that line as any man in the country. If it had not been for certain people whose motives I do not impugn, but whose judgment I seriously question, we could have leased it to Henry Ford, and we would have been the only people except Henry Ford who ever got more than 100 per cent on an investment with which Henry Ford had anything to do. It was a good proposition, but there were not enough votes to put it through. Other propositions came before the Senate, and they failed. Here is a proposition finally to have something done with Muscle Shoals that will keep faith with the people. Why should we not do it?

All of us know that nothing else is going through the Senate. You are either for this proposition or you are for keeping Muscle Shoals for another Senate debate in the next Congress. It is costing us lots of money. The plant is going to ruin. The faith of the people is being shaken in the promises the Government made that they were to experiment in giving the farmers cheaper fertilizer. Now, let us keep faith with them.

The amended joint resolution that I have offered simply dedicates plant No. 2 to that purpose. If it proves to be unprofitable—if it proves, as some people have asserted, that the cyanamide process is a failure—we will know it, and then it will be useless to talk further about leasing this plant to the Cyanamid Co. of America or to any other people using that process. If, however, it is successful, then we are going to put it to work to do the very thing for which it was constructed.

Mr. SWANSON. Mr. President, if the Senator will permit me, I understand that all that can be done under this proposition is to provide an organization. We can not appropriate money here.

Mr. CARAWAY. Of course not.

Mr. SWANSON. This is an authorization under which, afterwards, estimates can be made by which the purposes indicated in the joint resolution can be accomplished.

Mr. CARAWAY. Let me say that it is by all means the cheapest thing that has been offered to the Congress. The proposition the Senator from Kentucky stands for, according to its supporters' own statements, would cost us $76,000,000.

Mr. SACKETT. What proposition?

Mr. CARAWAY. That is, the Willis-Madden bill.

Mr. SACKETT. I do not stand for that in any particular. I am opposed to it, and so stated.

Mr. CARAWAY. Then I beg the Senator's pardon. I was entirely misinformed. I noticed the Senator voting with those who stood for that process, and I thought he was going along with them.

Mr. SACKETT. No.

Mr. SWANSON. As I understand, the adoption of the amendment of the Senator from Arkansas is about the only way we can provide at this session of Congress for the manufacture of fertilizer.

Mr. CARAWAY. Absolutely.

Mr. SWANSON. This authorization will be given, then the Appropriations Committee will make the appropriations to make it effective. They are bound to do that, under the rules of the Senate.

Mr. SACKETT. I spoke because the Senator's amendment sounds like a simple amendment. As a matter of fact, this is a cyanamide plant, and to bring it into fertilizer production would require the spending of a very large amount of money in order to finish the process. There has been a good deal of testimony here to the effect that that is not the coming process for the making of this product, and it does seem rather a strange thing, under a simple amendment of this kind, to commit the Government to that large expenditure on something that has not been proved to be the proper process.

Mr. CARAWAY. How much does the Senator think it would take?

Mr. SACKETT. I should think it would take $10,000,000 for the additional plant facilities that are going to be necessary to make it possible to run this plant in quantity.

Mr. CARAWAY. Under every proposition made it is expected that plant No. 2 will be put in a stand-by condition. It is an absolutely useless thing as it stands there with $70,000,000 or $80,000,000 invested in it. We have to do this very thing, whether this amendment shall prevail or not, or we will have to abandon the plant.

Mr. TYSON. Mr. President, I would like to ask the Senator a question. I believe the Senator will find that the Cyanamid Co. owns the patents under the cyanamide process, and we will have to buy them before any production of fertilizer can be had.

Mr. CARAWAY. I do not think so.

Mr. TYSON. As I understand it, it will cost $1,200,000, to operate that plant at full capacity, for royalties alone, and I think that is a very important thing for us to know before we vote on the amendment.

Mr. CARAWAY. What does the Senator want to do with plant No. 2?

Mr. TYSON. I have an amendment here with relation to that.

Mr. CARAWAY. Will not the Senator just tell me what he wants us to do with plant No. 2?

Mr. TYSON. When the Secretary of Agriculture has determined the very best process that is to be had for the manufacture of fertilizer, I want him then to have the right and power and authority to lease out plant No. 2 at the very best price he can get, provided he can get a satisfactory bid.

Mr. CARAWAY. What does the Senator want the Secretary to do anything for? If he is going to lease it, he can lease it to the Cyanamid Co. now. They do not want to use it for the manufacture of fertilizer.

Mr. TYSON. I have no desire to have any particular process adopted. I think the Secretary of Agriculture ought to have the opportunity to say what is the best process. If it is the cyanamide process, then we will have the cyanamide process. If it is the synthetic process, we will have that. As it is, we shall have nothing under this amendment, as I see it.

Mr. CARAWAY. Either the Senator from Tennessee has not read the amendment or the Senator from Kentucky has not read it, because the Senator from Kentucky says we shall have to make a very large expenditure in order to run the plant, but the Senator from Tennessee says we are not going to do anything with it.

Mr. TYSON. The Senator from Illinois can correct me if I am wrong, but as I understand it, the estimate made last year by the committee that brought in the bid for the Associated Powers was that it would cost $18,000,000 to put nitrate plant No. 2 in condition to make 40,000 tons of nitrate.

Mr. CARAWAY. And the Senator voted for that resolution.

Mr. TYSON. I did not vote at all for the resolution.

Mr. CARAWAY. Was not the Senator for the proposition of the Senator from Illinois?

Mr. TYSON. I do not think the matter ever came up for a vote.

Mr. CARAWAY. Oh, yes; it came up.

Mr. TYSON. I know I did not vote for it.

Mr. CARAWAY. I can not help that. What does the Senator want to do with nitrate plant No. 2?

Mr. TYSON. I will read the Senator my amendment. That is the only way to show the Senator exactly what I do want to accomplish.

Mr. CARAWAY. Would the Senator put it in operating condition or not?

Mr. TYSON. Put nitrate plant No. 2 in operating condition?

Mr. CARAWAY. Yes.

Mr. TYSON. I would put it in operating condition if the Secretary of Agriculture had had time to determine that it was the best process to be used in the manufacture of fertilizer.

Mr. CARAWAY. That is the only way you can determine it.

Mr. FLETCHER. Mr. President, may I interrupt the Senator to make this inquiry? Suppose the Secretary of Agriculture has in mind that the Government should not go into the manufacture of fertilizer, that the Government should stay out of business of this kind, and he has already concluded, in his own mind, that this is not commercially feasible and that he does not want the Government to go into that business; all he has to do is to report.

Mr. CARAWAY. All he has to do is to try, and then we are entitled to a report of the full facts of his experiments.

Mr. TYSON. Mr. President, my proposition is to add something to the Norris resolution. The Norris resolution is all right with regard to fertilizer as far as it goes. My proposition is that after he has experimented and determined what is the best process, thereupon he shall proceed to lease nitrate plant No. 2, which shall be turned over to him, and if he can get a satisfactory bidder for the manufacture of fertilizer at nitrate plant No. 2, in quantity, then that the plant shall be leased to that bidder; but he has to be guaranteed that the lessee will produce 5,000 tons of nitrates the first year and 5,000 additional each year thereafter until he has 40,000 tons of nitrate produced, and it shall be used in the manufacture of fertilizer for the farmers. He is compelled to do that if it is leased at all under the terms of my amendment. In the event that he can not lease the plant, and he finds a good method by which fertilizer can be produced cheaply at Muscle Shoals, so that it can be sold in competition with the commercial fertilizers, then, if he can not lease it he is to operate the plant, and he is to produce these amounts I have specified in my amendment—that is, 5,000 tons of nitrates the first year and 5,000 tons each year thereafter—until he produces 40,000 tons, and he must use it in the manufacture of fertilizer for the farmers and its distribution.

My amendment provides that he is definitely compelled to produce the nitrates if it is possible to produce them, by the very best method he can find, and it seems to me that that is the sensible way to handle this proposition.

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. TYSON. I yield.

Mr. BRUCE. For what period of time would the Senator provide that the Secretary should lease the plant?

Mr. TYSON. He is to lease the plant for not less than 25 years.

Mr. BRUCE. What provisions would the Senator make for rentals?

Mr. TYSON. He would lease the plant for the production of fertilizer as cheaply as possible for the farmer. In view of the fact that nitrate plant No. 2 is now standing idle, I provide that the lessee may have nitrate plant No. 2 turned over to him free of rental, with the provision that he is to keep the plant in order, and to pay such amounts as are necessary to keep it up, to pay the expenses of upkeep, both under the lease and also in the operation by the Secretary of Agriculture.

Mr. BRUCE. I suppose the Senator realizes that no private lessee could be induced to take over this property if the Government itself could not run it except at a loss.

Mr. TYSON. Not necessarily. I doubt very seriously if anyone will undertake to lease Muscle Shoals and produce nitrates in quantity until it has been demonstrated there that they can be produced in quantity, and at such a price that a private lessee would be willing to undertake the manufacture of fertilizer. I admit that I doubt seriously if any lessee can be had, but I think we ought to see if we can not get a lessee. My idea is to have an alternative proposition; if we can not get a lessee who can do this better than the Government, then let the Government do it. If we can not get a lessee, the Government must do it.

I provide in my amendment that whenever we can not sell the product of this plant at a reasonable profit, then it need not be made. If you can not make it at a reasonable cost, there is no point in making any fertilizer at Muscle Shoals or anywhere else, because no business man is going to stay in business unless he makes money. The point I am making is that the Secretary ought to have an opportunity to lease it if he can lease it to a satisfactory lessee, and failing that, then the Government has to make the effort to see if the product can be produced there at such a cost that it can be sold to the farmer at a price less than that at which he is now paying private concerns.

I think that is the idea of Muscle Shoals, that is the idea of the original law, and we will be keeping faith with the farmers if we carry out the provisions of that law and undertake to make fertilizers; and if we do not do so, we will not have carried out the plan and will not have kept faith with the farmers.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Arkansas [Mr. CARAWAY] to the joint resolution.

Mr. KING obtained the floor.

Mr. HARRISON. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. HARRISON. I want to offer a substitute and have it printed, unless we reach a vote on the joint resolution this afternoon. It will follow the resolving clause. I will say to the Senator from Utah that this is the only measure which has passed the Senate heretofore, and it is about the only measure perhaps that we can get together on.

Mr. KING. Mr. President, Senators give evidence of their readiness to vote upon the amendment offered by the Senator from Arkansas [Mr. CARAWAY], and I shall not long defer action thereon. The Muscle Shoals problem reminds one of the story of the man who had hold of the bear and wanted help that he might let go of the same. For years we have heard discussion concerning Muscle Shoals, and numerous measures have been offered dealing with the subject. If action was taken by the Senate, the other branch of Congress did not take final action, and so the years have gone by without disposition being made of the project and with the Government being required annually to pay large sums for the upkeep of the same. I have not had the advantage enjoyed by those Senators who have been and are members of the Committee on Agriculture and Forestry.

Before that committee for many years scientists and experts and business men by the score have appeared and expressed their views upon the various phases of the Muscle Shoals problem. Representatives of agriculture have spoken and pressed their views and persons who were interested in power development have suggested measures for the utilization of the power which might be developed at Muscle Shoals and at various points upon the Tennessee River. The views expressed have been conflicting, and it has been difficult to properly appraise the testimony offered and to reach a conclusion as to the wisest course to pursue. Several years ago Mr. Henry Ford was willing to lease the interests of the Government and to produce fertilizer in large quantities to be used by the farmers of our country. There were many who believed his proposition to be sound and fair and for the best interests of the Government as well as agriculturists; but Congress declined to take favorable action upon his proposition, and the years have gone by, and investigations have followed investigations, and hearings have been piled upon hearings, until the country has grown tired and nauseated with the whole matter. It seems to me that the Congress has not acted with that wisdom and promptitude which the situation demanded. The Government has investments aggregating, as I recall, more than a hundred million dollars, and the project, if completed, will require many millions more.

Perhaps the Government was justified in launching the project for war purposes. The lack of nitrogen for munitions during

the war lead to the adoption of a plan to build one or more dams at Muscle Shoals and to construct two plants for the purpose of manufacturing nitrates. One plant, known as No. 1, was to produce nitrogen by the synthetic process, taking it, as Senators know, from the air. Plant No. 2 was to produce cyanamide, the basis of which is nitrogen, likewise obtained from the air.

The original bill initiating the project provided for the manufacture of nitrogen for munitions purposes. That was the primary purpose of the huge expenditures made by Congress. A secondary purpose—and it was expressed in the bill—was to produce in peace times fertilizer for the farmers of the United States. The project was not a power project. It was not designed to produce hydroelectric energy to be furnished power companies or private individuals. I repeat, it was the intention and the promise that Muscle Shoals should be devoted to the production of nitrogen for war purposes, and when not needed by the Government for the production of nitrates, to be used in the manufacture of fertilizer. In my opinion the resolution before us nullifies the expressed will of Congress and ignores the law which inaugurated the Muscle Shoals project.

I feel there is an obligation resting upon Congress to see that Muscle Shoals is devoted to the purpose expressed in the original act. It seems to me that we would be guilty of Punic faith if a different policy were now adopted. Propositions have been made from time to time seeking to carry out the original plan. Some of these propositions call for the leasing to persons or corporations the dams and plants constructed by the Government. As I have understood these various propositions, they call for the manufacture of nitrogen and nitrogen compounds to be used to enrich the soil and benefit agriculture. With the rejection of such propositions, Congress is now confronted with the necessity of taking some definite action to finally dispose of this vexatious and irritating question. The Senator from Nebraska [Mr. NORRIS] with zeal and sincerity insists that we shall dedicate the Government's interest in Muscle Shoals to the production of electric power. His position is, as I understand it, that it is not practicable or feasible to manufacture fertilizer at Muscle Shoals either by the Government or by private enterprise.

I have been unable to follow the arguments of those who have insisted that Muscle Shoals is not adapted to the production of nitrogen either by the synthetic or the cyanamide processes. It is true the plant, which cost approximately $14,000,000 and was designed and used by the Government to produce nitrogen by the synthetic process, was a failure. I submit, however, that the failure of the Government does not furnish even prima facie evidence that private enterprise would have met the same fate. The cyanamide plant has not even been completed, and no tests have been made which warrant the claim that cyanamide can not be produced cheaply and commercially at plant No. 2. Muscle Shoals was selected as a suitable place to erect plants for nitrogen fixation because it was believed that the Tennessee River at Muscle Shoals and above would furnish reasonably cheap power.

Dams were not erected for the production of power for heating and lighting and to sell in contiguous districts. Cheap power was needed to produce nitrogen and not to sell. Power was to be developed and made available for use in nitrogen plants erected by the Government. Now it is proposed to not produce explosives or nitrogen or fertilizer, but that the Government shall engage in the production, sale, and distribution of electric energy to the residents who live near Muscle Shoals. The farmers are to be forgotten. The promises that fertilizers would be produced are to be ignored.

Mr. President, while I am opposed to the Government entering the field of socialism and engaging in enterprises which individuals should develop, I feel that there is a duty resting upon Congress to carry out the purpose expressed in the act providing for the Muscle Shoals project. I do not advocate the Government abandoning Muscle Shoals and the large investments which it has made, even though it might be advantageous from a financial standpoint for that course to be pursued. Entertaining that view, I believe that Congress should enact legislation which will provide for the leasing of Muscle Shoals with its plants and power, the lessees to supply nitrogen to the Government for munition purposes or to turn the project over to the Government when it requires the use of the same to meet governmental needs; the lessee also to engage in the production of fertilizer, a certain amount being produced annually, in order that the farmers of our country may have the benefit that will arise from an increased domestic production of nitrates and other products important in agriculture. If the Government can not lease the project, if private enterprise will not utilize it in the manufacture of fertilizer, then, as a last resort, I will support a plan calling for governmental operation for the production of fertilizer. If we are confronted with only two propositions, one to have the Government go into the power business or engage in the production of fertilizer, I shall support the latter because of the promises made to the farmers and the obligation imposed by the act inaugurating the Muscle Shoals plan.

As I have said upon a number of occasions, governmental activities in matters which belong to individual effort and are within the domain of private enterprise and endeavor, are obnoxious to me. But a situation may arise compelling the adoption of a policy to be followed by the Government which does not meet my approval and which even may be regarded as antagonistic to the spirit and form of our Government. The United States as a Nation was formed, not as a business enterprise, or as a socialistic or communistic experiment. The powers conferred upon it by the Constitution are limited and they relate to governmental and national questions.

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. KING. Certainly.

Mr. BRUCE. May I call the attention of the Senator to the fact that the substitute just offered by the Senator from Mississippi covers his point?

Mr. KING. I voted for that substitute.

Mr. BRUCE. But I did not know the Senator knew it had been introduced.

Mr. KING. I voted for the amendment offered by the Senator from Mississippi, not because I believed it met the situation, but because I believed that by its adoption it might be possible to carry out the spirit of the act providing for the Muscle Shoals project and ultimately enable the farmers to obtain nitrogen products.

Mr. President, much as I dislike the creation of commissions and executive agencies, I believe that the situation before us calls for the adoption of a different plan from either now before us. I believe that it would be wise to authorize and direct the President to appoint a commission of experts, business and scientific men, to formulate a plan for the development of Muscle Shoals and the production of nitrogen, either by the cyanamide or some other process, feasible and practicable; the plan should provide for leasing the plants owned by the Government and the power sites and the power rights of the Government in the Tennessee River, under proper terms which will protect the Government and prevent monopoly in the manufacture and sale of nitrogen and its various fertilizer forms. If this commission fails to obtain a suitable lease for the production of nitrates for the farmers and for the Government's use, and it is impossible to have private capital undertake the development and use of Muscle Shoals for the purposes just stated, then, opposed as I am to the Government entering into the domain of private business, I would support a proposition providing the necessary appropriations for the development of Muscle Shoals by the Government, such development to include the manufacture of fertilizers for the agriculturists of the United States.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. McKELLAR. I will call the Senator's attention to the law as it is right now, not that the President has the right to lease, but he has the right to operate that plant right now for fertilizer purposes for the benefit of the farmers of the United States, but he is not doing it.

Mr. KING. I repeat I am opposed to the Government engaging in the production of power or the manufacture of fertilizer, but I conceive that a situation may arise justifying a departure from this policy. But the situation must be extreme and, indeed, critical, that would justify the Federal Government engaging in activities which all concede belong to individuals. I am unwilling that the Government shall abandon Muscle Shoals, but I insist that it shall lease the same under reasonable and proper terms. With cheap power which can be produced at Muscle Shoals where an abundance of phosphate is available, with cheap coal and coke, it is certain private enterprise can manufacture fertilizers for the farmers cheaper than perhaps any other place in the United States. So, Mr. President, let us direct the President, through a commission, to work out a proper plan, one which will protect the Government as well as the farmer and which will secure a suitable lessee who will undertake the production of nitrates and various forms of fertilizers to meet, in part, at least, the needs of the agriculturists of our country.

Mr. FESS. Will the Senator yield?

Mr. KING. Yes.

Mr. FESS. I think the Senator has stated my position on the question.

Mr. KING. I am gratified to know that I am not alone in the views expressed.

Mr. FESS. Now a question. There is no doubt in the mind of the Senator that it is possible to produce fertilizer under private enterprise.

Mr. KING. No. In my opinion it can be produced at Muscle Shoals and produced at a profit. By the cyanamide and the synthetic processes nitrogen is obtained from the atmosphere in German plants, and the American Cyanamid Co. is manufacturing thousands of tons of cyanamide which is being used in the United States. I should add that it is also shipping to foreign countries a large amount of fertilizer, the nitrogen of which is obtained from the atmosphere through the cyanamide process.

Mr. FESS. Then the only point of division is whether we will choose Government operation rather than private operation?

Mr. KING. That is my view. By that I mean private capital has produced and will produce all forms of fertilizer needed by the farmer. Private capital has given to the United States inventions and all forms and varieties of products essential to the happiness and welfare of the people. Nitrogen is in the air, and chemists, both in other countries and in the United States, have reached out and taken nitrogen from the atmosphere and compounded it with other substances, thus forming products required by the farmers for the enrichment of their lands. Of course, there may be some difficulty in finding individuals who will enter into contractual relations with the Government for the manufacture of nitrates at Muscle Shoals. But I see no reason why leases may not be entered into between the Government and corporations and individuals which will be mutually advantageous and of great advantage to agriculture. So I believe that the controversy is largely whether we choose Government operation or private operation.

Mr. FESS. That is the basis which makes it impossible for me to vote for the joint resolution as it is now before us.

Mr. KING. I shall willingly vote for a proposition to lease Muscle Shoals for the purpose for which it was designed, but if the Government can not lease it, then I shall, though reluctantly, support a sound and rational plan which will call for the governmental operation of Muscle Shoals for the production of nitrates.

Mr. SWANSON. Mr. President, I am earnestly in favor of the amendment offered by the Senator from Arkansas [Mr. CARAWAY]. It seems to me it is a very wise, just, and sensible amendment. In the first place, we have had debate for days and days and for years and years as to whether we could make fertilizer or not. The amendment submitted by the Senator from Arkansas would settle that question. Anything that can finally settle satisfactorily such a long debate in the Senate is certainly a wise provision. The proposed amendment directs the Secretary of War to make this test and this experimentation, and if it is successful, then he is directed to proceed to sell the fertilizer at cost to the farmer. It does seem to me we ought to ascertain whether it is wise and what is best and whether it is valuable before we dispose of the property. If we find we can operate it at a profit and reasonably, then is the time to make the lease and ascertain what we will lease it for or whether we will operate it ourselves or not.

This would not mean perpetual Government operation. The amendment submitted by the Senator from Arkansas simply authorizes, being an expression of the will of Congress, that plant No. 2 shall be utilized to see whether we can get cheap fertilizer for the farmers or not. We have had debates here of interminable length as to whether it can be done or not. I do not know whether it can be done. Sometimes I have heard a Senator state that it can and then another one say that it can not be done. I have a different opinion almost every time I listen to the debates. The amendment of the Senator from Arkansas, it seems to me, would settle the question once and for all.

When the question comes up and the authorization is made, it is in order for the Senate, whether the Bureau of the Budget certifies it or not, to offer an amendment to any appropriation bill and appropriate the money that we think is wise and necessary to accomplish this purpose. An amendment to appropriate $5,000,000 or $10,000,000 or $20,000,000 would not be in order unless the authorization were first made. If we make the authorization now, then at any time during the session it would be in order for any Senator to offer an amendment to an appropriation bill to provide the money which is necessary to make the authorization effective.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. SWANSON. I yield.

Mr. EDGE. Is it necessary, in order to accomplish that purpose, also to include the words "direct the Secretary"?

Mr. SWANSON. I think so. Otherwise we might never get the experiment made. We might have to debate the question 20 years longer. I want the word "direct" in there. I am in favor of directing the Secretary to do it. The time has passed when the Senate can not appoint agents to do what it thinks is wise and for the good of the country. Congress has that authority.

Mr. EDGE. If the Senator will yield further, I ask the question simply from a realization of the fact that I am utterly unable to decide whether it is practicable or not. I assume the Secretary of Agriculture, before spending $8,000,000 or $10,000,000, would know whether it is practicable.

Mr. SWANSON. He is directed to conduct the experiment. I am not willing to say merely that he is authorized to do it. It might never be done. I want the word "direct" in there, and I will not vote to eliminate that word. I have heard the question debated now for four or five years, and heretofore I have reached no conclusion. The time has come for Congress to decide something about the matter.

Mr. BRUCE. Mr. President——

Mr. SWANSON. I will yield to the Senator in just a moment. I am in favor of directing the Secretary of Agriculture to make the experiment. It will then be up to Congress to determine the proper amount of money to be appropriated to conduct the experiment. Under the rules of the Senate, when an authorization has been made by Congress, an amendment providing for an appropriation is not subject to a point of order because the Budget has not certified it. An amendment can then be offered to the deficiency bill for the appropriation. It would seem to me that it is time for the Senate and the House to determine that we shall utilize this plant for the manufacture of fertilizer, if that is what we want, irrespective of what any department might desire or wish.

I yield now to the Senator from Maryland.

Mr. BRUCE. I simply want to ask the Senator from Virginia whether he is aware of the fact that the Senator from Mississippi [Mr. HARRISON] has just offered a substitute for the pending joint resolution which covers the same ground as did the Underwood bill?

Mr. SWANSON. I voted against the Underwood bill. I shall vote against the proposed substitute. I am not in favor of leasing the property until I know its value, until I know what we can accomplish with it. I am not willing to sell this valuable property until experiments shall have been made with it and we know whether we are getting its worth or not. The amendment of the Senator from Arkansas does not determine that we shall have perpetual Government ownership or operation. But the Government is entitled to know the value of its property before it leases or disposes of it, and his amendment would accomplish that purpose. It first makes it absolutely compulsory to ascertain whether fertilizer can be made or not, and then it will be in order for the Senate and House to determine that question.

Mr. BRUCE. But it does not make provision for the leasing under any condition, I understand.

Mr. SWANSON. Why does the Senator want to lease property before he knows how valuable it is? Why sell a thing when we do not know what its worth is? Is not the Government entitled to the same protection that a private individual would have in connection with his private property?

Mr. BRUCE. I think perhaps it is an assumption on the part of the Senator from Virginia in saying that we do not know.

Mr. SWANSON. The Senator might know, but I do not know.

Mr. BRUCE. No, I do not know.

Mr. SWANSON. I am not willing to vote to lease or sell this property until I am satisfied the Government is getting full value for it. The Government was compelled to go in there during the war. When the Government makes an investment of the people's money and puts their money into an enterprise, and the time comes to dispose of it in some way, it is as much entitled to protection in the matter of value as any private individual. I am not satisfied to lease the property to any individual and I am not satisfied to dispose of it in any way until I have ascertained its value. I want the experiment made. If the experiment is made and plant No. 2 proves profitable and it is proven that we can make fertilizer and proven that it can be successfully and cheaply done for the farmer, then I am ready to determine the question whether the Government shall attempt to make fertilizer or whether we shall dispose of the plant in some way.

Mr. President, I shall vote for the amendment of the Senator from Arkansas.

Mr. BRUCE. Mr. President, the difference between the Senator from Virginia and me reminds me of the story that

was told in the Continental Congress, when John Dickinson, who was balking at the idea of independence, said that the only word he did not like in a certain resolution that was pending——

The VICE PRESIDENT. The Chair regrets to say that the time of the Senator from Maryland is exhausted under the unanimous-consent agreement.

Mr. BRUCE. Mr. President, have I spoken 15 minutes?

The VICE PRESIDENT. The Chair is informed that the Senator has spoken once.

Mr. BRUCE. My time passed so delightfully and was so brief that I did not realize that it had expired.

Mr. SHEPPARD. A parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator will state it.

Mr. SHEPPARD. Has not the Senator from Nebraska accepted the amendment?

The VICE PRESIDENT. The Senator from Nebraska can not accept the amendment, since it is an amendment to the joint resolution and not to his own amendment. The question is on the amendment of the Senator from Arkansas [Mr. CARAWAY] to the joint resolution.

Mr. SMITH. Mr. President, I should like to ask the Senator from Nebraska a question for information. If the pending amendment shall be adopted, would it not be necessary then to have a further amendment in reference to the following provision:

> The Secretary of Agriculture shall locate one fertilizer plant in the vicinity of Muscle Shoals, Ala., and there shall be turned over to him nitrate plant No. 1, together with the steam plant connected therewith, and such other buildings—

I take it that if the Caraway amendment shall be adopted it will not be desired by such wording to foreclose the Government from making experiments either at the place named or elsewhere where the synthetic process or any other process that might promise better results than the one that would be authorized under the Caraway amendment might be utilized. I am merely calling the Senator's attention to that, because if the Caraway amendment shall be adopted and we pledge ourselves to run the cyanamide plant and plant No. 2, it might be taken to preclude experimentation there and developing another process.

Mr. NORRIS. What is the question which the Senator from South Carolina desires to ask?

Mr. SMITH. I wish to know if a further amendment would not be necessary; and I desire to call the Senator's attention to the matter, so that he might prepare an amendment to meet such a possible emergency.

Mr. NORRIS. As I look at it, no such amendment would be required. All this proposes is to direct the Secretary of War to perform an experiment that he would have a right to perform, in my judgment, even if the amendment were not offered and agreed to; but it directs him to do it. Since we own nitrate plant No. 2, since there seems to be a dispute as to what may be accomplished, although in my mind I have not any doubt, and many Senators who have talked it over with me have said that they thought there was an honest difference of view, and they wanted to require that the experiment be performed, I consented, so far as I could do so.

Mr. McKELLAR. Mr. President, may I call the attention of the Senator from South Carolina [Mr. SMITH] to the fact that the Senator from Nebraska [Mr. NORRIS] agreed to accept an amendment in lieu of section 8, and that amendment—I will show it to the Senator—obviates the difficulty that he suggests?

Mr. NORRIS. If there is any difficulty——

Mr. McKELLAR. It can be straightened out.

Mr. NORRIS. Of course, I want to straighten it out. I will say to the Senator from South Carolina that I do not think there should be any doubt about it, but if anybody has any doubt about it, it is desirable to make it perfectly plain so that there can not be any such doubt. I do not want the adoption of this amendment, of course, to interfere with any other experiment that the Secretary of War may wish to carry on under the joint resolution. There will be an amendment which I expect to offer, if this amendment shall be agreed to, and that is to change the authorization to an appropriation.

Mr. SMITH. Mr. President, I shall look over the language, and if it seems to me that it is necessary that it shall be amended I shall offer an amendment, because the wording of section 8, unless it shall be supplemented, would seem to restrict the operation to one plant at Muscle Shoals and will make it impossible to have another.

Mr. BRUCE. Mr. President, is the pending amendment open to amendment?

The VICE PRESIDENT. It is.

Mr. BRUCE. Then, I move that the words "authorized and," in lines 1 and 2, in section 9, of the Caraway amendment, be stricken out. I believe I now have the right to speak for 15 minutes on my amendment, have I not?

The VICE PRESIDENT. The Senator from Maryland is correct.

Mr. BRUCE. I wish to say merely a few words with reference to the amendment of the Senator from Arkansas, for it seems to me that it is really the crux of the whole controversy; it certainly is so far as the differences between the Senator from Virginia [Mr. SWANSON] and me are concerned. The Senator from Virginia has stated that the one thing he does not like about this joint resolution is the word "lease," and when I was interrupted I was proceeding to tell a little story about the Continental Congress. It is hardly necessary to say it is somewhat stale, as it originated that far back, but it has not been regarded by historians as being such a bad story.

A controversy was going on in the Continental Congress as to whether they should or should not strike out from a resolution the word "Congress." John Dickinson was a little more timid than his associates, and he said with regard to the resolution that was pending before the Congress, "There is only one word in the resolution I do not like and that is the word 'Congress.'" Then Benjamin Harrison, of Virginia, one of the predecessors in public service of the Senator from Virginia, said: "Mr. Speaker, there is only one word in the resolution that I like and that is the word 'Congress.'" Harrison was, of course, a very ardent and advanced advocate of colonial independence.

I am almost tempted to say that the one word that I like in any of the pending amendments or in the original joint resolution itself is the word "lease." My opinion is that the suggestion of Government operation has been the evil genius of Muscle Shoals from the very beginning down to this minute. But for the effort, persistent and unceasing, to fasten the theory of Government operation upon the measures which have been before Congress dealing with Muscle Shoals, the problems involved in it would, in my humble judgment, long ago have been settled. As I have already declared, the idea of Government operation has been the Old Man of the Sea which has fatally loaded down every attempt to arrive at some intelligent conclusion with regard to Muscle Shoals which has been made during the time that I have been a Member of this body.

It would be trite for me to speak at any length about the shortcomings of Government operation. If there is anything that ever has been fully demonstrated, in my opinion, it is the superiority of individual initiative, individual enterprise, and individual energy over the torpid, inefficient, wasteful results of Government operaton. What should be done in this case, in my humble judgment, is not to contemplate the idea of Government operation at all except as a dernier resort, a thing to be availed of only after all other expedients shall have failed.

In the city of Baltimore when, because of the expanding growth of the commerce of its port, we established a great system of docks and piers for commercial purposes, we leased them out to private steamship companies of one description or another, reserving rentals, and subjecting the lessees to every condition, restriction, limitation, and burden that the public welfare suggested as proper under the circumstances. The result has been that the steamship companies have found in those docks and piers a superb instrumentality for the promotion of their business; the city has received large rentals, and everybody has reason to congratulate himself or itself upon the wise policy that the city of Baltimore has pursued with reference to those docks and piers.

I forget the exact duration of those leases, but they are, we will say, for 40 or 50 years, though it may be that their duration is somewhat longer than the time that is usually fixed in Baltimore for grants of franchises in public property in the city of Baltimore.

Why can we not follow some such plan in dealing with the Muscle Shoals situation? Let the Secretary of War invite bids, setting forth in proper specifications, of course, the conditions, restrictions, obligations, and stipulations of one sort and another under which the successful bidder or bidders would hold the property. Let the Secretary of War reserve proper rentals.

That is what was contemplated by the Underwood bill, a measure which has actually received the approval of the Senate, if I am not mistaken, by a vote, as some one said a few moments ago—how accurately I can not declare—of 2 to 1. That sagacious bill was worthy in every respect of the upright, honorable, able, and statesmanlike Senator who sponsored it, the then Senator from Alabama, Mr. Underwood. It seems to me to fit in every respect the exigencies of this case. As I

recall, it provided first of all for bids for leasing to private parties for the production of fertilizer, and, only in the event of leasing turning out to be impracticable for Government operation for the production of fertilizer.

An amendment to the pending bill patterned on the Underwood bill has just been offered by the Senator from Mississippi [Mr. HARRISON]. It will soon receive the consideration of this body. In the meantime I trust that the Senate will give its disapproval to the amendment offered by the Senator from Arkansas [Mr. CARAWAY], because that only partially covers the situation with which we are dealing. The Harrison amendment modeled on the Underwood bill covers the entire situation.

So far as I am concerned, the Senator from Arkansas is perfectly right in saying that the Senate is split up into two classes with reference to the pending resolution—those who favor Government operation, either exclusively or alternatively, and those who are opposed to Government operation in any form. I at least am opposed to Government operation of Muscle Shoals at any time and under any conditions except, as I have said, as a dernier resort.

I had expected to say what I have said when the pending resolution, as amended, finally came up for consideration, because I expect to vote against the resolution, but in the meantime it seems to me that it was in harmony with the general views that I entertain in regard to this measure that I should resist at the very outset, so far as I am able to do so, the adoption by the Senate of the amendment offered by the Senator from Arkansas.

Mr. LA FOLLETTE. Mr. President, a parliamentary inquiry. Has the Senator from Maryland withdrawn his amendment?

Mr. BRUCE. Mr. President, I do not see that the withdrawal of the amendment will accomplish anything, for the simple reason that it seems to me that when the Secretary of Agriculture is "directed," it is perfectly immaterial to add the redundant word "authorized." It makes no difference whether he is "authorized" or not, if he is "directed"; but, now that I have accomplished my purpose of securing 15 minutes for the discussion of the amendment of the Senator from Arkansas, if the Senator from Wisconsin would like me to withdraw my amendment, I will withdraw it, if there is any point involved in doing so.

The VICE PRESIDENT. Without objection, the amendment to the amendment will be considered withdrawn. The question is on the amendment of the Senator from Arkansas [Mr. CARAWAY].

The amendment was agreed to.

Mr. BLACK. Mr. President, I send to the desk an amendment, which I ask to have stated.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 2 of the original resolution, at the end of line 5, after the word "installation" and before the period, it is proposed to insert a colon and the following:

And provided further, That the steam power plant at nitrate plant No. 2 shall not be sold to the Alabama Power Co. or to any other power company or group of power companies.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

Mr. HARRISON. Mr. President, may I ask the Senator a question about his amendment? As I understand, there is nothing in the provisions of the Norris joint resolution that proposes to sell anything except current. It does not propose either to lease or to sell any plant. Is not that true?

Mr. NORRIS. I did not hear the Senator's question. My attention was diverted for the moment.

Mr. HARRISON. As I understood the reading of this amendment, it is an inhibition against the sale of steam power plant No. 2 at Muscle Shoals to the Alabama Power Co. or anyone else.

Mr. BLACK. That is correct.

Mr. HARRISON. There is nothing in this joint resolution that proposes to sell that plant?

Mr. NORRIS. No; not that I know of.

Mr. HARRISON. Then it seems to me that the proposition has no force here. They have no authority to sell it. Consequently, why put an amendment in here saying that it can not be sold?

Mr. BLACK. Mr. President, that amendment is offered—I have another amendment in connection with it—because in the testimony of Doctor Cottrell before the Military Affairs Committee of the House of Representatives last week, which I have on my desk, with reference to the Morin bill, he stated in effect that under that bill, in his judgment, the Secretary of War would have the right to sell or to dispose of or to lease the nitrate plant, or, as I understood, the steam plant at that place. He stated that under the Morin bill he had this authority, and that, as he understood, under the Norris joint resolution—Doctor Cottrell referred to this joint resolution—the same privilege would be given, except that under the Norris joint resolution the Government had the right to sell the power.

I have another amendment, which I shall offer immediately after this one, with reference to maintaining nitrate plant No. 2. I think both of these amendments are necessary and essential, in view of the fact that the representative of the Secretary of Agriculture, to whom the Senators who now favor this proposition are going to turn over this proposition if they can, has stated that it is a failure. He stated before the Military Affairs committee this week that he could not operate it. He stated that he did not want to operate it. He stated that he could not operate it in competition with private business, and stated that if he did it would not reduce the price of fertilizer. He also stated that as he understood the joint resolution it was simply letting Congress wash its hands of the whole transaction. Therefore I offer this amendment with reference to the steam plant, so that there is no possibility that it will be sold.

Mr. SACKETT. Mr. President, may we have the amendment stated again? We could not catch it.

The VICE PRESIDENT. The Secretary will restate the amendment.

The amendment was restated.

Mr. NORRIS. Mr. President, I myself do not understand the object of the Senator from Alabama in offering this amendment. Nobody proposes to sell steam power plant No. 2. Certainly it never has been suggested by me that such a sale take place.

Mr. McKELLAR. And it could not be done unless there was a specific law for the purpose.

Mr. NORRIS. Of course it could not. There is nothing in the joint resolution that provides for it. It seems to me the only thing that is accomplished by offering an amendment like this is to be able to say, if we should vote it down, "When the Senate had a chance to vote not to sell this power they voted to sell it." If we are going to go up against a proposition of that kind, it might be best to adopt the amendment. Certainly nobody has authority to sell it now unless we give them affirmative authority to do it; and because some other bill pending in the House or before some other committee gives authority to sell this power plant, that is no reason why this joint resolution does it.

I should be glad to have some Senator point out what provision of this joint resolution gives any authority, directly or indirectly, in any way, for anybody to sell any of this property down there. Certainly I have no such intention; the committee has had no such intention; and, as far as I know, it has never occurred before to anyone that anybody was trying in this legislation to dispose of the property down there.

Mr. SACKETT. It is not provided for in any amendment that has been filed with the committee.

Mr. NORRIS. None that I have seen. I know of nothing of the kind.

Mr. BLACK. Mr. President, if the Senator will yield to me, I will read to the Senator just where I got the information. This is from Doctor Cottrell's evidence:

It might be entirely possible that either the Cyanamid Co. or the Carbide Co., or any of these other bidders who have been in here before the committee trying to lease both water power and plants for partial use in nitrates and partial use in other industries, might come in and very frankly lease parts of those plants for some of the things they have had in mind either as nitrate properties or, more probably they would say, better, for the use of entirely other industries.

Then, going ahead:

Mr. WURZBACH. It really amounts to a determination on the part of Congress to wash its hands of the entire responsibility?

Doctor COTTRELL. Yes.

Mr. WURZBACH. And to say, "Now, Mr. Secretary of War, you handle this thing and dispose of it, and dispose of nitrate plant No. 2 and all of their property"?

Doctor COTTRELL. Yes, sir. That is exactly, as I understand it, the purport of the bill.

Mr. WURZBACH. And really the part that the Agricultural Department is to play in the game might very easily be compared to that of the tail of the dog; it is only a very small part of the whole problem?

Doctor COTTRELL. Yes; so far as the handing of the equipment goes; that is, of the physical assets, the physical properties themselves.

Going on, he says:

Outside of that small feature, that the Agricultural Department is required to handle this experimentation, the rest of it is practically the Norris plan?

Doctor COTTRELL. I think the main difference is that the Norris bill provides specifically for Government operation of the power facilities by the Government itself. That is probably the largest difference.

The gentleman to whom this will be assigned states that it is his understanding that they can dispose practically of the whole thing. I do not want anything indefinite about it.

Mr. NORRIS. I get nothing of that kind from the testimony the Senator has read. There is not even any intimation, as I understand that language, that such would be the case. Point out the language in this joint resolution that gives anybody any authority to sell that property down there. Let us have it.

So far as I am concerned, of course, I have no objection to the amendment. The only thing about it is that we are asked to do something that it seems to me is foolish. I do not think the Senator ought to take up the time of the Senate in trying to get on the joint resolution this kind of an amendment. Nobody here wants to sell that property. Nothing in the joint resolution provides for its sale. No one has thought of such a thing; and affirmative legislation on the part of Congress is necessary before anybody can sell it. We might just as well put in here a proviso reading:

Provided, That the Secretary of Agriculture shall have no authority to sell the Capitol of the United States.

Mr. SACKETT. Or, if you are going to be consistent, if we put in this amendment, ought we not to put in a provision that he shall not sell the dam itself?

Mr. CARAWAY. Or move the river.

Mr. NORRIS. I hope the Senator from Alabama will not insist on his amendment.

Mr. HEFLIN. Mr. President, if the Senator from Nebraska will permit me, I think Doctor Howe testified before our committee that he thought plant No. 2 ought to be sold.

Mr. McKELLAR. Suppose he did. That does not give the power to sell it. Nothing but an act of Congress can give anybody the right to sell it, and no such act of Congress is proposed.

Mr. NORRIS. Doctor Howe, before our committee, did not claim that this joint resolution gave the Secretary of Agriculture or the Secretary of War the right to sell that power plant.

Mr. HEFLIN. That may be part of the program. We do not know.

Mr. NORRIS. Suppose we say they shall not do it and they go on and do it. If they can do it with this in the law, they can do it without it.

The PRESIDING OFFICER (Mr. EDGE in the chair). The question is on the amendment of the Senator from Alabama.

The amendment was rejected.

Mr. BLACK. Mr. President, I offer the further amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. At the same place, on page 2, line 5, after the word "installation" and before the period, it is proposed to insert a colon and the following:

And provided further, That in order to safeguard the national defense and assure a domestic production of nitrogen for fertilizers nitrate plant No. 2 and none of its fixed or movable equipment shall be sold without the consent of Congress; and further, the Secretary of War is hereby authorized and directed to maintain nitrate plant No. 2 and all of its equipment in a condition ready for prompt operation.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Alabama.

The amendment was rejected.

Mr. McKELLAR. Mr. President, I offer an amendment as a substitute for section 8, which I understand the Senator from Nebraska is willing to accept, and I ask that it be voted on at this time.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 4, it is proposed to strike out section 8 as printed in the original joint resolution and to insert the following:

The Secretary of Agriculture in carrying out the purposes of this act shall locate a fertilizer plant in the vicinity of Muscle Shoals, in Alabama, and there shall be turned over to him the nitrate plant, together with the steam plant connected therewith and such other buildings, houses, and shops there located as shall be necessary for the Secretary and his employees in the construction and maintenance and operation of such plants; and when such fertilizer plant is thus located and established in the vicinity of Muscle Shoals all the power necessary for the requirements of said plant shall be supplied from said steam plant located at nitrate plant No. 2 or from Dam No. 2.

Mr. NORRIS. Mr. President, let me call the Senator's attention to a correction which it is necessary to make. The Senator's amendment, as the clerk read it, turns over to the Secretary of Agriculture the power plant at nitrate plant No. 2. That would be in direct conflict with other purposes of the joint resolution; and, besides, the Secretary of Agriculture does not want to operate the power plant at nitrate plant No. 2. That is the big steam plant.

Mr. McKELLAR. No, Mr. President; the Senator does not get the amendment exactly. There is simply turned over to him "all the power necessary for the requirements of said plant."

Mr. NORRIS. Let us hear that again. I will ask the Senator to commence at the beginning.

Mr. McKELLAR (reading):

The Secretary of Agriculture, in carrying out the purposes of this act, shall locate a fertilizer plant in the vicinity of Muscle Shoals, in Alabama, and there shall be turned over to him the nitrate plant, together with the steam plant connected therewith and such other buildings—

Mr. NORRIS. The Senator would turn over to the Secretary of Agriculture not only the nitrate plant but both of the steam plants. The Senator does not want to do that. The Senator would turn them both over by this amendment. The Senator means the steam plant at nitrate plant No. 1. That is the one the joint resolution would turn over.

Mr. McKELLAR. The steam plant at nitrate plant No. 1?

Mr. NORRIS. Yes.

Mr. McKELLAR. Let me correct this.

Mr. NORRIS. With that correction, I have no objection to the amendment.

Mr. McKELLAR. "At nitrate plant No. 1."

Mr. NORRIS. "And the steam plant connected with nitrate plant No. 1."

Mr. McKELLAR. Yes.

Mr. NORRIS. That is all the steam that is turned over to the Secretary of Agriculture.

Mr. McKELLAR. That is true.

Mr. NORRIS. Very well. Let me say to the Senator, and to the Senate, that with the understanding to which I have called attention there is, in my judgment, no difference in legal effect between the amendment suggested by the Senator and that which is already in the resolution, with the exception that it turns over both nitrate plants, which is not specifically done in the resolution. That is done by another amendment to the resolution, however, known as the Caraway amendment. I am inclined to think that some of the language which is used, perhaps, expresses the idea better than it is expressed in the resolution, and as far as the effect is concerned, with the exception of what I have suggested, in my judgment it does not change it at all.

Mr. McKELLAR. Perhaps the Senator is right.

Mr. NORRIS. Therefore I have no objection to the adoption of the amendment.

Mr. McKELLAR. May I explain to other Senators that all this means is that the power at the steam plant and the power at the dam, if it is necessary for the purpose of manufacturing fertilizer, may all be used. That is all there is in it.

Mr. NORRIS. There was a difference of opinion as to whether that was in the resolution. I think it is already in, but of course that is what I want to do.

Mr. McKELLAR. Then the Senator has no objection?

Mr. SIMMONS. Mr. President——

Mr. McKELLAR. I yield.

Mr. SIMMONS. It includes plants No. 1 and No. 2?

Mr. McKELLAR. Yes.

Mr. SIMMONS. And the power produced by the present dam?

Mr. McKELLAR. Yes. I want to say to the Senator from North Carolina that it is the substitute which he and the Senator from Georgia went over a little while ago.

Mr. SIMMONS. I discussed it with the Senator some little while ago, and I am very insistent upon having it go into the joint resolution.

Mr. McKELLAR. The Senator from Nebraska has agreed to accept it, and I hope it may be adopted.

Mr. NORRIS. Let me ask the Senator another question. I think there is no doubt with regard to the latter part of the amendment, which provides that all the power which is necessary shall be supplied to the Secretary of Agriculture, but will not the Senator read the latter part of it again?

Mr. McKELLAR. It reads:

All the power necessary for the requirements of the said plant shall be supplied from said steam plant and from the dam.

Mr. NORRIS. That makes it clear.

Mr. HARRISON. Let the proposed amendment be read, so that we may understand what we are voting on.

The PRESIDING OFFICER. The Secretary will state the amendment.

The CHIEF CLERK. Add a new section, as follows:

SEC. 8. The Secretary of Agriculture in carrying out the purposes of this act shall locate a fertilizer plant in the vicinity of Muscle Shoals in Alabama, and there shall be turned over to him the nitrate plant together with the steam plant at nitrate plant No. 1 connected therewith and such other buildings, houses, and shops there located as shall be necessary for the Secretary and his employees in the construction and maintenance and operation of such plants; and, when such fertilizer plant is thus located and established in the vicinity of Muscle Shoals, all the power necessary for the requirements of said plant shall be supplied from said steam plant located at nitrate plant No. 2, or from Dam No. 2.

Mr. KING. Mr. President, may I inquire of the proponent of this amendment whether he interprets it as meaning that, in addition to the plants 1 and 2, which now exist, the Secretary of Agriculture shall construct another plant? As I heard the language, it means that the Secretary of Agriculture shall establish another plant.

Mr. McKELLAR. Not by this amendment. I will say to the Senator that all this amendment does is to turn over, if necessary, all the power generated from the steam plant and in Dam No. 2, in order to carry on the fertilizer enterprise at Muscle Shoals.

Mr. SIMMONS. Mr. President, I want to ask another question, and I ask it because I have been necessarily absent from the Chamber for an hour or so. Is there still in the joint resolution ample appropriation to enable the Secretary effectually to carry out the purposes of Congress with reference to making fertilizer?

Mr. McKELLAR. It has not been offered yet, but the Senator from Nebraska, I understand, has agreed to offer an amendment appropriating $10,000,000 for that purpose.

Mr. KING. Mr. President, I hope the Senator from Tennessee is correct in the answer which he submitted to the interrogatory propounded a moment ago, but I invite his attention to this language:

The Secretary of Agriculture, in carrying out the purposes of this act, shall locate a fertilizer plant in the vicinity of Muscle Shoals, in Alabama.

That would presuppose that there were no plants now in existence at Muscle Shoals, or that, if there were, one of them would have to be removed and established at some other place, or that a new one would have to be erected. It seems to assume that a new plant will have to be erected. It does not say that one of the plants now in existence shall be employed at the place mentioned in the Senator's amendment, but that a fertilizer plant shall be located at such place.

If the Senator means that one of the plants now in existence measures up to those requirements and that "a plant" as used in this amendment means one of the plants now in existence, then the suggestion which I have made is without merit. But it seems to me that the amendment should be clarified, because the impression certainly will be made upon the minds of others, as it has been made upon mine, that another plant will have to be erected. As I understand the Senator, his intention is not to provide for the building of another plant, but to use one of the plants now in existence for the purpose of manufacturing fertilizer.

Mr. SIMMONS. Mr. President, my conception of the matter is that nitrate plant No. 2 will be used for making nitrogen, but it is also provided in the joint resolution that the Secretary of Agriculture shall provide for making mixed fertilizer, and it will require probably additional buildings for that purpose.

Mr. KING. Will the Senator yield?

Mr. SIMMONS. In just one moment. I had understood that it would be an easy matter to convert one of the buildings now existing down there into a plant for the purpose of mixing fertilizer, and that the two plants, taken together, would be sufficient, one for the purpose of making nitrogen and the other for the purpose of mixing fertilizer—that is, nitrogen with potash and acid phosphate.

Mr. KING. If it is understood that another plant is to be erected, then, of course, this amendment is quite proper. If it is understood that one of the two plants now in existence is to meet the requirements of the amendment offered by the Senator, then I submit the language should be clarified.

Mr. NORRIS. May I interrupt the Senator?

Mr. KING. Certainly.

Mr. NORRIS. The Senator will notice that in a prior section of the joint resolution it is provided that the Secretary of Agriculture shall have authority to locate a fertilizer plant anywhere in the United States. He is not confined to Muscle Shoals. Then this section takes up Muscle Shoals and says that he shall locate one of those plants at Muscle Shoals.

Mr. KING. If the Senator will permit me, I, of course, can see that the proposed amendment is quite appropriate if it is intended to do what the Senator from Nebraska states, namely, that we have two plants, No. 1 and No. 2, the first of which has been a failure, we having spent thirteen or fourteen million dollars upon it; then we have plant No. 2, upon which we have spent fifty or sixty million dollars; but, as I understand now, we are to construct another plant, and if it is the understanding that this amendment anticipates the construction of a third plant, then the language will accomplish that result, and my query would be inappropriate.

Mr. NORRIS. There is no doubt as to what they expect to do. Take nitrate plant No. 1, which is the one that was built and has been a failure. There is a fine building there. It has a steam plant connected with it that was as modern as any at the time of its construction, capable of producing 6,000 horsepower, enough to run a very large experimental plant, and quite a manufacturing plant. Besides that, there are offices, buildings, and houses down there. In the joint resolution we specifically turn over nitrate plant No. 1 to the Secretary, because we thought it would be the largest experimentation that could possibly be made, that ever has been made, in regard to fertilizer, turning over to him that particular thing by name, and giving him also the steam power, which is independent of everything else connected with it. Then, on the theory that he might want to use more power, if he went on extensively in the experimentation, particularly now, since by the McKellar amendment he can operate plant No. 2, we provide that all the other power that may be necessary in carrying on any of this work down there shall be supplied to him. So I think, if we want to do it, the language is well adapted to carry out that idea.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Tennessee [Mr. McKELLAR], as modified.

The amendment as modified was agreed to.

Mr. NORRIS. Mr. President, I want to offer one or two amendments which I think will clarify the joint resolution and which, in my judgment, will not change the effect of it in any way.

First, I want to say that there seems to be a difference in the prints. I notice that the pages given from the desk do not correspond with those in the print I have before me. I was wondering whether there are two separate prints.

The PRESIDING OFFICER. The Chair will inform the Senator that the clerks at the desk are using the joint resolution as reported on February 3.

Mr. NORRIS. I want to offer an amendment on page 4, according to the print I have, which should come in after line 5, at the end of what is now section 6. I want to add two other paragraphs, which I send to the clerk's desk and ask to have read.

The PRESIDING OFFICER. The clerk will read.

The CHIEF CLERK. In the print as reported on the legislative day of February 1, the calendar day of February 3, 1928, on page 4, after line 13, the Senator from Nebraska offers an amendment.

Mr. NORRIS. At the end of section 6.

The CHIEF CLERK. To insert a new subdivision, as follows:

(e) Whenever the Secretary determines that it is commercially feasible to produce any such fertilizer, it shall be produced in the largest quantities practicable, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

Also the following:

(f) The Secretary is authorized to make alterations, modifications, or improvements in existing plants and facilities and to construct and operate new plants and facilities in order to effectuate properly the provisions of this section.

Mr. NORRIS. In my judgment the amendment does not enlarge the power any, but it is more specific and many Senators wanted to have some statement of the kind in the joint resolution.

Mr. McKELLAR. That was another one of the provisions which was submitted to the Senator from Nebraska by a number of Senators on this side of the Chamber. The Senator from Nebraska has very graciously agreed to accept the two provisions contained in the amendment.

Mr. SMITH. Mr. President, I want to state with reference to the first provision which was read that I think it is very important, after the experimentation has gone on and it is proven to be feasible, that then it shall be run during such time

as the plant may be operated, to the largest amount practicable, and sold at the lowest price possible.

Mr. McKELLAR. It makes a nitrate or fertilizer plant out of it.

Mr. NORRIS. It carries out the main idea, I think, contained in the amendment suggested by the Senator from South Carolina.

Mr. SIMMONS. It means in effect that if the Secretary finds it is feasible, he shall use all the power necessary to produce fertilizer; provided that there is a demand for that amount of fertilizer. It means that, does it not?

Mr. NORRIS. I did not catch all that the Senator said, because of the confusion in the Chamber. However, the amendments mean that in his experimentation if he finds it feasible to make fertilizer by any process that he adopts, he shall make it on the largest possible scale and sell it at the lowest possible price. In other words, it carries it out on as large a scale as the plant, whatever it may be that he is using or that he builds afterwards, will permit.

Mr. SIMMONS. It is intended, therefore, as a specific dedication of the plant primarily to the production of fertilizer; provided it can be made economically and there is a demand for it.

Mr. NORRIS. I would not say that under the provisions of the measure the Secretary of Agriculture, for instance, would be justified in constructing a plant after he had experimented and found, let us say, some modification of the synthetic process to get nitrogen from the atmosphere. I would not say that he would be justified in building a plant that would produce a hundred thousand tons a year of nitrates for the purpose of going into the fertilizer business.

Mr. SIMMONS. No; I did not mean that.

Mr. NORRIS. The Senator, I think, does not mean that.

Mr. SIMMONS. No; I did not mean that.

Mr. NORRIS. Nor do I mean it.

Mr. SIMMONS. I mean to the extent of the demand.

Mr. NORRIS. There will be demand, in my judgment, for more fertilizer than can possibly be produced here. The idea is to manufacture it on as large a scale as possible with the machinery there that he devises and puts in.

Mr. SIMMONS. I anticipate that when the Secretary finds that this product can be made economically and enters upon its manufacture, private capital will also enter upon it.

Mr. NORRIS. That is just what we want. That is what we are trying to get.

Mr. SIMMONS. I want to have the Secretary empowered to make enough fertilizer to supply such demands as private capital does not provide for.

Mr. McKELLAR. That is the purpose of the amendment, and I hope it will be adopted.

Mr. KING. Does the Senator want to press a vote on the amendments to-night?

Mr. NORRIS. I would like to have the amendments agreed to to-night. Then I desire to offer another amendment, and then I shall ask that the Senate take a recess until to-morrow and have that amendment pending.

Mr. KING. If I should desire to-morrow to offer an amendment to the amendment now pending, will the Senator have any objection to my asking that the question be reopened?

Mr. NORRIS. Not at all. I shall not resort to any technicality of any kind.

Mr. SACKETT. Does the Senator expect to increase the amount of the appropriation?

Mr. NORRIS. Yes.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Nebraska [Mr. NORRIS].

The amendment was agreed to.

Mr. SMITH. Mr. President, may I ask the Senator if he will not have all the amendments to which we have agreed printed in some form?

Mr. NORRIS. I have no objection to that.

I offer another amendment, which I ask may be stated. I shall not ask that action be had on it to-night. I understand the Senator from Kansas [Mr. CURTIS] desires to have an executive session, but I would like to offer this amendment and have it pending. Part of it has not yet been printed, and that is the reason why I offer it now, so that it may be printed and Senators may be advised of it.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 3, at the end of section 4, insert the following proviso:

Provided, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the Secretary of War is hereby authorized and directed to contract with such State, county, municipality, or other organization, or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case, the Secretary of War shall give to such State, county, municipality, or other organization, ample time to fully comply with any local law now in existence or hereafter enacted, providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the Secretary of War for such electricity: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the Secretary of War shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, he shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale, if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the Secretary of War and such distributor of electricity shall be declared null and void and the same shall be canceled by the Secretary of War.

Mr. NORRIS. I take it for granted that the amendment will be printed in the usual form and placed on Senators' desks, and it will be pending when the Senate meets to-morrow.

The PRESIDING OFFICER. The Senator is correct.

Mr. NORRIS. I ask unanimous consent that we may have a reprint of Senate Joint Resolution 46 showing the amendments which have thus far been agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRISON. Mr. President, I desire to offer a substitute for the pending joint resolution. I shall not ask that it be read now, because I do not want to take up the time of the Senate. It provides for the striking out of everything after the resolving clause and the insertion of new matter.

I will say for the information of the Senate that the only measure upon which the Senate has ever been able to agree touching Muscle Shoals was the so-called Underwood fertilizer bill, proposing first to lease Muscle Shoals for 50 years under certain conditions, that fertilizer must be made in quantities of 40,000 tons of fixed nitrogen annually, and the surplus power distributed, and that in the event we could not get a lease then that the Government should conduct the enterprise. Because the Senate has gotten together on that proposition and because it is not made up of a whole lot of disjointed views, I think perhaps the Senate may consider it favorably again. I offer it as a substitute.

The PRESIDING OFFICER. The proposed substitute will be printed and lie on the table.

Mr. HEFLIN. Is the Senator from Mississippi offering the so-called Underwood bill as it was agreed on in conference?

Mr. HARRISON. No; as it passed the Senate.

Mr. HEFLIN. And not as it was agreed on in conference?

Mr. HARRISON. No; as it passed the Senate; because that was the judgment of the Senate.

"THE MELLON EXPOSÉ"

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Baltimore Sun of this morning entitled "The Mellon Exposé."

The PRESIDING OFFICER (Mr. EDGE in the chair). Without objection it is so ordered.

The editorial is as follows:

THE MELLON EXPOSÉ

Mr. Mellon's story is that late in the fall of 1923 Will Hays sent him a package of $50,000 of Liberty bonds, which were part of the money obtained by Hays from Harry Sinclair; that later Hays called on him and proposed that he, Mellon, keep the bonds and contribute a like amount to the Republican National Committee's deficit; that this proposal to hide part of Sinclair's contribution was rejected; and that he then gave $50,000 to the committee out of his own funds.

The story may be true. Not only would Mr. Mellon have been morally cheap to have participated in the trick, but a man of his almost incalculable wealth would have been financially cheap to have dodged putting up himself the contribution that was to stand in his name. But, in these days when nothing surprises one, it is to be noted that other very prominent and very rich men were not above using Sinclair's money in making contributions to the Republican committee. It also is a somewhat singular coincidence that Mr. Mellon contributed to the committee a sum exactly equal to the amount of Sinclair bonds sent him by Hays. For the late John T. Pratt showed that a very prominent and very rich man could take Sinclair's bonds to offset his own contribution and then send back the bonds when the Walsh investigation began to be dangerous.

But let Mr. Mellon's story be taken at face value. There remain certain circumstances that deserve the attention of the citizens of this country. When Will Hays went to Mellon with Sinclair's bonds and with the proposal that this member of the Cabinet join in hiding the use of Sinclair's money to liquidate the national committee's deficit—when that occurred the Teapot Dome question had been before the public more than 18 months. It was in April, 1922, that Secretary Fall secretly turned over the great oil reserve to Sinclair. It was apparently in November, 1923, that Hays approached Mellon. Between those dates, the Fall-Sinclair transaction had been challenged in the Senate and an investigating committee had been named. Senator WALSH was laboriously seeking the truth when Hays went to Mellon with Sinclair's bonds.

It may reasonably be asked why, when Washington was agog with rumors of stupendous robbery of the Government in the secret Falls-Sinclair transaction, the Secretary of the Treasury did not regard the appearance of Sinclair's bonds for use in liquidating the Republican deficit and Hays's furtive handling of the bonds as a circumstance so suspicious as to deserve investigation and communication to Senator WALSH? Was Mellon, next to the ranking member of the Cabinet, indifferent to colossal jobbery at the expense of the Government? Was Mellon, with a half-century of business experience behind him, innocent of the slightest understanding of the significance of Hays's appearance with a great block of Sinclair's bonds and of Hays's desire for secrecy in the use of these bonds? Where were Mellon's sense of duty and his common sense when Hays approached him?

These questions become more pertinent and insistent as succeeding events are reviewed. In January, 1924, about two months after Hays approached Mellon, the Walsh committee was told by Edward L. Doheny, to whom Fall had turned over the other great oil reserve, Elk Hills, that he had sent Fall $100,000 in a little black satchel. From that moment the last lingering doubt of colossal jobbery at the expense of the Government was gone. In a little while the Walsh committee was on the track of Sinclair's cash payments. But Sinclair resisted examination and defied the Senate's committee, and revelation of the whole *truth of* Sinclair's corruption was thwarted. Yet during all the time that Senator WALSH pried and prodded for items of information the Secretary of the Treasury sat silent in his office, although he knew that Hays had obtained a great sum of money from Sinclair and was using it secretly.

Worse, the Secretary of the Treasury sat silent in his office when Hays early in 1924 went on the stand—before the committee of the United States Senate that was investigating a then plain case of graft on unprecedented scale—and swore that $75,000 was all the money that Sinclair ever had given him. Still worse, the Secretary of the Treasury sat silent in his office when four years later Hays went before the Walsh committee and, even while admitting that he had deceived the committee in his previous testimony, proceeded to tell a tale about the disposition of the $260,000 he had got from Sinclair, which no intelligent man could believe. One of the most suspicious features of Hays's latter testimony was the blank as to his use of a certain $50,000 of the Sinclair bonds. He told of bonds going to Upham, to Weeks, to Pratt, but not one word of his negotiations with Mellon for use of the remaining $50,000. And Mellon did not remind him.

At no stage of the fight that was started in the spring of 1922 to ascertain the truth of Fall's disposition of the Nation's oil reserves, to uncover and to punish the plunderers of public property, and to recover the property—at no stage did the Secretary of the Treasury lift a finger or utter a syllable to aid, although for four years he had knowledge of Hays's possession of Sinclair's bonds and of Hays's secrecy in using them. Not until a chance memorandum turned up in the papers of the dead man, Pratt, did this high officer of the Government contribute to the Walsh investigating committee the information in his possession. And so we repeat, the circumstances surrounding this matter deserve the attention of citizens of this country, even though they take at face value the present Mellon story.

But, after all, the panorama that is revealed by the Mellon story does not end to-day with Mellon. Able as he has been in the administration of the Treasury, one is not greatly to be surprised by his silence while protectors of public morality and public property sought vainly during many months for precisely such information as was in his possession. Mellon had been steeped in the politics of Pittsburgh and of Pennsylvania for decades before he appeared in Washington. No one had ever heard of him as an enlightened patriot. And it was he who less than two years ago explained that he saw no difference between his contributions to the Pepper slush fund and contributions to a church. But there have been and are now other men in the administration at Washington who are supposed to have advanced conceptions of public morality. And what have they done throughout this six-year struggle to remedy gigantic corruption?

What has Calvin Coolidge done? What has Charles E. Hughes done? What has Herbert Hoover done? Mr. Coolidge became President in August, 1923, about three months before Hays approached Mellon with Sinclair's bonds. The effort to liquidate the Republican deficit largely with Sinclair's bonds was, in fact, an effort to clear the decks for Mr. Coolidge's own candidacy. Mr. Hughes was Secretary of State in the Harding and Coolidge Cabinets until March, 1925. Mr. Hoover has been Secretary of Commerce since March 4, 1921. Government property worth untold millions grabbed, a Cabinet officer bribed, the manager of the party machine soliciting a fortune from one of the corruptionists after the corruption, the same manager darting around furtively to deliver Sinclair's bonds to party leaders, including two Cabinet members, Mellon and Weeks, the same party manager deceiving a Senate committee, party records destroyed—and what have the people of this country heard from Mr. Coolidge, or Mr. Hughes, or Mr. Hoover?

The people have heard no word of character from these men. If protection of public property and public morality had depended upon them and others of like standing, in the administration and in Congress, Fall would still be an honored leader of their party, Daugherty would still be of equal rank, Sinclair and Doheny would still have swag equal to the riches of the east, and Hays and the whole crew of go-betweens and tricksters would be respectable public figures. Did Mr. Coolidge, Mr. Hughes, Mr. Hoover, and others of their position know nothing? Did they really know nothing when WALSH, with every resource of the party in power cast against him, could sense the truth and gradually reveal it? Did they really know nothing when two members of the Cabinet, Mellon and Weeks, had held Sinclair bonds in their possession?

If Coolidge and Hughes and Hoover knew nothing, it was because they chose to know nothing. If Mr. Coolidge and his two pure advisers, Mr. Hughes and Mr. Hoover, did not know in 1924 that Harry Sinclair, whom the administration should have been pursuing with every agency at its disposal, was in fact paying bills of the Republican Party to aid Mr. Coolidge's election, it was because they did not move a muscle to ascertain facts that were under their very noses. And when the final record comes to be made on Mr. Coolidge, Mr. Hughes, and Mr. Hoover, that damned spot will not out.

FORECLOSURES BY FEDERAL LAND BANKS

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD a pamphlet published by Xeno W. Putnam, of Harmonsburg, Pa., bearing upon the methods of certain officials of the Federal land bank and Federal intermediate banks in handling foreclosures of loans made by farmers.

There being no objection, the pamphlet was ordered to be printed in the RECORD, as follows:

CONFISCATORY FORECLOSURES—SHALL A GREAT BANKING SYSTEM BE SACRIFICED AT THE ALTAR OF NEFARIOUS EXTORTION?

JUST PLAIN FACTS

No need to comment on the cold facts Mr. Putnam advances to support his contention that extortionate attorney fees are being charged in many communities in foreclosing Federal farm-loan mortgages, thus defeating every fundamental principle of this legislation. Book and page are given that any interested parties may investigate for themselves.

And this is not the gossip of any bloodthirsty farm-mortgage banker, as many suppose when anyone has the temerity to criticize this system. Mr. Putnam was founder and prime mover in the activities of the Crawford County (Pa.) National Farm Loan Association, of the Federal farm-loan system, and is now engaged in the high purpose of an endeavor to save the system from extortionate practices, which, if not soon terminated, will defeat its objects entirely.

The article presents no unique news to those in official position to correct the errors. They have met Mr. Putnam's demands with evasive answers, or not at all. Anyone, anywhere, who has like facts to present, should forward same to Mr. Putnam, that he may pass them to proper authorities. Members of Congress are on the trail.

Of all the disturbing bombs that the Federal farm loan act exploded, none overturned more tinware than paragraph 3, section 31. This section supplies the enforcing fuzes of the whole act. Various "thou shalt nots" grace other parts of it; but this section contains every penalty for the punishment of criminal offenders.

Every paragraph and every penalty applies to the entire act, and all of the contained processes incident to the business of lending money; there is not a word of restriction. The forgery committed in the making of a loan or when finally paying it off would be punished alike. If a farm-loan official should elope with funds belonging to the system, he and his bond would be held equally accountable whether those funds had been on their way from a bank or to a borrower for the closing of a loan or from the borrower back to the bank after foreclosure. Paragraph 3 of the act would indicate a perfectly straight line between its forgery brother on the one hand and its embezzling kinsman on the other. This third paragraph is the only one in which we are now interested. It reads in part:

"Other than the usual salary or director's fee paid to any officer, director, or employee of a national farm-loan association, a Federal land bank, and other than a reasonable fee paid by such association or bank to any officer, director, attorney, or employee for services rendered, no officer, director, attorney, or employee of an association or bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of such association or bank. Any person violating any pro-

vision of this paragraph shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding one year, or both."

As if to checkmate any connivance between land banks and employees, section 14, paragraph 5, further provides that:

"No Federal land bank shall have power to demand or receive, under any form or pretense, any commission or charge not specifically authorized in this act."

Under "fees" in an exhaustive index for a special issue of the farm loan act (S. Doc. 500; H. Doc. 1314, 64th Cong.) we find that the only charges savoring of commissions which the act permits land banks to assess are authorized in section 13, paragraph 9, as follows:

"Every land bank shall have power to charge applicants for loans and borrowers, under rules and regulations promulgated by the Federal Farm Loan Board, reasonable fees, not exceeding the actual cost of appraisal and determination of title. Legal fees and recording charges imposed by law in the State where the land to be mortgaged is located may also be included in the preliminary costs of negotiating mortgage loans."

These provisions, unlike those occurring in our subject section, are limited strictly to actual cost and are further restricted to but one phase of the money-lending business—the making of loans. Not in any sense can we apply them to all "transactions and business" of an association or bank. Nor is any further charge authorized in the act for the land banks, "under any form or pretense." The local associations have recently been taken care of by an amendment (66th Cong.) to paragraph 3, section 11. They are now given power to—

"Fix reasonable initial charges to be made against applicants for loans and to borrowers in order to meet the necessary expenses of the association: *Provided*, That such charges shall not exceed amounts to be fixed by the Farm Loan Board and shall in no case exceed 1 per cent of the amount of the loan applied for."

On this amendment the board has ruled (Circular No. 11):

"The charges to be permitted to be collected by an association from applicants and borrowers are as follows:

"First. The fee exacted at the time the application is made. This fee should be sufficient to cover all expenses, including the service of the loan committee up to the time that the application is sent to the bank.

"Second. The fee collected when the loan is finally closed. This should be withheld by the association when the remittance for the proceeds of the loan is received or should be deducted by the bank for the benefit and in behalf of the association.

"* * * The above relates only to charges made by an association and has no connection with or relation to the charges which may be made by the bank for appraisal and legal determination of title."

Again we find these permitted charges specifically restricted to the business of making loans and not extended to include "any transactions or business of such association." So much for the "charges authorized by this act."

Four specially sore thumbs trouble the third paragraph; of these, the second and third are much the worst:

First. Every one rendering service to a bank or association is entitled to a reasonable fee or salary from the treasury of the unit employing him. To this there are no exceptions.

Second. No one, so employed, may under any circumstances accept pay from another source. The personal service fee is taboo. To this there are no exceptions.

Third. The restrictions apply to every employee, whether officer, director, or attorney. Again no exceptions are made.

Fourth. They apply to "all transactions or business of such association or bank" operating under this act, no matter whether those transactions are actually performed under Federal laws or State laws. The operator is still an employee. Every business likely or liable to occur as a product of the business of loaning money is included. The act lists no exceptions.

The treasury of a responsible chartered institution, placed between each borrower and every individual in the farm-loan system, should protect him from bonuses, commissions, and all forms of masked usury during his entire connection with the "transactions or business" of either association or bank. The protection as intended is as complete as law and language can make it. "These provisions of the law," declared the Farm Loan Board back in 1918 (Borrowers' Bulletin August-September) "are inserted for the purpose of preventing private profits, commissions, fees, and extortion. They are proper provisions, and for the benefit of the borrower and the system, they should be carefully observed."

Are they being observed? Let us consider the foreclosure-provision clause in the farm-loan mortgage forms being used in all or a part of four land-bank districts. First, the Pennsylvania form is the typical clause used in the whole second (Baltimore) Federal land-bank district.

"But if any of the payments in the above-described note * * * be not paid when due * * * it shall be lawful for said bank to sue out forthwith a writ or writs of scire facias * * * and proceed thereon to judgment and execution for the recovery of said principal sum and interest due thereon, and the cost and expenses of such proceedings, together with an attorney's fee of $25, and a commission of 5 per cent on said principal sum, which said sum and commission shall be due and payable immediately upon the institution of said proceedings."

The provision is identical in Virginia, West Vrginia, and Delaware; Maryland differs only in reckoning the commission upon the proceeds of the sale instead of the mortgage debt. The foreclosure clause for South Carolina and Georgia in the third (Columbia) Federal land-bank district reads:

"In case the said debt or any part thereof is established by or in action for foreclosure of this mortgage the Federal Land Bank of Columbia, in addition to the said debt, or as much thereof as shall be unpaid, may also recover of the parties of the first part * * * a reasonable sum for the attorney of the Federal Land Bank of Columbia for professional services rendered in said action, not to exceed 10 per cent of the amount then unpaid."

In Florida, General Counsel Welch advises me, the same provision is used, although the land-bank form for Florida examined reads "a reasonable fee." In North Carolina the courts have ruled this charge usurious and refuse to allow it.

I quote from a letter which I have on file, received from Attorney R. H. Welch, general counsel for the Federal Land Bank of Columbia, S. C., who writes as follows:

"You will note that in all of the States (in third district) except North Carolina an attorney's fee, not to exceed 10 per cent, is provided for. In North Carolina such a provision has been held usurious. For your further information, I attach copy of our booklet on foreclosures and also our foreclosure statement, which is forwarded to attorneys, on which the necessary data is given for the preparation of the complaint, bill, or petition."

Must the courts of any State protect her people from extortionate practices in the great farm-loan system, conceived and organized for the relief of our usury-ridden farmers? Sometimes there are ways to evade State court decrees also. In their "Rules and regulations governing foreclosures" the Columbia Land Bank suggests that the North Carolina "attorney's fee be taken care of by naming as the commissioner to sell the property some one, such as a member of the firm, whose sale commissions will go to the attorney."

The New Orleans Federal Land Bank (fifth district) provides a foreclosure commission for Louisiana only. Here is the clause:

"It is also agreed that in case the mortgagee herein * * * sees fit to foreclose this mortgage in a court having jurisdiction thereof, then mortgagor will pay 10 per cent attorney's fees therefor."

A reasonable attorney's fee is stipulated for Alabama of the same district. In Mississippi is used a deed of trust which provides for "a reasonable trustee's fee together with the attorney's fee prescribed in said note, and if there be none prescribed, then a reasonable attorney's fee." An excerpt from the deed of trust used by the Houston (tenth district) bank for its single "Lone Star" portégé reads:

"The trustee making sale * * * shall pay the reasonable expenses of executing this trust, including a commission of 5 per cent to the trustee."

Who will collect these commissions? Surely not the land banks that are forbidden by Federal law under heavy penalties to "charge or receive any fee commission bonus or gift under any form or pretense." Not the attorney or employee of any land bank or association while engaged in "any transaction or business of such association or bank;" each faces the same penalty. Perhaps a search of a few court records in actual land-bank foreclosures might be enlightening. Names of defendants are omitted but place, date book, and page are included for ready reference.

[Exec. Doc. No. 43, p. 439]

PROTHONOTARY'S OFFICE,
Meadville, Crawford County, Pa.

(Judgment 223. November Term, 1922. Leland J. Culbertson, attorney)

February, 1923

Debt	$2,847.00
Attorney	4.50
Prothon	.85
Sheriff	72.90
Satisfaction	.20

Sold February 12, 1923, to Leland J. Culbertson, $1,000.

Disbursement of money by (sheriff) Cutshall

Culbertson, attorney	$680.14
Culbertson, attorney	134.50
County commissioners, 1922, taxes	109.91
Prothonotary	2.55
Sheriff	72.90
Total	1,000.00

* * * * * * *

FEBRUARY 27, 1923.

Received $680 on bid from Sheriff H. B. Cutshall and $134.50 costs and commission and direct sheriff to return writ.

(Signed) LELAND J. CULBERTSON.

Note that Mr. Culbertson not only receipts for $134 "costs and commission" but assumes responsibility as plaintiff's attorney by ordering return of writ.

Mr. Culbertson is not only title attorney for the Federal Land Bank of Baltimore but likewise secretary-treasurer of the Crawford County National Farm Loan Association, which is a part of the same bank. Thus under two distinct offices he is subject to the Federal farm loan act.

In the Meadville (Pa.) Tribune-Republican for Wednesday, February 7, 1923, page 9, this same property was listed in the official advertisement of sheriff's sales (see parcel No. 9), is described as—

"Seized and taken in execution as the property of ——— at the suit of the Federal Land Bank of Baltimore, Md., and to be sold on Fi. Fa. No. 53. February term, 1923.

"H. B. CUTSHALL, *Sheriff*.

"LELAND J. CULBERTSON, *Attorney*."

In the Meadville Evening Republican for Monday, February 12, 1923, in the court news of the day we find—

"At 11 o'clock Sheriff H. B. Cutshall conducted a sale of properties as part of quarter sessions week. * * * Following are the properties: * * * No. 9, land in Beaver Township, seized as property of * * * at suit of the Federal Land Bank of Baltimore. Sold to L. J. Culbertson, Esq., for $1,000."

Copy of sheriff's return in above case:

"To the honorable, the judge of the court of common pleas of Crawford County, Pa., I, H. B. Cutshall, sheriff of said county, do hereby certify and return that by virtue of the writ hereto attached, after giving due and legal notice by advertising the real estate described in the levy attached thereto, by advertisement in two newspapers printed in said county of Crawford, and by hand bills posted upon the premises and in the most public places, according to law, I did expose the said property to sale, at the courthouse, in the city of Meadville, by public vendue or outcry, on Monday, the 12th day of February, 1923, at 11 o'clock a. m., which time and place I sold the same to Leland J. Culbertson for the sum of $1,000, that being the *highest* and best sum bidden for the same, and the said Leland J. Culbertson being the highest and best bidder. Of these moneys I have made the following disposition.

Real estate sold for		$1,000.00
Paid Leland J. Culbertson, attorney, on bid	$680.14	
Paid Leland J. Culbertson, attorney, commission and docket fee	134.50	
Paid county commissioners, 1922 taxes	109.91	
Paid Professor Greeley	2.55	
Paid Sheriff Cutshall	72.90	
		1,000.00

So answers,

H. B. CUTSHALL, *Sheriff*.

Just one more page from the same docket, and enough of this sort of evidence will be before you, though plenty more of it can be produced.

Copy from docket No. 43, page 260

Prothonotary's office, Meadville Courthouse, Crawford County, Pa.
February term, 1922. Writ issued January, 1922

Debt	$2,306.35
Register	.50
Snodgrass	9.60
Attorney	5.25
Prothonotary	4.65
Satisfaction	.20

March 7, 1922, writ returned. Property sold to Leland J. Culbertson, $1,700. Distribution of money:

County commissioners, taxes	$74.53
Snodgrass	9.60
Cutshall	60.42
Prothonotary	5.60
Recorder	.50
Culbertson, attorney's commission	101.12
Culbertson, on debt	1,448.23

RETURN INDORSEMENT

MARCH 7, 1922.

Received of Sheriff Cutshall, $1,448.23, to apply on debt and interest, and also $101.12, attorney's commission and attorney's fees, and I hereby direct the sheriff to return this writ.

LELAND J. CULBERTSON, *Attorney*.

MARCH 7, 1922.

Writ returned order of plaintiff's attorney.

H. B. CUTSHALL.

Can we longer doubt that an employee of a Federal land bank, acting as plaintiff's attorney (in behalf of same bank) in a suit that was unquestionably a part of the "transactions or business" of the Federal Land Bank of Baltimore, did out of the proceeds from a borrower's property and not from the land-bank treasury, collect or accept and receipt for an attorney's commission of about $130 on February 27, 1923; or that on March 7, 1922, said attorney did, while engaged in similar "transactions or business" and in the employ of said land bank, receive and receipt for an attorney's commission of $100 from another source than the treasury of the bank employing him? Such instances are not uncommon.

Under date of June 11, 1923, Col. Robert Catlett, general counsel for the Baltimore bank, writes:

"The commission has always been given to the attorney to whom the collection was given, or by whom foreclosure proceedings have been instituted."

The excerpt from the Columbia bank foreclosure clause already given states very plainly that the commission provided for is for "the attorney of the Federal Land Bank of Columbia for professional services rendered in such action."

The unintentional humor in the Columbia Land Bank's interpretation as to what is reasonable, entitles it to a place here. On page 3 of their foreclosure rules they state:

"Should the land bring enough at the sale to pay the indebtedness to the bank, with the accrued interest thereon, together with all cost, the bank has no objection to such fee being collected as may be allowed in the judgment."

This, we have already seen by the mortgage, may be as much as 10 per cent, but the bank plays safe. In sending out its petition in foreclosure an amount is named in case the bank has to bid in the property, which the attorney is obliged to regard reasonable if he takes the case. The ruling reads:

"Should the bank find it necessary, in order to protect its interests, to purchase the mortgaged land at the sale, then in that event it feels that the fee which will always be fixed when forwarding the papers for foreclosure is reasonable and proper compensation for it to pay to the attorney."

It all depends, then, upon whose ox is being gored!

Are foreclosures, when necessary, such a part of the "transactions or business of an association or bank" as would put the bank or association under the regulations of the farm loan act? In other words, are the banks administratively responsible to their bondholders for the security behind them? That is the sum and substance of the controversy, and no holder of farm-loan bonds would be satisfied with any but one answer.

Although the 12 banks guarantee their bonds, neither one nor all of them would in themselves be accepted as adequate security for a single bond issue. The real sanctity of the investment is in the pooled mortgages back of them, indorsed, as each must be, by the associations of farmers owning the lands mortgaged. But mortgage security must always include some tangible guarantee of collection when due or defaulted. This the land banks recognize as a part of their possible work when they insert foreclosure provisions into their mortgage contracts. Under State laws these individual mortgages must be recorded and foreclosed—nobody ever disputed that—but there must be some central force in control, under the Federal farm loan act itself, in order to keep faith with the investors in land-bank securities.

The absurdity of any loaning proposition that did not include within itself the machinery for taking care of its loans—the more difficult ones that have to be foreclosed, above all others—requires neither proof nor refutation. The land bank that refuses or neglects to take care of its mortgages, to look after difficult collections, to make its necessary foreclosures has not only repudiated its obligations to its bondholders but has violated the Federal farm loan act.

The associations, too, as the indorsers of these mortgages, recognize their collection through any necessary method as a part of their transactions or business. In their charter, issued by the Farm Loan Board, they are authorized and empowered to not only indorse mortgages of their members for the making of loans, but to "do all things implied or incidental thereto." All of the land banks have their foreclosure rules (one bank at least, Columbia, has a very complete schedule of them printed in a 12-page bound pamphlet) and make the associations party to their suits.

Since foreclosure is without any question, one of the covenants of the mortgage under which the agent or attorney is operating at the time of foreclosure, the covenant of business of foreclosure is specifically stated in the act itself a part of land-bank transactions or business and therefore one of the operations directly under the terms and conditions stipulated in section 31. This subsection of the act, if it had no other support whatever, refutes directly and conclusively the contention of Colonel Catlett and others. In so many words, the act states that the covenant of foreclosure is a part of land-bank transactions for the performance of which said bank has the right to supply a foreclosure attorney.

What subterfuge is left, then, in defense of this commission taking? Upon what line of fact or of argument do the offenders attempt to stand? Herbert Quick, former member of the Farm Loan Board, launches this plank to the rescue:

"Where the law of the State permits it the mortgagor may legally contract to pay a percentage of his loan as an attorney's fee in case of foreclosure. Legally, under such a contract the attorney is acting for the mortgagor and is paid out of the property dealt with."

This is exactly the form of contract which the Farm Loan Board in July 1919 ruled that the mortgagor might not make! In a letter of instructions to all secretary-treasurers, after quoting most of our subject paragraph, including the penalties for violation, the board said:

"One of the examiners of the Federal farm-loan system recently sent in a printed form of agreement between borrower and the secretary-treasurer of a national farm-loan association under which the borrower agreed to pay the secretary-treasurer a small percentage of his loan every year. This remuneration to the secretary-treasurer was perhaps no greater than he ought to receive. The farmer made his arrangement in good faith and the secretary-treasurer did the same, but the contract was itself illegal.

"It is proper for a national farm-loan association to make any reasonable assessments upon its members * * * but such assessments must be made by proper action of the board of directors and all funds derived therefrom must go into the association treasury. * * * In other words the association must control the assessment and the disbursement, and no secretary-treasurer has any right to receive any pay for his services from any individual borrower. * * * Be sure that all funds go into the treasury of the association and are properly disbursed and accounted for. This is important."

In States permitting usurious contracts farm-loan officials might under it compel borrowers to become party to almost any unfair contract by writing it into the mortgage and telling him to sign or stay out. If forbidden sharp practices could be thus legalized in the shadow of the farm loan act, the whole system might speedily be turned into a den of usurious inequity.

One other communication of importance in defense of these foreclosure commissions I have been able to obtain during two years of rather active correspondence and study of the subject. This, from Col. Robert Catlett, attorney for the Baltimore bank:

"The form of mortgage used by this bank was approved by the Federal Farm Loan Board in the beginning of its operations.

"In many of the States deeds of trust are in general use as security for loans, and I think, without exception, such deeds provide for a commission to the trustee, usually 5 per cent, in case of forecolsure. The provision in the mortgage follows this usage, and I see no distinction between the two forms of security, either in principle or legality.

"Section 14. We have never put the construction on the fifth subsection of the farm loan act or on the third paragraph of section 31 that you do; in fact, we have thought that these provisions apply only to charges, etc., in connection with the making of loans and have no bearing whatever on charges for foreclosure.

"I can refer you to no precedent, as the right of the bank to make this provision in its mortgages has never been questioned or disputed either by the borrowers or by the courts in all of the States of this district in quite a number of foreclosure suits this bank has been forced to bring.

"In the face of all this I recognize your right to raise the question, and I feel that your contention deserves consideration, and this I have tried to give in all frankness. My opinion is very decided that the provisions in the mortgages used in this district providing for commission or compensation for attorney fees in cases of foreclosure and forcible collections of what is due the bank are strictly within the provisions of the farm loan act, doing violence to none of them, and legally enforcible in all of the States composing this land-bank district."

Nor does it appear that Mr. Catlett himself regards this opinion as conclusive. He states explicitly in his letter that he "can refer to no precedents." He offers no other authority whatsoever than his own unsupported opinion and he brings very little argument to its aid. True, he cites the custom in deeds of trust, but is mistaken in his belief that this is a universal custom, both of the deeds of trust used, respectively, in Tennessee and Mississippi being exceptions to his rule.

As to the contention that the right to this commission has never been disputed by a foreclosed borrower or by any court in the second district, it is to be remembered that very few borrowers, when affected by this provision, through foreclosure, are in a position to dispute any contract; nor are they, as a rule, familiar with the law. They accept it "as it is written in the bond" by a presumably responsible institution.

Neither are the courts, unless special complaint is made, likely to go very deeply into the subject in States where contracts of this sort have become an accepted part of almost every mortgage. Jurists are very likely to forget the fact that the farm loan act was intended to overturn certain old loaning customs rather than to perpetuate them.

Outside of sentiment, what does this foreclosure commission clause mean, anyway, to the system or to the general public? It means a good many needlessly ruined homes. The uniform mortgage drafting committee spoke only half of the truth when they stated that:

"Since the property is usually bid in by the mortgagee for the amount of the mortgage, subject to the right of redemption, it is of no advantage to offer a commission as an inducement to secure the best possible price."

The amount of this extra commission sometimes means to the man foreclosed upon the difference between pauperism and a fresh start in life; to his community it may mean the difference between a poor but independent self-respecting citizen and a hopeless, broken man on the town. If the sale does not cover the debt (and the risk of this is always greatest among the weaker mortgagors), the other members of the association may be called upon to make up the loss. In this way any borrower living in any one of nine States in four land-bank districts may be called to pay troublesome assessments to a foreclosing attorney who is not satisfied with a reasonable fee from the bank.

It means, too, gradually weakening the farm-loan system; a crumbling of its bulwarks; that one more inside agency is busily at work destroying the whole structure in the interest of men who have many of them hated it from the beginning and have never had a dollar of their own money invested in it.

No legitimate enterprise or system can continue to prosper upon the failure of its members, and one of the most dangerous lessons it is possible to teach a promiscuous group of people is that law may be evaded or that it does not mean anything.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and the Senate (at 5 o'clock and 20 minutes p. m.) took a recess until to-morrow, Tuesday, March 13, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 12 (legislative day of March 6), 1928

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY

Alexander P. Moore, of Pennsylvania, to be ambassador extraordinary and plenipotentiary of the United States of America to Peru.

PROMOTIONS IN THE NAVY

Commander Harry E. Shoemaker to be a captain in the Navy from the 15th day of February, 1928.

Lieut. Commander Charles H. Maddox to be a commander in the Navy from the 2d day of October, 1927.

Lieut. Adolph P. Schneider to be a lieutenant commander in the Navy from the 2d day of September, 1927.

Lieut. Lester J. Hudson to be a lieutenant commander in the Navy from the 14th day of November, 1927.

Lieut. (Junior Grade) David E. Carlson to be a lieutenant in the Navy from the 3d day of June, 1927.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 5th day of June, 1927:

Edward W. Young.	Arthur A. Griese.
Neville L. McDowell.	Stone E. Bush.

Asst. Surg. Robert E. Baker to be a passed assistant surgeon in the Navy, with the rank of lieutenant, from the 1st day of July, 1927.

Asst. Dental Surg. Hugh E. Mauldin to be a passed assistant dental surgeon in the Navy, with rank of lieutenant, from the 2d day of June, 1927.

Machinist Murphy Lott to be a chief machinist in the Navy, to rank with but after ensign, from the 12th day of October, 1927.

Pay Clerk Oscar H. Weyel to be a chief pay clerk in the Navy, to rank with but after ensign, from the 5th day of February, 1927.

The following-named pay clerks to be chief pay clerks in the Navy, to rank with but after ensign, from the 3d day of December, 1927:

Fred Traxler.	William J. Vay.
Paul C. Davis.	Henry H. Hoefs.
Albert J. Burtnett.	Otto D. Bierling.
Fred W. Stilwell.	Henry A. Oswald.
Dee A. Barnett.	Clarence B. Selden.
Roy H. Thompson.	George L. Von Mohnlein.
Hans C. A. Andersen.	John W. Hall.
Albert J. Kirsch.	Glenn P. Hardy.
Ray M. Williams.	John H. O'Neill.
Noel O. Bickham.	

POSTMASTERS

ALABAMA

Willer B. Goodman to be postmaster at New Brockton, Ala., in place of L. C. Law, resigned.

ARIZONA

Clarence J. Wilson to be postmaster at Casa Grande, Ariz., in place of C. J. Wilson. Incumbent's commission expires March 14, 1928.

CALIFORNIA

William M. Laidlaw to be postmaster at Crockett, Calif., in place of Gertrude Brandon, deceased.

Ross C. Odell to be postmaster at Tulare, Calif., in place of W. D. Cartmill. Incumbent's commission expired August 30, 1926.

COLORADO

Roy McWilliams to be postmaster at Ault, Colo., in place of Roy McWilliams. Incumbent's commission expires March 13, 1928.

CONNECTICUT

Herbert E. Erwin to be postmaster at New Britain, Conn., in place of H. E. Erwin. Incumbent's commission expires March 12, 1928.

DELAWARE

James M. Montgomery to be postmaster at Edge Moor, Del., in place of J. M. Montgomery. Incumbent's commission expired March 7, 1928.

ILLINOIS

Arthur F. Sturgis to be postmaster at Middletown, Ill., in place of A. F. Sturgis. Incumbent's commission expires March 12, 1928.

Edward F. Tedens to be postmaster at Lemont, Ill., in place of E. F. Tedens. Incumbent's commission expires March 12, 1928.

Robert N. Bragg to be postmaster at Brimfield, Ill., in place of R. N. Bragg. Incumbent's commission expires March 12, 1928.

Rose S. Beard to be postmaster at Arenzville, Ill., in place of R. S. Beard. Incumbent's commission expires March 12, 1928.

INDIANA

John T. Stevenson to be postmaster at Kirklin, Ind., in place of J. T. Stevenson. Incumbent's commission expires March 12, 1928.

William G. McNeelan to be postmaster at Holton, Ind., in place of W. G. McNeelan. Incumbent's commission expires March 12, 1928.

Foster V. Annis to be postmaster at Bremen, Ind., in place of W. H. Berkheiser. Incumbent's commission expired January 3, 1928.

IOWA

Kenneth E. Lewis to be postmaster at Williamsburg, Iowa, in place of G. H. Leasure, deceased.

Edward E. Simpson to be postmaster at Nashua, Iowa, in place of E. E. Simpson. Incumbent's commission expired December 19, 1927.

KANSAS

James B. Pratt to be postmaster at Syracuse, Kans., in place of J. B. Pratt. Incumbent's commission expires March 13, 1928.

KENTUCKY

Fannie R. Williams to be postmaster at Pikeville, Ky., in place of Carl Young. Incumbent's commission expired January 17, 1928.

William C. Huddleston to be postmaster at Butler, Ky., in place of W. C. Huddleston. Incumbent's commission expires March 13, 1928.

LOUISIANA

Lillian D. Gayle to be postmaster at Independence, La., in place of L. D. Gayle. Incumbent's commission expired December 4, 1926.

Lavinia A. Parr to be postmaster at Baldwin, La., in place of L. A. Parr. Incumbent's commission expired February 15, 1928.

MAINE

Harry J. White to be postmaster at Jonesport, Me., in place of H. J. White. Incumbent's commission expires March 12, 1928.

MARYLAND

John W. Brittingham to be postmaster at Pittsville, Md., in place of J. W. Brittingham. Incumbent's commission expires March 14, 1928.

Harry A. Carroll to be postmaster at Havre de Grace, Md., in place of H. A. Carroll. Incumbent's commission expires March 12, 1928.

MASSACHUSETTS

Raymond H. Gould to be postmaster at Millers Falls, Mass., in place of R. H. Gould. Incumbent's commission expires March 12, 1928.

MICHIGAN

Arthur R. Gerow to be postmaster at Cheboygan, Mich., in place of A. R. Gerow. Incumbent's commission expires March 12, 1928.

MINNESOTA

Clara M. Hjertos to be postmaster at Middle River, Minn., in place of C. M. Hjertos. Incumbent's commission expires March 13, 1928.

Gay C. Huntley to be postmaster at Hill City, Minn., in place of G. C. Huntley. Incumbent's commission expires March 12, 1928.

MISSOURI

John S. McCrory to be postmaster at Linn Creek, Mo., in place of J. S. McCrory. Incumbent's commission expires March 14, 1928.

Walter L. Hert to be postmaster at California, Mo., in place of W. L. Hert. Incumbent's commission expires March 14, 1928.

Lawrence J. Caster to be postmaster at Blythedale, Mo., in place of L. J. Caster. Incumbent's commission expires March 14, 1928.

NEBRASKA

Charles W. Fritts to be postmaster at Crawford, Nebr., in place of C. W. Fritts. Incumbent's commission expires March 13, 1928.

NEW JERSEY

Byron M. Prugh to be postmaster at Westfield, N. J., in place of B. M. Prugh. Incumbent's commission expires March 12, 1928.

Laura B. Van Slyke to be postmaster at Avenel, N. J., in place of L. B. Van Slyke. Incumbent's commission expired January 31, 1928.

NEW YORK

Sidney S. Benham to be postmaster at Millbrook, N. Y., in place of F. W. Hallock, resigned.

Carl Gardner to be postmaster at Groveland, N. Y., in place of L. B. Gilbert, resigned.

Peter R. Carmichael to be postmaster at Caledonia, N. Y., in place of D. A. Scott, deceased.

Clayton J. Bannister to be postmaster at Westfield, N. Y., in place of C. J. Bannister. Incumbent's commission expires March 12, 1928.

Harry C. Holcomb to be postmaster at Portville, N. Y., in place of H. C. Holcomb. Incumbent's commission expires March 12, 1928.

NORTH CAROLINA

McForrest Cheek to be postmaster at Franklinville, N. C. Office became presidential July 1, 1927.

Jesse W. Wood to be postmaster at Littleton, N. C., in place of J. W. Wood. Incumbent's commission expires March 13, 1928.

OHIO

William E. Whitcomb to be postmaster at Perrysville, Ohio, in place of W. E. Whitcomb. Incumbent's commission expired December 19, 1927.

Charles H. Morrison to be postmaster at Hebron, Ohio, in place of C. H. Morrison. Incumbent's commission expires March 13, 1928.

Frank A. Brown to be postmaster at Batavia, Ohio, in place of F. A. Brown. Incumbent's commission expires March 12, 1928.

OKLAHOMA

Thomas H. Gillentine to be postmaster at Hollis, Okla., in place of J. W. White, resigned.

Bernice Pitman to be postmaster at Waukomis, Okla., in place of Bernice Pitman. Incumbent's commission expires March 12, 1928.

Margaret E. Williamson to be postmaster at Wanette, Okla., in place of M. E. Williamson. Incumbent's commission expires March 14, 1928.

William H. Jones to be postmaster at Kiefer, Okla., in place of W. H. Jones. Incumbent's commission expired January 14, 1928.

Ira A. Sessions to be postmaster at Grandfield, Okla., in place of I. A. Sessions. Incumbent's commission expired January 14, 1928.

PENNSYLVANIA

William Tyndall to be postmaster at Mount Joy, Pa., in place of J. W. Eshleman, deceased.

Marion C. Hemmig to be postmaster at Elverson, Pa., in place of M. C. Hemmig. Incumbent's commission expires March 14, 1928.

Ida E. Megargel to be postmaster at Canadensis, Pa., in place of I. E. Megargel. Incumbent's commission expires March 12, 1928.

TENNESSEE

Joe N. Wood to be postmaster at Ridgely, Tenn., in place of J. N. Wood. Incumbent's commission expired February 1, 1928.

Christine M. Meister to be postmaster at Loretto, Tenn., in place of C. M. Meister. Incumbent's commission expires March 13, 1928.

VERMONT

Robert A. Slater to be postmaster at South Royalton, Vt., in place of R. A. Slater. Incumbent's commission expires March 12, 1928.

Sanford A. Daniels to be postmaster at Brattleboro, Vt., in place of S. A. Daniels. Incumbent's commission expires March 12, 1928.

WASHINGTON

Mabel G. Lamm to be postmaster at Burlington, Wash., in place of M. G. Lamm. Incumbent's commission expires March 14, 1928.

WEST VIRGINIA

Edwin B. Hutchinson to be postmaster at Monaville, W. Va., in place of John Lindley, resigned.

WYOMING

John A. Stafford to be postmaster at Rock Springs, Wyo., in place of J. A. Stafford. Incumbent's commission expired December 19, 1927.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 12 (legislative day of March 6), 1928

COMMISSIONER OF IMMIGRATION

William M. Tuttle to be commissioner of immigration at the port of New Orleans, La.

COLLECTORS OF CUSTOMS

John C. Tulloch to be collector of customs, district No. 7, Ogdensburg, N. Y.

Russell H. Dunn to be collector of customs, district No. 21, Port Arthur, Tex.

PUBLIC HEALTH SERVICE

Leslie L. Lumsden to be senior surgeon.

Gregory J. Van Beeck to be passed assistant surgeon.

Franklin J. Halpin to be passed assistant surgeon.

JUDGE OF COURT OF CLAIMS

William Raymond Green to be judge of the Court of Claims of the United States.

POSTMASTERS

IDAHO

Arthur B. Bean, Pocatello.

Bennie B. Broadway, Summerton.

WASHINGTON

Francis H. Lester, Tieton.

HOUSE OF REPRESENTATIVES

MONDAY, *March 12, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Lord, Thou hast been our dwelling place in all generations. Before the mountains were brought forth, or ever Thou hast formed the earth and the world, even from everlasting to everlasting Thou art God. Listen more to our unuttered longings, which can not be expressed, than to our words. Forgive the poverty, the littleness, and the unwisdom of our lives. Make us strong, courageous, and willing to bear the truth. We acknowledge our dependence; spare us from the delusion of endeavoring to hide ourselves from Thee. In loving remembrance regard our Speaker, the Members, the officers, the pages, and the employees of the House. Bless us all with the mercy of grateful hearts. Amen.

The Journal of the proceedings of Saturday, March 10, and Sunday, March 11, 1928, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had agreed to the amendment of the House of Representatives to the amendment of the Senate No. 39 to the bill (H. R. 10286) entitled "An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes."

NATIONAL ORIGINS

Mr. DOUGLASS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DOUGLASS of Massachusetts. Mr. Speaker and Members of the House, recently President Coolidge, at the request of the Senate, submitted to that body the figures that will be proclaimed as the immigration quotas, to become operative 90 days after April 1, unless we promptly take action, as originally suggested by me in a bill introduced on May 7, 1926, and reintroduced on the first day of this session, repealing the so-called national-origins method of establishing quotas, as provided by section 11 of the immigration act of 1924.

A year ago a postponement of the operation of national-origins based quotas was affected, with the understanding that the interdepartmental committee, delegated by Congress to ascertain the quotas, would continue its exhaustive search and efforts to arrive at something like accurate, rational origin figures on which might be based the quotas.

The interdepartmental committee, consisting of the Secretary of State, the Secretary of Commerce, and the Secretary of Labor, appointed as its representatives to do this exacting work a committee of statistical and census experts. These latter, however, discovering that the job was impossible of performance by scientific procedure, since the necessary facts, census figures, and historical data are not available, instead of revamping their previously obtained figures after some sort of certain or fact-finding compilations that might justify their altering of the previously ridiculously inaccurate computations took it upon themselves to act in total disregard and flagrant violation of subdivision C of section 11 of the immigration act of 1924, by acting, by their own admissions, arbitrarily, in reducing and increasing certain of the quotas that will be made law shortly unless we act.

Imagine arbitrary guesswork being substituted for the clearly defined method that the act provided should be employed to establish these vitally important quota figures.

The previous quota figures were the result of at least some pretense of making an investigation of facts and census tables. True these were open to grave doubt as to their accuracy and worth because of the necessary uncertainty caused by the lack of anything like complete data on the subject of our population growth, but while the more intense proponents of the retention of national origins might have been justified in some degree in urging their adoption, it can not be rationally reasoned that the latest concoction of figures should be proclaimed as the quotas for the various foreign countries for the year commencing July 1, 1928.

In fairness to the gentlemen who had the task of revising the national origins figures as announced a year ago I will say that they were attempting to rectify the more ridiculous results

of the original computations, and at the same time meet some of the criticism that has resulted with the announcement of the quotas based on national origins.

It is apparent that the arbitrary action of the expert committee who reduced and raised certain of the quotas was calculated as a sort of "concession" to those countries which are most drastically discriminated against in favor of Great Britain and Ulster Ireland, since the latter's quota was reduced slightly while that of the Irish Free State and Scandinavian countries were given minor increases.

This "concession" does not in the least eliminate the fundamental objections to the obnoxious national-origins feature of the immigration act, which is based on pure guesswork but which by "strange" coincidence tremendously increases British immigration at the expense of all other foreign countries.

On every side opposition and agitation are manifest on the proposal to supplant the present reliable and workable method of establishing immigration quotas with the guesswork or national-origins plan.

We have it from the genial Commissioner General of Immigration, Hon. Harry E. Hull, in his latest annual report, as well as in those ever since the iniquitous national-origins scheme was attempted to be foisted upon us, that national origins as a method of fixing our immigration totals is intolerable, unworkable, and uncertain and should not be permitted to be made operative. Mr. Hull, in his reports, says:

> Subdivisions (b), (c), (d), and (e) of section 11 of the immigration act of 1924, under which the allotments will be determined according to national origins rather than by country of birth, should be rescinded. The advantages of the present method for administrative purposes are its simplicity and certainty and the further fact that it is well established by practice for more than five years, the allotments under the previous quota law having been thus ascertained.

Moreover, the Immigration Committee of the House just a year ago, after very considerable deliberation on the subject, reported out a bill to repeal the national-origins clause. The language of the committee indicated in no uncertain terms its opposition to the plan. Part of the report follows:

> That too much uncertainty exists as to the requirement of the law that "the President shall issue a proclamation on or before April 1, 1927," when read in conjunction with further provisions of the law. That the uncertainty will continue from year to year.
>
> That it seems far better to have immigration quotas for the purposes of restriction fixed in such a manner as to be easily explained and easily understood by all.
>
> The committee is of the opinion that the United States, having started on a policy of numerical restriction, the principle of which is well understood, that little will be gained by changing the method.

When Mr. Coolidge at the request of the Senate the other day submitted the latest array of proposed quota figures he plainly inferred his unwillingness to lend any sympathy to the whole mess by refraining from any comment on the report of the representatives of the three members of his Cabinet who prepared the compilation and sent it to the White House.

Gentlemen, many of the most rabid immigration restrictionists are frank to admit the ridiculousness of attempting to trace national origins and base quotas on them. All but those who seek nothing but the advantage Great Britain will enjoy in the matter of immigration by the putting into effect the national-origins method are now ready to repeal the racial-origins clause in our immigration act and to toss it into the scrap heap, where it belongs, it having been conclusively found to be nothing more than the irrelevent and mischievous scheme of the Anglomaniacs to exclude practically all but English immigrants from our shores, and thus guarantee a perpetuation of British influence, customs, and propaganda in this country.

If the national-origins clause of the immigration act of 1924 survives the present session of Congress, it will not be with the consent of those of us who are anxious to prevent the precipitation of sharp division between different elements in our population by "picking" or, rather, discriminating in the selection of our immigrants, so that eventually we once again will be but a colony of England's.

I am far from being for free and unlimited immigration at this time. I believe in sharp limitation as to the total number of eligibles in a given year, but the limitation to be so accomplished should serve the best practical results for the country as a whole.

Our immigration policy in at least one respect in addition to that under discussion is sorely in need of liberalizing to the extent that our immigration laws will not be violative of the fundamental laws of nature by preventing members of families to be reunited here in this country. Liberalizing our immigration laws so as to make their application humane is our duty.

True Americans value highly the Irish, Swedish, German, Jewish, Italian, and Norwegian element that is woven extensively into the fabric of our citizenship, along with other nationals of Europe, and are not unappreciative of the part these elements have played in the building of our Nation.

Immigration should be limited, but the limitation should be rationally accomplished if we are to serve best the economic, social, and political welfare of the country.

I warn my friends in this body that there has grown up throughout the length and breadth of these United States a tremendous agitation against this conspiracy to discriminate against certain of our foreign-born peoples in favor of Great Britain by the cunning of employing national origins as a method of fixing our immigration quotas. The citizens of this country who trace their ancestry to these countries that would be locked out in favor of Great Britain are going to display their resentment in such striking manner and numbers at the polls this fall that some of us will not be back here in the next Congress to assist President Al Smith restore this country to the plain people and to a state of law, order, and prosperity that will benefit the plain, every-day working man and woman unless we get busy and repeal the obnoxious, un-American national-origins clause.

EXPORTATION OF ARMS

The SPEAKER. Under the order of the House the gentleman from New York [Mr. FISH] is recognized for 10 minutes.

Mr. FISH. Mr. Speaker and gentlemen of the House, I want to make a brief statement to go into the RECORD and attempt to answer some of the letters and propaganda that the Members of the House have been receiving in the last few days in opposition to House Joint Resolution 183, introduced by the gentleman from Ohio [Mr. BURTON], which was reported unanimously by the Committee on Foreign Affairs.

Unfortunately the legislative representative of the American Legion here in Washington and some other members of the Legion, without consulting with the members of the Committee on Foreign Affairs of the House of Representatives who happen to be legionnaires, without asking their views as to that particular joint resolution, have issued signed statements and written letters to Members of Congress denouncing it and seeking to prevent its adoption.

It so happens that this resolution (H. J. Res. 183), which prohibits the exportation of private arms and munitions to belligerent nations except with the consent of the Congress, was considered most carefully and in detail by the Committee on Foreign Affairs, and we had more meetings on this particular resolution than on any other that has recently come before our committee. It so happens also that there are three members of the American Legion who are members of this committee, all of whom voted for the resolution, and not one of these members was consulted or asked into conference to express their views as to this legislation.

Mr. MORTON D. HULL. By any member of the Legion?

Mr. FISH. By any member of the Legion who issued the particular letters that the Members of Congress have been receiving during the last few days.

I want to make it very plain in the first instance that House Joint Resolution 183 was reported by the unanimous vote of the committee.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. FISH. Yes.

Mr. BLANTON. Your committee has 21 members, has it not?

Mr. FISH. Our committee is composed of 21 members, and the meetings were very well attended throughout; and as I said, there were more meetings on this legislation than were held in connection with any other resolution or bill that has come before the committee in a number of years.

Mr. BLANTON. Then with three members of the American Legion on the committee, and it being a unanimous report from 21 Congressmen, it was not a pacifist measure?

Mr. FISH. By no means. I want at this time merely to make a statement of facts and put into the RECORD just what H. J. Res. 183 seeks to do. We are asking the Congress to adopt a declaration of policy that the United States is opposed to the shipment of private arms or munitions to belligerent nations with which we are at peace except by the consent of the Congress.

I do not know of anything that is more likely to bring the United States into a foreign war than by permitting arms and munitions of all kinds to be exported to belligerent nations. As a matter of fact, the only nations that can receive munitions and arms from the United States in time of war are the

nations that control the sea. The smaller nations which do not have large navies are not likely to receive any munitions from this country, and therefore in the case of future wars, if we continue to export arms and become the slaughterhouse of the world, we will be exporting arms solely to the large nations which control the sea.

We are continually proclaiming our love of peace but, except for empty words and gestures, our constructive efforts are not impressive. We are in this resolution serving notice to the world that we propose to starve war and not babies. It is now 10 years since the armistice, and yet the United States has contributed except for the limitation of naval armament agreement of 1922 almost nothing at all.

We of the committee were unanimous in our belief that nothing could show our good will to more advantage and our desire for peace than if this resolution were adopted, declaring that we will in the future decline, except with the consent of Congress, to furnish munitions and arms for sake of profit to destroy human lives in countries with which we are at peace. We members of the Committee on Foreign Affairs of the House of Representatives hope that the Members of the House will not be led astray by any false propaganda to the effect that this is a pacifist measure. It is simply in line with American thought. Our people have higher ideals and are not in sympathy with making America the symbol of munitions and war. Any Congressman will find, when he goes home to his district and explains the purpose of this resolution to his people, that 90 per cent of them will be in favor of prohibiting the exportation of arms and munitions of war to these nations with which we are at peace. Our people will know which side to take between a step in the direction of peace and helping to make the world a shambles. The resolution specifically enumerates the different kind of arms, ammunition, and implements of war and does not include such commodities as foodstuffs, cotton, copper, oil, and so forth.

Mr. BLANTON. Will the gentleman yield?

Mr. FISH. Yes.

Mr. BLANTON. One great trouble is that our distinguished floor leader comes from a State the principal business of which is the manufacturing of arms to sell, and they insist on selling them to foreign countries.

Mr. FISH. I do not yield for any further debate on that question. I think the gentleman from Connecticut will vote according to his conscience on any question that comes before the House. [Applause.]

Mr. SPEAKS. Will the gentleman yield in order to have the RECORD straight?

Mr. FISH. Yes.

Mr. SPEAKS. Do the names attached to the letters referred to by the gentleman from New York constitute the national defense committee of the American Legion?

Mr. FISH. Yes; but the legislative committee of the Legion has not met on this question, nor has the committee on foreign affairs and world peace of the Legion, of which I happen to be a member, considered it. A small group, said to be the committee on national defense of the Legion and composed of one major general, two brigadier generals, a colonel, and a few others, have signed and sent letters to the Members of the House opposing this step forward for international peace and amity. But we members on the Committee on Foreign Affairs of the House of Representatives who are legionnaires decline to accept any such attitude as reflecting the views of the rank and file of the American Legion, as we believe that the Legion means what it says in its preamble when it states that its object is:

> To make right the matter of might and promote peace and good will in the world.

[Applause.]

Mr. COLE of Iowa. Will the gentleman yield?

Mr. FISH. I yield.

Mr. COLE of Iowa. Is it not true that the men who oppose this resolution are really distrusting Congress, because all we do is to leave it up to the action of Congress; and if Congress sees fit to permit the exportation of these arms to either one of the nations at war, that action can be taken? That is true, is it not?

Mr. FISH. I am afraid that these gentlemen who have signed these letters and sent them to the Members of Congress have not given careful consideration to the legislation. They do not realize that the Committee on Foreign Affairs has gone into this question in detail and that the proposed declaration of policy had the unanimous support of the committee, and, further, that even if this Resolution 183 is adopted, the Congress is empowered to permit the exportation of private arms and munitions at their own discretion by a majority vote. Therefore, as a legionnaire and as a Member of Congress, I want to say in defense of the Committee on Foreign Affairs that no legislation from that committee in the last seven years, since I have been a member of the committee, has been reported to the House with more consideration, and I hope the House itself will back up the unanimous report of the committee and in the meanwhile will study the legislation and agree with the committee that it is a step in the direction of peace and friendly relations with the world. [Applause.]

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. FISH. Yes.

Mr. DOUGLAS of Arizona. Did the committee obtain a report from the State Department?

Mr. FISH. The committee asked for no reports from the State Department because the Committee on Foreign Affairs feels that is a legislative matter for the Congress of the United States to determine, and they felt they were primarily competent to deal with it. [Applause.]

Mr. DOUGLAS of Arizona. Will the gentleman yield for another question?

Mr. FISH. I yield.

Mr. DOUGLAS of Arizona. Did the committee request a report from the War Department as to how the resolution might affect the policy of national defense?

Mr. FISH. No; it certainly did not ask for any report from the War Department, because the gentleman knows himself what kind of reports to expect from the War Department. [Applause.]

The SPEAKER. The time of the gentleman from New York has expired.

Mr. FISH. Mr. Speaker, I would like two additional minutes.

Mr. ANDREW. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to address the House for five minutes. Is there objection?

Mr. COLE of Iowa. Mr. Speaker, I ask unanimous consent that the gentleman from New York may have two additional minutes.

Mr. WHITE of Maine. Mr. Speaker, if there are to be any more of these requests, I shall have to object.

Mr. ANDREW. Mr. Speaker, did I not have the floor?

The SPEAKER. The gentleman asked for more time but the Chair did not hear him.

Mr. COLE of Iowa. Mr. Speaker, I ask unanimous consent that the gentleman from New York may have two additional minutes.

The SPEAKER. The gentleman from Iowa asks unanimous consent that the gentleman from New York may proceed for two additional minutes. Is there objection?

Mr. WHITE of Maine. Mr. Speaker, I am not going to object to the two additional minutes to be accorded to the gentleman from New York, but I am going to object to any further requests for time.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. FISH. Mr. Speaker, this resolution is more far-reaching than it would appear at first glance. It is one of the most important measures that will come before Congress during this session and is practically the only important contribution of Congress since the armistice to lessen the likelihood of another great war and of dragging us into it. Therefore I ask the Members of the House to study the report, read the resolution, and acquire all the facts they can upon this particular joint resolution. I for one feel that if we go ahead and pass this resolution it will put an end to all the talk in foreign countries that we are nothing but a slaughterhouse, willing at all times to sell munitions for the sake of profit, to destroy human lives. And what happens when we do sell munitions of war? Those countries that receive the munitions immediately say they are buying them at exorbitant prices and that we are profiteering on their misfortunes, while the nations against whom these munitions are used because they do not control the seas, hold our Government morally responsible, claiming that we are doing our best to destroy their people, and naturally they have nothing but bitterness and hostility toward us, which may eventuate in dragging us into almost any foreign war. Therefore, if we continue the policy of exporting munitions of war, we will be doing more to bring the United States into another war than anything we can do at the present time. [Applause.] If we prohibit it, it will be a constructive, useful, and worthwhile accomplishment in the direction of peace and good will between the United States and other nations. [Applause.]

The SPEAKER. The time of the gentleman from New York has again expired.

Mr. ANDREW. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

Mr. KING. Mr. Speaker, I object.

Mr. ANDREW. If the gentleman will withhold his objection a moment, I think we ought to have the right to answer what was said here. I have only asked for five minutes in order to try to explain to the House. I think we ought to have the chance to answer.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. KING. I object.

FEDERAL RADIO COMMISSION

Mr. WHITE of Maine. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2317, with Mr. CHINDBLOM in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. The Chair will state for information that there is 1 hour and 38 minutes of general debate remaining, of which the gentleman from Maine [Mr. WHITE] has 40 minutes, the gentleman from Tennessee [Mr. DAVIS] 20 minutes, the gentleman from Michigan [Mr. CLANCY] 30 minutes, and the gentleman from New York [Mr. CELLER] 8 minutes.

Mr. WHITE of Maine. Will the gentleman from Michigan utilize some of his time?

Mr. CLANCY. Mr. Chairman, I yield 10 minutes to the gentleman from Minnesota [Mr. NEWTON].

Mr. NEWTON. Mr. Chairman, I find myself in harmony with the general purposes of this legislation, which provides for extending the powers of the Radio Commission.

However, in the consideration of a subject of this character we ought to keep in mind a number of different things, not the least of which is this: It has only been 15 years that have elapsed since we passed our first radio regulatory measure, and it was only about six years ago when there was first established any radio broadcasting. I mention this to show the very rapid development of the radio and the broadcasting. In passing any regulatory legislation pertaining to an infant industry we ought always to so draft it, as to not circumscribe it or put barriers around it so that it can not properly develop.

Very wisely, in my judgment, in drafting the radio commission act, we vested the commission with a good deal of discretionary power. We can not foresee just where this radio development is going. In its infancy we ought to leave the commission broad discretionary power.

I think the committee in its endeavor to extend this legislation, and in its attempt possibly to correct some abuses, has made the mistake of making these provisions so inelastic as to cause not only embarrassment to the industry, but a great deal of dissatisfaction throughout the land wherever the radio is used. I refer to the amendment at the bottom of page 2, section 4.

Section 9 of the radio act in reference to the granting of licenses, contains this provision:

> In considering applications for licenses and renewals of licenses, when and in so far as there is a demand for the same, the licensing authority shall make such a distribution—

Now, here is the material proposition—

> shall make such a distribution of licenses, bands of frequency of wave lengths, periods of time for operation, and of power among the different States and communities, as to give fair, efficient, and equitable radio service to each of the same.

The present law does not seek to put this along certain definite and well-defined lines, but puts it up to the commission, the same as we do with the Interstate Commerce Commission in fixing a reasonable rate. In this language of the basic law the commission is told to so conduct itself as to provide for efficient and equitable distribution of stations, power, and so on.

The amendment that is before us changes this provision very materially, by providing that the licensing authority shall make an equal allocation to each of the five zones established in the act.

The five zone lines are, of course, merely arbitrary lines. They have no relation whatever to radio as such. They are arbitrary lines, and yet in this amendment the commission is told that they must make an equal allocation to each of the five zones. If we have, say, 600,000 watts, then each one of the zones will be allotted one-fifth, or 120,000 watts for distribution.

Mr. HUDSON. Will the gentleman yield?

Mr. NEWTON. Yes.

Mr. HUDSON. Would the gentleman wipe out the zones?

Mr. NEWTON. No.

Mr. HUDSON. The gentleman's contention, then, is based simply on the use of the word "equal"?

Mr. NEWTON. That is all. I would not wipe out the zones, because the zones serve a purpose in administration, distribution, and all that sort of thing. However, I would not hamstring the discretion of the commission to such extent that they have got to allocate equally among the zones.

Mr. HUDSON. If the gentleman will yield further, there is no point gained, in other words, in storing up in some zone unused allocations which the country needs at other places.

Mr. NEWTON. Not at all. If one zone does not want the power, their full number of stations, or wave lengths, we should not prevent other zones from using them.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. NEWTON. I will yield to the gentleman.

Mr. JOHNSON of Texas. The gentleman lives in zone 4, and zone 4 has 30 high-powered stations, whereas I live in zone 3, which has only 3 high-powered stations. Have I not cause for complaint?

Mr. NEWTON. It is possible the gentleman has cause for complaint, I do not know. I do know this, that if the gentleman's zone had wished for additional power in the first instance they could have applied for it and received it.

Mr. JOHNSON of Texas. In reply to the gentleman let me say that there has been applications made and have been refused—in Shreveport, La., for instance.

Mr. NEWTON. I do not think there has been the abuse of power that has been stated. There may have been mistakes. The commission has been in existence one year. The Senate has only confirmed one member. The commission has been operating under difficulties. We ought not to meet that situation with an attempt on the part of Congress to draw these lines in a fixed and arbitrary way and say that stations, wave lengths, and all of that have got to be allotted to these zones and only within the zones.

That might leave us in a great predicament. Suppose, for example, a particular zone does not use the amount that is allocated to it. When there comes the duty to renew the licenses then there must be a reallocating of stations, watts, power, wave lengths, and all that, and it seems to me you can make a pretty fair argument if your zone does not use what is allocated to it that there are other zones which will be cut down because there must be equal allocation in the use of power.

Mr. HUDSON. In other words, if this is carried into effect you are making retroactive legislation?

Mr. NEWTON. As to the licenses that have been granted, let me suggest this: The committee uses practically the same language for distribution within the zones as among the States in the existing law—"equitable distribution." If that is a good thing within the zone, why is not it a good thing in the country? Why one rule for zones and another within the zones? In other words, why make any change in the law? Furthermore, you say that an equitable distribution in the different States is to be made in proportion to the population and area. What is the use of counting acreage? The radio pays no attention to acreage.

Mr. WHITE of Maine. Will the gentleman yield?

Mr. NEWTON. I will yield to the gentleman from Maine.

Mr. WHITE of Maine. For the information of the gentleman and of the House generally, permit me to say that I am authorized by the committee to offer an amendment when we reach the section providing that the distribution shall be on the basis of the population—cutting out the area.

Mr. NEWTON. I am glad to know that the chairman has concluded to amend it in that respect. I hope by the time the debate is concluded that the committee will agree to recommend the further amendment that will take away the question of "equal allocation" and put it back where it belongs, to "equitable distribution."

Mr. CELLER. If the gentleman will yield, I am glad to hear that the gentleman from Maine has concluded to amend the bill with reference to the area. There still will be the inequality of the zones. You take the Pacific coast zone, and there

are about 5,000,000 people, whereas in zone 3 there are about 124,000,000 people, and in zone 2 about 25,000,00 people.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. CLANCY. I yield the gentleman three minutes more.

Mr. NEWTON. Here is the thing we are confronted with now. Here is a commission that has been handicapped in getting under way. One member, a very able man, had to quit because he could not afford to stay; for he could not afford to go without pay, and he had to leave. They have been under this handicap. Undoubtedly they have made mistakes; but we are dealing with a proposition in which millions of the people in the country are vitally interested. Every man, woman, and child that sits down to his receiving set wants to be able to get not only the music and program from the immediate locality—they enjoy that—but there is great pleasure in being able to contact with some stations thousands of miles away. When we set up purely arbitrary lines, it seems to me we are doing a thing that we ought not to do.

Mr. Chairman, if this amendment becomes a law as it is worded, Congress will further handicap and seriously interfere with proper radio regulation. If we require the commission under all circumstances to allocate equally within certain artificial and purely arbitrary lines we are very apt to bring the wrath of the radio receiver upon our heads. A thousand-watt station has a sending radius of about 75 miles. What service can such a station be to the lone receiver in the West, where we have magnificent distances. These folks enjoy the distant stations where the best of music can be secured for programs. Give the commission a chance to work out our theory of "equitable distribution."

I plead with the committee to hesitate before changing the present law and substituting this one of putting in these arbitrary lines. [Applause.]

Mr. WHITE of Maine. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. KADING].

Mr. KADING. Mr. Chairman and Members of the House, I am a new Member of Congress and, therefore, a new member of the Committee on Merchant Marine and Fisheries, which committee has had this radio legislation to continue the power and authority of the Radio Commission for another year under consideration. I shall not take up much of the time of the committee. I admit right now that I do not know all about this great art and force known as radio, and I hope that some of you, my colleagues, will admit that you are in my class in this respect. As a member of the committee I have learned considerable about this great radio question in the course of my participation in the examinations of the members of the Radio Commission and other parties interested who appeared before our committee in connection with this legislation.

The members of the Radio Commission were examined very carefully, and our committee, before reporting this bill, was quite generally satisfied that there ought to be no objection to continuing the life of the commission for another year; and there does not seem to be any general objection to such continuation by the Members of the House.

There is an important issue, however, in that there is objection to amending subdivision 2 of section 9 of the radio act of 1927, as recommended by our committee. The old section so proposed to be amended reads as follows:

SEC. 9. Subdivision 2: In considering applications for licenses and renewal of licenses when and in so far as there is a demand for the same, the licensing authority shall make such a distribution of licenses, bands of frequency, of wave lengths, periods of time for operation, and of power among the different States and communities as to give efficient and equitable radio service in each of the same.

A difference of opinion has arisen as to a proper construction of that section. Judge Sykes, the chairman of the Radio Commission, in the course of this examination before our committee said:

Now, there is some difference of opinion as to the construction of that particular clause of the act. A great many people for whose opinion I have the highest regard and respect, eminent lawyers, have this idea, as I understand, of that clause of the law—that if a State and a community in a State is getting good radio service from stations in other States, then that State and community are getting good radio service and, therefore, that State or community is being served and, as a State or community in a State, is not entitled to a radio station. That is not my opinion of this clause of the law. My opinion of that clause is it means it was put there to give to the States their pro rata quota of radio stations and to communities in States, and that has been my insistence as a member of the Federal Radio Commission on the construction of that section of the law.

Another member of the Radio Commission, Mr. Caldwell, differs with the chairman of the Radio Commission in construing such section of the law. Commissioner Caldwell, in the course of his examination, testified as follows:

Certainly, from the standpoint of giving purely radio service and good radio service to listeners; that is my understanding of the purpose of the law, and is the basis on which I have worked on the commission. I feel that both must be considered. There is a place for the comparatively high-powered station, and there is also a place for the local stations rendering a local service.

He continued later in his examination and said:

I believe it will be in the public interest to have four or five high-powered stations on the chain, widely distributed geographically. In other words, there is a proper use for the high-powered chain station on the air, one around Chicago, one in the Southwest, and perhaps one in the South, because this commission has undertaken through these chains to bring to every home in America a clear program, and as long as we have merely local stations such clear programs are impossible.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. KADING. I do not care to yield, as I have only a very limited time. I desire to call your attention again to the fact that a difference of opinion exists between the individual members of commission and also between eminent lawyers, some of whom represent broadcasting stations. Judge Sykes, the chairman of the Radio Commission, invited legislation to clarify this section. In answer to a question put by me to Commissioner Sykes at the hearing before our committee Mr. Sykes said, "Personally, I would be glad, of course, if Congress would clarify it"; further questions by Mr. Davis, of our committee, and answers by Commissioner Sykes were as follows:

Mr. DAVIS. In other words, your opinion is, naturally, even from the viewpoint of the commission itself, it is highly important for whatever statutory provisions are enacted for your guidance to be unambiguous and about which there can be no controversy or conflict of opinion?

Commissioner SYKES. I would be delighted, Judge, to see it set at rest.

Mr. DAVIS. I want to state I am in thorough accord with that and, so far as I am concerned, will undertake to effect that result.

Commissioner SYKES. I wish you would.

In view of that situation, the members of our committee deemed it advisable that they should put forth an honest effort with the idea of clarifying that section of the law so as to enable the Radio Commission to work better in the performance of their duty in connection with rendering service to all the people of the United States in connection with this great art. The committee considered the question of a change of language of such section very carefully. They discussed it. They agreed that it was hard to formulate language that probably would cover the situation exactly.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. KADING. No; I do not care to yield, as I have only a few minutes of my allotted time left. The committee, however, in their honest endeavor finally suggested that they would leave the matter of formulating the proper language clearing such section up to express the true intent of Congress when the law was enacted to Mr. WHITE, the chairman of our committee—a man who knows as much about this great radio question as any man that I know of, and to Mr. DAVIS, of our committee, a close second to Mr. WHITE, if not his equal, so far as radio knowledge is concerned, both of whom are honest, conscientious, and able, and who are actuated by an honest desire to advance this legislation fairly and squarely for the best interests of the great mass of the people. And these two men worked upon this thing.

I believe they had many conferences about the matter. They finally agreed upon language which the committee saw fit to report for the consideration of you gentlemen, and that language is the language contained in section 4 of this bill proposed as an amendment by the committee to the Senate bill passed by the Senate. The language of this amendment of said section 9, subdivision 2, is as follows:

The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

Our committee agreed to the wording of such amendment after Mr. WHITE and Mr. DAVIS had so finally prepared the same, excepting that a few members of our committee believed that the word equitable should have been used in the first line, instead of the word equal.

Now then, in view of the situation and in view of the honest effort given to this difficult matter by those gentlemen and our committee, I believe, my colleagues, that you will not make a mistake by following the recommendation of the committee. You should at least, in my opinion, give very serious consideration to this amendment as proposed by the committee, as it represents an effort for legislation in the best possible shape, for the best interests of the people.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. KADING. Mr. Chairman, may I have a few minutes more?

Mr. WHITE of Maine. I yield to the gentleman two additional minutes.

The CHAIRMAN. The gentleman from Wisconsin is recognized for two additional minutes.

Mr. KADING. Under the situation as it is, certain large high-powered stations are situated at certain large cities, and I believe you gentlemen will find the Representatives coming from the States containing those large cities in favor of legislation which will permit the high-powered stations to hold what they already have, and you will find them voting against this amendment with but few exceptions. I ask you in this connection to profit by the experience of the past, in that the people of the whole country have many times lost many advantages by reason of great conservation projects, such as water powers, oil fields, and other natural resources, that have easily drifted into the hands of monopoly due to ill-considered national and State legislation. The gentleman from New York [Mr. CELLER], in the debate on this bill last Saturday, said:

> Now, gentlemen, if I may give you an example, it is just like having a sort of large radio pie and endeavoring to divide that radio pie into five equal parts and to give a one-fifth equal part to each of the five radio zones, as it were. Suppose you sit down to a table and there are children and adults at that table. I am sure you would not be very likely to give an equal piece of pie to the child as you would to the adult

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. KADING. May I have two minutes more?

Mr. WHITE of Maine. I yield to the gentleman two minutes more.

Mr. KADING. There is the situation in a nutshell. The large monopolies and the high-powered stations in a few large cities, including New York, from which State Mr. CELLER comes, have the "pie," in that they have the high-powered and greater number of stations, and they can not see any justice in giving a part of that "pie" to anyone who is not at that pie counter, or to anyone who is not there but who might be entitled to a piece of it.

Mr. CELLER. Mr. Chairman, will the gentleman yield at that point?

Mr. KADING. No; my short time prevents me from yielding to the gentleman from New York.

This view of the situation, my colleagues, should cause you to sit up and take notice. Big business temporarily has possession of the "radio pie" and it proposes to keep it if possible, without properly sharing it with others who are entitled to share in it. These big interests are already claiming that they have vested rights in this great radio force, and we should be careful in our legislation not to enable them to try to base any further alleged claims upon any legislation upon this matter by Congress to the detriment of all the people that we represent, and, therefore, we should be careful not to pass any law the language of which would permit any such construction.

Now, then, the gentleman from Massachusetts [Mr. TREADWAY] also spoke against this amendment on Saturday, and he said, among other matters:

> I am not one of those scared by the talk of monopoly or big business. The people of this country to-day do not care a continental how radio comes to them or who is providing it for them, so long as they get it.
>
> As a listener-in and not as a scientific student of the subject I am convinced that the only way to get results is through the large stations. It is a favorite pastime of this House to talk about monopoly and big business, but big business, whether in the form of the corporations that have put large sums of money into the establishment of these stations or in the form of concerns that are buying the time of those stations and employing the highest-priced talent, is giving results to the people of the country, and that is what the people want.

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. KADING. Will the gentleman yield me one minute more for a conclusion?

Mr. WHITE of Maine. I yield to the gentleman one minute. I hope the gentleman will not ask for more.

The CHAIRMAN. The gentleman is recognized for one minute more.

Mr. KADING. The above quotation from Mr. TREADWAY'S speech gives you, in my opinion, another view of monopoly on this subject. Big business believes that the people should be satisfied with whatever it hands out to the people in the way of programs whether it be jazz music or advertising pink pellets for pale people.

I have no quarrel with big business. I am only calling your attention to the fact that I believe we should be alert in the performance of our duties as Representatives of the great mass of people who are not organized, who have no lobbyists, who have sent no telegrams to us, but who expect us as their Representatives to properly protect their interests.

Big business has able men in charge of their affairs, it has able attorneys, and it is working all the time in the interests of its business. While no charge seems to be made from "listeners in" at this time—not directly at least—who can say that it may not be the intention of monopoly to get and keep control of all of the high-powered stations as well as the manufacturing and selling of all the receiving sets, and then what is there to prevent them from tacking $25 onto the price of each receiving set that they sell by raising the price of such radio set and collecting a large toll from the purchasers of sets in a short time. In passing this amendment proposed by the committee, we are going just a little slow; we are demanding more equality in the distribution of this great power and are feeling our way forward in the administration of this great art.

In conclusion I want to say to my colleagues in all seriousness, acting as we should, in the interests of our constituents in the South and in the West and in the Central States, and in fairness to the people everywhere, that we will make no mistake by following the recommendations of the committee and pass this legislation. [Applause.]

Mr. WHITE of Maine. Mr. Chairman, will the gentleman from New York [Mr. CELLER] use some of his time?

Mr. CELLER. We have eight minutes. We believe the proponents of the bill should consume time now.

Mr. WHITE of Maine. There will be but one speech more on that side in favor of the bill, and one on this side.

Mr. CELLER. Yes. I think the proponents of the bill should continue.

Mr. CLANCY. Mr. Chairman, I yield one minute to the gentleman from Massachusetts.

Mr. GIFFORD. Mr. Chairman, through some of the members of the committee I am informed that the Associated Press of yesterday reported that I supported the amendment known as section 4 on Saturday although I strongly opposed it. I expressed a feeling of sympthy with those who favored the amendment because they feel something ought to be done; I could not possibly be construed as favoring the amendment. I do not like to be misrepresented in that way.

Mr. WHITE of Maine. Mr. Chairman, will the gentleman from New York now use some of his time? There is but one speech on this side in the affirmative, and I take it I have the privilege of closing the debate.

Mr. CELLER. Mr. Chairman, I yield four minutes to the gentleman from New York [Mr. GRIFFIN].

Mr. GRIFFIN. Mr. Chairman and colleagues, the hardest task of the human mind is to rid itself of tribal or sectional bias. I was sorry on Saturday to hear a little element of sectionalism introduced in this debate, and my chief purpose in rising here to-day is to give my personal assurance to my colleagues from all over the United States that, so far as New York is concerned, we are only too anxious to see that fair play is accorded to every section of this great country. I think that the complaint coming from zone 3—embracing the Southern States—is justified, but I do not think that the Davis amendment, as carried in section 4 of the bill before us, will give the desired relief.

The following table shows the inequality in the distribution of radio facilities. A mere glance shows that the complaint of the Southern States is well founded:

Comparison of radio stations and power in different zones

Zones (States included)	Population	Population (per cent)	Number of stations	Total station power in watts	Percentage of station power	Stations with over 1,000 watts
1. New England States and New York	24,378,131	22.73	138	213,055	35.30	10
2. Michigan, Ohio, West Virginia, Kentucky, and Pennsylvania	24,337,341	22.69	115	116,805	19.34	8
3. Southern States	24,826,050	23.14	102	47,105	7.80	4
4. Illinois, Indiana, Missouri, Iowa, Minnesota, North Dakota, South Dakota, and Kansas	24,492,986	22.83	215	164,870	27.31	30
5. Pacific States	9,213,720	8.59	131	61,785	10.24	8
Total	107,248,228	100	701	603,620	100	60

Of course this does not indicate that there has been any willful or unfair discrimination. The fact is that the radio industry has been an evolution and that broadcasting stations have been naturally first established in the large centers of population, where programs of interest could be conveniently arranged.

A great deal of capital has been invested in these stations, particularly in the first and fourth zones. Naturally the owners look with anxiety at any proposal which even slants toward the scrapping of these properties and investments.

It is contended that the word "shall" in the Davis amendment constitutes a mandate, and that under this construction the commissioners may very well assume that Congress has directed them forthwith to abolish the big stations in the large cities so as to reduce them to a parity of number and power apparently required under the terms of the bill. This is the whole controversy in a nutshell: Does "shall" mean "must"?

For my part, I can not see the necessity for a mandatory direction. All that we are trying to do—at least all that we should in fairness try to do—is to make it clear to the Radio Commissioners that the air should be free and that all the zones into which the country is divided should have equal opportunities and that no zone should secure a monopoly.

It is perfectly feasible to build up the broadcasting facilities in zone 3 without lessening or impairing those in the other zones. That is all we ought to try to do in this law. The proposed amendment threatens more, and it is to allay fears from such sources that I will offer an amendment at the proper time.

I simply want to remove from this amendment the obvious uncertainty and ambiguity of its language.

The best proof that section 4 of the bill is not clear is that the committee, in its report, undertook to defend it before it was attacked. They seemed to feel that it was vulnerable, for they take great pains to assure the House that it was not their intention to molest existing stations.

I want to present for your consideration at this moment an amendment which I intend to offer when this section of the bill is reached, and to set our attitude clearly before our friends from the other zones. I propose this in place of the language of section 4:

> Each of the five zones established in section 2 of this act shall be entitled to an equal allocation of broadcasting licenses, of wave lengths and of station power.

And while I am reading this I would like the attention of the gentleman in charge of the bill. I did not have a chance to consult with him in regard to this amendment but I hope he will take it under consideration. It accomplishes, perhaps, what you have in mind, and it takes out of the language its mandatory form and sets a rule of action or conduct for the commission to follow in the allocation of licenses, wave lengths and power. This is the amendment I submit:

> Each of the five zones established in section 2 of this act shall be entitled to an equal allocation of broadcasting licenses, of wave lengths, and of station power; and the licensing authority shall make a fair and equitable allocation among the different States, within each zone, so far as practicable in proportion to population and demand for service.

[Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. DAVIS. Mr. Chairman, I yield one minute to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, I am heartily in favor of the amendment that is to be offered by the gentleman from Tennessee [Mr. DAVIS]. It should carry by a substantial majority.

For some time, and especially during the last 60 days, I have been receiving numerous complaints, not only from my own district but from all over the State of Texas, protesting against discrimination accorded their section of the country. Many of the complaints come from farmers and stockmen living in rural communities. They are not at all satisfied with Commissioner Caldwell. And they do not understand that the House of Representatives has nothing to do with his appointment or his being retained as commissioner. That is a matter wholly with the President and the Senate of the United States.

But it is our duty here in the House of Representatives to see to it that this law is now properly framed, and now is the time, and here is the place, and we are the ones to properly frame it with wholesome provisions, so that no more discrimination may be shown, but that the people in every part of the country will be given a fair, square deal and get what is coming to them.

The radio monopoly is becoming the greatest in America. I warned against its growing encroachments several years ago. It has been charged several times, and never denied, that the Radio Corporation of America has been paying General Harbord a salary of $50,000 per year to run its business. And it will be remembered that during all of such time he has been retired from the United States Army, drawing a retired general's pay for life. If he is able mentally, physically, and otherwise to run this big business for the Radio Corporation of America and is worth $50,000 per year to them, he ought to be giving his time, energies, and talents to the Government, as it educated him and made him qualified to thus officiate.

And it will be remembered that after Admiral Bullard was appointed a radio commissioner at $10,000 per year it developed that he, too, was on the pay roll of the Radio Corporation of America at a tremendous salary, and he, too, was then drawing a retired admiral's pay for life, having been retired from the Navy, which had educated and trained him at Government expense.

And it has developed in this hearing that in addition to the salary of $10,000 per year Commissioner Caldwell receives from the people of this Government he admitted that he is also drawing $7,000 per year from the McGraw-Hill Co., which does a tremendous business annually with all radio dealers in the United States. Commissioner Caldwell's testimony in this respect, on page 195 of the printed hearings, should be read by everyone.

The testimony of Mr. Oswald F. Schuette, executive secretary of the Radio Protective Association, on page 274 of the printed hearings, shows that the assets of the corporations that make up the Radio Corporation and its constituency, the Radio Trust, is headed by the American Telephone & Telegraph Co., with assets on December 31, 1926, of $1,841,102,088; the General Electric Co., with assets of $428,328,764; the Westinghouse Electric Co., with assets of $226,961,520; the United Fruit Corporation, with assets of $203,821,287; and the Radio Corporation of America, with assets of $61,976,432, making total assets of $2,762,190,091. And it will be remembered that the General Electric Co. is the parent-he-mogul of the great Power Trust, now seeking to get control of all of the water power and public utilities in America. This is one giant monopoly that must be watched and curbed by law.

I wish, Mr. Chairman and gentlemen, that I had the time to discuss this bill at length. It is a measure concerning which every citizen in the United States is vitally affected. We must protect the people in their inherent rights and must see that they are not trampled upon by giant trusts, combinations, and monopolies.

Mr. CLANCY. Mr. Chairman, I yield two minutes to the gentleman from Ohio [Mr. BRAND].

Mr. BRAND of Ohio. Mr. Chairman and members of the committee, I am on this committee and I have never been able to agree to the amendment offered by my colleague from Tennessee [Mr. DAVIS]. The entire question resolves itself about the word "equal" and the word "equitable." The country is divided into five zones and this amendment arranges an equal distribution of the power, and so forth, and in the old law, as we passed it, it was arranged for an equitable distribution. To my mind you never have the need in Ohio, for instance, of the power, and so forth, that they need in New York. You will never have the need in Mr. DAVIS's territory in Tennessee that you have in New York. I would say that you never can divide this power and the other things that are to be divided equally over the United States.

Now, another thing. You do not want them divided equally, because here is the peculiar thing about it: The territory that has the great power is at a disadvantage. For instance, the use of the radio is not as satisfactory in Washington, where they have great power, as it is out in my home in Urbana, Ohio, where we have none. We can get anything from anywhere in the center of Ohio, while here in Washington you have only Washington to hear; and the same applies to New York.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. DAVIS. Mr. Chairman, I yield myself the remainder of my time, 19 minutes.

Mr. ABERNETHY. Mr. Chairman, I think I shall suggest that there is not a quorum present.

Mr. DAVIS. I do not want the gentleman to do that. I would like to have as large a hearing as possible; but I would rather the gentleman would not make the point.

Mr. ABERNETHY. I withdraw it, Mr. Chairman.

Mr. DAVIS. Mr. Chairman and members of the committee, this is a very important matter and one about which there seems to be a great deal of misunderstanding. The controversial feature of the pending bill is the equalization amendment, and that is a perfectly simple and a perfectly fair proposition.

I am surprised that the Representatives of the people, or at least some of them, shy at equality under our Government. If there is anything that is supposed to be basic under our Constitution and our institutions, it is that there shall be equality of opportunity and of governmental rights.

In the last Congress the Committee on the Merchant Marine and Fisheries reported to the House a bill for the regulation of radio. Conceiving at that time that there was a very unfair, inequitable, unbalanced, and unscientific distribution of broadcasting privileges, the committee reported without question, and the House passed without question, so far as that provision was concerned, a distribution clause which was very similar to the one now under discussion. When this bill went to conference the distribution clause was changed in its phraseology, and in my discussion of that matter when the conference report was under consideration in the House I called attention to the change and stated that it was ambiguous and that two different constructions could be placed upon it. Other conferees and Members disagreed with me, but my prediction came true literally.

When the committee was holding hearings on the present bill it appeared there were two interpretations placed upon this provision by members of the Radio Commission, one of them, the commissioner from New York, Mr. Caldwell, taking the position it was a compliance with the law for equitable service to be rendered to the various States and sections of this country even though it be done by far-away stations in other sections and in other States and without the States or sections thus served (?) having any broadcasting stations.

The committee in reporting this bill conceived the idea that the distribution clause in the present law should be clarified, and, in fact, members of the commission themselves said that they would like to see it amended and clarified. So there resulted this amendment.

Various and specious arguments have been advanced against it. People suggest change in phraseology. Perfectly frankly, we have made the language or have undertaken to make it so clear and so unambiguous that there can be no misunderstanding and no misinterpretation. We want an amendment that can not be misunderstood and so we say that is necessary, especially if it is to be administered by the present commission. The present commission has not carried into effect the existing equitable distribution clause, because under the spirit of it they should have made a fair and equitable distribution among the different sections of the country; they have not only not done that, but I charge, and the records show, that they have affirmatively violated that provision, because when this law went into effect the first zone and New York City had far beyond their quota, and in this connection I want to state that every State in the first zone except New York is below its quota on a division of the present national power. And yet the commission has favored New York more than all other States and sections.

The excuse first proposed by this commission was that they could not initiate licenses; that they had to act upon applications; and they said this particularly with respect to the third zone.

Now, what are the facts? We had them file with the committee—and they are in the committee hearings, pages 41 to 51—records of applications for new licenses and the action thereon; applications upon the part of existing stations for increased power and the action on that. Now, what do these records show with respect to the class which I have just mentioned? They show that in the first zone—this is under the administration of the commission—there were 22 station applications for increased power. The power requested was 89,655, and the power granted was 81,905, and of the 81,000 granted, 60,500 of it was in New York. Without taking the time to give the applications of this kind for the other four zones, I will state that the other four zones in his country had 55 applications for 185,650-watt power, and they were granted by this commission a total of only 45,110. In other words, the other four zones in this country applied for more than twice as much power as did the first zone, and yet the first zone was granted nearly twice as much increased power as all the other four zones combined; or putting it differently, the city of New York, according to these figures, was granted 15,000 more watts than was granted all the other 47 States in the Union. These figures do not include applications denied or not acted upon.

Now, if this is equitable distribution, make the most of it.

Mr. O'CONNELL and Mr. CELLER rose.

Mr. DAVIS. I yield to the gentleman from New York for a question.

Mr. O'CONNELL. I will say to the gentleman that we have a case right adjoining my district where a man for a year has been trying to get an increase and has not been paid any attention to at all.

Mr. DAVIS. Not all of them have got an increase, but I have given the aggregate of the increases made.

Mr. KINCHELOE. Will the gentleman yield there?

Mr. DAVIS. Gentlemen, I have many things I would like to state, and I think I will cover a good many points that you have in mind if you will give me the opportunity.

Mr. CELLER. I yielded to the gentleman on Saturday and I hope the gentleman will yield to me.

Mr. DAVIS. I yield to the gentleman.

Mr. CELLER. Will the gentleman tell the members of the committee whether or not he feels that the population is the test in the various zones, or the radio population applied to the States?

Mr. DAVIS. Well, suppose you put it on that ground. There is little difference whether you put it on the total population or on the radio population. The first zone, that is given 37 per cent of the total national power in all the zones, has only 24.2 per cent of the receiving sets. The second zone has only 17.68 per cent of the national power and has 21 per cent of the receiving sets. The third zone has but little more than one-fifth of the station power held by the first zone and yet has 16 per cent of the receiving sets in the entire Nation and the largest population of any zone. As a matter of fact, the people in the southern zone have manifested a remarkable interest in purchasing as many receiving sets as they have, in view of the intolerable conditions under which they have suffered. If accorded proper treatment, there will be a large and immediate increase in the purchase of receiving sets in the third zone. I have a letter from a radio dealer in my State, stating that radio reception is so bad that he does not sell one-fourth as many sets as he did a year or so ago; that the people are trying to sell their sets.

The fourth zone has more receiving sets than the first zone, but much less power. So you can put it on either ground you please.

Mr. LAGUARDIA. Is it not wrong in principle?

Mr. DAVIS. I think so. We are living in a democracy, and I submit that 25,000,000 citizens in one section are entitled to just as much consideration as 25,000,000 residing anywhere else. [Applause.]

Mr. KINCHELOE. Two and a half million people in my State get only two broadcasting stations, with low power——

Mr. DAVIS. Oh, I have put official data into the RECORD showing the greatest sort of discrimination. If you do not increase the present aggregate national power, all sections of the country will be favored with an increase except about four States, and two of these barely have their quota. I want to say that I have nothing against the great city of New York. It is a great city, and we want to get their programs. We want to keep in touch with them, but we insist that they should not have all the cream. I know that the most of the citizens of that great city will join the gentleman from New York [Mr. GRIFFIN] when he says that they do not want to "hog" any more than they are entitled to. I have numerous letters from citizens of New York commending this equalization amendment and complaining of the congested conditions there.

The argument that the adoption of this amendment, designed to insure a fair distribution of broadcasting licenses, wave lengths, and station power, would result in injury to the broadcasting situation, particularly the listening public in the New York City area, is wholly unfounded. Those opposing this equalization clause, led by the Radio Corporation of America

and its affiliated interests, persistently disseminate the false statement that the station power in all the other zones under the provisions of this amendment would be reduced to the power now allocated to the zone with the lowest power. The amendment directs no such thing; nobody wants that done, and surely not even the present commission would be foolish enough to so administer the provision. The amendment authorizes and directs an equalization between the zones and a fair and equitable allocation within each zone in proportion to population. It is a perfectly fair and simple proposition.

The station power allotted to all the zones now amounts to about 600,000 watts. There would certainly be no good reason for reducing this power. It could well be increased.

If the first zone, with only 3.63 per cent of the total geographical area, can absorb 223,000, or 36.98 per cent of the power, surely the other zones with so much greater geographical area could absorb as much power much more easily. Consequently if the Radio Commission desires to continue the present amount of power in the first zone and the people therein are satisfied with the present condition they need not reduce the power in the first zone, but increase the power in the other zones. However, the commissioners have repeatedly stated that there should be reductions in the congested areas, and probably the course which would and should be pursued would be that a fair equalization would be brought about by both increases and reductions—that would be a matter of administration to be worked out by the commission.

As a matter of fact, the listeners in the highly congested areas are suffering more than anybody else. They can satisfactorily hear only a few of their very high-powered stations and no outside stations.

However, those in the neglected areas are only asking for a square deal for their sections. They want an opportunity to have some of their own stations with good wave lengths and adequate power so that they can hear them, as well as hear the New York stations. They would also like for the listeners in New York City to hear outside stations when they desire to do so.

The matter of a fair and equitable allocation of broadcasting privileges throughout the country is not an "intricate and technical matter." It is a matter of national interest and right and involves a legislative policy. The pending amendment is not destructive but constructive. It does not undertake to tear down or to injure the broadcast structure, but to improve and build it up. To give the balance of the country outside of New York City and Chicago an equal deal in radio does not involve an injury to the broadcasting situation in those cities.

The discrimination is not so much due to favoritism to cities or a section as it is due to class favoritism discrimination. What are the circumstances? We have in this country an iron-clad radio monopoly according to the report and the charge of the Federal Trade Commission in a complaint now pending. This monopoly has more than one-third of all the station power in the country. They have the choicest wave lengths. Together with the affiliated stations they have 327,000-watt power as compared to 600,000 for all the balance of more than 600 stations.

Mr. GRIFFIN. Will the gentleman yield?

Mr. DAVIS. I will yield.

Mr. GRIFFIN. Every one of us will concede that all the zones are entitled to equality. I do not think you will find anybody opposing you on that, but we ask you to confine yourself to the phraseology of the amendment and let us know whether there is any danger in that phraseology in connection with the increase arbitrarily of power in the administration of the bill.

Mr. DAVIS. The existing law divides the country into five zones by States. The first four zones are substantially equal in population, the zone I have the honor to represent being the largest of any of them. The fifth zone embraces the Pacific coast and Mountain States, and although it has much less population than the other zones yet it has nearly 50 per cent of the geographical area of the country, and in addition that great section is divided by the Rocky Mountains, which constitute a serious static impediment.

We felt when we enacted the law in the last Congress that the fifth zone was entitled to as much consideration as the other four zones. So we treated them on an equal basis. Consequently, this amendment provides that there shall be an equal allocation between the different zones established in the act, and that there shall be a fair and equitable distribution among the States within a zone according to population. The zones are equal, but the States are unequal in population as well as area, and you could not apply the same yardstick to all the States. The distinguished gentleman from New York [Mr. GRIFFIN] candidly admits that there should be equality and equal division, but he differs with me as to the phraseology employed in order to bring it about. I say, it is a simple proposition. It is workable. It is fair. It is American.

Mr. CELLER rose.

Mr. DAVIS. Oh, they argue, and the gentleman from New York [Mr. CELLER] in his speech repeated the old threadbare argument that the southern zone and other sections were backward, that they were at fault because they did not have any more, and following that he inserted in the RECORD a list of stations to which he said he was advised by members of the commission they had tentatively agreed to grant an increase of power to in the southern zone, and that list which he inserted in the RECORD shows that in the 17 stations they have tentatively agreed to grant an increase of 33,710 watts, and in the list of applications for new licenses which he said they had tentatively agreed to grant there were 4,810 additional watts. That that does not include requests for a large amount of additional power which they have not yet acted upon. In other words, instead of your having to wait, as the gentleman from New York feared, until the South and the other sections of this country catch up with their applications, I say that formal applications are on file to raise the southern zone to a parity with the other zones, on the basis of the present national power. And the same is true in the second zone, which is below its quota, and in the fifth zone, as shown in the hearings, and much of which I have put into the RECORD; and that does not include hundreds of informal applications which the commission said have been made, but which they discouraged so much that the applicants did not follow them up with formal applications.

As evidence of the demand from other sections, here is a list of some of the existing stations which have requested increased power, but which requests have either been denied or are still pending:

	Present power	Power requested	Action
Second zone: WTAM—Willard Battery, Cleveland, Ohio.	3,500	20,000	Pending.
Third zone:			
WBAW—Waldrum Drug Co., Nashville, Tenn.	500	10,000	Do.
KFJF—National Radio Manufacturing Co., Oklahoma City, Okla.	750	15,000	Do.
KWKH—W. K. Henderson, Shreveport, La.	1,000	10,000	Do.
Fourth zone:			
WTMJ—Milwaukee Journal, Milwaukee, Wis.	1,000	5,000	1,000.
WMBH—Edwin Dudley Aber, Joplin, Mo.	100	10,000	1,000.
KTNT—Norman Baker, Muscatine, Iowa.	2,000	14,000	1,000.
WJJD—Loyal Order of Moose, Mooseheart, Ill.	1,000	20,000	1,000.
WAMD—Radisson Radio Corporation, Minneapolis, Minn.	500	40,000	500.

[1] Samuel Insull's company was granted a permit to construct a 50,000-watt station with studio at Chicago.

Mr. CELLER. Mr. Chairman, will the gentleman yield for a question?

Mr. DAVIS. Yes.

Mr. CELLER. The gentleman apparently does not want to leave this matter in the discretion of the commission.

Mr. DAVIS. Just a question.

Mr. CELLER. Yet in the second part of the amendment discretion is left to the commission to allocate the States within the zones. You do not tie the hands of the commission within the zones.

Mr. DAVIS. If you are in favor of giving them discretion on everything, why do you quarrel about the provision of our amendment that gives them discretion in part?

Why all of this allocation of power in a small area? What is the situation, and why this tremendous drive, this tremendous propaganda, sent all over this country against this perfectly fair amendment? I will tell you why it is and where it hits. It hits the Radio Corporation of America and its affiliated companies.

They have not only been given more than a third of the power but choice wave lengths, and so forth, for broadcasting, but in commercial radio they have been granted seven times as much as all other stations combined, and the same is practically true with respect to experimental licenses. They and their associates have the whole radio field there tied up. They have been favored beyond measure by this commission, and what has it meant to the Radio Corporation of America? [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. DAVIS. Under leave granted I extend my remarks as follows:

When the Federal Radio Commission went into office the common stock of the Radio Corporation of America was selling at about $52 per share. It is now selling for about $122 per share. This is an increase in market value of about 135 per cent under the benign administration of the Radio Commission. According to a recent report, in addition to its preferred stock, the Radio Corporation of America is capitalized at 1,155,400 shares of common stock—nonpar. Consequently, the common stock during this period has increased more than $80,000,000, not to speak of the increase in the preferred stock.

Since I delivered this speech the stock of the Radio Corporation of America has continued to advance, and to-day, March 17, sold for about $140 per share.

Some two or three years ago the Radio Corporation of America placed the transmitter of its station WJZ at Bound Brook, N. J., and began broadcasting on 50,000-watt power. It created such havoc with New Jersey broadcasting stations and with receiving sets that there was widespread and indignant protest. City councils passed resolutions of protest. The Legislature of New Jersey adopted a resolution declaring station WJZ an "intolerable nuisance" and directed the attorney general of the State to take appropriate steps in the matter, and the legislature also urged upon Congress to enact appropriate legislation to prevent the operation of this and similar stations.

During this controversy David Sarnoff, vice president and general manager of the Radio Corporation of America, was quoted in the New York Times, in part, as follows:

> Greater * * * power allows the station to ask and receive greater returns for the sale of time on the air. * * * The business of advertising on the air is becoming better established and is on a firmer basis than ever before.

Although the protests against station WJZ of the Radio Corporation of America raged during the fall of 1925 and winter of 1925–26 and numerous appeals were made to the Department of Commerce and the Congress, yet the citizens and officials of New Jersey were unable to effect the removal or substantial reduction in the power of said station. During the controversy officials of the Radio Corporation asserted that the interference complained of was due to the use of obsolete receiving sets. Yet at that time this corporation was urging its dealers to press the sale of its own obsolete receiving sets, as shown by the following letter:

OCTOBER 16, 1925.

To prospective RCA authorized dealers:

GENTLEMEN: The new RCE selective-dealer plan has received generous commendation from radio dealers throughout the country. The proposed method of selecting Radiola merchants is universally acclaimed as being fair. The only misgiving that has been expressed is whether radio dealers entitled to the RCA franchise might possibly be overlooked in the final selection.

DEALER REQUIREMENTS UNDER THE NEW RADIOLA PLAN

If you will refer to our Bulletin No. 1 describing the RCA dealer plan, you will find the process of selection is clean and unequivocal. * * *

Sales volume, as set forth above, will be one of the factors governing our selection of "authorized RCA dealers" on and after January 3, 1926; but mere volume, in itself, will not be the determining factor in judging the dealer's eligibility to represent RCA. It is necessary to make this distinction at this time of year, because "sales volume" might be easily attained merely by meeting the natural consumer demand for the new RCA models. The best indication of the dealer's ability to aggressively push the sale of RCA products will be found in the record of his sales on standard items which may temporarily meet with a certain amount of sales resistance.

Speaking with the utmost frankness, the best proof that dealers can present to RCA that they should be selected as Radiola merchants will be found in our records of their ability to develop a sales movement on the Radiola III family; i. e., Radiola III, Radiola III–A, and Radiola balanced amplifier. Dealers who make marked progress in moving these instruments to the public, even though their total sales volume may be below those whose sales are mainly on the new RCA models, will be particularly eligible for selection, because in so doing they have demonstrated their ability to do a "selling job."

* * * * * * *

From time to time I shall appreciate receiving personally a brief note from you direct, posting me on the progress you are making in the sale of the Radiola III group. Not only will I personally read these letters, but they will be attached to the records of this office as supporting data in Radio Corporation of America's selection of authorized dealers on the basis of volume, credit, and service.

* * * * * * *

The cooperation which dealers throughout the Nation have extended to us has been a source of gratification. We ask for its continuance, and we in turn will reciprocate to the extent humanly possible.

Very cordially,

E. E. BUCHER,
General Sales Manager.

We are reminded of the fulsome claims in behalf of the alleged benevolent development of radio by the Radio Corporation of America.

Broadcasting stations operating for hire and profit have been most favored. It is claimed that they must charge for advertising in order to make an income. The Radio Commission, in accordance with a request made at the hearings, filed a list of stations which sell time and those who do not sell time, or otherwise advertise; and they also filed a list of stations whose policy in this respect is not known. These lists appear on pages 258 to 269 of the recent hearings of the Committee on Merchant Marine and Fisheries. It appears that there are 190 broadcasting stations which operate for profit by selling time—broadcasting advertising; 323 broadcasting stations do not sell time or transmit advertising, and the policy of 170 stations is not known.

HIGH-POWERED STATIONS

As a matter of fact, there is no need for such station power as 50,000 or 30,000 watts.

In his testimony at the hearings, pages 104 to 107, Commissioner Caldwell, who is the strongest advocate among the members of the commission of high station power, stated that different powered stations could transmit a consistent, satisfactory program at all times, as follows:

	Miles
500-watt station	15 or 20
1,000-watt station	25 or 30
5,000-watt station	50 or 75
50,000-watt station	100 to 150

Commissioner Caldwell testified as follows:

> Experience has shown that no station gets out with any consistent and good service more than 100 or 150 miles, regardless of how much power is put back of it. In other words, the limit is not the amount of power you put back of the station but the fading which takes place, which may take place at 150 miles or it may take place as close as 60 miles.

It will be noted that the relative increase of radius is very slight compared with the increase of power, especially above 5,000-watt power. That is because a 5,000-watt station reaches practically out to the fading point.

However, the high-powered stations play havoc with other stations. The higher the power the more blanketing interference and heterodyning is produced.

Commissioner Caldwell further testified:

> Our experience with these 50-kilowatt (50,000-watt) stations has been that they cause such interference with both sides of them that they render those channels practically useless, and I think we should go slowly in granting this increased power (p. 111).

And yet he objects seriously to interfering with the high-powered monopoly stations. (Hearings, pp. 176, 177.)

Commissioner Pickard testified that 90 per cent of the stations in this country are now heterodyned.

It must be remembered that the ether waves set in motion by a broadcasting transmitter extend ten times as far as the audible program.

High-powered stations are not needed for local reception. Neither are they needed for chain programs, which are sent over wires to the different stations and then broadcast from the different chain stations.

These chain stations—some 57 in one chain—serve the entire country with programs broadcast from station WEAF, New York. For this purpose it is not necessary or advantageous for any of these stations to have over 5,000-watt power, and, generally speaking, 500 or 1,000 watt power is sufficient. And yet there are on this chain three 50,000-watt stations and one 30,000-watt station, all belonging to the same group and in close proximity to each other.

No broadcasting station should be authorized to use over 10,000 watts or 20,000 at the very outside.

PIONEER BROADCASTING STATIONS

We are hearing much about the rights of so-called pioneer stations. It is urged by those opposing the equalization amendment and defending the high-powered monopoly stations that these stations have been pioneers in the development of radio; that they have "vested rights" in the air which can not and should not be disturbed. It is further claimed that broadcasting privileges and high-powered stations are largely concen-

trated in the small area in the eastern section of the United States, notably New York, because that section has been more active in seeking licenses and power, while other sections, particularly the South and the West, have been backward in pressing their claims.

These claims are not founded upon fact. What are the real facts?

Some of these stations were among the first licensees, but there were other stations as early as theirs, not only in the eastern zone, but scattered throughout the country. Many independent stations were established and licensed prior to some of those now given cleared wave lengths and high power and who are posing as pioneer stations.

The first broadcasting stations established and licensed were in the fall of 1921. These stations were designated as commercial land stations, later termed "limited-power" stations, and eventually listed as broadcasting stations. According to the official records, there were seven of such stations on January 1, 1922, as follows:

WCJ, New Haven, Conn.: A. C. Gilbert & Co, 360 meters for broadcasting; 300 and 600 meters for other purposes.

WDY, Roselle Park, N. J.: Radio Corporation of America, 360 meters.

WBZ, Springfield, Mass.: Westinghouse E. & M. Manufacturing Co., 360 meters.

WBL, Detroit, Mich.: Detroit News, 360 meters.

KQL, Los Angeles, Calif.: Arno A. Kluge, 360 meters.

WJX, New York City, N. Y.: De Forest Radio Telephone & Telegraph Co., 360 meters.

KYW, Chicago, Ill.: Westinghouse Electric & Manufacturing Co., 360 meters.

The number of broadcasting stations increased materially after January 1, 1922.

The Official Radio Service Bulletin, issued by the Department of Commerce in April, 1922, contains a list of licensed broadcasting stations up to April 15, 1922, there being 186 of such stations, divided among the different States, and in the present zones, as follows:

FIRST ZONE

State:	Stations
Maine	1
Massachusetts	4
Connecticut	2
New Jersey	7
Maryland	1
District of Columbia	6
New York	12
Total	33

SECOND ZONE

State:	
Pennsylvania	12
Virginia	1
West Virginia	3
Ohio	13
Michigan	5
Total	34

THIRD ZONE

State:	
North Carolina	1
Georgia	2
Alabama	2
Tennessee	2
Arkansas	2
Louisiana	3
Texas	5
Oklahoma	2
Total	19

FOURTH ZONE

State:	
Indiana	5
Illinois	7
Wisconsin	2
Minnesota	4
Iowa	2
Nebraska	2
Kansas	6
Missouri	9
Total	37

FIFTH ZONE

State:	
Wyoming	1
Colorado	3
New Mexico	2
Washington	10
Oregon	6
California	40
Hawaii	1
Total	63
Grand total	186

It will be noted that at that time there were more licensed broadcasting stations in the second, fourth, and fifth zones than in the first zone, and 19 broadcasting stations in the third zone, as compared with 33 in the first zone, notwithstanding the persistent unfair argument that the third zone is even now a "child in broadcasting" and is backward in asking broadcasting privileges.

Mr. CELLER. Mr. Chairman, I yield four minutes to the gentleman from New York [Mr. BOYLAN].

Mr. BOYLAN. Mr. Chairman and gentlemen of the House, the Radio Commission has had only one year in which to dispose of the immense amount of work that has been put before it. I think it would be very poor policy to circumscribe their work by the adoption of the amendment in the bill before us. Much money has been spent in the large cities for the erection and installation of radio plants, and that was done long before the Radio Commission was empowered to act on the distribution of wave lengths. These men in the large cities were the pioneers. They were willing to put their money in and take a chance as beginners in a new field, but now, through this proposed amendment, you come along and want to scrap millions of dollars that have been expended in and about the large cities in broadcasting stations.

Mr. GRIFFIN. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. BOYLAN. I have only four minutes. Wait until I make a few remarks. I deprecate the effort to array the country against the cities. The country needs the large cities and the cities need the country. We in the large cities are willing to vote for almost anything the other sections of the country want. We vote for reclamation, we vote for irrigation, to exterminate the corn borer and the boll weevil.

Mr. KVALE. And for farm relief?

Mr. BOYLAN. We will vote for farm relief when the farmers agree on a bill, and we are willing to vote for flood control, and although we have had floods in northern New York and other sections of the North and East, we do not ask that part of the appropriations be allocated to us.

We welcome talent from all over the United States, and we afford them the opportunity to demonstrate their ability. Only a few weeks ago a distinguished young lady from the State of the gentleman, Mr. DAVIS, who has just taken his seat, a fair daughter of the Southland, Miss Grace Moore, came to New York from Tennessee and there made her debut at the Metropolitan Opera House. We gladly entered into the enthusiasm of her people and we gloried in her success, because it meant the success of an American girl and because it afforded the people in the great city of New York an opportunity to hear her, and the city of New York afforded her an opportunity for a display of her talents. We welcomed another young lady from the West, Miss Marion Talley, and we rejoiced in her success. We are glad that she made good, and that the great city gave her an opportunity to make good. We also welcomed a young lady from Missouri, Miss Telva. We were keen in her success. We joined with her people in rejoicing over her achievements, and we were glad to give the wonderful music-loving population of the great city of New York and the radio population of the country an opportunity to participate in those concerts and to give these young women the emoluments that were justly theirs after long years of study.

You say that the cities control the large power stations. The cities do not put any control over the air radius; the broadcasters spend their money freely in providing interesting and instructive programs. No charge of any kind is made for the excellent services rendered.

Anyone can tune in on these programs. We do not limit them to our own State. The whole United States is welcome to hear the talent broadcast by the stations in the great city of New York. [Applause.]

Do not, then, by the passage of this bill destroy the excellent broadcasting stations developed in the large cities at great cost and expense.

The cities are willing to spend the money necessary to provide the highest type of amusement and instruction. Why take away from them allocated wave lengths and assign them to zones where, perhaps, there would be no need or demand for them? The radio has a great future. Do not attempt to circumscribe its usefulness by provincial legislation. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CLANCY. Mr. Chairman, I yield to myself the balance of my time.

Mr. Chairman, I favor that portion of this bill which extends the life of the Federal Radio Commission another year, but I am strongly opposed to section 4 of this bill, which provides for

an equal allocation to each of the five zones of broadcasting licenses, of wave lengths, and of station power.

It is true that the present radio situation in this country is unsatisfactory, but this drastic and destructive equal allocation provision will not remedy the situation. Moreover it certainly fearfully damages radio, and I honestly believe that the members of the Radio Commission and practically all the experts of the radio industry are correct when they say this provision will wreck radio.

The present law is sufficient to work out satisfactory relief to the third zone which is making practically all the complaint. The present law provides for a distribution which will "give fair, efficient, and equitable radio service to each" of the zones. What words could be stronger or more compelling than "fair, efficient, and equitable"?

I was opposed to this fourth section from the very beginning. I pointed out to members of the committee defects which were most startling and most dangerous. After the bill was reported I asked for executive sessions of the committee to continue consideration of this vicious section.

FURTHER CONSIDERATION MADE NECESSARY

The distinguished chairman of our committee, Mr. WHITE of Maine, was most courteous in granting my request for executive sessions and we held four of them on this section after it was reported to the House. The committee then realized that the section considered only States and omitted the District of Columbia, Territories, and possessions of the United States. Therefore, unless amended, the section would have disfranchised over a million American citizens living in the District of Columbia, Territories, and possessions, of their radio rights. It also would have junked and destroyed the radio stations in Washington, the Territories, and possessions, and these amount to a large investment.

This plain injustice only serves to show the slipshod manner and inconsiderate treatment which the committee has given this tremendously important matter.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. CLANCY. I regret I can not yield.

Mr. McKEOWN. The District of Columbia was omitted in the original act.

AREA AS A BASIS RIDICULOUS

Mr. CLANCY. Now, the bill when reported, and which you have before you at present, contained another serious defect. It provides for distribution of licenses, power, and so forth, in proportion to population and area. The word "area" constituted the defect and damaging principle. The aim was to use vast areas practically uninhabitable as a partial basis of awarding licenses. Such areas would include Death Valley, the deserts of Arizona and New Mexico, the "bad lands" of the Northwestern States, the Rocky Mountains, and even the 600,000 square miles of Alaska as a partial basis of awarding service to human beings.

It was a new and startling method of allocating, something novel in political theory and science. After three sessions the committee, realizing that according to the rules of the House it could not get back into committee this absurd section, agreed to submit to the House after the debate a committee amendment correcting the two monstrous defects, and undoubtedly at the proper time our distinguished chairman will present the amendment.

But, gentlemen, remember that if I had not asked for executive sessions and insisted upon some sort of reconsideration, the committee would have asked you to accept this wild and fantastic amendment uncorrected. And remember that the favorable report which accompanied the bill to the floor painted this vicious section in rosy colors and did not warn you of its startling defects.

SUBCOMMITTEE REPORT IS REJECTED

These defects are only two evidences of the hasty and careless manner in which this section has been drawn and presented. The committee's subcommittee on radio, of which Mr. ROWBOTTOM, of Indiana, was chairman, originally reported against this fourth section and said it should not be included in the bill, but in spite of that the committee went ahead and incorporated the section.

Another startling feature in the legislative history of this section is that there were no hearings on it. The committee did have some general hearings, on radio, but not on the subject of equal allocation of licenses, wave lengths, and station power.

NO HEARINGS IS UNJUST

Equal allocation is a radical departure from the purpose of the present law. It dramatically and completely changes the present law, and yet there were no hearings on it. I demanded hearings after the subcommittee report on radio was rejected, but was told I could not have them.

I did not then fully understand what disaster the section in question would work to radio, and the great majority of the members of the committee were just as ignorant on the probable effect as I was. But since then I have learned a great deal more of the iniquity in this section.

Now, I maintain that it was a plain injustice to the committee and to the House not to have hearings and get the testimony of experts on the effect of equal allocation. No member of a committee should be expected to vote on such a tremendously important question without being given a chance to get all available information on the subject.

It is also an injustice to the membership of the House that they can not get any printed hearings on the highly technical question of "equal allocation." For the past few days a newspaper controversy has raged on this subject, but the information gained thereby is not so reliable or so complete as that gained by calm, orderly hearings, with an opportunity for cross-examination of experts.

I have been told by scores of Members that they do not satisfactorily understand the radio controversy in general and this section in particular. There were very few Members in the House listening to the debate Saturday afternoon.

The only safe course to pursue when not fully understanding a radical change in the basic law affecting an important industry, as is the case on this section, must be to vote against it, and give time for further consideration for hearings. Then a law can be drawn up which will be the result of due and mature consideration. I want to make it very clear that I understand there were general hearings on the subject of radio but it is also true that no hearings were held on this section 4 and what its language would do to the radio industry. I maintain our committee membership, and therefore the House, did not get hearings with the testimony of radio experts explaining just what equal allocation of licenses, wave lengths, and station power for 90 days would do to radio.

Now, I also maintain it was unfair and unjust to the radio industry as a whole not to have hearings so that the American citizens, who have millions of dollars invested in stations and in receiving instruments, could give their opinion. Radio after all belongs to the people as a whole, and they are entitled to be heard.

Certainly also the Federal radio commissioners should have been allowed to tell how unworkable this proposed law would be. They are the ones who will have to bear the burden of the grief and anxiety of trying to enforce a bad law.

GENERAL SHAKE-UP AND SHAKE-DOWN EVERY 90 DAYS

I don't believe many of our committee realized that this law provides and makes it mandatory, too, that there shall be a general drastic shake-up of the entire radio industry every 90 days, for none of these broadcasting licenses are good for more than 90 days.

I think the House in general will be startled to learn that this section provides that there shall be an equal allocation every 90 days of licenses, wave lengths, and power. There can not be any fooling about it. The commission must get at it and whittle down some zones and build up at least one zone so that there are an equal number of licenses, and so forth, in each zone.

Every 90 days the whole mess is thrown on the table of the Federal radio commissioners and they arbitrarily, numerically, mechanically, and mathematically begin to cut and hack.

If a station goes out of business in any zone, if it goes bankrupt or is burned down, then a station or stations must be put out of business in each of the four other zones so that there is an equal allocation of licenses, wave lengths, and of station power.

This section compels just that or it does not compel anything. Can you contemplate anything more monstrous than that, anything more unjust, more unfair to American business men and the great common people who want to hear from certain stations?

CAN NOT HAVE EQUAL NUMBER OF LICENSES

Now, consider another weird provision in this section. It calls for an equal allocation to each zone of licenses, wave lengths, and of station power. Now, here is where this section so hastily drawn piles up too much language. If it had only called for an equal allocation of wave lengths and of station power, the commission might have worked out something satisfactory and complied fairly well with the wording of the section.

But when you say the number of licenses also must be equal in the five zones, then you include a mathematical and mechanical impossibility, for you all know that each station does not ask for the same power, for the same number of watts—one may want 500 watts and another may need 1,000 watts, and again two licenses may share the same wave length.

Mr. O'CONNELL. Mr. Chairman, will the gentleman yield?
Mr. CLANCY. Yes.
Mr. O'CONNELL. If the bill is as rotten as that, why should it be before us at all?
Mr. CLANCY. I will say to the gentleman that the committee, the majority of the committee, were rather ashamed of the way this measure came out, and they would just as lief have it forgotten.

WHY NOT EQUALLY ALLOCATE ALL INDUSTRIES?

Now, gentlemen, if this wonderful principle of "equal allocation" is going to be a panacea for radio and treat all zones of the country fairly, why not try it on other industries? Why not use its marvelous healing powers more generally?

Everybody knows that industries, means of communication and transportation, and Government services are more centered in the North and East and Middle West than they are in the southern and far western sections of the country.

If the proponents of this section are logical and sincere, they will present a bill to force the Interstate Commerce Commission to divide up the railroads of the country into the five zones, and they should do it every 90 days.

They will also present a bill to force the Federal Trade Commission to arbitrarily divide up the Western Union and Postal Telegraph Cos. into five equal zones and every 90 days, and particularly they must do that to the moving-picture industry and to the newspaper industry, for the movies and the newspapers influence people and may be suspected of propaganda. They also advertise American products and sell American goods and help American industry and promote American prosperity.

Why not zone the newspapers, big and little, and particularly cut down the circulation of the great newspapers of New York City, Chicago, Pittsburgh, Detroit, and other large cities? If they domicile in the big cities, surely they must be wicked and un-American.

NO DISCRIMINATION AGAINST SOUTH

Now, gentlemen, I certainly have no desire to discriminate against the South in the distribution of radio, and I do not believe there is any member of our committee who wants to discriminate against the South in radio or in any other respect. In fact, one or two of the southern members of our committee have been kind enough to say that the committee as a whole wants to help them solve their radio problem.

I do not have much faith in the statements that the Federal Radio Commission has discriminated against the South. I can quote the best authority in the country on that question, and that man is Commissioner E. O. Sykes, of Mississippi, who is acting chairman of the Federal Radio Commission. He represents the southern zone on the commission, and he says flatly in a recent letter to Senator KENNETH MCKELLAR, of Tennessee:

WHAT THE SOUTHERN COMMISSIONER SAYS

There is no discrimination against our section by the Federal Radio Commission; on the contrary, I find the other members quite sympathetic with our needs, and believe that my recommendations, or practically all of them, for increases in power will be granted.

Mr. DAVIS. Will the gentleman yield?
Mr. CLANCY. Yes.
Mr. DAVIS. The fact that he takes that position in the face of the record which his commission has filed with the committee shows that the people can not rely upon him to protect their interests unless we give specific direction to that effect.

Mr. CLANCY. I will say to the gentleman from Tennessee that if he wishes to impeach Judge Sykes, then he must impeach Senator HUBERT STEPHENS and Senator PAT HARRISON, who recommended him and who had him reconfirmed. He must impeach every southern Senator who was willing and anxious to have him confirmed. He must impeach Mr. ABERNETHY, who indorsed Judge Sykes on Saturday, and he must impeach the two gentlemen from Mississippi, whose constituent he formerly was, Mr. RANKIN and Mr. COLLIER, and he must criticize Mr. BLAND, of Virginia, who praised Sykes.

Now, who is Commissioner Sykes? He was a justice of the State Supreme Court of Mississippi for nine years, and is now 52 years old. He comes from an ancient English Cavalier family which settled in Virginia in the early colonial days, and gained the distinction of being an F. F. V. His grandfather was killed in the Civil War by General Grant's men at the Battle of Fort Donelson. He was fighting on the southern side. So was the father of Commissioner Sykes in the Civil War, and he was wounded three times in action.

Now, that is the kind of southern stock that Judge Sykes comes from. He was appointed to the Federal Radio Commission through Senators HUBERT STEPHENS and PAT HARRISON. The gentleman from Virginia [Mr. BLAND] paid him a personal tribute here on Saturday, and other distinguished southerners did also.

Recently he was confirmed with the assistance and consent of all the southern Senators. He enjoys the honor and distinction of being the only member of the commission who has been confirmed, and he has been on the commission since it was formed. He appeared before our committee for several days and I am sure he impressed practically all our members as a fair, honorable, intelligent, and patriotic man.

ARE SOUTHERN MEMBERS OF CONGRESS TRAITORS

Yet he has been roundly abused as a traitor to his zone and to the Southland by an unscrupulous broadcaster in Louisiana, but if Commissioner Sykes is a traitor to the Southland it naturally follows that our colleagues here and in the Senate who believe in Sykes are wrong.

Judge Sykes has also been criticized as a "me-too" man who did not stand boldly for the South and as one who was dominated by another member of the commission, but as a matter of fact Judge Sykes has often opposed this very commissioner; and as a trained judge and a man of strong convictions he is not a "me-too" man, and was never known as such during his nine years on the Mississippi bench.

Now, he says further in his letter of February 28, 1928, to Senator MCKELLAR, and which is printed in the CONGRESSIONAL RECORD of March 7, 1928, on page 4351:

With reference more particularly to the third or southern zone, the Federal Radio Commission during its existence has increased the power of a great many stations in this zone, and has a number of applications for increase in power, which I have recommended, and which I think will be granted just as soon as a majority of the commission has been confirmed by the Senate.

Our people in the South, because of lack of large cities, financial backing, etc., have not been in a position to ask for very great increases in power. For instance, the most powerful stations we have at the present time have only 5,000 watts. These stations are satisfied with that power. I have personally taken the matter up with a number of good stations in the South, and recommended to them that they request increases in power in order to serve our part of the country, and have gotten some responses to this appeal.

PICKARD IS NO COWARD

I have heard Members on this floor denounce the members of the Radio Commission, and yet my investigations, particularly of Judge Sykes and Commissioner Pickard convince me they are able, fair-minded, and honorable men. I was informed that Commissioner Pickard has been called a coward in the Halls of Congress.

Why, gentlemen, he gained a great reputation as a hero in the World War, and he is the last man in the world to deserve the epithet of "coward." He flew his airplane across the German lines and was wounded in battle within the enemy lines. He is dearly beloved by many of the leaders of the American Legion and widely respected as a brave, brainy man. These men of the American Legion particularly resent the unbridled abuse that is being heaped on Commissioner Pickard. He could swing them into action for him with telling results, but he has been too modest and too much a gentleman to answer the attacks so unfairly made on him.

Give the Radio Commission a fair, fighting chance. Do not hamper them further with this absurd legislation, and they will make good.

Radio is too precious a gift to mankind to be toyed with by new legislation of this character. I have seen it grow from the very humblest beginnings.

RADIO PRECIOUS AND GROWING

About 25 years ago, according to my recollection, I remember advising with a friend of mine, Robert Oakman, a prominent citizen of Detroit, to get financial aid for a struggling inventor who was working on radio. We went to John F. Dodge, the multimillionaire automobile manufacturer and former partner of Henry Ford, and Dodge gave the inventor $2,500 to buy food and the necessities of life while he worked on radio, and promised him more if necessary. The result was the first radio in Detroit, Clark's wireless, as I recall it.

Detroit was also the first city in the country to have the vision and the public spirit to establish a regular broadcasting service and that was done by the Detroit News. This newspaper hired a whole symphony orchestra to delight the farmer and the far-distant citizen who had never, in many cases, heard a symphony orchestra.

So you can see from these instances of the hungry inventor and the first American broadcasting service that radio has come up like all great American industries and all grand blessings to

mankind, through hunger and suffering and service and benevolence and enterprise.

In Heaven's name do not injure or wreck radio while in the throes of a legislative brainstorm.

I stood on the floor of this House four years ago when the appropriation for the United States air mail was knocked out, and it could only have been done because the Members did not understand aviation. But now we have had the investigations of Col. William Mitchell; we have had Lindbergh's flights, and there is not a Member who dares now to talk against commercial aviation. The United States air mail was assassinated on the floor of this House, and that was the service in which Lindbergh was trained. When Lindbergh was here the other day, in hiding for two nights after he had flown here through the night from St. Louis, he told about his approach to the city of Washington. He said that when he came within sight of Washington a great light lighted up the sky. He wondered whether it was Washington. It was red, it turned green, and then it turned yellow, and he finally realized it was the morning star. He said it was beautiful and was mysterious. Then I took some satisfaction in the fact that if I had not fought, to the best of my ability, for the United States Air Mail Service—and I was assisted in that fight by the gentleman from Tennessee [Mr. BYRNS]—probably we would not have had any Lindbergh. And radio is as beautiful and mysterious and as full of hope to struggling humanity and a darkened world as the morning star!

Now, in God's name, give radio a chance. Give it a chance to develop its Lindberghs. Do not take this hasty and ill-considered action.

A WILD DEPARTURE

This amendment is a radical departure from the purpose of the present law. Congress, by the language in the present law, undertook to insure, as far as possible, equitable radio service to the listening public in every section of the country. The right to operate a broadcasting station depended on the wishes of the listening public.

The amendment asserts an entirely different theory as a basis for granting a broadcast license. The proposed amendment requires that each zone shall have an equal number of stations, an equal amount of power, and an equal number of waves or channels. The citizens of each zone have no choice. They must take these stations, power, and waves, and the power of each of the zones must be equalized every 90 days, which is the license period specified by this amendment. The unavoidable result will be that the uniform number of stations, power, and waves will be controlled by the zone having the least number of stations, power, and waves. It can not be otherwise because the law will require an equality, and there is nothing in the law which permits the forcing of an increase in number of stations or the power to be used. The number can be decreased or power decreased but not increased. This means that four of the five zones must be cut in stations and power.

CHARGE AGAINST PUBLIC INTEREST

The desires or the will of the listening public in any zone is not a factor to be considered in determining the number of broadcast stations they shall have. The ability to obtain acceptable material for a continuous broadcast program is not a factor which can be considered. Each zone must have an equality of stations, power, and waves. The question now before Congress is not hard to understand. If the listening public is more anxious to have a broadcasting station located in their community than it is in the character of program it receives, then they should favor the amendment, because it provides for equal number of stations; but if the public is more anxious to have a variety of good programs from stations capable of getting material and talent to make a good program, then the public should oppose this amendment. They must choose, because they can not have both if this amendment becomes a law.

ONE-THIRD OF THE PEOPLE LOSE RADIO

Members of Congress who favor this amendment will argue that it gives to each section of the country an equality of stations, power, and waves and such an arrangement will not interfere with the reception of distant stations. All it will do is to cut down the number of the distant stations in order that you may have your own local radio stations, the same as the people in the larger centers. This sounds attractive, but not a single Congressman who takes this position ever operated a broadcasting station in his life, knows comparatively little of the practical side of broadcasting, and his promise is the mere guess and hope of an uninformed person as to what will happen if his scheme is tried. On the other side, you have the radio engineer and operators of stations who have had years of practical experience, who state that the amendment will not produce any of the results claimed by the proponents. They insist that the amendment requiring an equal distribution of stations, power, and waves will destroy all radio receptions for at least one-third of all the people who now own receiving sets and will prevent 50 per cent of the entire population of the country from receiving any station more than 75 miles away from their homes. Figure out how many stations you now receive which are located more than 75 miles from your home and you have the answer to what the proposed amendment will do to your radio reception.

CONGRESS PARTLY TO BLAME

Members of Congress who favor this amendment are pointing to the present condition of radio as an argument why Congress should do something to improve it, but they fail to tell you that the radio chaos of 1926 and 1927 was caused by a mistake which Congress made in the radio law of 1912. They also fail or deliberately refuse to tell you that the present bad condition was at least partially caused by another mistake of Congress in creating a Federal Radio Commission and then failing to give them any help or money to employ the necessary help and that the members of the commission have been working without salary.

Someone said that two wrongs never make a right, and one might inquire from Congress how three mistakes can improve two mistakes. This amendment was inserted without any advice from experts or hearings to determine what it would do, and this amendment was the product of unadulterated wishes and not wisdom.

BIG STATIONS INJURED

The proponents of the amendment assert that it will diminish the power and the number of stations in certain sections, such as New York, Chicago, and so forth. They positively assert that it will cut the power of KDKA at Pittsburgh; WEAF at New York; WJZ at Bound Brook, N. J.; WGN at Chicago; WOR at Newark; and many other outstanding stations who have millions of listeners. The Federal Radio Commission gets more complaints from listeners if KDKA of Pittsburgh does not come through clear than from any other station.

This means that millions of people throughout the country will not be able to get any of the larger stations which may have been their favorities. It means that millions of listeners who have enjoyed the remarkable talent of Chicago, New York, and the other large cities must give up this luxury and accept the local talent of their respective communities. Congress is about to legislate that millions of listeners can not in the future have the programs from Chicago, New York, and so forth. Because they are bad? No; just because a few Members of Congress feel they are doing a great public service by giving to each section of the country exactly the same number of broadcasting stations.

Many of these sections have always had the opportunity to get and have a broadcasting station, but they do not want one because they prefer to get their entertainment from a large city where there is an abundance of talent. They prefer to go to the theaters in New York, Chicago, Cincinnati, and so forth. They prefer to listen to the remarkable metropolitan orchestras led by such peerless musicians as Walter Damrosch, and so forth. But Congress says, "No; hereafter you must build your own theaters; you must import into your own communities the metropolitan orchestras."

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. WHITE of Maine. Mr. Chairman, may I inquire as to the time remaining?

The CHAIRMAN. All time has expired except that assigned to the gentleman from Maine, who has 25 minutes remaining.

Mr. WHITE of Maine. Mr. Chairman, I yield myself the balance of the time.

Mr. Chairman, I join with the last speaker in giving assurance to the House and to the committee that some of the Members of the House have little knowledge of existing law, have little knowledge of the present situation with respect to radio; that they know little of the hearings that took place in the committee; that they know little of the purpose or of the effect of this amendment, but I deny that is true generally of our committee members. At this time I state to you men, members of this committee, there were hearings held. They occupied 12 days of time and they are represented here in this volume [indicating], and a very substantial portion of the time of the 12 days was devoted to the consideration of the particular matter now engaging the attention of the House.

Mr. CLANCY. Will the gentleman yield?

Mr. WHITE of Maine. No; I beg the gentleman's pardon. I have much to say, or at least I think I have, and I want to go on in my own time.

Now, may it please the members of the committee, I want in the first instance to tell you something of the matters other than this amendment of section 9 that are in this legislation.

This is a Senate bill. It involves in the first instance an extension of the original jurisdiction of this commission for one year's time. The original act, the existing law of 1927, gave the Radio Commission original jurisdiction for one year, and thereafter made of it an appellate body only. The first section of this bill extends that original jurisdiction for one year from the 16th of this month.

The second section of the Senate bill provides, it seems to me, in an entirely logical way, for the salaries of these members for the additional year.

The third section of the Senate bill sought to change the tenure of office of these commissioners fixed by the original law at two years, three years, four years, and so forth; and to provide that the existing commissioners should have a tenure of but a single year and that at the end of that year the commissioners then appointed should have their terms of office fixed as by existing law. The House committee was against this suggestion, believing it to be aimed primarily at the present members of the commission, believing also that if these commissioners were improper persons to perform the duties of this office the remedy of the other body was by a rejection of their nomination and not by this change in the tenure of office.

The fourth section of the bill is the amendment which now engages your thought.

There has been much misapprehension as to what the terms of existing law are. There has been reference to this law as providing that there shall be equitable service throughout the different sections of the country, and this is the only thing you have heard said about existing law; but this is not all there is in the present law.

The particular section of the law which we seek here to amend has in it three principles, and first and dominant, I should say, is the principle of equitable service. But equitable service to whom?

Why, gentlemen, read the language of the law, and it is perfectly obvious that this equitable service is not to the people of one section of this country alone, but it is all the States and all the communities of this country. [Applause.]

How is this to be brought about? Gentlemen, the very letter of the law points out how this equitable service is to be attained. It is to be accomplished by a distribution of licenses, of stations, of wave lengths, and of power among the different States and the communities thereof; it is to be brought about—get this—by a distribution among the States and among the communities thereof. This is the way this equitable distribution was to be brought about.

Now, gentlemen, has this been done? Let me point out to you the situation which confronts the country and which was in the minds of the members of this committee when we undertook to legislate or to recommend legislation upon this subject.

Mr. TUCKER. This distribution is by the commission?

Mr. WHITE of Maine. The distribution is by the commission.

Let me take this up in three or four different ways.

Take it in its general aspect and see what you have with respect to an equitable distribution among the States and communities thereof. The law set up five zones. Those zones are almost equal in population. What do you find when you analyze the figures? Here is the third zone, comprising, I may say, the Southern States of this Nation, extending from North Carolina down along the Atlantic seaboard, following the Gulf and taking in the great empire State of Texas, with a population of almost 25,000,000 people, and we find they have the smallest number of stations allocated to any of the zones. If you look at it in terms of power, that zone, with 23.14 per cent of the population of the United States, has less than 8 per cent of the power allocated to the United States. First in population, least in number of stations, with less than 8 per cent of power allocated to the people of the rest of the United States! Who can say with respect to this situation that there is an equitable distribution among the States and among the communities of this Nation? [Applause.]

Take the fifth zone; that is the zone that takes in the great Rocky Mountain area. It takes in the Pacific coast and has an area approximately of 1,775,000 square miles. With approximately one-half of the whole United States in area, it only has 10.2 per cent of the power allocated within the United States. That vast empire stretching from the eastern foothills of the Rocky Mountains through to the coast, taking in the Territory of Alaska, taking in the Hawaiian Islands, has half the area of the United States, and only 10 per cent of the power allocated within the United States.

Take my own first zone. In area it has less than one twenty-fifth of the area of this fifth zone, and it has 36 per cent of all the power allocated within the United States. Then talk to me about equal distribution among the States and communities thereof. [Applause.]

Take the first zone again and see what exists with respect to it and other parts of the country. All New England with 1,000,000 more people than the State of Illinois has 26 less stations than the single State of Illinois, and only a little more than one-third of the power of that single State. New England with a million more population than the entire State of Illinois has less stations within her territory than are allocated to the city of Chicago alone. And you talk to me about equal distribution. [Applause.]

Within the first zone what do we find? Taking the State of New York alone—and I am speaking only of the first zone—the State of New York alone in the first zone has 72 per cent of power of that zone while the adjoining State of Connecticut has one-tenth of 1 per cent of the power—72 per cent in New York, and one-tenth of 1 per cent for Connecticut. Talk to me about equal distribution. [Applause.]

Go to the second zone and what do you find? Take Kentucky, with one-third the population of the State of Pennsylvania. It has one-fifteenth the number of stations of Pennsylvania, and there has been accorded to it one-fiftieth of the power accorded to the State of Pennsylvania.

Take West Virginia, with one-sixth of the population of the State of Pennsylvania, and it has one-fifteenth of the number of stations accorded Pennsylvania, and has one one-hundred-and-fiftieth of the power allocated to the State of Pennsylvania. The State of Pennsylvania, speaking in terms of power has substantially the same power accorded to it that is given the entire fifth zone.

Go to the next zone. Take Indiana for illustration. With 500,000 more population than Iowa, it has seven less stations than Iowa and one-quarter of the power.

I see the gentleman from Wisconsin before me. The State of Wisconsin, with one-third of the population of the State of Illinois, has one-fourteenth of the power accorded to the State of Illinois. It has not a single station in excess of 1,000 watts, while Illinois has 13 stations with 1,000 watts or more. I ask the gentleman from Wisconsin if he considers that an equitable distribution among the States?

Take Kansas, with 500,000 more population than Nebraska and one-half the number of stations that Nebraska has, and I ask the committee if they call that an equitable distribution. I do not.

Go to the southern zone and what do you find? Here is the State of Georgia with approximately 3,000,000 people, with five stations with 1,950-watt power, while the State of New Jersey—and this may explain in some measure the attitude of some of those who may hereafter speak—with only about 260,000 more people, has 21 stations with over 17,000-watt power.

South Carolina, with slightly less population than Kansas, has a single station of 75-watt power, while Kansas has eight times as many stations and eight times the volume of power. Why, my friends, do you know what an analysis of this thing shows? It shows that 10 Southern States, excluding the State of Texas, with over three times the population of Illinois, have but one more station than the single State of Illinois and are privileged to use only one-third of the watt power of that single State. These 10 Southern States, still excluding the State of Texas from consideration, have but a single station with 1,000-watt power or more, while the State of Illinois has 13 such stations, and there has been granted another there with 50,000-watt power.

Mississippi with 500,000 more people than Nebraska has a total of 250-watt power, while Nebraska has seventeen times that number of stations, and about twenty-nine times the power allocated to it.

Mr. QUIN. How many stations are there in Mississippi?

Mr. WHITE of Maine. One! North Carolina, South Carolina, and Georgia, with approximately 8,000,000 people, have the same number of stations that the small State of Rhode Island has, with 600,000 people. The same privilege is accorded to 600,000 people in the State of Rhode Island that is meted out to 8,000,000 people in North and South Carolina and Georgia. I might multiply these illustrations almost indefinitely.

Compare the fifth zone, which has half the area of the whole United States, and the fourth zone. This single zone has almost three times the area of the fourth zone, but that fourth zone has 84 more stations than the fifth zone, and 103,000 watts more power allocated to it. The fifth zone is fourteen or fifteen times larger in area than the first zone, but it has seven less stations than the first zone, and between

a third and a quarter of the power allocated to it. I wish I had time to tell you something about the high-powered stations within the United States. There are in the United States 43 stations with 5,000 watt power and over, and in this entire southern zone of almost 25,000,000 people there are just 3 of these 5,000 watt stations. Three out of 43, and again excluding the State of Texas, there are in these 10 Southern States, with 20,000,000 people, but a single 5,000-watt station—1 out of 43—while in the single State of Illinois there are 11 of these stations of 5,000 watts or over. And they talk to me about equitable distribution and equity and justice in the management of this situation. [Applause.]

I do not like to talk and rave about monopolies, but there are some significant things to be observed. Take the city of New York. I do not know that I particularly blame the membership from New York City for being here, but what is the fact? There are allocated to the stations in New York City, if we charge to this city those stations which have their studios there, in round numbers, twice the power allocated to the great southern zone of 11 States. There is allocated to that city alone almost 37,000 watts more of power than to that great fifth zone, comprising half of the United States.

Mr. BLOOM. Mr. Chairman, will the gentleman yield?

Mr. WHITE of Maine. No. And if you go into it further, getting down to individual stations, what do you find? Here are 12 stations owned by the General Electric, the Westinghouse, the Radio Corporation of America, and the National Broadcasting Co. which, speaking in terms of radio, constitute a single interest, and there are allocated to this interest 215,000 watts power, which is one-third of all of the power throughout the United States, one-third of all of the power allocated to, roughly, 675 other stations. Talk to me about equity under this existing situation! [Applause.]

That is the situation brought to the knowledge of your committee. And what were we to do about it? This amendment is the answer of your committee to this inequality, to this injustice. Where did this amendment spring from? What was the inspiration of the amendment? The chairman of the Federal Radio Commission, the only lawyer appointed, the only member confirmed, suggested to us that the proper construction of the law was that there should be a pro rata quota among the States, and if that is not precisely what we have undertaken to do among the zones, then I do not know what language means. [Applause.] We have provided for the zones of this country an equal division of stations and power and wave lengths. We have stopped there and then have provided that within these zones there may be the exercise of discretion, that other elements may be taken into account, and that there shall be a fair and equitable distribution according to population. On that amendment I stand, and to that amendment I give my cordial support. [Applause.]

What is back of the opposition to this amendment? Strip it of everything, look at it in all its hideous nakedness, and this is a fight by those who are in to stay in. This is an assertion on the part of those who oppose this amendment that they have vested rights. They are asserting a right above the obligation of this Congress to legislate in behalf of the whole United States. [Applause.] They are asserting the right to hold that which they first acquired. They are seeking to foreclose by their opposition to this amendment the future of this great southern zone, and they are seeking to foreclose the future of this great section of our country lying to the west.

My friends, let me tell you that if you have only a local viewpoint, if your ears are attuned only to the call of selfishness, if you subscribe to the doctrine that any station has rights superior to the authority of this Government, if you are indifferent to inequality and injustice, if you can see a part only instead of the whole United States, you will be opposed to this amendment; but if you see this Nation as a whole, if you visualize the American people as one people, and if you think of this United States of ours as a Union of sovereign and equal States, then you will support this amendment. [Applause.] That is the conception that I urge upon you, for which I ask your loyalty, and in behalf of which I plead for your votes. [Applause.]

The CHAIRMAN. The general debate is exhausted. The Clerk will read the bill for amendment.

Mr. LEHLBACH. Mr. Chairman, I make a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. LEHLBACH. I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from New Jersey makes the point of order that there is no quorum present. [After counting.] One hundred and ninety gentleman are present. A quorum is present in the Committee of the Whole. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That all the powers and authority vested in the Federal Radio Commission by the radio act of 1927, approved February 23, 1927, shall continue to be vested in and exercised by the commission until March 16, 1929; and wherever any reference is made in such act to the period of one year after the first meeting of the commission, such reference shall be held to mean the period of two years after the first meeting of the commission.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. LAGUARDIA. Mr. Chairman, if I came from a State that fared as badly as some of the States outside of the zone in which my State is located, I would fight like a demon to get the rights that belong to my State. [Applause.] The positions being reversed, I am ready to grant the same consideration I would expect to those States not getting a fair deal under the present conditions. [Applause.]

Mr. Chairman, it would be a calamity if the broadcasting powers were to be concentrated in one or two points in this country. We must look at this new means of communication and education as a great national necessity. [Applause.] It is simply absurd, it is ridiculous, to so construe the law as to hold that equal service means equality in ability to receive.

Why, gentlemen, what would you say if the post office were so conducted that some of the States could receive all the mail they wanted from New York and other large centers, but would not have sufficient means and facilities of sending mail to other parts of the country? [Applause.]

I want to take exception to the statement put into the RECORD by my colleague from New York [Mr. CELLER] intimating or suggesting that any individual or company may acquire the right to a monopoly of the air. There is no such thing as a vested right in broadcasting, no matter how great the investment or how many years a company may have operated. Let the RECORD show clearly that in passing the act of 1927 and in considering the bill now before the House it is the clear, unequivocal intent of Congress that no one operating under a temporary license acquires any permanent rights for the future. The ownership and right to the use of the air is vested in the people, and individuals or private companies may use the air only under license from the Government. I do not see why my colleagues from New York City take the position that they do. Permit me to say to my colleagues coming from the great city of New York at this time——

Mr. GRIFFIN. Mr. Chairman, will the gentleman yield there? Does not the gentleman know that I am with him in this matter?

Mr. LAGUARDIA. I know the gentleman is with me.

Let me say to the majority of the Representatives from New York, my colleagues, coming from the great Democratic Party of New York, when the eyes of the country are directed to the leadership of their party in that State, that if instead of assuming a narrow, provincial, and selfish position, you would display a broad, generous, national attitude toward the other States, you would be doing more for that leadership of your party. [Applause.]

This is a national question. This great means of communication, of exchanging thought, gives the control to whoever controls the broadcasting powers to mold public opinion; and I submit, Mr. Chairman, that the generous people, the country-loving people of the city of New York, understand the situation. They are as anxious to tune in and hear the thought and the viewpoint of the South and West and Middle West as they are to hear themselves and their own sectional viewpoint. I believe that the amendment that has been so criticized is not only timely but it is absolutely necessary. It is in proper parliamentary form, and it finds itself properly on the bill before us. I shall support this amendment, assuming full responsibility for what I do, because the people whom I have the honor to represent in New York City are always willing to give a fair, square deal to their fellow countrymen in other parts of the United States. [Applause.]

Mr. CELLER. Mr. Chairman, I yield to the gentleman from Mississippi [Mr. QUIN] five minutes.

The CHAIRMAN. The gentleman from Mississippi is recognized for five minutes.

Mr. QUIN. Mr. Chairman and gentlemen, the gentleman from Maine [Mr. WHITE] gave facts and figures to this House which certainly entitle his amendment to the very highest

degree of careful, legitimate, intelligent consideration. We have in this country monopolies. Everyone who runs for the United States Senate or who is a candidate to be a Member of the House of Representatives always asserts that he is against combines, trusts, and monopolies.

The trusts, despite all this talk, have been growing and growing, until to-day they dominate practically every legitimate line of industry in this Republic. Within the last few years there have been important inventions which have become necessities of human existence in this Republic. Monopolizing these industries has been not only a profitable pastime, but it has been considered a legitimate business. The power that God placed in the water of the earth has been monopolized, until there is a great giant to-day straddling this Republic, with one foot upon the Atlantic and one foot on the Pacific, and to-day his face is turned toward the South for the purpose of capturing the control of the air. The water power has already been monopolized; and we find, after the short time that the radio has been invented, that a monopoly exists and is paramount in this Republic.

Do not misunderstand that the radio is a necessity. The transmission of beautiful programs of music and the transmission of every line of intelligence by radio is now a household necessity. The poor man can sit back in his little cottage or in his little log cabin and listen to the finest music that is produced; he can listen to the most charming voices; he can listen to the finest instrumental music and to the greatest orators of the world. Are we going to sit idly by and let this radio monopoly, composed of a few giant corporations, with their watered stocks, rob these poor people, the unfortunates of this Republic, of their real chance to hear all of these fine things over the radio? [Applause.] Yet that is what is being done to-day.

According to the table submitted, the State of Mississippi, which I have the honor to come from, has one little, insignificant station with only 250 watts. [Laughter and applause.] Can you conceive of such an injustice? Can you conceive that a great State, with 2,000,000 people, with this radio monopoly controlling, as it does to-day, has but one little station of 250 watts? And they seem to even be jealous of that, and they have influence somewhere to keep anything from being done by the commission.

I want to say, gentlemen, that in my judgment, if this amendment is killed to-day, this Congress would do a good day's business to kill the entire bill and put the Radio Commission out of business. [Applause.] The people of the United States then might get a law through Congress that would give justice and there would be an equitable distribution of radio power and wave lengths to all the States according to their population. It matters not to me if it is a State in the southwest portion of this Republic with only 100,000 people—they are entitled to their pro rata share of the air the same as the greatest city of this Republic.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. QUIN. Mr. Chairman, I would love to go on for five minutes more.

The CHAIRMAN. The gentleman from Mississippi would love to go on for five additional minutes. Is there objection?

There was no objection.

Mr. QUIN. I thank you, gentlemen. These gentlemen who are fortunate enough to come from the large centers, like New York and Chicago, I am sure will do the clean thing and vote that this amendment shall be adopted in order that all the States of this Union shall receive their just pro rata share under this legislation.

The air was presumed to be free. You have always heard that God gave us free air. The air belongs to all the people, but, lo and behold, a few of these great monopolistic corporations have combined to control the air.

I have never believed that you could have a commission, appointed by an honest President of the United States, that would put this in the power of a great monopoly, so that great corporations could rob all the people and secure a monopoly of the free air of this country. When you strip it of all its verbiage that is exactly what has happened.

If this Radio Commission can not control it under the law and when its chairman said he understands that equitable distribution to be what the law intends, then Congress must come with unmistakable language and make it mandatory that it shall be done. That is the only way the States and all the people of this Republic will receive what is coming to them under the legislation which we have already passed. We can not afford to sit idly by and say trust the commission to do it. I do not know why it has been that only this small amount of power and one little old station is allowed for the State of Mississippi. I can not say why it is that 10 Southern States, excluding the State of Texas, have only 8 per cent of the power, when there are only 48 States in this Union. Yet that is exactly the thing that has happened and it will continue to happen. I said that Texas was excluded, but I believe Texas is included in that lot; a great State that stretches over the southwest portion of this counry and covering as much territory as five ordinary States of this Union. As I say, I do not know why under the present operation of the Radio Commission those States are only allowed 8 per cent. And, by the way, gentlemem, one gentleman—and he is a good man, too—is on that commission from the State of Mississippi. If we did not have him on there, do you reckon we would have even that 1 station and 250 watts? [Laughter.] I trust that the gentleman on that commission from that State can at least see that we get a little more allowance of voltage than is permitted to-day.

But, gentlemen, if I lived in the city of New York or in the city of Chicago, I would vote for this amendment. I would vote to give all the people of this country and all of the States their just pro rata share of the radio power they are entitled to, as well as the voltage and number of stations. I would vote that they have that right under the law which Congress passed. The legislation is all right. There is nothing the matter with the law as it stands, but it is the determination that the commission makes, and since they have taken that attitude it is binding on the Congress to put this amendment in the law so it can not be misconstrued. These gentlemen have misconstrued what Congress intended. We know that the Congress of the United States intended to be fair, equitable, and just in making a pro rata distribution among all the States. I thank you, gentlemen. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has again expired. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. CROWTHER. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman and gentlemen of the committee, the chairman of the committee a few moments ago certainly indicted the Federal Radio Commission that endeavored to function under the last law.

This is a matter, gentlemen, that there is no need of getting unduly excited about. For the moment I thought this was a masquerade ball. I scarcely recognized the chairman, the gentleman from Maine [Mr. WHITE], disguised as a special pleader for the people and a trust buster. [Laughter.] He was indeed clever in this new rôle. There is nothing, as I say, to get unduly excited about, and the question here seems to hinge on the two words "equal" and "equitable" as regards distribution of power.

The chairman of the committee came down here and made a very forceful speech and cited existing conditions as to a preponderance of stations in some zones, how few there were in other zones, and how unfair had been the distribution of power, and then dramatically exclaimed, "Talk to me about equitable distribution!"

Then the gentleman from Mississippi [Mr. QUIN] states that there is only one broadcasting station in the State of Mississippi. Who is to blame? Is it the fault of the Radio Commission? The Radio Commission does not organize, finance, and build radio stations and allocate them to the States. They only act upon license applications when the initiative has been taken by progressive people with capital who build the stations in the various cities of the States.

The fact of the matter is, folks, those of you who have radios, and nearly everybody has one nowadays, know if you attempt to get somebody on the radio whom you wish to hear five hundred or one thousand miles away, who has perhaps written you that he was going to speak or sing at a certain hour and you have several of his friends come in to hear him, you find it is almost impossible to do so. Why? Because, in the first place, with respect to the first 200 of these stations that are listed, from 199 meters up to 217 meters, there is scarcely an instrument that is on the market to-day that you can tune one of those stations in on, unless you reside close to the station, or are within its field. Here in Washington we have a station broadcasting on 202 meters down here at Mount Vernon, WTFF—the Fellowship Forum, so called—they use 10,000 watts, and when you are within the field of a station of that kind you can hear it on almost any instrument; but if you are outside the field and the coils are not the proper size and the condensers of proper construction and capacity you can not tune in a station that is broadcasting on these very low wave lengths.

The necessity of perfect reception is what has made chain broadcasting popular. I live in a city where we have one of the pioneer stations. A school boy was asked the other day by his teacher, "How do you spell Schenectady?" He answered, "WGY." This was the easy way to spell it, and this bill is the easy way out of the difficulties that faced the committee. They incorporated this section 4, and then the chairman [Mr. WHITE] waxed eloquent in his charges of unfairness on the part of the commission, and trembled with emotion as he shook the trust bug before our eyes.

We passed the act a year ago providing for the appointment of a radio commission, but the fact is that at no time has it functioned at full capacity. Death claimed two of its ablest members, and its membership is not yet complete.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CROWTHER. I ask unanimous consent to proceed for 10 minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CROWTHER. We had 536 stations and 89 wave lengths, an average of 6 stations on each wave length; and at that time there was very little complaint throughout the country regarding interference, because by taking advantage of the geographical locations, differences in power allotment, and trading or swapping time, as it was called, they managed with 536 stations on 89 wave lengths to get along with a minimum of interference.

Then the trouble began when the Zenith Radio Co. went to court to test the authority of the Secretary of Commerce as to allocation of wave lengths, and the Government was defeated in that suit and it was declared that the Secretary of Commerce no longer had such authority.

This decision presented the necessity of a new law on the subject, because the old law was no longer able to function. In the meantime or just as soon as this decision had been rendered, there sprang up all over the country new radio stations to the number of about 250 or 260; and what did they do? They just pirated and bootlegged any wave length that they chose, because by the decision of the court, nobody had any authority to grant wave lengths and nobody could punish them for broadcasting on any frequency they chose to use.

So when this Radio Commission went in office we had probably something like 780 stations. Now, it is impossible to license more than 536, for the same conditions as to available wave lengths exist now as existed then, and radio instruments tune no sharper. Now, as then, the 10-kilocycle separation is all that is available, practically 4½ or 5 meters.

That is as close as you can get them and keep them clear and separate in receiving from distant stations.

Distant reception, notwithstanding the great improvement in radio, is after all a delusion and a snare. It is almost impossible to get more than three to five minutes of continuous good reception from a station a thousand miles away. Sometimes occasionally you can get 5 to 10 minutes of good, fair reception. Why is it? Because the interference that nature produces—static—and man-made interference—electric-light plants, steel buildings that absorb the electrical energy, the peculiar phenomenon of fading signals—all contribute to the difficulties attending good radio reception.

You are not going to help the listeners in any way by incorporating this equal distribution of power section. If the people of a given State have no desire or ambition to build radio stations, blame the State, not the Radio Commission.

Mr. McKEOWN. Will the gentleman yield?

Mr. CROWTHER. I will.

Mr. McKEOWN. The gentleman says it is nobody's fault except the States; but what does the gentleman say about the application from States for more power than have been denied?

Mr. CROWTHER. I have nothing to say about that. I have no knowledge as to how many stations have been denied. It seems to me the commission might have been able to adjust and grant requests for additional power. The addition of power to a broadcasting station does no material damage if the station is working on a wave length sufficiently separated from other stations.

Mr. McKEOWN. There have been many applications that have been denied; they have had no attention whatever.

Mr. CROWTHER. Well, you need a real commission. You have not really had a commission. It has been an unfortunate body from the very beginning. The only one alive that was finally confirmed by the Senate is Judge Sykes, a very estimable gentleman, but he did not know any more about radio than the man in the moon knew about Blackstone. He was not placed on the commission because of his knowledge of radio; he had been a judge of the supreme court of his State and is an attorney of marked ability. I think he was put on as a legal adviser. So I do not see that he can be held responsible for the failure in mathematical technique of equitable distribution of wave lengths and power.

Mr. McKEOWN. Will the gentleman yield again?

Mr. CROWTHER. Yes.

Mr. McKEOWN. If the commission can not be held responsible for not giving power to other parts of the country, why did they give additional power to these large cities?

Mr. CROWTHER. Because high-class programs come from the large cities, there is where talent congregates. The station at Tulsa, in your State, has 1,000 watts and broadcasts many of these splendid chain programs.

Mr. MacGREGOR. Will the gentleman yield?

Mr. CROWTHER. I will.

Mr. MacGREGOR. In the hearings Commissioner Caldwell said, "I feel that the South has been granted a larger percentage in proportion to the requests for power than any other section of the country."

Mr. DAVIS. Will the gentleman yield?

Mr. CROWTHER. Yes.

Mr. DAVIS. I want to say that that is absolutely untrue. We have not received as much as other sections. That statement was in the hearing, and I have put it into the RECORD.

Mr. CROWTHER. Mr. W. K. Henderson, of Shreveport, has registered many complaints because he has not been granted more power, but his chief difficulty lies in the fact that he is sandwiched between two high-powered stations—WBBM at Chicago and WTAM at Cleveland. We hear him splendidly in Washington when these other two stations are silent. It seems to me his best bet would be to swap time with one of these stations. I have heard KWKH in all parts of the West. Mr. Henderson does not run his station for profit, he does not make a dollar out of it. It is his hobby, and he runs it for his own pleasure and for the entertainment of the community where he lives and the thousands of distant listeners. There is a great deal of money invested in broadcasting stations. It costs from $10,000 to $50,000 to build a broadcasting station, and it costs $5,000 to $50,000 a year to run it, depending upon the type of programs broadcast.

Of course many have adopted advertising programs which some people object to, but still the owners feel that they have got to get at least interest on their investment. We have in the so-called chain programs the very best talent of every description that can be secured. On Sunday nights we have from 9.15 o'clock to 10.15 o'clock what is known as the Atwater-Kent hour, when either one or two Metropolitan Opera House stars sing, and some wonderful instrumental music as well. That melody is carried into the homes of the rich and poor of the country. That is the music that the constituents of my good friend Mr. QUIN, from Mississippi, listened to, and they are not estopped from hearing it because there is only one station in Mississippi. That is the real reason why they can hear it so well, in fact, because there is no interference from other stations in that great State.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. CROWTHER. Yes.

Mr. DAVIS. I am sure the distinguished gentleman from New York will concede that three 50,000-watt stations hitched to a 30,000-watt station are not needed in a chain program?

Mr. CROWTHER. But what harm do they do?

Mr. DAVIS. They do a great deal of harm. The commissioners and everyone else says that they blanket or heterodyne the balance of the country.

Mr. CROWTHER. That is not so.

Mr. DAVIS. And the stations everywhere else.

Mr. CROWTHER. Not unless they are on the same wave length.

Mr. DAVIS. Oh, the gentleman is mistaken.

Mr. CROWTHER. I am not mistaken. For years I have experimented in this work, in an amateur way to be sure, and I am quite certain as to the correctness of that statement. I say to you that the power makes absolutely no difference unless they are very close to the same wave length. A station with 50,000 watts on 400 meters would not interfere 3 miles away with a station of 50,000 watts on 300 meters.

Mr. DAVIS. But they do not need them on chain programs, do they?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CROWTHER. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

Mr. WHITE of Maine. Mr. Chairman, reserving the right to object, and I shall not object, I take this opportunity to make one suggestion to the membership of the committee. I take it that the only real controversial matter in this bill is section 4. Section 4 is the House committee amendment. It is perfectly well understood that there is to be a point of order directed against that amendment. If that point of order should prevail, the amendment goes out, and then there is no occasion to talk. On the other hand, if the point of order is not sustained, as far as I am concerned, I shall be disposed to allow the greatest latitude in the discussion of the amendment. It does seem to me that it is altogether in the interest of time and the convenience of Members if we can get to this real issue just as speedily as possible.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BLOOM. Mr. Chairman, will the gentleman yield?

Mr. CROWTHER. Yes.

Mr. BLOOM. Would there not be a remedy to what the gentleman suggests about wave lengths if they should go on to short wave lengths instead of continuing on long wave lengths?

Mr. CROWTHER. If they used what is ordinarily termed "short wave" lengths, it would require an absolute change in the type of receiver.

Mr. BLOOM. That is the matter with the manufacturers?

Mr. CROWTHER. Yes.

Mr. BLOOM. Let me tell the gentleman from New York and the committee that the manufacturers say that if we should change from the long wave length to the short wave length we would have to dispense with all of the receiving sets in use to-day. I can not understand why the manufacturers of receiving sets should be so much concerned about the public when they say that is the reason they do not want the short wave length. They seem afraid that they are going to sell too many sets. That is an attitude that I can not understand.

Mr. CROWTHER. Oh, well, the average folks all over this country are not rolling in wealth as are the constituents of the gentleman from New York, who can afford to throw away a $150 instrument and buy a new one. The fact is that the majority of the people of this country who listen to radio have made very great sacrifices to get a good radio set in their homes, and they hope not to be compelled to scrap them as a result of adopting the short waves.

Mr. BLOOM. Is it not a fact that it is more on account of the amateur operators that they do not go into the short wave lengths than anything else?

Mr. CROWTHER. No; and let me say that the amateur operators have a very definite place, and we should not take away from them what they have. Their code messages are heard around the world.

They have done wonderful work in floods, in disasters in mines, in conflagrations, and in transmitting radio messages regarding stolen cars, criminals, bank robbers, and the like. These amateurs have done a wonderful work, and I hope the band allocated to them will never be disturbed.

Mr. BLOOM. And the gentleman says that that is the reason why we should not go into the short wave lengths, when it has been conceded that the amount of short wave lengths can not be estimated, that they might run into a million.

Mr. CROWTHER. Oh, no; they do not run into a million. The gentleman must know that the short wave lengths being used now by the large broadcasting stations are, on the average, 28 meters, 46 meters, and 63 meters; and let me tell you this: If you are using a superheterodyne set where a station is broadcasting on three different wave lengths, on account of the developed harmonics, you will likely find that station at six different points on the dial. [Applause.]

Let me say to the gentleman——

Mr. BLOOM. I want to say this——

Mr. CROWTHER. Let me say to the gentleman that thousands and thousands of dollars have been spent by the manufacturers of this country in displacing the old style of condenser and building what is called the straight-line radio-frequency condenser in order that stations on the lower bands might be more easily separated.

Mr. BLOOM. Mr. Chairman, will the gentleman yield there?

Mr. CROWTHER. No; I do not yield further, because the gentleman does not understand what I am talking about. [Laughter.] I am reminded the chairman found fault because New York had 72 per cent of the power in that territory and Connecticut had few stations and very little power. But what difference does that make? Mr. Chairman, the farthest point in Connecticut is only about 100 miles from New York City, and every station in New York City is heard as well as if it were a local station in Connecticut.

Mr. ABERNETHY. Why, Connecticut, anyway? [Laughter.]

Mr. CROWTHER. Well, that is the home of my distinguished majority leader [Mr. TILSON], and I am strong for him and his State. [Laughter.] There is not another country in the world but where the listening constituency have to pay a license for owning an instrument, whereas all the programs in this country are free; and we do not have to pay a tax on the instruments, as they do in foreign countries. [Applause.]

The CHAIRMAN. The gentleman from New York's time has expired.

Mr. WHITE of Maine. Mr. Chairman, I move that the debate on this section and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from Maine moves that all debate on this section and all amendments thereto be now closed. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. EDWARDS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. EDWARDS. Mr. Chairman, radio is an important and interesting subject. It is in its infancy. We marvel at this and other present-day discoveries which are startling, and we say, "It is wonderful." We ask the question, "What will man accomplish next?" Truly these things are "wonderful," and radio is one of the world's greatest discoveries. It is new in that it has been recently discovered by man, but have not the causes that produce the effects been in existence since the beginning of time? Solomon said, "There is nothing new under the sun." Wonderful things happened in his day, but back of the ingenuity of mere man he knew another force with which all things are possible and without which nothing is possible. "God moves in mysterious ways His wonders to perform," and to the highly trained and scientific mind His wonders are one by one being unlocked and revealed to mankind, and to Him we should gladly and humbly acknowledge our debt.

For centuries men had seen the lightnings play in dazzling beauty across the skies. They had wondered at its capers and its powers. One day, as if by accident, the key to the electric elements was found, and since the time Franklin felt the tingle of the electric current from a key tied at the end of a kite string man has been permitted to go deeper and deeper into this subject, until to-day the world stands in amazement as to what has been accomplished and we no longer dare say any discovery is impossible. We now have assurances from certain quarters that a fuelless motor has been invented.

Is it possible that in an age of which history holds no record, men harnessed and used the elements in a civilization that had produced even greater minds than the present age? Is it possible that in a day not recorded by historians men had harnessed the lightnings and had talked on the air from continent to continent? I think not. I think it has been given to the present age to produce these wonderful discoveries. Truly this is the most rapidly progressing civilization of which there is any record.

Measured by accomplishments, a man who has lived in the last 50 years has lived longer than a man who lived a hundred years prior to this electric age; and we are told by scientific men that we are just at the dawn of the electric age. Within my lifetime—and I am not yet quite 50—I have seen the telephone perfected. I have seen the streets of the towns and cities turned from night into day through the coming of the electric lights. I have seen the telegraph develop from an uncertain and cumbersome stage into its present swift and almost perfect use. As a lad I thought the bicycle, the buggy, and the carriage wonderful means of transportation. I have seen the small railway locomotive built into a thing of power and speed, and I have seen this land of ours girded with rails of steel over which the commerce of the country has been and is being moved to meet the needs of our civilization. I have seen the bicycle, buggy, and carriage, as well as the wagons and drays, supplanted by motor vehicles, and all so quickly that it seems like a dream.

I have seen our trails and mudholes, called roads, converted into highways over which traffic pulsates in an amazing manner. I have seen the transoceanic cables laid, traversing the deep, to carry messages of good will and of general international intercourse from continent to continent, until to-day the world is held so closely together the peoples of the earth are as one big

family. I have seen the rapid development of the small and uncertain steamship grow into the mighty ocean liners that ride the waves like palatial castles. I have seen the development of the submarine, that yet uncertain engine of brutality, nose its way into the picture. Then, too, within that time I have seen what might be termed the higher development of photography, from the tintype to the present photographs, and then I have seen that line develop into the moving pictures and the "movitone," and as if reaching almost the very impossible, I have seen it developed until, by wireless or radio, pictures are flashed through thousands of miles of space. It was as yesterday I stood, with doubting thousands, and witnessed the trial flight made by the Wright brothers at Fort Myer, just outside of Washington, and well do I remember the indescribable feeling that came over me as I saw a man rise in his plane on that occasion and fly away like a bird. I have seen that idea developed until to-day the skies are full of machines and flights have been made across the Atlantic and around the world.

I served in the House with Congressman Lindbergh, father of our beloved world-famed hero, Colonel Lindbergh, and I knew this hero when he was a mere lad, with no more promise, apparently, than any of his fellows; yet, I have seen him leap from obscurity, through skill and daring, to a place that is all his own in the hearts and admiration not only of his fellow countrymen but of the world. I have seen the advent of wireless, the talking machine, and I have witnessed the development of type and adding machines until they are almost human in the things they accomplish; and in my time, among many other marvelous inventions, discoveries, and accomplishments, I have witnessed the arrival of television and the radio. It is bewildering, it is inspiring, it is thrilling, and it is wonderful! I thank God I have been permitted to live to see these great accomplishments. If the progress is to be as marked in the next 50 years, inventions and discoveries will be made that will make what I have referred to pale into insignificance. Is it all the work of man—mere man—or has a divine hand directed the way, and have not the master minds been inspired in the great work they have done? From isolation, only a few years since, the farthest parts of the earth have been brought so close to each other that, we are told, through wireless and radio the farthest man from us, thousands of miles away in distance, is just 10 seconds from us. Truly the world is one big family, and as surely as we live we are to be brought in even closer contact in the future than we are to-day.

Some think of radio only as it relates to the program that gives us entertainment, and of course that is great. But the scientific minds tell us there are other useful and valuable things in this field that have not as yet been touched. Already photographs and signatures are sent by radio and by wireless. Why not expect that in the course of time type copy will be flashed across space and newspapers be printed by radio? No one yet fully understands just what can or will be accomplished through this force or art. It is something that belongs to all the people, and its highest development should be encouraged. If it can be prevented, the monopoly that has developed and that is being developed should not be permitted to own and control it as they are starting out to do.

It was a common idea a few years ago that to a man who owned a piece of land also belonged everything beneath the land to the center of the earth and everything above the land to the high heavens. It seems, however, that it is rapidly developing that he does not own the space nor the air above him and that he barely has an easement in that regard.

Last year, and prior to that time, it was apparent that there were those who were trying to monopolize the air power and the wave lengths with respect to radio, and the act of 1927 creating the Radio Commission was passed with the hope that the commission would protect the rights of the public. Now, we are told that conditions with respect to the monopoly are grossly worse, and that unless something is done only a few men will control this great discovery that belongs to all men and that a limited area will bottle up the power and the wave lengths so that the people of the country as a whole will not be able to enjoy what is rightfully theirs. We are told that we must write legislative restrictions to keep this God-given heritage from being taken from us. The Teapot Dome and other valuable oil lands were stolen from the people through the help of men high in authority. No one is wearing stripes yet because of that crime. They should follow it up until the criminals are in stripes.

Gentlemen have in a way defended what we might term "big business" and they contend it takes big capital to promote and put over these enormous enterprises. I have no fight to make on "big business." It is "crooked business" I am hitting at. It is theft and plunder by crooks who look for protection from those who benefit by the big campaign contributions they make. Our laws and rights ought to be respected by all and the fact that a man or a concern happens to have large capital is no justification when that man or concern is crooked. The one clear call to-day is for honesty in government. We have been heading for years, very rapidly, to a commission form of government, controlled by "bureaucrats," who in turn are controlled by what some term "big business." I fear it has already degenerated from a government of the people, for the people, and by the people into a government of the bureaucrats, for the bureaucrats, and by the bureaucrats.

That the power and wave lengths might be equitably allocated to the country five radio zones were established under the act of 1927. Those zones are made up as follows:

FIRST ZONE

	Population	Stations	Total station power in watts	Stations with over 1,000 watts
Maine	768,014	3	850	
New Hampshire	443,083	3	650	
Vermont	352,428	3	160	
Massachusetts	3,852,356	20	19,565	1
Connecticut	1,380,631	5	2,100	
Rhode Island	604,397	10	2,750	
New England	7,100,909	44	26,075	1
New Jersey	3,155,900	21	17,280	2
Delaware	223,003	1	100	
Maryland	1,449,661	5	5,700	1
District of Columbia	437,571	3	11,150	1
Porto Rico	1,299,809	1	500	
Virgin Islands	26,051	0	0	
	13,992,904	75	60,805	5
New York	10,385,227	63	162,500	7
Zone total	24,378,131	138	223,305	12

SECOND ZONE

Pennsylvania	8,720,017	45	59,845	1
Virginia	2,309,187	10	2,365	
West Virginia	1,463,701	3	400	
Ohio	5,759,394	31	27,670	4
Michigan	3,668,412	23	15,475	2
Kentucky	2,416,630	3	1,050	
Zone total	24,337,341	115	106,805	7

THIRD ZONE

North Carolina	2,559,123	4	1,750	
South Carolina	1,683,724	1	75	
Georgia	2,895,832	5	1,950	
Florida	968,470	12	5,660	
Alabama	2,348,174	5	1,375	
Tennessee	2,337,885	17	9,805	1
Mississippi	1,790,618	1	250	
Arkansas	1,752,204	3	1,550	
Louisiana	1,798,509	13	3,435	
Texas	4,663,228	31	19,130	3
Oklahoma	2,028,283	10	2,925	
Zone total	24,826,050	102	47,105	4

FOURTH ZONE

Indiana	2,930,390	18	6,315	1
Illinois	6,485,280	70	83,170	13
Wisconsin	2,632,067	19	6,335	
Minnesota	2,387,125	18	10,130	1
North Dakota	646,872	6	720	
South Dakota	636,547	10	2,345	
Iowa	2,404,021	25	25,200	4
Nebraska	1,296,372	17	5,930	1
Kansas	1,769,257	8	3,950	1
Missouri	3,404,055	24	17,015	5
Zone total	24,492,986	215	164,870	26

FIFTH ZONE

Montana	548,889	4	660	
Idaho	431,866	4	2,275	1
Wyoming	194,402	1	500	
Colorado	939,629	15	6,450	1
New Mexico	360,350	1	5,000	1
Arizona	334,162	5	765	
Utah	449,396	4	1,200	
Nevada	77,407	0	0	
Washington	1,356,621	24	11,975	2
Oregon	783,389	15	5,390	1
California	3,426,861	54	26,460	2
Hawaii	255,912	1	500	
Alaska	55,036	3	610	
Zone total	9,213,720	131	61,785	8

The amendment offered by the gentleman from Tennessee [Mr. DAVIS] proposes that there shall be an equal allocation to each of the five zones of wave lengths and station power, and that within each zone there shall be a fair allocation among the States thereof in proportion to the population and area. It is argued this will retard the development in the zones that have proceeded more rapidly than others have, but this will not be the result. The question is asked, Why have this restriction if it is apparent it is not going to be used soon? Even if the power and wave lengths are not immediately used, the right should be preempted for the zones to be used when they are ready to develop the stations for broadcasting. The question has been asked, Why have some of the zones been backward in developing, while others have forged ahead? It has been an easy and simple matter, so the hearings show and so the debate shows on this subject, to obtain licenses in some of the zones and practically impossible in others. For instance, the debate shows with respect to zone 3, in which Georgia is located, that it has been discriminated against, and applications in that zone have been denied and delayed, despite the fact that zone 3 is larger in population than any of the zones. It will be observed that zone 3 has less station power in watts than any of the five zones. This is, indeed, a shameful injustice. The Davis amendment will remedy this injustice and will prevent unfair discriminations in the future.

Big capital is indeed helpful in the development of enterprises. No one is making a fight on capital simply because of its being "big," but the fight is being made because it is in this case using an improper influence and doing a wrong and hurtful thing in trying not only to have a monopoly on radio equipment and instruments, but in literally monopolizing the air and in taking the station power and the wave lengths without regard to justice and to the detriment of millions of people.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 2. The period during which the members of the commission shall receive compensation at the rate of $10,000 per annum is hereby extended until March 16, 1929.

Mr. CELLER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. CELLER. Mr. Chairman and gentlemen of the committee, it is very easy to become excited and to arouse feeling when you speak about equality. It is very easy to become more or less demagogic. But remember this, gentlemen, that to say there must be an equal division of radio and stations and station power is no more reasonable than it would be to say that there should be equal telephone facilities and telegraphic facilities and poles apportioned among the States or in five different zones. You might just as well say that if you expend a certain amount of money for the extermination of the boll weevil in any one State in the South, for example, you must expend a proportionate amount in Alaska. Mr. Chairman, I do not subscribe to that doctrine.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. CELLER. Not at this moment. Many of these stations of high power were established before the Radio Commission came into effect. In my own State and in the adjacent State of New Jersey there are at the present time 48 stations, and of those 48 stations, 45 sprang into being before the Radio Commission was established and before we passed this radio act of 1927. Incidentally only three of them are owned by the members of the Radio Trust; all others are independent. That dispels any idea that the so-called trust influences New York in this matter. I speak for the independent stations primarily. I am not on the trust side. It is on my side. I hold no brief for any radio combine or for any trust. I am opposed to monopoly just as much as any man here is. But you strike at independent, enterprising station owners by your amendment of equality.

It is absurd to place radio upon a quantitative basis. It is just as logical to divide the sun into fractions, or the rainbow, as to divide equally the radio spectrum.

The gentleman from Maine [Mr. WHITE] read off certain States and showed how badly they fared when compared to New York, Illinois, or New Jersey. The answer is that those States never tried to increase its radio facilities. There was no demand for radio stations in those States. Wyoming, Montana, and Idaho have but three small stations all told. Nevada has not even one station. Must New York or New Jersey wait until those States get ready to apply for stations? Must wide-awake, enterprising States wait until other States, heedless or unknowing of the value of radio, apply in belated fashion for stations?

The 48 stations, for example, in the New York-New Jersey area have rights—vested rights.

I do not sympathize with the doctrine of radio vested rights, but after a review of the case—see my remarks in Saturday's RECORD, March 10, 1928—I have come to the conclusion that the instant bill will be declared unconstitutional unless some provision of compensation is made for taking away vested rights in stations which are to be closed down.

At the time of the World War we endowed the President with authority to take away radio stations and radio facilities, and this Congress, having in mind the fact that these stations have vested rights, which could not be taken away from them, in pursuance of the fifth amendment, provided in a joint resolution passed July 16, 1918—H. J. Res. 309—that just compensation should be made for such possession, control, or operation of radio stations or radio facilities.

Why, gentlemen, did you enact that? You did it because of the doctrine that no private property can be taken for a public use without just compensation? You did it because you recognized that these stations had certain rights which you could not arbitrarily take from them. And the very next year, when you repealed the act of July 16, 1918, by passing Senate bill 120 on July 11, 1919, you provided in effect that these compensatory provisions in that act of 1918 should remain in full force and effect, and any radio station that has had its facilities taken away from it in 1918 would still have the right under this act of 1919 in the Court of Claims to demand just compensation from the Government.

Strangely enough, too, you recognize the principle of compensation in the radio act of 1927, for in section 7 thereof you said:

The President shall ascertain the just compensation for such use or control and certify the amount ascertained to Congress for appropriation and payment to the person entitled thereto. If the amount so certified is unsatisfactory to the person entitled thereto, such person shall be paid only 75 per cent of the amount and shall be entitled to sue the United States to recover such further sum as added to such payment of 75 per cent which will make such amount as will be just compensation for the use and control. Such suit shall be brought in the manner provided by paragraph 20 of section 24 or by section 145 of the Judicial Code, as amended.

The American Bar Association pointed out in 1926 that any statute refusing licenses to existing stations without affording compensation would be unconstitutional.

Now, gentlemen, if you deprive a man of the use of his property you take away that man's property.

The United States may control the ether which is the medium of radio, but the United States can not in that control, destroy a man's broadcast apparatus used to initiate radio waves.

If I erect a broadcasting station, if I have the enterprise and energy and capital—as some of my constituents in New York—to do that you can not come and take my gains and my property away from me.

Under the guise of regulating the radio or the ether you can not deny me the use of my station, especially if it was established before the radio act of 1927.

The courts have held time and again that use of property is the value of the property, is in fact, the property itself. Take the case of Corneli against Moore, reported in Federal Reporter, volume 267, page 456, where these very significant words appear:

I also think it may be conceded that any statute which restricts the use and possession of personal property owned by the citizen has the effect to confiscate such property, within the purview of the fifth amendment, for that it deprives the owner of certain inherent rights which are inalienable attributes of ownership. It follows, that it does not aid the argument to urge that the rule does not apply because the property is not physically taken, or the ownership disturbed, but that the use and possession are merely restricted. In short, the owner may not in such use exercise his own volition, but is compelled to use the property in a way he does not desire to use it, or not use it at all.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CELLER. Mr. Chairman, I ask unanimous consent to speak for three more minutes.

Mr. ABERNETHY. Mr. Chairman, reserving the right to object, the gentleman makes these arguments and declines to yield to a member of the committee. Now, he is asking the permission of the committee to proceed further.

Mr. CELLER. I will be very glad to yield but I wanted to develop my thought without interruption. I will be very glad to yield as I always yield.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for three additional minutes. Is there objection?

Mr. WHITE of Maine. Mr. Chairman, the gentleman from New York has already had 40 minutes, which is 15 minutes more than any Member has had, so I am constrained to object.

Mr. DAVIS. Mr. Chairman——

The CHAIRMAN. The gentleman from Tennessee, a member of the committee, is recognized for five minutes.

Mr. WHITE of Maine. Mr. Chairman, at the end of five minutes I shall move to close all debate, or I will make the motion now.

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Maine?

Mr. DAVIS. I yield to the gentleman.

Mr. WHITE of Maine. Mr. Chairman, I move that at the end of five minutes all debate on this amendment and all amendments thereto close.

The CHAIRMAN. The gentleman from Maine moves that at the end of five minutes all debate close.

The motion was agreed to.

Mr. DAVIS. Mr. Chairman and gentlemen of the committee, the gentleman from New York [Mr. CELLER] contends that certain alleged pioneer stations have acquired vested rights in the air, but the question of vested rights, alleged confiscation, and right of compensation has been settled contrary to his contentions by the Supreme Court of the United States in the cases growing out of the laws prohibiting the manufacture and sale of intoxicating liquors. However, the fact that they are insisting upon these vested rights shows the necessity of this Congress taking definite action that will put that question to the test. [Applause.]

Now, Mr. Chairman, when my time under general debate expired——

Mr. HUDSON (interposing). Will the gentleman yield?

Mr. DAVIS. Yes.

Mr. HUDSON. I want to say that such a decision was also made in the Slaughterhouse case.

Mr. DAVIS. There are any number of cases; it has long since been settled and it is not open to argument by those who have really investigated the law.

After enumerating the great favoritism that had been shown the Radio Corporation of America, I inquired what that meant. I will tell you what it means. Since this Radio Commission went into power and began to administer the law, the stock of the Radio Corporation of America has increased from $52 to $122 per share, or an aggregate amount of about $85,000,000. No wonder they are fighting this amendment; no wonder they are claiming vested rights in and out of Congress; and we must meet the issue.

Now, the gentleman from New York [Mr. CROWTHER] referred to the relative difference between wave lengths, and he is correct about that. There has been as great a discrimination in that particular as there has been with respect to power. What has this commission done? The chief thing to which they and their champions point is that they have cleared 25 wave lengths or channels between 600 and 1,000 kilocycles. Everybody who knows anything about the subject knows that these are the most valuable and the most useful channels for broadcasting. And for whom did they clear them? They removed 77 stations off of those channels and put them onto other already crowded channels. When they cleared these channels whom did they leave or place on them? Nine powerful monopoly stations, 3 of them with 50,000 watt power each, 1 of them with 30,000 and another 15,000, all owned by the same group and in practically the same area, and on 24 out of these 25 wave lengths they have placed the chain stations. That is the reason the remainder of the more than 600 independent stations of this country are practically put out of business. Commissioner Pickard said that 90 per cent of the stations were being heterodyned, and they are heterodyned by reason of these high-powered stations. Mr. CROWTHER, of New York, said that high power was unnecessary; that the important matter was the wave length. If that be true, why give this high power to one group of people and in a few areas? West of Pittsburgh to the Pacific coast and south of Pittsburgh to the Gulf and Mexico there is not one 50,000 or 30,000 watt station, but in all of that area—96 per cent of the area of the country, with 75 per cent of the population—there are only two stations with over 5,000-watt power, one of them a 15,000-watt station in Chicago and the other a 10,000-watt station here in Washington, which, as Mr. CROWTHER says, is practically useless, because of the wave length assigned to it. [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

The Clerk read as follows:

SEC. 3. Prior to January 1, 1930, the licensing authority shall grant no licenses or renewal of license under the radio act of 1927 for a broadcasting station for a period to exceed six months and no license or renewal of license for any other class of station for a period to exceed one year.

With the following committee amendments:

In line 7, page 2, strike out the word "six" and insert in lieu thereof the word "three," and in line 9 strike out the words "one year" and insert in lieu thereof the words "six months."

Mr. BLOOM. Mr. Chairman and gentlemen, I simply want to explain, if I may, the situation with reference to the city of New York regarding the so-called Davis amendment.

The gentleman from New York [Mr. LAGUARDIA] and the chairman seem to think that New York City is taking a position with respect to this amendment so as to control the wave lengths. Let us see what would happen if you were to take the wave lengths out of New York City and out of the other large cities of this country.

I am not now, and I shall not at any time, vote in favor of doing anything that will embarrass any part of the country; but it is impossible to secure real programs from any part of the country except the large cities.

If the South, or if the smaller towns of the country, should secure a large broadcasting station it reminds me of a thing that happened to me when I was first elected to Congress. A gentleman said to me, "Now that you have got it, SOL, what are you going to do with it?" The same thing applies to this situation. If they were to have a large broadcasting station, what are they going to do with it. They have not the talent to broadcast seven days a week, day and night, and therefore the station would be idle for that one reason alone.

Remember also, ladies and gentlemen, that you secure all of the best talent of the world free of any cost to you.

Mr. ABERNETHY. Will the gentleman yield?

Mr. BLOOM. Yes; certainly.

Mr. ABERNETHY. That statement applies to Members of Congress as well as others?

Mr. BLOOM. I presume so.

You receive these programs for nothing, and the only way the stations can secure these programs for you is by reason of the advertising. Every other country in the world charges for listening in. You do not want that arrangement in this country, and I certainly do not want it; but unless they get the advertising you can not get the programs.

Tell me of any city in Mississippi of more than 25,000 population that can pay $40,000 or $50,000 for one program. It would be impossible.

Mr. LAGUARDIA. Will the gentleman tell us how the other countries charge for these programs?

Mr. BLOOM. In England, the post-office branch of the Government has the matter in charge and they charge so much a year for every set and you have to get a license. In Canada they did at one time charge a percentage on the cost of everything pertaining to radio, and in the small countries they charge so much a year for listening in.

If you were to take away from New York City the opportunity of broadcasting these programs which, I know, as a Member of Congress, you are not going to do, you would be destroying the great use that broadcasting is put to to-day. This would inevitably happen if you were to take broadcasting out of the large cities where the talent is. The talent is in no other place in this country, and that is why New York City and the other large cities of the country can give you the broadcasting programs without any cost which you are getting to-day.

You Members of the South would be destroying the only use and the only benefit you can get out of broadcasting if you were to take the broadcasting stations from the big cities and endeavor to put them in the South.

This is my only reason in rising to explain to you my position with respect to all these large broadcasting stations in New York City and the other large centers of our country. I thank you. [Applause.]

Mr. WHITE of Maine. Mr. Chairman, I move that all debate on the committee amendment do now close.

The motion was agreed to.

The committee amendment was agreed to.

Mr. LAGUARDIA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The genteman from New York offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 2, line 9, after the word "months," insert: "All licenses and renewal of licenses hereafter

granted shall provide that not more than six minutes out of each hour of broadcasting shall be used for advertising purposes, and shall provide further that a violation of this provision shall terminate the license."

Mr. LEHLBACH. Mr. Chairman, I make the point of order against the amendment.

Mr. LAGUARDIA. I thought the gentleman would permit the amendment to go to a vote on the merits.

The CHAIRMAN. The Chair thinks the amendment is out of order, and therefore sustains the point of order.

The Clerk read as follows:

SEC. 4. The term of office of each member of the commission shall expire on February 23, 1929, and thereafter commissioners shall be appointed for terms of two, three, four, five, and six years, respectively, as provided in the radio act of 1927.

With the following committee amendment:

Beginning in line 10, on page 2, strike out all of section 4 and insert in lieu thereof the following:

"SEC. 4. The second paragraph of section 9 of the radio act of 1927 is amended to read as follows:

"'The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.'"

Mr. LEHLBACH. Mr. Chairman, I make the point of order against the amendment on the ground that it is not germane. I do not make the point that it is not germane to the section for it was not intended as an amendment to section 4, but intended as a new section. I make the point of order to the new section that it is not germane, and I reserve my right to discuss the point of order in case anybody wants to support the amendment.

The CHAIRMAN. The Chair desires to inquire whether the proposal is a substitute for section 4?

Mr. WHITE of Maine. It was the intention of the committee to offer it as a new section. I presume the vote first will be on striking out section 4.

The CHAIRMAN. Without objection the Chair will put the question first on striking out section 4 of the Senate bill.

The question was taken, and the amendment to strike out section 4 was agreed to.

The CHAIRMAN. The question now recurs on the new section 4 proposed by the committee, to which the gentleman from New Jersey makes a point of order.

Mr. WHITE of Maine. Mr. Chairman, I am somewhat in doubt as to the grounds of the point of order the gentleman has raised.

Mr. LEHLBACH. I stated that it was on the ground that the amendment is not germane to the bill.

Mr. WHITE of Maine. I wish, Mr. Chairman, I might consider myself an authority on parliamentary matters. It does seem to me, however, that the proposition is so clear that it admits of no doubt as to its germaneness. The first section of this bill provides that all the powers and all the authority vested in the Federal Radio Commission by the act of 1927 shall be vested in and exercised by the commission until March 16, 1929. It proposes in that language to extend for the period of another year each and every one of the powers vested by the 1927 law in the Radio Commission, and it does that by the general language as fully and effectually as though the portions of the 1927 law were set out seriatim.

Now, paragraph 2 of section 9 of the 1927 law, one of the powers which, if it were not for this amendment, would be extended by that general language is that the commission shall make such distribution of wave lengths, licenses, power, and periods of time for operation among the States and among the communities thereof as shall work out equitable service to those States and to those communities.

That proposition is before us by the general language with which this act starts. It is as fully and completely before us as though recited word for word and letter for letter. This amendment to which the point of order is directed seeks to amend that specific section and that specific paragraph. It seems to me it is clearly germane, clearly within the authority of the House and the committee to deal with that specific power when we undertake to deal with all the powers.

Mr. GARRETT of Tennessee. Mr. Chairman, I think the gentleman who made the point of order, or some one who believes that it should be sustained, ought to present the matter, and if precedents are to be relied upon produce them. Those of us who do not think the point of order well taken should have those precedents cited. With reference to the precedents that exist on the subject—which I have no doubt are before the Chair—those which I have been able to find I think are clearly distinguishable from the case at bar.

Mr. LEHLBACH. Will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. LEHLBACH. I followed the procedure which took place earlier in the week, where a point of order having been made, those who offered the amendment were first heard, and then the person who made the point of order closed. I am perfectly willing to proceed with my point of order if the gentleman from Tennessee thinks it best.

Mr. GARRETT of Tennessee. I should be glad if the gentleman would do so.

Mr. LEHLBACH. Mr. Chairman, this is a Senate bill which was reported by the House Committee on the Merchant Marine and which, after consideration thereof, made a certain amendment and offered it as a new section. The committee amendment has no greater status than any amendment that might be offered during the consideration of the bill in Committee of the Whole House on the state of the Union by an individual Member.

On a certain occasion, by special order, certain bills were made in order on a certain date. A Senate bill such as this had been reported with a committee amendment striking out the original text of the Senate bill and substituting a committee amendment. A point of order that the original Senate bill did not fall within the class embraced by the special order was made. But the committee substitute would have been in order if that were before the House, and Mr. Speaker Cannon ruled as follows, and the ruling can be found in fourth volume of Hinds' Precedents, section 4623:

The substitute is a mere proposition of no higher grade than an amendment that might be offered by any Member. Perhaps the House might agree to the amendment and it might not. * * * The amendment can have no status, and if it gets consideration at all, it gets consideration by virtue of the bill which was referred to the Committee on Naval Affairs and reported back.

Of course we are considering a Senate bill that was referred to the committee and reported back, and we have now reached the point where we are considering an amendment recommended by the committee that reported back the bill. It is in exactly the same position as any other amendment that might have been offered by a Member on the floor, and the time for making the point of order, and the consideration whether it is in order or not, are exactly the same as if it were an amendment offered by an individual Member on the floor. I think there is no question on that subject.

Is it germane? Fortunately the Senate bill is short, and we can examine it with a good deal of particularity. The radio act of 1927 covered the field of radio and laid down permanent substantive law in accordance with which radio activities were to be governed and regulated, and it provided for an authority to carry out that permanent and substantive law. Certain of the functions of the commission created by that act to carry out some of these functions and to put into operation this permanent, substantive law by limitation would expire on the 15th of March next. The Senate passed this legislation for what purpose? In section 1 it provides that the power and authority vested in the Federal Radio Commission should continue until March 16, 1929, and that is all that section 1 does. It does not in the slightest particle alter the substantive permanent law that is written into the radio act of 1927. Section 2 provides that these commissioners shall continue to receive a salary at the rate of $10,000 a year while they continue to exercise these functions. It does not in the slightest particular touch the permanent, substantive law written in the act of 1927. Section 3 provides that this commission during its functioning and for a few months thereafter, until January 1, 1930, shall not issue licenses under the act for more than six months and one year. It does not in any way alter the permanent, substantive law with respect to the length of time for which licenses should be issued, but merely restricts the functioning for a short period of time and leaves the law unchanged. That is all there is here. How an amendment that radically and vitally changes the substantive law on the subject of radio can be germane to such a proposition is more than I can see.

Mr. BLACK of Texas. Mr. Chairman, will the gentleman yield?

Mr. LEHLBACH. Yes.

Mr. BLACK of Texas. Section 1 of the bill provides for the continuing of the commission and also affirmatively provides that all power and authority vested by the radio act of 1927 shall continue.

Mr. LEHLBACH. Why, surely.

Mr. BLACK of Texas. Would it not be parliamentary to add, for example, at the end of that section—

Provided, That the licensing authority shall make an equal allocation to each of the five zones established in section 2, etc.

If that would not be germane, why not?

Mr. LEHLBACH. Because that would be changing the substantive law, which is not the purpose of the bill which we are considering and to which this proposition is intended to be appended. Mr. Chairman, I want now to cite the authorities. They are more to the point than in a much closer case that was decided the other day and sustained by the House by a vote of 209 to 33, and I respectfully refer the Chair to the authorities that were involved in that decision without repeating them. I do call the attention of the Chair to one precedent, which is so absolutely in point as to settle this question without any further doubt at all, and that is to be found in Fifth Hinds', section 5806. On the 24th of April, 1900, while Mr. Henderson was Speaker and was occupying the chair, the gentleman from Wisconsin, Mr. HENRY A. COOPER, from the Committee on Insular Affairs, reported a joint resolution of the Senate, the purpose of which was to continue the existing arrangement for the government of Porto Rico for another period. To that bill the Committee on Insular Affairs attached an amendment to regulate the issuing of franchises in Porto Rico. How can anything be more pat? Here is a bill extending the authority of the present commission with respect to its functions in radio, just as the temporary government was sought to be extended. In neither case was the substantive law in question. An attempt was made at that time to bring in an amendment to change the substantive law and it was ruled out of order, and Speaker Henderson says this:

The resolution is for the sole purpose of extending the time in regard to the putting in operation of the new government of Porto Rico. The amendments are entirely outside of that question and enter upon amendments of the law in respect to matters entirely outside of that question.

Here we have a bill to extend the powers of the Radio Commission, just as the temporary government of Porto Rico was sought to be extended. In that case there were substantive propositions of law attached as amendments, just as here is an amendment changing the substantive law with respect to radio. It was out of order in that case just as it is out of order in this case.

The CHAIRMAN. The Chair would direct the attention of the gentleman from New Jersey to the original section 4 which came from the Senate, and which was a part of the Senate bill, and would ask him whether, in his opinion, that would alter the views that he has expressed.

Mr. LEHLBACH. No, it would not; because that deals entirely with the term of the members of the commission. It does not deal with the substantive propositions of the radio law at all. It deals with the terms of the commission, just as section 2 deals with the salaries and section 1 with the functions.

Mr. BEEDY. Will the gentleman yield to me?

Mr. LEHLBACH. Yes; I yield to the gentleman from Maine.

Mr. BEEDY. Has the gentleman examined the organic law of Porto Rico as it existed at the time of the precedent which he cites?

Mr. LEHLBACH. No.

Mr. BEEDY. It would be well if he were able to inform the House whether there was in that organic act any provision of law empowering the government of Porto Rico to regulate the issuance of franchises.

Mr. LEHLBACH. The gentleman did not believe that was in point, and therefore did not go back to the record as to whether the common law or the organic law by which the Territory is governed was referred to, or whether it was the specific law with reference to Porto Rico. It did not make any difference because here was an amendment to alter existing law.

Mr. BEEDY. If the gentleman from New Jersey will permit me, I would direct the attention of the Chairman in his construction of the precedent cited to the fact that it is most pertinent to know whether the amendment offered by the Committee on Insular Affairs attempted to vest new power in the Porto Rican government or whether it modified existing law. If the former, then clearly the decision was correct under the facts of the case there presented; but it would not necessarily be controlling in the case now before the Chair. Here the provision creates no new power, but places a limitation on existing authority. I submit to the Chairman that the precedent cited by the gentleman from New Jersey clearly would not be in point unless he can show that there was in existing Porto Rican law a provision which authorized the existing government of Porto Rico to deal with franchises. If such were the fact, the precedent becomes more persuasive.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield? I wish to ask a question.

Mr. LEHLBACH. Yes.

Mr. COOPER of Wisconsin. Do I understand that the motion or bill or resolution, whatever it was, in that case was to extend the time, and for what?

Mr. LEHLBACH. To extend the time for the provisional government of Porto Rico.

Mr. COOPER of Wisconsin. Was it to extend the term of office?

Mr. LEHLBACH. I do not clearly recollect what was the subject of the resolution.

Mr. GARRETT of Tennessee. Mr. Chairman, I have before me the record and expect to read it to the Chair.

Mr. COOPER of Wisconsin. I will simply state to the gentleman from New Jersey that the extension of terms of officers might have been the purpose of the express phraseology of that. But this is to change the content of the amendment entirely.

Mr. GARRETT of Tennessee. When I was informed that there would be a point of order interposed to the committee amendment, I made an examination of the precedents, and, of course, I found there, as one of the first, the case which the gentleman from New Jersey [Mr. LEHLBACH] has cited, section 5806 of Hinds' Precedents, to be found in volume 5 thereof. I will say very frankly that when I came to analyze that decision and to analyze this situation more carefully than was done in a casual reading it occurred to me that it was a precedent that might be decisive of the question. But upon the examination of the CONGRESSIONAL RECORD itself and a reading of the precise thing that was in the resolution reported by the gentleman from Wisconsin I came to the conclusion that the case at bar can be clearly differentiated from the one which existed there. I have before me the CONGRESSIONAL RECORD of April 24, 1900, and I should like to read the resolution which had passed the Senate and which was reported by the Committee on Insular Affairs and presented by the gentleman from Wisconsin [Mr. COOPER]. I read:

That until the officer to fill any office provided for by the act of April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," shall have been appointed and qualified, the officer or officers now performing the civil duties pertaining to such office may continue to perform the same under the authority of said act; and no officer of the Army shall lose his commission by reason thereof: *Provided,* That nothing herein contained shall be held to extend the time for appointment and qualification of any such officers beyond the 1st day of August, 1900.

Now, to that the House committee adopted certain amendments, which fell before the point of order, or rather would have fallen before the point of order but for the fact that later on the Speaker held that the point of order came too late.

Those amendments that were proposed by the committee I shall not read, but there were two of them, and they went into section 32 of the act apparently passed in that section of Congress, and undertook to amend that section 32 by a very elaborate provision touching the question of franchise to be granted in Porto Rico.

Now, Mr. Chairman, I have before me the radio act of 1927 and I desire to read section 9 thereof, which is very brief and which it is proposed to amend here. I read:

SEC. 9. The licensing authority, if public convenience, interest, or necessity will be served thereby, subject to the limitations of this act, shall grant to any applicant therefor a station license provided for by this act.

In considering applications for licenses and renewals of licenses when and in so far as there is a demand for the same, the licensing authority shall make such a distribution of licenses, bands of frequency of wave lengths, periods of time for operation, and of power among the different States and communities as to give fair, efficient, and equitable radio service to each of the same.

No license granted for the operation of a broadcasting station shall be for a longer term than three years and no license so granted for any other class of station shall be for a longer term than five years, and any license granted may be revoked as hereinafter provided. Upon the expiration of any license, upon application therefor, a renewal of such license may be granted from time to time for a term not to exceed three years in the case of broadcasting licenses and not to exceed five years in the case of other licenses.

No renewal of an existing station shall be granted more than 30 days prior to the expiration of the original license.

That is all of section 9.

Now, Mr. Chairman, Senate bill 2317, the bill before the Committee of the Whole, is not merely an extension of the time of the Radio Commission. It contains positive, substantive matters of law changing the existing law which I have just read to the Chair. In the first place, as was pointed out by the gentleman from Maine, in the very first section of the act there is the general extension of all powers and authority vested in the Federal Radio Commission, including its authority to issue licenses. But go to section 3 of the Senate bill. There you find your modification and there you find legislation entirely new in character changing the third paragraph of section 9 of the law. This proposal changes the time which was there fixed, and makes what the gentleman from New Jersey is pleased to designate as substantive, positive law.

Now, section 9 is being amended in a material respect, a very material respect. The committee comes with a proposal to further amend section 9, but not bringing in some new law, as was proposed to be done by the Committee on Insular Affairs back in 1900, when they attached extraneous matter to a simple resolution extending the time for the appointment of certain officers in Porto Rico.

We have in section 3 of the Senate bill a change of existing law, law asserted in section 9 of the original radio act. The committee simply proposes to go further and by an amendment amend another clause of the very same section brought before the House by the Senate bill, both of them embraced in the authority and the power of the Radio Commission, which by the terms of the first section of the act is being extended in this measure.

Mr. MOORE of Virginia. May I ask the gentleman a question?

Mr. GARRETT of Tennessee. Certainly.

Mr. MOORE of Virginia. Does not the case stand exactly as though the Senate, instead of using the general language the gentleman has read, should have embodied all of the provisions of the act of 1927 in this bill with respect to the powers of the commission?

Mr. GARRETT of Tennessee. That is, if they had sought to reenact it in hæc verba.

Mr. MOORE of Virginia. In hæc verba instead of by general language?

Mr. GARRETT of Tennessee. Unquestionably that addresses itself to my mind as being absolutely sound.

Now, it seems to me, Mr. Chairman, that unquestionably when we come to examine the language of the law, the language of the proposed act, we can differentiate from both the cases that are laid down in the precedents, one of which has been cited by the gentleman from New Jersey and the other of which was quoted in that same decision rendered by Mr. Speaker Henderson in 1900.

Therefore, Mr. Chairman, I respectfully submit that the committee amendment is germane and is in order.

Mr. LEHLBACH. Mr. Chairman, I just want to make one observation. The test, in accordance with the argument of the gentleman from Tennessee, is whether the Senate bill in any way amends section 9 of the radio law. It does not amend section 9 in a jot or tittle; it does not cross a "t" or dot an "i," and section 9 remains exactly as it is in the law. The purpose of the bill is to extend the powers of the commission until March 16, 1929, and then, by section 3, it limits the exercise of the powers described in section 9 up to January 1, 1930. It leaves the permanent law just as it is now.

Mr. STEVENSON. Will the gentleman submit to a question?

Mr. LEHLBACH. Surely.

Mr. STEVENSON. Suppose this act were not passed. Will not the act of 1927 terminate at the date fixed?

Mr. LEHLBACH. No.

Mr. STEVENSON. The commission terminates absolutely.

Mr. LEHLBACH. It is the permanent law until repealed, and this merely terminates certain functions of the commission. That is all.

Mr. CRISP. Will the gentleman yield to me for a question?

Mr. LEHLBACH. Surely.

Mr. CRISP. I understood the gentleman to say that the Senate bill in no wise changes section 9 of the radio law?

Mr. LEHLBACH. No. As a permanent, legal proposition, it remains absolutely unchanged.

Mr. CRISP. What does the gentleman say to the proposition in the Senate bill changing the term of years for which, under the original law, they could issue licenses, because the Senate amendment changes the original act by providing that licenses shall be issued for six months and one year instead of three years and five years. Is not that a substantial change in the original law dealing with the authority to issue licenses? The House committee proposes to amend the Senate amendment by a further reduction of the time of the license.

Mr. LEHLBACH. That is just the very gist of my argument. The bill does not provide a permanent method of issuing licenses. The law of the land is that licenses shall be issued for three years and five years. That remains unchanged. All this does is by section 1 to extend the functions and powers of the commission and tells them how to exercise those powers. We put a limit on licenses up to January 1, 1930, but leave the permanent law exactly in the shape it now is.

Mr. NEWTON. Mr. Chairman, in the radio act of 1927 authority is granted to two different governmental agencies. Throughout the body of the act the expression "licensing authority" is used. Now, in the first instance, the licensing authority is the Radio Commission. After the Radio Commission shall have functioned they then go out of existence under the terms of the original act, and the licensing authority then devolves upon another agency of the Government, the Department of Commerce.

Now, turning to section 1 of the bill that is before us and which has formed the basis of the remarks of the gentleman from Maine and, to a large extent, of the gentleman from Tennessee, what do we find? We do not find that the powers of the "licensing authority" are changed. All we find is this:

> That all the powers and authority vested in the Federal Radio Commission by the radio act of 1927 shall continue to be vested in and exercised by the commission until March 16, 1929; and wherever any reference is made in such act to the period of one year after the first meeting of the commission, such reference shall be held to mean the period of two years after the first meeting of the commission.

It is apparent that powers are extended not to the "licensing authority" but to only a portion of the "licensing authority"; that is, to the commission itself. The Senate wanted to extend the life of the commission. I have the Senate report here. The substance of that report has to do with the difficulties that the commission has been up against, the failure of the appropriation, the inability to get together, and the desire to give the commission additional time within which to function.

Getting down to the committee amendment, what do we find? We find that the committee amendment changes the substantive law, the second portion of section 9, so that the "licensing authority" shall do certain things. This includes not only the Radio Commission but likewise the Department of Commerce. So that the statement that was made by the gentleman from Virginia that instead of using section 1 of the bill they might just as well have reenacted every part of the original act having to do with this subject does not apply, because section 1 only extends the powers of the Radio Commission, while the amendment seeks to extend the powers not only of the commission but of the Department of Commerce. I submit, Mr. Chairman, that the terms of the amendment are in no sense germane to the bill.

Mr. CRISP. Mr. Chairman, I shall endeavor not to repeat, and yet I am frank to say I can add practically nothing to what has been so well said by the Chairman of this committee, the gentleman from Maine [Mr. WHITE], and the gentleman from Tennessee [Mr. GARRETT].

In addressing the Chair on this point of order, of course, the merits or demerits of the amendment are not to be considered. While I personally favor the amendment, this has no bearing on the situation. The question for the Chair to decide is whether or not this amendment is germane.

Now, Mr. Chairman, I am familiar with the decision in which it was held by Speaker Henderson that you could make a point of order against an amendment added to a Senate bill by a House committee.

I think the Chair could render the House a service by overruling this decision, for I do not believe the decision is well founded. What is the object in parliamentary law of requiring that proposed amendments be germane? It is to keep the House from being taken by surprise in voting upon an amendment that has not been considered or digested or reported by a committee of the House. The natural presumption is that the committees of this House, whose members are intelligent men and good legislators, would not report an amendment to a bill which they were considering that did not relate, that was not relevant, that was not germane to the matter they were considering.

Now, what does this Senate bill do, Mr. Chairman? This Senate bill reenacts the radio control bill; and the body of the bill itself expressly says that all powers conferred on the Radio Commission by the original act are continued, with certain changes and limitations, and the Senate limits it and changes section 9, dealing with the issuing of licenses. The Senate bill itself, in section 3, in dealing with the issuing of licenses for radio and the permits which were issued under the original act, reduces and cuts down the time from three years and five years to one year and six months. This is a sub-

stantive change. The House committee proposed an amendment still further reducing the time for which licenses may be granted.

Now, Mr. Chairman, the Congress is not prohibited from changing any act of Congress if Congress sees fit to do it. There is nothing sacred about an act of Congress; and if Congress desires to change the act creating this Radio Commission, Congress can do it with whatever limitations or changes it desires to make.

The Senate bill in this instance proposes to amend section 9 by curtailing the time for which the licenses can be issued. Now, Mr. Chairman, will this House of Representatives take the position that the Senate has more legislative power in proposing amendments than we have?

Will you take the position that the Senate can amend the radio act by changing section 9, reducing the time that these licenses may be issued, but, forsooth, the House of Representatives is impotent and can not change the same section of the original radio act by providing in what manner these licenses shall be issued?

To my mind it is inconceivable how anyone can hold, under the facts in this case, this amendment is not germane.

Whether we ought to accept it is another matter, but I hold that under the facts in this case this amendment, dealing with a bill extending all the powers and all the provisions of the radio act is the same as if every one of those sections was enumerated in the bill. The Senate amended the original radio act by curtailing the period for which licenses can be issued, and further amended it by expressly changing the time and the term of service of the commissioners, then to say the House of Representatives can not offer an amendment dealing with the manner and method under which these licenses shall be granted seems to me making the legislative body absurd and ridiculous. The amendment is unquestionably germane to the bill, and in my opinion there is no merit in the point of order.

Mr. BEGG. Mr. Chairman, I want to consume one minute in calling the Chair's attention to this fact: If there was no legislation enacted, the radio basic law of 1927 would remain as it is to-day. But the commission of five men who were appointed, or supposed to have been appointed, to execute the basic law would go out of existence on March 15. If this bill is intended to do anything other than continue in office these men, the title is misleading, because the only thing contained in the title is the extension of the life of the commission.

Mr. CRISP. If the gentleman will read the first few lines of the bill, he will see that "all the powers and authority vested in the Federal Radio Commission by the radio act of 1927 shall continue to be vested in and exercised by the commission," and so forth.

Mr. BEGG. Certainly, there is an extension of the life of the commission, and that is all there is to it. If section 4 does not change at all the way in which the commission shall function—in other words, if it does not change the basic law, it is germane. But I submit, Mr. Chairman, if section 4 does change in the least particular the manner in which the commission shall function, then it is not germane to the extension of the life of the commission.

Mr. CANNON. Mr. Chairman, I desire to subscribe to the argument advanced by the gentleman from Georgia [Mr. CRISP], and I especially indorse his suggestion that the theory under which amendments to Senate bills recommended by House committees have been held subject to points of order as to germaneness is fundamentally erroneous. I have often wondered why decisions so obviously out of keeping with the fundamental purposes of parliamentary law have been retained, and I agree with the gentleman from Georgia that the Chairman would render a service to the House if he overruled them. But this line of decisions is so well established and the gentleman has covered that subject so fully that I shall take only a minute or two to discuss a phase of the pending point of order not yet touched on.

The question of germaneness is ordinarily one of the most difficult questions relating to parliamentary procedure which Speakers and Chairmen are called upon to decide. The twilight zone between what is germane and what is not germane is frequently so wide that the Chair may often with apparently equal justification throw the weight of his opinion on either side as the exigencies of the occasion may demand.

But happily the proposition here presented falls within a class on which there is little room for difference of opinion. That is, the class of amendments germane and admissible under the doctrine of limitation. To a bill delegating a prerogative or function an amendment restricting the exercise of such prerogative or function is always germane. To a proposition to grant a general power an amendment limiting the power so proposed to be granted is germane and if otherwise in order is admissible.

And that is the proposition presented by the pending amendment. It has been contended that the bill merely proposes to extend the life of the commission and that no delegation of power is involved. But it is only necessary to read the title of the bill or the first section of the bill itself to note that it also continues "the power and authority" as well as the term of the commission. To continue power is to grant power. There can be no distinction. When the subject of continuing power and authority is brought into the House the subject of granting such power and authority is as truly under consideration as if submitted for the first time. And any proposition to limit the power and authority so sought to be conferred is therefore germane.

Permit me to refer the Chair to one or two decisions from the many which might be cited on this point. For example, on November 17, 1919, while the House was considering the railroad bill providing for the termination of Federal control of interstate carriers, a paragraph was read authorizing the Interstate Commerce Commission to change rates. An amendment was offered prohibiting the changing of rates upward. In other words, the amendment proposed a limitation of the power and authority granted by the bill. The question presented by the point of order raised against the bill was analogous with that before us to-day. The railroad bill proposed to grant the commission power to change rates. The pending bill proposes to grant the commission power to change radio allocations. The amendment to the railroad bill proposed to restrict the power of the commission by prohibiting the changing of rates in any way except by lowering them. The pending amendment here proposes to restrict the power of the commission by prohibiting the changing of allocations in any way except by allocating them equally. This is the proposition: That in the exercise of this unrestricted power to be given the Radio Commission to allocate facilities they must divide them equally——

Mr. LEHLBACH. Will the gentleman yield?

Mr. CANNON. I yield.

Mr. LEHLBACH. That is the existing law restricting the commission, it provides for reasonable service for all sections of the country, and this merely makes an added restriction, a mere direction.

Mr. CANNON. The gentleman concedes, then, that the proposal to delegate power is limited by this amendment? That is precisely the point at issue. Whether the power originally granted was limited is not material. It is sufficient that the pending amendment proposes further limitation.

The decision was handed down by Mr. Joseph Walsh, of Massachusetts, whose opinions are classics in the parliamentary history of the House. He held that the amendment constituted a restriction on the power to be conferred on the commission, and that as such the amendment was germane.

Another notable decision sustaining the doctrine of limitation was made in the Sixty-seventh Congress during the consideration of the bill to amend the act to regulate radio communication. This bill conferred on the Secretary of Commerce power and authority to regulate both interstate and intrastate communication. An amendment was offered proposing to reserve to the States the control of intrastate operations. A point of order being made that the amendment was not germane, the chairman, Mr. William H. Stafford, of Wisconsin, said:

> The measure under consideration is all pervading, so far as the regulation of radio communication is concerned. It is a general law, and in the first section covers radio communication among the several States or with foreign nations.

Similarly, the measure before us here is all pervading, so far as the power and authority granted to the Radio Commission is concerned. In that respect the two situations are identical. Both are general laws.

The Chairman therefore held:

> This being a general law, it is within the power of the committee to restrict it in whatever way it sees fit.

Just as the amendment before the committee proposes to restrict the powers of the Radio Commission.

> The extent of the jurisdiction to be exercised is for the committee to pass upon, and the Chair holds the amendment is germane and overrules the point of order.

Mr. Chairman, the records of all recent Congresses are interspersed with similar decisions. I shall not take time to more than refer to them, because those cited are typical and the committee is impatient. The doctrine of the germaneness of limitations in legislative bills is well summed up in the statement of Mr. James R. Mann, of Illinois, on June 1, 1917:

I am not in favor of the amendment, but here is a section which makes provision for the insurance of vessels. * * * A limitation upon that authority, of course, is germane to it.

So in the case at bar a proposition to limit the power of the commission which the bill proposes to extend is, of course, germane to it. To a proposal to grant powers or delegate authority, amendments limiting such powers or restricting the exercise of such authority are germane and are admissible. [Applause.]

The CHAIRMAN. The Chair is ready to rule. The Chair was advised that this point of order would be made, and therefore gave considerable study to it prior to the consideration this afternoon. The Chair realizes the importance of the issue, so far as the merits of the question before the committee are concerned, and has attempted to divest himself of any interest in that question in the determination of the point of order.

The bill, S. 2317, as it came from the Senate, read as follows:

An act continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes

Be it enacted, etc., That all the powers and authority vested in the Federal Radio Commission by the radio act of 1927, approved February 23, 1927, shall continue to be vested in and exercised by the commission until March 16, 1929; and wherever any reference is made in such act to the period of one year after the first meeting of the commission, such reference shall be held to mean the period of two years after the first meeting of the commission.

SEC. 2. The period during which the members of the commission shall receive compensation at the rate of $10,000 per annum is hereby extended until March 16, 1929.

SEC. 3. Prior to January 1, 1930, the licensing authority shall grant no license or renewal of license under the radio act of 1927 for a broadcasting station for a period to exceed six months and no license or renewal of license for any other class of station for a period to exceed one year.

SEC. 4. The term of office of each member of the commission shall expire on February 23, 1929, and thereafter commissioners shall be appointed for terms of 2, 3, 4, 5, and 6 years, respectively, as provided in the radio act of 1927.

The committee amendment, as to which a point of order has been made, reads as follows:

SEC. 4. The second paragraph of section 9 of the radio act of 1927 is amended to read as follows:

"The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area."

The Senate bill amended in certain particulars the radio act of 1927, which the Chair has before him. The Chair believes it in point to consider the structure and contents of that law. It is a large enactment, covering 15 pages of the usual public law print, and contains over 10,000 words. It relates to a large number of subjects in connection with "the regulation of radio communications." The first section states the general purposes of the act. The second section creates the five zones into which the country is divided for the purposes of the act.

The third section establishes the Federal Radio Commission. The fourth section states the authority of that commission. The fifth section provides for the transfer after the expiration of one year of a large part of the authority granted to the commission to the Secretary of Commerce. The law then contains numerous provisions regarding radio stations owned by the United States and provides for the use of private radio stations and facilities by the Government in time of emergency. Then follow a number of sections relating to the granting of licenses, beginning with section 9 and running through sections 10, 11, 12, 13, and 14, all of them relating to the matter of granting licenses, not only to broadcasting stations but to other stations. Section 15 relates to the matter of violations of law as to unlawful restraints and monopolies. Section 16 relates to appeals to the courts by persons dissatisfied with the action of the commission or of the Secretary of Commerce. Thus, throughout the bill a large number of subjects are treated, all relating to the general subject of radio communication and the control of radio operations and facilities by the Federal Government, including prosecutions and penalties for violations of the act. It will be seen, therefore, that the pending bill affects only a very small portion of the radio act of 1927 and can not be said to be a general revision of that act.

There are two main questions involved here, one of which has been raised only incidentally by the suggestion of the gentleman from Georgia [Mr. CRISP] that in his opinion it would be well if there would be a reversal of the decisions heretofore made with reference to the rules applicable to committee amendments, as affecting perhaps particularly amendments to Senate bills. Of course, the present occupant of the chair would not feel warranted in overruling a rather long line of decisions by very distinguished Chairmen and Speakers. The Chair thinks that it is clear that a committee amendment is subject to the same rules with respect to germaneness and all other limitations as are amendments proposed on the floor.

The gentleman from Tennessee [Mr. GARRETT] made reference to the precedent in Hinds' Precedents, volume 5, paragraph 5806, page 411, where the introductory paragraphs read as follows:

To a bill amendatory of an existing law as to one specific particular an amendment relating to the terms of the law rather than to those of the bill was held not to be germane.

The rule that amendments shall be germane applies to amendments reported by committees.

It was the case in which the gentleman from Wisconsin [Mr. COOPER] offered amendments on behalf of the Committee on Insular Affairs to the law relating to the government of Porto Rico. As the Chair understood it, the gentleman from Tennessee said that at first he was quite impressed with the force of this precedent as applicable to the instant case. The Chair is quite impressed with the force of this precedent, and wishes to call attention to the very close similarity of the case now before the committee and that which then arose. It was on April 24, 1900, and the Chair now refers to the CONGRESSIONAL RECORD, volume 33, part 1, Fifty-sixth Congress, first session, page 4613. The gentleman from Wisconsin obtained consent for the consideration of Senate Joint Resolution 116, entitled:

Joint resolution to provide for the administration of civil affairs in Porto Rico pending the appointment and qualification of the civil officers provided for in the act approved April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes."

The act itself provided as follows:

That until the officer to fill any office provided for by the act of April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," shall have been appointed and qualified, the officer or officers now performing the civil duties pertaining to such office may continue to perform the same under the authority of said act; and no officer of the Army shall lose his commission by reason thereof: *Provided*, That nothing herein contained shall be held to extend the time for appointment and qualification of any such officers beyond the 1st day of August, 1900.

It will be noted that here was a provision for the continuation of a system of government in Porto Rico, with a limitation as to when that system of government should expire, just as in the pending bill there is a provision for a continuation of the work and authority of the Radio Commission within the limit of the period of one year. Neither the Porto Rican act nor the present bill, as passed by the Senate, changed the permanent provisions of the laws whose operations were thus temporarily extended.

The gentleman from Wisconsin [Mr. COOPER], on behalf of the Committee on Insular Affairs, offered two amendments relative to certain "franchises, privileges, and concessions," as to the granting and effect of which various preliminary requirements and restrictions were proposed, and subsequently the question arose as to the germaneness of those amendments.

The question raised here in debate was as to whether the original law which was then being extended in time of operation contained anything with reference to the very franchises, and so forth, to which the amendments referred. On that question the Chair will say that the amendments were specifically directed to section 32 of the act, which was then in question, and which read as follows:

SEC. 32. That the legislative authority herein provided shall extend to all matters of a legislative character, not locally inapplicable, including power to create, consolidate, and reorganize the municipalities, so far as may be necessary, and to provide and repeal laws and ordinances therefor; and also the power to alter, amend, modify, and repeal any and all laws and ordinances of every character now in force in Porto Rico, or any municipality or district thereof, not inconsistent with the provisions hereof: *Provided, however*, That all grants of franchises, rights, and privileges or concessions of a public or quasi-public nature shall be made by the executive council, with the approval of the governor, and all franchises granted in Porto Rico shall be reported to Congress, which hereby reserves the power to annul or modify the same.

So that in the act, which was amended by the Senate bill providing for the temporary continuance in office of certain officers, there was actually contained a provision with reference to the franchises, privileges, and concessions to which the

amendments offered by the gentleman from Wisconsin, on behalf of the Insular Affairs Committee, related, and still the Speaker held that the amendments were not germane.

That decision was delivered by Mr. Speaker Henderson, of Iowa, who said:

The Chair thinks that much of the difficulty in the minds of Members comes from the fact that the joint resolution sent from the Senate and the amendments added by the Committee on Insular Affairs all refer to the same statute, the Porto Rican bill, that became a law some time ago. The question as to whether these sections are germane can not be determined by the title alone, as has been suggested, because an act amending an act will always describe the title amended, although it may only touch one feature or part of the law; but the whole resolution has to be considered and the amendments to the resolution. If this was not clear, possibly the title would be brought into consideration. But there is not a particle of doubt as to the purpose of this resolution or as to the purpose of the amendments.

The resolution is for the sole purpose of extending the time in regard to the putting in operation of the new government of Porto Rico. The amendments are entirely outside of that question and enter upon amendments of the law in respect to matters entirely outside of that question. They have no relation in any shape or form to the proposition of the joint resolution. It will not be contended that if the Committee on Rules brought in a report to amend one rule, that thereby, by an amendment, you would open up for consideration of the House all the rules. A suggestion has been made by one gentleman as to the authority cited, and it is seldom within the power of the Chair to find an authority so completely on all fours like this. In that case the bill treated on the forfeiture of land grants, and the amendment was a regulation as to the forfeiture of lands, bearing upon the same subject, and that therefore they are not similar.

The case that the Chair has cited shows clearly that it was an amendment on the subject of the time when certain regulations went into operation. This joint resolution is for the same purpose. The amendments here are for wholly another purpose; and every Member of the House must see that no one of these amendments is germane to the original resolution. Suppose the original resolution was before the House for consideration and a Member should move to recommit with instructions to add these amendments. The point of order could be made at once that they were not germane and that the motion to recommit could not be held to be in order when it was asked to do in the House what could not be done in the committee. The case is perfectly parallel with the other. The Chair profoundly regrets that he has to sustain the point of order that it is not germane.

The case referred to, in this decision, is discussed on page 412 of Hinds' Precedents, Volume V, section 5807, where a Senate bill (S. 4814) was before the House, which was entitled "An act to amend an act to forfeit certain lands heretofore granted for the purpose of aiding in the construction of railroads, and for other purposes." To this bill Mr. Thomas H. Carter, of Montana, moved an amendment providing for a method of classification to determine the mineral or nonmineral character of lands selected by railroads. The Speaker (Mr. Thomas B. Reed, of Maine) sustained the point of order in the following language, which shows the similarity of that case to the one now pending:

The Chair can only consider, in determining the question, whether the amendment be germane to the bill before the House and the proposition therein contained. The pending bill relates solely to the time when a period named in the original act shall begin to run. The amendment proposed relates to a reclassification of lands, a subject so remote from that of the bill, that it can be justified only by a claim that any amendment germane to this act proposed to be altered would be germane to this bill. But the very claim is its own answer. The test must be the bill before the House, for that is the bill which is to be amended.

On March 9, 1928, the House was in Committee of the Whole House on the state of the Union considering Senate amendments to an Indian appropriation bill. One of those amendments read as follows:

That the time fixed for the Indian appropriation act approved June 7, 1897, for opening for location and entry, under all land laws of the United States, the lands of the Uncompahgre Indian Reservation in Utah, under the limitations and exceptions as therein provided, is hereby extended six months from the 1st day of April, 1898.

To this amendment Mr. James S. Sherman of New York offered an amendment, which provided, in substance, that the Secretary of the Interior should be authorized to lease the said reserved lands containing minerals upon such terms and conditions as to royalties, length of leases, assignments of the leases, and other "regulations and limitations," as the Secretary of the Interior might determine. Mr. KING of Utah interposed a point of order, claiming, among other objections, that the Sherman amendment was not germane to the Senate amendment then under consideration.

The Chairman, Mr. Hepburn, of Iowa, sustained the point of order that the Sherman amendment was not germane.

Reference has been made, in debate, to the decision of Mr. Speaker Cannon on February 11, 1905, when the Committee on Naval Affairs, under a special order of the House permitting the consideration, on that day, of certain private bills, by a substitute for a bill not in the privileged class, under the order, sought to bring the bill within the special order. Mr. Speaker Cannon then said (Hinds' Precedents, Vol. VI, Sec. 4623, p. 954):

The substitute is a mere proposition of no higher grade than an amendment that might be offered by any Member. * * * The amendment can have no status and if it gets consideration at all it gets consideration by virtue of the bill which was referred to the Committee on Naval Affairs and reported back.

Thus, in the case now before the committee, the amendments recommended to the Senate bill by the Committee on the Merchant Marine and Fisheries have no advantageous position on the question of germaneness, notwithstanding that committee has jurisdiction of the subject matter and the Senate bill was referred to it. The amendments must survive the same test as would amendments offered on the floor of the Committee of the Whole or of the House. What, then, is that test?

The rule was never better stated than by the distinguished gentleman from Tennessee [Mr. GARRETT], when he said on September 19, 1918, as reported in the advance sheets of Hinds' Precedents, in section 9776, that—

the meaning of the expression "germaneness"—

In the case then before him was—

that the fundamental purpose of the amendment must be germane to the fundamental purpose of the bill.

The latest decision on a question of this sort was made in an admirable opinion by the gentleman from New Jersey [Mr. LEHLBACH], on the 8th of this month, which occurs on pages 4368–4370 of the CONGRESSIONAL RECORD. That decision was sustained by the Committee of the Whole by the vote of 207 ayes to 33 noes. For the present record, it may be well to insert the statement in that decision as to the issue then involved. Chairman LEHLBACH said:

The Committee of the Whole House on the state of the Union has before it for consideration the text of the committee substitute for the Senate Joint Resolution 47. This substitute being read for the purpose of amendment, the gentleman from Alabama [Mr. BANKHEAD] offers the following amendment:

"SEC. 2. The House of Representatives shall be composed of Members chosen every fourth year by the people of the several States."

To this a point of order is made that the amendment is repugnant to the provisions of the rule on germaneness, which reads as follows:

"And no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment."

In order to determine whether this amendment is on a subject different from that under consideration it is necessary to examine the subject matter of the legislative proposition to which it is offered as an amendment. An examination of the entire article shows that it is composed of four sections having two distinct and definite purposes. Sections 1 and 2 provide that the term of the President shall commence on the 24th day of January and the terms of Senators and Representatives shall commence on the 4th day of January, instead of as now on the 4th day of March, and that the Congress shall assemble on the 4th day of January, instead of as now on the first Monday of December. That is the distinct proposition involved in the first two sections, the reason for the proposition being to abolish the session of Congress after its successor has been elected and to bring the session of the new Congress nearer the date of election, so that the Congress will be more responsive to the will of the people.

The other proposition deals entirely with who shall exercise the powers of the Chief Executive and perform his duties in the event of the failure to elect the President, Vice President, or both, or in the event of the death of the President elect, or the Vice President elect, or both. These are the distinct and clear-cut propositions involved in the article, and there are no other propositions.

There is no proposition to alter permanently the length of the terms of any of the officers dealt with, either President, Vice President, Members of the Senate, or Members of the House. While in one instance throughout the future history of the country the terms of these officers are shortened by two months, that is merely incident to moving forward the date of the assembling of Congress and the abolition of the session of Congress subsequent to election.

Now, an examination of the amendment offered by the gentleman from Alabama shows that its effect not only deals with the length of the term of the Members, but necessarily affects the make-up of the Senate and of the Congress. Although the Constitution does not in

express words say so, it is a necessary result of the structure of our legislature as laid down in the Constitution that a Congress begins with the term of the Members of the House of Representatives and ends with the expiration of the term of the Members of the House of Representatives. That is not the case with the Senate, because the Senate is considered a continuing body, one-third of its Members going out every two years.

So, if this amendment were adopted, it would result in this, that where now in each Congress every Member of the Senate and every Member of the House is a Member at the beginning and remains a Member of the Senate and House until the expiration of Congress, we would have a situation where one-third of the Members of the Senate who began with the Congress would go out in the middle of its work and one-third of the membership of the Senate would come in when the work of the Congress was half done. That shows that this proposition involves not merely the length of the term of the Members of the House of Representatives, and for that reason might be deemed germane to section 1, but other consequences by reason of which it could not be held germane to section 1.

That decision is almost on all fours with the pending question. What is the fundamental purpose of this Senate bill 2317? Who will say that it has any other purpose than to extend for another year the operation and the work of the Radio Commission which, under the radio act of 1927, was limited to one year?

Section 1 does it in about the same language as is employed in the other bills which have been heretofore quoted. Section 2 continues the salaries of the commissioners for this same work for another year. Section 3 makes an incidental provision with reference to limiting licenses during this enlargement of the activities of the Radio Commission, and section 4, which the House committee struck out but which must be considered in this connection was also a part of the general scheme for continuing the life of the commission for one more year along the same lines and with the same powers and for the same purposes as were contained in the original radio act of 1927, when the commission was granted certain powers for one year only. Nowhere in the original Senate bill is there any permanent fundamental change in the wide range of the substantive provisions of the radio act of 1927, to which the Senate bill is an amendment.

The amendment proposed by the House committee, which is now designated as section 4, relates to an entirely different subject. It provides for the permanent territorial distribution and allocation of broadcasting licenses, in respect of wave lengths and of station power, among the five zones created by the radio act of 1927, and to the distribution and allocation of such broadcasting licenses, not all licenses, but broadcasting licenses only, among the different States in proportion to population and area.

It seems clear to the Chair that the fundamental purpose, in fact, the sole object of the Senate bill is the temporary extension of the jurisdiction of the commission and that the other matters which are inserted by the Senate bill are merely incidental thereto. If that is so, then section 4 is not germane, because it relates to an entirely different subject matter.

The Chair therefore sustains the point of order that the committee amendment, designated as section 4, is not germane to the Senate bill.

Mr. CRISP. Mr. Chairman, I respectfully appeal from the decision of the Chair, and desire to be heard on that. [Applause.]

The CHAIRMAN. The gentleman from Georgia is recognized for five minutes.

Mr. CRISP. Mr. Chairman and gentlemen of the committee, the Chairman who has just made his ruling is one of my good friends. I know he is an able lawyer, but I think the decision is an erroneous decision and, therefore, I have respectfully appealed from the decision so you may pass on it.

I know the older Members of the House will believe me when I say I never have argued a point of order to any Chairman or taken any position on a parliamentary question but what I absolutely believed to be right under parliamentary law. [Applause.] Now, I may have been wrong, but I was sincere in the position I have always taken and I am sincere to-day in this position.

The fundamental purpose of this bill is not to continue the life of the commission but it is to continue this Radio Commission with all of its powers, including the power for 12 months to continue to issue licenses. The Senate bill not only extended all the powers for 12 months but it extended them with certain limitations. The Senate bill amended section 9 of the original radio act by saying that this commission, with its life extended, could only grant licenses for one year and six months, instead of five and three years, and the House committee still further amended it by striking out the one and three years and putting in three months and six months.

Now, gentlemen, do you want to tie yourselves? I apprehend that a majority of this House desires to adopt the Davis amendment. I am appealing to your common sense. If you do not believe the amendment germane to this Senate bill, then vote to sustain the Chair; if you do believe it germane, be true to yourselves, be true to your convictions, and be true to your legislative duty, for you have as much right to say what the rules of this House are as the presiding officer. [Applause.]

I am not going to say any more. As I said, the Chairman is my friend, and I know he is a good lawyer. I give him credit for being sincere in his ruling, but I think he is wrong. I know I am sincere in my position. I know it is a legislative monstrosity to say this amendment is not germane to this bill which the House is now considering, and I ask you to do the intelligent thing by expressing yourselves to the effect that the House can consider it. That does not mean of necessity that the House adopts it. That simply gives you an opportunity to pass upon it. The Chairman of this committee, who is my friend, is not thin-skinned or sensitive. He will take no offense if he is reversed, and he will not be the first Chairman of this House or the first Speaker of this House who has been reversed in a ruling, and I am sure he will not be the last one.

I believe this amendment is in order and, therefore, I respectfully appeal from the decision of the Chair to give you an opportunity to pass upon it. [Applause.]

Mr. LEHLBACH. Mr. Chairman, I beg the indulgence of the committee for about 60 seconds. The gentleman stated correctly that the Senate bill was for the purpose of extending the powers and authority of the Radio Commission for 12 months with certain limitations. If section 4 were a limitation upon the powers and authority of the Radio Commission during the period for which their powers and authority are extended, it would be in order, but it does not refer to the functioning of the Radio Commission for the next 12 months. It changes, until amended, for all time the basic law with respect to radio, no matter who exercises the function, which will be the Secretary of Commerce after the 12 months if this bill passes. Consequently, it is in no sense germane. [Applause.]

The CHAIRMAN. The question is, Shall the decision of the Chair stand as the judgment of the committee?

Mr. CRISP. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The Chair appointed as tellers Mr. LEHLBACH and Mr. CRISP.

The committee divided; and the tellers reported—ayes 140, noes 168.

So the decision of the Chair was not sustained as the judgment of the committee.

Mr. WHITE of Maine. Mr. Chairman, by authority of the Committee on the Merchant Marine and Fisheries I offer an amendment to this section.

The CHAIRMAN. The gentleman from Maine offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment to the committee amendment by Mr. WHITE of Maine: Amend section 4 by inserting, in line 21, after the word "States," the words "including the District of Columbia and the Territories and possessions," and by striking out the words "and area" in line 22, so that as amended the amendment will read:

"The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power, and within each zone shall make a fair and equitable allocation among the different States, including the District of Columbia and the Territories and possessions thereof, in proportion to population."

Mr. WHITE of Maine. Mr. Chairman, the first part of the language of the amendment is purely clerical. The language which we sought to amend by the committee amendment did not make reference to the District of Columbia or the Territories or possessions of the United States. Manifestly, this language should be carried in the amendment.

The second part of the amendment seeks to avoid a dual standard, a measure by population and a measure by area, and to set up in lieu thereof the single standard of population.

Mr. BURTNESS. Will the gentleman yield for a question?

Mr. WHITE of Maine. Yes.

Mr. BURTNESS. Is there any objection to splitting this amendment in two so that there may be a division of the questions involved in the amendment?

Mr. WHITE of Maine. That is not for me to say. I would rather dispose of it all at once.

Mr. GRIFFIN. Mr. Chairman, I offer an amendment as a substitute both to the amendment in the bill and the amendment offered by the gentleman from Maine.

The CHAIRMAN. The gentleman from New York offers a substitute to what?

Mr. GRIFFIN. To the lines in the bill and to the amendment offered by the gentleman from Maine.

The CHAIRMAN. The amendment of the gentleman from Maine is not yet a part of the amendment offered by the committee.

Mr. GRIFFIN. I am offering my amendment as a substitute for the gentleman's amendment.

The CHAIRMAN. The gentleman offers an amendment as a substitute for the amendment offered by the gentleman from Maine, which the Clerk will report.

The Clerk read as follows:

Substitute amendment by Mr. GRIFFIN: Strike out lines 15 to 22, inclusive, and insert: "Each of the five zones established in section 2 of this act shall be entitled to an equal allocation of broadcasting licenses, of wave lengths, and of station power; and the licensing authority shall make a fair and equitable allocation among the different States and the District of Columbia within each zone so far as practicable in proportion to population and demand for service."

Mr. BLACK of Texas. Mr. Chairman, I make the point of order that the amendment is not a substitute for the pending amendment. It seems to me it would now be in order to have a vote upon the amendment to the amendment and then if the gentleman from New York wants to offer his amendment as a substitute for the amendment as amended, it would be in order. I make the point of order it is not in order as a substitute for the pending amendment.

The CHAIRMAN. The point of order is sustained. The question is on the amendment offered by the gentleman from Maine.

The amendment to the committee amendment was agreed to.

The CHAIRMAN. The question now recurs on the committee amendment as amended.

Mr. GRIFFIN. Mr. Chairman, I now offer my amendment.

The CHAIRMAN. To which the gentleman from New York offers the substitute which has already been reported. Without objection, it will not again be reported, and the gentleman from New York is recognized.

There was no objection.

Mr. GRIFFIN. Mr. Chairman and colleagues, we have listened to a long debate. I have given the arguments on both sides the closest attention and have come to the conclusion it has all been a "tempest in a teapot."

I do not think there is a blessed soul in this House coming from any part of the country who is opposed to the fundamental principle underlying the Davis amendment. Nobody is opposed to an equal distribution of licenses, of stations, of wave lengths, and of power. This is not the point. All of the arguments over which so much time has been spent are confessedly the result of the ambiguity of section 4, and which, I am sorry to note, the amendment of the gentleman from Maine [Mr. WHITE] does not cure.

The burden of the debate on this bill has fallen on the construction of the so-called Davis amendment, which reads as follows:

The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act, of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area.

Its purpose, I think, is to freeze into the law a rule of conduct to be followed by the commission, but the fear is expressed that it goes further than the mere expression of the right of each of the five zones to an equality of broadcasting facilities. Objection is made to the use of the term "shall."

The sponsors of the amendment deny that the word "shall" is mandatory. Nevertheless, the word "shall" is a mandatory word and, in my opinion, the fears of some of the bigger stations have some justification.

It is probable that the courts will take into consideration in any adjudication of the matter the intent of the sponsors of this amendment, but why should language be used so ambiguous in its form as to invite litigation and long-drawn-out adjudications?

Now, gentlemen, they anticipate this very objection in the report. They say:

The equality here sought is not an exact mathematical division. The language does not contemplate the withdrawal of station licenses, of power, and of wave length from others and an impounding thereof in the absence of applications from the third or other zones therefor.

Further along they say:

This equality does not necessarily require the reduction of all other zones to the level of the least favored.

What an absurdity to frame a bill so obviously inexact in terms that it must be explained in the report! On the other hand, if your bill tells what you mean, what is the necessity of explaining it? Why not use the precise language that you have in mind—that all the zones shall be entitled to equal allocations.

Having this point in view, my amendment substitutes the following language for that in the bill, to wit:

Each of the five zones established in section 2 of this act shall be entitled to an equal allocation of broadcasting licenses, of wave lengths, and of station power; and the licensing authority shall make a fair and equitable allocation among the different States and the District of Columbia, so far as practicable, in proportion to population and demand for service.

This language is in strict conformity to the assurances of the proponents of the measure and simply freezes into the law a principle of allocation to be followed by the commissioners without raising the question of vesting in them the power to revoke licenses already existing, changing wave lengths, and scrapping stations. My amendment expresses what is admitted by the sponsors of this bill to be in their minds but which they have failed to express clearly in the bill.

Mr. WHITE of Maine. Mr. Chairman, I move that all debate on this amendment and all amendments thereto close in one minute.

The motion was agreed to.

Mr. WHITE of Maine. Mr. Chairman, I hope the amendment now offered by the gentleman from New York will not prevail. When I am in doubt as to the language of an amendment as to what it does or does not do, I am instinctively against it; and that is my attitude in regard to this amendment offered by the gentleman from New York. I do detect, however, the omission of all reference to Territories and possessions of the United States. Clearly in that respect it is defective. I believe the committee amendment as now perfected accomplishes what a clear majority of the House desires. Therefore I hope the pending amendment will be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. GRIFFIN].

The question was taken, and the amendment was rejected.

Mr. CELLER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 1, line 2, add a new paragraph to section 4, as follows:

"Just compensation shall be made for the closing of any radio broadcasting station or for substantial impairment of any radio broadcasting station resulting from the action of the Radio Commission hereunder. The person entitled to such just compensation shall be entitled to sue the Government of the United States in the Court of Claims in the manner provided by section 24, paragraph 20, section 145, of the Judicial Code, as amended."

Mr. JOHNSON of Washington. I make the point of order that we have passed that section.

The CHAIRMAN. On that point of order, that it was not offered at the proper place, the Chair sustains the point of order. The question is on adopting the committee amendment as amended.

The question was taken; and on a division, there were 175 ayes and 83 noes.

So the committee amendment as amended was agreed to.

Mr. WHITE of Maine. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The rule provides for the rising of the committee.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes, had directed him to report the same back with sundry amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

The SPEAKER. Under the rule the previous question is ordered. Is a separate vote demanded on any amendment?

Mr. LEHLBACH. Mr. Speaker, I ask for a separate vote on the amendment, including section 4.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them in gross.

The other amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote is asked.

The Clerk read as follows:

Page 2, after line 14, add the following:

"SEC. 4. The second paragraph of section 9 of the radio act of 1927 is amended to read as follows:

"'The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States, including the District of Columbia and the Territories and possessions thereof, in proportion to population."

The SPEAKER. The question is on agreeing to the amendment.

Mr. LEHLBACH. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 235, nays 135, not voting, 64, as follows:

[Roll No. 46]

Combs	Jenkins	Quayle	Treadway
Connally, Tex.	Johnson, S. Dak.	Ransley	Updike
Connolly, Pa.	Kiess	Rathbone	Wason
Davey	Kindred	Sabath	Watson

So the amendment was agreed to.

The Clerk announced the following pairs:

On the vote:

Mr. Bankhead (for) with Mr. Treadway (against).
Mr. De Rouen (for) with Mr. Quayle (against).
Mr. Jenkins (for) with Mr. Igoe (against).
Mr. Chase (for) with Mr. Buckbee (against).
Mr. Spearing (for) with Mr. Updike (against).
Mr. Goldsborough (for) with Mr. O'Connor of New York (against).
Mr. Magrady (for) with Mrs. Norton (against).
Mr. Palmer (for) with Mr. Sweet (against).

General pairs until further notice:

Mr. Connolly of Pennsylvania with Mr. Connally of Texas.
Mr. Dowell with Mr. Harrison.
Mr. Hughes with Mr. Kunz.
Mr. Kiess with Mr. Sirovich.
Mr. Michaelson with Mr. Sullivan.
Mr. Snell with Mr. Palmisano.
Mr. Johnson of South Dakota with Mr. Davey.
Mr. Pratt with Mr. Jacobstein.
Mr. Ransley with Mr. Sears of Florida.
Mr. Taylor of Tennessee with Mr. Larsen.
Mr. Perkins with Mr. Combs.
Mr. French with Mr. Kindred.
Mr. Wason with Mr. Sabath.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. BOYLAN. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. The gentleman from New York demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Five Members, not a sufficient number, and the yeas and nays are refused.

The question is on the passage of the bill.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. BOYLAN. Mr. Speaker, I object to the vote and make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. The Chair will count. [After counting.] Two hundred and forty-six Members present, a quorum.

So the bill was passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE TO PRINT—RADIO LEGISLATION

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent that all Members may have three legislative days in which to extend their own remarks in the RECORD upon the bill just passed.

The SPEAKER. Is there objection?

There was no objection.

Mr. JOHNSON of Oklahoma. Mr. Speaker, for the past two days this House has been discussing the pending radio bill, which, if passed, proposes equal distribution of the air. Not only is this proposed, but the bill requires the Radio Commission to make an equal distribution of power, to give the South and West a square deal—that which it has never received at the hands of the present Radio Commission.

It is conceded by all that when the present law was enacted Congress had this in mind when the words "equitable distribution" were used; but the intent of the law has been ig-

nored. For my part, Mr. Chairman, I favor this bill with the Davis amendment, making the proposed law so plain, so mandatory, that there can be no misunderstanding nor evasion on the part of the Radio Commission.

I have no desire to be unkind nor to criticize unjustly the present Radio Commission, and yet I do not propose to soft pedal merely because members of that discredited commission may occupy seats in the House gallery. I am delighted that they have "listened in" on the extended discussion of this bill. If the pending measure is passed with the Davis amendment, as I feel will be done, there will be no speculation nor equivocation as to what Congress means when it says "equitable distribution." It will be a direct and unmistakable mandate that in the future there must be an equal distribution of power throughout the country.

That the present situation in which the people of the South and West find themselves is truly deplorable none who are informed will pretend to deny. If there were not such a wide range of difference in the favoritism shown by the commission to the first zone, to the detriment of all others, and especially to the splendid progressive citizenship of Oklahoma, I probably would not ask your indulgence at this time.

We find that one station in Philadelphia has 50,000 watts, as compared with only 47,000 watts allocated to the entire third zone, which is comprised of 11 Southern States. One station in New York is allocated 3,000 watts more power than is given to the combined States of Oklahoma, Texas, Arkansas, Louisiana, Mississippi, Alabama, Tennessee, Georgia, North Carolina, South Carolina, and Florida.

In spite of the fact that the people of the 11 above-named States have not been given a square deal by the Radio Commission, and are being forced to listen to the powerful stations of the East if they "listen in" at all, there are 1,037,950 radio sets in operation in the third zone. Of this number, 100,750 sets are in the State of Oklahoma, which leads all other States in the South in the number of sets in use except Texas.

The third zone has a population of 24,826,050, and leads all others, including the first zone, which has a practical monopoly on the air. And yet the third zone has been pushed to the bottom of the list, with less power than one station in New York.

Judging from its attitude toward the Southwest, the Radio Commission evidently agrees with the gentleman from New York [Mr. CELLER], when he compares the radio situation to a large pie, and remarks that a small child should not have as large piece as an adult. It is obvious that the distinguished gentleman has the audacity to compare the great Southwest to a mere child. I would not wish to be so unkind as to cast aspersions on the great city of New York. But I am tempted to say that all our citizens of Oklahoma understand a radio program broadcasted in good old English, and yet a very large percentage of people of the city of New York could not understand a program unless broadcasted in a foreign tongue. We have no serious objections to these foreign-language programs for New York, but we people down South and West dislike very much to be compelled to listen to so much Italian, French, Greek, and so forth, when we have so many wholesome, educative, and entertaining programs in the air that all can well understand. Even though our stations in the South may be small and many of our people poor, we feel as much entitled to radio programs as are the millionaires of the East.

If the great South must be compared to a mere child, let me say that this vast area stretching from the panhandle of Oklahoma to the everglades of Florida is not now receiving even a child's portion. We have starved long enough; let us have an equal division of this "radio pie"; let us insist that each section of America get a square deal; let us bring order and equality out of the present chaotic conditions.

Much has been said here by opponents of this measure about "vested rights" of the air. Our contention is that no monopoly has any vested rights. If that be true, then we have no more rights in this country. If that be true, the States of New York and Pennsylvania will continue their monopoly of the air and nothing we can do here will right this grave injustice to the South. But that is not true. When enemies of the pending measure resort to the "vested-rights" talk, it is evident that they are about driven from the field of argument. That so-called argument of vested rights is sufficient reason why Congress should enact immediate legislation to preserve the people's rights.

In closing, Mr. Chairman, I desire to take this opportunity to present the views of the people I represent regarding the present deplorable radio situation. I have received a great number of letters and telegrams from every county in my district protesting against the present monopoly of the air by the large chain stations of the North and East. The work of the present Radio Commission is severely criticized, and it is shown by these letters that the smaller stations, especially in the South, are being discriminated against. These good people I represent are demanding freedom of the air.

If I may be given permission, I shall quote here from a few of the many letters I have received on the subject, protesting against the present intolerable conditions and urging immediate relief on the part of Congress:

CANTON, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

MY DEAR MR. JOHNSON: * * * I do not hesitate to say that I feel justified in asking you to do all you can to see that the people are protected in the freedom of the air. The favored interests, who have sought control of speech and the press, are about to get control, and will, if permitted, control the air. The slogan of free speech and free press is no longer a matter of importance; for, since we have the air service it is important to speech and press, and I regard it of grave importance that the rights to the air not be taken away from the people. * * *

T. C. KNOOP.

ALMA, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR MR. JOHNSON: * * * Try to help us get the air back. The chain gang has taken it from us, so that we can't say any more "nothing is free but the air." We are just about crowded out by the high-priced ads and the chain gang.

A. S. MOORE.

OKEENE, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR SIR: * * * Don't let the Federal Radio Commission crowd the independent stations off the air, as they are the ones which give us the markets and news—of most importance to the farmers. The reception is horrible at night when the chain stations are on the air. * * *

MRS. WINNIE SEVERN.
GEO. A. SEVERN.

OMEGA, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR CONGRESSMAN: I am writing you in regard to the Radio Commission. I think it would have been better if the commission had never been created. * * * The people in the South are being cheated out of their share of the air, something that used to be free. * * *

S. EARL PECK.

WALTERS, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR JED: * * * What is the farmer who owns a radio going to do? In a short while he might just as well junk it, for the chain stations are going to crowd everything else out of the air. On Sunday nights we can't even get church services any more for jazz programs. These chain stations ought to broadcast on one wave length from 7 p. m. to 10 p. m. * * *

G. A. TERMAINE.

DUNCAN, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR SIR: We are very much interested in radio and, like thousands of others, want freedom of the air for all and not the favored few. Our Congressmen and Senators must see that the people get a square deal. * * *

Mr. and Mrs. A. C. SHROYER.

CHICKASHA, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR SIR AND FRIEND: It seems to me that the chain stations have their chain around the throat of the radio buyer and user, and are either choking them to death or forcing them to like the stuff they call grand opera, etc. Most of our strong stations have connected up with the chain groups, and from about 7.30 to 10 o'clock at night, no matter where you turn, there is a chain station giving you the same programs until you get disgusted and quit. * * *

O. S. PENNY.

RUSH SPRINGS, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR SIR: I want you to please help us out on our radio programs. The southern people can get nothing. We want our just share of the air and we do not care to listen to Chicago and New York all of the time. The people here are certainly up in arms about the situation. We can get nothing from this section of the country on account of Chicago and New York and a few other high-powered stations.

J. B. COX.

GEARY, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR SIR: We are very much interested in the passage of the bill making an equal distribution of the air in the States of radio land. The chain stations are shutting out the independent stations and we are being told just what we must listen in on. We hope you will help the South get her share of the power and not let "big business" grab the air.

Mrs. VERNA B. SWAGGART.
Mrs. JAS. E. PARK.
Mrs. OLIVE ARMSTRONG.
Mrs. FRANK SWAGGART.

ANADARKO, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR JED: * * * Of course, we are pleased to receive programs rendered by the superstations; but sometimes, you know, JED, a fellow would like to get other programs than those distributed from a superstation through sometimes as many as 15 or 20 other stations. It is almost impossible to get away from receiving the same program again. We do not think the South is getting a square deal in number and size of the stations; as you know, some of the northern superstations are as powerful as all the stations together in a number of States. I am informed that this is true to the extent that all the stations in 11 States of the South are not as powerful as one Northern superstation. This is unfair to the South. It is very hard to get the southern stations at all on account of the low power and limited number of stations that have been granted license, while the entire North is a flood of stations of which a big per cent are owned and controlled by private concerns and used for advertising purposes. All of this makes radioing very difficult, and if you could just come back to Oklahoma and try radioing for one or two nights you would see that the North has absolute control on the air. * * *

J. A. ASHER.

WAURIKA, OKLA.

Hon. JED JOHNSON,
Washington, D. C.

DEAR JED: What is Congress going to do about the radio situation? Conditions in Oklahoma are next to intolerable. The air has become so commercialized that all one can hear is jazz and advertisements. It is disgusting for one to try to get the market reports and other useful information or a musical program from Oklahoma City or Dallas, to find one must listen to jazz or about somebody's pink pills or patent medicine. It seems that New York, Chicago, and Philadelphia have a monopoly on the air. Is it true that one station in New York has actually been given more power by the Radio Commission than Oklahoma and the other 10 States of the third zone?

Yours truly,

H. A. ROACH.

Mr. MORROW. Mr. Speaker, in my State, New Mexico, we have but three or four broadcasting stations. The principal station is at the Agricultural College, State College, N. Mex. The station has received orders to change the frequency of the station, KOB, from 760 to 1,050 kilocycles. This channel is used by seven other stations in the United States, with power from 50 to 5,000 watts, and is not a preferred channel and, of course, it is operated with great interferences.

The station at the college was a pioneer station in broadcasting in the Southwest, starting under experiment license in June, 1920, as 5XD. This was before the licensing of broadcasting stations as such stations. The station is about 799 miles removed from a radius of any other large station. It should be entitled to a cleared channel and to exclusive time. The nearest other large stations are at Los Angeles, Salt Lake City, Denver, Tulsa, Fort Worth, and San Antonio.

The station at the college is equipped for special service and was operating successfully and rendering such service until the arbitrary change by the commission. The station, with proper power, is of great public service, convenience, and is a real necessity.

It serves some 700,000 people of the Southwest living in small communities, on farms, ranches, mining and lumber camps, all of whom are far removed from large cities. Nearly all lack rapid communication and educational entertainment such as those residing in or near large cities receive.

These communities need, and are entitled to, radio service. A glance at the radio map of the country will show very few radio stations in the wide stretches of the open country. Station KOB is the Southwest's only large station, as the map will disclose. The radio law of 1927, in outlining the duties of the Radio Commission, states that—

the licensing authority shall make such distribution of licenses, bands of frequency of wave lengths, periods of time of operation, and of power among the different States and communities as to give fair, efficient, and equitable radio service to each.

The geographical distribution of stations on preferred channels show that Illinois has 15, California 14, Washington and east Texas 8 each, Iowa 7, Massachusetts, Missouri, and New Jersey 6 each, Wisconsin, District of Columbia, and Oregon 2 each, while a few States have no stations, the majority of the rest have 1. And then efforts are made to take KOB off the preferred channel.

In all legislation there is an important factor that must be taken into consideration—that is, the people and their rights should and must be protected. Especially is this true in this day and age, when it appears that organized capital seeks the control and complete monopoly of all the natural resources of the Government; air, water power, in fact, every natural resource of the Nation that can by legislation be brought under their control and in turn capitalized by the same moneyed powers and resold back to the people at a very large return upon the investment. This method at this time is being used to the disadvantage of the citizens of our Nation. Especially is this true in the matter of the use of the air for radio purposes. It seems that the air is to be used in the same manner as the great natural resources of the Nation, all grabbed by man's greed and in turn sold back again to the public at an enormous interest and return to capital.

I am inserting herein part of a communication from the director of station KOB at the New Mexico Agricultural College. This will show that the station is not receiving what rightfully belongs to it under its license. The correspondence follows:

In the late summer another station requested of the commission permission to use the 760 kilocycle channel. We were, according to custom or regulation of the commission, notified of this request and protested the addition of more stations on the grounds of interference existing between the eight already assigned this channel. Their request was turned down, but without our receiving notice or given opportunity to protest and following the above, KMA at Shenandoah, Iowa, was assigned to the 760 kilocycle channel and required to divide time with KWKH. This was protested by KWKH. A little later KWKH requested a hearing before the commission to determine if they should be granted a permit to increase their power from 1 kilowatt to 10 kilowatts, and have full time on our channel. The hearing was held in Washington October 13, 1927. At this hearing KOB was represented by director Symons of the University of Maryland. We strongly protested the increase of power of KWKH unless this station and KMA were made to divide time with KOB, in which case we had no objection to the increase of power. Affidavits showing that bad interference existed were presented. Also correspondence between the undersigned and KWKH and KNA was presented to prove that KOB had made every effort to effect a division of time among these stations with the idea of clearing the existing interference, but without success. The result of this hearing was that KWKH's request for increased power and exclusive time on the 760 kilocycle channel was denied and he was made to divide time on the air with KMA, as originally ordered. KOB, and the strong interference between KOB and KMA or KWKH, was totally ignored in this decision.

The matter was then taken up by correspondence with the commission. In December we again sent them sworn copies of all correspondence with KWKH and KMA to show we had made every effort to get cooperation in eliminating the interference, but without success with KWKH. KMA expressed a willingness to consider a division of time. The commission seems to have assumed that because we had been active in our attempts to clear the situation, that we desired to change our channel. Commissioner LaFount, then, recently appointed to replace Commissioner Dillon, deceased, and representing the fifth zone, which we are in, proposed we change to the 580-kilocycle channel, reduce our power to 2,500 watts, and use time four nights per week from 6 to 8 p. m. only. This was unsatisfactory for three reasons. First, the channel is not one of the preferred channels and which we feel we are entitled to have; second, the time division was not equitable; and third, the other stations using this

channel were Canadian, thereby introducing international complications over which the commission had no control. This proposition was held pending future developments by mutual agreement.

Through our affiliation with the Association of Land Grant Colleges and my being a member of the radio committee of that organization, I was called to Washington for a conference with the commission on January 9, 1928, to take up the general question of educational broadcasting and specific arrangements for some 19 stations of land-grant colleges. Unfortunately for us, Commissioner LaFount was not in attendance at this conference, but Commissioners Sykes, Caldwell, and Pickard were. The commission talked over the situation and expressed themselves as very favorable toward educational broadcasting. Arrangements were agreed upon concerning acceptable compromise solutions of the difficulties of the stations of the association, including KOB. It was understood the carrying out of these arrangements would have to await the confirmation of appointment of Commissioners Caldwell, Pickard, and LaFount by the Senate. I understand that to date these confirmations have not been made.

Concerning KOB at this conference, all recognized the "public convenience, interest, and necessity" for KOB service. It was agreed that KOB should be given equitable exclusive time on a cleared channel with the requested 10-kilowatt power. Commissioner Caldwell suggested that to do this a station in his district under eastern time should be paired with KOB. Thus, they would shut down at 11 p. m. or 9 p. m. our time, after which we could have the air. He suggested a Detroit station. Commissioner Pickard agreed in principle to this idea and advanced the further suggestive idea that since the Springfield, Mass., and Boston, Mass., stations, WBZ and WBZA, of the Westinghouse Co. did not seem to reach very far west, these stations would be good ones to pair us off with. He thought that by this means it might be possible for both of us to work full time, at least under reduced power out of our allotted full-power time, without interference. This suggestion appeared highly satisfactory to all. It was then recommended by the commission that the undersigned proceed to New York City to confer with Mr. Horn, of the Westinghouse Co., in regard to their acceptance of this proposition. I made the New York trip, but unfortunately missed Mr. Horn by about a half hour, so could not confer with him. I then returned to Washington and reported the results to Commissioner Pickard, who assured me that he felt sure everything would be satisfactory and that this arrangement could be carried out. Before leaving Washington and on the suggestion of Commissioner Pickard, I wrote a letter to Commissioner LaFount reporting the conference and its results.

Nothing further was heard from the commission until February 21, when I received the following telegram: "Modification issued to-day, effective March 1, authorizing you operate on 1,050 kilocycles, dividing time KSAU, Boise, Idaho. Signed, Harold A. LaFount, commissioner."

There are listed seven stations on the 1,050-kilocycle channel. Two of these divide time in Nebraska, two more divide time in Minnesota, and one in Arkansas is on only during daylight, thus virtually reducing the possible number of stations that could be on the air at one time during the evening to four. I listened in with a selective superheterodyne receiver and found bad interference on this channel. Therefore to determine if orders changing conditions March 1, when we were supposed to get on this channel, had been issued to reduce the present interference, I sent the following wire to the commission: "Your wire received. Please wire us number stations, location, power, and hours assigned 1,050 kilocycles March 1. Fear heterodyning interference. In conference January 9. Arrangements for acceptable changes suggested by Commissioners Pickard and Caldwell. We prefer equitable division time some cleared channel as agreed upon this conference. Signed, R. W. Goddard."

WASHINGTON, D. C., *February 23, 1928.*

To R. W. GODDARD,
Radio Station KOB, State College, N. Mex.:

Seven stations now on two eighty-five. Five meters through division of time reduced to four. Baltimore 5,000 watt and Minneapolis 500 watt are the only ones that can in any way interfere with your programs. Regret inability to secure cleared channel, 200 similar requests making the task a complicated one. Other commissioners feel that proposed frequency will help you at least temporarily. I suggest that you try it out for a time and report results.

HAROLD A. LAFOUNT,
Commissioner.

Their reply indicates that the present interference will not be cleared up, and that we would be jumping from the frying pan into the fire to change channels, as well as sacrifice our right to a preferred channel under section 4 (f) of the 1927 radio law, which we are now occupying.

"SEC. 4 (f). Make such regulations not inconsistent with law as it may deem necessary to prevent interference between stations and to carry out the provisions of this act: *Provided, however,* That changes in the wave lengths, authorized power, in the character of emitted signals or in the times of operation of any station, shall not be made without the consent of the station licensee unless, in the judgment of the commission, such changes will promote public convenience or interest or will serve public necessity, or the provisions of this act will be more fully complied with."

After conference with President Kent and others I wired commission last night: "Yours February 23d received. Have listened here ten-fifty kilocycle channel with selective superheterodyne and found very serious interference. Nebraska and Minnesota stations with Idaho without reassignment of time or elimination some stations same interference would occur. KOB, when dividing night time with Idaho, can't report regarding Baltimore, as unable to clear interference enough to determine all sources. Temporary change means great inconvenience our thousands of listeners as well as considerable expense for new condensers, crystal, etc. Would need over month notice to obtain these; also forfeit our right under radio law, section 4 (f), to preferred channel. Unwilling to give up good allocation we are entitled to for something worse. Conference January 9 with commissioners recognized right and public necessity KOB service. Agreed to arrange equitable division, exclusive time, cleared channel. Reference records correspondence conference and telegrams to commission from our listeners. KOB service inaugurated 1920. Only large station serving Southwest, with difficult terrene and summer static conditions. Reception satisfactory until channel changed by commission, June 27. Reports of interference with KWKH brought no relief. KMA placed on channel without our knowledge or opportunity to protest, but after our protest addition of other stations desiring to use channel. KOB ignored in division time KMA and KWKH, notwithstanding interference. Reported KOB made every effort to get equitable division time KMA and KWKH and cooperate with commission. Result, present deadlock. Strongly protest change. Desire equitable division time KMA, KWKH, and KOB present channel or equitable division exclusive time other cleared channel. Suggested change manifestly unfair. KOB unwilling surrender our rights in preferred channel or make temporary change. Please wire procedure necessary for us to take, if any."

By way of explanation of this action, might I state the situation as I see it? We are now on a preferred channel. We can not be removed from it without our consent or a hearing to determine the necessity at which we could prove our rights to a place in the air. If we relinquish our preferred channel for one outside the preferred band, the burden of proof of why we should be put back will be on us and make the situation consequently more complicated.

We certainly want to avoid any unnecessary and frequent changes of channel as our thousands of listeners become accustomed to listening for us at definite settings of their dials. If a change is made we are lost to them until they can find us again. Also a change in channel requires constructional changes in the transmitting equipment, such as replacement of condensers, crystal, oscillator, etc. This costs considerable money for a station the size of KOB. Also it would require at least one month to get this material from the manufacturers in the East under the most favorable conditions. We feel the clearing up of the present interference is of mutual benefit to the stations concerned and are willing to compromise if others will do so equitably. KWKH refuses to do so. We have done our best; therefore it is up to the commission to settle the difficulty. But we can not see why the oldest, most powerful station giving the most service to the greatest area should be penalized and made to take an unfavorable channel, while stations established after KOB and broadcasting entertainment and sales talks only are allowed to keep the present very favorable channel.

For your further information may I quote section 9 of the radio law of 1927, paragraph 2, outlining the duties of the commission?

"SEC. 9, PAR. 2. In considering applications for licenses and renewals of licenses, when and in so far as there is a demand for the same, the licensing authority shall make such a distribution of licenses, bands of frequency of wave lengths, periods of time for operation, and of power among the different States and communities as to give fair, efficient, and equitable radio service to each of the same."

KOB is the only powerful station in a radius of 700 miles between Fort Worth, Tex., and Los Angeles, Calif., east and west, and between Denver, Colo., and Mexico City north and south. At present the geographical location of stations enjoying the preferred channels are: State of Illinois, 15; California, 14; New York and Pennsylvania, 9 each; Washington and east Texas, 8 each; Iowa, 7; Massachusetts, Missouri, and New Jersey, 6 each; Ohio, 4; Florida, Michigan, and Nebraska, 3 each; Wisconsin, District of Columbia, and Oregon, 2 each; while a few States have no stations, the majority of the rest have one. And then they try to take KOB off a preferred channel!

It would appear from the information furnished by the director of KOB that the charge is true that the power to operate stations has been granted larger cities to the detriment of rural communities and that the air for radio use is being commercialized and the power to operate monopolized largely for commercial advertising. The amendment adopted by the House should correct this evil to a great extent, if an honest and fair class of men is retained upon the Radio Commission.

Mr. JOHNSON of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the bill by incorporating therein a letter and telegram I received from my district.

The SPEAKER. Is there objection?

There was no objection.

Mr. JOHNSON of Texas. Mr. Speaker and Members of the House, there seems to be but one section of this bill (S. 2317) in controversy, and that is section 4, which reads as follows:

SEC. 4. The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power, and within each zone shall make a fair and equitable allocation among the different States, including the District of Columbia and the Territories and possessions thereof, in proportion to population.

This is a new section to the Senate bill and is offered as a committee amendment thereto by the House Committee on the Merchant Marine and Fisheries. I favor its adoption and the argument of those opposed to it appears to be wholly without merit.

The radio bill of 1926, which is now the law of the land, divided the United States and possessions into five zones for administrative purposes, as follows:

First zone: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, the District of Columbia, Porto Rico, and the Virgin Islands.

Second zone: Pennsylvania, Virginia, West Virginia, Ohio, Michigan, and Kentucky.

Third zone: North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi, Arkansas, Louisiana, Texas, and Oklahoma.

Fourth zone: Indiana, Illinois, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas, and Missouri.

Fifth zone: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, the Territory of Hawaii, and Alaska.

The purpose of dividing the country into five radio zones was as expressed at the time of the passage of the 1926 bill to provide for "equitable distribution" and service to the entire United States. That such purpose has not been accomplished is evident from the report of the committee as shown by the following table contained therein relative to broadcasting licenses which have been issued under authority of existing law:

Analysis of broadcasting licenses

	Population	Population (per cent)	Area (square miles)	Area (per cent)	Number of stations	Total station power in watts	Percentage of station power	Stations with over 1,000 watts
Zone 1	24,378,131	22.73	129,769	3.63	138	213,055	35.30	10
Zone 2	24,337,341	22.69	247,517	6.93	115	116,805	19.34	8
Zone 3	24,826,050	23.14	761,895	21.33	102	47,105	7.80	4
Zone 4	24,492,986	22.83	658,148	18.42	215	164,870	27.31	30
Zone 5	9,213,720	8.59	1,774,447	49.68	131	61,785	10.24	8
Total	107,248,228	100	3,571,776	100	701	603,620	100	60

It will be noted that these five zones with the exception of zone 5 are almost equal in population, but that in the distribution of broadcasting stations gross discrimination has been shown. Zone 3, in which I live, has the largest population of any one of the zones, and yet has but four high-powered broadcasting stations, while zone 1 has 10 and zone 4 has 30 of such stations. It is my understanding that the total power of the four stations in zone 3 is less than that of one single station in the city of New York.

If the Radio Commission interpret this as "equitable distribution," then it becomes absolutely necessary that Congress shall in no uncertain terms and by mandatory injunction require them to "make equal allocation" as the proposed amendment will do.

The gentleman from New York [Mr. CELLER] stated that he was opposed to the amendment because it "will put the radio art into a strait-jacket." If it requires a "strait-jacket" to have the will of Congress carried into effect by one of the commissions it has created, then the sooner we have one the better. The same gentleman, in opposing this amendment, compared zone 1, in which he lived, as "adults," and zone 3 "children." In order not to be too offensive he hastened to say:

I do not mean to imply that the zone 3 is necessarily like unto a child, but I will say this: That as far as industry, commerce, radio population, and as far as enterprise is concerned with reference to broadcasting, and as far as willingness was concerned to enter this field, certain sections are not as fortunate as others. Some are smaller than others, through causes probably beyond their control.

What are the facts? Take his own speech and the figures therein contained. On January 1, 1927, zone 3 had a total of 1,037,950 radio receiving sets, while zone 1 had 1,444,100 such sets. While his zone had only 25 per cent more receiving sets, it had 150 per cent more high-powered broadcasting stations and 350 per cent greater station power in watts than zone 3.

One reason zone 3 has no more broadcasting stations is that the Radio Commission has declined to grant numerous applications to establish them. He is right, therefore, in saying that the causes are "probably beyond their control." And if this amendment is not adopted it will still be "beyond their control" to secure additional stations.

As to "industry and commerce" of zones 1 and 3, statistics fail to sustain the charge that zone 1 is an "adult" and zone 3 a "child," at least in so far as the value of exports is concerned.

The value of exports determines whether our trade balance is favorable or unfavorable, and is, therefore, an important factor regarding the prosperity of the Nation.

The value of exports for the year 1924 of the States comprising zones 1 and 3 are as follows:

Exports by States for 1924

ZONE 1

Maine	$5,503,356
New Hampshire	6,014,221
Vermont	2,367,212
Massachusetts	114,418,430
Connecticut	35,503,405
Rhode Island	13,576,560
New York	731,593,502
New Jersey	223,921,264
Delaware	5,208,338
Maryland	71,178,310
District of Columbia	555,008
Porto Rico	9,479,436
Total	1,219,319,042

ZONE 3

North Carolina	62,321,924
South Carolina	29,866,769
Georgia	84,963,380
Florida	27,459,986
Alabama	35,739,440
Tennessee	43,041,084
Mississippi	55,647,497
Arkansas	38,899,816
Louisiana	222,847,224
Texas	737,218,927
Oklahoma	47,897,006
Total	1,385,903,053

Of the commodities sold to the other nations of the earth to enrich our own, zone 3, "the child," led zone 1, "the adult," by $166,548,011 in a single year.

And every dollar of the exports from zone 3 represents wealth actually produced therein. It is the producers of wealth rather than the traders in wealth who contribute most to the prosperity of this Nation.

My own State of Texas may be a child in age when compared with the State of New York and its population only about half as large, but in one year its exports exceeded those of its ancient sister by $5,625,425. And aside from that Texas is a growing child. In 1850 when the first Federal census was taken after Texas was admitted as a State, the population of Texas was 212,592 and that of New York State was 3,097,394. The Census Bureau estimates that the 1930 census will give New York State a population of 11,755,000 and Texas 5,633,000. In Texas's 80 years of Statehood her population has multiplied twenty-six times, while in the same period New York State's population has increased less than four times. In other words the population of Texas is twenty-six times greater than it was 80 years ago while New York State is less than four times larger. If the same ratio is continued for the next 80 years at that time Texas will have a population of over 140,000,000 and New York would have about 45,000,000.

But enough of comparisons. I am not a sectionalist. I have a very high regard for the imperial State of New York and, in fact, for every State in the American Union, and the gentleman from New York [Mr. CELLER] is my friend; but when my own great State and its neighbors have been grossly discriminated against by a Federal agency, such as has been done by the Radio Commission, the wrong that has been done us can not be justified by telling us that we are children, and therefore should be seen and not heard. I understand that some members of the Radio Commission justify their conduct in denying the establishment of new stations in our zone by construing existing law as to "equitable service" to mean the right to listen rather than the right to broadcast. That makes the enactment of section 4 of this bill necessary, and without

it we can not hope for relief. The plea of "vested right" interposed by some in behalf of existing stations does not appeal to me as sound either in law or in equity. The right of the people to the use of the air is paramount to the right of any individual, any corporation, or broadcasting station, and the Government of the United States, acting for its citizens, can regulate and control this greatest of modern inventions for the common good and the welfare of all. But the fact that the plea of vested right is claimed for existing stations makes it all the more important that we shall by legislative declaration require that the Radio Commission shall in the allocation of stations, wave lengths, and power give every part of this country equal and fair treatment.

The people in my district are interested in this legislation. I have received a number of communications from them. Here is a telegram received by me only a few days ago:

BRYAN, TEX., *March 7, 1928.*

Hon. LUTHER A. JOHNSON,
Washington, D. C.:

We, the undersigned, heartily indorse honest distribution of the air. Use your influence to this intention.

David Reid, H. Conway, M. Schulman, L. H. Daniels, Henry Locke, Raymond Jones, C. S. Beckwith, R. Erskine, W. B. Moore, C. R. Overt, Ross Groginsky, Will Lawrence, D. L. Wilson, Bryan Miller, R. S. Webb, H. Lockard, H. G. Syptak, Travis Bryan, J. C. Caldwell, W. R. Fairman, J. Kaplan, H. L. Whitley, New York Café, James Page, D. Fountain, Bert McMorris, Allan Kraft, Noah Dansby, C. E. Jones, Donald Cole.

Also, here is a petition from Milano, Tex., dated March 5, 1928:

We are requesting you to use your influence and vote to support the fight being carried on by Mr. W. K. Henderson, of radio station KWKH of Shreveport, La., to provide equal distribution of radio power according to area and population. We are asking you to support the bill just reported out of the Merchant Marine and Fisheries Committee amending the radio law and providing equal distribution of radio power.

We also request that you do all within your power to prevent the Senate from confirming Caldwell as radio commissioner.

We do not believe that Judge Sykes, one of the commissioners who has been confirmed, is giving the South fair representation and treatment.

We would be glad if Congress investigated the whole Radio Commission. Get men on the commission who will give everybody a square deal regardless of whether they are of the big electrical concerns or not.

We do not like those chain programs and that is about all we can hear most of the time. We want something besides advertising programs.

FRANK FASEL (and others).

Those of us who favor amending the existing radio law, as proposed in this bill, do so, not because we are sectionalists but because we are against sectionalism. We believe in the doctrine of equality. Can any one who is imbued with the spirit of democracy—who believes not only in preaching but in practicing the immortal maxim of Thomas Jefferson, "Equal rights to all and special privileges to none," find fault with section 4 of this bill, which merely provides that every section of this Nation shall have equal rights in the use of the air, which God made for all of us.

LEAVE TO ADDRESS THE HOUSE

Mr. ANDREW. Mr. Speaker, I ask unanimous consent that to-morrow, after the reading of the Journal and the disposition of the other unanimous-consent requests now on the program, I shall be permitted to address the House for five minutes.

The SPEAKER. Is there objection?

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, I understand that there are already standing orders that two gentlemen have 30 minutes each.

The SPEAKER. The Chair understands that the request of the gentleman from Massachusetts is to follow the speeches of the gentleman from Ohio [Mr. BRAND] and the gentleman from Ohio [Mr. BURTON].

Mr. ANDREW. That is my request.

The SPEAKER. Is there objection?

There was no objection.

Mr. DOUGLAS of Arizona. Mr. Speaker, I ask unanimous consent to address the House for a period of five minutes after the reading of the Journal to-morrow and the disposition of the other orders.

The SPEAKER. The gentleman from Arizona asks unanimous consent that following the address of the gentleman from Massachusetts [Mr. ANDREW] he be permitted to address the House for five minutes. Is there objection?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, on what subject?

Mr. DOUGLAS of Arizona. On Joint Resolution 183.

The SPEAKER. Is there objection?

There was no objection.

THE PARTY SYSTEM AND THE PRINCIPLE OF REPRESENTATION ESSENTIAL

Mr. VESTAL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein a speech delivered by my colleague [Mr. WOOD] at the editorial association at Indianapolis on Friday last.

The SPEAKER. Is there objection.

There was no objection.

Mr. VESTAL. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech of Hon. WILLIAM R. WOOD, Member of Congress from the tenth Indiana district at the annual banquet of the Indiana Republican Editorial Association at the Columbia Club, Indianapolis, Ind., Friday, March 9, 1928:

Gentlemen of the Indiana Republican Editorial Association, it is always a pleasure to me to get back to Indiana, even for a brief period. It is a very great pleasure, I assure you, to have such an occasion call me here. No gathering could be more reflective of the spirit of our great Commonwealth than a meeting of the Republican editors of the State, and I am deeply appreciative of the honor done me by the invitation to address you upon this the occasion of your annual banquet, bringing to a close the highly successful sessions of the last two days.

As editors and business men you have discussed and heard discussed matters of vital interest to your guild. They say everyone thinks he knows better how to run a newspaper than its proprietor. Looking over your program, however, I do not note that you have taken much in the way of instruction from the uninitiated. So I am not going to tell you how to run your newspapers, because I have had no practical experience. I am going to concede, however, that you have a right to tell something in your newspapers about how to run the Government. A somewhat extended experience in public affairs has convinced me that you will exercise that right anyway. In all earnestness, I want to say to you that I hope you may never cease to exercise it. For without a free and fearless press we can not hope to maintain a representative form of government.

Conducting a newspaper is a business, and as newspaper men you may be proud to know that no other class of business men have so great an opportunity for public service in their communities. You may reach out into all activities and leave the impress of your thought and your zeal upon them. And certainly not the least of the activities of any community is political activity, for it has to do with the science of government. Government in itself alone can not cure all ills and create all prosperity, but without good government prosperity can not for long endure. Aside, then, from your obligations as citizens of a republic, you are as business men vitally interested in good government. It would be a sorry day for this grand old Republic if that day should ever come when business men, for short-sighted business reasons, should refuse to ally themselves with the political parties which best serve as the mediums through which to express their views. We would then have in very fact a government run entirely by politicians in the meanest sense of the term.

I am doubly glad, therefore, that you Republican editors of Indiana stand out in your respective communities not only as editors and business men but as Republican editors, and that you have formed yourselves into this militant Republican Editorial Association of the great State of Indiana.

My Republican friends, a short time ago in this city of Indianapolis the Democratic Editorial Association of Indiana was addressed by my friend and colleague, the Hon. FINIS J. GARRETT, the brilliant Democratic floor leader of the House of Representatives. He took for his theme "Party government" as that most suited to the occasion, and in his masterly way effectively he dealt with it. We may differ with him in party principles, but I for one can not differ with him in his opinion so ably expressed, that the two-party system is essential to the success of a form of government such as ours. I am gratified to know that if, as now proposed by his many admirers in his home State of Tennessee, he should at the next election be sent from the House to the Senate of the United States, we will have in that body to compensate us for so formidable a foe in the field of party politics a champion of the fundamental principles of party government as opposed to the clique and bloc system so rapidly developing in that body.

Like this outstanding Democratic leader thoughtful men in both parties are awake to the danger of the situation. They appreciate that if we are to maintain a republic—a representative form of government—we can do so only through the agency of political parties and their chosen representatives. Early in the history of our country the need of the growing Republic made evident the desirability of parties and party responsibility, and from that day to this every American citizen who for his breadth of vision and his adherence to fundamental principles is gratefully remembered as an American statesman has been a

party man. And as a Republican and a believer in parties, I am proud to say that no man in public life to-day has given more forceful expression to his belief in the desirability of parties than our great leader, Calvin Coolidge.

Last month the anniversary of the birth of Abraham Lincoln was celebrated throughout the United States. That phrase is used advisedly, for his memory and the principles for which he stood were praised more generally this year than in any previous year. A great many representative men of the Southern States, whose fathers bore arms against the Union, took occasion last month to pay tribute to the memory of this great American. More and more it is becoming apparent to thinking men, regardless of geographical or political lines, that Abraham Lincoln stood for the fundamental things in the administration of public affairs, and in the administration of political parties.

I want to read you a letter which Lincoln wrote to Schuyler Colfax, already a political leader in Indiana at that time—July 6, 1859. This letter has peculiar application to present-day tendencies, because it warned against the danger of sectionalism in the Nation and factionalism within the party; because it shows Lincoln, the party man, in a practical effort to save from disaster the newly born Republican Party. It is as follows:

"Besides a strong desire to make your personal acquaintance, I was anxious to speak with you on politics a little more fully than I can well do in a letter.

"My main object in such conversation would be to hedge against divisions in the Republican ranks generally, and particularly for the contest of 1860. The point of danger is the temptation in different localities to 'platform' for something which will be popular there, but which, nevertheless, will be a brand elsewhere, and especially in a national convention. As instances, the movement against foreigners in Massachusetts; in New Hampshire, to make obedience to the fugitive-slave law punishable as a crime; in Ohio, to repeal the fugitive-slave law; and squatter sovereignty in Kansas. In these things is explosive enough to blow up half a dozen national conventions, if it gets into them; and what gets very rife outside of conventions is very likely to find its way into them. What is desirable, if possible, is that in every local convocation of Republicans a point should be made to avoid everything which will disturb Republicans elsewhere. Massachusetts Republicans should have looked beyond their noses, and then they could not have failed to see that tilting against foreigners would ruin us in the whole Northwest. New Hampshire and Ohio should forbear tilting against the fugitive-slave law in such a way as to utterly overwhelm us in Illinois with the charges of enmity to the Constitution itself. Kansas, in her confidence that she can be saved freedom on 'squatter sovereignty,' ought not to forget that to prevent the spread and nationalization of slavery is a national concern, and must be attended to by the Nation."

So we find Abraham Lincoln warning against blocs, though they did not call them so in his day—sectional blocs determined to keep to the front sectional interests, to the detriment of what his party was trying to do for the whole country. He hated slavery, but his first thought was to preserve the Union under the Constitution. He sought to enlist the support of other party leaders in an intelligently directed effort to quiet dissention in the party ranks and keep out of the national convention extraneous issues.

When I think of the mighty results of his efforts—call them manipulations if you will—it matters not a whit to me if in that great national convention of 1860 the voice of some budding orator, burning with the abstract rights of man, was stilled; that there was some restriction of the expression of opinion, some spirit of compromise that a great party might live and perform its mission. In such an atmosphere of compromise in the century before was formed the national charter, guaranteeing to us our rights and liberties, under which we have lived and grown great as a Nation.

It is pertinent to present-day political conditions to observe that the great convention which debated, formulated, and finally adopted the American Constitution, which has withstood the test of 150 years, was a convention composed of delegates which in turn had been selected by other delegate bodies in their home States. It is impossible to conceive of a situation in which greater issues were at stake, issues which involved the destinies of this newly born Nation and the welfare of all those American colonists who had sacrificed everything in order to win political freedom and the right to set up for themselves a government patterned after their own ideas and embodying their own aspirations.

I ask you also to consider that this convention was composed of delegates elected by other conventions at a time and during a period when that most direct and simplest form of popular government was in full bloom, namely, the town-meeting system. There is something unusually significant in the fact that when it came to the tremendous decisions involved in the drafting of a constitution for the Nation that the town-meeting methods were abandoned and our forefathers relied upon the ability, sanity, conservatism of a convention.

Fisher Ames, in the Massachusetts convention which ratified the Constitution, in addressing himself to the subject of delegating responsibility and final authority to members of a convention in contrast to the town-meeting methods of government so long employed by that great Commonwealth, said: "I know but one purpose which the people can effect without delegation, and that is to destroy government. That they can not erect a government is evinced by our being thus assembled in their behalf."

So we find the most distinguished precedent of the convention system of handling public affairs in that great constitutional convention which wrote the charter of our Government, prounounced "the greatest work ever struck off at a given time by the hand and brain of man," giving us a government where freedom and order go hand in hand and liberty is safeguarded by law.

There have been a number of efforts since that day to improve the machinery of human government, both in this country and in other countries. However, well intentioned some of those efforts have been, all of them have failed in that the methods which they substituted and the new forms they put into effect did not bring about either a more democratic government, on the one hand, or a more stable government on the other hand. Those experiments have ranged all the way from the rule of the mob and the decree of the guillotine in the bloody French Revolution to the absolutism of the Czars of Russia, the military despotism of the Turks, and the benevolent monarchy of England. To-day the United States of America is the oldest nation in existence. By that I mean no other government, with the possible exception of some of the family dynasties of India and the Orient which existed at the time of the adoption of the American Constitution, is in existence to-day in the same form and substance; and with one or two exceptions none of the governments which were in existence then are in existence to-day at all. What a tribute to the representative system of handling public affairs!

We have had political experimenting in the United States, but, happily, to date our experiments have not been violent, as were those of European nations. With the single exception of the Civil War, which Abraham Lincoln successfully conducted to a close, there has been no attempt in this country to overthrow our Federal Government and tear up the American Constitution. Our experiments have been more or less sugar coated. They have been wrapped in the pleasing habiliments of so-called idealism. They have been urged in the name of the common people. Most of them purported to make government by the people more direct. Most of them have proven failures.

Take, for example, the experiment of the direct primary system of party nominations. The popular primary was adopted, according to its partisans, for the purpose of getting control of political parties, and particularly party nominations. "in the hands of the people." The main arguments which were used during the time the popular primary was "all the vogue" were that under the old convention system of selecting party nominees the people had no voice; the conventions were boss controlled; the nominees were hand picked and not representative of the people; the convention system was corrupt. Those pretty well cover the charges that were made against the old convention system and were the base upon which there was a popular demand for the adoption of the primary system of making party nominations.

You gentlemen are pretty familiar with what has happened. Primary election returns show that winners of party primaries are frequently nominated by from 3 to 7 per cent of the total eligible party vote of their constituency. Clearly there is no "rule of the people" in such a system.

There have been explanations offered of this condition which are worthy of consideration. The experience of party primaries, by and large, justifies the statement that they too frequently turn into campaigns of personalities characterized by all sorts of mud slinging and quasi-libelous speech instead of intelligent, temperate discussion of issues and principles. Again, there has been a growing tendency to make demagogic appeals to prejudice and ignorance, to certain classes and factions, all of which tends to bring the entire primary to a very low level. As a natural result men of standing in the professional or business world hesitate to enter party primaries and face a campaign of billingsgate by some shyster opponent or be made the target of unfair attack by some organization. From that angle the primary system in many sections of our country has almost eliminated the very class of men which the American people should have in public office.

There is another angle. It is common knowledge that the primary system is making it impossible for any except the very rich men, or men who have the backing of organized wealth in one form or another, to make a campaign for nomination in state-wide primaries. Nor is the immense expenditure of money necessary to conduct a primary campaign necessarily a corrupt expenditure. A candidate for a State office in a party primary, unless he is very widely known, has to bring his name before the voters of his party. He can not simply announce his candidacy and then go about his private business in the expectation that there will be a general outpouring of the public on nomination day to support him. He has to advertise himself the same as a motor car, a breakfast food, a radio, or a toilet soap. That costs money. It requires the organizing of headquarters, the rental of rooms, the employment of stenographers, the purchase of supplies, the writing of letters, the buying of stamps.

If I am not mistaken—I have not recently checked the figures—there are something like 900,000 voters in the Republican Party in

Indiana, and approximately the same number of voters in the Democratic Party. With this as a basis, let us do a little conservative computation.

If a candidate for State office in either party wrote one letter setting forth the merits of his candidacy to each of the voters in his own party, the postage alone would cost him $18,000. Getting out 900,000 letters is no small job, no matter what the method. It requires some one to furnish the equipment and the mechanics, and for this some one must be paid. Ten thousand dollars would be a very conservative estimate of the cost aside from the postage, which brings the expense of the candidate to $28,000. If he wrote two letters, the expense would be increased accordingly. If he indulges in any other kind of campaigning, or in newspaper advertising, his expenses are still further increased.

The salary of the Governor of Indiana, for example, is $8,000 a year; his term of office is four years; that makes his total salary $32,000. It does not take anything more profound than a simple problem in mental arithmetic to arrive at the conclusion that no man can run for nomination in the State of Indiana for its highest office and make an extensive campaign and break even on his salary. Either candidates must have independent fortunes and run for office merely for the honor, or as a pastime; or they must be backed by men of wealth or corporations or more or less secret organizations and thereby place themselves under obligations in event they are successful; or they must borrow money outright and expect, in event they are successful, to pay it back out of an income which they derive from some other source than their salary.

These are the plain, practical facts regarding the primary nominating system. And on the face of it it eliminates poor men and men who do not care, because of ethical reasons, to place themselves under obligations to political bondsmen in connection with the discharge of their official duties in event they are successful.

To say that such a system affords a correct expression of the people is to deny the whole theory of representative government.

Some of you may be of the opinion this is too severe an indictment of the primary system. Some of you may believe you have in mind instances which prove that my conclusions are too sweeping. There may be some exceptions to this rule, but they are so few they prove the rule.

No less a distinguished citizen than Vice President Dawes, in speaking of the modern popular primary system, has said:

"We all realize that as our national wealth and population increase and business broadens and becomes more diversified there arises the necessity not only for the centralization of greater power in State, county, and city government, but for its constant use in the carrying out of its legitimate projects.

"Especially is this true in connection with State governments. Immense road-building projects are being carried out by States, assisted by the National Government. Our State and city administrations are accustomed not only to use public employees in getting out a primary vote to maintain an existing administration in power, but in many places all those interested in construction or other public contracts, with their organization and employees, are expected to perform active service in getting out the primary vote for the same purpose."

Where this condition exists, and it does exist, in some variation in practically every State and community which has the popular primary, we do not have representative government, a government of the people, but a government of interests or classes or organizations who back men to fill public offices and finance their campaigns, fully expecting to control their actions after they have taken the oath of office.

Because of this, our Government is becoming a Government of special interests rather than a Government of the people. These interests may be, as Vice President Dawes suggested, road-building interests; they may be contractors desiring to do business with the State or municipality; they may be organizations working in the professed cause of good government; or some organization with a high-sounding title, financed by those interested in getting us embroiled and entangled in foreign alliances and international organizations; or organizations which represent a very limited class of citizens; or they may be sinister organizations which operate largely in the dark, but operate none the less powerfully and almost invariably corruptly. These are the influences which are, by reason of and through the medium of the primary system, getting their hands on the throat of popular government, and there is no way to get away from this condition, in my opinion, except to repeal the primary laws and go back to the convention system.

Instead of the office seeking the person, the person is compelled to seek the office. Instead of the people getting better service from their public officials as a result of the primary, they get worse service. Instead of making it impossible or harder for corrupt influences to control party nominees, the primary system has made it easier for these influences to foist themselves upon the party, and also has made it harder for the party and the people to get rid of them.

The old-fashioned political boss, whatever his shortcomings, did not, as a rule, attempt to foist upon the party men without character and without mental equipment. The men the convention system drafted for service were men of standing, of mentality, and of high character. Those who made up the convention took small chances on having their slate "shot to pieces" in a campaign by the opposition because the ticket was defective in character or brains. All had an investment in the party machine which had been built up through long years of effort. All felt their influence in party affairs at stake. They did not care to risk their investment or lose their influence by putting up a ticket that could not stand the acid test of public analysis. If you do not believe this is true, compare the men in public office to-day with those of a generation ago and draw your own conclusions.

If you have any doubt of the relative merit of the product of convention-named public officials with the product of primary-named public officials, make a comparison of the laws upon your statute books written before and after the primary system became operative.

Indiana to-day has a model system of management of its penal and charitable institutions and its asylums and orphanages, studied and copied by every other State in the Union. The basic laws governing the State board of charities and the conduct of our State prisons and asylums were framed by legislators, all of whom were nominated by the old convention system. I cite this as one example. Another example is the township and county accounting law. I do not have the time to enumerate any others, but I make the point that the character of the laws of this State which were written by legislators who were products of the convention system will stand the test of any comparison with the quality of laws written since the primary system has been in practice. This is no reflection upon the individual character or mentality of the recent-day legislators.

The difference is due to this fundamental fact. In the old convention system the man who was nominated owned his nomination to the party machinery. He went into office pledged to carry out the party platform. The party platform in those days meant something. Nominees for office were bound by it, and in event they disregarded it after election it meant their political death. The primary system has made party platforms absolutely meaningless, even though parties in some primary States still hold conventions and adopt platforms. Inasmuch as these platform-adopting conventions have no power over the candidates, they can not see to it that the platform pledges are translated into public action. Inasmuch as such conventions have no power to punish candidates who do not carry out the platform, such candidates may feel free to ignore all party pledges. Under the present system a candidate may be his own organization, his own platform, his own policy maker. Such a candidate need have no regard for party organization or party pledges. You can not carry out party platforms and party pledges unless you have discipline. You can not have discipline unless you have a system which makes it possible for the party machinery and the party organization to compel men nominated on its ticket to do what the party has promised to do.

A candidate for public office with a strong belief in a representative form of government and a consequent belief in political parties and party responsibility must proceed then in spite of rather than by reason of the primary system. He must recognize that he is under a handicap and proceed as best he can to live up to his beliefs under that handicap.

And I am glad to say here, in justice to the Republican delegation in the Congress of the United States with which I have the honor to serve, that they are men of a strong sense of party responsibility. Our two Senators are outstanding party men, whose voices are potent in the party councils, and no delegation as a whole presents a more united front upon questions in which party principles are involved than the Republican delegation from Indiana. But it must be remembered that Indiana is a State in which party spirit and a sense of party responsibility are perhaps more inherently strong than in any other State in the Union. This is generally conceded and the election returns of many a hard-fought campaign prove it. While our State has not been and in the very nature of things can not be free from the growing evils that have manifested themselves under the primary system, I can say that it has contributed as little at Washington as any State in the Union to the vicious tendency toward degenerating our Government into the system of government by cliques and blocs which is tormenting Europe to-day. There is a real menace in this situation.

I have quoted from Vice President Dawes. I now quote from another eminent citizen and prominent Republican, Secretary of Commerce Herbert Hoover. There can be no doubt as to his intimate knowledge of conditions in Europe. In a recent letter to William Allen White, the noted editor of Emporia, Kans., Mr. Hoover said:

"You have asked me for my diagnosis of the epidemic of dictatorships that seems to have infected many of the European democracies and my opinion as to whether it might be catching in our country.

* * * * * * *

"In practically every government in Europe there are in these days from 3 to 20 political parties in the legislative assembly, with no single party in majority. In consequence, their cabinets—and thus the administrative branches of their governments—have been necessarily founded on temporary coalitions between parties or ephemeral cabinets representing minorities. Likewise legislative work must be accomplished by coalition. Any coalition between groups of different political thought and object is bound to result in the abandonment of matters of important principle and the consequent adoption of largely negative policies. All virility and strength are lost; cabinets are but short-lived; and

constructive and courageous policies in legislation or administrative action have been conspicuously absent. The problems in economic and social reconstruction have been enormous and in the face of the violent differences of opinion between the different factions the negative policies have resulted in little more than drift and paralysis of government.

"That is the disease. As a result the people in one country after another in exasperation have welcomed some form of dictatorship. This does not necessarily indicate a failure of sentiment for the principles of liberalism. It is a failure in making practical governmental machinery for their application."

In a speech at Springfield, Ohio, in October, 1926, Secretary Hoover said:

"* * * As the population has increased and civilization has grown more complex, as our Government issues have become more infinitely complicated, our system of two dominant political parties has become more and more a vital part of the machinery of self-government. For through political parties alone is there the possibility for self-expression of the will of such great masses of people. It is the sole method by which they can give organized expression of their will through the ballot as a substitute for the violence of revolution. But political parties can not execute their policies, they can not be held accountable for them, unless one of them at a time be trusted with full responsibility and authority.

"Government without one party in full responsibility results at once either in compromise, which nullifies the principles of both parties, or it results in deadlock, which means confusion or dictation of a minority. If you will examine the breakdown of one democracy after another in Europe in the last four years, you will find that it is the repeated failure of their people to place political responsibility and authority in one single party at a time and to continue its policies which has broken down their democracies."

I have dwelt upon the evils and the failure of the popular primary system at length because I regard it as the most important subject confronting the American people. Unless our system of two-party government is preserved it really matters very little what platforms our parties may adopt, for they would be meaningless; what pledges they may make, for they would be incapable of redemption; what policies they may advocate, for they would have no substance and no chance of fulfillment.

I do not know what would have happened if they had had the direct primary in vogue in that critical year of 1860, when men's minds were confused as they had not been confused since the organization of our Government. At that crisis they turned hopefully to the aid and the counsel of the great party leaders, raised to prominence through the old-fashioned convention system. The convention held by the Republican Party in that year offered to a distressed Nation as its candidate for the Presidency a man who was to be intrusted with power in a time of peril as few men have been trusted in the history of man's efforts to maintain stable government. It was a Republican convention that nominated Abraham Lincoln. Had he depended upon a popular primary for his nomination in that period of confusion, which had its demagogues and self-seekers just the same as we have them to-day, it is a matter of great doubt if Lincoln would have been the nominee or if the Republican Party would have been able to coalesce within its ranks sufficient numbers to have secured a majority at the polls commissioning it to assume control of our Government. It was Lincoln who coined the immortal phrase that this is a government of the people, by the people, and for the people. It is so long as we maintain a two-party system of government whereby the people can give virile expression of their desires, but the moment we let it become a government of blocs and by blocs and for blocs it no longer remains a government of the people. It no longer remains a government by majority; it then becomes a confused scramble by a number of minority organizations.

One of the statements we continually hear is that there is no difference to-day between the two old political parties and that, therefore, people are justified in their disregard of party lines and in their refusal to take party platforms and policies seriously. There is more or less truth in that statement, but it is no indictment of the Republican Party. If there are no outstanding differences between the two parties to-day, it is largely because the Republican Party has, since its origin, held to a consistent course. It has never wavered in its support of certain fundamental economic policies. It has never seized upon a fake issue in an attempt, out of desperation, to win a campaign. The Republican Party has always been a party of sound money and sane financial management of public affairs. Sooner or later intelligent and patriotic Democrats have had to support Republican financial policies. The Republican Party, as a party, has never followed strange gods. The Republican Party has always been a party of protective tariff. Contrary to 50 years of Democratic charges that it is controlled by predatory wealth, the record of the Republican Party, as found in Federal legislation, shows that it has placed upon our statute books practically every law which has for its purpose the improvement of "the man in the ranks," as represented by the laborer and the farmer.

Some idea of how the Democratic Party has abandoned all its former positions may be obtained from a speech delivered at the recent Jackson Day dinner in Washington, held under the auspices of the Democratic national committee. The orator of the occasion was Claude G. Bowers, an Indiana product, a former newspaper man of this State, a student, a scholar, a man of fine character, and unusual mental attainments. He was selected for this occasion because he had produced two magnificent literary works upon the lives and times of the early Democratic leaders, principally Jefferson, and Jackson. His speech was printed in the CONGRESSIONAL RECORD at the request of a Democratic Member of Congress. As a piece of oratory it was superb. As a depiction of the changes which have occurred in the Democratic Party since the days of Andrew Jackson, it was unequaled, not because of what it did contain, but because of what it did not contain. Andrew Jackson was a protectionist. He was a high-tariff advocate. He gave vigorous support to the protective tariff measures. Yet Mr. Bowers did not mention this fact in his speech.

Andrew Jackson did not believe in a Federal bank. With one exception, his outstanding policy was violent opposition to the establishment of the national-banking system. Yet to-day Colonel House, of Wilson "kitchen-cabinet" fame; and Senator CARTER GLASS, of Virginia; and former Democratic Senator Owen, of Oklahoma; and former Democratic Senator Hitchcock, of Nebraska, are engaged in a public quarrel, extending over many months, as to which of them contributed the most to the creation of the Federal banking system. Mr. Bowers did not remark at all on this departure from the principles of Andrew Jackson.

The thing which made Andrew Jackson a heroic figure, the outstanding, spectacular act of his career, was his threat to hang a number of gentlemen in South Carolina if they attempted to set aside and nullify Federal laws. Mr. Bowers did not refer to this episode, principally because of the fact that the leading candidate for the nomination at the hands of his party is basing his fight for the nomination largely upon the fact that he does not believe in one of our best-known Federal laws, enacted to enforce the Federal Constitution, and as chief executive of his own State he aided and abetted legislation to prevent that State from lending its assistance in the enforcement of Federal law.

Mr. Bowers said nothing at that Democratic round-up as to what Andrew Jackson really advocated, because to have done so probably would have precipitated a riot. There may be one exception noted to this statement, namely, Andrew Jackson believed in the theory that "to the victor belongs the spoils," which is the only Jacksonian doctrine which the Democratic Party to-day faithfully practices whenever it gets in power.

Mr. Bowers took occasion to pour the contents of his vitriolic vocabulary over the head of the Republican Party on that occasion, by attempting to identify it as the party of corruption in official places. However, in his bill of particulars, he made no mention of the fact that Democratic State officials of Nevada have been caught with a shortage of funds of something between a half million and a million dollars; that the government of Arkansas, two or three years ago, under solid Democratic control, became so corrupt in the handling of public highway funds and its construction of public highways that the Federal Government had to refuse to continue to extend Federal highway aid to that State; that the conditions of corruption and graft in the great State of Texas have been so notorious continuously for the last five or six years as to occupy first-page positions in the newspapers, split the Democratic Party in that State wide open, and kept a large percentage of its State officials standing trial in the State courts; that the same condition has prevailed in the solid Democratic State of Oklahoma for nearly a generation, beginning with Theodore Roosevelt's exposure of Democratic Governor Haskell and continuing until a few weeks ago when the Democratic legislature called itself into session in order to impeach the governor for alleged corrupt practices only to be run out of town by the State militia, under his command; that less than two months ago the Democratic attorney general of the State of Alabama, after sincere efforts to convict criminals of that State who held positions high in his party, publicly announced his intention to nolle prosequi all indictments on the ground he was unable to secure convictions on account of the influence of the Democratic governor and other Democratic officials who were interested in protecting the criminals and suppressing the facts; that Tammany Hall politicians to-day in the State of New York are being exposed as back of tremendous scandals and graft in connection with municipal contracts, and also in connection with pollution of the milk supply furnished that great State. Why, Mr. Daily, who to-day is being touted as a favorite candidate for governor by the Democratic Party in this State first earned his reputation as a prosecutor by sending the Democratic officials of Terre Haute and Vigo County to the penitentiary. All of these facts were known to Mr. Bowers, who is still a newspaper man, well advised as to what is going on throughout the United States. No, gentlemen, there is no party issue in the question of the personal guilt of members of a political party, and if there were, the Democratic Party might be hard put for a plausible defense.

Because there are a great variety and number of selfish and powerful interests in this country, and in other countries, desirous of getting rid of our protective tariff, because they can not expect any aid from the Republican Party and do expect aid from the Democratic Party, and are willing heavily to finance that party in such a fight, there will probably be a general assault on our protective tariff in the coming campaign. I have not the time to make a protective tariff speech, but I warn you Republican editors to prepare yourselves against the day of

attack. More cold, hard facts can be marshaled in support of the present tariff law and in defense of the protective tariff system than can be marshaled in defense of any economic policy ever maintained by the Republican Party. Despite this, more grotesque misrepresentations of the tariff are made than of any other subject of current politics, probably because the enemies of the tariff can not stick to the truth and make even a passably plausible argument. It is hard for Democrats to stick to facts and remain Democrats. The two positions are inconsistent.

At the present time the enemies of the tariff are making a drive to persuade the farmer he gets no benefit from the present tariff schedules. No proposition is easier of support than the defense of the protective tariff from the standpoint of the farmer.

Take wheat for example. Canada is the greatest wheat-exporting country in the world. By reason of lower land values, lower labor costs, lower taxes, lower fertilizer costs, and lower transportation costs, Canadian wheat is raised and marketed at Great Lake ports, 42 cents a bushel less than American wheat can be raised and marketed at Great Lake ports.

The United States is the greatest wheat consuming country in the world. The only barrier between the world's greatest wheat consuming people and the world's greatest wheat exporting people is a tariff of 42 cents a bushel. No one who is sane will contend that that barrier affords the American grower no protection, or that its removal would not be followed by gigantic inundation of American markets by Canadian wheat. Were the tariff removed, Canadian wheat, enjoying a differential of 42 cents a bushel because of lower production and lower transportation costs, would undersell American wheat at every Lake port from Duluth to Buffalo, and still show a good profit.

There is nothing theoretical about this. Canada has annually exported an average of 300,000,000 bushels of wheat since our tariff became effective, able to lay it down at our very boundary line at 42 cents less than American wheat can be produced, yet the market records show that during the period of 222 weeks from July 1, 1923, the beginning of the first harvest following the Fordney-McCumber tariff, to October, 1927, the average price of wheat at Minneapolis has been 19 cents above that at Winnipeg, and during one-fourth of this entire time the average price of wheat at Minneapolis was 30 cents more than the price at Winnipeg. During those four crop years the American farmer produced 3,000,000,000 bushels of wheat for which he received $602,000,000 more than he would have received had he sold it at Winnipeg prices.

In 1921 the annual production of butter in this country was, in round numbers, 1,000,000,000 pounds. Last year it was 1,500,000,000 pounds, an increase of 50 per cent, or 500,000,000 pounds. In the same period exports of butter from Australia and New Zealand increased 200,000,000 pounds and from the Scandinavian countries 188,000,000 pounds. In the face of this tremendous, almost incredible increase in butter production in this country and butter production and exportation from foreign countries the price of butter has increased 8.5 per cent in this country since 1921, despite the fact that the investigations of the United States Tariff Commission showed butter could be produced in Denmark for 13 cents a pound less than it could be produced in this country, and could be produced in New Zealand at 24 cents per pound less than it could be produced in this country. Had it not been for our protective schedules on butter there is not the slightest doubt that by this time the dairy interests in this country would have been in bankruptcy.

The Argentine Government has made the most bitter and relentless fight during the last three years to break down our protective schedules on cattle and fresh beef. Within the last month, the issue became so acute at the Pan-American Conference at Habana that the Argentine ambassador to this country, who also represented the Argentine at that conference, resigned because he could not obtain an agreement to have the United States lower its tariff on agricultural products from the Argentine. I am informed the Argentine ambassador is one of the largest cattle raisers in the Argentine. The representative of his Government, attending the Pan American Conference in this country last year, insisted that we modify our tariff to the extent of permitting 350,000,000 pounds of fresh beef to be imported in this country from the Argentine every year. This is the equivalent of 718,000 head of beef steers. Data collected by this Government shows that in the Argentine cattle can be produced, ready for market, at a cost of 75 cents per hundred pounds.

The fact that we are not importing fresh beef from the Argentine, the fact that the Argentine and its representatives have made the issue so acute is proof without any further elaboration that the live-stock industry of this country is being protected by our present tariff schedules. I could go into details regarding numerous other farm products.

The market price paid farmers at their farms as distinguished from prices paid in Chicago and other markets show that since the tariff went into effect the farm price of wheat has increased 20 per cent; rye, 20 per cent; corn, 70 per cent; oats, 50 per cent; barley, 60 per cent; flaxseed, 27 per cent; beef cattle, 70 per cent; calves, 48 per cent; hogs, 35 per cent; sheep, 93 per cent; lambs, 86 per cent; wool, 100 per cent. And yet in the face of these official records there persists the free-trade propaganda that the existing tariff has not enhanced the value of farm products.

On the other hand, it is plain to my mind that the present schedules are not high enough in some instances to afford proper protection to certain agricultural products. That is because foreign competitive conditions have developed in intensity far beyond expectation at the time the present tariff law was enacted. The dairy industry affords an illustration of such unforeseen competitive conditions, and there are many others, not only in agriculture, but in the various manufacturing industries.

Competition in and for the world markets has become increasingly severe in the last six years. This is true in both the agricultural and industrial world. Abroad, vast industrial interests are organizing cartels, or combines, frequently international in their membership, for the purpose of lessening competition among themselves in their domestic markets, in order that they may offer more formidable competition in other parts of the world. Much of this competition is aimed directly at the United States market and United States industries. Foreign governments are lending substantial assistance to such movements in the form of subsidies and bonuses, preferential tariffs and concessions in rail and ocean freight rates on government-owned railroads and steamships.

The same movement is discernible in the agricultural world, taking the form of great cooperative associations, as in the dairy industry of the Scandinavian countries, where government aid is extended not only to the cooperatives but to butter-export societies.

As fast as the development of international competition jeopardizes the American market and the American agricultural producer, tariff schedules will have to be raised to afford needed protection, for certainly the way to meet this increasing foreign drive at our home markets at the expense of our home producers is not by lowering or abolishing our tariff rates and inviting foreign producers to help themselves. That is the remedy offered by the Democratic Party. That is the policy it promises to inaugurate in event it ever secures control of the legislative and executive branches of our Government.

This is characteristic of the Democratic Party. It is a party of destruction. It would correct any inequalities in our present tariff law by destroying the protective-tariff system. It sought to destroy our financial system and our national credit. Twice the Republican Party has carried the Nation through periods of reconstruction, with practically every constructive measure it proposed meeting with the opposition of the Democratic Party. The Democratic Party sought to destroy the sovereignty of the United States of America in order to join a European league.

For 68 years the Republican Party has been a party of construction, upholding American traditions, defending American institutions. For 68 years it has been a party laboring to benefit all of the people, discriminating against no section of America or any class of Americans. In all that period it has never had to abandon any policy because it was unsound, uneconomic, or un-American. Within that period all of its constructive policies have been vindicated by the judgment of the American people and the verdict of time. The history of the development of this Nation in territory, in prosperity, in the promotion of the welfare of its people to a point where they now live better, have better opportunities for themselves, and finer prospects for their children has been the history of the Republican Party.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 66. An act authorizing B. L. Hendrix, G. C. Trammel, and C. S. Miller, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Mound City, Ill.;

H. R. 6073. An act authorizing E. M. Elliott, of Chicago, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ravenswood, W. Va.;

H. R. 7183. An act authorizing C. J. Abbott, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Golconda, Ill.; and

H. R. 7921. An act authorizing A. Robbins, of Hickman, Ky., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Hickman, Fulton County, Ky.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 5 o'clock and 33 minutes p. m.) the House adjourned until to-morrow, Tuesday, March 13, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Tuesday, March 13, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.
Legislative appropriation bill.

COMMITTEE ON THE DISTRICT OF COLUMBIA—SUBCOMMITTEE ON FISCAL AFFAIRS

(10.30 a. m.)

To fix the amount to be contributed by the United States toward defraying the expenses of the District of Columbia (H. R. 5768).

SUBCOMMITTEE ON THE JUDICIARY

(Room 346)

To authorize the Commissioners of the District of Columbia to compromise and settle certain suits at law resulting from the subsidence of First Street east, in the District of Columbia, occasioned by the construction of a railroad tunnel under said street (H. R. 5759).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the north Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

402. A communication from the President of the United States, transmitting supplemental estimate of appropriation under the legislative establishment, United States Senate, for the fiscal year 1929 in the sum of $500 (H. Doc. No. 198); to the Committee on Appropriations and ordered to be printed.

403. A letter from the Acting Secretary of War, transmitting proceedings of the joint board composed of officers of the Army and Navy to survey ammunition storage conditions, pursuant to the act approved December 22, 1927 (Public Law, No. 2, 70th Cong.) (H. Doc. No. 199); to the Committee on Appropriations and ordered to be printed, with illustrations.

404. A letter from the Secretary of the Navy, transmitting draft of a bill "to authorize the Secretary of the Navy to lease the United States naval destroyer and naval base, Squantum, Mass.; to the Committee on Naval Affairs.

405. A letter from the Secretary of the Navy, transmitting draft of a bill "to provide for the settlement of damage claims arising from the construction of the Petrolia-Fort Worth gas pipe line"; to the Committee on Naval Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. KIESS: Committee on Insular Affairs. H. R. 8559. A bill to amend section 58 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes"; without amendment (Rept. No. 885). Referred to the House Calendar.

Mr. KIESS: Committee on Insular Affairs. H. R. 9363. A bill to provide for the completion and repair of customs buildings in Porto Rico; without amendment (Rept. No. 886). Referred to the House Calendar.

Mr. KIESS: Committee on Insular Affairs. H. R. 10952. A bill to fix the salaries of certain judges of Porto Rico; without amendment (Rept. No. 887). Referred to the House Calendar.

Mr. WAINWRIGHT: Committee on Military Affairs. H. R. 11762. A bill to authorize an appropriation to complete construction at Fort Wadsworth, N. Y.; without amendment (Rept. No. 888). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. H. R. 11808. A bill to authorize an appropriation for the purchase of land at Selfridge Field, Mich.; with amendment (Rept. No. 889). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. UNDERHILL: Committee on Claims. S. 3325. An act for the relief of Horace G. Knowles; with amendment (Rept. No. 884). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 5953. A bill for the relief of E. L. F. Auffurth and others; without amendment (Rept. No. 890). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII the Committee on Pensions was discharged from the consideration of the bill (H. R. 11901) granting an increase of pension to Ada Lee Ritter, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WILSON of Louisiana: A bill (H. R. 11980) granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana; to the Committee on Interstate and Foreign Commerce.

By Mr. ANTHONY: A bill (H. R. 11981) to authorize officers of the Medical Corps to account certain service in computing their rights for retirement, and for other purposes; to the Committee on Military Affairs.

By Mr. HUDSPETH: A bill (H. R. 11982) to increase the immigration border patrol for the purpose of enforcing the immigration laws on and adjacent to the boundary between the United States and Republic of Mexico, and the boundary between the United States and the Dominion of Canada, and elsewhere; to the Committee on Immigration and Naturalization.

By Mr. FRENCH: A bill (H. R. 11983) to provide for issuance of perpetual easement to the Department of Fish and Game, State of Idaho, to certain lands situated within the original boundaries of the Nez Perce Indian Reservation, State of Idaho; to the Committee on Indian Affairs.

By Mr. HICKEY: A bill (H. R. 11984) for the appointment of two additional associate justices to the Court of Appeals of the District of Columbia; to the Committee on the Judiciary.

By Mr. HUDSPETH: A bill (H. R. 11985) to amend the act of March 3, 1927, granting pensions to certain soldiers who served in the Indian wars from 1817 to 1898, and for other purposes; to the Committee on Pensions.

By Mr. LaGUARDIA: A bill (H. R. 11986) to create a Federal Child Relief Board, and for other purposes; to the Committee on the Judiciary.

By Mr. RATHBONE: A bill (H. R. 11987) to amend paragraph (5) of section 20 of the interstate commerce act; to the Committee on Interstate and Foreign Commerce.

By Mr. VESTAL: A bill (H. R. 11988) to protect trade-marks used in commerce, to authorize the registration of such trade-marks, and for other purposes; to the Committee on Patents.

By Mr. MADDEN: A bill (H. R. 11989) providing that subscription charges for newspapers, magazines, and other periodicals for official use may be paid for in advance; to the Committee on the Judiciary.

By Mr. SINNOTT (by departmental request): A bill (H. R. 11990) to authorize the leasing of public lands for aviation, and for other purposes; to the Committee on the Public Lands.

By Mr. SUMMERS of Washington: A bill (H. R. 11991) to appoint a day for the annual meeting of the Congress required by the Constitution; to the Committee on the Judiciary.

By Mr. OLDFIELD: A bill (H. R. 11992) granting the consent of Congress to the Arkansas Highway Commission to construct, maintain, and operate a free highway bridge across the Current River; to the Committee on Interstate and Foreign Commerce.

By Mr. DYER: A bill (H. R. 11993) to increase the salaries of the Solicitor General, Assistant to the Attorney General, and the Assistant Attorneys General; to the Committee on the Judiciary.

Also, a bill (H. R. 11994) to abolish bailiffs and criers in the United States courts and to provide for the performance of their duties by United States marshals and their deputies, and for other purposes; to the Committee on the Judiciary.

By Mr. BUTLER: A bill (H. R. 11995) to provide for the settlement of damage claims arising from the construction of the Petrolia-Fort Worth gas-pipe line; to the Committee on Naval Affairs.

By Mr. DEAL: A bill (H. R. 11996) to provide for the replacement of quarters for the enlisted men of the naval training station at Hampton Roads, Va.; to the Committee on Naval Affairs.

By Mr. CROSSER: A bill (H. R. 11997) to provide capital at reasonable rates of interest in order to promote the establishment and ownership of homes by the people of the United States, and for other purposes; to the Committee on Banking and Currency.

By Mr. FREAR: A bill (H. R. 11998) to prohibit experiments upon living dogs in the District of Columbia or in any of the Territorial or insular possessions of the United States, and providing a penalty for violation thereof; to the Committee on the Judiciary.

By Mr. KELLY: A bill (H. R. 11999) to amend section 197 of the Criminal Code; to the Committee on the Post Office and Post Roads.

By Mr. LEAVITT (by department request): A bill (H. R. 12000) to extend the period of restrictions of lands of certain members of the Five Civilized Tribes, and for other purposes; to the committee on Indian Affairs.

By Mr. McLEOD: A bill (H. R. 12001) to provide for the preservation of Fort Wayne as a national park and museum, to commemorate the winning of the Northwest Territory, and for other purposes; to the Committee on Military Affairs.

By Mr. STALKER: A bill (H. R. 12002) to amend the national prohibition act, as amended and supplemented; to the Committee on the Judiciary.

By Mr. MacGREGOR: Joint resolution (H. J. Res. 234) to permit admission within quota of relatives of declarants who have been admitted into the United States prior to July 1, 1924; to the Committee on Immigration and Naturalization.

By Mr. HAUGEN: Joint resolution (H. J. Res. 235) authorizing the acceptance of title to certain lands in the counties of Benton and Walla Walla, Wash., adjacent to the Columbia River Bird Refuge in said State established in accordance with the authority contained in Executive Order No. 4501, dated August 28, 1926; to the Committee on Agriculture.

By Mr. JOHNSON of Washington: Joint resolution (H. J. Res. 236) authorizing the Secretary of War to lend tents and camp equipment for the use of the housing committee for the convention of the American Legion for the Department of Washington, to be held at Centralia, Wash., in the month of August, 1928; to the Committee on Military Affairs.

Also, resolution (H. Res. 136) providing for the appointment of assistant clerk to the Committee on Immigration and Naturalization; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDRESEN: A bill (H. R. 12003) granting a pension to Philip L. Daly; to the Committee on Pensions.

By Mr. ANTHONY: A bill (H. R. 12004) granting an increase of pension to Josephine Chacey; to the Committee on Invalid Pensions.

By Mr. BEERS: A bill (H. R. 12005) granting an increase of pension to Rhoda J. Jenkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12006) granting an increase of pension to Mary Ann Brought; to the Committee on Invalid Pensions.

By Mr. BOYLAN: A bill (H. R. 12007) for the relief of Mr. and Mrs. Peter J. Egan; to the Committee on Claims.

By Mr. CARTER: A bill (H. R. 12008) granting a pension to Patrick Cahill; to the Committee on Pensions.

Also, a bill (H. R. 12009) for the relief of Ernest Owen Hughes; to the Committee on Naval Affairs.

Also, a bill (H. R. 12010) for the relief of William Smerden; to the Committee on Military Affairs.

By Mr. CARTWRIGHT: A bill (H. R. 12011) granting a pension to Mary E. Fry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12012) for the relief of Albert I. Riley; to the Committee on Military Affairs.

By Mr. CHALMERS: A bill (H. R. 12013) granting a pension to Edith A. Fuller; to the Committee on Invalid Pensions.

By Mr. CHAPMAN: A bill (H. R. 12014) granting a pension to Radford Fain; to the Committee on Pensions.

By Mr. COHEN: A bill (H. R. 12015) for the relief of Faber, Coe & Gregg (Inc.); to the Committee on Claims.

By Mr. GAMBRILL: A bill (H. R. 12016) for the retirement as ensign of Daniel Mershon Garrison, jr.; to the Committee on Naval Affairs.

By Mr. GRIFFIN: A bill (H. R. 12017) for the relief of Edward J. Doyle; to the Committee on Military Affairs.

By Mr. HOGG: A bill (H. R. 12018) granting a pension to Emily B. Jennings; to the Committee on Invalid Pensions.

By Mr. HULL of Tennessee: A bill (H. R. 12019) granting a pension to Sam E. Hall; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 12020) granting a pension to Jennie Whitman; to the Committee on Pensions.

By Mr. KVALE: A bill (H. R. 12021) for the relief of Samuel S. Michaelson; to the Committee on Claims.

By Mr. MOORE of Ohio: A bill (H. R. 12022) granting an increase of pension to Annie E. Fryer; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 12023) granting a pension to Louisa B. Smith; to the Committee on Invalid Pensions.

By Mr. NELSON of Maine: A bill (H. R. 12024) granting a pension to Maria C. Garland; to the Committee on Invalid Pensions.

By Mr. NELSON of Wisconsin: A bill (H. R. 12025) granting a pension to Halana Schlick; to the Committee on Invalid Pensions.

By Mr. SPEAKS: A bill (H. R. 12026) granting an increase of pension to Alice Morgan; to the Committee on Invalid Pensions.

By Mr. SUMNERS of Texas; a bill (H. R. 12027) granting an increase of pension to Mary E. Elliott; to the Committee on Invalid Pensions.

By Mr. THURSTON: A bill (H. R. 12028) granting an increase of pension to Jennie A. Pyle; to the Committee on Invalid Pensions.

By Mr. WILLIAMSON: A bill (H. R. 12029) granting a pension to Richard C. Stirk; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5265. By Mr. BURTNESS: Petition of 45 residents of Abercrombie, N. Dak., urging repeal of national-origins provisions of immigration act; to the Committee on Immigration and Naturalization.

5266. By Mr. CARTER: Petition of Berkeley Post No. 7, the American Legion, Department of California, urging the United States to stand with the American Legion's permanent policy of requiring a Navy second to none; to the Committee on Naval Affairs.

5267. By Mr. CHAPMAN: Petition of Floyd Martin, G. W. Aldridge, Milt Harding, Forest Rucker, E. J. Rucker, G. M. Aldridge, and three other citizens of Henry County, Ky., protesting against the passage of a compulsory Sunday observance bill, or any other national religious legislation; to the Committee on the District of Columbia.

5268. By Mr. COLE of Iowa: Petition of George A. Boyer, of Cedar Rapids, Iowa, and 117 other signers, residents of Cedar Rapids, Iowa, protesting the passage of House bill 78, or any other national religious legislation which may be pending; to the Committee on the District of Columbia.

5269. By Mr. CRAIL: Petition of sundry citizens of Los Angeles County, Calif., for the Civil War pension bill; to the Committee on Invalid Pensions.

5270. Also, petition of sundry citizens of Los Angeles County, Calif., against the passage of House bill 78, or any other similar legislation; to the Committee on the District of Columbia.

5271. By Mr. CULLEN: Resolution of Brooklyn Democratic Club, in re repeal of eighteenth amendment; to the Committee on the Judiciary.

5272. By Mr. CURRY: Petition of citizens of the third California district, favoring the enactment of House bill 9775, providing for certain bird refuges; to the Committee on Agriculture.

5273. Also, petition of citizens of the third California district, protesting against the enactment of House bill 78; to the Committee on the District of Columbia.

5274. By Mr. DAVENPORT: Petition of Mary A. Bohn and other citizens of New York State, protesting against the enactment into law of House bill 78; to the Committee on the District of Columbia.

5275. By Mr. DICKINSON of Missouri: Petition by certain citizens of Bates County, Mo., protesting against the passage of any compulsory Sunday observance legislation, particularly House bill 78; to the Committee on the District of Columbia.

5276. By Mr. ESTEP: Petition of board of governors, William Penn Motor Club, Philadelphia, Pa., commending the action of the House of Representatives in rescinding the automobile sales tax in the revenue act of 1928, etc.; to the Committee on Ways and Means.

5277. By Mr. EVANS of California: Petition of Jolidan Croake, of Tujunga, Calif., and 35 other citizens, for the relief of the permanently disabled emergency officers of the World War; to the Committee on World War Veterans' Legislation.

5278. By Mr. EVANS of Montana: Petition of Mrs. Roy Lyman and other residents of Darby, Mont., protesting against the passage of House bill 78; to the Committee on the District of Columbia.

5279. By Mr. GOODWIN: Petition in opposition to the provisions of House bill 189, known as the purification bill, signed by Alexander La Due and 30 other interested persons resident at or near International Falls, Minn.; to the Committee on Indian Affairs.

5280. Also, petition of Swen C. Sundeen and 60 other residents of Hinckley and Pine City, Minn., in protest against enactment into law of the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5281. Also, petition of Edward Anunsen, Esq., 2629 Clinton Avenue, and 31 other residents of Minneapolis, Minn., protesting against the enactment into law of the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5282. By Mr. GRIEST: Petition of Millersville Council, No. 188, Fraternal Patriotic Americans, Millersville, Pa., urging the enactment of House bill 10078, the Johnson deportation bill; to the Committee on Immigration and Naturalization.

5283. By Mr. HOWARD of Nebraska: Petition signed by A. Drake, of Columbus, Nebr., and 504 other persons in Columbus, protesting against the passage of the Lankford bill for compulsory observance of the Sabbath or any other proposed legislation favoring the compulsory observance of Sunday in the District of Columbia; to the Committee on the District of Columbia.

5284. By Mr. HALL of North Dakota: Petition of the Mutual Fire & Lightning Insurance Co. of Cooperstown, N. Dak., against Senate bill 1752, known as the Oddie bill; to the Committee on the Post Office and Post Roads.

5285. By Mr. HOGG: Petition of John T. Currall and 11 other citizens of Fort Wayne, Ind., protesting against passage of the Lankford bill; to the Committee on the District of Columbia.

5286. By Mr. HOWARD of Nebraska: Petition signed by H. B. Cowin, of Oakdale, Nebr., and 23 other citizens of Oakdale, Nebr., protesting against the passage of the Lankford bill (H. R. 78) for the compulsory observance of the Sabbath, or any other proposed legislation providing for the compulsory observance of Sunday in the District of Columbia; to the Committee on the District of Columbia.

5287. By Mr. LINDSAY: Petition of National Organization, Masters, Mates, and Pilots of America, Local No. 2, Philadelphia, Pa., presenting set of resolutions in unalterable opposition to the passage of House bill 11137 on the ground that it is a positive detriment to the best interest of all licensed men in the merchant marine; to the Committee on the Merchant Marine and Fisheries.

5288. Also, petition of national defense committee of the American Legion, Washington, D. C., protesting against House Joint Resolution 183 as being inimical to the public interest and would impose a self-imposed enlargement of the definition of neutrality such as agreed to by no other nation; to the Committee on Foreign Affairs.

5289. Also, petition of Charles L. Noble, of Clyde, N. Y., protesting the passage of the corn sugar bill; to the Committee on Interstate and Foreign Commerce.

5290. By Mr. LYON: Petition of certain citizens of Wilmington and Scotts Hill, N. C., protesting against the passage of House bill 78, in regard to Sabbath observance for the District of Columbia; to the Committee on the District of Columbia.

5291. By Mr. MORROW: Petition of citizens of Mesilla Valley, N. Mex., protesting against House bill 78, Lankford Sunday observance bill; to the Committee on the District of Columbia.

5292. Also, petition of citizens of Mora County, N. Mex., protesting against House bill 78, Lankford Sunday observance bill; to the Committee on the District of Columbia.

5293. Also, petition of citizens of Clovis and Texico, N. Mex., and others, protesting against House bill 78, Lankford Sunday observance bill; to the Committee on the District of Columbia.

5294. By Mr. MURPHY: Memorial of Thelma King, secretary, and Lowell Whinery, master, Butler Grange, No. 993, of Salem, Ohio, stating that Butler Grange 993 voted unanimously in favor of the passage of the "export debenture plan" of farm relief; to the Committee on Agriculture.

5295. By Mr. O'CONNELL: Petition of the Motor and Accessory Manufacturers Association of New York City, favoring the passage of the Capper-Kelly bills (S. 1448 and H. R. 11) to permit the manufacturer of identified merchandise to control his selling prices; to the Committee on Interstate and Foreign Commerce.

5296. Also, petition of the American Legion National Legislative Committee, Washington, D. C., opposing the passage of House Joint Resolution 183; to the Committee on Foreign Affairs.

5297. Also, petition of the Municipal League of Los Angeles, Calif., with reference to the construction of Boulder Dam; to the Committee on Irrigation and Reclamation.

5298. Also, petition of the Richmond Hill Post, No. 212, American Legion, Richmond Hill, Long Island, N. Y., favoring the construction of such vessels and airplanes as are necessary to place the United States on a par with the other signatory powers to the armament conference; to the Committee on Naval Affairs.

5299. By Mr. ROBINSON of Iowa: Resolution adopted by the members of the Dubuque and Waterloo districts of the Upper Iowa Conference of the Methodist Episcopal Church and sent in signed by Lillian Ludwig, of Independence, Iowa, protesting against the large increase in our Navy; to the Committee on Naval Affairs.

5300. By Mr. SINNOTT: Petition of numerous citizens of Sprague River, Klamath County, Oreg., protesting against House bill 78, the compulsory Sunday observance bill; to the Committee on the District of Columbia.

5301. By Mr. SWING: Petition of citizens of Anaheim, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

5302. By Mr. THURSTON: Petition of 99 citizens of Mystic, Iowa, and vicinity, protesting against the passage of House bill 78, or the compulsory Sunday observance bill; to the Committee on the District of Columbia.

5303. By Mr. WURZBACH: Petition of M. J. Barber, O. H. Moss, R. J. Haas, Mrs. R. J. Haas, and 71 other citizens of San Antonio, Bexar County, Tex., protesting against the Lankford compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5304. Also, petition of M. A. Nelson, W. E. Edmundson, G. F. Arps, E. B. Nullinaux, and other citizens of Brownsville, Cameron County, Tex., protesting against the Lankford compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

5305. By Mr. WYANT: Petition of Sewickley Grange, No. 1897, Patrons of Husbandry, West Newton, Westmoreland County, Pa., favoring passage of House bill 10078; to the Committee on Immigration and Naturalization.

5306. Also, petition of J. M. McCall, West Newton, Pa., protesting against Senate bill 2806 and House bill 10022; to the Committee on Agriculture.

5307. Also, petition of State executive committee, Department of Pennsylvania of the American Legion, favoring Navy program outlined by President Coolidge; to the Committee on Naval Affairs.

5308. Also, petition of William Harry Davidson Post, No. 114, Vandergrift, Pa., the American Legion, favoring passage of proposed bill for building up of the American Navy; to the Committee on Naval Affairs.

5309. Also, petition of Capt. George A. Cribbs Post, No. 276, Grand Army of the Republic, Greensburg, Pa., indorsing Morgan bill in behalf of Union Civil War veterans and widows; to the Committee on Invalid Pensions.

SENATE

TUESDAY, *March 13, 1928*

(Legislative day of Tuesday, March 6, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Gooding	La Follette
Barkley	Curtis	Greene	McKellar
Bayard	Dale	Hale	McLean
Bingham	Deneen	Harris	McMaster
Black	Dill	Harrison	McNary
Blease	Edge	Hawes	Mayfield
Borah	Edwards	Hayden	Metcalf
Brookhart	Fess	Heflin	Neely
Broussard	Fletcher	Howell	Norbeck
Bruce	Frazier	Johnson	Norris
Capper	George	Jones	Oddie
Caraway	Gerry	Kendrick	Overman
Copeland	Glass	King	Phipps

Ransdell	Shipstead	Steiwer	Walsh, Mass.
Reed, Pa.	Shortridge	Stephens	Warren
Robinson, Ark.	Simmons	Swanson	Waterman
Sackett	Smith	Thomas	Wheeler
Schall	Smoot	Tydings	Willis
Sheppard	Steck	Tyson	

Mr. JONES. I was requested to announce that the Senator from North Dakota [Mr. NYE], the Senator from New Mexico [Mr. CUTTING], the Senator from Montana [Mr. WALSH], the Senator from New Mexico [Mr. BRATTON], and the Senator from New York [Mr. WAGNER] are detained in a hearing before the Committee on Public Lands and Surveys.

The VICE PRESIDENT. Seventy-five Senators having answered to their names, a quorum is present.

JOINT COMMITTEE ON INTERNAL REVENUE TAXATION

Mr. SMOOT. Mr. President, by instruction of the Joint Committee on Internal Revenue Taxation I present a progress report, division of investigation, as of March 1, 1928, and ask that it be printed in the RECORD.

Mr. COUZENS. Mr. President, may I ask the Senator from Utah if we are going to have the report printed as a public document?

Mr. SMOOT. I will say to the Senator that the Joint Committee on Internal Revenue Taxation are going to order not only copies of this report but of the revised report on earned income, special investigation, in which the Senator was interested, and Federal taxation of insurance companies. They will be printed, no doubt, within the next week, and the Senator can get copies.

Mr. COUZENS. That will contain all the work of the joint committee?

Mr. SMOOT. This is the third report. The joint committee up to this time have printed two reports, and this is the third report.

Mr. COUZENS. The others were printed separately, as I remember. Why not have this report printed separately?

Mr. SMOOT. It is for the committee, at the next meeting, to decide whether they will print the whole as one document or not. What they want at this particular time is to make the progress report and have it printed in the RECORD, and at the next meeting the question of the other report will be taken up and determined by the full committee, and no doubt the reports will be printed as a complete document.

Mr. McKELLAR. Mr. President, my attention was diverted. May I inquire what it is the Senator proposes? Is this a report from a committee?

Mr. SMOOT. It is a report from the Joint Committee on Internal Revenue Taxation. This is the third progress report. The joint committee asked me to have it printed in the RECORD. At the next meeting the report on "Further investigation" will probably be ordered, and we will then print it as a complete document. The committee had already asked that there be copies of each of the subdivisions printed for the use of the committee, and when they are finally decided upon I have no doubt they will all be printed as one document.

Mr. McKELLAR. The request of the Senator now is to print this progress report in the RECORD?

Mr. SMOOT. Yes.

Mr. ROBINSON of Arkansas. Mr. President, may I ask the Senator a question?

Mr. SMOOT. Certainly.

Mr. ROBINSON of Arkansas. Is it expected that the final report will be made during the present session?

Mr. SMOOT. I am quite sure that it will be made at the present session, I will say to the Senator.

Mr. ROBINSON of Arkansas. Three partial reports have been made?

Mr. SMOOT. This is the third report.

Mr. ROBINSON of Arkansas. And when the report is completed, all parts of it will be printed in one document?

Mr. SMOOT. The full 12 subjects will be printed.

The VICE PRESIDENT. Is there objection to the request of the Senator from Utah? The Chair hears none, and it is so ordered.

The report is as follows:

PROGRESS REPORT, DIVISION OF INVESTIGATION, AS OF MARCH 1, 1928

The purpose of this report is to outline as briefly as possible the completed work of this division, the work in process and the status of same, the work which has been approved for the future but not yet started, and, finally, certain recommendations in regard to future subjects which seem worthy of investigation.

COMPLETED WORK

The following reports have been completed and transmitted to the members of the Joint Committee on Internal Revenue Taxation up to March 1, 1928:

1. Plan of procedure, division of investigation.
2. Depletion, oil, and gas wells.
3. Evasion of surtaxes by incorporation.
4. State and local taxes.
5. Capital gains and losses.
6. Earned income.
7. Consolidated returns.
8. Installment sales.
9. Interest.
10. Board of Tax Appeals statistics.
11. Depreciation.
12. Refunds, credits, and abatements from March 1, 1927, to November 1, 1927.

The majority of the reports on the above-mentioned subjects appear to have been sufficient for the purposes of the committee, with a few exceptions. In these latter cases a revised report is necessary and will be noted at the appropriate place under "work in process" or under "work approved but not started."

WORK IN PROCESS

The following subjects are under investigation and reports on same are in various stages of completion.

1. The income tax on insurance companies: A report on this subject has been completed by Mr. Stratton, auditor for this committee, and is now being revised following a conference with the writer. The report will be ready for transmittal to the committee within a few days.

In respect to this subject it may properly be stated in advance that the insurance provisions of the law have undergone practically no change since 1921. On the whole, the provisions are found to be satisfactory, but the question of exempting insurance companies from tax on capital gains and denying them credit for capital losses will be raised; as the reason for treating insurance companies differently from all other companies in this respect is not apparent.

2. Depletion of metal mines: A report on this subject has been completed by Mr. Shepherd, mining engineer for this committee. This report is in process of being revised by the writer. A preliminary copy of the report has been submitted to the chairman.

The general purpose of this study has been to devise a means of determining depletion on the basis of a percentage of gross or net income, thus eliminating troublesome and indefinite discovery valuations based on individual judgment. The work of assembling, interpreting, and summarizing the necessary statistics on this subject has been difficult but has been satisfactorily completed.

The method of application of the percentage suggested in the original report appears to be too favorable to the mining industry, and the report is being revised in this respect and should be completed by March 15.

3. Depletion of coal mines: A preliminary report on this subject has been made and the same remarks apply as in the case of the report on metal mines just noted.

4. Special investigations: At the request of Senator COUZENS and under instructions from the chairman, certain individual cases or subjects, which had been partially investigated by the former Senate committee of which the Senator was chairman, have been reported on.

This report is in the hands of the chairman and is ready for transmittal to the members of the joint committee.

5. Earned income: A revised report on the subject of simplification of the earned-income provision is nearing completion. While this subject has been reported on and the necessity for simplification recognized, the details of the first report were not approved by the Ways and Means Committee. It is believed the revised report will meet with favorable comment. The basic idea was proposed by the chairman.

6. Refunds, credits, and abatements (from November 1, 1927, to March 1, 1928): A report of all refunds, credits, and abatements in excess of $75,000, approved by the Bureau of Internal Revenue, from March 1, 1927, to November 1, 1927, has already been made and transmitted to each member of this committee. A supplemental report covering the refunds, credits, and abatements approved since the latter date up to March 1, 1928, is in process.

7. Graduated tax on individuals: Inasmuch as the present tax on individuals is complicated by the use of three normal tax rates and a graduated table of surtax rates, a report has been started with the purpose of developing the feasibility of substituting for the present system a single scale of graduated rates which will accomplish practically the same results.

8. Special advisory committee: A report has been started describing the purpose, organization, and functions of the special advisory committee recently established by the Bureau of Internal Revenue for the primary purpose of keeping tax cases from going unnecessarily before the Board of Tax Appeals and the courts and increasing the present congestion. This report was ordered at the last meeting of the joint committee.

9. Administration: While a report on this subject has been made to the joint committee by the Treasury Department, material is being gathered for a supplemental report on the same subject by this division with special reference to the difficulties encountered by the taxpayers

in dealing with the complexities of our present administrative system. Mr. Chesteen, assistant chief of this division, is preparing this report.

10. Statistics: This division is constantly employed in the analysis and summarization of tax statistics, reference to which is required in nearly all reports. Members of the committee can secure such statistics on almost any tax subject on request.

FUTURE WORK (APPROVED)

The following subjects have been approved for investigation, but reports on same have not been started, although certain statistical and special data have been accumulated in readiness for use in such reports:

1. Inventories: This subject has been approved for investigation because of the difficulty in arriving at the correct market value of inventories at the beginning and end of the year. The importance of the subject has been shown by the large amounts refunded on account of adjustments to such inventories.

2. Foreign corporations: Certain statistical and special information indicates that foreign corporations with branches in this country are able to avoid taxes by shifting profits to the parent company. For instance, one large firm doing business in this country to the extent of $200,000,000 annually has apparently paid practically no tax since 1916. An investigation of this matter has been approved.

3. Gifts and trusts: A certain amount of income appears to escape taxation through gifts and trusts. A preliminary study has been ordered to develop the necessary facts and to show the present inconsistencies of our law on this subject.

4. Gain or loss: The provisions relating to the recognition of gain or loss from sales and exchanges have presented difficult questions. The meaning of the word "income" as used in the constitutional amendment is specifically involved. A report on this subject has been approved.

5. Reorganizations: The provision in reference to reorganizations is among the most technical contained in the revenue act. A report covering certain aspects of this subject has been considered advisable.

6. Net losses: It appears that the determination of net losses allowed as a deduction from the income of the two next succeeding years has been troublesome in certain cases. An investigation of this matter has been approved.

RECOMMENDATIONS FOR OTHER INVESTIGATIONS

While the investigation of the specific subjects already noted in this report will undoubtedly have a beneficial result, the writer believes that the work of the division will fall short of what the committee, the Congress, and the public have a right to expect unless certain reports are made with a decidedly broader scope. Real simplification may be secured by departing from some of the methods now in use in our tax law. In the majority of cases the revisions of the sections, one by one, do not accomplish much simplification, whereas the revision of a number of sections as a group may so result.

For instance, Senator REED, of this committee, at one time suggested the possibility of eliminating capital gains and losses and depreciation and depletion. This proposal, while not favorably reported on in its original form, may well result in a revised plan which will have great merit in regard to simplification. In any event, in such an investigation it is obvious that we must deal with not one but at least four provisions of the present law, i. e., sections 204, 208, 214 (a) (8), and 214 (a) (9).

Two such subjects of broader scope have already been approved and noted. One concerned the tax on individuals, which contemplated the substitution of one graduated tax for three normal tax rates and a graduated surtax. This subject is also necessarily connected with dividends and earned income. The second report of a general nature is the one dealing with administration which, of course, will treat of the administrative provisions, both generally and specifically.

In line with the above thought the following subjects are recommended for investigation:

1. Simplification of capital gains and losses, depreciation, and depletion by a new concept of what constitutes income in such cases. (Senator REED'S original proposal has suggested this report.)

2. Fiscal-year returns: If fiscal-year returns could be eliminated, both the law and the administration thereof would be simplified. An investigation of this subject, which would provide a practical means of treating companies who might still keep their books on a fiscal-year basis for their own purposes and merely make adjustments for the calendar year, seems worth attempting.

3. Nonresident alien individuals: There are a number of provisions in the law relative to this class of taxpayers. In view of the small return from the tax on this class a report can be made which would make these provisions much more simple. Even if such simplification should require a more liberal policy toward these aliens, it might be the opinion of the committee that this country could afford to set an example in this matter, with the hope that it would ultimately react in favor of our own citizens having business in foreign countries.

4. Inequities of the present law and suggested remedies: In the course of the detailed study of many actual cases which have been made by this division certain glaring inequities, both against the taxpayer and against the Government have been found. A report on this subject develops the possible need of including in our tax law certain principles which up to this time have not been recognized.

It is probable that there are more subjects of the character just described which will be suggested later.

In addition to these subjects, which include the consideration of a number of sections of the income tax law at one time there are, of course, certain other subjects of much broader scope which have been suggested for investigation. No recommendation is made on these general subjects, but it appears proper to enumerate the following questions for the decision of the committee:

1. Should a preliminary report and statistics be prepared in reference to a sales tax or a gross receipts tax?

2. Should a preliminary report and statistics be prepared in reference to luxury taxes?

3. Should a preliminary report and statistics be prepared on a graduated corporation tax?

4. Should a preliminary report and statistics be prepared on an excess-profits tax to have ready in event of war?

5. Should a consistent formula of rate adjustment be worked out to return any desired amount of revenue in a given year?

CONCLUSION

It has been necessary in connection with the work of this division to accumulate a large amount of data on tax subjects. The members of this committee have sometimes availed themselves of the information already assembled, but not to the extent which was anticipated. The writer especially desires to point out that in general information and statistics on tax subjects can be readily given to members of the committee without serious inconvenience.

Respectfully submitted.

L. H. PARKER,
Chief of Division of Investigation.

MARCH 1, 1928.

UNEMPLOYMENT CONDITIONS

Mr. SMOOT. Mr. President, I send to the desk an article published in the Washington Post this morning in the form of a statement from the Secretary of Labor relating to the unemployment condition, together with an editorial from the same paper on the same subject, and ask that they be printed in the RECORD at this point.

The VICE PRESIDENT. Without objection, it is so ordered. The article and editorial are as follows:

[From the Washington Post, March 13, 1928]

UNEMPLOYMENT GREATLY EXAGGERATED, DAVIS SAYS; SOON WILL BE ABSORBED—SECRETARY OF LABOR, NOW MAKING INQUIRY FOR SENATE, SAYS SITUATION IS NOT SO ALARMING AS SOME STATE—FARM LABOR OPENING UP—STEEL INDICATES IMPROVEMENT IN INDUSTRY

(James J. Davis, Secretary of Labor, has written the following article for the Washington Post, exclusively, in which he discusses the unemployment situation with reference to the census of employment his department is making.)

By James J. Davis, Secretary of Labor

The Department of Labor is tabulating the figures on unemployment. It began this work some time before the Senate directed the Secretary of Labor to undertake a study of the actual facts of unemployment. As soon as the returns are complete, the total will be published to the country. The work is now well under way.

The figures so far gathered show conclusively that the volume of unemployment is nowhere nearly so great as has been supposed. The "estimates" now current are proved to be wild and harmful guesses. One such "estimate" was to the effect that 4,000,000 are now out of work. When pressed to substantiate this, the agency responsible for this estimate could not make good. The estimate had simply been pinched out of the air. Nevertheless, it has in certain quarters been taken for fact and given wide circulation.

The statistical experts in the Department of Labor know, by the results of their own investigation so far, that such guesses as the above are wide of the actual facts. Counting every jobless person in the United States would mean the taking of a census, a long, costly, and useless process. By the time the census were complete the situation would have changed and the facts gained would be of no value. But actual census methods are possible in scattered but typical industrial regions, and the similarity of the results obtained may be taken as a sufficiently accurate guide to conditions all over the country.

For example, in one typical city of the manufacturing East one industrial authority put out the estimate that 75,000 persons in that city were out of work. This estimate was made in all honesty, yet if true it would have meant that nearly every worker in that city was out of a job.

In answer to this estimate a more conservative authority made a hasty investigation and arrived at the belief that only 33,000 people were out of work. Still another authority undertook the job in earnest. Every doorbell in that city was rung; every family in it

was questioned; every jobless person was counted. The actual total found to be out of work was under 15,000 people. This was serious enough, but it was less than half the more conservative "estimate" and less than a fifth of the wilder one.

Similar counts from door to door, where these have so far been taken in other cities and States, reveal an almost identical contrast between the actual number out of work and the number of "estimates."

In the best of times there are always about 1,000,000 people out of work in the United States. Some are ill or injured. Many have left a job in one city to take a job in another city. Some are the restless and nomadic. The seasons affect many in the building and garment trades and in farm or other outdoor work. These may be only temporarily out of employment, but on the books from which the records in the Department of Labor are taken these are rated as "unemployed."

Of late years the rapid introduction of labor-saving machinery has displaced many workers who remain to be absorbed in newer industries. Had there been no such new industries to absorb this type of labor, we might have had an economic convulsion. In the past 20 years five great new industries have risen to save this situation, chiefly the automobile and the chemical and electrical industries. The development of these new industries goes right on.

While the present unemployment situation is nowhere near so alarming as interested parties endeavor to make it, it is sufficiently serious to give us earnest thought. I am convinced, however, that with the advancing season much of the present unemployment will disappear of its own accord. Farm labor is opening up. The Government and private enterprise have elaborate building programs on hand. The improvement in steel indicates a general improvement due in industry. With the coming of spring I believe the great bulk of the jobless will thus be soon reemployed—and by their increased buying and consuming power will increase demand and add stimulation to business in general.

[From the Washington Post, March 13, 1928]

UNEMPLOYMENT FACTS

Estimates placing unemployment in the United States at 4,000,000 persons have been picked "out of the air," according to James J. Davis, Secretary of Labor, in a statement to the Post. Exact calculations already made by agents of the Department of Labor reveal a shrinkage of 80 per cent from surmises to facts. There is unemployment, Secretary Davis acknowledges, but as he points out there are 1,000,000 persons always idle in the United States, even when all industry is working at top speed. Seasonal demands have a tremendous influence upon the labor supply, and to-day there are signs of recovery in several lines which have not been active.

One point which Secretary Davis makes can not be overlooked. The development of new industries in recent years has been phenomenal. Millions of men are engaged in the manufacture of automobiles, radios, and chemicals, for whom there would have been no room at the opening of the present century. There are others, such as aviation, just coming to the front.

It appears to be evident, therefore, that the threat of an unemployment crisis was uttered more in politics than in earnest. Detailed examination will reveal no such ailment as the first calamity howl would have indicated. In any event, matters can not be helped by what Mr. Davis terms "wild and harmful guesses." Predicting hard times is one way of obtaining them.

Mr. SMOOT. In a discussion of the unemployment question a few days ago, Senators asked me what were the 54 industries to which I referred. I have a list of them here, and, to demonstrate that they are not wholly what are called "big business," I ask permission to have the list inserted in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

TABLE 1.—*Comparison of employment and pay-roll totals in identical establishments during one week each in October and November, 1927*

Industry	Establishments	Number on pay roll		Per cent of change	Amount of pay roll		Per cent of change
		October, 1927	November, 1927		October, 1927	November, 1927	
Food and kindred products	1,701	230,998	227,198		$5,853,774	$5,763,163	
Slaughtering and meat packing	196	83,773	84,770	+1.2	2,152,681	2,184,742	+1.5
Confectionery	312	41,626	39,713	−4.6	764,561	732,455	−4.2
Ice cream	208	9,450	8,853	−6.3	312,315	291,461	−6.7
Flour	337	16,124	15,785	−2.1	445,070	425,824	−4.3
Baking	634	69,282	67,987	−1.9	1,859,300	1,829,719	−1.6
Sugar refining, cane	14	10,743	10,090	−6.1	319,847	298,962	−6.5
Textiles and their products	1,883	613,294	612,186		12,434,220	12,003,242	
Cotton goods	474	238,648	238,606		3,951,304	3,848,837	−2.6
Hosiery and knit goods	244	80,383	81,544	+1.4	1,592,129	1,582,683	−.6
Silk goods	188	54,752	54,166	−1.1	1,180,934	1,131,879	−4.2
Woolen and worsted goods	194	65,387	66,104	+1.1	1,500,407	1,485,218	−1.0
Carpets and rugs	29	23,644	23,996	+1.5	627,636	638,725	+1.8

Mr. SMOOT. Reference was made to a report submitted by Secretary of Labor Davis in August, 1921, less than six months after the Republicans came into power March 4 of that year. This report may be found in the CONGRESSIONAL RECORD of August 16, 1921, dated August 12. It was offered and printed in response to Senate Resolution 126. In this report the Secretary of Labor estimated that at that date there were 5,735,000 unemployed in the whole country, distributed as follows: Manufactures, 3,900,000; mining, 250,000; transportation, 800,000; trades and clerks, 450,000; domestic and personal, 335,000—total, 5,735,000. The report further states that there were 3,906,450 fewer workers employed in July, 1921, than in January, 1920. Employment was above normal in the spring of 1920, and the drop came in the winter and spring of 1920–21. The unemployment situation was so bad that President Harding called a national conference. In his annual report of 1922 Secretary of Commerce Hoover refers to this as follows:

> The extension of unemployment to between 4,000,000 to 5,000,000 of our workers as the result of the industrial slump [of 1921] presented the most difficult unemployment crisis that the country had ever faced. * * * On September 26, 1921, a conference on unemployment was summoned at this [Commerce] department in cooperation with the Department of Labor.

PETITIONS AND MEMORIALS

Mr. WILLIS presented petitions of sundry citizens of Dayton and Hamilton County, in the State of Ohio, praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. WARREN presented a resolution adopted by Lodge Fjallets Stjarna, No. 236, Vasa Order of America, of Rock Springs, Wyo., favoring repeal of the national-origins quota provision of the existing immigration law, so that the quota allowances for Sweden and other Scandinavian countries may remain unchanged, which was referred to the Committee on Immigration.

Mr. McLEAN presented a paper in the nature of a petition from the Woman's Relief Corps, Auxiliary to the Grand Army of the Republic, of Greenwich, Conn., praying for the passage of legislation granting increased pensions to widows of Civil War veterans, which was referred to the Committee on Pensions.

He also presented letters in the nature of petitions from the pastor of the First Baptist Church, of New London; president of the Fairfield County League of Women Voters, of South Norwalk; and the minister of the Congregational Church of New Canaan, all in the State of Connecticut, praying for adoption of the so-called Gillett resolution suggesting to the President the advisability of a further exchange of views with the signatory States regarding the adherence of the United States to the Permanent Court of International Justice, etc., which were referred to the Committee on Foreign Relations.

He also presented letters in the nature of memorials from the American Philological Association of Trinity College, of Hartford; the Savings Bank of Danbury; the Berkley Cooperative Society, of Middletown; the Branford Trust Co., of Branford; and the pastor of the Community Congregational Church, of Eastford, all in the State of Connecticut, remonstrating against the passage of the bill (S. 1752) to regulate the manufacture and sale of stamped envelopes, which were referred to the Committee on Post Offices and Post Roads.

He also presented a telegram in the nature of a petition signed by the committee of Ahepa Chapter, No. 62, of Bridgeport, Conn., praying for adoption of the proposed debt settlement between the United States and Greece, which was referred to the Committee on Finance.

He also presented a letter in the nature of a petition from Naval Post, No. 110, the American Legion, of New Haven, Conn., praying for adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

He also presented a paper in the nature of a memorial from the Woman's Alliance of All Souls Church of New London, Conn., remonstrating against adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

Mr. COPELAND presented a resolution adopted by Nassau-Suffolk Civil Engineers (Inc.), of Garden City, Long Island, protesting against the passage of the bill (H. R. 7480) to authorize the transfer of the geodetic work of the Coast and Geodetic Survey from the Department of Commerce to the Department of the Interior, and for other purposes, which was referred to the Committee on Commerce.

He also presented memorials of sundry citizens of Woodside and Elmhurst, in the State of New York, remonstrating against further postponement, amendment, or repeal of the national-origins provision of the existing immigration law, which were referred to the Committee on Immigration.

He also presented resolutions of the Samuel D. Johnson Association (Inc.), of the Borough of Brooklyn, N. Y., protesting against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Syracuse, N. Y., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. REED of Pennsylvania presented a resolution adopted by the national defense committee of the American Legion, which was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

> Whereas the members of the American Legion, composed of former service men who engaged in the greatest war in history, are vitally interested in the peace of the world and the security of our Nation: Therefore be it
>
> *Resolved*, That the national defense committee of the American Legion recommends to the President that at all international peace, disarmament, or similar conferences, involving the question of national security, in which the United States is a participant or has an observer, official or otherwise, the American Legion be accorded a representative at such international conferences; and be it further
>
> *Resolved*, That the chairman of this committee, with such members as he may select, be, and is hereby, authorized and requested to deliver a copy of this resolution to the President of the United States.

The foregoing resolution adopted by unanimous vote of the national defense committee of the American Legion, in session at the Army and Navy Club, Washington, D. C., March 11, 1928.

ROY HOFFMAN, *Chairman.*
C. V. SPAWR, *Secretary.*

Members American Legion national defense committee: David L. Shillinglaw, Forgan, Gray & Co., 105 South La Salle Street, Chicago, Ill.; C. V. Spawr, Benton Harbor, Mich.; Gill R. Wilson, 19 North Clinton Avenue, Trenton, N. J.; Dudley W. Knox, Navy Department, Washington, D. C.; G. Angus Fraser, Bismarck, N. Dak.; William G. Mitchell, "Boxwood," Middleburg, Va.; Albert L. Cox, Raleigh Building & Loan Building, Raleigh, N. C.; Hanson E. Ely, Governors Island, New York, N. Y.; Roy Hoffman, 906-912 First National Bank Building, Oklahoma City, Okla.

REPORTS OF COMMITTEES

Mr. FRAZIER, from the Committee on Indian Affairs, to which was referred the bill (S. 1662) to change the boundaries of the Tule River Indian Reservation, Calif., reported it with an amendment and submitted a report (No. 535) thereon.

He also, from the same committee, to which was referred the bill (S. 2084) for the purchase of land in the vicinity of Winnemucca, Nev., for an Indian colony, and for other purposes, reported it with amendments and submitted a report (No. 536) thereon.

Mr. CARAWAY, from the Committee on Claims, to which was referred the bill (S. 2319) for the relief of John W. Stockett, reported it without amendment and submitted a report (No. 537) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NORRIS:

A bill (S. 3616) granting a pension to Mary V. Bettinger; to the Committee on Pensions.

By Mr. McKELLAR:

A bill (S. 3617) granting an increase of pension to Mattie E. Russell; to the Committee on Pensions.

By Mr. NORBECK:

A bill (S. 3618) granting an increase of pension to Mary K. Johnson (with accompanying papers); to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3619) to permit the naturalization of certain Filipinos who have served in the United States Army; to the Committee on Immigration.

By Mr. RANSDELL:

A bill (S. 3620) granting certain land to the Roman Catholic congregation of St. Joseph's Roman Catholic Church of the city of Baton Rouge, La.; to the Committee on Public Lands and Surveys.

CHANGE OF REFERENCE

On motion of Mr. REED of Pennsylvania, the Committee on Military Affairs was discharged from the further consideration of the bill (S. 193) for the relief of Capt. W. B. Finney, and it was referred to the Committee on Claims.

CLAIMS OF SETTLERS, LAKE COUNTY, FLA.

Mr. FLETCHER submitted an amendment intended to be proposed by him to the bill (H. R. 5695) authorizing the Secretary of the Interior to equitably adjust disputes and claims of settlers and others against the United States and between each other arising from incomplete or faulty surveys in township 19 south, range 26 east, and in sections 7, 8, 17, 18, 19, 30, 31, township 19 south, range 27 east, Tallahassee meridian, Lake County, in the State of Florida, which was referred to the Committee on Public Lands and Surveys and ordered to be printed.

AMENDMENTS TO AGRICULTURAL APPROPRIATION BILL

Mr. RANSDELL submitted amendments intended to be proposed by him to House bill 11577, the Agricultural Department appropriation bill, which were referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 21, line 9, strike out the figure "$257,140" and insert in lieu thereof "$282,140."

On page 21, line 14, strike out the period, insert a colon and add the following: "*Provided further,* That $32,500 of the above amount may be used to enable the Secretary of Agriculture to conduct miscellaneous pathological investigations, especially of the cattle disease known as anaplasmosis."

INVESTIGATION OF FEDERAL FARM LOAN BUREAU AND SUBSIDIARIES

Mr. BLEASE submitted the following resolution (S. Res. 167), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Whereas the Federal Farm Loan Bureau and all subsidiaries thereof were designed, created, and are maintained to aid the farmers and promote the cause of agriculture; and

Whereas criminal prosecutions have been brought, at tremendous expense to the Government, wherein the testimony involved certain officials connected with the said bureau, and resulted in convictions; and

Whereas it is rumored that the affairs of the said bureau and the subsidiaries thereof have been badly mismanaged, and the Government has become heavily involved in the ownership of farms, and is losing considerable money by reason of gross irregularities and otherwise; and

Whereas there is much talk that certain officials thereof have become corrupted through nefarious contact with the fertilizer and other trusts, combines, and organizations, and are using the power and means at their disposal to coerce and exploit the farmers; and

Whereas the said conditions are oppressing and working hardships on the farmers and have called forth protests and complaints too numerous to enumerate; and

Whereas thereby the agricultural interests of this Nation are threatened with ruin: Now therefore be it

Resolved, That the President of the Senate be, and he is hereby, authorized and directed to appoint a committee to consist of five Members of the United States Senate; and that the said committee be, and the same is, hereby authorized and directed to make a full, complete, and thorough investigation of all the officials and into all the affairs of the Federal Farm Loan Bureau, the Federal Farm Loan Board, the Federal land and intermediate credit banks, and all branches, tributaries, and subsidiaries thereof in the several cities and districts in the United States.

Resolved further, That for the purposes of this resolution such committee or any duly authorized subcommittee thereof is authorized to hold public hearings; to sit and act at such times and places; to employ such experts, and clerical, stenographic, and other assistants; to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents; to administer such oaths and to take such testimony and to make such expenditures as it deems advisable. The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words; and the expenses of such committee or subcommittee shall not exceed $—— and shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of such committee or subcommittee. And such committee shall make a final report to the Senate as to its findings and recommendations at the beginning of the second regular session of the Seventieth Congress.

ADDRESS BY SENATOR TYSON

Mr. SHEPPARD. Mr. President, I submit for publication in the RECORD an address on "Americanization and immigration" which was delivered by the Senator from Tennessee [Mr. TYSON] at Philadelphia, on February 18, 1928, at a banquet of Veterans of Foreign Wars.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AMERICANIZATION AND IMMIGRATION

In the first place, I wish to thank you for the pleasure you give me in permitting me to be with you on this occasion and to speak under the auspices of this great and patriotic organization, whose services have been rendered, not only on the battle fields of our own country, but on those of the world as well; namely, the Veterans of Foreign Wars.

I have been asked to address you on Americanization, and I deem it most fitting to speak on such a subject in this great and historic old city.

Here 150 years ago the old Liberty Bell pealed forth the wonderful tidings to the world that a new and independent Nation, where all men were equal, had been born, and that the greatest of all instruments—the immortal Declaration of Independence—had been signed.

When we come to this old city, our minds are filled with thoughts of the past and of our early beginnings in colonial days.

Here we naturally ask ourselves, who and what is an American, and what does America stand for?

How has she charted her course in the past, and how shall she chart her course in the future in order that she may be worthy of those who have gone before, and that her citizens may reap the full destiny for which our ancestors fought and suffered and hoped that she might enjoy.

In order that we may get our bearings on Americanization, and that I may lay a foundation for what I propose to say, let me go back and remind you a little of that past and show you how fortunate America has been.

The foundations of America were laid strong and deep as befits that which should endure. She owes much to the picked stock coming to this splendid and virgin land.

Practically all the first colonists along the Atlantic seaboard were of the same general type. They were English, Scotch, Irish, Swedish, Dutch, and German. They had no insuperable differences of race or traditions. There were few Frenchmen and few Spaniards. What

a different world we would be living in to-day if there had been a great proportion of Frenchmen and Spaniards to first people America.

Long before the year 1700 it was clear that the Atlantic seaboard of North America was to be settled by a population essentially one in blood and outlook and welded into an embryonic unity by the predominance of English-speaking institutions and ideals.

America was from the very outset saturated with Anglo-Saxon civilization. It has been said of the early colonists of America that "God sifted the nations that he might send choice grain into the wilderness."

Only the rationally fit usually came to America as immigrants, and the few outside who did come were soon weeded out by the exacting requirements of the early American life.

Have you thought of the fact that nearly three-fourths of the *Mayflower* Pilgrims who landed at Plymouth, Mass., were under the sod before the first year was over?

Have you thought of the fact that in Jamestown, Va., out of 900 persons landing in 1607 but 150 remained at the end of three years?

Think of the courage, the determination, and the will required to come to such a land and to live here!

When we consider what we are to-day we must realize that America's human foundation had indeed been laid solidly and well.

From the Revolution until well into the middle of the nineteenth century but few newcomers landed in America. The peopling of America clear across the continent to the Pacific coast was done almost exclusively by the colonial stock, which thus became the vital basis of nearly every part of the United States.

At the outbreak of the Revolution there were about 2,000,000 of white people of the colonial stock and 500,000 negroes in our Colonies.

That 2,000,000 of white colonial stock has increased from 1775 to almost 50,000,000 at the present day. In other words, the old colonial stock represents nearly one-half of all the white blood in present-day America.

These colonial Americans were steeped in a common culture and tradition. They were governed by the same basic laws and institutions and they acknowledged undivided allegiance and common loyalty.

We think but little of the great period of time that America was a colony. From the first settlements at Jamestown in 1607 to the Declaration of Independence in 1776 more time elapsed than has passed during all the time America has been a Nation.

In other words, her colonial history was longer than the history of the Independence of the United States, and that long colonial period and the effect it had upon the people of America must never be forgotten.

It is the basic fact in American history and the foundation stone upon which our liberty and the character of our people and our future as a Nation rests.

During all these 169 years of colonial history the trend of the American people was towards unity; toward American independence.

After the winning of the Revolutionary War, unified America soon came.

The only question was then, and is to this day, what sort of America was it and is it to be? And that is one of the great questions which we have to consider now.

When we think that to-day there are estimated to be 117,000,000 inhabitants in the United States of America and only 50,000,000 of these are descended from colonial stock it behooves us to investigate and see why we have this great population which has peopled our country.

Our vast population to-day is due largely to immigration and to the idealistic notions which were adopted at the beginning of our national life.

America was a vast continent and at first it made little difference what man thought about immigration because there were almost no immigrants. For nearly a generation after the Revolution there was practically no immigration, and not until half a century had passed did the number of immigrants swell to notable proportions.

But when immigration did become not only a vast human tide, but one composed of men strange in blood and equally strange in outlook and culture, America's acquired ideals prevented a clear-sighted understanding of immigration's full significance.

In the early days the popular idea was that America was a refuge for the oppressed of all nations. For 100 years we welcomed every immigrant and thought to mold them into good Americans, whatever their origin, condition, or antecedents, and thus we took no account of the vast number of immigrants which were filling up America.

To exclude anyone was considered un-American. Not until our own days did the ugly facts of mass alienage and aggressive hyphenism awake the American people to the grim fact that our basic ideals, our culture, our very nationhood itself were imperiled and that a long and crucial period of reconstruction lay before us.

The first half of the nineteenth century may be said to be the "springtime of American national life and the welding of our population into a real American people."

It was most fortunate for the stability of American national life that no large immigration arrived during the first formative period. If hosts of aliens had during this time pushed westward and established themselves as the first settlers, these might have been solid blocks impervious to American civilization, and they might have made it impossible for our country ever to be a real nation.

Those who are now in favor of restricted immigration are criticized severely by this vast population who have come to our shores in the last 60 years.

They seem to feel that their right to come here should not be denied by those who won this vast and wonderful country, who made it an independent nation, and made it possible for these oppressed of the other nations of the world to come to this, the greatest and most prosperous country of the world, where man had freedom and equality and liberty and the opportunity to amass property and become independent.

Let me recount briefly the reasons why the pioneers and those who were descended from them should have the paramount right to this country.

The almost incredible hardships and dangers suffered by the early pioneers, together with the indomitable spirit which surrounded and immortalized them, could be shown by a thousand examples of heroism and dauntless courage, which is best typified by the stern figure of such men as Daniel Boone, a native of Pennsylvania and the hero of Kentucky, and an outstanding example of the pioneer breed.

I will give you an example which occurred in my own State of Tennessee. Let us consider that heroic band of 380 persons who trekked from North Carolina about 1785 over the mountains 500 miles to the site of Nashville, Tenn.

In those days Tennessee, like Kentucky, was the "dark and bloody ground."

Within a year after their arrival hardships and the Indians had reduced their numbers to 134 persons, while after another six months only 70 remained alive. Their situation being apparently hopeless, a ballot was suggested to determine whether to take the desperate chance of staying or to go back home. Not one voted to return.

That was the spirit the pioneer breed displayed generation after generation as the frontiersmen pushed west, west, ever west, beating back the fierce and savage foe, and hewing their way through the trackless forest or floating down the rivers on the rafts to the Mississippi; crossing the great trans-Mississippi prairies and the vast desert plains to the foot of the Rockies; scaling the great wall of the Rockies and descending the Pacific slope, until the waves of the western ocean set bounds to their epic progress and bore witness that continental America had at last been wholly won.

After this great empire had been won by the pioneers and the Civil War had been concluded, the Nation was finally placed upon a firm and solid foundation; then began that great tide of immigration to our country to take advantage of this wonderful land which had been conquered by these pioneers and those who came after them, all ready, without any effort on the part of those immigrants, to be enjoyed to the full measure.

Who can justly say that these immigrants coming to this prosperous and prepared land, after 100 years of struggle and blood by our pioneers, shall be entitled to more consideration than those who had prepared it for them?

Ah, my friends, this subject of immigration is so wide in its scope, so tremendous in its consequences!

It is the most important subject, perhaps, now affecting the citizenship and the future of our great Nation and has been so for many, many years.

Unfortunately, until a short time ago our country did not realize the tremendous abyss toward which she was moving. She did not realize the alarming situation that was brought about by the vast number of immigrants which were coming to our country.

It is true that our Constitution has vested in Congress the power to regulate and control immigration, but our people did not heed, and our first realizing sense of the great danger of immigration was the Chinese question and the restriction of Chinese immigration as far back as 1882.

One of the first speeches which I ever made was in favor of the restriction of Chinese immigration. From that day to this I have been fully alive to the great danger to our country of permitting alien hordes to come in without limitation.

Neither time nor space will permit me to go into detail regarding the vast numbers of aliens which came to our country from the Civil War down to this good hour, when more than a million a year were brought in for many, many years.

But suffice it to say that to-day we have in this country 117,000,000 of people, and 14,000,000 of these are foreign born, and 21,000,000 more are of foreign parentage.

Notwithstanding the fact that we have passed laws restricting immigration, we are receiving into our country more than one-half a million each year, and it is possible and believed by good authorities that as many more are perhaps being smuggled in illegally.

For the fiscal year ending June 30, 1927, 538,000 aliens legally entered the United States.

For a long time we assumed that America could absorb every immigrant that could come to this country. We felt we were the melting

pot where every immigrant could within a short time be Americanized and that our ideas of liberty and freedom would be adopted by the oppressed of every nation of the world who came to us. We had no thought of the day when this should become such a menace that there should be restriction of immigration.

The first act which had the effect of limiting immigration at all was the test act of 1917, but this act only retarded slightly the great influx of foreign hordes.

Finally the great World War came on and immigration was for the time being stopped. This war was the greatest scourge that ever visited the world, but out of its darkness and despair much good has come. This war forced upon us the consideration of the essentials of life. As individuals we were forced to consider the meaning of our lives and our duty to our country. It opened our eyes to the dangers of immigration and the failure and insufficiency of the melting pot.

As citizens of our country we were forced to examine the nature of our country, its origin, its ideals, and its destiny. The present knocked imperatively and sounded the depths of our past. Our ancestral origins called to us and thoughtful America hearkened to the voice of the past.

The new aliens who had no past in our country naturally hearkened to their own past. The war made us all race conscious as we had never been before.

In Europe men ceased to be socialists and became Germans, Frenchmen, Belgians, Italians. And this continues since the war.

To-day great numbers of Americans feel that a certain degree of racial unity is necessary to a nation. We have now realized the necessity, not only of limiting the numbers of immigrants who come here but we have determined to limit the numbers on the basis of their racial origins.

In 1917, 1918, and 1919 but little immigration came to our country. But in 1920 our immigration from Europe was 246,295, and 64 per cent of that came from southern and eastern Europe. A great flood of immigration was feared for 1921.

In this year of 1921, three years after the war had closed, we realized as we had never realized before that unless some prompt efforts were made to restrict immigration in our country, owing to the conditions in Europe, we would be flooded with a horde of immigrants such as had never occurred before. Therefore, for the first time, we passed a general exclusion bill limiting the numbers who might come here to definite quotas.

But this act was found inadequate to cope with the situation, and on May 26, 1924, Congress passed another act, known as the Johnson Immigration Act.

I wish to call your attention to the fact that I believe this Johnson Immigration Act is one of the most important pieces of legislation ever passed in this country, and possibly will have, ultimately, as much if not more influence on the future of our country than any other piece of legislation since the adoption of the Constitution of the United States.

The passage of this bill marks the end of an epoch and the beginning of a newer and truer one—an epoch dominated by the opinion that a *nation can not* be formed through and by a melting pot—that a nation is the product of a united racial stock, and that it is formed slowly and not by magic.

My belief, when we view all the surroundings of our country, is that restriction is our first paramount necessity if we are to keep a sufficient portion of our population homogeneous enough to maintain our nationality.

Nations come by slow growth and long travail. They depend on like-mindedness, and if the United States becomes a hodge-podge of a score of races, no one of which is dominant, it will lose its unity and become only a geographical expression.

Our social and national unity are threatened by the heterogeneous character of our population, and as patriotic men and women of America we must stop this great peril.

We have some very good laws on the statute books to-day in regard to immigration and the duty now of our patriotic citizens is to stand fast and maintain and enforce them.

I do not wish to be understood as being opposed in any sense to our foreign-born population, or in any sense criticizing them or claiming that any large number of those who have come as immigrants to this country in the last 50 years are inferior to those who were here before.

But I believe the proper policy to pursue is to educate and teach every man, woman, and child in America to be a good American. And to assume and acknowledge that all who are in this country to-day, who obey the law, are good citizens from whatever land they may have come and wherever they were born.

As true and loyal citizens of America they are entitled to every consideration and right that any other American citizen is entitled to.

But let us all realize whether we are native-born or foreign-born that the time has come when our country is becoming so filled with people that there is no need for any further immigration, and so far as I am concerned, in the interest of my country and of all who are here now claiming the rights of America, I am ready to shut the door to every immigrant who may want to come to this country from any source whatever, except a few who may come under the strictest restrictions and the most limited quotas.

We have to-day enough Americans to take care of America and our first consideration and duty is to preserve America for Americans, not only for to-day, but for all time to come.

It should be as much the pleasure and duty of those who have come as immigrants to realize the necessity and value of preserving America for themselves and their posterity as it is for us whose ancestors helped to win America in the beginning, and to make it possible for these immigrants to come and enjoy this wonderful land with us.

This is said with malice to none and with charity for all.

The world is being peopled at such a terrific rate to-day that in 100 years from now America will be so full of people that we may not be able to support ourselves and we may have to call upon foreign nations for our food supply.

It has been estimated that 150,000 people are born into the world every day, and that 100,000 die every day, leaving 50,000 more births than deaths. This would increase the population of the world at the rate of something over one and one-half billions of people per year. Europe is now full to overflowing, having 400,000,000 people, and she looks to America with longing eyes. She can support but few more.

It has been estimated that America can not support conveniently and satisfactorily, and with the same standard of living we have to-day, more than 250,000,000 of people, and in 75 years from to-day, and, perhaps, even sooner, we will find that number in America.

One of the greatest problems of the world to-day is the necessity for the restriction of population, and let not America be caught in the maelstrom of a great increase in her own population, and at the same time be the refuge for the overpopulation of the other nations of the earth.

America has done her part in taking care of the surplus population of the earth.

Self-preservation is the first law of nature, and we owe it to ourselves to preserve America for the posterity of those who are here now.

The problems of assimilation and reconstruction are many. The closing of the gates to mass immigration is only a first step. Political and cultural dissensions must be harmonized.

The courage of the American people is high, their hearts are sound, their eyes are open to the need of the times. With knowledge and vision let us have faith that we shall overcome our present difficulties and shall continue to tread that upward path toward a greater and a better America.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes, with amendments, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 66. An act authorizing B. L. Hendrix, G. C. Trammel, and C. S. Miller, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Mound City, Ill.;

H. R. 6073. An act authorizing E. M. Elliott, of Chicago, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ravenswood, W. Va.;

H. R. 7183. An act authorizing C. J. Abbott, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Golconda, Ill.; and

H. R. 7921. An act authorizing A. Robbins, of Hickman, Ky., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Hickman, Fulton County, Ky.

RADIO REGULATION

Mr. DILL. Mr. President, I would like to say a few words about the amendment placed on the radio bill by the House of Representatives. It is an attempt to bring about equality of radio service to the people of all sections of the country by a method which I think is not practicable as provided in the amendment. For that reason I shall ask that the bill be sent to conference.

This amendment results from the fact that the Radio Commission has disregarded the equitable service provision in the present law. They allocated to the 13 big stations in the country located in the northeastern part of the United States 214,000 watts of broadcasting power, which is 35 per cent of all that was given in the United States, and the other 672 stations

have the remaining 65 per cent. They allowed 213,000 watts of power in the first zone as against 41,000 in the third zone and 61,000 in the fifth zone.

In the commercial field they allowed the Radio Corporation of America and its affiliated stations 175 wave lengths, practically one-half of those which are used for commercial purposes, with 4,415,000 watts of power, almost seven times the entire amount of power used by all the stations in the commercial field.

Competitors applying for wave lengths in this field have been held up. I mention this to show the reason why the House has taken such drastic action as they have in the form of the amendment that has been placed in the bill. I believe there is reason for some legislation to correct the situation, but I feel that the measure passed by the House should be modified in conference, if possible, and I shall ask that conferees be appointed as soon as possible.

Mr. SMITH. Mr. President, I did not hear the Senator from Washington make his opening statement. Who is responsible for the allocation to which he has just referred?

Mr. DILL. The present Radio Commission is responsible for i .

Mr. BROUSSARD. Mr. President, let me ask the Senator for how long a period are the commercial licenses issued?

Mr. DILL. Commercial licenses are issued for not more than one year and broadcasting licenses for not more than 60 days.

Mr. BROUSSARD. Was there not an increase in the allocation of power in the case of one of the zones very recently?

Mr. DILL. The power allotted to some of the zones has been increased since the commission took charge.

Mr. BROUSSARD. Was that due to a new member of the commission?

Mr. DILL. It was due to a member who has been on the commission looking after the increased power for certain stations.

Mr. McKELLAR. Mr. President, will the Senator from Washington yield to me?

Mr. DILL. Yes.

Mr. McKELLAR. The Senator from Washington speaks of the measure adopted by the House seeking to equalize the distribution of power throughout the country as being "drastic," and suggests that it ought to be modified. I want to say to the Senator that I do not agree with him at all. I think the House provision simply guarantees the right of the whole country to such power, and I hope that the Senate conferees will agree to the House provision.

Mr. DILL. Mr. President, I wish to say to the Senator from Tennessee that the objection to the House provision, as I see it, is that it attempts to bring radio service equally to all the people of the United States by dividing or distributing equally the transmitters or broadcasting stations. That is not a practicable method because of the many factors that enter into radio reception, but the purpose of the House to give everybody equality of radio reception is most praiseworthy, and was the intent of Congress when it passed the law. That intent, however, has been disregarded by the Radio Commission, and I want to say to the Senator that I believe we can reach the same result without a provision that will necessarily close many stations or will necessarily shut down certain stations with high power that ought not to be put out of commission at this time.

Mr. McKELLAR. Mr. President, I am inclined to disagree with the Senator from Washington about that, and I hope he will study this provision of the House very carefully before he undertakes to modify it.

Mr. DILL. I shall do that.

Mr. HEFLIN. Mr. President, in connection with what the Senator from Washington [Mr. DILL] has stated I trust that we may amend the measure to which he has referred.

Mr. NORRIS. Mr. President——

Mr. HEFLIN. Just one minute. I think it ought to be amended so that the sections of the country that are now being discriminated against under the present radio law may be accorded adequate relief. The South is being woefully discriminated against, Alabama in particular, and I am ready to join with other Senators to make the law, as we intended it should be in the outset, fair to all the States.

Mr. NORRIS. Mr. President, it is quite evident that there is going to be considerable discussion of the radio measure. I desire to say to the Senator from Washington [Mr. DILL] that I would not, of course, if the matter could be disposed of without any difficulty object to that, but I repeat, it is evident there is going to be considerable discussion on it.

Mr. DILL. I have no desire to discuss the question further at this time.

Mr. ROBINSON of Arkansas. I do not think there will be any further discussion. The Senator from Washington is merely going to ask later for the appointment of conferees.

Mr. NORRIS. Very well.

Mr. DILL subsequently said: Mr. President, I ask the Chair to lay before the Senate the message received from the House of Representatives on the radio bill, Senate bill 2317, for the purpose of disagreeing to the House amendments, asking the House for a conference, and having the Chair appoint conferees on the part of the Senate. It will lead to no debate.

The PRESIDING OFFICER (Mr. STEIWER in the chair) laid before the Senate the amendments of the House of Representatives to the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes, which were, on page 2, line 7, to strike out "six" and insert "three"; on page 2, line 8, to strike out "one year" and insert "six months"; and on page 2, to strike out lines 9 to 13, inclusive, and insert:

SEC. 4. The second paragraph of section 9 of the radio act of 1927 is amended to read as follows:

"The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States, including the District of Columbia, and the Territories and possessions thereof in proportion to population."

Mr. MAYFIELD. Mr. President, I want to say that I am in favor of the amendment that the House adopted to the Senate radio measure. This amendment, proposed by Representative DAVIS, of Tennessee, directs the Radio Commission to allocate wave lengths to the various States according to the population of those States. I think that is the basis upon which the allocation ought to be made. When one station in New York is being given more watts than all of the Southern States combined, it occurs to me that it is high time for the Congress to adopt some kind of legislation that will direct the Radio Commission to make a fair and just and equitable division of the air which God Almighty has given us.

Of course, if the Senator from Washington has an agreement with the leaders of the Senate to send this measure to a conference committee, I shall not interpose an objection; but I should like very much, indeed, to see the Senate vote straightout on the adoption or the rejection of the Davis amendment.

Mr. HEFLIN. Mr. President, if the Senator from Washington will permit me, I suggest to him that he can move to instruct the conferees to agree to the House amendments.

Mr. DILL. No; I do not want to do that, for if I do I will have to withdraw the matter, because I promised not to interfere with the consideration of the Muscle Shoals measure. I want to say to the Senator from Texas that I am in full sympathy with the purpose of the House, and if we can not get a satisfactory agreement with the House conferees we will bring the matter back to the Senate for a vote.

Mr. MAYFIELD. That is satisfactory to me.

Mr. DILL. If we can get an agreement with them on language that will be satisfactory, that will reach their purpose, we will bring that back instead.

Mr. MAYFIELD. That is satisfactory to me.

Mr. DILL. I move that the Senate disagree to the amendments of the House, ask the House for a conference on the bill and amendments, and that the Chair appoint the conferees on the part of the Senate.

Mr. McMASTER. Mr. President, what is the motion, please?

The PRESIDING OFFICER. That the Senate disagree to the House amendments and ask for a conference on the bill and amendments.

Mr. McMASTER. Should there not be more Senators in the Chamber before that motion is made? I think there will be a good deal of discussion about that.

Mr. HEFLIN. If the Senator will permit me, the Senator from Washington has just stated that if he could get the matter referred to conference in the shape it is in, and if the conferees did not agree to a proposition that would be satisfactory to us, he would bring it back in its present form.

Mr. DILL. No; I said satisfactory to the House conferees, who, of course, will carry out the purpose of the House. I may say to the Senator that I think the language is of such a nature that it is not workable, nor will it bring about the result the House desired; but I believe a conference will enable us to agree on language that will be satisfactory to the House and the Senate.

Mr. McMASTER. As I understand the situation, according to the Senator from Washington, the inequality of distribution

of power at the present time is not due to the law but is due to the commission.

Mr. DILL. There is some doubt as to the meaning of the law. It is ambiguous, and we hope to clarify the language by amending it.

Mr. McMASTER. Will clarifying the language of the law bring about a more equal distribution of this power?

Mr. DILL. We will have a chance to pass on the radio commissioners in a few days, also, I will say to the Senator; and clarifying the language under this amendment is intended to do that very thing.

Mr. McMASTER. Mr. President, I desire to say that the conditions in the Middle West are unbearable so far as the radio situation is concerned. There are hundreds and hundreds of square miles of territory which have splendid radio stations, and in any of that territory they are not permitted to listen to radio after 6 o'clock in the evening excepting chain stations. Surely something must be done to remedy that situation.

The PRESIDING OFFICER. The question is on the motion of the Senator from Washington.

The motion was agreed to; and the Presiding Officer appointed Mr. WATSON, Mr. COUZENS, Mr. FESS, Mr. PITTMAN, and Mr. DILL conferees on the part of the Senate.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The VICE PRESIDENT. The pending question is on the amendment submitted by the Senator from Nebraska [Mr. NORRIS].

Mr. BLACK. I send to the desk an amendment to the joint resolution.

The VICE PRESIDENT. Is it an amendment to the amendment?

Mr. BLACK. It is an amendment to the joint resolution as printed up to date.

The VICE PRESIDENT. The amendment submitted by the Senator from Alabama will lie on the table for the present.

The question is on agreeing to the amendment of the Senator from Nebraska [Mr. NORRIS].

Mr. KING. Let the amendment be read, Mr. President.

The VICE PRESIDENT. The amendment will be read.

The CHIEF CLERK. On page 3, at the end of section 4, the Senator from Nebraska proposes to insert the following proviso:

Provided, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities, or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the Secretary of War is hereby authorized and directed to contract with such State, county, municipality, or other organization, or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case the Secretary of War shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the Secretary of War for such electricity: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the Secretary of War shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, he shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the Secretary of War and such distributor of electricity shall be declared null and void and the same shall be canceled by the Secretary of War.

Mr. KING. Mr. President, I desire to ask the Senator from Nebraska [Mr. NORRIS] a question. Is it his intention by this amendment as well as by the provisions of the joint resolution that the Government in the development and distribution of power shall be free from any State control or from the operation of State laws or regulations which may be promulgated by utilities commissions pursuant to State statutes? Is it the intention or understanding of the Senator that the agency created by the pending joint resolution or any agencies operating under it shall ignore constitutional provisions of any State which provide that navigable streams and power development thereon shall be subject to State and to regulation of State instrumentalities that may be created pursuant to State constitutions and State laws?

Mr. NORRIS. Has the Senator finished his question?

Mr. KING. It is a long question, but I shall be glad if the Senator cares to submit his views upon the same.

Mr. NORRIS. It is rather long. I will say to the Senator—and I think my statement will be in answer to his question—that, in my judgment, the Federal Government will not be subject to State law. It is the real intention of the amendment, if possible, to make it ever unnecessary for the Secretary of War to build a transmission line, for instance. He has that authority under other provisions, but the amendment offers an inducement to municipalities, and so forth, to build transmission lines by giving the Secretary of War the right to make contracts with them for 15 years instead of 10.

There are two other things that are sought to be accomplished by the amendment. One is to permit farm associations to organize under State law for the purpose of buying electricity from the Secretary of War for their members, and to permit them to build transmission lines, and, if they shall build transmission lines, to enter into contracts for 15 years. It directs the Secretary of War, when a municipality or a farm organization, in order to secure electricity for the citizens of the municipality or for the members of the farm organization, starts out to organize under a State law now existing or hereinafter enacted, to give them ample time to permit them to perfect their organization under the State law.

The other thing that is involved in this amendment is in case the current is not sold to municipalities and farm organizations, but it is sold to distributing companies, such as the Alabama Power Co., for instance, the Secretary of War, in order to give the consumers, the customers of the distributing company, the benefit of a reduction in price by virtue of the sale of the current by the Secretary of War, he shall require as part of the contract that for such electricity the distributing company shall not charge the ultimate consumer a price that is in excess of a price said to be fair, just, and reasonable by the Federal Power Commission.

Does that answer the Senator's question?

Mr. KING. If I understand the Senator, I think he has answered my question. At any rate, I understand his position to be that the Government shall proceed immediately to the completion of the Muscle Shoals project. That the project shall be devoted primarily, if not entirely, to the production of hydroelectric power, which is to be sold and distributed by the Government to private persons, corporations, and municipalities. The Senator's position, now, is what I have understood it to have been from the time debate upon the resolution before us began. The Senator for years has been insisting that Muscle Shoals be devoted to the production of power. He has been an advocate of the Government going into the power business. I recall many speeches made by the Senator in which he has pointed out the advantages that would result from the Government building and operating power plants and supplying the people and industry with hydroelectric energy. He has often called attention to the rates charged in the Province of Ontario, Canada, and he has insisted that following Ontario's example we could have cheaper power in the United States if the Government should furnish power to the people.

The position of the Senator and some who advocate the resolution before us is that navigable streams do not belong to the States, or at least that the Federal Government may enter upon navigable streams, construct dams, erect electric-light plants, generate power, construct transmission lines, and distribute and sell the power to the people. That in all activities in connection with the production and distribution of power the Government is immune from State constitutions, State laws and regulations, and the control by State public utilities commissions. In other words, if I understand their position, the Federal Government is not limited to the performance of purely governmental and national functions, but it may engage in business, though in so doing it invades the field occupied by private enterprise and competes with persons engaged in private business. It would seem under this view that the Federal Government carries its national powers and national sovereignty into business activities and that it may disregard States and State lines and engage in any or all of the activities that appertain to private enterprise, and in so doing it may escape State laws and regulations and taxation. It becomes more than an imperium in imperio; it becomes a supersovereignty in a sovereign State, the latter being helpless against its activities, whether they relate to proper governmental functions or to

matters and activities within the authority of States or their political subdivisions.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. KING. I yield.

Mr. SIMMONS. I should like to have the opinion of the Senator upon this suggestion: If a community, desiring current from Muscle Shoals, should erect its own transmission line to the point of distribution by the Government, the line, of course, being within the boundaries of the State, why would not the State have jurisdiction over that line? The power is bought from the Government, just as I might buy a suit of clothes from the tailor; the Government delivers the power to the transmission line and it is carried over that line, which is owned by the community. Why, under those circumstances, should the Government have anything to do with the control of the line owned by the people in the particular State?

Mr. KING. Mr. President, either I misapprehend the Senator or he misapprehends me. I am contending for the rights of the States; I am contending that the States shall have the right to exercise their sovereign powers and that the Federal Government, when it ceases to be a sovereign and engages in private business, must submit to the police powers and the rightful authority of the States.

Mr. SIMMONS. That is what I am contending for.

Mr. KING. Then the Senator and I are in accord.

Mr. SIMMONS. But I am taking the position, if the Senator will pardon me, that the fact that a community or other organization owns the line and the line runs to the power distributing point, where the current is delivered to it, does not divest the State at all of its control of that line.

Mr. KING. As I understand the Senator from North Carolina, his position is that if the Government generates power and individuals or municipalities take the same from the source where it is produced and carry it into adjoining States, distributing and using the same themselves, they are subject to the laws and regulations of the States into which they took the power for distribution. I think his position is sound. But the question before us is more far-reaching and of greater gravity than is indicated by the illustration submitted by the Senator. The Senator from Nebraska desires to have the Government build dams, produce power, construct distributing systems, and sell and dispose of the power. He believes, if I understand him correctly, that the Government by so doing will supply the power to the people cheaper than private power corporations. The Senator's position, if I understood him, is that there is a Power Trust or at least corporations controlling the power plants and the power distributing system of the United States, and that the rates charged are inordinately high and in some cases extortionate, and therefore we should have the Government supply electricity to the people.

There are many sincere persons who believe that the Government should take over the streams of the United States, erect dams and build power plants and supply electric energy to industry and to the people of the United States. They do not recognize the dual form of government under which we live. They do not perceive that the States are republics and sovereign and within their sphere have supreme authority; that the Federal Government has limited authority and may not go beyond the powers granted it by the States. There are others who distort and stretch the interstate commerce clause of the Constitution and justify the National Government in undertaking not only governmental duties and responsibilities but activities which belong exclusively within the field of private business. The Federal Government, when it exercises the right of a proprietor or business enterprise, ceases to be sovereign, and becomes subject to the same laws and regulations as corporations or individuals engaged in like enterprises.

Navigable streams do not belong to the Federal Government; it does not own the waters therein or the banks and beds thereof. The States own the banks and beds of navigable streams, holding them in trust for the use of their inhabitants. The States may establish or recognize the riparian doctrine or they may abolish it, as many of the Western States have, and establish the law of appropriation.

The Federal Government can not, constitutionally, enter the State of Alabama and take over the Tennessee River, flowing within the State, and control its waters and banks and beds as if it were an owner and proprietor of the same. If it builds power plants and distribution plants it must do so under the constitution and laws of the State of Alabama and subject to all lawful and proper regulations which that State may provide.

If the Federal Government could enter the States and engage in business in competition with corporations and individuals, the latter being subject to State laws and regulations and to the payment of taxes, the Federal Government could destroy those with whom it was in competition. The Federal Government can not go into Alabama or into any other State and erect power plants and distributing systems and engage in the sale and distribution of generated power without being subject to the same laws and regulations as are applied to corporations or individuals engaged in like pursuits. The Government would be compelled to pay taxes and licenses and be subject to utilities commissions in the same manner as individuals and corporations engaged in the same character of business. The Government may acquire land within a State for purely national purposes and in so doing is not subject to taxation upon the property acquired. It has been held that it may acquire national cemeteries to care for those who gave their lives in defense of the Union. It may acquire land upon which to erect factories to manufacture guns and war supplies. I repeat, in its national activities it has powers and authority denied it when it is engaged in business pursuits commercial in character.

In an early decision of the Supreme Court of the United States, which was an Alabama case, it was declared by the Supreme Court that the "shores of navigable waters and the soils under them were not granted by the Constitution to the United States but were reserved to the States, respectively." The States hold the absolute right to all their navigable waters and to the soils under them for their own common use, subject only to the power of Congress to prevent interference with navigation. If a corporation or individual desires to construct a dam in the Tennessee River in Alabama for the development of electric power, State permission must be obtained and the State laws observed. The State may derive revenue from the enterprise, taxing the building or dam or transmission lines or imposing a license upon the power produced. The Federal Government, if it become a proprietor and enters the State must conform to the laws of the State and be subject to the same limitations, taxes, fees, and so forth, as are imposed upon private corporations or individuals engaging in like enterprises. The same doctrine announced in the Alabama case was reaffirmed in the recent case of Kansas *v.* Colorado, 206 United States. A controversy arose between the two States with respect to water flowing in the Arkansas River. The Government of the United States attempted to interfere, contending that it had an interest in the river and in the water thereof. The Supreme Court denied this right to intervene.

I am contending, Mr. President, for the rights of the States to control their own domestic affairs and am opposing the proposition that the Federal Government may take over the navigable streams and use them as it sees fit for manufacturing or for power purposes, regardless of the constitutions or laws of sovereign States. I concede, of course, as I have indicated, that the Government may acquire land for national purposes. It may not take it, however, without just compensation, and it must be for a public use; that is, a national use. It is a serious question whether the Federal Government may go into a State and expropriate land for the purpose of operating stores in competition with merchants or erecting shoe factories to manufacture shoes to be put into the channels of trade and commerce. Certainly if it does acquire property for such purposes it holds it as any private person or corporation would hold property and subject to the same regulations and the same taxes as property used for similar purposes by private persons.

If the Federal Government, with the consent of the State, desires to erect a plant upon the Tennessee River in Alabama for the manufacture of powder and other munitions needed by the Government, then exercising its sovereign power it may do so. But if the Government goes into the State of Alabama and builds dams and plants and transmission lines and sells power to the public, then it must submit to the laws of Alabama and be subject to the regulations and rules applied to corporations and individuals who may engage in the production and sale of electric energy.

Mr. HARRISON. Mr. President, we are approaching the end of the consideration of this question.

This is the greatest advance toward Government ownership and operation, not only of the generation and transmission and sale of power but of the making of fertilizer, that has ever been before the Congress of the United States.

We have, by our votes against amendments, expressed the will of the Senate, if our action truly expresses the will of the Senate, that all preference shall be given to municipalities in the building of transmission lines and in the distribution and sale of power. Indeed, we have gone beyond that and have given to the Secretary of War authority to sell power directly to individuals. Whether those individuals are engaged in some

public-service function or not, whether they are engaged in the manufacture of aluminum or otherwise, they can get the power. They are under no regulation of the State agencies. If that statement is contradicted, I want some one now to rise on the floor and tell me that it is erroneous. It is written in the very lines of the Norris proposition that the Secretary of War can sell this power to States, to counties, to municipalities, to partnerships, to corporations, and to individuals. I offered an amendment that the Senate did not see fit to accept to put municipalities upon the same basis as corporations and let them sell to corporations, but they were corporations that were regulated by the public agencies of the States.

Yesterday, through the adoption of two amendments touching fertilizer, the Senate decided that the Government is going to experiment. I recall that three years ago the distinguished Senator from Washington [Mr. JONES] offered an amendment here to delay the consideration of the Muscle Shoals proposition for a year. It was voted down by the Senate. The Senate held, by a vote of 50 to 30, that we wanted no more experimentation, but we wanted some fertilizers to be made at Muscle Shoals, and that the surplus power should be distributed. That was the judgment of the Senate; but they have gone back upon that now, and we are to have some experiments not only at nitrate plant No. 2 under the cyanamide process, but we are to have experiments at nitrate plant No. 1 under the synthetic process or under what not. In the meanwhile a lease is going to be made to communities, to municipalities that may join in to build transmission lines for the sale of the power.

I submit, Mr. President, that after eight years and longer of delay in the solution of this question, the time has come for it to be solved. We admit our impotency when we fail to do it; and those on this side of the aisle or the other side who may think that there is some other day coming when we can consider fully this question again, and decide it finally, are dreaming a dream that will not come true.

The steering committee of the Republican Party have set aside this time—it was fine of you to have done it—for the consideration of this question. We have frittered away the time. The joint resolution that has been reported out of the committee has been shot to pieces. The Senator from Nebraska himself has accepted the amendment of the Senator from Tennessee. Another amendment has been offered by him. They have shot it to pieces. The joint resolution has not received from any committee the consideration that it deserves.

Mr. President, I propose to have a record vote on a substitute that I have offered that will settle this question. It will take away from it this Government ownership and operation that is written in every line of the proposal here. It is the Underwood proposal that was offered here in 1925. It was debated here for weeks, and finally the judgment of the Senate was, by a vote of 50 to 30, that it was a wise proposal. It was not adopted in its original state. There were innumerable amendments offered to it and accepted. I am glad the distinguished Senator from Tennessee [Mr. MCKELLAR] is in the Chamber, because at that time he assailed that measure. He said that the fertilizer features of it were not strong enough. He offered an amendment and that amendment was incorporated in the bill. It is here now in this proposal without the change of a word.

What is that proposal? It is as follows:

Since the production and manufacture of commercial fertilizers is the largest consumer of fixed nitrogen in time of peace, and its manufacture, sale, and distribution to farmers and other users, at fair prices and without excessive profits, in large quantities throughout the country is only second in importance to the national defense in time of war, the production of fixed nitrogen as provided for in this act shall be used, when not required for national defense, in the manufacture of commercial fertilizers. In order that the experiments heretofore ordered made may have a practical demonstration—

Says Senator MCKELLAR—

and to carry out the purposes of this act, the lessee or the corporation shall manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, according to demand, on the property hereinbefore enumerated, or at such other plant or plants near thereto as it may construct, using the most economic source of power available, with an annual production of these fertilizers that shall contain fixed nitrogen of at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and 40,000 tons the sixth year: *Provided*, That if after due tests, and the practical demonstration of six years herein provided for, it is demonstrated to the satisfaction of the lessee or the corporation that nitrates can not be manufactured by it without loss, the lessee or the corporation shall cease such manufacture and shall report to the Congress all pertinent facts with respect to such costs with its recommendation for such action as the Congress may deem advisable.

Could you draw a stronger fertilizer provision than is incorporated in that? The Underwood provision first said, "Let us lease these properties. We can not settle the bids here." We had the Ford bid, and we could not agree upon it. We had the American Cyanamid Co. bid, and we could not agree upon it. We had the Associated Power Co.'s bid, and we could not agree upon it. Consequently, after deliberation, it was the judgment of the House and the Senate that a joint commission should be appointed to go out and advertise for bids, to see which was the best bid, and report their recommendation to the Senate and to the House.

Distinguished men were named on that joint commission. The Senator from Kentucky [Mr. SACKETT] and the Senator from Illinois [Mr. DENEEN] and the Senator from Alabama [Mr. HEFLIN] were on that joint commission from the Senate. They made their recommendation, but they got nowhere with it. Indeed, their recommendation was not even considered by the Senate.

We must delegate to somebody the authority to go ahead and make a lease and fix the terms. They are fixed here. We are to get 4 per cent upon the value of the dam and the auxiliaries to the dam there. We will get, under this plan, something like $2,000,000 rental a year. We are receiving now for the power only about $800,000 a year. If we can not lease it by September 1 of this year, the provisions of the Underwood proposal, which I have offered, are that the Government shall organize a corporation, go in there, and make fertilizer to the amount of 40,000 tons of fixed nitrogen annually.

Mr. President, that is the only way in which we are going to solve this big problem. We can experiment with nitrate plant No. 2 and nitrate plant No. 1; we can fight over the surplus power, but we must delegate to somebody this authority in order to settle this great problem.

I put it up to the Senate to exercise their judgment in this matter. Let us adopt this substitute, so that we will rid ourselves of the Muscle Shoals problem; and the American people will be protected under its provisions. It regulates the rates of the surplus power that is transmitted. It puts the matter, first, under the authority of the agencies of the various States. If there is no agency to regulate the rates, then it says that the Water Power Commission shall regulate them. There is not any provision in it that does not protect the rights of the American people. It will dispose of this great natural resource for 50 years under the lease; the farmers will obtain fertilizer and the American Government will be protected through the manufacture of nitrates in case of war.

Mr. MCKELLAR. Before the Senator takes his seat I want to say this to him: He spoke of an amendment of mine being placed in the Underwood proposal. That is true. I felt it was my duty to make that proposal as good as I could get it, but if the Senator will look at the RECORD he will see that I voted against the Underwood proposal even though it contained an amendment which I had offered.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Nebraska [Mr. NORRIS].

On a division, the amendment was agreed to.

Mr. NORRIS. Now, I have another amendment I would like to offer. On page 2, line 9, of my print, the second line of section 2 of the bill reads as follows: "The Secretary of War is hereby empowered and authorized to sell the current," and so forth. After the word "the" and before the word "current" I move to insert the word "surplus."

Mr. MCKELLAR. That is entirely satisfactory to me. I am glad the Senator is submitting the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NORRIS. After the word "current," in the same line, I move to insert "not used in fertilizer operation and for operation of locks and other works."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NORRIS. I have another amendment which, in my judgment, is unnecessary, but several Senators think the measure ought to be explicit in this regard. It is to add a new section to the bill. I send it to the desk and ask that it be read.

The VICE PRESIDENT. The clerk will read.

The LEGISLATIVE CLERK. Add a new section, to read as follows:

The Government of the United States hereby reserves the right, in case of war, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but, if this option is exercised by the Government, it shall pay the reasonable and fair damages that

may be suffered by any party whose contract for the purchase of current is thereby violated.

Mr. NORRIS. I think the amendment only states the law as it is, but I can see no objection to putting it in.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NORRIS. There are some corrections I want made of mistakes. On page 2, line 15, after the word "and," where it reads, "from the 1st day of January, 1929; and," I move to insert the word "in," so that it will read, "and in the sale of such current by the Secretary," and so forth.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NORRIS. In the next line, after the word "War," I move to insert the word "he," so that it will read, "and in the sale of such current by the Secretary of War he shall," and so forth.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NORRIS. In the second line of section 3, which reads, "Government to distribute the current," after the word "the," and before the word "current," I move to insert the word "surplus."

The amendment was agreed to.

Mr. NORRIS. On page 3, in section 6, where it reads, "The Secretary of Agriculture is hereby authorized and directed within the limits of appropriations made by Congress from said fund," I move to strike out the word "said" and insert the word "the," and after the word "fund," to insert the words "hereinafter provided for," so that it will read, "appropriations made by Congress from the fund hereinafter provided for."

The amendment was agreed to.

Mr. NORRIS. On page 4, at the end of subsection (c), I move to strike out the word "and," as it appears at the end of line 10; on page 5, in section 7, I move to strike out next to the last word of the section the word "hereinbefore" and to insert the word "hereinafter."

The amendment was agreed to.

Mr. NORRIS. I ask unanimous consent that the sections be renumbered. We have by amendment placed some fertilizer sections at one end of the joint resolution and power sections at the other end. I ask that the sections be renumbered, placing the fertilizer sections first, to be followed by the other sections.

Mr. McKELLAR. Mr. President, has the Senator offered an amendment increasing the appropriation?

Mr. NORRIS. No; but I will do so. I am glad the Senator called my attention to that.

Mr. McKELLAR. As I understand it, the $2,000,000 authorization provided for in section 11 is to be increased to $6,000,000.

Mr. NORRIS. In section 11, where provision is made for an authorization of appropriation of $2,000,000, I move to strike out "$2,000,000" and insert "$10,000,000." There will be an increase of expenditure made necessary by the adoption of the Caraway amendment.

Mr. KING. I understand the Senator is now asking to strike out the authorization for appropriation of $2,000,000 for experimental purposes and moving to insert in lieu thereof $10,000,000.

Mr. NORRIS. It is not entirely for experiment, but for purposes of the Secretary of Agriculture as defined in the joint resolution. I move to strike out "$2,000,000" and insert "$10,000,000."

Mr. KING. I want to address myself to that for a moment.

Mr. NORRIS. If the Senator wants to debate it, let me withdraw the motion and finish up stating my unanimous-consent request.

Mr. KING. Very well.

Mr. NORRIS. When I was interrupted by the Senator from Tennessee I was about to read the sections as they would appear if my unanimous-consent request were agreed to.

Section 2 will become section 6, section 3 will become section 7, section 4 will become section 8, section 5 will become section 9, section 6 will become section 2, section 4 will become section 5, section 8 will become section 3, the Caraway amendment will become section 4, section 9 will become section 10, section 10 will become section 11, and the amendment agreed to some time ago will become section 12.

The VICE PRESIDENT. Is there objection to the request? The Chair hears none, and it is so ordered.

Mr. NORRIS. In order, now, to give the Senator from Utah an opportunity to be heard, I move, on page 5, line 17, to strike out "$2,000,000" and insert in lieu thereof "$10,000,000."

Mr. SIMMONS. That is an authorization?

Mr. NORRIS. That is an authorization.

Mr. KING. The measure before us, which is known as the Norris resolution, presumably had consideration before a committee, and we may assume the resolution comes from the committee as the result of serious consideration and profound deliberation. This must be assumed because the subject with which the resolution deals is an important one, and Congress for a number of years has had before it propositions dealing with Muscle Shoals. After years of consideration the resolution was presented to the Senate. That it meets the approval of a majority of the Senators I have serious doubt. That it is a patchwork of compromises is evident from the extraordinary provisions and incongruities found therein. In attempting to deal with Muscle Shoals it divides responsibility, invoking jurisdiction of at least two departments of the Government—the Department of Agriculture and the War Department.

The Secretary of War is to complete Dam No. 2 and the steam plant at nitrate plant No. 2 at Muscle Shoals by installing additional power units. This official of the Government is also empowered and authorized to develop electric current at the steam plant and dam, and to sell the same to municipalities and to corporations and individuals, entering into contracts therefor. He is also authorized to construct transmission lines for the purpose of distributing the electric energy generated at the dam and plant referred to.

The Secretary of Agriculture is authorized to construct, maintain and operate plants anywhere in the United States for the manufacture and distribution of fertilizer, or any of the ingredients comprising fertilizer and contract with commercial producers for the production of fertilizers or materials needed in the Government's plan of development. He is also authorized to make alterations in existing plants and to construct and operate new plants. As amended the resolution provides that there shall be turned over to the Secretary the nitrate plant, together with the steam plant which I have referred to, and he is likewise directed to use nitrate plant No. 2 in the experiments of the production of fertilizers.

It is somewhat difficult to determine precisely the meaning of the resolution with the accepted amendments, and the fields which are to be entered by the Government and its agencies, and the restrictions, if any, imposed upon the same. In my opinion, Mr. President, and I say it with the utmost respect for those who prepared the measure before us, and those who are advocating its passage, if the resolution with the various amendments suggested should become law the most serious difficulties would be encountered in enforcing it and the conflicting interpretations would lead to delay, embarrassment and, in a great measure, defeat the consummation of some of the purposes of the supporters of the resolution.

The resolution lacks clarity and precision. It is complicated and cumbersome, and if the various agencies in the Government provided in the resolution to execute its terms undertake the task they will find themselves in a maze of confusion. It goes without saying that the absence of proper limitations will lead to inefficient bureaucracy and governmental waste and extravagance. No proponent of the scheme or schemes who approves of the resolution has ventured, so far as I have heard during the debate, to predict the ultimate cost to the Government. The stupendous sums already expended in the project, amounting to between one hundred and one hundred and fifty millions of dollars, may be entered upon the books as losses or, at least, the greater part of the same. If the departments of the Government attempt the construction of more dams and power plants and transmission lines and fertilizer plants, the National Treasury may be called upon for larger sums than heretofore have been expended in the Muscle Shoals project.

The resolution as it came from the committee carried the innocent little appropriation of $2,000,000 for synthetic nitrogen experimentation. With the wave of a hand it is now proposed to increase this amount to $10,000,000. I am surprised at the moderation of the advocates of the measure. They might with as much reason, and certainly in the light of experience with greater regard for the certain expenditures and losses, have asked for $25,000,000 or $50,000,000. Indeed, to carry out the power project, and that is the heart of this resolution, $50,000,000 will be wholly adequate.

Mr. McKELLAR. Mr. President——

Mr. KING. I know what the Senator from Tennessee will say before he speaks. He will claim that this amendment of $10,000,000 is necessary because of amendments, including the Caraway amendment, so called, which have been adopted and which require the Secretary of Agriculture to assume greater responsibilities than those placed upon him in the resolution as it was presented to the Senate. I now yield to the Senator.

Mr. McKELLAR. I call the Senator's attention to the adoption of the Caraway amendment, under which the Secretary of Agriculture is directed to proceed with the cyanamide plant at Muscle Shoals, which will entail the expenditure of a great deal of money.

Mr. KING. I am familiar with that.

Mr. McKELLAR. I wanted to give the Senator the reason why the amount should be increased.

Mr. KING. The Senator does not give me information I did not possess. I said that undoubtedly the Senator from Tennessee would state—and I stated it for him—that this increase from $2,000,000 to $10,000,000 was by reason of amendments which have been adopted, and which devolve upon the Secretary of Agriculture duties not provided for in the resolution.

I repeat, Mr. President, the increase in this item is quite insignificant and unimportant measured by the huge amounts which will be required if this resolution becomes law, and its provisions, complex, uncertain, and contradictory, are carried out. This scheme upon which we are about to embark leads to labyrinthian paths and, as I have stated, leaves us utterly in the dark as to what burdens it will impose upon the Government. If the project is limited to the building of dams and the generation of power and the construction of transmission lines and the distribution of electric energy developed, tens of millions of dollars will undoubtedly be required. The problems to be encountered will not be fiscal alone, but they will also be economic and business problems. Of course, the project contemplates disregard entirely of State lines, State sovereignty, and State constitutions and laws enacted by States for the regulation and control of public utilities and the waterways within the States. But if in addition to the power scheme, which is the paramount one and the object of this resolution, demands should be made of the Government to manufacture nitrates and various forms of fertilizer and distribute and sell the same to the farmers of the United States, then problems and difficulties perhaps more complex and disconcerting will arise, increasing the embarrassment and troubles of the Government and multiplying its expenditures and swelling its losses.

But we are quite indifferent to governmental expenditures. A few hundred millions of dollars thrown away in experiments and governmental business operations or attempted operations at Muscle Shoals and vicinity are not of sufficient importance to occasion hesitation in passing this measure. Measures now before Congress which we are expected to consider before adjourning call for appropriations, direct and indirect, of considerably more than $5,000,000,000. The ordinary expenses of the Government with its increasing machinery, if we are to heed the demands of the executive departments, will amount to considerably more than $4,000,000,000. Delegations from various sections of the country have besieged the Capitol and committee rooms since Congress convened last December pleading, asking, and demanding appropriations, the aggregate of which would bankrupt the Treasury and call for new revenue laws, adding to the already heavy burdens of the people further taxes amounting to between five hundred million and a billion dollars. We are asked to authorize at a cost of substantially a billion dollars the St. Lawrence River project, the Columbia River plan, and the Boulder Dam project. The demands for the Mississippi River and its tributaries run into the hundreds of millions. Appeals are made for an authorization of more than a billion dollars for the construction of 71 war vessels; $800,000,000 are required for the ordinary expenses of the Army and Navy for the next fiscal year. It will be fortunate for the people and the country if Congress speedily adjourns. The longer we are in session the greater will be the burdens laid upon the people. We could do no better service than to promptly pass the appropriation bills, scrutinizing every item and cutting appropriations to the bone, and a few other bills and then adjourn.

Mr. President, I have upon many occasions during the past few years challenged attention to the heavy burdens of taxation and appealed for greater economy in the administration of governmental affairs. I have opposed appropriations, criticized numerous bills carrying large amounts, and interposed many objections to what I conceived to be unwise measures and bills carrying unnecessary and extravagant appropriations. In my opinion there has been too little regard for the taxpayer, and the increasing appropriations bear testimony to our indifference and to the irresistible power of the lobbyists and appeals coming from all parts of the land, for larger Federal appropriations, and for Federal intrusion into the States, and national assumption of responsibilities resting upon sovereign States and their political subdivisions.

The repeated claims of the supporters of the administration that economy has characterized the administration of President Harding and President Coolidge are not supported by the facts. For the fiscal year ending June 30, 1917, the entire expenditures of the Federal Government were approximately $1,173,000,000. It will be remembered that the United States entered the war in April, 1917, so that the expenses during the first half of the year were much greater than they would have been except for the preparations which our country was making for the great conflict. But this year, as I have stated, the appropriations for the ordinary expenses of the Government will exceed $4,000,000,000, and there will be other appropriations, direct or indirect, amounting to from $500,000,000 to $1,000,000,000. I appeal to Senators on both sides of the aisle to oppose all unnecessary appropriations and to limit the expenditures of the Government to purely governmental purposes and to apply the most rigid economy in every branch of the Government.

It is an hour for a careful examination of the enterprises upon which the Government is embarking, the schemes and plans which are beyond the power and authority of the National Government, but which it is insisted by some shall receive the support of the General Government. It is a time to examine the Constitution and recur to fundamental principles and to insist that the National Government shall not go beyond the bounds of its authority or impinge upon individual rights or the rights of the sovereign States. The line of cleavage separating the National Government from the States must be maintained. State lines must not be obliterated, Federal usurpation must not be permitted, and State responsibilities must not be shirked.

Our Republican friends are in power. I appeal to them to protect the States against the Federal invasion and to apply the principles of economy in the administration of the Government. Though a Democrat, I would be glad to see the party in power give to the country a wise, just, and sound administration, one that conserved individual liberty and was calculated to preserve the States in all of their authority and keep the Republic within safe and constitutional limits. If mistakes are made, if extravagance characterizes the administration of the Government, the party in power must bear the blame.

Before Congress met in December leaders in the Republican Party announced that a revenue bill would be passed reducing taxes several hundreds of millions of dollars. The Secretary of the Treasury announced that there would be tax reduction to the extent of at least $225,000,000. It was my opinion, Mr. President, that a tax measure should have been passed reducing taxes approximately $400,000,000.

If Congress had acted wisely, if appropriations for the next fiscal year were within proper limits, we could have reduced the taxes by $400,000,000 without in any way impairing the credit of the Government or leaving an empty Treasury. The Committee on Ways and Means of the House met several weeks before Congress convened in December and prepared a tax reduction bill which was offered the first day that the House met and was introduced as bill No. 1. The measure passed the House and came to this body. It was reported to the Finance Committee and there by Republican members of the committee promptly placed in a musty pigeonhole. All efforts upon the part of the Democratic members of the committee to secure consideration of the bill have been unavailing. It still remains in the pigeonhole of the committee. Whether it will be permitted to emerge I can not say. Certainly it will not pass this body if we continue our profligate expenditures and continue to enact measures unwise, unsound, and undemocratic, many of them calling for enormous appropriations, and carrying the Government further and further into fields which it should not enter.

I venture to appeal to those upon this side of the Chamber to not follow Republicans and support unsound legislation and measures which can not be justified by reason to supposed extraordinary conditions, and which are paternalistic, socialistic, and unconstitutional.

Mr. NORRIS. Mr. President, we have heard from time to time in this debate, and from year to year when the Muscle Shoals question was before the Senate for consideration, from all sides and from all parties and from all districts, a profession of love for the American farmer. Those of us who have not agreed sometimes with our brethren as to what shall be done with Muscle Shoals were denounced as enemies of the American farmer. We have had it called to our attention time and time again that we should make provision for cheaper fertilizer for American agriculture. Here is the opportunity. Here is an authorization for an appropriation, every penny of which will go toward cheapening fertilizer for the American farmer. I care not what we may think about the wisdom of the joint resolution or any other measure, if we want to provide for the cheapening of fertilizer here is a direct application of public funds for the purpose of doing it.

There are other authorizations in the resolution besides this one, going to water power and for the completion of Dam No.

2 by the Secretary of War and for the completion of the steam plant at nitrate plant No. 2. But here is an authorization which enables the Secretary to go forward at once. It is not the limit, I will say to the Senator from Utah, of public money that is going toward fertilizer. All of the income, after paying the expenses for the great plant down there, is going to be added to this fund. But the committee which reported the joint resolution realized that it would take some time before the Secretary of War would be able to get money from such income, and so provided, and it is stated in the resolution, in order that the Secretary may not be delayed in carrying out the fertilizer proposition of the joint resolution, that an appropriation of $10,000,000 be authorized to assist him to carry it on.

The Senator from Utah complains that the amount was, as originally reported, only $2,000,000. The joint resolution is practically the same as was reported in the last Congress by the same committee, and that resolution provided for $10,000,000. It was thought by Doctor Cottrell, when we prepared the joint resolution now before us, that it would not be necessary to have $10,000,000. He thought that with the income which would soon come from the sale of power $2,000,000 would be enough. But we have adopted an amendment, here known as the Caraway amendment, which provides for more extensive fertilizer operations. It provides for experimentation with plant No. 2, which was not in the original resolution. That will cost some money. If we carry it out, money will be necessary and it ought to be authorized at once, it seems to me.

Mr. President, of all the authorizations for appropriations that I have ever voted for I shall cast a vote for an authorization for an appropriation for the improvement and the cheapening of fertilizer for the American farmer with more cheerfulness than any other vote I ever cast. Senators who have been crying aloud to the heavens that they wanted fertilizer, fertilizer, fertilizer, and were willing to do anything to cheapen fertilizer for the American farmer, now have the opportunity. I do not know of any other or better way to cheapen it. We have the great Secretary of Agriculture now engaged in the business. Does anybody complain that he ought not to do it because he happens to be an official of the Government? Will anybody complain to us that it is not a popular governmental function to experiment and to cheapen fertilizer for the American farmer? We do such things for business.

The Bureau of Standards if spending millions of dollars—and properly, I think—for experimentation in all kinds of operations, in all kinds of inventions for the benefit of men engaged in business. The Bureau of Mines is spending money to improve the mining industry. We are spending millions every year to improve agriculture, and everybody who has studied agriculture knows that one of the things that is going to be necessary in the very near future is a cheaper fertilizer. Here is the opportunity to get it. Do we want the Government to do it? Or would we rather turn it over to a private party to experiment? Would Senators rather turn it over to what is called the Fertilizer Trust and let them have the money and see if they can improve it?

If there is any other suggestion than that the Government should use this fund, than that the Government should make these experiments, I have not heard of it either in the Senate or outside. I would like to hear it if anyone could make a suggestion of a better place to put the money in order to give agriculture the benefit of it.

Mr. HARRIS. Mr. President, may I interrupt the Senator?

Mr. NORRIS. Certainly.

Mr. HARRIS. I call the attention of the Senator to the fact that he overlooked the proposition that the Government has spent about $15,000,000 a year in experiments in powder and arms and things of that nature.

Mr. NORRIS. Yes; and the Government is spending hundreds of millions of dollars for battleships and big guns for the purpose of carrying bombs down into Nicaragua. We are doing all kinds of things where $10,000,000 would hardly be a drop.

Mr. FLETCHER. Mr. President, I desire to say just a word. I think this is one of the best amendments that has been offered to the pending joint resolution. Originally I thought that $2,000,000 would not get us very far, but I think that the amount authorized in this way will accomplish some very good results. The amendments which have been offered to the joint resolution generally, I think, have greatly improved it. In the beginning I was not much inclined to support the joint resolution. I thought it was almost devoid of any great good. I thought that we were not getting very far by adopting such a measure. But the amendments which have been adopted, and the pending amendment too, are good. I think the pending amendment is one of the most important that has been suggested.

Mr. SIMMONS. Mr. President, I was one of the Senators who voted against the so-called Underwood bill. I voted against that bill because I regarded it as essentially a power proposition. I was of the opinion then, and I am of the opinion now, that all the power that is necessary, either steam or hydroelectric, if it has not already been supplied by private capital, will, as the demands arise, be readily supplied by private capital.

There is no necessity of the Government going into the power business. In my own State we have in recent years developed something over 700,000 hydroelectric horsepower. The development of that power has given to the industries of that section an impetus that has within a very few years raised our State to the very front rank of industrial communities in the United States.

The Senator from Kentucky [Mr. SACKETT] a few days ago made a speech in which he pointed out that the difference between the cost of hydroelectric power and the cost of steam power was infinitesimal and need not be considered. That may be so, Mr. President, but steam power exhausts our coal, and we have not a superabundance of that, although we have more than the average nation of the world. However, it is not inexhaustible, but water power is inexhaustible, as is the air as a source of nitrogen; it can never be exhausted.

Mr. President, I arose not for the purpose of discussing the pending joint resolution particularly but for the purpose of making my position very clear. I am not in favor of Government ownership or operation wherever private industry and capital will supply the reasonable demands of the people in order that they may progress and receive at reasonable prices those things which they need. As a rule, private capital is supplying the American demand, but there are some exceptional cases.

The two exceptional cases are those which are of greatest and most vital importance to the future prosperity of the United States: First, that of an adequate merchant marine; secondly, that of an adequate supply of cheap nitrogen.

I am favoring and have favored the Government going into and remaining in the business of shipping just so long as, and no longer than, private capital refuses to supply the needed ships for the purpose of carrying the products of America to the markets of the world, because I know, and have known for years, that so long as America was absolutely dependent, as she was until recent years, upon her competitors in the world's market for the transportation of her cargoes, just so long would America be at a disadvantage in competition with the other nations of the world; just so long would that power of control over transportation be exercised against American trade and in favor of its competitors. So that for that reason I favor the Federal Government going into the shipping business. There is a second reason for Government shipping—supplying an auxiliary service for the Navy in case of war.

Mr. President, I am in favor of the Government going into the fertilizer business to the extent of manufacturing nitrates. I am not in favor of the Government going into the production of any other elements that enter into fertilizer, because private capital is supplying those at reasonable rates, but up to this time, notwithstanding the facts that the necessity for cheaper nitrates has been made manifest to the American people, and that for the past 15 years Senators from the South and Senators from other sections of the Union have stood here and begged for liberation from the bondage of Chile, begged that they might be freed of the $12 export tax which Chile places upon every ton of nitrate the farmers of this country buy, private enterprise has done absolutely nothing to produce artificial nitrates; not one pound of artificial nitrates for the purpose of fertilizer has been made here, though it is true we have been getting cyanamide from Canada, which is a foreign country. Not one dollar has been invested in this country in the manufacture of nitrates for the purpose of making fertilizer less expensive. Therefore, Mr. President, the Government has an obligation, and it is fortunate in these circumstances, in this utter failure of private capital to come to the rescue of the farmer, that the Government owns the great power at Muscle Shoals.

I say to you, Mr. President, that the farmer has and has had many problems. He first had a monetary problem but that has been solved. He has now a traffic problem; he has been overburdened with high freight rates. That problem ought speedily to be solved, and would be speedily solved if the Interstate Commerce Commission would place a reasonable valuation upon the property of the railroads in determining the question of how much they may charge in order to enable them to earn a fair return upon their investment. Where the actual value of the assets of a railroad is doubled, instead of the Government guaranteeing a fair return, it in effect guarantees twice a fair

return on the investment. It is one of the farmer's problems to get rid of that situation; that we shall have to work out in some way or other. But, Mr. President, the most serious problem which confronts the farmer to-day is not high freight rates; it is not even surplus of production. Such surpluses present a serious problem. They do not apply to all agriculture, but apply only to those forms of agriculture which some years make too much and some years make too little to supply the world and the domestic demand. The surplus problem is, indeed, a crying evil and we have got to settle it. The farmers of this country, taken as a whole, will never be prosperous until that problem shall have been solved. The McNary-Haugen bill, if passed, will solve it, and I am in favor of that measure, but that is not the greatest problem of agriculture; that affects only certain branches of the industry. Practically the whole agricultural industry in America is to-day overburdened by an excessive price that has been imposed upon it for nitrogen, which is the chief element of fertilizer, by the exactions of Chile.

Tell me about prosperity! I say to you, Mr. President, that the farmers in my section of the country never knew what prosperity meant until they began to use fertilizer in large quantities. I say to you that my State before the war was designated as one of the "poor" States of the Union, agriculturally speaking; and it was, indeed, a poor State. The section of the State from which my distinguished, amiable, and lovable colleague [Mr. OVERMAN] comes, western North Carolina, was a land of sterile red hills, hardly producing sufficient to sustain the life of the people who lived upon them and to furnish them with meager raiment, but by the use of fertilizer that section of the State has been made almost as fertile as the delta of the Nile. In the eastern part of North Carolina we have doubled, almost trebled, our crops by the use of fertilizer.

In the western portion of the United States, where wheat is raised and the farmers do not use fertilizer, the average yield per acre, I understand, has fallen in recent years from probably 25 bushels to 12 or 15 bushels. In my section of the country, where when we started out without fertilizer we had an average yield probably of less than 10 bushels to the acre, we have increased it to an average of something like 25 bushels to the acre. But the cost of nitrogen entering into the fertilizer that we use is so very high that at the end of the year, although we have enormously increased the output of our land, there is very little profit left.

If the price of fertilizer can be reduced in this country, as Germany has reduced it—and reduced it not by digging it out of the mines, as is done in Chile, but by getting it out of the atmosphere by a cheap process—then every section of the Union will use fertilizer. The West will use it; the East will use it; the North will use it; as well as the South. When we shall have done that our land will produce many, many times more of the products that are needed by mankind than it now produces. Therefore I say that taking agriculture as a whole the fertilizer problem is the most serious one that confronts the farmer to-day. There is no other problem that is so immediately important to him.

The Government has the power and the plant at Muscle Shoals. It would be criminal, Mr. President, to take that power and turn it over to a power company when all the power that is needed for existing industries has already been developed and when every day in every part of the country, utilizing our abundant water power, there are springing up other power companies that are producing electric current and increasing the supply of hydroelectric power.

Therefore I am for the pending joint resolution. So long as I remain in the Senate, until the Government has taken over this plant and produced cheap nitrogen for the farmer or forced private capital to produce it in sufficient quantity at low prices I never intend to vote to turn the power at Muscle Shoals over to a private company. I want the Government to hold it, because I know if the Government keeps it and commits itself to the policy of producing a cheap fertilizer ingredient that it will exhaust the ingenuity of man; that it will employ the best talent that may be found to determine the best and the least expensive production methods; that it will do what Germany has done, and, if it shall do what Germany has done, it will succeed; and I am willing that we should give it $10,000,000 if such an amount be necessary to accomplish this purpose.

I have heard nothing about any billion-dollar appropriations, except $3,000,000,000 for a program for the increase of our Navy; and then Senators quarrel here because we want $10,000,000 to discover some method by which fertilizer can be taken from the air and made as cheaply as it has been made and is being made in Germany now, and has been made in Germany for years past, for the benefit of all the farmers of the country, and incidentally for the benefit of every other interest and industry in the United States.

Mr. President, I did not intend to speak at such length or with such earnestness, but I feel deeply about this subject. I feel that a solemn obligation rests upon us as Members of this body, as I feel that a solemn obligation rests upon the United States, to use Muscle Shoals to accomplish this necessary purpose for the American farmer. This and the shipping matter are two fields in which private capital for one reason or another has totally failed to meet the vital needs of the American people, and of American business, and manifestly the Government itself must assume the duty and discharge it.

Mr. BRUCE. Mr. President, I have not infrequently listened with admiration to the Senator from North Carolina [Mr. SIMMONS] and I always listen to him with profound respect, not only because of his elevated character but because of his solid, fruitful abilities; but I must say that until to-day I never listened to him with a sense of amusement. A sense of amusement did come over me, however, when, after declaring himself to be an inflexible opponent of Government operation of industrial activity, except perhaps as last resort, he announced first that he proposed to give his support to the pending Norris joint resolution, and then that he later proposed to give his support to what I conceive to be another indefensible governmental subsidy—that is to say, the subsidy provided for by the McNary-Haugen bill.

Mr. SIMMONS. Mr. President——

Mr. BRUCE. I have only 15 minutes, Mr. President.

Mr. SIMMONS. I am called out of the Chamber, and I merely want to say that the Senator and I thrashed out our differences upon that bill here for hours during the last session of Congress.

Mr. BRUCE. We did. I did not convince the Senator and the Senator did not convince me; and yet, it seems to me, that quite inconsistently, while insisting upon the merits of the pending joint resolution, he spoke of the extraordinary agricultural transformation that has been worked in the State of North Carolina by agricultural fertilizers.

By whom, pray, were those fertilizers produced? Were they produced at Muscle Shoals? Were they produced through the exercise of any governmental agency whatsoever? No! They were produced by that spirit of individual energy and private enterprise, which has made the United States of America the industrial and commercial miracle that it is.

The Senator says—and it warmed my heart to hear him say it, for I love the State of North Carolina almost as much as I love the State of my birth, Virginia, and the State of my lifelong residence, the State of Maryland—that some parts of North Carolina now, under the quickening influence of artificial fertilizers, bloom like a rose. Of what, then, is he complaining? If parts of North Carolina are blooming like a rose, is it his idea to have them blooming like an orchid, and an artificial governmental orchid at that? There is no pretense that the private fertilizer business has not served the United States, and served it well.

Mr. SIMMONS. Mr. President, will the Senator pardon just one interruption?

Mr. BRUCE. I yield to the Senator, but I hope he will recollect that it will cost me probably about a minute.

Mr. SIMMONS. It will not take me a minute.

The Senator misrepresents me. I do not complain that American industry does not furnish enough phosphates, and that we do not get our potash cheaply enough. What I was complaining of was that we are not getting any nitrate of soda furnished us by American capitalists, and that the only nitrate of soda we get we get from Chile, and have to pay an export duty on it to Chile.

Mr. BRUCE. Well, somehow or other the private makers of fertilizers contrive to get it and to make fertilizers and to make them in great abundance and to make them, I venture to say, at a reasonable cost on the whole.

Every now and then there has been a faint suggestion that there is a Fertilizer Trust. Of course, if you believe the progressive Republicans in this body—and I regret to say some of the Democrats—every form of business activity in the United States resolves itself into some kind of gigantic ogre, monster, dragon, or trust. One of the greatest producers of commercial fertilizers in this country, the Virginia-Carolina Chemical Co.—Senators on this side of the Chamber, at any rate, have heard of that company—a company managed economically and efficiently, so far as I know, has lately passed into the hands of a receiver as a result of one of the most disastrous failures known to the industrial history of the United States. Is any-

body saying that the bankruptcy of that great company was due to the fact that it exacted too high rather than too low prices for its products?

Give industrial enterprise, individual initiative and energy, but a fair opportunity, under proper governmental regulation, to do its work in this country, and it will always efficiently do its work. That is just as true of the private fertilizer industry as of any other industry. Yet, in spite of that fact, here we have this tremendous proposal to have the Federal Government go into the business of manufacturing power and fertilizer at Muscle Shoals in competition with its own citizens and in defiance of all of our best national traditions and principles of conduct. It is destined to result as such movements have always resulted where the Government undertakes to conduct a purely industrial enterprise; that is to say, in annual deficits, to be made good out of the general resources of the Federal Treasury.

For a long time it was suggested that the Democratic Party would probably absorb the progressive Republican element in this country. I am beginning to believe that it is the progressive Republican element that will absorb the Democratic Party, rather than the Democratic Party that will absorb the progressive Republican element. In other words, I believe it is rather Jonah that will swallow the whale than the whale that will swallow Jonah.

I recollect some years ago, when I had inveighed, as I am now inveighing, against these utterly false conceptions of the true functions of government, the Senator from California [Mr. JOHNSON]—and I say this with great respect—declared:

Yes, the Senator from Maryland is right; the conflict between the East and the West is conflict between two fundamental, irreconcilable theories of government.

And so it is.

The idea of the progressive Republican is to come to Washington and get what he can out of the Federal till, to secure gifts, bonuses, largesses, if he can; and if he can not secure anything of that nature, to secure loans, often attended, of course, with utter disaster to the borrower. On the other hand, the old Jeffersonian idea—the old Democratic idea—is that the Government should have just as little to do with private business as possible; should come into competition with it just as little as possible; and that while government is eminently fitted for its own police and other functions, it is peculiarly unfitted for carrying on of any ordinary form of private business or industrial activity. The government that governs least, that adheres most strictly to its own true governmental offices, is the best government. That was the idea of Thomas Jefferson, and that was the idea that persisted in the history of the Democratic Party down to this unhappy time. Now, Democratic Senator after Senator has arisen to declare his purpose of giving his support to the pending resolution, which violates every principle of our party creed; nay, more, which violates every principle that constitutes a part of the real bedrock of our distinctive American institutions.

"Ah," says the Senator from Nebraska [Mr. NORRIS]—and nobody knows better than he what eminent respect I entertain in many regards for him—"at last you have an opportunity, after all your prating, to do something for the farmer, and now you are balking at this opportunity."

To begin with, I would remind the Senator that his resolution in its original form did very little for the farmer. It was only the leavings, so to speak, of his resolution to which the farmer could look for relief with any hope. The resolution in its original character was a power resolution. It is only from pressure, it is only as the result of individual amendments coming from one source and another, that it has been changed into a resolution for the relief of the farmer.

I am willing to do anything for the relief of the farmer, but I thank heaven that the farmers in my own State appear to have too much intelligence, too clear a recognition of the proper line of partition between private business and governmental functions, not to desire me to oppose this resolution, because they have taken the pains to communicate to me in an authoritative manner their wishes upon that subject. But even if they had not done so, I would have opposed this measure, not because I do not cherish a profound respect for the wishes of the farmer, but because I cherish an even profounder respect for the Federal Constitution; not because I love Cæsar less, but because I love Rome more.

It is a sad thing to me, now that my life is gradually passing into the shadows of the late evening of existence, and now that I have attempted throughout by life to make myself familiar with the Constitution and the general history of my country, and now that I have sustained relations of devoted fidelity throughout my life to the Democratic Party, to find what a change, what a radical, what a revolutionary change, the political institutions of my country are undergoing.

The special significance of this pending resolution is much, but to me its general significance is infinitely more. I have been here some four or five years, and in that time the process of Federal centralization has gone on and on until at last I am beginning to think, though I have struggled against such a conclusion year after year, that it is almost idle to attempt to resist the process any longer.

The PRESIDING OFFICER (Mr. STEIWER in the chair). The time of the Senator has expired.

Mr. HEFLIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Edwards	McMaster	Simmons
Barkley	Fess	McNary	Smith
Bayard	Fletcher	Mayfield	Smoot
Bingham	Frazier	Metcalf	Steck
Black	George	Neely	Steiwer
Blease	Gerry	Norbeck	Stephens
Borah	Glass	Norris	Swanson
Brookhart	Greene	Nye	Thomas
Broussard	Hale	Oddie	Tydings
Bruce	Harris	Overman	Tyson
Capper	Harrison	Phipps	Walsh, Mass.
Caraway	Hayden	Ransdell	Walsh, Mont.
Copeland	Heflin	Reed, Pa.	Warren
Couzens	Johnson	Robinson, Ark.	Waterman
Curtis	Jones	Sackett	Wheeler
Dale	Kendrick	Schall	Willis
Deneen	King	Sheppard	
Dill	La Follette	Shipstead	
Edge	McKellar	Shortridge	

Mr. JONES. I desire to announce that the Senator from New Mexico [Mr. CUTTING] is detained in committee.

The PRESIDING OFFICER. Seventy-three Senators having answered to their names, a quorum is present. The question is on the amendment of the Senator from Nebraska, on page 6, line 14, to strike out the figures "$2,000,000" and insert in lieu thereof "$10,000,000."

The amendment was agreed to.

Mr. BLACK. Mr. President, I desire at this time, with that amendment disposed of, to offer again the amendment which I suggested this morning. I ask that it may be read.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. The junior Senator from Alabama proposes the following amendment: Add at the end of section 2, before the period, the following proviso:

Provided, That the Secretary of War shall pay to the State of Alabama a percentage of the proceeds received for the sale of power for distribution purposes equal to the amount of tax imposed by the State upon the production of electric power.

Mr. ASHURST. Mr. President, this amendment is a vital one. It is the recognition of a principle well established by the Federal Government. The able Senator from Maryland [Mr. BRUCE] descanted upon attempts of the Federal Government to override the States, and I am prompted to say that here is a proper opportunity to reserve to the States in general and to the particular State involved that to which the particular State is entitled. The amendment submitted by the junior Senator from Alabama [Mr. BLACK] reads as follows:

Provided, That the Secretary of War shall pay to the State of Alabama a percentage of the proceeds received from the sale of power for distribution purposes equal to the amount of tax imposed by the State upon the production of electric power.

It will be perceived that this amendment does not contemplate nor will its effect be to levy any tax upon such power as is used for the creation and manufacture of fertilizers. It proposes to collect a tax upon such power as is sold in the market for distribution purposes and it lays such tax as may be equal to the amount of the tax which Alabama now levies upon electric current generated by private capital.

Mr. President, at the risk of consuming two or three minutes of my time I shall say that the creation of a State and its entry into the American Union is the most symmetrical and the most beautiful creation of political authority known to mankind. Let us not, however, whilst contemplating the beauty of the entry of a State into the Federal Union, forget that the States existed anterior to and they created the Federal Union. Some of our States were flourishing in their authority, majesty, and strength before the Federal Union was created. Indeed, in order to have a Union the States voluntarily surrendered a portion, but not all, of their authority and jurisdiction and power. Therefore, much as I am inclined to eulogize the Federal Union, whose great dome and whose majesty fill and glorify the world, I never forget that the Union's strength, permanency, and endurance rest upon the States themselves.

We have 48 sovereign States, each one a giant column supporting the Union. Destroy one of the States, or weaken its power, and the same thing will happen to the Federal Union that happens to a temple when one of the columns supporting the temple's weight is removed or weakened. Remove, destroy, impair one of the columns and the whole structure is in danger of falling into disrepair and finally into ruin.

Therefore we should remember that it is the State of Alabama and not the Federal Government that is furnishing the potentiality of this mysterious thing we call electricity, and that furnishes the fall of the river. Electricity, the great force of the Almighty, which is always on the road and which never grows weary; electricity, that invisible, mysterious, and powerful force, is furnished at Muscle Shoals, not by the Federal Government, but by the resources of the State of Alabama.

The amendment offered by the junior Senator from Alabama [Mr. BLACK] evidences statesmanship by demanding that his State shall have a proportion of the moneys, in lieu of taxes, derived from the sale of electric current, which current is to be sold in the general market.

Congress has provided for payments to the States in lieu of taxes in other instances, as, for example, in the agricultural appropriation act of May 23, 1908 (35 Stat. 260), which directs the Secretary of Agriculture to turn over one-quarter of the total receipts from the national forests to the States in which the same are located:

That hereafter 25 per cent of all money received from each forest reserve during any fiscal year, including the year ending June 30, 1908, shall be paid at the end thereof by the Secretary of the Treasury to the State or Territory in which said reserve is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the country or counties in which the forest reserve is situated: *Provided,* That when any forest reserve is in more than one State or Territory or county the distributive share to each from the proceeds of said reserve shall be proportional to its area therein.

In addition, the act of March 4, 1913 (37 Stat. 843), directs that a tenth of these same receipts shall be devoted to the construction of roads and trails within the forest reserves of the States where collected, so that the States actually benefit to the extent of 35 per cent of the gross Federal income from the national forests.

That hereafter an additional 10 per cent of all moneys received from the national forests during each fiscal year shall be available at the end thereof, to be expended by the Secretary of Agriculture for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived; but the Secretary of Agriculture may, whenever practicable, in the construction and maintenance of such roads, secure the cooperation or aid of the proper State or Territorial authorities in the furtherance of any system of highways of which such roads may be made a part.

The act to promote the mining for coal, phosphate, oil, oil shale, gas, and sodium on the public domain (41 Stat. 450) specifically directs that 37½ per cent of all royalties collected shall be paid to the State within which the leased lands are located. Section 35 of that act reads:

SEC. 35. That 10 per cent of all moneys received from sales, bonuses, royalties, and rentals under the provisions of this act, excepting those from Alaska, shall be paid into the Treasury of the United States and credited to miscellaneous receipts; for past production 70 per cent, and for future production 52½ per cent of the amounts derived from such bonuses, royalties, and rentals shall be paid into, reserved, and appropriated as a part of the reclamation fund created by the act of Congress, known as the reclamation act, approved June 17, 1902, and for past production 20 per cent, and for future production 37½ per cent of the amounts derived from such bonuses, royalties, and rentals shall be paid by the Secretary of the Treasury after the expiration of each fiscal year to the State within the boundaries of which the leased lands or deposits are or were located, said moneys to be used by such State or subdivisions thereof for the construction and maintenance of public roads or for the support of public schools or other public educational institutions, as the legislature of the State may direct: *Provided,* That all moneys which may accrue to the United States under the provisions of this act from lands within the naval petroleum reserves shall be deposited in the Treasury as "Miscellaneous receipts."

The same principle is recognized in the Federal water power act of June 10, 1920 (41 Stat. 1072), from which this provision is quoted:

SEC. 17. That all proceeds from any Indian reservation shall be placed to the credit of the Indians of such reservation. All other charges arising from licenses hereunder shall be paid into the Treasury of the United States, subject to the following distribution: Twelve and one-half per cent thereof is hereby appropriated to be paid into the Treasury of the United States and credited to "Miscellaneous receipts"; 50 per cent of the charges arising from licenses hereunder for the occupancy and use of public lands, national monuments, national forests, and national parks shall be paid into, reserved, and appropriated as a part of the reclamation fund created by the act of Congress known as the reclamation act, approved June 17, 1902; and 37½ per cent of the charges arising from licenses hereunder for the occupancy and use of national forests, national parks, public lands, and national monuments, from development within the boundaries of any State shall be paid by the Secretary of the Treasury to such State; and 50 per cent of the charges arising from all other licenses hereunder is hereby reserved and appropriated as a special fund in the Treasury to be expended under the direction of the Secretary of War in the maintenance and operation of dams and other navigation structures owned by the United States or in the construction, maintenance, or operation of headwater or other improvements of navigable waters of the United States.

Mr. BRUCE. Mr. President, the amendment reminds me of the plight of the hapless inhabitant of Ireland in the early stages of Irish history, when he found himself dispossessed by his English conqueror of the land to which he alone had a just title. It is said that after the sway of the English began, and the Irish had been robbed of their lands, they would hang at times about the doors from which they had been driven, begging even for a crust of bread with which to stay their hunger.

As the Senator from Arizona [Mr. ASHURST] has well said, the primary claim to this great natural resource—Muscle Shoals—is that of the State of Alabama; and if our institutions had not been so sadly perverted in recent years, that claim would now be duly respected and honored. In one sense the State of Alabama is just as much entitled to Muscle Shoals as the people of Baltimore and the State of Maryland are to the grand port of Baltimore, or the people of the city and State of New York to that even grander port, the port of the city of New York. Yet the General Government in time of war, and inspired by war exigencies, and war exigencies alone, has gone into the State of Alabama and taken possession practically of her greatest natural gift, and now proposes to exploit it in such manner that the people of Alabama, if they derive any benefits at all from it, will derive only those of a purely secondary and insignificant character.

However, I will continue the remarks that I was making when my time was cut short a few moments ago. I was speaking of the process of Federal centralization that has been steadily going on here ever since I have been a Member of this body. Of nothing does it remind me so much as of the sight that I sometimes witnessed when I was a boy at my rural home; that is to say, the sight of some poor toad on his way down the gullet of a remorseless snake. First the head would disappear, then the little pudgy body, and then the quivering legs; and I almost think that we have reached the point where nothing of State sovereignty is left visible; except its receding extremities.

First of all, I should like to ask—for I have had no occasion to examine the question critically—what constitutional authority has the Feneral Government to enter the State of Alabama and to manufacture power or fertilizer?

Mr. ASHURST. Mr. President, does the Senator from Maryland want me to answer that question?

Mr. BRUCE. Yes; I should like to have the Senator do so.

Mr. ASHURST. The Federal Government has no such authority without the consent of the State of Alabama.

Mr. BRUCE. Precisely.

Mr. ASHURST. So says the Supreme Court of the United States.

Mr. BRUCE. Of course, the title of this great navigable stream, the Tennessee River, is in the State of Alabama, and has never been divested.

Mr. ASHURST. If it be a navigable river, the bed of the river belongs to the State of Alabama.

Mr. BRUCE. Of course, subject to the Federal power of regulating commerce or navigation or of using the Tennessee River or any other stream in the exercise of its war powers, when the supreme exigencies of war may make such a step necessary.

Notwithstanding the undeniable legal obstruction that stands upon the very threshold of this joint resolution, it contemplates industrial production by the Federal Government of both power and fertilizer. If the joint resolution shall go into effect, the Secretary of War may lease power to any individual or to any municipality, whether within the limits of the State of Alabama or not. He is even authorized to erect transmission lines for the transmission of electricity. In other words, if the resolution goes into effect, electricity may be transmitted from Muscle Shoals I know not how far, but perhaps for—am I exaggerating?—several hundred miles, the effect of which, of course, would be to deprive the State of Alabama entirely, or

at least to a great degree, of the natural advantages with which the God of nature has endowed her.

The proposal, of course, is that the Federal Government shall go into private business on a colossal scale—the purely private business of producing power, the purely private business of producing fertilizers; and that, too, in the face of the fact that no real testimony has ever been laid before this body that the private production and sale of fertilizers, at any rate at the present time, are marked by extortion. This is but the first step. If the Federal Government can take over Muscle Shoals and convert it into an instrumentality for the production of power and fertilizer, why may it not take over any other great water power of the country under the pretense of an exercise of the war power or other power and turn it, too, to industrial ends? Where is the limit to be set? Where is the boundary line to be run? The effect of this joint resolution, if passed, would be to embark the Federal Government on an absolutely uncharted sea of illimitable power and experimentation.

As I have said before, all the trouble that inheres in the Muscle Shoals problem is due to the intrusion into it of false ideas in relation to the proper functions of the Federal Government. These ideas did not spring from the soil of Alabama nor from the soil of Tennessee nor from the soil of Maryland nor from the soil of New York nor from the soil of Massachusetts, but from the soil of regions in the United States in which, as I humbly conceive to be the case, the proper scope of government has been hopelessly misconceived and in many instances perverted. Let this process of centralization go on, let this process of Government operation go on, and there will be only one more step for the people of the United States to take, and that is the step that leads directly to the socialization of all industry in the land; and it is in that direction that we are now sensibly tending. It has just been suggested that the prices for all bituminous coal shall be fixed by a Government commission.

As I have stated, I am almost in despair. I look about me and see but one statesman who, it seems to me, is true to the old traditional faiths of the American people, and he, I am glad to say, is the honored governor of my own State, Gov. Albert C. Ritchie. I can almost say of him as Milton says of the seraph Abdiel:

> Among the faithless, faithful only he.

He has insisted upon the Federal Constitution as it was framed by our fathers and as it was administered by generations of renowned American statesmen. He has insisted upon the proper line of partition between Federal sovereignty and State sovereignty.

He has insisted upon the proper line of delimitation between the exercise of governmental functions and private business. In other words, he has been true to the tenets of his master and of my master and the master of every Democrat who is a true Democrat—Thomas Jefferson—but for whose influence and instruction, handed down from generation to generation, there would be no Democratic Party in the land to-day at all. I wish we could see now that great party rising up, aggressive and militant and still with sufficient of the wisdom of its founder in its thought and sufficient of his inextinguishable spirit in its heart to be once more set down as a party, to use another quotation from the poem to which I have just referred, like one of the—

> Spirits that
> Vital in every part,
> Can not but by annihilating die.

But it will die, indestructible as it seems to be, if it shall continue to be faithless to its fundamental principles and to allow the Federal Government to absorb one after the other the rights and powers of the States.

Mr. TYDINGS. Mr. President, will my colleague yield for a question?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Maryland yield to his colleague?

Mr. BRUCE. I yield.

Mr. TYDINGS. While the Senator is discussing that phase of the question, I hope he will also discuss where, under our present Constitution, the Government has the right to operate in time of peace business enterprises of this character.

Mr. BRUCE. The Senator did not happen to be in the Chamber when I referred to that matter. It was just that question which I asked. The Government has no legal right to build that dam or set up that steam plant or to create any works of any kind at Muscle Shoals except either in the exercise of its war powers or under the authority conferred upon it by the Federal Constitution to regulate navigation or commerce; and if, after erecting these works for another purpose, it goes into the business of manufacturing power or fertilizer it is a false pretender; it is like a thief who has gotten into a house by deceit and proceeds to despoil its inmates of their property.

The PRESIDING OFFICER. The time of the Senator from Maryland has expired.

Mr. BRUCE. I thank my colleague for making the suggestion and giving me the opportunity to reaffirm what I said.

The PRESIDING OFFICER. The question is on the amendment offered by the junior Senator from Alabama [Mr. BLACK].

Mr. McKELLAR. Mr. President, I ask the Senator from Alabama would he be willing to accept the language I am about to read as an amendment to his amendment?—

> *Provided*, That the Secretary of War shall ascertain what proportion of such power is generated from water coming from the State of Tennessee, and such tax shall be apportioned to Tennessee and Alabama in proportion to the water coming from each State.

The Senator knows, of course, that the great body of water that passes over the dam at Muscle Shoals comes from the State of Tennessee and, if the Senator is going to ask for a tax on the water passing over the dam, it seems to me that, in all fairness, the State of Tennessee, which furnishes probably nine-tenths of the water that is in the river at Muscle Shoals, should participate in the tax.

Mr. President, I am not going to offer this amendment, but I have presented it to the Senate for the purpose of showing that such a tax is unfair and unjust. I really think, however, that if the amendment of the Senator from Alabama should be adopted and the tax applied, the State of Tennessee, which furnishes, as I have said, probably nine-tenths of the water, perhaps ninety-nine one-hundredths of the water, should receive its proportion of that tax; but I do not think that the Senator's amendment should be agreed to.

Mr. ASHURST. Mr. President, I hope the Senator will let his statement remain in the RECORD, because I want to use it in connection with another bill that may come up.

Mr. McKELLAR. All right. I am perfectly willing that that shall be done.

Mr. CARAWAY. Mr. President, since the Senators are apportioning the tax among the States that may have furnished something, I want to ask the Senator from Tennessee this question: I believe this plant is dedicated to the manufacture of fertilizer; is it not?

Mr. McKELLAR. Yes.

Mr. CARAWAY. They have to use the air in that process, do they not?

Mr. McKELLAR. Indeed, they do. They get nitrates from the air.

Mr. CARAWAY. Why should we not charge the Secretary of Agriculture with the duty of finding out from what State this air blows from which we get the nitrogen, and apportion the tax on the basis of so much for water and so much for air?

Mr. McKELLAR. I will say to the Senator that I think it would be just as reasonable.

I do not think this amendment should be adopted, and I hope it will be voted down.

Mr. ASHURST. Mr. President, if a meter were placed upon the mouth of the Senator from Tennessee and the mouth of the Senator from Arkansas, no tax would be necessary.

Mr. BLACK. Mr. President, I regret very much that the Senator from Arkansas, who has adopted the attitude since the beginning of this debate that Alabama has no right whatever with reference to any asset within its boundaries, has left the Chamber. It seems to me that the Senator from Tennessee, when he offers the amendment that he has offered, should also suggest that the farmers of Alabama should not be permitted to buy any of the fertilizer used at Muscle Shoals because the water comes from Tennessee.

Mr. McKELLAR. Mr. President, I have not offered the amendment.

Mr. BLACK. Mr. President, I do not yield. The Senator did not yield to me.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. McKELLAR. If I did not, I intended to.

Mr. BLACK. It seems to me it would be just as reasonable for the Senator from Tennessee to suggest that some of the rains that fall in Tennessee, that have been gathered up into the clouds from Alabama, entitle Alabama to a direct legislative mandate that the produce grown on Tennessee's land should be sent over to Alabama. It is a ridiculous assertion to stand up in a body like this and make the statement that the assets of a sovereign State are liable to judicial or legislative distribution among the other States of the Nation.

Why, if their theory is correct, Alabama has no right to pass a law governing the stream when it gets into Alabama; we have no right to take a drop of that water for irrigation purposes, because it would be depriving Tennessee of its privileges and rights. According to this theory we have no right to direct how high a dam shall be built on the stream, although the Supreme Court of the United States has directly held that the State of Wisconsin, and likewise the State of Alabama, have the absolute right to determine how high a dam shall be built on a navigable stream. According to the Senator's theory, the fact that the water happens to flow from Tennessee and North Carolina would prevent Alabama from having the benefit of the soil which is deposited on the side of the stream; and therefore Mississippi and other States which to-day seek to have the Government pay all the expense of the process of controlling floods have no right to do so, by reason of the fact that the soil which is distributed there, which will enrich their land, can not be equitably divided among the States of the Union.

Since the very beginning of the history of this Nation the right of a man to his water power has been recognized. In the old days he put his flutter mills on the streams, and woe be to the man who came and placed his unholy hand upon that flutter mill! A little later he put an old mill wheel where the water ran down the mountainside or the hillside. There he built the old-fashioned mill, where he made meal for corn bread; but, according to the theory of the Senators from Tennessee and Arkansas, this pioneer had no right to do it, because, forsooth, some of the water may have come from another State; and woe be unto the man who dared to cast his lot by the side of that running stream and dared to assert the theory that this was his power. Why, even the king, in the old country of England, was not strong enough to place his hands on this right and take it away. But here in America, a republic, a democracy, the land of the free and the home of the brave, it is different. The hand of the king may not be strong enough to take away the rights of the man in England; but over here in America, where the people are controlled by a Senate and a House drawn from various States, with various sectional interests, it is all right for one section to trample on the rights of another, and say, "Get out from under here! You have no right to this water. Part of that water fell from the clouds up in Tennessee or North Carolina. Therefore, Tennessee and North Carolina should come down and take the power that is generated within the portals of your State."

The principle that has always been recognized is that water flowing through a State within that State belongs to that State for its use. It is true that the State has no right to run the stream dry. That would not be proper; but it has the right to any reasonable use of that stream. Any State through whose boundaries there flows a navigable stream has an absolute right, under the laws of this Nation, to determine the reasonable use of that stream, and to apportion it out as it sees fit; and yet a new theory is being evolved. A new scheme of affairs has come into existence. Some other States want something that Alabama has.

Senators, people moved there on the banks of the Tennessee at Muscle Shoals generations ago because they saw the possibilities of that river power, just as people went to Baltimore because they saw the advantages of the harbor there, as others went down on the Gulf to obtain the benefit of the balmy breezes. But under that theory, for instance, the man who went to the mountains to obtain the benefit of the mountain breezes, following out the idea of my friend from Arkansas, would have no right to claim such benefit. Why? Because those breezes may have came from another State, and carried along by the forces of nature may have passed over the soil of another State; and, therefore, woe be to that man who because he has settled on that mountain top claims he has the right to enjoy its breezes!

Why, my friends, it is a law as old as this Nation that the power of a stream—the riparian rights—belongs to him who gets there first. It belongs first of all to the State through which the stream flows. If the State wants to part with it, it can do so only as a trustee. Yet when we come in here with this proposition: "If you are going to give us Government operation; if you are going to take our stream away from us completely; if you are going to assert that which is contrary to the laws of the United States as expressed by the Supreme Court—that the great water powers of this Nation belong to the Government—then we ask that you give us that reasonable percentage which private business would give us if it had settled itself upon the same stream"—when we make that modest request it is denied.

Some one has pointed out the Government built that power plant. Yes; the Government built it. We of Alabama do not claim to own it. We never have made such a claim; any such allegation is wrong and unfounded. Of course, Alabama has never made the preposterous claim that it owns the dam or the plants placed on that stream by the Government; but when the Government steps beyond its authority and impresses a servitude upon that stream for power purposes we do claim that it is right and proper that the State should have the tax which a private power company would pay if it sold and distributed that power, and for that we are ridiculed!

Senators, sooner or later the question will come up with reference to your State. The State of Tennessee, which my good friend Senator McKELLAR represents, has already sent its message up here through its board of public utilities. Tennessee has protested against the very principle which the Senator seeks to assert here in ridicule of this amendment which I have offered. The gentleman who formerly represented Tennessee in this body has also expressed himself in a masterful legal opinion, in which he says that the Government has no right to go down to Cove Creek and assert supremacy and a dominant right over Cove Creek, because it would subordinate the rights of the State of Tennessee. Yes; that is all right for Tennessee; but when Alabama, which has a stream flowing through it—a stream on which people have been living for many years—comes in and makes the simple request, "If you are going to take our power, if you are going to compete down there, if you are going to establish the precedent of taking up for Government operation the water powers of the Nation which have constituted heretofore a natural asset of the State, do not compel us to impose all the taxes on business, on farming industry, and on property which is absolutely owned; give us the right to get a part of the tax from this power"—when Alabama ask for that it is denied to her.

The gentlemen who favor Government operation and the gentlemen who do not favor it are both in favor of this measure, I take it, for this reason: Those who favor Government operation know that one of the chief arguments used against it all over the Nation is that the Government does not have to pay taxes; and the Senator from Nebraska and these other gentlemen know that the taxes imposed by the State of Alabama would represent a very infinitesimal part of the selling price of electricity in Alabama, but if you do not impose a tax the argument will be made, "The only reason why the Government could succeed was because it did not have to pay taxes"; and many other gentlemen who do not favor Government operation look at it in this way.

When the Government goes into business in competition with a private individual there, why should not the Government be taxed? Why should it be given an unfair advantage? Why should the Government, which sells power in Alabama, pay no taxes, although Alabama collects taxes from the other industries engaged in the same business? Sooner or later it will take away from Alabama the right even to tax them, because if you impose a heavy tax on one and do not impose it on another sooner or later the heavily taxed industry will fail and go out of business.

Therefore we insist on this principle for three reasons:

First, because it is fair and right. I insist that no government and no State and no municipality has the right to engage in competition with private business without paying the same amount of taxes that private business pays. When I say that do not understand me to say that I always oppose municipal or Government operation; but I do say that is not fair, not right, and not just to require a citizen to do business and pay taxes and put up next door to him his own government, which pays no taxes.

That is the first thing.

The next thing is that it is just to Alabama to do what we propose because, let my friends talk as they please about the whispering breezes and the running water running through the State of Tennessee; if somebody were to go up into the State of Tennessee and try to take a stream away from that State no voice raised would be stronger in condemnation or more eloquent than that of the Senator from Tennessee.

Mr. ASHURST. Mr. President, while the Senator from Tennessee is talking of whispering breezes and gentle zephyrs, his rule is—

> The simple plan,
> That they should take who have the power,
> And they should keep who can.

Mr. BLACK. Yes, sir. If this amendment is voted down, it will be on that principle. It will be because Alabama has only two voices in this body and because there are others who are willing to take away from those to whom they have been given by nature the natural assets which God has distributed over this Nation.

Just this one other thought, and I am through:

Do not understand me to say that the power plant is a natural asset. It is not; but the falls is a natural asset. The fall of the water, the stream itself which flows through that State is a natural asset. The beautiful Potomac, which flows through this city, is a natural asset. The beautiful streams which flow through the neighboring State of Virginia are natural assets of the State of Virginia. Woe be to the man who goes to Virginia and tries to take away that which belongs to this great State.

I ask you in the name of the State which I represent, in the name of the people there who have settled on the banks of the Tennessee; I ask you in the name of simple justice and simple right, you who would protest if your own State itself were treated as you say you have a right to treat Alabama—I ask you to vote not to take away from Alabama the last right which it has left with reference to a stream which was there when the State was made a State and which has belonged to its people up to this very time, and in which they will continue to have a right unless this body can by legislation take away that which was given by the laws of nature.

Mr. NORRIS. Mr. President, I expect to take but a very short time, but I can not let pass unanswered some of the arguments which have been made, which I do not believe are logical or fair. If the Government of the United States wants to establish the principle that it will pay to States something in lieu of taxation for the public buildings and the public enterprises of the Government of the United States, then it ought to do so by a broad, comprehensive law. I doubt the wisdom of such a thing, and would not agree to attempt to undertake to apply that principle in this case, where most of all it has no application.

It is said now that the Government of the United States has no right in Alabama and has had no right to construct this dam and to build this steam plant, except by virtue of the war power. Those assertions have been made here.

Mr. McKELLAR. Mr. President, I want to call the attention of the Senator from Nebraska to this fact: That both Senators and every single Member of the House, from Alabama, when this plant was built, were earnest and active and potential in insisting on the building of this plant by the Government of the United States.

Mr. NORRIS. Mr. President, if we establish such a principle, then we must go into every State where we have any governmental institution that is doing any kind of experimental work, and we must pay to the State something in lieu of taxes. We would have to go to Wisconsin, where there is a forest experiment station. We would have to go into a dozen different States where experimentation is carried on and products are sold after they are experimented with. We would have to go into every activity in which the Government is engaged. We would have to go to every town where there was a post office and pay a part of the receipts of the post office to the State in the way of taxation.

In this particular case I think there is more reason than in the ordinary case why there is no justice in the claim made by the junior Senator from Alabama. This plant was located at Muscle Shoals; it was constructed by public funds; it is a governmental project; it was put there for the purpose of providing munitions of war in time of war; and providing cheap fertilizer for the farmers in time of peace. Therefore every penny paid to Alabama in lieu of taxation would be so much less going into experimentation and the cheapening of fertilizer for the American farmer.

Alabama gets more out of that than does any other State. In this resolution we have authorized the appropriation of $10,000,000, every dollar of which, I presume, would be spent within the limits of Alabama. The improvement and the finishing of the dam, the enlargement of the steam plant, by the Government funds, would all be in Alabama. We have constructed a dam there which the people of Alabama are using to-day as a bridge. One of the most beautiful bridges ever constructed in the civilized world crosses the Tennessee River at Muscle Shoals, a bridge built by the Government of the United States. It is a beautiful structure, over this dam. Did anybody object when we built that bridge? Did anybody object when we used public money to construct it? Is it not true as a historical fact that the two Senators from Alabama, then in the Senate, used every influence they could possibly bring on President Wilson to have him locate that plant at Muscle Shoals?

Mr. HEFLIN. Mr. President, I am sorry the Senator has called attention to the bridge, because I am afraid the Senator from Tennessee will try to take that away from us.

Mr. NORRIS. It may be that he will. Does the Senator want us to pay a tax on it?

Mr. President, I have been told that there was quite a controversy among the experts as to whether that plant should be located at Muscle Shoals. A great many of the experts, if not a majority of them, thought it should not be located at Muscle Shoals, and if we were locating a fertilizer plant to-day, with the knowledge the scientific world has on the fertilizer question, if we were locating such a plant with a view of making as cheap fertilizer as possible, it would not be located at Muscle Shoals. There is no doubt about that proposition.

We provide in this resolution, making it obligatory, that one of those plants shall be located there because the Government has other interests in that vicinity and in that part of the State.

As I was about to say, when the question of locating this great plant at Muscle Shoals first came before President Wilson, to whom the law gave the authority to pass on the question, he was importuned by the two Senators from Alabama; and I say that without any criticism, because I think they were doing the proper thing for their State. Senator Bankhead and Senator Underwood, both very powerful in the Democratic Party, pleaded with President Wilson, and did everything they could with President Wilson, to get him to decide on the location of this plant at Muscle Shoals in Alabama, and he acceded to their wishes. I state that without complaint, but Alabama was glad to get the expenditure of public money in that vicinity then. Now they say, "You have no right there. You built a dam on our property. You have no right to sell any electricity."

Mr. BLACK. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. BLACK. I have not stated they have no right.

Mr. NORRIS. I have not said the Senator did, but the Senator from Maryland made in substance the very statements I have just repeated. "You are there without right," says he, "you have not any legal authority to do what you are doing." If we have not, then it is a matter for the courts to determine, and I would welcome a determination of that question by the courts, and I would approach it without any fear. If the people of Alabama have not only urged the Government to come, but have sat silently by and seen $150,000,000 of the taxpayers' money invested there, now can they be heard to say that we should pay taxes on it?

Mr. BLACK. Mr. President, my amendment does not ask for taxes on the property.

Mr. NORRIS. I understand; it is in lieu of taxes.

Mr. BLACK. I have never suggested that, and we have never asked it. The inference is left from the Senator's statement that we are asking taxes on the property. We are simply asking for taxes on the surplus power that is used for distribution.

Mr. NORRIS. It is in lieu of taxes. We would pay on the output down there, just the same as though it were a private party who paid taxes under the laws of the State of Alabama. So there is no difference; it is just the same.

Mr. McKELLAR. Mr. President, I want to call the Senator's attention not only to the fact that the Alabama Senators and Representatives pleaded with President Wilson to establish that plant there, but they secured every particle of help we could give, and we very gladly gave it. Senators from all surrounding States and Representatives from all the surrounding States went before President Wilson and urged, at the request of the Alabama Congressmen, that this be done.

Mr. NORRIS. Mr. President, we propose to build down there some more fertilizer plants. This measure provides for that. This resolution provides for the building of a fertilizer experimentation plant there. It provides for the use of nitrate plant No. 2. If Alabama is going to ask us to pay the equivalent of taxes, we would better locate it some place where the authorities will not expect to levy taxes against Uncle Sam.

Let me say to the Senator that every dollar the Federal Government pays to the treasury of Alabama in taxes is just another dollar less for fertilizer for the American farmer.

Mr. BLACK. Mr. President——

Mr. NORRIS. I have only 15 minutes. I will yield for a question, if the Senator wants to ask a question.

Mr. BLACK. I will not take the Senator's time.

Mr. NORRIS. Mr. President, it does seem to me that Alabama has no just claim upon the Federal Treasury in this respect. But if she has, then it ought to be provided by a general law. In my judgment, we have no more right to say to Uncle Sam down at Muscle Shoals, "You must pay taxes there," than we have to come into my town and ask the Government to pay taxes on the Federal building it has there. It is a governmental function; it is part of the Government of the United States. Shall we construct a dam there under the war power, and then, when we have it constructed, shut it down and not make a single kilowatt? Has there ever been a voice from Alabama raised against the expenditure of public money to equip that

dam with the necessary machinery to make electricity? Have they ever objected to the expenditure of money that would provide for that steam plant to turn out electricity? No; they were glad to get it, always pleading for it. Now they want to penalize the Federal Government by making it pay for every kilowatt they there develop.

Mr. President, if the Government, owning that plant, owning the steam plant, and owning the dam, must remain silent and not produce any electricity for anybody, we would get into a perfect absurdity. If we can not make any electricity there without the consent of Alabama, then we ought to blow up the dam and get out of the country. What would Senators do? Most of those who have been arguing for this proposition would say, "We will lease it." That does not change the theory a particle. If we have no right to make electricity on our own property, we have no right to lease the property to somebody else. Besides, the law says we shall not lease it.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Alabama.

Mr. HEFLIN. Mr. President, I desire to submit a few remarks on that question. The position taken by my colleague is entirely sound. We have never contended that the Government should be taxed upon this property at Muscle Shoals. We have contended always that if the Government used that property for governmental purposes, it was at liberty to do so, under Federal and State laws; no objection would be made by the State. But I submit to all fair-minded Senators that if the Government goes into a State and builds a dam on a stream, generates power, and goes into the market to sell that power in competition with private companies who are making and selling power, that matter becomes one of commerce, and the sale of power bartered to the people within the State is under the jurisdiction of the State, just as the sale of power by the Alabama Power Co. or any other company doing business in a sovereign State is.

If the Government uses that power itself to make fertilizer, nothing is to be said, because the original act said that would be done. If it uses it to make nitrates for itself in time of war, the question of taxation is not raised. But if the Government is to break its promise to the farmer, and violate the provisions of the original act, which required it to use that power to make fertilizer for the farmer, and decides to put it on the market in competition with people who are making it in private enterprise, it is as clear as the noonday sun that it is subject to the jurisdiction of the State law and should be treated as others are treated who are engaging in the same kind of business.

Why not? Is the Senator from Nebraska afraid that the Government can not compete with private concerns if we put the same handicap upon the Government that private concerns must bear? We tax the power of private concerns in our State and other States do the same; but now the Senator from Nebraska is going to put in competition with them a power concern operated by the Government and then say we will turn over this power to that enterprise for so much money, to be sold in the market places of my State and Tennessee, Georgia, and Mississippi, and they are to escape taxation, and my State is to be deprived of that source of revenue because of our action here. Mr. President, I do not see that there is any escape from that conclusion.

The Senator from Nebraska talks about blowing up the dam if we are not satisfied with having it there. We are delighted to have it there. I helped to get it there. We all wanted it there. The Government exercised fine taste and splendid judgment in putting it there. It is the best place in the country for that plant. The Government wanted it away from the seacoast and far in the interior, and we have it at such a place. That plant was not put there to serve private industry. It was put there to serve the Government in time of war and to serve the oppressed farmers of America in time of peace. The Government stated in the outset that when the plant is not used to make nitrates for the Government it must be used to make fertilizer for the farmer.

But now it seems that the question has been resolved into one of how much power Tennessee is going to get and how much Georgia and Mississippi shall get, and just how the power shall be bartered to the people in the various communities of other States. It is not a question of nitrates for the Government now, not one of fertilizer for the farmer now, but a question of power and power distribution—if we are to be guided by the conduct of some Senators.

The Senator from Nebraska speaks of blowing up the dam and blowing up the bridge. He is not doing that, and he is not going to do that. There is grave danger here of blowing up the farmer. He is in grave danger of being blown out of the water. [Laughter.]

The Senator from Tennessee [Mr. MCKELLAR] opposes our having a tax imposed by the State, when this power is sold as other power is sold in the State. Would we not have a right to tax it then? Will anybody say we would not have such a right? Suppose I should lease it for the purpose of selling the power and I commenced to sell it in competition with other companies; would anybody say that the State of Alabama should not tax that power which I was selling? I do not believe there is a Senator here who would take that position. If that were the idea, then all a man would have to do would be to encourage the Government to put up dams and establish plants and lease them, and in that way escape taxation, both Federal and State. Then we would have socialism gone mad; we would have competition by the Government against private capital, private initiative, private enterprise, and private industry. Do we want to go that far? That is the position Senators are taking on this particular amendment.

The Senator from Tennessee [Mr. MCKELLAR] takes the most remarkable and astounding stand that a great deal of the water which comes down through this dam originates in Tennessee. What a remarkable and brilliant suggestion, that this water is not our water, but is the water of Tennessee. I feel like demanding of him to separate it and take it out. That is as brilliant as his suggestion that the water originates up there. [Laughter.]

I am reminded of the story told me by the able Senator from North Carolina [Mr. SIMMONS]. Old man Sloan, the author and finisher of Sloan's Liniment, made it down there at New Bern, N. C. I have been there and have seen the pine forests where he got his turpentine. I am reminded of that story to-day. Sloan bought a large tract of land from an old fellow down there. After the deal was closed and Sloan had his deed, it dawned on the other fellow that he had sold a very important spring of excellent water. What Sloan wanted in the main was to get this fine water to use in making the liniment. So the man went back to Mr. Sloan and said, "I have sold you the land and the trees and all that, but we have not closed a deal for the spring." Sloan said, "Why, I bought all of the land you had there—the spring goes with it. It is over there in the middle of the tract of land I bought. I bought the spring, I bought the trees, I bought all the stumps, and all the little branch runs, and everything else, and I thought the spring was included." "No, sir;" said the old man, "it is my spring and I insist that you pay me for it." Sloan said, "No; I am not going to pay you anything, and I demand that you move it out of there by sundown." [Laughter.]

Yet the Senator from Tennessee, who is not satisfied with getting power at Muscle Shoals to be taken away and distributed in States roundabout, when people in the Muscle Shoals locality have not been served, when the people who were born and reared there have not yet been supplied with power, who by every rule of right and law of justice are entitled to it first before anyone else is supplied, wants to take it out for equitable distribution. I would suggest to the Senator from Tennessee that he get his Tennessee water out of the Tennessee River and let us alone. [Laughter.]

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. HEFLIN. I gladly yield to the Senator from Kentucky.

Mr. BARKLEY. No matter where this water originates, all of it comes into Kentucky, and therefore we would like to be protected in the matter of the distribution of water.

Mr. HEFLIN. I thank the able Senator from Kentucky. He has no desire to decrease the power of the river at Muscle Shoals. I commend his position to the Senator from Tennessee. I was afraid that some Senator would join with the Senator from Tennessee and want to divide up a little more with us down there at Muscle Shoals. If they keep on, there will not be anything left there but the bridge and the dam. Thank God, they can not move the dam. [Laughter.] Mr. President, I find unbounded pleasure in the fact that they can not move the dam. [Laughter.] If they could move that dam, I fear that the Senator from Tennessee [Mr. MCKELLAR] and the Senator from Mississippi [Mr. HARRISON] and my good friend the Senator from Georgia [Mr. GEORGE] would be seen there some morning just before day dragging it out and taking it away. [Laughter.]

Mr. SMITH. Why before day?

Mr. HEFLIN. They prefer darkness rather than light because their deeds are evil! [Laughter.] I would look for that to happen. After they got it out and away from the river and had dragged it over the mountain and down into the valley, I would look to see them fighting amongst themselves because they could not agree on an equitable division of the dam. [Laughter.]

Why, Mr. President, they have become greatly excited about an equitable distribution of power down there. The original

law provided that we had to make nitrates for the Government, and the plant is there for that purpose. If ever the Government needs it, it has that plant to operate against private monopoly and against foreign monopoly. It gives us independence of other countries and of concerns that might want to lift sky-high the price of those products in this country. That is something to be considered; the plant is there, the dam is there, and, thank God, the river is still there [laughter]; and water will continue to flow out of Tennessee singing its way to the sea in spite of the fact that my friend, the Senator from Tennessee, wants us to pay him for that which gathers in the clouds in Tennessee and comes down upon the bosom of that splendid, fine, and lordly old river flowing through my State. If it needs anything to give it final redemption before it reaches the sea, it would be the purifying process encountered for final salvation as it came through the State of Alabama. [Laughter.]

Mr. President, there has been some talk about the original law. Some Senators are proceeding here like we did not have any original law. What would we have done if we had not had it? It reminds me of the teacher, a tall Ichabod Crane-looking fellow, who said to one of his pupils: "You know the earth is round, don't you?" The boy said, "No, sir." He said, "Well, it is round." The boy said, "Not if what I have been told is true." "What is that?" The boy said, "They say it turns over every night and day; that every 24 hours it revolves." The teacher said, "Yes; that is true." He said, "Well, teacher, if your position is correct on that, the people would fall off of it when it turned over." The teacher said, "Oh, no. They are held on by the law of gravity." Then the boy said, "Well, how did they stay on before Congress passed that law?" [Laughter.]

There is no telling what Congress is going to pass before we get through with Muscle Shoals.

The PRESIDING OFFICER (Mr. BROOKHART in the chair). The time of the Senator from Alabama has expired.

Mr. HEFLIN. I trust that my colleague's amendment will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the junior Senator from Alabama [Mr. BLACK].

Mr. HEFLIN. Let us have the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. LA FOLLETTE (when Mr. BLAINE's name was called). My colleague the junior Senator from Wisconsin [Mr. BLAINE] is paired with the junior Senator from Utah [Mr. KING] on this question. If present, my colleague would vote "nay."

Mr. BROUSSARD (when his name was called). I have a general pair with the senior Senator from New Hampshire [Mr. MOSES], who is absent. Therefore I withhold my vote.

Mr. FESS (when his name was called). I am paired with the Senator from Michigan [Mr. FERRIS]. I am informed that were he present he would vote as I shall vote. Therefore I shall vote. I vote "nay."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT], who is absent on account of illness. I therefore withhold my vote.

Mr. KING (when his name was called). I have a pair with the junior Senator from Wisconsin [Mr. BLAINE]. I transfer that pair to the senior Senator from Missouri [Mr. REED], and vote "yea."

Mr. SMITH (when his name was called). I have a general pair with the senior Senator from Indiana [Mr. WATSON]. I transfer that pair to the junior Senator from Florida [Mr. TRAMMELL], and vote "nay."

Mr. TYSON (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote if present, I withhold my vote. If permitted to vote, I should vote "yea."

The roll call was concluded.

Mr. BRATTON. I have a general pair with the junior Senator from Indiana [Mr. ROBINSON]. Not knowing how he would vote, if present, I withhold my vote.

The result was announced—yeas 13, nays 59, as follows:

YEAS—13

Ashurst	Blease	King	Tydings
Barkley	Bruce	Mayfield	
Bayard	Hayden	Neely	
Black	Heflin	Sheppard	

NAYS—59

Bingham	Couzens	Edwards	Gooding
Borah	Curtis	Fess	Greene
Brookhart	Cutting	Frazier	Hale
Capper	Deneen	George	Harris
Caraway	Dill	Gerry	Harrison
Copeland	Edge	Glass	Howell
Johnson	Nye	Shipstead	Thomas
La Follette	Oddie	Shortridge	Wagner
McKellar	Overman	Simmons	Walsh, Mass.
McLean	Phipps	Smith	Walsh, Mont.
McMaster	Ransdell	Smoot	Warren
McNary	Reed, Pa.	Steck	Waterman
Metcalf	Robinson, Ark.	Steiwer	Wheeler
Norbeck	Sackett	Stephens	Willis
Norris	Schall	Swanson	

NOT VOTING—22

Blaine	Fletcher	Kendrick	Robinson, Ind.
Bratton	Gillett	Keyes	Trammell
Broussard	Goff	Moses	Tyson
Dale	Gould	Pine	Watson
du Pont	Hawes	Pittman	
Ferris	Jones	Reed, Mo.	

So Mr. BLACK's amendment was rejected.

CONTRIBUTIONS TO REPUBLICAN CAMPAIGN FUNDS

Mr. WALSH of Montana. Mr. President, I send to the desk and ask to have read by the clerk an article appearing in the New York Times of this morning entitled "Belated indignation."

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The Chief Clerk read as follows:

BELATED INDIGNATION

Pending the testimony which Secretary Mellon is expected to give to-day to the Senate committee there must be a suspension of judgment on certain points. But on one there need be no hesitation. The Secretary of the Treasury, like the former chairman of the National Republican Committee, Mr. Hays, like other members of the administration up to the President himself, has shown great loyalty to party. He has kept its secrets. It is true that when late in 1923 Chairman Hays told Mr. Mellon that the $50,000 in bonds offered as security for a contribution to the Republican fund came from Mr. Sinclair the oil scandal had only begun to break. Mr. Mellon may then have thought little or nothing of the Sinclair coincidence. But later when the details in all their ugliness began to come out in 1924, and when Mr. Hays in that year testified regarding Sinclair's gift to the Republican Party Mr. Mellon could not have failed to be impressed by it. Yet so far as appears he said and did nothing about it. This may have been a fine example of fidelity to party, but was it a model of what a public official faithful to the larger interests of the country should have done?

Secretary Mellon may set the matter in clearer light to-day. But nothing that he or any other Republican leader can now do will recover the moral leadership in dealing with this party scandal. Senator BORAH has done his best to snatch it. He is almost alone among Republicans in Congress to denounce the taking of the Sinclair money at all and to demand that it be repaid as coming from a tainted source. The long evasion or silence by Republicans has naturally given the Democrats a tempting opportunity. Senator ROBINSON came forward yesterday to make the most of it. Anything that Republicans may now propose in the way of contrition or restitution will necessarily have a belated air. They should have taken steps long ago. They should never have consented to sit silent when base deeds were done. Now their political sin has found them out, and they can not wholly escape its punishment. They have given up for party what they should have devoted to political morality, and will have to suffer the consequences. They may repent and in time be forgiven, but it will be long before they can venture again to pose as the party of superior virtue.

Mr. WALSH of Montana. Mr. President, I ask now that there be read at the desk another editorial on the same page entitled "How the English do it."

The VICE PRESIDENT. Without objection, the clerk will read.

The Chief Clerk read as follows:

HOW THE ENGLISH DO IT

On February 1 a firm of London bankers got a judgment for some $194,000 against a Mrs. Dyne, who had been buying and selling foreign currency, mainly French francs, for a number of years. It was brought out in the trial that three Foreign Office officials, Mr. Gregory, an assistant undersecretary of state; Mr. O'Malley, formerly a first secretary under him and later acting counselor in China; and Lieutenant Commander Maxse, a second secretary, had been speculating in foreign currencies. Mrs. Dyne was the wife of an old schoolmate and friend of Mr. Gregory. Her house seems to have been the meeting place for the discussion of transactions, perhaps innocently undertaken but finally disastrous to everybody concerned.

On that February 1 the Prime Minister appointed three treasury officials as a special board of inquiry. Within less than four weeks their report was in print. They had no power to compel the attendance of witnesses, to hear evidence on oath, or to force an answer from any witness. Everybody came who was asked; and every document sought was furnished. They also deemed themselves authorized to find out if any other civil servants had been speculating. The speed of the proceedings and the readiness of everybody, implicated or not, to give

information are in bitter contrast to what seems to be the settled American practice.

The three gamblers in exchange are distinctly disculpated from corruption and from the use of official information in their ventures. But a course of speculative transactions such as they have described ought never to have been entered upon by any civil servant. Least of all ought foreign-exchange speculation to have been undertaken by those to whom, from the nature of their work, the sensitiveness and suspicions of foreign countries can not have been unfamiliar.

Mr. Gregory was dismissed, Mr. O'Malley "permitted to resign." The naval man, newer in the office and imitating his seniors, was reprimanded sternly and loses three years' seniority. Mr. Gregory had been in the office for 26 years. He was an able man, sure to be permanent undersecretary in time. He loses his salary. He loses his pension. He has lost many thousand pounds by forgetting the obligations expected of a civil servant. For him the board sees "no extenuation." The lesson is a sharp one. It shows what the English civil servants must keep in mind. They must not offend Burke's "chastity of honor." From them, says the board, "the public expects a standard of integrity and conduct not only inflexible but fastidious."

Mr. NEELY. Mr. President, I ask unanimous consent to have read and printed in the RECORD an address delivered by the senior Senator from Idaho [Mr. BORAH] last Saturday night before the Idaho Society.

The VICE PRESIDENT. Without objection, the address will be read.

The Chief Clerk read as follows:

ADDRESS BY SENATOR BORAH BEFORE THE IDAHO SOCIETY, SATURDAY, MARCH 11, 1928

We are approaching the most important event of the political affairs of the Nation—the election of a President. One of the most serious questions connected with that event is whether the election shall be by a minority or a majority vote, whether the people as a whole will take an interest, or whether it will be left to only a small portion of the people. In late presidential elections as high as 51 per cent of the voters in some States have remained away from the polls. What is the remedy? The first and primary remedy is for candidates and political parties to speak candidly and plainly to the people upon subjects in which the people are interested. The most demoralizing and corrupting instrumentality in American politics is that of great political parties deliberately maneuvering and sidestepping with reference to questions of great public interest. The people are not indifferent to these public questions. They are baffled and discouraged because they can not get them squarely and fairly presented. Compare the platforms and campaigns and the presentation of issues years ago with the recent years, and you will have no trouble in determining why the people lose interest and stay away from the polls. A candidate who has no views upon public questions is unfit; a candidate who has views and is afraid to state them is unsafe. A voter is entitled to an opportunity to record his vote in accordance with his conviction, and it is impossible for him to do that unless the issues are fairly presented. A political party which is unwilling to declare upon questions of general and public interest is no longer an instrument of public good, performing a great service, but is a scheming piece of organized chicanery for the utilization of millions of honest voters to the gathering in of patronage and despoiling of the public heritage.

I presume every Republican has of late suffered a deep sense of humiliation. The awful conditions which have been revealed to the voters of the party are as indefensible as they are intolerable. The modern system of avoiding issues which would interest the people and then depending upon organization and money to work up an artificial interest, together with manipulated and managed conventions, have borne fruit. For this condition of affairs the voters of the party are in no sense responsible. The system of running the campaign, permitting men who have business with the Government at Washington to buy their way to favor with vast contributions, the organization method of running conventions and campaigns is responsible. It is time to try another system. Give the people issues and you will not need to sell your soul for campaign funds. Give the voters policies squarely presented, and you will not have to mortgage the future action of the party to concession hunters. There is some evidence that the voters are going to insist upon just these things. There is a feeling that the delegates ought to nominate the next candidate of the Republican Party. There is a feeling that the voters ought to know what a candidate stands for when they vote for him. It is the one great hope for clean politics and clean government.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. HEFLIN. Mr. President, I offer an amendment to section 3 of the Norris joint resolution.

Section 3 reads:

It is hereby declared to be the policy of the Government to distribute the current generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

I wish to add these words at the end of that section:

Provided, That no such distribution shall be had until the local needs for hydroelectric power have been served, and sufficient power is supplied to manufacture fertilizer at Muscle Shoals.

It strikes me, Mr. President, that that amendment ought to go on this joint resolution. Certainly, the people who live where God has placed this mighty water power ought to have the opportunity to get hydroelectric power to meet their needs. It is nothing but a matter of right and justice; and before any power is distributed we ought to see to it that enough power is kept there to make the necessary amount of fertilizer for the farmer.

The amendment is so short and simple, and so fair and just, that I do not care to discuss it at length.

Mr. BRUCE. Mr. President, just one word in relation to this amendment. I wish to point to it as still another illustration of what I conceive to be the gross injustice on the part of the Senate in not recognizing the primary claim of the State of Alabama to that great natural resource, Muscle Shoals.

Here in one amendment we have the Senators from Alabama asking that the State of Alabama be at least allowed the privilege of taxing those great works which the Government proposes to maintain at Muscle Shoals for the purpose of producing power and fertilizer. We can all realize, of course, what such a privilege would amount to in the way of taxation. In other words, if those works were operated by private enterprise they would be to Alabama one of the most fruitful subjects for taxation within its borders.

That request of the State of Alabama has been rejected by the Senate; and now she comes along and asks that she be allowed to utilize at least the remnant of this power, all of which in its natural state from every standpoint of justice and natural equity is her own, and not the property of the Government at all.

The Senator from Tennessee [Mr. MCKELLAR], of course, has been in favor of this joint resolution consistently from the beginning, it would seem; but even he faltered when he offered that amendment asking that his State, as well as the State of Alabama, be allowed the privilege of taxation which the State of Alabama desires. He might well falter, because the natural, the inevitable effect of the practical workings of this joint resolution when it is put into operation will be to build up industrial cities and towns entirely outside of the limits of the State of Alabama and the State of Tennessee.

What justice is there in that? Suppose the Federal Government should go out on the Columbia River, I say to some of the Senators here from that part of the United States, and establish there great nontaxable works for the purpose of producing power and fertilizer under the conditions prescribed by the pending resolution. Would not the Senators from those States be here protesting against such high-handed spoliation? Of course they would.

Suppose the Government were to go down into the State of Virginia, forsooth, and establish great nontaxable works for the production of power and fertilizer on the James River or on the Roanoke River, and proceed to produce power and fertilizer, leaving, perhaps, to the State of Virginia for its own purposes an amount of power far, far less than that to which it was naturally entitled; would not the Senators from Virginia, too, protest? It is inconceivable to me that Senators should have run out this resolution to its full consequences; that is to say, to the full significance that it bears to local State government, to State sovereignty, to the just distribution of powers effected by the Federal Constitution between the General Government and the States.

Of course, if the Federal Government had not gone down to Muscle Shoals in time of war, and in the exercise of its war powers, it would not dare to go down there and establish works in time of peace for the sheer purpose of producing power and fertilizer, because anybody who has the least familiarity with constitutional law knows that it would have no constitutional authority to do it. It is possible that the General Government might be held to have the lawful power to set up a mere experimental plant for the purpose of experimenting in the production of fertilizers, though it is interesting to bear in mind that when the Federalist was written it was the opinion of no less a person than Alexander Hamilton that this Government had no power to make any pecuniary appropriations of any kind to agriculture for any purpose. That extreme idea has long

ago been abandoned, and I am glad that it has been abandoned as a matter of administrative practice. But I do say, and I insist upon it, that apart from the mere right at the most to establish a plant down at Muscle Shoals for the purpose of experimenting in the production of fertilizer, the Government has no constitutional authority whatever to establish works at Muscle Shoals for the production of power or fertilizer.

Has anybody ever denied that? Has anybody ever produced one single, solitary decision of the Supreme Court of the United States, or of any Federal court, or of any State court, denying that? I had almost said I would defy any Member of the Senate to produce any decision gainsaying that.

Yet, simply because the Government went down to Muscle Shoals during the war and began the setting up of a plant for the purpose of producing nitrates for war purposes, here we are embarking upon one of the most gigantic, one of the most colossal, industrial enterprises that any community, any State, any individual, any combination of individuals, corporate or otherwise, ever undertook to create.

I say it is lamentable that we should have gotten so far along the steep declivity that leads down to an utter obliteration of the true line of partition between the Federal and State authority that we can for a single moment think of giving our assent to a resolution so revolutionary, so subversive of all accepted conceptions of the workings of the Federal Constitution, as this resolution is.

Mr. NORRIS. Mr. President, there are really two thoughts in this amendment. One of them is already provided for by an amendment heretofore adopted. We have already adopted an amendment to this section putting in the word "surplus," so that the Secretary of War is authorized to distribute only the surplus power. So that part of the amendment referring to fertilizer is only a repetition of what we have already provided for, and that is the important part of the amendment.

The balance of the amendment gives to Alabama a preferential right which it seems to me it should not have. It is provided in the resolution that this surplus power—and that means surplus power after fertilizer operations have been attended to and all the other needs of power have been satisfied, like operation of the dam, the lighting of the works, and so forth——

Mr. HEFLIN. I would like to ask the Senator what he understands the word "surplus" to mean there?

Mr. NORRIS. The word "surplus" means, as I understand it—and I think there is no dispute about it—all power that is left after provision has been made, after power has been used to supply what is provided for in the resolution, all of the fertilizer operation, operation of the locks, and so forth.

Mr. HEFLIN. Would that mean the power which was left after the power had been used to answer the needs of commerce in the usual and ordinary channels?

Mr. NORRIS. Oh, no. The joint resolution provides that the Secretary of Agriculture shall have all the power that may be necessary in the operation of these fertilizer requirements placed in the measure. It is unnecessary to enumerate them. After he has been supplied with all the power that he needs, the balance of it is surplus power, as I take it, and the Secretary of War is authorized to distribute that surplus power only.

Mr. HEFLIN. The point I want to get at is this: On yesterday the Senator from Mississippi [Mr. HARRISON] in his speech said that if the people of Alabama wanted power, they would be entitled to their proportionate share of it under this equitable distribution proposition.

Mr. NORRIS. I think so.

Mr. HEFLIN. I do not believe the Senators here mean to vote to commit themselves to the proposition that the power that is doled out to that community under this equitable distribution plan would only supply a fourth of the population right around Muscle Shoals, and that they would deny the other three-fourths.

Mr. NORRIS. I would not want to do anything of that kind. Let me finish my explanation of it. I believe that it would be the duty of the Secretary of War to supply those people within any reasonable limits. But suppose under the Senator's amendment the little town of Muscle Shoals, having, I understand, about 150 people in it, or something in that neighborhood, should say to the Secretary of War, "How much surplus power have you?" and the Secretary would say, "I have about 60,000 horsepower," they would say, "We want it all."

Mr. HEFLIN. I do not mean that.

Mr. NORRIS. I know the Senator does not. Suppose they should say, "We want it all," and then they should advertise to the world, "We have 60,000 horsepower here for factories; come and put them up in our midst."

Mr. CARAWAY. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. CARAWAY. Mark you, this amendment would not afford a chance to sell the power to Mississippi, although Mississippi might pay three times as much.

Mr. NORRIS. Absolutely.

Mr. CARAWAY. Alabama could take it at whatever price they wanted to pay.

Mr. NORRIS. Suppose a municipality did not pay for it, and the power that was left there went to a distributing company. Who would get it? The Alabama Power Co. would get it.

I do not want to take up the time of the Senate, but I certainly do not want to take away from those local communities any reasonable amount of power they may need in their requirements, and I take it that the Secretary of War would not think of doing such a thing.

Mr. BRUCE. Mr. President, I would like to ask the Senator from Nebraska just one question. Why should not the State of Alabama have all this power? Why should any other State have any part of it until the demands of Alabama were gratified?

Mr. NORRIS. In my judgment, they should not have all the power. The power has been provided for by public money. The dam is on a stream that comes through a great many States. The funds of the Treasury of the United States have been used for the purpose of building all the works that have been established there. It belongs, therefore, to all the people of the United States, in my judgment, and the power ought to be distributed within transmission distance. That is as far as we can distribute it.

Mr. BRUCE. The other States that border on this stream of course have the right, at any time they may get private capital to invest in such enterprises, to utilize the power of the stream. The people of Tennessee have the right to get all the power they can from that stream before it reaches Alabama. They have a perfect right, it seems to me, to monopolize the power for State purposes if they see fit to do so as a matter of State policy.

The PRESIDING OFFICER (Mr. MCNARY in the chair). The present occupant of the chair will announce to the Senator that he has talked once before on the pending amendment, and under the unanimous-consent agreement he is entitled to speak but once on any amendment.

The question is on agreeing to the amendment offered by the Senator from Alabama [Mr. HEFLIN].

Mr. HEFLIN. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. LA FOLLETTTE (when Mr. BLAINE's name was called), My colleague [Mr. BLAINE] is paired on this question with the the junior Senator from Utah [Mr. KING]. If my colleague were present, he would vote "nay" on this amendment.

Mr. BRATTON (when his name was called). I have a general pair with the junior Senate from Indiana [Mr. ROBINSON]. In his absence, I withhold my vote.

Mr. FESS (when his name was called). I am paired with the Senator from Michigan [Mr. FERRIS], who is absent. I understand that if the Senator from Michigan were present and permitted to vote he would as I shall vote. I, therefore, vote. I vote "nay."

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair as before, I withhold my vote.

Mr. KING (when his name was called). I have a pair with the junior Senator from Wisconsin [Mr. BLAINE]. I transfer my pair with that Senator to the senior Senator from Missouri [REED], and vote "yea."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. He being absent, I withhold my vote.

Mr. SMITH (when his name was called). Making the same announcement as to my pair and its transfer as before, I vote "nay."

Mr. TYSON (when his name was called). I have a general pair with the Senator from West Virginia [Mr. GOFF], who is absent. Not knowing how the Senator from West Virginia would vote if present, I withhold my vote.

The roll call was concluded.

Mr. BROUSSARD. Making the same announcement as before with reference to my pair, I withhold my vote.

The result was announced—yeas 13, nays 58, as follows:

YEAS—13

Ashurst	Bruce	King	Tydings
Bayard	Dill	Phipps	
Black	Hayden	Smoot	
Blease	Heflin	Steck	

NAYS—58

Barkley	George	McMaster	Shortridge
Bingham	Gerry	McNary	Simmons
Borah	Glass	Mayfield	Smith
Brookhart	Gooding	Metcalf	Steiwer
Capper	Greene	Neely	Stephens
Caraway	Hale	Norbeck	Swanson
Copeland	Harris	Norris	Thomas
Couzens	Harrison	Nye	Wagner
Curtis	Howell	Oddie	Walsh, Mass.
Cutting	Johnson	Ransdell	Walsh, Mont.
Deneen	Jones	Reed, Pa.	Waterman
Edge	Kendrick	Robinson, Ark.	Wheeler
Edwards	La Follette	Sackett	Willis
Fess	McKellar	Sheppard	
Frazier	McLean	Shipstead	

NOT VOTING—23

Blaine	Fletcher	Moses	Schall
Bratton	Gillett	Overman	Trammell
Broussard	Goff	Pine	Tyson
Dale	Gould	Pittman	Warren
du Pont	Hawes	Reed, Mo.	Watson
Ferris	Keyes	Robinson, Ind.	

So Mr. HEFLIN'S amendment was rejected.

Mr. BLACK. Mr. President, I offer the amendment I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. Add at the end of section 3 the following proviso:

Provided, That all power produced on navigable streams of other States within transmission distance of Alabama shall be equitably divided with the State of Alabama.

Mr. BLACK. Mr. President, it does not make any difference who produces the power at a stream, whether it is the Government or a private corporation or an individual, that power should be divided according to the same principle. Our idea has been all of this time that it should go according to the natural channels of commerce, not propelled by any artificial legislative power, and not to be stopped or clogged by any legislative action. If it is fair for the States around Alabama to have it provided that the power produced in that State must be equally divided with them, I want Senators who believe in the doctrine of fair play to vote that we shall also have a fair part of their power.

Mr. BRUCE. Mr. President, it is a very unsatisfactory thing to have to deliver a speech, so to speak, on the installment plan, but I was cut off from an opportunity to run out the line of thought that I was pursuing in my colloquy with the Senator from Nebraska [Mr. NORRIS].

I asked the Senator why should not the State of Alabama monopolize this power? He said, because the Government has gone down there and established certain physical works. That is no answer. The Government went there for the purpose of producing war nitrates, and those works were established with that view, and with that view alone. But of course the fact that works of that kind have been erected because of the exigencies of a state of war is no reason why they should be now turned to an illegal and unconstitutional purpose, that is to say, the purpose of producing power and fertilizer generally as industrial ventures.

Let me give a practical concrete illustration of the logic of what I have been saying in this connection. Some time ago the Philadelphia Electric Co. came down to Maryland and wished to establish a great dam at Conowingo on the Susquehanna River, which is one of the great streams of the United States, a stream that is capable of developing an immense amount of power.

If Senators were to see that dam as it has been constructed, they would say that if it had been constructed in ancient times it would have been denominated the eighth wonder of the world, so massive is it, costing as it did $52,000,000 and requiring for its structure, as it did, such a vast mass of material. It is one of the grandest things of the kind in the United States.

Now, what did the State of Maryland do? It did what the State of Virginia would have done under the same circumstances. It did what the State of Arkansas would have done under the same circumstances. It did what any other State represented by Senators upon this floor would have done under the same circumstances. It insisted that the power of that river should not be utilized elsewhere than in Maryland until all the just and reasonable demands of the State of Maryland were first gratified. So that great company came to Annapolis and got a legislative permit from the State of Maryland to construct the dam, and it was constructed subject to two conditions, not to speak of any conditions that may have been of a relatively immaterial character—first, that electric light and power should be furnished by the company from that dam to the people of Maryland at reasonable rates, and secondly, that no power from the dam should pass out of the State of Maryland until the local demands of the State of Maryland were first honored and gratified. That was done as between two States of the Union. The company accepted those terms, and to-day it is about to operate under them. That is what happened when the question of priority arose between two sovereign States of the Union in relation to a water power.

The only reason why the same principle is not recognized in the pending joint resolution is because of the overriding, tyrannical will of the Federal Government. That is all. It is no respecter of persons. It apparently is so high above the level of mere statehood that it can substitute its arbitrary mandates at pleasure for the interests and welfare of the States.

The Federal Government says to the State of Alabama—and how different was the attitude of the State of Pennsylvania toward the State of Maryland in the instance which I have cited—"Yes; it is true that I have established those works at Muscle Shoals only because of the exigencies of an existing state of war. It is true that they were established with no expectation of turning them to the general purposes of power or industrial production. But now that I have established them, it makes no difference to me what the people of Alabama say, it makes no difference to me what their natural and equitable claims upon me are, I will simply exercise the unbounded power that resides in me and produce power at Muscle Shoals which may be distributed not merely to the people of Alabama, not even primarily to them, but to any State that I please, whither it can be physically transmitted.

"I do not care for their claims about State sovereignty. They have given me enough trouble already in the course of my history. I will pay no heed to such claims. I will distribute this power in such manner that great cities and towns, perhaps, on the strength of it, may spring up outside of the State altogether, perhaps in the State of Mississippi, or perhaps in the State of Tennessee or some other State immediately adjoining or not too remote from Muscle Shoals. I will leave practically nothing to the State of Alabama itself, notwithstanding the fact that God Himself was so good as to place this great power within its boundaries."

Mr. TYDINGS. Mr. President, will my colleague yield?

The PRESIDING OFFICER (Mr. STECK in the chair). Does the Senator from Maryland yield to his colleague?

Mr. BRUCE. With pleasure.

Mr. TYDINGS. Not in the liquor sense of the word, but it looks like the joint resolution has taken on a form of intoxication. [Laughter.]

Mr. BRUCE. Yes; the worst form of intoxication, that which is bred by the oppressive and unconscionable exercise of power.

No, Mr. President, some Senators, I am sure, are not realizing the real nature, the real tendencies of the pending resolution. Surely Senators are not willing to do the gross, almost unprecedented, violence which the resolution proposes to do to State sovereignty, to the principle of local self-government, which is the very foundation stone of our institutions. The resolution is nothing less—and I say it without the slightest hesitation—than an absolutely monstrous, indefensible infraction of the principles that have heretofore governed the relations of the States to each other as respects such conditions as those at Muscle Shoals and, I had almost said, though the time, perhaps, has passed for saying that the relations of the States themselves to the General Government.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama [Mr. BLACK].

The amendment was rejected.

The PRESIDING OFFICER. The joint resolution is still before the Senate as in Committee of the Whole and open to amendment.

Mr. HARRISON. Mr. President, I desire now to offer the substitute which is at the clerk's desk. I do not desire to have it read again, unless some one wants to have it read, because it is quite long, and I think it is quite familiar to the membership of the Senate.

Mr. HARRISON'S amendment, in the nature of a substitute, was to strike out all after the resolving clause and to insert:

That the United States nitrate fixation plants Nos. 1 and 2, located respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings used in connection therewith; all tools, machinery, equipment, accessories, and materials thereunto belonging; all laboratories and plants used as auxiliaries thereto, the Waco limestone quarry in Alabama, and any others used as auxiliaries of said nitrogen plants Nos. 1 and 2; also Dam No. 2, located in the Tennessee River at Muscle Shoals, its power house, its auxiliary steam plants, and all of its hydroelectric and operating appurtenances, together with all machines, lands, and buildings now owned or hereafter acquired in connection therewith, are hereby dedicated and set apart to be used for

national defense in time of war and for the production of fertilizers and other useful products in time of peace.

SEC. 2. Whenever in the national defense the United States shall require all or any part of the operating facilities and properties or renewals and additions thereto, described and enumerated in the foregoing paragraph of this act, for the production of materials necessary in the manufacture of explosives or other war materials, then the United States shall have the immediate right, upon five days' notice to any person or persons, corporation, or agent in possession of, controlling, or operating said property under any claim of title whatsoever, to take over and operate the same in whole or in part, together with the use of all patented processes which the United States may need in the operation of said property for national defense.

The foregoing clauses shall not be construed as modified, amended, or repealed by any of the subsequent sections or paragraphs of this act, or by indirection of any other act.

SEC. 3. In order that the United States may have at all times an adequate supply of nitrogen for the manufacture of powder and other explosives, whether said property is operated and controlled directly by the Government or its agents, lessees, or assigns, under any and all circumstances at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons of fixed nitrogen must be produced annually on and with said property, and no lease, transfer, or assignment of said property shall be legal or binding on the United States unless such adequate annual production of fixed nitrogen is guaranteed in such lease, transfer, or assignment.

SEC. 4. Since the production and manufacture of commercial fertilizers is the largest consumer of fixed nitrogen in time of peace, and its manufacture, sale, and distribution to farmers and other users, at fair prices and without excessive profits, in large quantities throughout the country is only second in importance to the national defense in time of war, the production of fixed nitrogen as provided for in this act shall be used, when not required for national defense, in the manufacture of commercial fertilizers. In order that the experiments heretofore ordered made may have a practical demonstration, and to carry out the purposes of this act, the lessee or the corporation shall manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, according to demand, on the property hereinbefore enumerated, or at such other plant or plants near thereto as it may construct, using the most economic source of power available, with an annual production of these fertilizers that shall contain fixed nitrogen of at least 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and 40,000 tons the sixth year: *Provided*, That if after due tests, and the practical demonstration of six years herein provided for, it is demonstrated to the satisfaction of the lessee or the corporation that nitrates can not be manufactured by it without loss, the lessee or the corporation shall cease such manufacture and shall report to the Congress all pertinent facts with respect to such costs with its recommendation for such action as the Congress may deem advisable.

The farmers and other users of fertilizer shall be supplied with fertilizers at prices which shall not exceed 8 per cent above the cost of production.

SEC. 5. That the President is hereby authorized and empowered to lease the properties, either separately or as a whole, enumerated under section 1 of this act, with proper guaranties for the performance of the terms of the lease, for a period not to exceed 50 years: *Provided*, That said lease shall be made only to an American citizen, or citizens, or to an American owned, officered, and controlled corporation; and, if leased, in the event at any time the ownership in fact or the control of such corporation should directly or indirectly come into the hands of an alien or aliens, or into the hands of an alien owned or controlled corporation or organization, then said lease shall at once terminate and the properties be restored to the United States. The Attorney General of the United States is given full power and authority, and it is hereby made his duty to proceed at once in the courts for cancellation of said lease in the event said properties are found to be alien owned or controlled and are not voluntarily restored. The lessee being required and obligated to carry out in the production of nitrogen and the manufacture and sale of commercial fertilizer the purposes and terms enumerated in sections 1, 2, 3, and 4 of this act, and such other terms not inconsistent therewith as may be agreed to in the lease contract. The lessee shall pay an annual rental for the use of said property an amount that shall not be less than 4 per cent on the total sum of money expended in the building and construction of Dam No. 2 at Muscle Shoals and the purchase and emplacement of all works and machinery built or installed in connection therewith for the production of hydroelectric power: *Provided*, That in addition to the annual rental herein stipulated, the lessee shall set up and maintain an adequate reserve as fixed in the lease for depreciation, upon which the United States shall have a prior lien, in connection with the following properties, to wit: (1) Dam No. 2 and power equipment; (2) the steam-electric plants at nitrate plants No. 1 and No. 2; and (3) nitrate plant No. 2. Such reserve for depreciation shall at all times be of such an amount that when added to the physical value of such property at any time shall at least equal the appraised value thereof when turned over to the lessee: *Provided further*, That in case of nitrate plant No. 1, excluding power plant, the value thereof shall be appraised at the time said property is turned over to the lessee and provision made in lease for the lessee's accounting for the value of such property at the termination of lease. The lease shall also provide the terms and conditions under which the lessee may sell and dispose of the surplus electric power created at said plants. The lease shall also provide for the protection of navigation at said Dam No. 2 and the operation of the locks connected therewith. The lease contemplated in this section shall be made with the understanding that the United States shall complete and have ready for operation Dam No. 2 and the locks connected therewith, together with the plants and machinery for the production of electric power, and that after the lease is entered into the lessee shall maintain the property covered by the lease in good repair and working condition for the term of the contract.

Time shall be made of the essence of the contract herein provided for, and failure on the part of the lessee to comply with the terms of said contract shall render the same terminable at the option of the United States, provided that written notice of the exercise of such option shall be served upon the lessee at any time within one year following any breach of said contract. Whereupon the property covered by said lease shall be turned over, without expense, to the United States upon demand, and said lessee shall be liable for any damage sustained by the United States as a consequence of said lease and the acts of said lessee.

SEC. 6. In the event the President is unable to make a lease under the terms of the power herein granted to him before the 1st day of September, 1928, then the United States shall maintain and operate said properties described in section 1, in compliance with the terms and conditions set forth in sections 1, 2, 3, and 4 of this act, and under the power and authority prescribed and granted in the following sections of this act.

SEC. 7. That the President is hereby authorized and empowered to designate any five persons to act as an organization committee for the purpose of organizing a corporation under authority of, and for the purposes enumerated in, this act.

ORGANIZATION

The persons so designated shall, under their seals, make an organization certificate, which shall specifically state the name of the corporation to be organized, the place in which its principal office is to be located, the amount of capital stock, and the number of shares into which the same is divided, and the fact that the certificate is made to enable the corporation formed to avail itself of the advantages of this act. The name of the corporation shall be the Muscle Shoals Corporation.

The said organization certificate shall be acknowledged before a judge of some court of record or notary public, and shall be, together with acknowledgment thereof, authenticated by the seal of such notary or court, transmitted to the President, who shall file, record, and carefully preserve the same in his office. Upon the filing of such certificate with the President as aforesaid, the said corporation shall become a body corporate, and as such, and in the name Muscle Shoals Corporation, have power—

First, to adopt and use a corporate seal;

Second, to have succession for a period of 50 years from its organization, unless it is sooner dissolved by an act of Congress, or unless its franchise becomes forfeited by some violation of law;

Third, to make contracts, and no such contract shall extend beyond the period of the life of the corporation;

Fourth, to sue and be sued, complain, and defend in any court of law or equity;

Fifth, to appoint by its board of directors such officers and employees as are not otherwise provided for in this act; to define their duties, to fix their salaries, in its discretion to require bonds of any of them, and to fix the penalty thereof, and to dismiss at pleasure any of such officers or employees;

Sixth, to prescribe by its board of directors by-laws not inconsistent with law regulating the manner in which its general business may be conducted and the privileges granted to it by law may be exercised and enjoyed; and

Seventh, to exercise by its board of directors or duly authorized officers or agents all powers specifically granted by the provisions of this act and such incidental powers as shall be necessary to carry on the business for which it is incorporated within the limitations prescribed by this act, but such corporation shall transact no business except such as is incidental and necessary preliminary to its organization until it has been authorized by the President to commence business under the provisions of this act.

The corporation shall be conducted under the supervision and control of a board of directors, consisting of five members, to be selected by the President. The directors so appointed shall hold office at the pleasure of the President. The President shall designate a chairman of the board, who shall have power to designate one of the others as vice chairman. The vice chairman shall perform the duties of chair-

man in the absence of the chairman. Not more than two of such directors shall be appointed from offices in the War Department.

The board of directors shall perform the duties usually appertaining to the office of directors of private corporations and such other duties as are prescribed by law.

POWERS OF THE CORPORATION

The corporation shall have power—

(a) To purchase, acquire, operate, and develop in the manner prescribed by this act and subject to the limitations and restrictions thereof the following properties owned by the United States:

1. United States nitrate-fixation plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with (a) all real estate used in connection therewith; (b) all tools, machinery, equipment, accessories, and materials thereunto belonging; (c) all laboratories and plants used as auxiliaries thereto, the Waco limestone quarry in Alabama, Dam No. 2 at Muscle Shoals and the hydroelectric power plant connected therewith, together with the steam plants used as auxiliaries of the United States fixed nitrogen plants Nos. 1 and 2, together with all other property described in section 1 of this act.

2. To construct, purchase, maintain, and operate all such buildings, plants, and machinery as may be necessary for the production, manufacture, sale, and distribution of fixed nitrogen and other forms of commercial fertilizer.

3. Any other plants or parts of plant, equipment, accessories, or other properties belonging to the United States, which are under the direct control of the President or of the War Department, and which the President may deem it advisable to transfer, convey, or deliver to said corporation for use in connection with any of the purposes of this act or for any purpose incidental thereto.

(b) To acquire, establish, maintain, and operate such other laboratories and experimental plants as may be deemed necessary or advisable to assist it in furnishing to the United States Government and others, at all times, nitrogen products for military or other purposes in the most economical manner and of the highest standard of efficiency.

(c) To sell to the United States such nitrogen products as may be manufactured by said corporation for military or other purposes.

(d) To sell any or all of its products not required by the United States to producers or users of fertilizers or to others: *Provided*, That in the sale of such products not required by the United States Government preference shall be given to those persons engaged in agriculture: *Provided further*, That if such products are sold to others than users of fertilizers the corporation shall require as a condition of such sale the consent of the purchaser to the regulation by the corporation of the prices to be charged users for the products so purchased or any product of which the products purchased from the corporation shall form an ingredient.

(e) The operation of the hydroelectric power plant and steam power plants at Muscle Shoals and the use and sale of the electric power to be developed therefrom that is not required to carry out the terms imposed by sections 1, 2, 3, and 4 of this act.

(f) To enter into such agreements and reciprocal relations with others as may be deemed necessary or desirable to facilitate the production and sale of nitrogen products on the most scientific and economical basis.

(g) To purchase, lease, or otherwise acquire United States or foreign patents and processes or the right to use such patents of processes.

(h) To obtain from the United States or from foreign governments patents for discoveries or inventions of its officers or employees as a condition of their employment to enter into agreements with the company that the patents for all such discoveries or inventions shall be and become in whole or in part the property of the corporation.

(i) To assume any or all obligations of the United States entered into in connection with the construction, maintenance, and operation of the plants to be transferred to the corporation under the provisions of this act.

(j) To deposit its funds in any Federal reserve bank or with any member bank of the Federal reserve system.

(k) To sell and export any of its surplus products not purchased by the United States or by persons, firms, or corporations within the United States.

(l) To invest any surplus of available funds not immediately used for the operation, construction, or maintenance of its plants or properties in United States bonds or other securities issued by the United States.

(m) To lease or purchase such buildings or properties as may be deemed necessary or advisable for the administration of the affairs of the corporation or for carrying out the purposes of this act; and with the approval of the President to lease to other persons, firms, or corporations, or to enter into agreements with others for the operation of such properties not used or needed for the purposes named herein. In the operation, maintenance, and development of the plants purchased or acquired under this act the corporation shall be free from the limitations or restrictions imposed by the act of June 3, 1916, and shall be subject only to the limitations and restrictions of this act.

CAPITAL STOCK AND BONDS

The capital stock of the corporation shall consist of 100 shares of common stock of no par value. The corporation shall also issue an amount of 20-year bonds bearing interest at the rate of 5 per cent per annum which shall be a first lien on the property of the corporation and in an amount not to exceed $50,000,000, to be sold from time to time as needed to carry out the purpose of this act: *Provided*, That the principal and interest of said bonds shall be paid by the Secretary of the Treasury out of funds in the Treasury not otherwise appropriated, upon default at any time in payment as herein provided by the corporation. The terms for the sale of said bonds shall be approved by the President. If at the end of any fiscal year after the eighth year after the commencement of business, as authorized by the Secretary of War, the corporation shall not have earned net sums sufficient to meet the interest on said bonds, as evidenced by audits of the accounts of said corporation by the President, the corporation shall forthwith cease operations and shall not resume until authorized so to do by the Congress.

In exchange for the properties purchased or acquired from the United States and from time to time transferred, conveyed, or delivered to the corporation by the President or the Secretary of War, and for all unexpended balances now under the control of the Secretary of War and applicable to the nitrate plants at or near Muscle Shoals, Ala., the corporation shall cause to be executed and delivered to the President a certificate for all of the common stock of the corporation. The certificate shall be evidence of the ownership by the United States of all stocks of the corporation.

In consideration of the issuance of such common stock to the President, the President is authorized and empowered to transfer, convey, and deliver to the corporation all of the real estate, buildings, tools, equipment, supplies, and other properties belonging to, used by, or appertaining to the plants and properties to be acquired by the corporation under the terms of this act, and to transfer, convey, and deliver, as and when he may deem it advisable, any other equipment, accessories, plants or parts of plants, or other property referred to in this act and which the corporation is authorized to acquire or purchase from the United States under its provisions.

DISTRIBUTION OF EARNINGS

All net earnings of the corporation not required for its organization, operation, and development shall be used—

(a) To pay interest on the bonds and create a fund for their payment;

(b) To develop and improve its plants and equipment;

(c) To create a reserve or surplus fund until such fund amounts to $2,500,000;

(d) The remainder to be paid as dividends on the stock into the Treasury of the United States as miscellaneous receipts.

MISCELLANEOUS

The corporation shall not have power to mortgage or pledge its assets, or to issue bonds secured by any of its properties; except as hereinbefore provided.

The United States shall not be liable for any debts, obligations, or other liabilities of the corporation.

The corporation and all of its assets shall be deemed and held to be instrumentalities of the United States and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation. The directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States, and the property and moneys belonging to said corporation, acquired from the United States, or from others, shall not be deemed to be the property and moneys of the United States, within the meaning of any statutes of the United States.

The accounts of the corporation shall be audited under the regulations to be prescribed by the President, who shall annually report to Congress a detailed statement of the fiscal operations of said corporation.

SEC. 8. That the President is hereby authorized and directed to complete the construction of Dam No. 3 and the necessary approach to the locks in Dam No. 2 in the Tennessee River at or near Muscle Shoals, Ala., in accordance with report submitted in House Document 1262, Sixty-fourth Congress, first session: *Provided*, That the President may in his discretion make such modifications in the plans presented in such report as he may deem advisable in the interest of power or navigation.

SEC. 9. The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer shall be sold for distribution.

SEC. 10. That as a condition of any lease, entered into under the provisions of this act, every lessee hereunder which is a public-service corporation, or a person, association, or corporation developing, transmitting, or distributing power under the lessee either immediately or otherwise, for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State

in which the service is rendered or the rate charged. That in case of the development, transmission, or distribution, or use in public service of power by any lessee hereunder or by its customer engaged in public service within a State which has not authorized and empowered a commission or other agency or agencies within said State to regulate and control the services to be rendered by such lessee or by its customer engaged in public service, or the rates and charges of payment therefor, or the amount or character of securities to be issued by any of said parties, it is agreed as a condition of such lease that jurisdiction is hereby conferred upon the commission created by the act of Congress approved June 10, 1920, upon complaint of any person aggrieved or upon its own initiative, to exercise such regulation and control until such time as the State shall have provided a commission or other authority for such regulation and control: *Provided*, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

SEC. 11. That when said power or any part thereof shall enter into interstate or foreign commerce the rates charged and the service rendered by any such lessee, or by any subsidiary corporation, the stock of which is owned or controlled directly or indirectly by such lessee, or by any person, corporation, or association purchasing power from such lessee for sale and distribution or use in public service shall be reasonable, nondiscriminatory, and just to the customer and all unreasonable discriminatory and unjust rates or services are hereby prohibited and declared to be unlawful; and whenever any of the States directly concerned has not provided a commission or other authority to enforce the requirements of this section within such State or to regulate and control the amount and character of securities to be issued by any of such parties or such States are unable to agree through their properly constituted authorities on the services to be rendered or on the rates or charges of payment therefor, or on the amount or character of securities to be issued by any of said parties, jurisdiction is hereby conferred upon the said commission, upon complaint of any person aggrieved, upon the request of any State concerned, or upon its own initiative to enforce the provisions of this section, to regulate and control so much of the services rendered, and of the rates and charges of payment therefor as constitute interstate or foreign commerce and to regulate the issuance of securities by the parties included within this section, and securities issued by the lessee subject to such regulations shall be allowed only for the bona fide purpose of financing and conducting the business of such lessee.

The administration of the provisions of this section, so far as applicable, shall be according to the procedure and practice in fixing and regulating the rates, charges, and practices of railroad companies as provided for in the act to regulate commerce, approved February 4, 1887, as amended, and that the parties subject to such regulation shall have the same rights of hearing, defense, and review as said companies in such cases.

In any valuation hereunder for purposes of rate making no value shall be claimed or allowed for the rights granted by this act or under any lease executed thereunder.

SEC. 12. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

SEC. 13. No lease made under the terms of this act shall be transferred without the approval of the President of the United States.

The right to amend, alter, or repeal this act is hereby expressly reserved.

Mr. HARRISON. Mr. President, briefly, I desire to state what is in this proposal. We have reached almost the end of the limit, and a little analysis of just what the Senate has done will not be amiss.

The joint resolution that is now before the Senate—I am not speaking of the substitute—after these amendments have been adopted, provides for Government ownership and operation of the transmission lines as well as distribution of power in certain cases. It provides also for the experimental manufacture of fertilizer through the synthetic process and through the cyanamide process.

This should be a very happy day for the Senator from Nebraska [Mr. NORRIS], and I congratulate him upon his achievements, because he has openly and avowedly for many years in the Senate of the United States voted for and advocated Government operation of Muscle Shoals. I must say, however, that I am a little surprised at the action of some other Senators in standing for that theory.

Mr. President, the proposal that I have offered is simple. It is to the point. I have offered it in the hope that it might be a compromise wherein the Members of the Senate might get together upon some proposition that was not wholly a Government ownership and operation proposition.

This substitute first proposes to lease the Muscle Shoals properties for 50 years, with the distinct understanding and condition that 40,000 tons of fixed nitrogen shall be manufactured annually. It is not limited to fertilizer of one kind, but commercial fertilizers of every kind shall be manufactured. In six years' time, if a lease can be obtained, it will be manufactured. The farmers of the country will receive their lower-priced fertilizers. Indeed, the proposal limits to 8 per cent the profits that shall be made out of the fertilizer, and the surplus power shall be sold and the rates regulated by the various agencies of the States; and if there is no agency to regulate them, then they shall be regulated by the Federal Water Power Commission. In the event that there can be no lease obtained under the provisions that protect the taxpayers of the country, which are sound and sensible provisions, then the Government shall step in; and, through a corporation provided for the purpose, shall manufacture fixed nitrogen to the amount of 40,000 tons annually, and the surplus power shall be distributed.

Mr. President, this proposal, following the adoption of certain amendments that were made by the Senate at the time, was before the Senate for weeks, and was the conception in major part of a very distinguished Member of this body, a man whose loss has been felt by the public life of the Nation as well as the Senate of the United States.

I say without fear of contradiction that no man has graced the Senate of the United States in the last 50 years who possessed more ability, who had finer poise and a stronger sense of justice in his heart, than Oscar W. Underwood. He was a man whom it was a pleasure to follow, because he thought in straight lines. He was never charged with being a radical; neither was he charged with being too much of a conservative to overlook fair play, equity, and justice. This substitute in large part came from his massive brain; and as I speak in behalf of it to-day I can not but feel the spirit of this man who is not here in person, but whose achievements we all remember.

Mr. President, I do not think more need be said about this proposal. I shall be glad to answer any questions with respect to it; but, if it should be adopted, the Muscle Shoals question is away from the Congress. Fertilizers will be manufactured, and the people—the farmers, especially—will get the benefits therefrom. These provisions in the pending joint resolution are but experiments. The question must come back to Congress in time. The substitute I have offered has in it a provision to the effect that experiments of every character shall be carried on, and that the smallest amount of power shall be utilized to make these fertilizers economically and cheaply.

We never can get together upon a bid, as I have stated before, because we have tried here for nearly 10 years to agree upon a bid. Some of us thought that the Ford proposal was all right. Others thought that it was not all right; and time was frittered away until Mr. Ford withdrew his proposal. Then we appointed a commission to investigate and accept these bids. They went into the question fully; they made their recommendations; and the recommendations were never considered by the House or the Senate of the United States. We must delegate this authority to someone if the Muscle Shoals question is to be settled; and in this substitute proposal the authority is delegated to the President of the United States to make the lease. If we fail in that, then the Government shall step in and not do experimental work alone, but shall make fertilizers.

I ask for the yeas and nays upon my substitute.

Mr. NORRIS. Mr. President, I do not know whether it is advisable, or whether I am called upon, to take up the time of the Senate at this late hour of the day to discuss this proposition. We have voted once upon an amendment offered by the Senator from Mississippi that in my judgment was a power proposition pure and simple, a leasing proposition; and this is another, except that it goes a great deal further. It provides for the building of another dam from the Federal Treasury. It provides for the leasing——

Mr. HARRISON. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. HARRISON. It simply gives authority for the building of a dam. It does not provide an appropriation for the building of any dam.

Mr. NORRIS. No; it provides no appropriation.

Mr. HARRISON. It merely gives authority.

Mr. NORRIS. All you have to do in any law to build a dam is to provide an authorization for an appropriation. We pass the law authorizing it, and then it is in order to move on an appropriation bill at any time to appropriate for it.

Mr. HARRISON. If I am not mistaken, I have heard the Senator from Nebraska many times say that not only should Dam No. 2 be utilized but Dam No. 3 should be built, and Cove Creek Dam should be built.

Mr. NORRIS. Yes, Mr. President; I have said it many times. I said at the beginning that we ought to have a governmental survey that should take this river and its tributaries from the source to the mouth, and build dams wherever the engineers, after proper investigation, said there should be dams; but the Senate turned it down. I advocated that for many and many a Congress; and, although I received a favorable report from the committee, I lacked a few votes of getting it through the Senate. That was the ideal thing to do.

Mr. President, the joint resolution that comes before us now from the committee is a compromise; and it seems to me it ought to have the backing and the assistance of every Senator who has been here during these weary years when we have been fighting about Muscle Shoals. It is not what I want to do. It is not the ideal thing. I surrendered my view, and those who believe in leasing propositions had their day in court. You had the committee. You had a joint commission composed of men of your belief. You had your own way; and many and many are the Senators in this body who have told me—and I have down here the record of the speeches of many of you who told it in the Senate—"Let us try this once more. Let us try once more private operation of this governmental property; and, if we fail, then there is nothing left but Government operation."

We have done it. We have gone on. We have given you full sway. You have had your own way. You have tried it time and time again, and you admit your failure; and we ought now to have the backing and the support of every man, including the Senator from Mississippi, for a proposition that is a compromise, providing that the Government shall take its own property, built by the money of the taxpayers of the United States, and not lease it, as the law said we should not lease it when we appropriated every dollar of the taxpayers' money that went into this property. Every dollar that has ever been appropriated has been appropriated in the face of the law that says it shall not be leased.

The Senator says he heard me say that I want to build Dam No. 3. I will build Dam No. 3 at any time, as far as I am concerned, with public money; but I am not in favor of using public money from the Treasury of the United States to build Dam No. 3 or any other dam and then turning it over to private parties. If you are going to turn it over to private parties, let them put up their own money.

Now, we are asked again by this amendment to lease this property after these many years when you had opportunities to lease; and what does it mean? I can not, within the limits of my time, go into an explanation of what I think it would mean; but it would mean the turning over, if it is leased under this substitute, of the property at Muscle Shoals to the Alabama Power Co. I do not think you can get away from it. There is not any other bidder. There is not anybody else who is equipped as they would be equipped; or, if there is any other bidder, it is another member of the same combination of which the Alabama Power Co. is a member.

I am not an enemy of the Alabama Power Co. I am not condemning them. I have not been finding fault with or objecting to their activities. They have a right to do what they are doing; but I am opposed to turning over the Government property down there to the Alabama Power Co. when we know in advance that any power that is distributed will never be distributed at a penny less a kilowatt-hour to the people who get it. Moreover, this substitute provides that after they have made nitrates for six years, if it does not pay, if the nitrate part of it is not profitable, then they can stop, and they have all the power of this great dam and another one to be constructed, and of this steam plant. They could afford to make nitrate and pile it up for six years and quit, and I would not blame them for doing it. Neither would you. We can not expect anybody to operate at a loss, and I think it has been demonstrated that nitrate plant No. 2 can not be operated at a profit and undersell present prices, and the men who would buy it would know it. As Mr. Bell, the head of the Cyanamid Co., said in his testimony, every bid that is being made is a power bid; I do not care how you disguise it by a beautiful fertilizer name, or give it a fertilizer odor if you want to. It is power just the same, power; and if you get fertilizer under the cyanamide process, you will have to subsidize it by giving it enough cheap power to make up the losses. But under this amendment they would make it only for a certain number of years and then they would quit. It is another plan which would have the effect, unintentionally, perhaps, of nullifying everything the Government of the United States has done down there for the benefit of the people. It would turn that proposition over to the Power Trust, and if that is what Senators want to do, here is the opportunity to do it. This substitute would accomplish that result.

I want to notify Senators now, I want to tell the country now, that it is being done with Senators' eyes open. It does not need any argument, after all these years of discussion, to convince this body, I take it, that the only company equipped properly to lease this property is the Alabama Power Co. There is nothing here that will insure, even when they get it, any benefit to the ultimate consumer of power.

Let me say, in conclusion, that if this substitute is agreed to Muscle Shoals will be dead, the benefits that would have come to the people will all disappear, and I appeal to Senators who have never agreed with me in all this long, weary fight, who thought I was wrong in the fight, but who have said over and over again, "We can not keep this always. If we can not lease it or handle it through private corporations or private parties, the time must come when we will cease to fool with it."

We appointed a joint committee to take up the matter. There was nobody on the joint committee who believed as I believe, and I think the Senate will remember that I even refused to go on the joint committee, because I said, "You have voted for a proposition here to lease this property, which I do not believe in. I can not honorably serve on that committee. Men ought to serve on that committee who are in favor of that kind of legislation."

A committee composed of that kind of men was appointed, an able committee, who honestly and conscientiously went into the investigation of this proposition from their standpoint, and Senators know that nothing was accomplished; it all resulted in failure. I have seen and I have heard dozens of Senators in this body say, "This is the last trial. If private operation does not work now, I am going to take Government operation of Muscle Shoals."

Senators, it is our property, we paid for it, it belongs to the people of the United States, we are not going into business by this resolution. In my judgment, every kilowatt that is sold down there, if this resolution of the committee shall pass, will be sold at the switchboard. We are not interfering with State rights. After we have used all the electricity that may be necessary in the fertilizer operation the rest will be sold, in my judgment, every kilowatt of it, at the switchboard.

It is true that the resolution provides that the Secretary of War shall have authority to build transmission lines, and under the proper conditions he ought to exercise that authority, but that is put in the resolution, as everybody knows, to place him on an equality with everybody else. If he did not have that right, there is only one concern that would get it, and again it would be the Alabama Power Co., because that is the only corporation that is physically connected with Muscle Shoals by a distributing system. So we come back to this, "You have had your day in court, you have not been able to succeed, and this starts you out again on a wild-goose chase; this opens it up for more bids, going all over the ground you have gone over before."

Mr. President, it seems to me under these circumstances there can be but one logical thing to do, that is to agree to this compromise, accept what we have all said so many times we would accept in case these other attempts to lease all proved to be failures.

Mr. HARRISON. Mr. President, of course it is easy to say that all this would benefit the Power Trust.

The VICE PRESIDENT. The Senator has already spoken once upon the amendment.

Mr. HARRISON. I have not spoken upon the joint resolution, I will say to the Vice President.

The VICE PRESIDENT. The Senator may proceed upon the joint resolution.

Mr. HARRISON. Such statements about the Power Trust do not deter me. It is easy to charge that what one is trying to do is to help some special interest. I know there are certain papers in the country that accept what the Senator from Nebraska or some other Senator may state, but that should not influence Senators when they are trying to do what they think is right. I have no sympathy with all of the newspaper notoriety and many editorials that were written recently charging Senators who voted to amend the Walsh resolution by having the Federal Trade Commission make the investigation with being tools of the great Power Trust of the country. I was not one of those who voted to have the Federal Trade Commission make the investigation, but I know that every Senator who did so was voting conscientiously what he thought was for the best interests of the country.

The Senator may talk about this substitute being in the interest of the Alabama Power Co. For six years I served on the Committee on Agriculture and Forestry, of which the distinguished Senator from Nebraska happened to be chairman, and during that time day after day we considered the Muscle Shoals question. I feel that I know at least something about

it, not only because I was interested in the subject matter but because Muscle Shoals lies at the very door of my own State. Time after time the Alabama Power Co. made its fight here to thwart the acceptance of the Ford bid, which I favored and which the Senator from Nebraska opposed. The Alabama Power Co., of course, was interested in the defeat of it, but it would be unfair for me to say that because the Senator from Nebraska was on the side of the Alabama Power Co. at that time he was an adherent of the power people.

I remember, too, when a little later on the Alabama Power Co. presented a bid for Muscle Shoals. I fought that bid because I did not think it was fair. The Senator says a committee was appointed to study this question. Yes; and the committee's actions were defeated because the distinguished Senator from Nebraska employed his talents and the wonderful influence that he wields here in the Congress to prevent even the consideration of the recommendations of that committee.

Yes; and I am not forgetful of the fact that when the proposal of the substitute which I offer now was passed by the Senate, the distinguished Senator from Nebraska, chairman of the committee, refused to go on the conference committee because, he said, he was not in sympathy with it.

The Senate was not in sympathy with his views. Why should he suggest now that the Senate should change position and say, "We are in favor of Government ownership of transmission lines and distribution of power to the consumers of the country, as well as the manufacture of fertilizer"?

I submit this question to the better judgment of the Senate. If you want to defeat this proposal, which has had careful consideration, then vote the substitute down. What I have done is what I believe to be in the interest of the farmers of this country, and to see this great natural resource developed.

These proposals advocated by the Senator from Nebraska are merely experiments. If it is said this is an Alabama Power Co. proposition, I say that there is a provision that they shall manufacture 40,000 tons of fixed nitrogen, equivalent to 250,000 tons of Chilean saltpeter which comes into this country annually. I do not care, if a lease is made, who may get it provided they comply with the conditions and restrictions provided in the legislation.

The people of my State, in every little community where the power companies have not come, want them to come. Those companies have brought new industries there. They are helping to make the South what the South should be, and I am not disposed to unjustly criticize them.

If the Alabama Power Co. can come under the regulations and restrictions and conditions of this legislation, let them do it, and let them make fertilizer. The fertilizer will be just as good for the soil of Mississippi, Alabama, or Nebraska made by the Alabama Power Co., if they can comply with the restrictions, as if made by anybody else.

Let us write the provisions. Let the President make the lease if the bidders come up to the conditions, and let us care nothing as to who gets it, provided they come up to the restrictions.

Mr. HEFLIN. Mr. President, I will detain the Senate for but a moment. The situation that confronts me is not at all pleasing. There are some good provisions in the substitute, and some not so good. There are some good provisions in the Norris resolution, and some that are bad.

So candor compels me to say that neither one of these measures is satisfactory to me. I am reminded of a story that Congressman Cushman, of the State of Washington, once told in the House when confronted with a situation somewhat like this.

A man had stolen a horse out in the great State of Washington, and the citizens of that and neighboring communities apprehended him. They tied him with a plow line, and took him out in the woods to execute him on a bright moonlight night. While they were making ready to dispose of him one of the gentlemen said in his hearing, "Let's shoot him." Another one said, "No; let's hang him." Some insisted on hanging him while others preferred to shoot him. Finally a considerate and kind-hearted man said, "Let's consult him and get his 'ruthers' about it. He may prefer shooting to hanging." Finally they said, "Well, stranger, what do you say about it?" He said, "Well, I am more interested than any of you, but I can't enthuse over either one of the plans suggested." [Laughter.]

Mr. HARRISON. I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. LA FOLLETTE (when Mr. BLAINE'S name was called). My colleague the junior Senator from Wisconsin [Mr. BLAINE] is paired on this question with the junior Senator from Utah [Mr. KING]. If my colleague were present, he would vote "nay."

Mr. BROUSSARD (when his name was called). I have a pair with the Senator from New Hampshire [Mr. MOSES]. If that Senator were present he would vote as I expect to vote. Therefore I am free to vote. I vote "yea."

Mr. FESS (when his name was called). I am paired with the Senator from Michigan [Mr. FERRIS]. I transfer that pair to the Senator from Massachusetts [Mr. GILLETT], and vote "yea."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT]. I am advised that if he were present he would vote as I intend to vote. I vote "yea."

Mr. KING (when his name was called). I have a general pair with the junior Senator from Wisconsin [Mr. BLAINE]. In his absence I withhold my vote.

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. Not knowing how he would vote, in his absence I withhold my vote. If I were permitted to vote, I would vote "nay."

Mr. PHIPPS (when his name was called). On this vote I have a pair with the senior Senator from Oklahoma [Mr. PINE]. In his absence I withhold my vote.

Mr. SMITH (when his name was called). I have a pair on this vote with the Senator from Indiana [Mr. WATSON]. I understand that if he were present he would vote "yea." If I were allowed to vote, I would vote "nay."

Mr. TYSON (when his name was called). I have a general pair with the Senator from West Virginia [Mr. GOFF]. I understand that if he were present he would vote as I shall vote. I therefore vote. I vote "yea."

The roll call was concluded.

Mr. BRATTON. I have a general pair with the junior Senator from Indiana [Mr. ROBINSON]. I understand that if he were present he would vote "yea." If permitted to vote I should vote "nay" on this question.

Mr. KING. I transfer my pair with the junior Senator from Wisconsin [Mr. BLAINE] to the senior Senator from Missouri [Mr. REED], and vote "yea."

Mr. FLETCHER. I desire to announce that my colleague the junior Senator from Florida [Mr. TRAMMELL] is necessarily absent.

The result was announced—yeas 26, nays 48, as follows:

YEAS—26

Bayard	Edge	Hawes	Smoot
Bingham	Edwards	King	Steck
Broussard	Fess	McLean	Stephens
Bruce	Fletcher	Metcalf	Tydings
Curtis	Greene	Ransdell	Tyson
Dale	Hale	Reed, Pa.	
Deneen	Harrison	Sackett	

NAYS—48

Ashurst	Frazier	La Follette	Sheppard
Barkley	George	McKellar	Shipstead
Black	Gerry	McMaster	Simmons
Blease	Glass	McNary	Steiwer
Borah	Gooding	Mayfield	Swanson
Brookhart	Harris	Neely	Thomas
Capper	Hayden	Norbeck	Wagner
Caraway	Heflin	Norris	Walsh, Mass.
Copeland	Howell	Nye	Walsh, Mont.
Couzens	Johnson	Oddie	Waterman
Cutting	Jones	Robinson, Ark.	Wheeler
Dill	Kendrick	Schall	Willis

NOT VOTING—20

Blaine	Goff	Phipps	Shortridge
Bratton	Gould	Pine	Smith
du Pont	Keyes	Pittman	Trammell
Ferris	Moses	Reed, Mo.	Warren
Gillett	Overman	Robinson, Ind.	Watson

So Mr. HARRISON'S amendment in the nature of a substitute was rejected.

Mr. BLACK. Mr. President, I desire to make a statement on the joint resolution itself. I have not yet taken any of my time on the joint resolution.

Mr. SACKETT. Mr. President, will the Senator yield to me?

Mr. BLACK. I yield.

Mr. SACKETT. I desire to offer a further amendment. If the Senator wishes to speak on the joint resolution before the amendment is offered, I am perfectly willing to wait, or he can talk on the amendment after it is offered.

Mr. BLACK. It does not make any difference. I only intend to speak for two or three minutes. I will wait until the Senator has offered his amendment.

Mr. SACKETT. I offer an amendment in the nature of a substitute to the pending measure which is printed and has been lying on the table for some time.

The VICE PRESIDENT. The amendment will be read for the information of the Senate.

The Chief Clerk proceeded to read the amendment.

Mr. NORRIS. Mr. President, does the Senator from Kentucky insist on having his substitute read?

Mr. SACKETT. Not unless the Senate wants to hear it.

Mr. NORRIS. Apparently the Senate is not listening to it.

Mr. KING. Mr. President, I should like to have it read. If I am to vote on it, I want to know something about it.

The Chief Clerk resumed and concluded the reading of the proposed amendment, which is entire as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

"That it is hereby declared to be the policy of the Congress in regard to the properties at Muscle Shoals, Ala., including therein Dam No. 2, the steam plant at nitrate plant No. 2, and the nitrate plant No. 1, together with the steam plant connected therewith—

"(1) To utilize the water-power facilities of such properties (except nitrate plant No. 1 and the steam plant connected therewith) so as to produce the highest annual revenue by the lease thereof, except that in any such lease there shall be reserved the use of sufficient power to light and operate the locks and canals in and about Dam No. 2 for the purposes of navigation, and such power as may be necessary to enable the Secretary of War to satisfy the requirements of the Secretary of Agriculture as provided in section 8 of this resolution.

"(2) To use said annual revenues to develop the manufacture and distribution of concentrated fertilizer and promote its use upon the farms of the Nation.

"(3) To provide for the operation of nitrate plant No. 1, together with the steam plant connected therewith, by the Secretary of Agriculture, as hereinafter provided.

"(4) To provide for the construction or reconstruction of plants and facilities for the manufacture of such fertilizer or of fertilizer elements in large-scale operations, to the end that costs of manufacture may be reduced to a minimum.

"SEC. 2. (a) In order to encourage the lease of the water-power facilities at Muscle Shoals upon the most advantageous terms to the Government, the Secretary of War is hereby authorized to install in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he is satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

"(b) In lieu of such installation, the Secretary of War may, in his discretion, (1) provide in any lease of the water power and facilities herein authorized that the lessee may complete Dam No. 2 and the steam plant at nitrate plant No. 2 by installing such additional units according to the plans and specifications of such dam and such plant at the nitrate plant No. 2, or in either of them in whole or in part, and (2) contract to purchase such additions for the Government at the termination of the lease on fair and reasonable terms which shall allow for interest, depreciation, and obsolescence, ordinary wear and tear excepted.

"SEC. 3. The Secretary of War is hereby empowered and authorized to lease said steam plant and said dam to any State, corporation, or individual in accordance with the policies herein set forth, and to enter into a contract for such lease for a term not exceeding 15 years from a date not later than the 1st day of January, 1929. In the lease of such property the Secretary of War shall be governed by the policy of obtaining for the Government the largest annual rentals possible from responsible parties, such rentals to be payable monthly, and shall require from the lessee satisfactory security for the payment of rentals.

"SEC. 4. In order to place the Secretary of War upon a fair basis for making such contract, he is hereby expressly authorized, either from appropriations made by Congress or from funds obtained from such leases, to construct, lease, or authorize the construction of transmission lines within the economic transmission distance in any direction from said Dam No. 2 and said steam plant.

"SEC. 5. The moneys received by the Secretary of War from leases of any of said properties, after deducting the cost of administration and the cost of constructing transmission lines, if any, shall be paid into the Treasury of the United States, and the same shall be segregated and set aside as a special fund for developing, manufacturing, and introducing improved fertilizers and fertilizer elements, and for developing and introducing fertilizer practices, for the purpose of reducing the cost and increasing the efficiency and use of fertilizers on American soils. Moneys in the fund are hereby appropriated for such purposes.

"SEC. 6. The Secretary of Agriculture is hereby authorized and directed, within the limits of such fund derived from rentals and appropriations made by Congress from the Treasury of the United States—

"(a) To construct, maintain, and operate experimental or production plants anywhere in the United States for the manufacture and distribution of fertilizer or any of the ingredients comprising concentrated fertilizers and, in his discretion, to abandon any of such plants and construct other plants;

"(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program;

"(c) To arrange with farmers, and farm organizations and other distributing mediums, for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce; and

"(d) To contract with such farmers and farm organizations and other distributing mediums to pay the special costs and losses, if any, sustained by them as a direct result of such use of the new fertilizer or fertilizer practices during the initial or experimental period of their introduction.

"SEC. 7. Revenue obtained from the sale of fertilizer or fertilizer materials shall be paid into the Treasury of the United States and shall become a part of the special fund hereinbefore provided.

"SEC. 8. The Secretary of Agriculture may locate one fertilizer plant within the economic distribution distance for electric power from Muscle Shoals, Ala., and there shall be turned over to him nitrate plant No. 1, together with the steam plant connected therewith, and such other buildings, houses, dwellings, and shops there located as may be necessary for the use of the Secretary and his employees in the construction, maintenance, and operation of such plant. When such fertilizer plant is thus located or established in the vicinity of Muscle Shoals, and the Secretary of Agriculture in the operation of the same either requires more power than can be supplied from said steam plant located at nitrate plant No. 1, or for any reason desires other power than that which can be produced at said steam plant located at nitrate plant No. 1, then such additional power shall be supplied by the Secretary of War at a cost of $15 per annum per horsepower required from said Dam No. 2 or said steam plant located at nitrate plant No. 2.

"SEC. 9. Both the Secretary of War and the Secretary of Agriculture shall report in detail to Congress, on the first Monday in December of each year, their operations under this resolution.

"SEC. 10. In order that the Secretary of Agriculture may not be delayed in carrying out the program authorized herein for the production of fertilizer or fertilizer elements through the erection of suitable plants and facilities or the abandonment of same and the construction of other plants, the sum of $10,000,000, or so much thereof as may be necessary, is hereby authorized to be appropriated for that purpose from the Treasury of the United States."

Mr. SACKETT. Mr. President, I call the attention of the Senate to the meat of the amendment which I have offered as a substitute for the pending joint resolution. It is contained in a few lines, beginning in section 3, which empower and authorize the Secretary of War to lease the steam plant and the dam "to any State, corporation, or individual in accordance with the policies" set forth in the amendment, "and to enter into a contract for such lease for a term not exceeding 15 years from a date not later than" January 1, 1929. I wish to say to the Members of the Senate that that provision constitutes the real difference between the proposed substitute and the joint resolution of the Senator from Nebraska [Mr. NORRIS]. We have approached the "parting of the ways" in this discussion; and the amendment which I offer differs from the original joint resolution in the fact that it does not provide for Government operation of the power plant.

The Senator from Nebraska and I have both incorporated the same provisions for the manufacture of nitrogen and for the development of processes, but my amendment proposes to increase the amount to be devoted to that purpose to $10,000,000, in place of $2,000,000 under the joint resolution, because the evidence taken before the special committee shows that it will require $10,000,000 to build a plant for the manufacture of synthetic nitrogen. My substitute differs from the joint resolution only in regard to the handling of the power at Muscle Shoals.

I am opposed in every way to the Government going into private business fields. I think the way in which to handle Muscle Shoals, now that the time has passed when it is valuable for the purpose for which it was intended, is to obtain for the Government the largest amount of money that can be derived from the power at Muscle Shoals, and to use that money in the development of the nitrogen process.

We can not secure a high rental for the great power plant there if we load the lease down with restrictions. If we provide how the lessee shall use the property we are going to put a limit upon the amount of money which we can obtain for its use. If we are going to put a restriction upon it and consequently receive a lower rental we must receive a benefit

that is commensurate with the amount of money which it has cost us to so limit his use of it.

The Senator from Nebraska, throughout a long contest, has held and argued that by the Government operation of Muscle Shoals we would get a reduction in the price of electricity in the immediate neighborhood, and set such an example in reducing prices of electric current that it would form a standard of comparison for the country as a whole; that it would give a great advantage to the consumers who were able to obtain that electric current at low rates, and that that current sold at the lower prices, would be worth the price of embarking on a scheme of Government ownership and operation. I addressed the Senate the other day on this subject. We are all tired of listening to speeches about Muscle Shoals, but I wish to say that the point I then made, and the reason I gave for amending the joint resolution, lies in the fact that I firmly believe that the Senator from Nebraska will be disappointed in the results which are to come from the Government experiment. The Senator from Nebraska made the statement on the floor a few moments ago that he believed that under his resolution every bit of the power would be sold at the stations at Muscle Shoals. If the power is to be sold at the stations at Muscle Shoals it can not be of any greater advantage to the people who ultimately use it than the difference between the cost of production in that power plant at Muscle Shoals and the cost of production in any modern steam plant operating within that vicinity.

I made the statement on Friday of last week that the cost of production of electricity from water power and the steam plant at Muscle Shoals was about four-tenths of a cent a kilowatt. I made the statement also that a modern steam plant, with up-to-date machinery to-day, operating in the vicinity of Muscle Shoals on a large scale, produces electricity at six-tenths of a cent a kilowatt; that the difference between the two is one-fifth of a cent a kilowatt; and that when that difference is translated to the bill of the ultimate consumer—the small consumer, whom we have to consider, which usually runs from 5 to 7 cents a kilowatt—it is too infinitesimal to be appreciated in this bill under any modern business methods. Therefore, I say that, so far as the bill of the ultimate consumer is concerned, the advantage which could be gained under Government operation as between Muscle Shoals and any modern steam plant must be limited to that difference in the cost of production. That difference in the cost of production of one-fifth of a cent is not a sufficient warrant, in my judgment, for us to change the policy of the Government which has been in force ever since the time of the fathers of the Nation, that the Government itself should not go into private, competitive business. If the measure advocated by the Senator from Nebraska shall be adopted that is what the Government will be doing. That point has not been stressed in this argument to anything like the extent which the proposed manufacture of fertilizer has been stressed. The great point of the departure from policy has been beclouded by the discussion of fertilizer. So far as fertilizer is concerned, the result will be the same in either case; it will be manufactured under the supervision of the Department of Agriculture. Therefore, as between these two proposals, the fertilizer question is unimportant. The great question which confronts us is, Will we support the idea of putting the Government into business in competition with private enterprise?

I grant you, Mr. President, that such an amendment as I present may afford public utilities now in existence an opportunity to operate Muscle Shoals. If the power shall be sold at the bus bar to any private enterprise, either individual or corporation, the State of Alabama will take its taxes directly from the operator. It will not be robbed of its tax rights, as it will be under the pending joint resolution. Under my proposed substitute, the State of Alabama will have just as much right to have all the power, if she pays more for it, than any neighboring State, whereas under the joint resolution the power must be distributed to the neighboring States and the State of Alabama will be robbed.

However, above and beyond all that, are we going to put this Government into business in competition with private enterprise? Whatever may be the effect of the ultimate disposition of Muscle Shoals by the method which I propose, if the Senator from Nebraska sees fit to characterize it as a "sell-out" to the Power Trust, I ask the Senate to remember it is only the effect of the action; it is not the cause of the action. Let us not confuse cause with effect. I am willing to take the responsibility, because I stand for a cause, namely, that the Government of the United States shall not engage in private business. Although adherence to that policy may have the effect of placing the property under the operation of somebody the Senator does not like, I stand for the cause and not for the effect. It is an honest opinion; it is an opinion that has been gained through years of study of business relations and business life. I dislike to see the Senate turn on its heel and depart from a principle that it has upheld for generations and make the Government a competitor with private initiative in business enterprises in these United States. I ask for a vote upon the amendment I have offered.

Mr. NORRIS, Mr. BLACK, and Mr. DENEEN addressed the Chair.

The VICE PRESIDENT. The Senator from Nebraska.

Mr. NORRIS. Mr. President, I will only take a few minutes of the time of the Senate. The Senator from Kentucky refers to the Senate departing from the rule that has been followed for a great many years which keeps the Government out of business. If the joint resolution as reported by the committee puts the Government into business, it is because the Senate itself and the Congress departed from that rule when the original act was passed providing for the development of Muscle Shoals.

Mr. SACKETT. Mr. President, will the Senator from Nebraska yield?

Mr. NORRIS. Yes.

Mr. SACKETT. The Senator will remember that when the Senate passed the original act it was thought that the building of the dam and the erection of the power houses at Muscle Shoals was absolutely necessary for the development of the cyanamide process for the manufacture of nitrogen from the air. It was supposed at that this——

Mr. NORRIS. I hope the Senator will not make a speech, because my time is limited.

Mr. SACKETT. I am not going to make a speech.

Mr. NORRIS. If the Senator wishes to ask me a question, I will be glad to answer.

Mr. SACKETT. I wish to say that it was understood at that time that that was the purpose for which the power was to be developed. Times have changed.

Mr. NORRIS. Mr. President, it was understood at that time that we wanted to satisfy the people of the United States whose money we were going to use that we were going to use it for their benefit and not for the benefit of private enterprise or private corporations. That was the idea; that was the reason we passed the law, and that law has been on the statute books ever since. As trustees of the people's money, whenever we have taken a dollar from the Treasury of the United States for Muscle Shoals, we have taken it under that law. I do not understand how any Senator can now claim, unless he can give some reasonable excuse for it, that we should fly in the face of that law and lease the property, which we have tried to lease for nearly 10 years and have never made a success of the effort. If we shall make a lease under the proposed substitute of the Senator from Kentucky there will be only one bidder. That bidder will probably lease Muscle Shoals, if the amendment should finally be adopted, because under the Senator's proposal the lessee is not required to make a pound or an ounce of fertilizer. Therefore his proposed substitute does not even have the saving grace of the amendment which we have just voted down. The Senator from Kentucky proposes to lease Muscle Shoals. Who will be the lessee? There is only one company that can lease it.

It is true that the Senator's proposed substitute provides that it may be leased to a State, to a county, to a municipality; but everybody knows that no State, no county, no municipality is going to bid for the dam and the steam plant at Muscle Shoals. They have not any legal authority to do it. None of them will make a bid. The Alabama Power Co., standing there as the only corporation and the only institution and the only legal person that has physical connection with Muscle Shoals, will be the lessee.

Mr. President, of course it goes without saying that I concede to the Senator from Kentucky the conscientious conviction that I know he possesses. I am not one who has said, and I do not know of anybody else who has said, "This is a sell out to the power companies," as he intimated it had been said. If such an expression was used it was not in connection with anybody who is advocating a lease being moved by any motive that is dishonorable. I think that is the effect of the Senator's substitute. His fertilizer provisions are practically the same as those that were in the joint resolution reported from the committee; so it possesses none of the amendments that I think improve it. It has no requirement about fertilizer that applies to nitrate plant No. 2. It lacks the other provision that if any of this power is leased to a distributing company there shall be a limitation put upon the price that that distributing company shall charge to the ultimate consumer, and that limitation shall be that the price shall not exceed what the Federal Power Commission thinks is fair and just and reasonable. No such provi-

sion is in the Senator's substitute. If it is leased to the Alabama Power Co., not a single consumer, in my judgment, will get one penny of reduction—not a cent. They are getting the power now right after the Alabama Power Co. is getting it; and, as I have repeatedly said, no consumer has received the benefit of it.

So, Mr. President, I join with the Senator in asking for a vote.

Mr. BLACK. Mr. President, I agree thoroughly with the criticism made of the substitute of the Senator from Kentucky [Mr. SACKETT]. It does not provide fertilizer, as was originally planned.

I wish to make this statement with reference to the situation as I see it as one of the representatives of Alabama at this time.

I stated in the beginning of this debate that I was wedded to no idea and wedded to no plan. I was in favor of any plan which might be proposed that would, in my judgment, guarantee fertilizer to the farmers. At the time I opposed the joint resolution of the Senator from Nebraska with all the force that I could, there was no provision whatever, as I saw it, for the manufacture of fertilizer. There was no appropriation which made it possible; and, in fact, there was nothing in the joint resolution at that time, in my judgment, except a sale of power, the proceeds to be used for experimentation.

Since that time, due to the good judgment and excellent work of a number of Members of the Senate, this joint resolution has been very substantially amended. It still is not the measure that I should like to see written; but I realize that legislation is a matter of compromise. No one can obtain all that he desires in the way of legislation. I know that the Senator from Nebraska has yielded on many points in order to bring about a settlement of this controversy. I appreciate very much, as a representative of Alabama, the efforts that have been put forth here diligently to bring about a proper solution of this question. In my judgment, the joint resolution as now written will provide fertilizer for the American farmer at a lower rate than that at which he has been accustomed to buy it; and for that reason I expect to vote for the joint resolution of the Senator from Nebraska as it has been amended. I realize that there are several features in the joint resolution that in my opinion are fundamentally wrong; and yet, if something of this kind is not done, the discussion on this floor must convince every Senator that it will be impossible to make such a disposition of Muscle Shoals that any benefit to the American farmer can result.

Mr. DENEEN. Mr. President, I offer three amendments to the substitute of the Senator from Kentucky.

The VICE PRESIDENT. The amendments to the amendment, in the nature of a substitute, will be stated.

The CHIEF CLERK. On page 2, line 3, after the word "the," it is proposed to strike out the word "water."

Mr. SACKETT. Mr. President, these are amendments to my substitute, simply in order to perfect one or two of its provisions.

Mr. MCKELLAR. I was just going to ask that question.

Mr. SACKETT. I accept all of the amendments. There are only three of them.

The CHIEF CLERK. On page 4, line 2, after the word "lease," it is proposed to insert "provided a rental is obtained that is satisfactory to the Secretary of War."

On page 4, line 3, after the figures "1929," it is proposed to insert:

> In the event that the Secretary of War shall not be able to enter into a lease which is satisfactory to him, he is empowered and authorized to sell at the switchboard the current generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies set forth herein.

The VICE PRESIDENT. The Senator from Kentucky accepts the modifications suggested by the Senator from Illinois. The question is on the amendment, in the nature of a substitute, as modified.

Mr. HEFLIN. Mr. President, if I had my way I would have the Senate accept the Madden-Willis bill with some very important amendments. I think it is the best plan submitted to Congress for making fertilizer for our farmers. I do not surrender my convictions upon that question, or my right to support those provisions in the future if I have an opportunity to do so. I am not satisfied with the Norris joint resolution; neither am I satisfied with the substitute offered by the Senator from Kentucky [Mr. SACKETT].

The Norris joint resolution has some good provisions in it. It has been strengthened by the amendment of the Senator from Tennessee [Mr. MCKELLAR], and very much strengthened by the amendment offered by the Senator from Arkansas [Mr. CARAWAY], as well as by the amendment put on it just recently by the Senator from Nebraska [Mr. NORRIS] providing $10,000,000 to finish the work on Dam No. 2 and to do the work in connection with the production of fertilizer at Dam No. 2. These particular provisions were placed in the resolution in response to the demand made by me and my colleague for something definite and specific touching the propositions covered by them.

I should like to support those provisions. I do not like to support the provision that puts the Government in any kind of business. Not having the opportunity to vote for a better proposition and being very anxious to do something that will start the use of power at Muscle Shoals for making fertilizer for the farmer, I am forced to make a choice between the Norris resolution as amended and another proposition not as good. We are assured under the joint resolution as it now stands that we can get a considerable amount of fertilizer manufactured at plant No. 2 at Muscle Shoals. In view of these improvements made in the joint resolution and in the hope that when it gets over to the House we may be able to swap off the Government operation feature of it for the provisions of the Cyanamid bid, which provide for making fertilizer on a larger scale, I shall vote for the Norris joint resolution as amended.

The VICE PRESIDENT. The question is on the amendment, in the nature of a substitute, offered by the Senator from Kentucky [Mr. SACKETT], as modified.

The amendment, in the nature of a substitute, as modified, was rejected.

The VICE PRESIDENT. The joint resolution is still in Committee of the Whole and open to amendment.

Mr. NORRIS. Mr. President, I desire to suggest another amendment that I think ought to be made to the joint resolution.

In section 2, which has been made section 6, the joint resolution provides that the Secretary of War shall be authorized to enter into contracts for the sale of power for terms not exceeding 10 years from the 1st day of January, 1929. By adding to the joint resolution the Caraway amendment we have made it necessary for experiments to be made with the cyanamide process that may take a year or two; I do not know just how long. They may not take that long, and they may take longer. So it seems to me we ought to strike out the words "from the 1st day of January, 1929," and leave the Secretary of War the authority to enter into contracts for a term not exceeding 10 years; and I offer that amendment.

Mr. HEFLIN. Mr. President, did the Senator from Arkansas [Mr. CARAWAY] hear the suggestion?

Mr. CARAWAY. Yes, sir; I heard it.

Mr. HEFLIN. Is that satisfactory?

Mr. CARAWAY. That is all right.

The VICE PRESIDENT. Without objection, the amendment of the Senator from Nebraska will be agreed to.

The VICE PRESIDENT. The joint resolution is still before the Senate as in Committee of the Whole and open to amendment. If there be no further amendment to be proposed, the joint resolution will be reported to the Senate.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading and was read the third time.

The VICE PRESIDENT. The joint resolution having been read three times, the question is, Shall it pass?

Mr. HEFLIN and other Senators called for the yeas and nays, and they were ordered.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. LA FOLLETTE (when Mr. BLAINE'S name was called). I desire to announce that my colleague [Mr. BLAINE] is paired with the junior Senator from Utah [Mr. KING] on this vote. If my colleague were present, he would vote "yea."

Mr. BRATTON (when his name was called). I have a general pair with the junior Senator from Indiana [Mr. ROBINSON]. In his absence, I withhold my vote. If permitted to vote, I should vote "yea" on the passage of the joint resolution.

Mr. BROUSSARD (when his name was called). Making the same announcement as before, I withhold my vote.

Mr. FESS. (when his name was called). I have a pair with the Senator from Michigan [Mr. FERRIS], which I transfer to the senior Senator from Massachusetts [Mr. GILLETT], and vote "nay."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT], which I transfer to my colleague [Mr. TRAMMELL], and vote "yea."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. He being absent, I withhold my vote. If permitted to vote, I would vote "yea."

Mr. SMITH (when his name was called). I have a general pair with the senior Senator from Indiana [Mr. WATSON], which I transfer to the senior Senator from Montana [Mr. WALSH], and vote "yea."

Mr. TYSON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how the Senator from West Virginia would vote, I withhold my vote. If permitted to vote, I would vote "yea."

The roll call was concluded.

Mr. JONES. I desire to announce the necessary absence of the Senator from New Hampshire [Mr. KEYES], the Senator from Maine [Mr. GOULD], the Senator from Massachusetts [Mr. GILLETT], and the Senator from Oklahoma [Mr. PINE]. If present, these Senators would vote "nay."

Mr. KING. I have a pair with the junior Senator from Wisconsin [Mr. BLAINE], which I transfer to the senior Senator from Missouri [Mr. REED], and vote "nay."

The result was announced—yeas 48, nays 25, as follows:

YEAS—48

Ashurst	Fletcher	La Follette	Sheppard
Barkley	Frazier	McKellar	Shipstead
Black	George	McMaster	Simmons
Borah	Glass	McNary	Smith
Brookhart	Gooding	Mayfield	Steiwer
Capper	Harris	Neely	Stephens
Caraway	Hayden	Norbeck	Swanson
Copeland	Heflin	Norris	Thomas
Couzens	Howell	Nye	Wagner
Cutting	Johnson	Ransdell	Walsh, Mass.
Deneen	Jones	Robinson, Ark.	Waterman
Dill	Kendrick	Schall	Wheeler

NAYS—25

Bayard	Edwards	King	Shortridge
Bingham	Fess	McLean	Steck
Blease	Gerry	Metcalf	Tydings
Bruce	Greene	Oddie	Willis
Curtis	Hale	Phipps	
Dale	Harrison	Reed, Pa.	
Edge	Hawes	Sackett	

NOT VOTING—21

Blaine	Goff	Pittman	Walsh, Mont.
Bratton	Gould	Reed, Mo.	Warren
Broussard	Keyes	Robinson, Ind.	Watson
du Pont	Moses	Smoot	
Ferris	Overman	Trammell	
Gillett	Pine	Tyson	

So the joint resolution was passed, as follows:

Senate Joint Resolution 46, Seventieth Congress, first session

Joint resolution providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes

Resolved, etc., That the Secretary of War is hereby empowered and directed to complete Dam No. 2 at Muscle Shoals, Ala., and the steam plant at nitrate plant No. 2, in the vicinity of Muscle Shoals, by installing in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he shall be satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

SEC. 2. The Secretary of Agriculture is hereby authorized and directed, within the limits of appropriations made by Congress from the fund hereinafter provided for or from the Treasury of the United States—

(a) To construct, maintain, and operate experimental or production plants anywhere in the United States for the manufacture and distribution of fertilizer or any of the ingredients comprising fertilizer;

(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program;

(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce;

(d) To contract with said farmers and farm organizations to pay the special costs and losses, if any, sustained by them as a direct result of such large-scale use of the new fertilizer or fertilizer practices during the initial or experimental period of their introduction;

(e) Whenever the Secretary determines that it is commercially feasible to produce any such fertilizer, it shall be produced in the largest quantities practicable, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act; and

(f) The Secretary is authorized to make alterations, modifications, or improvements in existing plants and facilities and to construct and operate new plants and facilities in order to effectuate properly the provisions of this section.

SEC. 3. The Secretary of Agriculture in carrying out the purposes of this act shall locate a fertilizer plant in the vicinity of Muscle Shoals in Alabama and there shall be turned over to him the nitrate plant together with the steam plant at nitrate plant No. 1 connected therewith and such other buildings, houses, and shops there located as shall be necessary for the Secretary and his employees in the construction and maintenance and operation of such plants; and, when such fertilizer plant is thus located and established in the vicinity of Muscle Shoals, all the power necessary for the requirements of said plant shall be supplied from said steam plant located at nitrate plant No. 2 or from Dam No. 2.

SEC. 4. (a) The Secretary of Agriculture is authorized and directed to utilize nitrate plant No. 2 for experiments in the production of fertilizers by the use of the cyanamide process, to determine whether it is or is not commercially feasible to produce fertilizers by such process. If the Secretary of Agriculture determines that it is commercially feasible to produce fertilizers by the cyanamide process, then such plant shall be used for the production of fertilizers by such process in the largest quantities practicable and the fertilizers so produced shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor and effectuate the purposes of this resolution. In the utilization of nitrate plant No. 2 the Secretary of Agriculture shall avail himself of power in the same manner as provided in section 8.

SEC. 5. Revenue obtained from the sale of fertilizer or fertilizer materials shall be paid into the Treasury of the United States and shall become a part of the special fund hereinafter provided.

SEC. 6. The Secretary of War is hereby empowered and authorized to sell the surplus current not used in fertilizer operations and for operation of locks and other works generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies hereinafter set forth, and to carry out said authority the Secretary of War is authorized to enter into contracts for such sale for a term not exceeding 10 years, and in the sale of such current by the Secretary of War he shall give preference to States, counties, or municipalities purchasing said current for distribution to citizens and customers.

SEC. 7. It is hereby declared to be the policy of the Government to distribute the surplus current generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

SEC. 8. In order to place the Secretary of War upon a fair basis for making such contracts and for receiving bids for the sale of such current, he is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such current, to construct, lease, or authorize the construction of transmission lines within transmission distance in any direction from said Dam No. 2 and said steam plant: *Provided*, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the Secretary of War is hereby authorized and directed to contract with such State, county, municipality, or other organization, or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case the Secretary of War shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the Secretary of War for such electricity: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the Secretary of War shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, he shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the Secretary of War and such distributor of electricity shall be declared null and void and the same shall be canceled by the Secretary of War.

SEC. 9. The money received by the Secretary of War for the sale of such current, after deducting the cost of operation, maintenance, depreciation, and the cost of constructing transmission lines, if any shall be paid into the Treasury of the United States, and the same shall be segregated and set aside as a special fund for developing,

manufacturing, and introducing improved fertilizers and fertilizer practices for the purpose of reducing the cost and increasing the efficiency and use of fertilizers on American soils.

SEC. 10. Both the Secretary of War and the Secretary of Agriculture shall report in detail to Congress, on the first Monday in December of each year, their operations under this joint resolution.

SEC. 11. In order that the Secretary of Agriculture may not be delayed in carrying out the program authorized herein the sum of $10,000,000 is hereby authorized to be appropriated for that purpose from the Treasury of the United States.

SEC. 12. The Government of the United States hereby reserves the right, in case of war, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but if this option is exercised by the Government, it shall pay the reasonable and fair damages that may be suffered by any party whose contract for the purchase of current is thereby violated.

Passed the Senate March 6 (calendar day, March 13), 1928.

RETIREMENT OF DISABLED EMERGENCY OFFICERS

Mr. TYSON. Mr. President, I move that the Senate proceed to the consideration of Senate bill 777, making eligible for retirement, under certain conditions, officers and former officers of the Army of the United States, other than officers of the Regular Army, who incurred physical disability in line of duty while in the service of the United States during the World War.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

ADJOURNMENT

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and the Senate (at 5 o'clock and 50 minutes p. m.) adjourned until to-morrow, Wednesday, March 14, 1928, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

TUESDAY, *March 13, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Still, still with Thee, our blessed Father in Heaven. At the break of a new day dawns the consciousness that Thou art still our refuge and strength! With our tendencies, our failures, and our sins, Thou dost never leave nor forsake us. Through the light of day and through the dark of night, when the sense of our beings is lost in sleep, Thou art our guardian angel! Hold before us and above our approaching footfall the light of Thy Holy Word: "Who shall ascend into the hill of the Lord and who shall stand in His holy place? He that hath clean hands and a pure heart." O help us especially in our unguarded moments. Give us faith in Thee that shall hold us strong, hope that shall keep us steadfast, and a love that shall make us a blessing to all. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate disagrees to the amendments of the House of Representatives to the bill (S. 2317) entitled "An act continuing for one year the power and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes," and requests a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. WATSON, Mr. COUZENS, Mr. FESS, Mr. PITTMAN, and Mr. DILL to be the conferees on the part of the Senate.

CALL OF THE ROLL

The SPEAKER. Under the order of the House the Chair recognizes the gentleman from Ohio [Mr. BRAND] for 30 minutes.

Mr. BLANTON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point of order that there is no quorum present.

Mr. TILSON. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 47]

Allen	Dickinson, Mo.	Kiess	Sabath
Anthony	Douglas, Ariz.	Kindred	Sanders, N. Y.
Bankhead	Dowell	Kunz	Schneider
Beck, Pa.	England	Larsen	Sears, Fla.
Boies	Englebright	Leatherwood	Sirovich
Britten	Estep	Magrady	Snell
Browne	Fulbright	Major, Mo.	Spearing
Buckbee	Gallivan	Manlove	Stobbs
Burdick	Golder	Mead	Strother
Campbell	Goldsborough	Michaelson	Sullivan
Carley	Graham	Montague	Sweet
Celler	Green, Iowa	Moore, N. J.	Taylor, Tenn.
Christopherson	Hall, Ill.	Nelson, Mo.	Tillman
Cole, Md.	Harrison	Nelson, Wis.	Tinkham
Combs	Hastings	Norton, N. J.	Treadway
Connally, Tex.	Haugen	O'Connor, N. Y.	Updike
Cramton	Igoe	Palmer	Vinson, Ky.
Crowther	Jacobstein	Porter	Wason
Curry	Jenkins	Pratt	Williams, Mo.
Davenport	Johnson, S. Dak.	Quayle	Wyant
Davey	Kendall	Rathbone	Yates

The SPEAKER. Three hundred and forty-nine Members are present, a quorum.

Mr. TILSON. Mr. Speaker, I move to suspend further proceedings under the call.

The SPEAKER. The gentleman from Connecticut moves to suspend further proceedings under the call. The question is on agreeing to that motion.

The motion was agreed to.

The SPEAKER. The gentleman from Ohio [Mr. BRAND] is recognized.

THE REPUBLICAN PRESIDENTIAL PRIMARY IN OHIO

Mr. BRAND of Ohio. Mr. Speaker and Members of the House, it seems difficult to get the floor when one's opponents do not want to hear some truth. I think there are quite a number of Republicans on this side who do not think it is wise or profitable to discuss the candidates that are running for the Presidency. I thoroughly agree with those men who believe that way. When my colleague [Mr. BURTON] invited Mr. Hoover to come into our State and contest the delegation I said then that that was a serious mistake, and I never have had occasion to change my mind since.

I know something about Ohio, and we have had a governor only twice in the last 16 years on account of contests in primaries, and Mr. BURTON knew that when he invited this contest; and after a contest is invited the discussion of the candidates is inevitable, because there is nothing else to discuss. They belong to the same party—all the candidates—and their principles ought to be the same, so that there is nothing to discuss except the candidates. So that I think my colleague [Mr. BURTON] has invited this, and I do not want him to be disappointed. [Laughter.]

I am informed from within and without the Department of Commerce that that department is now honeycombed with politics; that that department is not functioning to-day up to 75 per cent of efficiency on account of the political conditions. We in Ohio are not much surprised at that, because we have seen Mr. Hoover come out into Ohio and pick up an ex-political city boss and bring him down here and make him Assistant Secretary of Commerce, next in position to himself; and then we have watched this man—Mr. Brown—and he has become the active campaigner in Ohio and in Washington and in New York for Mr. Hoover, who is spending about a third of his time in Ohio and the rest of it here. He was recently over in New York, and I can see that if the First Assistant Secretary of Commerce is actively engaged in this campaign all the time the other officials in the department—and still down to stenographers and maybe the bootblacks—feel that that is what the chief wants. And I am told upon reliable authority that all the officers all over this broad land that belong to the Department of Commerce are now means to the end of nominating Herbert Hoover. [Applause and laughter.]

I say that that is using the money out of the United States Treasury for the purpose of a private political campaign. [Applause.] And I want to suggest to the President of the United States that it is now time that the resignation of Herbert Hoover as Secretary of Commerce be accepted [applause] on the ground of economy [laughter] and on the ground of fair play to the other candidates who can not help themselves to the Treasury. [Laughter.]

There is a great cause at stake in this nomination of a candidate on the Republican ticket for the Presidency of the United States.

Agriculture is making a gigantic struggle for equality and she must have a President sympathetic with her need. In other civilizations agriculture has succumbed and taken a lowly place. Is that to be the destiny of the American farmer and his family?

Mr. Hoover has been the supreme opponent of agricultural prosperity for the past 10 years. He came back to this country in 1917 because the English nation wanted him to come here and secure cheap food for them and the Allies, which he succeeded in doing at the expense of the American farmer.

Mr. Hoover represents those who have been against all practical relief measures. All of the other candidates for the Presidency on the Republican ticket will go the limit in making the tariff actually apply upon agricultural products. Mr. Hoover's only suggestion has been to let farm prices stay low until the farmer leaves the farm.

This policy fills the city with farm labor and is to-day making serious trouble for labor in industry. However, Mr. Hoover's policy secures cheap food and cheap labor for industry.

Under the circumstances, agriculture and labor should see that Mr. Hoover is not nominated.

THE OHIO PRIMARY AND THE CANDIDATES

I have just been in Ohio, and there is a real primary battle going on there between Senator WILLIS and Secretary Hoover. I did not see any Republicans who looked very happy over the situation, but you can tell a Democrat anywhere in the State by the width of his face, which is constantly now reflecting a broad grin.

"Misery loves company," and the Democrats feel that we are getting into the same party situation that they have endured, and the prospect of Hoover as a candidate for the Republican Party seems to be satisfactory to the Democrats in Ohio.

On the street corners and in the lobbies, offices, and stores we find Republicans arguing with each other as to whether Mr. Hoover is or is not a Republican, arguing as to whether he is or is not in favor of the League of Nations, discussing as to whether he is or is not in favor of the protective tariff, contending as to whether he has lived in this country long enough to be eligible as President of the United States, and then some farmer drops into the crowd and asks, "Well, you do not expect a farmer to be for Herbert Hoover, do you?" So—the argument goes on and the Democrats laugh.

In Ohio the opposition to Senator WILLIS, especially the wets, flocked to Hoover as soon as he came to Ohio as a candidate. However, a study of Mr. Hoover's career and his political attitude has not had a good effect in Ohio upon his followers. Gradually, their conviction grows that Mr. Hoover does not ring true as a Republican.

IF YOU WANT WILLIS, DAWES, OR LOWDEN—VOTE FOR WILLIS

Those who are opposed to Senator WILLIS and not satisfied with Secretary Hoover are looking around and beginning to see that the nomination of Mr. DAWES or Mr. Lowden might be achieved by voting for Senator WILLIS and would surely be defeated by voting for Secretary Hoover.

Thus the friends of Vice President DAWES and the friends of Governor Lowden are adding themselves to the strength of Senator WILLIS, and Senator WILLIS has great strength in Ohio. Always the shouting is over some one else, but the quiet vote in the State is true to him on election day. Senator WILLIS has been honored more by Ohio voters than any living man.

IS HOOVER A REPUBLICAN?

The question as to whether Secretary Hoover is a Republican is one of the interesting questions in Ohio. Mr. Hoover left this country when he was 22 or 23 years of age and stayed out of the country practically all of the time until 1917 which amounted to some 20 years and was occupied principally in China and in England in the mining business as an engineer and promoter. He returned to the United States in 1917 and became Food Administrator under the Wilson administration and actively supported the policies of that Democratic administration including the League of Nations, and demanded that a Democratic Congress be elected to support President Wilson and his policies.

Two years later, in 1920 the leaders of the Democratic Party thought of him as a successor to Woodrow Wilson and a meeting was held in New York City of these leaders for the purpose of determining upon his candidacy.

On January 24, 1920, the New York American printed on its front page a statement giving the names of the men who attended the luncheon at which was launched the candidacy of Mr. Hoover for President of the United States. The New York American published also the pictures of these men who were there; Ralph Pulitzer, owner of the World; Frank I. Cobb, editor of the World; Viscount Edward Grey, British ambassador to the United States, and next to him Herbert C. Hoover; then Col. Edward M. House, President Wilson's right-hand man; Cleveland H. Dodge, Wall Street financier, and Cyrus H. K. Curtis, Philadelphia publisher.

Mr. NEWTON. Will the gentleman yield?

Mr. BRAND of Ohio. I believe I will not.

Mr. NEWTON. Does the gentleman mean to say that Mr. Hoover was there?

Mr. BRAND of Ohio. His picture is on this page in the paper. There was also a meeting here in Washington of one of the Southern States with their Representatives and Senators for this same purpose at about this time.

During the primaries of 1920, Mr. Hoover's name was on the ballots of the Democratic Party in several of the States and in March he carried the State of Michigan on the Democratic ticket. The vote was as follows:

Hoover, 24,046; McAdoo, 18,655; Bryan, 17,954; Edwards, 16,642; Palmer, 11,187.

It is apparent then, that Mr. Hoover was the choice of leading Democrats as a successor to Woodrow Wilson in 1920. It is a fact that he ran in 1920 in several of the States on the Democratic primary ticket, and it is also a fact that in 1918 when he was Food Administrator he urged the election of a Democratic Congress to support President Wilson in the following language:

My own views are summarized in a word: That we must have united support for the President. I am for President Wilson's leadership not only in the conduct of the war but also in the negotiations of peace, and afterwards in America's burden in the rehabilitation of the world.

[Applause.]

In February, 1920, Mr. Hoover was uncertain whether he was a Democrat or a Republican. He said:

I am being urged by people in both parties to deliver my allegiance to either one or the other. Until it more definitely appears what the party managers stand for I must exercise a prerogative of American citizenship and decline to pledge my vote blindfold. I am not unappreciative of the many kind things that my friends have advanced on my behalf. Yet I hope they will realize my sincerity in not tying myself to undefined partisanship. I must vote for the party that stands for the league.

IS MR. HOOVER FOR THE LEAGUE OF NATIONS?

Now, is Secretary Hoover in favor of any of the Republican policies? In 1920 the people of the United States voted their conviction relative to the League of Nations and a majority of 7,000,000 votes were cast for the Republican ticket elected upon a platform against the United States entering into the League of Nations.

What was Secretary Hoover's position on the League of Nations? First, as I have shown, he was for the election of a Democratic Congress to support President Wilson and his policies.

In a speech in California in 1919 at Stanford University he said:

If the League of Nations is to break down, we must at once prepare to fight.

Again:

The peace treaties can not be carried out without the league. If the league falls, the treaties also fall.

The Sacramento Bee on that day said:

Herbert Hoover in an address delivered at Stanford University before an audience of faculty and students of the university and townspeople, declared himself in favor of the League of Nations. The former Food Administrator's speech was an appeal to the people of the United States to uphold the peace treaties and the League of Nations covenant without reservations.

Mr. Hoover made other speeches on the subject of the league and is quoted in the New York Times of July 28, 1919, in these words:

Without a league of nations to guide the republics, Europe will go back to chaos.

During the last eight years there has been no evidence offered that Mr. Hoover changed his position on this subject.

IS MR. HOOVER IN FAVOR OF THE TARIFF?

Nobody knows.

I have not found anybody who knows, and I have sought diligently to find them.

The fact that he did not know when he came back to this country in 1917 whether he was a Republican or a Democrat is indicative that his convictions are not very strong on the subject of the tariff, and we might, by electing Mr. Hoover, be electing an out-and-out free trader.

He lived in free-trade England for 20 years and his whole career was developed under that environment.

Is it necessary for the Republican Party to pick a standard bearer who was a Democrat in action and principle only eight years ago and has given no evidence of any real change since?

IS MR. HOOVER ELIGIBLE UNDER THE CONSTITUTION FOR PRESIDENT?

Now, as to Mr. Hoover's citizenship. The Constitution of the United States undoubtedly intends that a candidate for President should be a resident of the United States for 14 years previous to becoming President. Mr. Hoover's home in 1917 is given in "Who's Who" as Redhouse, Hornton Street, London, England; so that he has had his home in the United States during the last 11 years only, and this raises a real question as to his eligibility in the minds of many constitutional lawyers. On the 8th day of May, 1917, he—Mr. Hoover—was testifying before a Senate committee, and under oath said:

My name is Herbert C. Hoover and I am at present in the Willard Hotel, this city, which is my only residence now.

When did you arrive—

He was asked.

I arrived here on Thursday.

That is when he came here from his 20 years of life abroad in 1917. He had no home or residence to go to in America except a hotel.

But a year or two later he began to think he had had a home in California all the time.

On page 689 of the hearings before the subcommittee on Manufactures, United States Senate, Sixty-fifth Congress, second session, pursuant to Senate Resolution 163, a resolution directing the Committee on Manufactures to investigate the causes of the shortage of coal and sugar, the following colloquy occurred:

Senator VARDAMAN. Your home is in California?

Mr. HOOVER. Yes.

Senator VARDAMAN. Are you a qualified elector there?

Mr. HOOVER. I do not know that I am at the moment, because I have been away on public work for three years.

Senator VARDAMAN. Have you ever voted there?

Mr. HOOVER. I do not think so.

Senator VARDAMAN. Have you ever voted in the United States?

Mr. HOOVER. I do not believe (recollect) that I ever voted in anything else than purely local matters, because I have been in a profession that kept me moving about the United States and elsewhere, so that I was not settled enough at any one time.

Senator VARDAMAN. You have spent more time in England in the last 20 years than you have in the United States, have you not?

Mr. HOOVER. I should imagine in aggregate; yes.

Of course, Mr. Hoover could not have voted in purely local matters unless he voted in California, and he stated that he had never voted there.

So we have a candidate for President who lived until he was forty-odd years of age without taking enough interest in the problems of his country to cast a vote. It is true he was seldom at home, but the rest of us deem it a patriotic duty to use an absent voter's ballot under such conditions. This testimony was taken about 10 years ago, and Mr. Hoover had gone two-thirds of his adult life without voting.

Mr. BARBOUR. Will the gentleman yield for a correction?

Mr. BRAND of Ohio. For a correction, yes.

Mr. BARBOUR. I want to say to the gentleman that in California at that time we did not have an absent voters' law. We have only had it for the last three or four years.

Mr. BRAND of Ohio. I thank the gentleman.

MR. HOOVER AGAINST AGRICULTURE FOR 10 YEARS

Now I come to the point which is probably of more importance in this presidential campaign than any other. The Republican Party has been divided about equally on the subject of farm relief or farm equality, and it has been hoped that the Republican Party could pick a candidate who would be satisfactory to both the East and the West. Mr. Hoover is not satisfactory to those who believe that the farmers are entitled to the tariff on their products just as industry secures the tariff on its products.

I have been personally in this study and struggle for the equality of agriculture with industry for the last five years in Washington and I believe that I know the officials who have been opposed and those who have been in favor of the farmer, and I say that it is very clear in my mind that if Mr. Hoover is elected President of the United States that agriculture is doomed to eight more years of misery.

I know that he has been against the McNary-Haugen bill, and I know that he has advised against it, and it is my opinion and belief that he has exerted himself more against it than any other public official.

HIS RECORD AS FOOD ADMINISTRATOR

This blocking of the prosperity of agriculture is not the first effort that Mr. Hoover has been guilty of against the farmer. When he came back from England, at the request of the President, Mr. Wilson, to take charge of the food administration, he determined upon a policy of holding down the price of farm products. This has been disputed more or less, but I have taken the trouble to look up his record on the subject, and I find that in testifying he states his ideas relative to the food administration very clearly. Here is the testimony:

MR. HOOVER ADMITS WHOLE SCHEME TO REDUCE PRICES OF FARM PRODUCTS

The reaction of Europe has raised our prices for farm products above an endurable level and will, if we do nothing, raise them still higher for their need grows yearly. By our entry into the war we arrived at two issues: (1) The issue must have partially fronted us in any event, the control of our food so as to ameliorate prices. (2) That we may also meet the increased demands of our allies.

Again I find when the food control bill was being considered in the Senate of the United States, Senator Phelan, of California, in defending Mr. Hoover, stated as follows:

It is only to prevent excessive charges, speculative prices, that he is to act as Food Administrator.

I find also in the debate the following from Senator Phelan:

I have heard him [Mr. Hoover] debate in conversation with a Member of this body whether it would not be better to fix a price of $1.50 for wheat rather than $1.25, and he [Mr. Hoover] favored the larger amount.

The Congress, however, made the minimum price of wheat not less than $2 per bushel instead of $1.50 as advocated by Mr. Hoover.

In the administration of this law the President then appointed a wheat-price committee which determined what the minimum was to be. The Congress had said it was to be not less than $2 and that wheat-price committee made the minimum price $2.20 Chicago. It has been claimed by various individuals that this $2.20 was a maximum price, but I challenge anyone to find a place in the law which authorizes anyone to make a maximum price or any price other than a guaranteed minimum price. There has been an attempt made to excuse Mr. Hoover on the grounds that this committee made this $2.20 price, and made it a maximum price, thus taking it out of the hands of Mr. Hoover to permit any higher price than $2.20. Mr. Hoover will not be able to hide behind the skirts of this committee or of the war President, Mr. Wilson, because this committee merely recommended a minimum price because they had no authority to make a maximum.

Now, you might be interested in knowing what the real market value of wheat was at that time, and I will now quote from the Wheat Pit, by James A. Patten, one of the biggest board of trade dealers in Chicago. Wheat had been bringing about $3.25 per bushel.

Mr. Patten turned to Mr. Kline, Government attorney, and their conversation follows:

Mr. PATTEN. What price do you predict wheat will go to?

Mr. KLINE. I think it will go to $8.

Mr. PATTEN. It will go higher than that if we do not take some action.

The action that was actually taken was the appointment of Mr. Hoover as food administrator and the passage of the food control act, which at the same time made a minimum price on wheat. Following this, in order to hold wheat down to the minimum price, Mr. Hoover stopped all future trading on the board of trade in wheat, thus making it impossible for the board of trade to raise the price above the minimum price.

In addition to this, all of the buyers of the world for all of the foreign countries were concentrated into one buying agency so that there would be no competition in bidding up the grain available in the United States.

With all this arrangement perfected, the price of the farmers' wheat was held down to the minimum prescribed of $2.20 when it would have gone to $8 or $10 per bushel, according to J. A. Patten, the largest grain dealer of that time. And remember, too, that all of the products of the farm would have lined up with wheat at the higher level just as they did line up with wheat at the lower level. There was no provision in the law which required or authorized Mr. Hoover to hold wheat down to the minimum.

I have seen it argued in Mr. Hoover's defense that the farmer was under obligation to him for securing a price as good as

$2.20 for wheat, and if it had not been for his efforts the price might have gone down to perhaps as low as 75 cents.

Of course, we all know that the law required the Government to buy at the minimum price; but here is some testimony given by Mr. Hoover himself on March 4, 1918, at a conference of grain dealers with the United States Grain Corporations, reported in the Modern Miller, in which he says:

I agree with the contention of some farmers that they would be getting $5 and perhaps $10 per bushel for their wheat had it not been for the restraint imposed by the Government.

That is, if there had been a free supply and demand market, wheat would have been $5 or $10 per bushel.

Since the war the farmer has taken the supply and demand price for his products, and he should have had the supply and demand price during the war in order that he might have had a living average.

On the other hand, Mr. Hoover did permit the bakers of the United States to sell bread to the American people at just about twice the price bread was sold at in France, Italy, and England, made out of American wheat.

So in America both the producer and the consumer were mistreated.

Who was benefited by this holding down the price of the wheat of the farmers in the United States to one-fourth of what it would have brought on a supply and demand market? It has been shown that the consumer did not benefit in the United States but if you will think it out you will find that the ones benefited were over in Europe. England got her wheat and food supplies for the prices dictated by Mr. Hoover and England supplied the money that bought the food for all of the Allies.

It may be said that it was good statesmanship to make an arrangement of this kind. It may have been good international statesmanship and that is what we think; Mr. Hoover is an international statesman. It may have been good American statesmanship—that is debatable—but I say to you that there is not any ground upon which you can claim justice was done when you made the farmer pay the whole bill. If this was an obligation to furnish cheap food to the Allies of the United States, then, the United States Treasury should have borne the burden and I ask the gentlemen from Ohio to tell the House why the farmers of America should have borne the whole burden. Mr. Hoover is the man who made the farmer bear all of this burden and he had no authority in law for doing so. Mr. Hoover did that for the benefit of the English.

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. BRAND of Ohio. Mr. Speaker, I ask unanimous consent to proceed for 10 additional minutes.

The SPEAKER. The gentleman from Ohio asks unanimous consent to proceed for 10 additional minutes. Is there objection?

Mr. HOCH. Mr. Speaker, reserving the right to object, I wonder if it would be in order, at the conclusion of the addresses by the two gentlemen from Ohio, for me to have a few minutes in which to place in nomination an unquestioned candidate for the Presidency, Senator CHARLES CURTIS of Kansas? [Laughter and applause.]

The SPEAKER. Is there objection?

Mr. CLARKE. Mr. Speaker, I have no objection if the same amount of additional time is afforded to the distinguished Senator from Ohio [Mr. BURTON].

Mr. BRAND of Ohio. Mr. Speaker, I will add that to my request.

The SPEAKER. The Chair believes it was the understanding of the House that if the time of the gentleman from Ohio [Mr. BRAND] were extended that an equal extension would be given to the other speaker.

Mr. ABERNETHY. Mr. Speaker, what has become of the request of the gentleman from Kansas? [Laughter.]

The SPEAKER. Is there objection?

There was no objection.

IF FARM PRICES HELD DOWN, WHY NOT OTHER PRICES?

Mr. BRAND of Ohio. There were other scarcities during the war other than food. Ships were scarce to take food across the water. Was there any attempt to hold down the cost of transporting that food after it was purchased at a cheap price from the farmer? None at all. Freight costs on transporting this food often exceeded the cost of the food. It was a common thing for the freight charges on the cargo to more than equal the value of a ship in which the goods were transported.

Munitions were likewise wanted as food was wanted. Were the prices of munitions held down to a minimum? How many of us know of millionaires who made their vast fortunes in a year in providing munitions during the days of the war? Do you know of any farmer who was allowed to become a millionaire in furnishing food for the Allies?

THE GREAT FARM CATASTROPHE

After the war was over 1921 came, with its great deflation in the prices of farm products, going down away below the prices before the war, and from that year until now we have been attempting in Congress to arrive at a definite remedy for the farm problem.

We have had no help from Mr. Hoover except this one statement, which seems to be his cure:

Generally, the fundamental need is a balancing of agricultural production to our home demand.

I understand this to mean a continuation of the policy of starving out acreage until we produce no more than the domestic markets will consume. This means, for example, half of our cotton production and a quarter of our wheat production must be eliminated. The Business Men's Conference, headed by Mr. Nagel, formerly Secretary of Commerce, reports that 2,000,000 farmers have left the farms every year, or 49 per cent of our farm population in seven years. But Mr. Hoover believes this must be continued, and he says:

The fundamental need is a balancing of agricultural production to our home demand.

I concluded then that there was no hope for agriculture through Mr. Hoover and I have been more and more convinced of the correctness of my conclusions as time has gone on.

REGULATED PRODUCTION UNDESIRABLE

It is generally agreed that as a remedy of the agricultural problem that the reduction of acreage is neither possible nor desirable.

A few days ago before the Agricultural Committee of the House there was testimony offered on the McNary-Haugen bill by the representative of organized labor in the United States. A Mr. Wallace gave some very interesting testimony which deals with Mr. Hoover's idea of doing away with the surplus in agricultural products, which the workingmen of this country look upon as their margin of safety. The testimony is as follows:

Mr. WALLACE. Mr. Chairman and gentlemen of the committee, my name is Edgar Wallace, representing the American Federation of Labor.

When I appeared here a year and a half ago and on previous occasions I stated that it was our apprehension that we were afraid that unless the farmers were placed in a position where they could be paying consumers, we, the industrial workers, would be thrown out of employment. I point out that there was partial unemployment, just a small proportion of our people who were unemployed at that time, and I stated then that recognizing that this country can not continue to run with a great portion of our people unable to buy, that we, as workers, were willing, if necessary, to pay a little more for our food products in order that our customers, the farmers, might be placed in a position to employ us in turn.

I am sorry to say, Mr. Chairman, that what I apprehended a year and a half ago is now a fact; that is, as we are sitting here to-day, 40 per cent of the workers of this country are idle because no man has hired them—oh, I do not mean that 40 per cent are totally unemployed—but between part-time employment and total unemployment, out of every 10 potential workers, 4 are idle to-day and every day, and this is growing, because, after all, when a man is idle, a working man, industrial worker, he ceases to remain a paying consumer.

Now, Mr. Chairman, I am a city dweller. The people I represent dwell in industrial communities. We feel that the surplus raised by the farmer is our margin of safety; that there may come a time when weather conditions, or because of the farmers' despair, might cause a scarcity of the things that we need. If the farmer's surplus is our margin of safety, I, for one, and the people I represent, are in favor of not permitting that very surplus that we need to be a menace to the farmers, to tear down their economic structure, or to make it so that a good crop to them is really less remunerative than a poor one.

Now, Mr. Chairman, we are in favor of the McNary-Haugen bill. We believe that in this bill is the only comprehensive plan that will safeguard the interests of the farmers and put them on a paying basis.

This ends Mr. Wallace's testimony and we now know that organized labor knows that agriculture must be prosperous in order that labor may be well employed.

The only opposition left to the McNary-Haugen bill seems to be those who say industry can not afford to have the tariff actually apply to agricultural products.

In other words, a few captains of industry, with Mr. Hoover as their major general, are obstructing any actual relief for agriculture. This condition in turn drives the farmers into

town and city in competition with factory labor; thus labor may lose all that it has gained in the past 25 years and I know of no one made happier except a few captains of industry made wealthier.

What the United States needs now is a President who can see agriculture and industry with equal vision. [Applause.]

Some day industry will know that farm prosperity will be as helpful to industry as labor prosperity has proved itself to be.

AS A SUMMARY

Ohio Republicans are asked to give up their time-honored custom of having a favorite son at the national convention; what for?

Why, to vote for a man whose public political record shows that he has acted and advised in harmony with Democracy.

A man who lived until he was 43 years of age without knowing whether he was a Democrat or Republican, and never had voted up to that time.

A man whose convictions on the subject of a protective tariff have never been developed, as evidenced by the uncertainty of his party affiliations.

A man who has advocated our entrance into the League of Nations without reservation.

A man who has lived abroad 20 out of his 30 years of adult life.

A man who held the price of farm products down during the war and has refused to lift them up by means of the McNary-Haugen bill.

A man whose business life must now be investigated; and the results bid fair to disqualify him.

Against him are Senator WILLIS, Governor Lowden, Senator WATSON, Senator CURTIS, Senator NORRIS, and Vice President DAWES.

All Republicans all their lives.

All Americans all their lives.

All voters all their lives.

All for the farmer and for industry on equal basis. I speak with knowledge of the views of each.

All against the League of Nations.

All for the tariff.

Mr. Hoover will be defeated in Ohio. [Applause.]

STATEMENT IN EXTENSION OF REMARKS AFTER THE SPEECH OF MR. BURTON

In reference to my letter to Secretary Hoover in 1925 that he be Secretary of Agriculture, which was read in the House to-day by Representative BURTON, I wish to say that I realized at that time that what was needed was the friendship and help of Mr. Hoover instead of his opposition. At about that time he had made statements indicating that he was leaning toward the solution of the agricultural trouble. If we could get him on our side, I realized that we might achieve success.

The SPEAKER. The time of the gentleman from Ohio has again expired. The gentleman from Ohio [Mr. BURTON] is recognized for 40 minutes. [Applause.]

Mr. BURTON. Mr. Speaker, I do not enjoy this discussion [laughter], neither do I approve it; but such an attack as has just been made must be answered. If we are to have honest, capable, public servants, they must be defended against vicious criticism. [Applause.]

The speech to which you have just listened abounds in incorrect assertions, in half truths, in statements and quotations made which ignore the context and the occasion. It is not the product of one brain [laughter and applause], for snoopers have been scouring the whole earth to find some flaw in the record of Herbert Hoover.

Why this attack? Why, it is because listening to the urgency of thousands of voters in Ohio, representing every phase of her citizenship, Mr. Hoover consented, somewhat reluctantly, to enter the primary against the favorite son. The favorite son made the allegation that such an entry was an indecency. [Laughter.] It was desired by him and his supporters that in easy tranquillity, with undisturbed peace, they, the heads of certain political organizations and a small army of Federal officials appointed on his recommendation, should dictate who were to be the delegates to express the choice of the State of Ohio. Against this the citizenship of the State of Ohio rebelled. [Applause.] They said, "We have a primary law; this question is too large to be left to a few political bosses. We have something to say about this ourselves, and we expect to assert our right on the 24th of April next."

I will take up somewhat in order the accusations made.

The intimation that Mr. Hoover might have voted in California by correspondence has already been answered, as it was only at the last session that such a right was given.

The story is revived in the speech to which you have just listened that Mr. Hoover was present at a luncheon early in 1920 with Ambassador Grey and others to determine who should be the presidential nominee of the Democratic Party. This fake was exposed within a very few days after this alleged meeting. Mr. Pulitzer, one of those who had been recounted as present, wrote this article to the New York Times:

The Philadelphia North American story, which the New York American reprinted to-day, is pure fake.

[Laughter and applause.]

It is true that I was present at a luncheon given by Colonel House. Lord Grey, Cleveland H. Dodge, and Cyrus H. Curtis were there also. Frank I. Cobb, the editor of the World, whose name appears with mine as having been present, was not at the luncheon. It was merely a social affair. Mr. Hoover's name was never mentioned in my hearing. Mr. Hoover himself was not present.

[Applause.]

Just how they got that inserted picture, I do not know, but I presume at some photograph gallery.

How poverty stricken must be the accusers of Mr. Hoover on this 13th day of March, 1928, when they must resort to such a discredited and untrue story. [Applause.]

Then it is said Mr. Hoover had not defined his attitude on the League of Nations and that he favored the league in 1919 and 1920.

Well, if you refuse eligibility to the Presidency for those who favored the League of Nations in 1920, you will reduce the number very materially. On the blacklist which you would create you would include the names of Chief Justice Taft, Charles E. Hughes, Elihu Root, Jacob Schurman, our ambassador to Germany, and a multitude of others of our best and leading citizens, and I commend to the gentlemen an examination of the list of presidential candidates whom he has named. Were not some of them in favor of the League of Nations in 1920? [Laughter and applause.]

Now, let us see what the facts are. Immediately upon the development of reservations by the Republican Members of the Senate, Mr. Hoover strongly supported them and has supported them ever since. [Applause.] On this subject he said on September 15, 1920, in a prepared statement published in the press:

I am glad to respond to your request for my views on the League of Nations controversy. I stand consistently for a League of Nations to minimize war; and, moreover, I stand for the league with alterations in the direction pointed by the Republican reservations.

He was in line in this regard with Presidents Harding and Coolidge, and with a majority of Republican Senators.

Membership in the league is not probable now, but that does not mean to leave out of consideration that in 1919 and 1920, when the dread of war rested with terrible weight on patriotic men here and everywhere, some were groping, others were praying, for a means by which the horrors of war might be avoided, and the League of Nations was in the forefront among methods to be adopted. We have not regarded it as a wicked institution. We have accepted the invitations of the league to be present at many conferences and to cooperate. For Europe it certainly has been a very beneficial institution, and Mr. Hoover was justified in saying that the danger of war would rest on Europe if it were not for some such organization as this.

Again he falls into the error of repeating the misrepresentation of Mr. Hoover's residence in the United States, which has been so repeatedly exploded in the press. He asserts Mr. Hoover was absent from America for 20 years of his adult life.

What are the facts? Except for two years prior to the war, I believe in 1907 and 1909, he was during some portion of each year at home in the United States. His neighbors have shown that for the last 19 years he has maintained a home in California on the campus of Leland Stanford University. There his two sons, now grown, were educated. This is an absolutely false accusation.

I may mention another incidental fact. Since the income tax law came into effect in 1913, every year Mr. Hoover has paid an income tax to the United States.

Now, people do not pay an income tax for amusement; they pay it when they regard themselves as residents of the jurisdiction in which the tax is imposed. The gentleman omits to mention the benefits that this country obtains by our engineers going abroad. They have introduced American methods, Ameri-

can equipment, and American machinery, and have greatly stimulated American trade. He omits to mention that Mr. Hoover, by his broad comprehension of international affairs obtained when he was an engineer in other countries, has been enabled as Secretary of Commerce to greatly expand American exports, and aid in the number of jobs for workingmen and returns to the American farmer during his term as Secretary of Commerce.

Again, my friend says that Mr. Hoover is not a Republican. Since 1909 he has been a member of the Republican Party in good standing. Mr. Calder, once a Member of this House and a Member of the Senate, has only recently said:

> Mr. Hoover is a member in good standing of the National Republican Club. He first joined the club in 1909, the same year that I did. The condition of membership in the club has always been membership in the Republican Party.
>
> No one will get anywhere by questioning the soundness either of Mr. Hoover's Republicanism or of his Americanism. Both are too well known to need any defense except a simple statement of the facts.

[Applause.]

But it is said that Mr. Hoover was voted upon in the Democratic primary in the State of Michigan. Let us recall the facts about this also. On February 21, 1920, Mr. Hoover was requested by the Democrats of Georgia to have his name entered as a candidate for the nomination for President. On February 26 he declined. On February 29 he was qualified in Michigan on both the Republican and Democratic tickets by the filing of petitions without his approval. That was the law of the State.

Against both entries Mr. Hoover protested. In April he received 22,000 votes on the Democratic ticket, which he led, surpassing McAdoo and other well-known Democratic candidates. But the gentleman from Ohio omits to state that he received 49,000 votes at the Republican primary in Michigan on the same day. [Applause.]

In the State of Ohio he received for the Republican nomination for President 10,467 votes, which were written in. Secretary Hoover refused to allow his name to be placed on the Democratic ticket in California and Oregon. Also he made a similar refusal in Massachusetts.

In the latter State he was asked, on April 10, if he would take the Democratic nomination, and he answered stating that he would not; but his name was entered by his friends in the Republican primary in California and he received over 200,000 Republican votes in that State. [Applause.]

Let me make a suggestion. As a good party man the gentleman ought to favor a candidate who can draw to himself so large a number of Democratic votes [laughter and applause], because it would be an advantage to his party in the time of election to gather not merely saints but sinners to our support. [Laughter.]

My colleague's intent was to represent Mr. Hoover as a Democrat because in the early part of 1920 he endeavored to avoid being dragged into a political wrangle. For this I honor him. He was conducting his noble task during the war on a nonpartisan basis, as it was his duty to do. He protested against being dragooned into party conflicts while he believed political activity would injure the work he had undertaken and which he was carrying on to the lasting glory of the American people. [Applause.]

It was stated in 1918 he favored the election of a Democratic Congress. That is not true, either. What he favored was the election of a Congress that would support the President, and that support included Republicans as well as Democrats. I believe there are now on this Republican side at least 50 Members who were candidates for election to this House of Representatives in 1918, who, notwithstanding the statement that he made in 1918, are friends of Mr. Hoover in this contest for nomination. [Applause.]

What he did favor was the election of a Congress to support the President in the terrible war that was pending. He knew that Germany and the Central Powers were exhausted and were seeking an armistice. He realized that if an election should occur in which the President, who was the target for the shafts of malice, and who stood for the United States in the colossal struggle, was discredited, new hope would be created in the minds of our enemies, and thus, as a patriotic American, he favored the President of the United States in the midst of this awful contest. Again, after the nomination of President Harding, when the contest for election was beginning and each man must take a stand, Mr. Hoover, in unequivocal statements, came out in favor of his election. He sent the following telegram to the presidential nominee:

JUNE 13, 1920.

Senator WARREN G. HARDING:

I hasten to tender you my most cordial personal congratulations on your nomination and on the great opportunity which it affords you to interpret the desires of the American people.

On June 19, 1920, he gave out a statement, as follows:

I need not reiterate my conviction that the constructive ability, so critically needed for the vigorous business reorganization of the Federal Government and to meet the many economic issues before us, lies in the Republican Party. For all these reasons I believe that those of us who look upon party organization not from the point of view of partisanship but solely from the point of view of its usefulness as an agency of maximum service to the country, should support the Republican Party at the polls.

For seven years he has been a member of the Cabinets of Presidents Harding and Coolidge, and has most cordially supported both in their policies. During this period he has made more speeches for the Republican Party than any other member of the present Cabinet.

On the 26th of October, 1926, in the gentleman's own district, in the city of Springfield, Ohio, he made an address widely circulated by radio, which was most forceful and effective, and which rings true in its genuine Republicanism. For this speech Senator WILLIS wrote a very strong letter of thanks, saying that it had contributed greatly to his election. [Applause and laughter.] So much for his Republicanism.

My colleague is totally mistaken about the action of the Food Administration. The gentleman from Ohio has not even taken the trouble to read the statements made by four great farm leaders of the country within the last three months, again restating that Mr. Hoover had no part in the determination of the price of wheat, and that the price was determined with their approval. No action was taken by Mr. Hoover which would affect the interests of the farmer except after submission to and approval by the agricultural advisory board, appointed by the Secretary of Agriculture, representative of every part of the farming community. It was not for him in his great position to go into every detail, such as the price of bread, and I might perhaps give a reason why the price of bread was higher in this country than abroad, but I shall not enter into a digression to state that. He was occupied with the great generalities of his task. The price of wheat was fixed for him to execute. I dismiss this idea that wheat ought to have been $8 or $10 a bushel. Do you think the people of this country would have stood for any such excessive price as that? It is true that pork on the hoof did go to 18½ cents a pound, and the price of farm products rose so that some farmers were made rich. Too many of them were infected with a speculative disposition, from which they have suffered ever since.

I sympathize with the plight of the farmer, but Mr. Hoover in the performance of his great office had to take into account the welfare of the consumers of the country as well as the producers, and if at any time he showed any partiality or any leaning it was for those who tilled the soil, the farmers of the country. The gentleman goes further and incorrectly states Mr. Hoover's present views. He does not recount the many most valuable services that Mr. Hoover and the Department of Commerce have rendered to agriculture. He makes the preposterous statement that Mr. Hoover has been against the farmer for the past 10 years—I do not know but he said 20 years. On an occasion in 1925, when Mr. Hoover was called before an agricultural commission appointed by the President, his sympathetic and constructive statement at that time was reported to the President by my colleague who has just spoken as the best analysis of the agricultural situation.

But it is said that Mr. Hoover has not been friendly to agriculture. On this subject I wish to read a letter from a Congressman of whom I will only say at present he is a prominent supporter of agricultural legislation in this House, and, Members of the House, I ask your special attention to this letter:

JANUARY 21, 1925.

DEAR SECRETARY HOOVER: I read your release of January 20 with a great deal of interest. You have the ideas that will put agriculture on its feet, and you have the confidence of the producers of the country of all kinds that would make your leadership easy.

Although some of my friends have suggested my name to the President as Secretary of Agriculture, I am inclined to go to the President and urge your appointment. I don't know of anybody who fits the place so well as you. It seems to me those under discussion have ex-

hausted themselves in the past without results and the need for you seems to be very great.

I am inclosing copy of a letter which I wrote the President a year ago, showing you how strongly your ideas impress me.

Mr. MADDEN. Could the signer of that letter by any chance be Mr. BRAND of Ohio?

Mr. BURTON. Wait a bit—look and listen! Who wrote that letter? CHARLES BRAND, a Member of Congress from the Seventh district of Ohio. [Applause and laughter.]

Mr. BRAND of Ohio. Mr. Speaker, will the gentleman yield?

Mr. BURTON. I prefer not to yield.

Mr. BRAND of Ohio. What is the date of that?

Mr. BURTON. January 21, 1925. [Laughter.]

I do not ask for an appeal from CHARLES drunk to CHARLES sober [laughter], or from CHARLES sober to CHARLES drunk [laughter], because I understand he is on the water-wagon all the while, and such an appeal would be inappropriate; but I do appeal to him to know whether he was right in January, 1925, or in March, 1928. [Laughter.]

There is something more here. He was willing to thrust aside the agricultural crown for himself, as his name had been suggested. Never a finer instance of self-abnegation since Julius Cæsar refused to accept a crown [laughter] at the feast of the Lupercal. He said in effect: "I do not want it, because you are the man." Because he thought Mr. Hoover the best and ablest friend of agriculture.

Then again, a few days later, he wrote:

JANUARY 27, 1925.

HON. HERBERT HOOVER,
Secretary of Commerce.

DEAR SECRETARY HOOVER: I have your favor of the 22d. I did see the President since I called on you and told him I thought he ought to insist on your accepting the position of Secretary of Agriculture.

Very truly yours,

CHARLES BRAND.

But, Mr. Hoover declined, stating he could be of more service to agriculture in the Department of Commerce.

My colleague makes the statement that for 10 years Mr. Hoover has been unfriendly to agriculture and that for five years, or since 1923, he has known who were the friends of the farmer and who were not. Did he not have all necessary information to decide this question in January, 1925, and what but partisan bitterness has changed his mind to-day? It should be noted that the work of Mr. Hoover as Food Administrator had been completed for more than five years before my colleague wrote his letter of January, 1925, setting forth the supreme qualifications of Mr. Hoover for the position of Secretary of Agriculture. Why should the severe criticism of that administration, which has just now been uttered, be brought forward at this late hour?

VIEWS ON PROTECTIVE TARIFF

He maintains that Mr. Hoover is not friendly to the protective tariff. To know that this is not a fact he only needed to read the planks of the Republican Party platform and the speeches of President Coolidge, both of which Mr. Hoover has warmly supported. He would also need only to read the many addresses Mr. Hoover has made on behalf of the Republican Party, favoring the tariff in various political campaigns, to know that this accusation was grossly incorrect. I quote an excerpt from an address by Mr. Hoover delivered at Topeka, Kans., October 26, 1926, at a Republican rally in support of the election of Senator CURTIS and Republican candidates for Congress:

No one can say that our farmer has not enjoyed higher prices for many of his products as the result of the duties collected upon $740,000,000 worth of imported agricultural products. And when our opponents discuss reducing the tariff they mean not alone reducing the tariff on cotton goods, steel, or typewriters, they mean also to reduce the tariff on wheat, on wool, on meat, butter, and flaxseed. I do not for one moment believe that the farmer wishes to abandon this great measure of protection. Moreover, our farmers are vitally interested in maintaining high standards of living amongst our workers in other industries than agriculture.

The sole market of the full stomach at home is better than the chance to compete for the stomach of the underfed worker abroad whose buying power is limited. How important this is, is shown by the record of consumption of agricultural products in the year 1921 when we were overwhelmed with unemployment and the buying power of our own workers was limited. In that year the American consumption of meats, fats, and other refined agricultural products dropped nearly 18 per cent, an amount greater than our total foreign market of agricultural commodities.

I also quote briefly from another address delivered by Mr. Hoover, at Duluth, Minn., on October 23, 1926, at a Republican rally, in which he elaborated upon the benefits of the present protective tariff law:

* * * I well recollect that at the time the tariff law was passed it was predicted it would destroy our foreign trade, yet under it our foreign commerce—both imports and exports—have steadily increased until they have reached the highest volume known in all the peace-time history of our country.

It was predicted that it would unreasonably increase prices, yet Government statistics show price levels of articles on the tariff free list have increased on average more than the price list of articles on the protected list.

It was predicted that under the increased tariff incentive to efficiency in industry would be decreased because of the lessening pressure of competition, but our country shows to-day that never in any period in any land has there been such a remarkable increase in industrial efficiency on the part of both employer and employees as has been witnessed in our country during the last five years.

It was predicted that the tariff law would retard American prosperity, but under it we have come into the fullest measure of prosperity that the world has ever witnessed.

It was predicted that this tariff law would make the rich richer and the poor poorer, but there was never in the whole history of the country so little poverty and so wide a diffusion of comfort as there is to-day.

HOOVER THE MAN—HIS ACHIEVEMENTS

Mr. Speaker, I shall make no extended encomiums on Mr. Hoover. In paraphrasing a great oration delivered in this Capitol 98 years ago, I may say "He needs none." The world knows his record by heart. No one living has, with the magic touch of efficiency and humanitarian purpose, had to do with a larger number of notable accomplishments, domestic and international.

Whenever a competent administrator has been needed, whether at home or abroad, whether in the flood-stricken regions of the Mississippi Valley or the hills of Vermont, his name has been the first to be suggested.

If party antagonism or personal animosities may cause attacks upon him, if the violence of faction shall question his record, it nevertheless stands secure. If the arrows of defamation are aimed at him, they will fall harmless at his feet. And whenever that record is questioned or his deeds forgotten it will be a sad day for America, for it will then appear that achievements which give glory to the American name lack appreciation and may be smothered by the voice of party strife or personal jealousy. [Applause.]

Let us consider the case of Belgium—like the Niobe of nations there she stood, childless and crownless in her voiceless woe. In the "fields where poppies grow" the graves of the dead were thick, trampled down by the heel of the invader. The gaunt specter of famine and disease spread over the land. Hope was lost. There was anguish among the women and children, but their tears could not number the dead. On this occasion there was one who took charge with a firm hand and brought aid from friend and foe. He fed the famishing; he provided shelter for the homeless, succor for the sick; he lifted up the heads of the broken hearted and brought them from despair to hope and life. Who was this? It was an American—Herbert Hoover.

After the armistice he again intervened for the healing of the terrible wounds of the war. With organization after organization he compassed 22 nations in a battle against suffering and sorrow, anarchy and disorder. Literally, 10,000,000 of human beings are alive to-day who otherwise would have been engulfed in the greatest catastrophe which the world has ever known. And has not all America gloried in this manifestation of her efficiency and her idealism? And is this not the answer to every challenge of the lack of Americanism?

This is the candidate presented to the people of Ohio and the country.

I commend to my colleague's attention a vote deliberately taken in the town of Ravenna, in the county of Portage, last Friday evening, one of the strongholds of the favorite son, a dry county, and having a rural population. In that vote 116 expressed their personal preference for Herbert Hoover and 53 for FRANK B. WILLIS. [Applause.] I think this expresses the sentiment of the people of the State of Ohio.

I am myself a candidate for delegate at large. I may be defeated. If so, I shall go down in a good cause and for a good man. I shall go down believing that the question of the

selection of a presidential candidate is not to be determined by local considerations or even by personal partiality, but with that broader vision which looks the country over and selects the most capable, the most competent, and most available man. [Applause.]

I should have been able, if time had permitted, to give a more adequate account of the remarkable achievements of a life of extraordinary activity on behalf of the American people, in the benefits of which many nations have shared. I hope to extend my remarks with a summary of these accomplishments.

I deplore this unprecedented attack to which I have listened. It does not seem to me appropriate in this forum. I regret its presentation in this House. I commend to my good colleague a more careful consideration of the questions pertaining to the presidential primary and presidential qualifications. Who is his candidate anyway? Is he for Senator WILLIS, who stood up and voted against the McNary-Haugen bill, which he has just now eulogized in this House? [Applause.] Or is that candidacy a smoke screen for some other candidate who favors the McNary-Haugen bill? [Applause.] I hope he will experience a revival of his better self, as illustrated by his letter of January, 1925, and may I not indulge in the hope that when his bitterness of feeling is allayed he may yet see the light more clearly and recognize that so unjust an attack on a man who is quietly, efficiently, and faithfully doing his duty is vicious and unworthy of himself.

On the subject of political activities in the Department of Commerce, I read an order that was issued by Secretary Hoover on January 27, 1928:

MEMORANDUM TO BUREAU HEADS

It is possible that out of zeal and personal loyalty, some of the members of your bureau are engaged in political activities. While I have had no specific complaints, I feel that it is desirable that you pass out the word cautioning all employees against any possible action of this character.

HERBERT HOOVER.

What of the great number of postmasters, of internal revenue collectors, and of United States marshals who are working night and day for the favorite son in the State of Ohio? If their activities were to be removed, the advocates of Mr. Hoover in the State might go to sleep and sleep until the 24th of April with absolute confidence of victory.

In conclusion I appeal to the House and the country for that fair play which should be granted alike to those in high official station as well as to those who dwell in the ranks of the lowly. Such an appeal, though sometimes submerged by the din of party strife or personal ambitions, must ultimately prevail. [Applause.]

ACCOMPLISHMENTS AND PUBLIC SERVICE OF HERBERT HOOVER

1. Began self-support at age of 13.

2. Earned his own way through college, graduated as an engineer in 1895.

3. Twenty years of successful engineering practice in the United States and over the world, installing American methods and machinery.

1912

4. Elected trustee of Stanford University; raised the funds and built the Stanford Union for the students.

1914

5. Represented the city of San Francisco in Europe, securing participation of various governments in their exposition.

6. Organized and directed the American relief committee in Europe and assisted 160,000 stranded Americans out of the war zone.

7. Organized the Belgian Relief Commission, which for four and one-half years under his administration until 1919 fed and clothed 10,000,000 Belgians and French people, and raised the finance therefor, amounting to over $1,400,000,000.

1917–1918

8. Organized the United States Food Administration, directing it until June, 1919. During this time so organized American food production and so reduced consumption as to increase our food exports from 6,000,000 tons annually pre-war to the rate of 20,000,000 tons annually, thus providing the margin which held the Allies in the war and supplied our own soldiers abroad. Handled food purchases to the value of over $7,000,000,000 and from it not one single scandal or charge has ever been developed.

9. Member War Council, Export Council, chairman United States Food Administration, Grain Corporation, Sugar Equalization Board.

1919

10. With headquarters in Paris, after the armistice, November 11, 1918, organized the disposal of the farmers' surplus created for war purposes and then brought into competition with surpluses of cheap food from the Southern Hemisphere, and in doing so maintained the price of all farm products until the entire production of 1918 was disposed of.

11. Organized and directed the food supplies of enemy and liberated countries of Europe as part of the Supreme Economic Council activities, of which he was the American member—including Poland, Germany, Austria, Jugoslavia, Rumania, Czechoslovakia, Esthonia, Austria, Finland, Lithuania, Latvia, and Armenia. These supplies exceeded $600,000,000, of which over $300,000,000 was paid for in cash and the balance on loans.

12. Directed many activities in restoration of Europe by opened ports, canals, and reestablishing communications and railway services between countries; directed coal production and distribution in Central Europe generally and such other efforts as would reestablish economic life and stability.

13. Organized American relief administration for care of destitute children of enemy and liberated territory, feeding, clothing, and giving medical care through American charity to over 10,000,000 children, and carrying this on until July, 1922, raising therefor over $80,000,000.

14. Organized the campaign against typhus epidemic raging in eastern Europe, reducing it from 600,000 to 10,000 cases in six months.

1920

15. Founded the Stanford University War Library, now the most extensive library in the world upon the war and its consequences, with students from many foreign countries.

16. Organized and secured the endowment for the Food Research Institute at Stanford University.

17. Organized the national drive for $33,000,000 for continued care of the destitute European children in Germany, Austria, Poland, and other liberated states.

18. Organized from the Belgian Relief Commission remaining funds, the C. R. B. Foundation for support of education and scientific research in Belgium and exchange of Belgian and American students and professors, acting as chairman since that time.

1921

19. Organized the A. R. A. Children's Fund with an endowed income of $250,000 per annum, and the American Child Health Association for promotion of health protection to American children, raised the annual cost of $350,000 and acting as its president since that time. This association in cooperating with public authorities has brought the health protection of American children to the forefront. The establishment of "May day" as child health day is the work of this association. Incidentally it has assisted both the health of children and our farmers by increasing milk consumption.

1921–1928

20. As Secretary of Commerce he brought about an entire reorganization of that department, by which it has been lifted from the most obscure Government department to among the first rank in the public service it performs. The department has expanded by the assignment of bureaus from other departments and the added duties imposed by Congress, each division growing steadily in efficiency and usefulness under officials of the highest type.

21. Reorganized the Foreign Trade Service of the United States. In cooperation with manufacturers and merchants our American exports have been greatly expanded, contributing thereby to the employment of our workers and prosperity of all groups. As an indication of the success of the new organization, the individual demands of our merchants and manufacturers for specific services have increased from 200,000 annually to over 2,000,000 annually. To-day the foreign trade of the United States is 35 per cent above pre-war, even after the depreciation of the dollar has been deducted, whereas other nations engaged in the war have only recovered their pre-war trade.

22. The great after-war collapse and vast unemployment which followed it was universal throughout the world. Hoover met this situation by calling a great unemployment conference of 1921 of leading employers, commerce and labor leaders of the country; inaugurated a cooperative campaign for the resumption of employment, through public works, through enlarging employment, and through the general clean-up campaign so that more individuals received some income each week. The result of increased employment by these means soon brought increased buying, and the wheels of production started so rapidly that within six months our employment problem had disappeared, whereas that of foreign nations has only been met by doles and continued failures.

23. Inaugurated the country-wide campaign for elimination of industrial waste by cooperation between manufacturers, merchants, transportation, and consumers, the object of which is to decrease production costs, stabilize business, and reduce prices to consumers. The problem has been attacked through reduction of booms and slumps of the business cycle, organized cooperation between shippers and the railways, reduction of seasonal employment, enlarged use of electrical power; by the use of waste materials, by development of scientific research, by development of commercial arbitration, reduction of labor strife, development of waterway transportation, establishment of standards,

grades, and qualities in products to protect the consumer; the elimination of unnecessary varieties in commercial commodities; the establishment of standards and business practices and ethics; simplification and improvement in business practices, etc. Over 85 industries have participated under committees of their own selection with definite results of great importance.

24. Appointed a nation-wide committee representing the phases of the construction industries, including material manufacturers, contractors, realtors, labor and public officials upon the seasonal operation of the construction industries. This committee, after exhaustive investigation, made most important recommendations. The better understanding of the problem brought about by the committee's exhaustive report and the cooperative activities established in "follow-up" in the most important localities have had a marked effect. The annually enlarged building program of the country has been handled in large part by extension of the building season into the winter months; this has had a stabilizing effect upon prices and given increased annual earnings to workers, not only in construction but in the construction-material business. The price of most building materials has, in fact, decreased despite the large increased demand. It is estimated that fully 50 days have been added to the season.

25. Being convinced that both from a social and economic point of view home ownership and home building was one of the greatest necessities both for the comfort and security of our people and for the maintenance of employment in the construction industries, Mr. Hoover directed a nation-wide movement to this end. Aside from the movement to bring about decreased cost of construction by decreasing seasonal idleness in these industries, he established committees for simplification of municipal building codes, in cooperation with the industries and municipalities, and resulted in reduction of costs of home construction. He initiated the better-homes movement in which 4,000 different committees in the United States now actively take part, and made a further contribution through the standardizing and simplification of dimensions in building materials. Residential building has increased from 25 per cent to 45 per cent of our annual construction.

26. Instituted the Federal Specifications Board to unify the diverse buying specifications of the Federal departments, resulting in large savings in the costs of Government purchases and the greater stability of manufacture. At the request of various governors and mayors, this was later extended into cooperation with State and municipal and institutional purchasing agents, resulting in further savings to the taxpayer. Many of these specifications (which were all arrived at with the advice of practical manufacturers and independent technical advisers) have been adopted into private buying, to the mutual benefit of consumers and the producer.

27. In cooperation with the lumber industry, he undertook the conservation of our forests by the elimination of waste in production through the establishment of standards in quality and simplification of dimensions. For many years bills were introduced to Congress to "purify" the lumber industry, but by cooperative movement in the industry itself these things have been accomplished without legislation and with enormous benefit to the public. This industry estimates that $250,000,000 a year is being saved as a result of this organization.

28. He gave new life to the movement for the development of midwestern waterways by visualizing them as a single great transportation system to be interconnected and completed as a whole on modern lines. He greatly aided the Mid West in securing the necessary legislation and appropriations by developing national understanding of the great importance of the problem.

29. Organized investigation and study of the development of commercial aviation in foreign countries and the preparation of plans for development in the United States; cooperated with Congress in creating the commercial aviation division in the Department of Commerce as a result of which we are now excelling all foreign progress, and that by private initiative without Government subsidies, which have been depended upon in other countries.

30. Established with leading business men, economists, and labor leaders a national investigation of the causes and remedy of the "business cycle," i. e., the periodic occurrences of hard times and unemployment. The conclusions of this committee were adopted into the Government and business world to an extent which has contributed materially to the recovery from the war and the growth of stability in the country.

31. Organized the campaign against the British East Indian rubber monopoly which had raised the price of rubber (of which we import 900,000,000 pounds annually) to $1.10 a pound, the final result of which was a reduction in price to 33 cents a pound, or a saving of possible cost of $700,000,000 a year to the American automobile user.

32. Organized the relief of the Russian famine, which prevented the starvation of 15,000,000 children in 1922 and continued to care for 3,500,000 children for a year after the famine.

33. As chairman of the President's St. Lawrence Water Commission initiating a survey and report on the project by Canadian and American joint engineering commission, upon which negotiations have been instituted with Canada for its construction. Secured also a joint report on the causes of the fall in lake levels so damaging to lake shipping, with recommendations for their remedy which are now also under negotiation with Canada.

34. Was president of the International Radio Conference of 74 nations in 1927 which unanimously agreed upon treaties protecting the radio listener and lives at sea through control of international radio communication.

35. Took part in encouraging American merchant marine through the Department of Commerce agencies and in support to Congress of measures for its upbuilding.

36. For four years carried on the promotion of radio broadcasting, preventing interference through voluntary regulation, through annual conferences, ultimately developing the radio law which secures the control of radio wave lengths to the people through the Federal Government.

37. Opposed the cancellation of the war debts and, as a member of the War Department commission, participated in bringing about settlements which yield a large annual return to the American taxpayer.

38. As chairman of the Colorado River Commission, brought about agreement and a recommendation to the seven basin States of the compact to settle the 20-year dispute over water rights which has blocked all development of the basin.

39. Chairman and active director of a national drive for a fund of $20,000,000 with which to assist scientific research through the National Academy of Sciences, of which some $9,000,000 has already been assured.

40. Directed the Mississippi flood relief providing for the rescue, care, and rehabilitation in their homes of 650,000 American citizens who were victims of the disaster.

PRESENT POSITIONS

1. Secretary of Commerce.
2. President American Child Health Association.
3. Chairman A. R. A. Children's Fund.
4. Chairman C. R. B. Educational Foundation.
5. Trustee Carnegie Institution.
6. Trustee Stanford University.
7. Chairman St. Lawrence Waterway Commission.
8. Member of central committee, American Red Cross.
9. Member advisory board, Hoover War Library and Food Research Institute.
10. Chairman Better Homes in America.
11. Honorary president Izaak Walton League.

PAST POSITIONS

1. President American Institute of Mining Engineers.
2. President American Engineering Council.
3. Chairman American Relief Administration.
4. Chairman Commission for Relief in Belgium.
5. United States Food Administrator.
6. Member War Council.
7. Chairman United States Food Administration and Grain Corporation.
8. Chairman United States Sugar Equalization Board.
9. Chairman Allied Food Council.
10. Chairman American Relief Administration in—

Germany, Poland, Russia, Lithuania, Estonia, Finland, Latvia, Serbia, Czechoslovakia, Armenia, Rumania, Austria, and Hungary.

11. Member Supreme Economic Council.
12. Chairman European Food Control.
13. Chairman European Coal Council.
14. Vice chairman Second Labor Conference.
15. Chairman European Relief Council.
16. Member advisory board, Washington Arms Conference.
17. Member World War Debt Commission.
18. Chairman Colorado River Commission.
19. President International Radio Conference.
20. President National Conference on Street and Highway Safety.
21. Chairman National Committee on Wood Utilization.
22. Chairman National Radio Conference.

HONORARY MEMBERSHIPS

1. American Institute of Mining Engineers.
2. Canadian Mining Institute.
3. Engineers Club, New York.
4. Engineers Club, Philadelphia.
5. American Institute of Architects.
6. American Society of Civil Engineers.
7. American Society of Mechanical Engineers.
8. Western Society of Engineers.
9. Rotary.

GOLD MEDALS

Mining and Metallurgical Society of America—for contributions to technical science.

Institute of Mining Engineers—for engineering accomplishments.

Belgian Government—for service to the nation.

National Institute of Social Sciences—for public service.

Civic Forum—for public service.

National Academy of Sciences—for contributions to the advance of science.

University of Vienna—for humanitarian service.

Roosevelt Memorial Association—for public service.

HONORARY CITIZEN OF—

Belgium, Finland, Poland, Estonia—freedom of various cities.

Honorary degrees in recognition of public service from 36 different universities and colleges.

ARTICLE BY HON. RICHARD ELLIOTT

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to insert in the RECORD an article written by Hon. Richard Elliott with reference to the Arlington Memorial Bridge.

The SPEAKER. The gentleman from New York asks unanimous consent to insert his remarks in the RECORD by printing an article written by Hon. Richard Elliott. Is there objection?

There was no objection.

Mr. REED of New York. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following article written by Hon. RICHARD N. ELLIOTT, Representative in Congress from Indiana and a member of the Arlington Memorial Bridge Commission, published in the National Republic for March, 1928:

ARLINGTON MEMORIAL BRIDGE—A CENTURY-OLD DREAM IS GIVING AMERICA THE MOST BEAUTIFUL BRIDGE IN ALL THE WORLD

If the spirit of Andrew Jackson could now visit the beautiful Capital of the Nation it would view with pride and satisfaction the construction work of the Arlington Memorial Bridge and witness a century-old dream coming true. When General Jackson was President of the United States he conceived the idea that a bridge of enduring granite should be erected across the Potomac River at Washington, symbolical of the union of the North and the South. The project for the bridge, however, in spirit as well as in design, first found expression in an address by Daniel Webster on the occasion of the laying of the cornerstone of the extension of the United States Capitol on the 4th day of July, 1851. At that time a heated controversy was being waged in Congress by the representatives of the North and the South which finally led up to the Civil War. Senator Webster, in the course of his pleading on that day for the preservation of the Union, the dissolution of which even at that date seemed imminent, exclaimed:

"Before us is the broad and beautiful river, separating two of the original thirteen States, which a late President, a man of determined purpose and inflexible will but patriotic heart, desired to span with arches of ever-enduring granite, symbolical of the firmly established union of the North and the South. That President was General Jackson."

The Civil War, it seems, could not be averted by the efforts of the statesmen of that day, but when the perpetuation of the Union was assured men's thoughts again turned to the idea of a bridge as an expression of the solidarity of the Nation.

Several times Congress has, since the Civil War, attempted to plan legislation which would bring about the construction of the bridge but nothing definite was done until the act of March 4, 1913, created a commission to report to Congress a suitable design for a memorial bridge across the Potomac River from the city of Washington to a point at or nearest the Arlington estate in the State of Virginia. The President of the United States, the Presiding Officers of the two Houses of Congress, and the chairmen of the respective Committees on Public Buildings and Grounds were named members of this commission and $25,000 was authorized for the preparation of plans. In compliance with the above named act, plans were submitted to Congress by the Arlington Memorial Bridge Commission April 22, 1924, and on February 24, 1925, an act of Congress was approved to provide for the construction of a memorial bridge across the Potomac River from a point near the Lincoln Memorial in the city of Washington to an appropriate point in the State of Virginia, according to said plans. This authorized a total appropriation of $14,750,000. By the act of March 4, 1925, an appropriation of $500,000 was made to begin work.

In submitting the plans for the Arlington Memorial Bridge the following technical description was furnished by the architects, McKim, Mead, and White:

"The site of the bridge as recommended in the report of the Senate Park Commission in 1902 is to be upon a line leading diagonally from the Lincoln Memorial on the Washington side, directly toward the Arlington Mansion on the heights at Arlington, the axis of the bridge to be chosen so as to center upon the mass of the Lincoln Memorial at one end and upon the mass of the Arlington Mansion at the other.

The area on the Mall axis at its junction with the Potomac has been treated so as to recognize the importance both of the final feature of a parkway extending from the Capitol to the Potomac, and that of a plaza whence radiate the bridge and important park roads, including access to the Lincoln Memorial and to the river. A glance at the general plan will illustrate the symmetrical arrangement of the bridge and the shore road, both provided with entrance pylons and the monumental flight of steps between, leading to the river, and the whole composition forming a water gate giving access through the Mall with its important monuments to the Capitol Building. The steps form landing places for small boats, and piers at either end for larger ones. The parking on B Street has been shown extending to the river bank, and B Street south has been straightened so as to parallel the Mall axis, terminating with a rond-point at its intersection with the north and south roads leading to the Lincoln Memorial. This rond-point is the site of the Ericsson memorial.

Proceeding in the direction of the Arlington House, there follow in succession the following features of the general composition: The bridge; the treatment of Columbia Island and the Lee Highway; the parkway, thence to and including the main entrance of the Arlington Cemetery; the cemetery grounds.

It is proposed to construct the bridge of granite, as being not only a material of great monumental quality, but also the most enduring, especially when its contact with the water is considered. Of all granites available, that termed the "Bethel White" is the nearest in color to the marble of the Lincoln Memorial, and, in fact, at a little distance would be indistinguishable from the latter, a point considered of the utmost importance.

The bridge has been kept as low as possible, consistent with good proportions, in order not to interfere with the view of the Lincoln Memorial from Columbia Island. It has nine segmental arches of 166 feet span at the ends of the bridge and spreading gradually to 184 feet at the center. The terminal arches rise to a point 28 feet above average water height, increasing gradually to 35 feet in the central arch. The bridge is 2,130 feet long and 90 feet wide, including the sidewalks which are 15 feet in width each; over all, including the parapets almost exactly the width of Fifth Avenue, New York, and as long as from Forty-second Street to the Cathedral at Fiftieth Street, in the same city.

It has been the endeavor of the designers that the architecture be kept as simple and severe as possible, depending for its beauty upon its main proportions and its adornment with significant pieces of sculpture. The entrance to the bridge is marked by two pylons about 500 feet from the Lincoln Memorial. These pylons are repeated at the entrance to the shore road and also at the Virginia end of the bridge; they are 40 feet high, adorned with groups of sculpture and with inscriptions and surmounted by eagles as symbols of the United States of America. This symbol appears also as the only sculptured ornament of the walls of the bridge in the large disks on each pier between the arches. The sculpture of the four pylons represents in different ways the reconciliation of the North and South, the recognition of their common bonds and aspirations, and the final triumph of the idea of permanent and brotherly union.

The pairs of figures on the parapet of the bridge represent symbolically the outcome of that harmony, the result of the energies of the entire country in the arts of peace—those inventions, accomplishments in science and art peculiarly connected with the history of this country. Here would be symbolized the agricultural, mining, electrical, educational, and artistic progress, to mention but a few categories of action. In the opinion of the architects this sculpture vitalizes the entire conception of the design of the bridge, differentiating the memorial from others and making its existence and meaning intelligible at a glance.

The central arch of the bridge is required at present to be a draw. The bascule form of draw has been adopted as interrupting to the least possible degree the unity of the bridge. The introduction of the iron arch, though in a construction designed to be in the highest degree monumental, is to be regretted, and as very few ships pass up the Potomac it is to be hoped that permission will be granted, when the bridge is built, to do away with the draw entirely and replace it with a granite arch similar to the rest.

A large part of Columbia Island is under water the larger part of the year. It has always been considered, though, by the original park commission and subsequently by the Commission of Fine Arts as a site for formal treatment, a fitting end to the bridge as well as an attraction in itself. Accordingly the lines of the shore have been shown more or less rectified in order to permit of a cross axis running the length of the island at right angles to the axis of the bridge. The intersection of these two axes has suggested a plaza with fitting architectural adornment in a measure supplementary to the Lincoln Memorial across the river. Two columns are shown here, framing in but not interfering with the view of the latter. These columns symbolize one the North and the other the South. They are surmounted by statues of victory and the stylobates, whence they rise, offer surfaces fit for proper decoration with bas-relief and inscription. The columns are 166 feet high, or practically of the same height as the Colonne de Juillet in Paris.

The Columbia Island axis offers an opportunity to recognize the Lee Highway and make it part of the whole composition. This highway may, with very slight deflection, reach the brow of the Arlington heights, exactly on the axis of the Mall. From this point a superb view would be enjoyed of the bridge, the Lincoln Memorial, the Washington Monument, and the Capitol itself. The Lee Highway would descend always on the Mall axis over the stream between the mainland and the island, by a bridge of a single arch and crossing the island axis continue its course to the water edge, where it is planned to construct a water gate facing and corresponding to that at the Potomac end of the Mall.

The intersection of the Mall and island axis alluded to above suggests a memorial in the shape of a circular or polygonal temple, mark-

ing the northern end of the important Lee Highway. This would be echoed at the lower end of the island at an equal distance from the Columbia Island plaza, by a memorial or a rest pavilion. The narrow waterway separating the island from the Virginia shore will, it is believed, be popular for boating parties, and a number of landing places have been provided for this purpose. Apart from the formal roads shown and a certain number of small footpaths, it is recommended that in general the island be a wooded one, corresponding as much as possible with Analostan Island. It is urged strongly in this connection that this latter island be acquired by the Government both on account of its natural beauty and as a protection against possible uses of it for purposes distasteful to the eye.

After crossing the bridge over the waterway separating the island from the Virginia shore a formal parkway is shown with two roadways, and a tapis vert between, bounded by hedges and elms and rising on a slight but even grade until after passing the Alexandria Road it abuts on the steep slope leading to the mansion. This abrupt change of grade suggests the creating here of the chief memorial entrance to the Arlington Cemetery. A plaza has been shown here in part excavated out of the hill, whence lead to the north and to the south roads respectively to and from the mansion. The western end of the plaza is bounded by a semicircular retaining wall 30 feet in height and 226 feet in diameter. This retaining wall will be decorated with niches, pilasters, and tablets bearing inscription. Access is provided to the terrace surmounting the retaining wall, whence an all-embracing view of the parkway may be obtained—the columns of Columbia Island, the Memorial Bridge, the Potomac, the Lincoln Memorial, 5,808 feet distant, the Washington Monument, and far in the distance the glistening white dome of the Capitol. Through the trees up to the westward a glimpse of the simple and dignified Arlington Mansion may also be obtained on the top of the heights.

The work of the bridge is now well under way. The piers of the main part are now completed above the water line and they are about to commence the work on the arches. Dredges have been working for a long time pumping the silt from the main channel and building up Columbia Island. It was estimated that it would take about 10 years to complete this bridge and the approaches to the same. When it is done it will be one of the finest bridges in the world, and over it will pass the boulevard leading from the National Capital to the Arlington National Cemetery, also the Lee Highway, leading from the Atlantic seaboard to the Pacific coast, and the road leading from Washington to Mount Vernon, the home of our first President, and from thence on to Richmond, Va., and the Southwest. It will be so constructed that it should last for hundreds and perhaps thousands of years, and will make a fitting entrance into the great Capital of the greatest Nation of the world.

EXPORTATION OF ARMS

The SPEAKER. Under the special order of the House the Chair recognizes the gentleman from Massachusetts [Mr. ANDREW] for five minutes.

Mr. ANDREW. Mr. Speaker and gentlemen, the gentleman from New York [Mr. FISH] yesterday spoke in eulogy of the so-called Burton embargo resolution—H. J. Res. 183—which has been reported by his committee, and condemned the American Legion for having opposed it. I agree with the gentleman from New York in his assertion that this resolution goes much further than one would think at first glance and that it deserves the careful attention of the Members of this House, for this resolution proposes to destroy the industries in this country upon which our Army and our Navy depend in time of an emergency. It provides that we, deliberately, voluntarily, and alone, without any agreement with other countries, shall render our Army and our Navy impotent while strengthening the preparations of the armies and navies of other countries.

If that resolution had been enacted at the beginning of the World War, that war would have ended in the victory of the Imperial German Government. Had it been in effect when we entered the war it would have indefinitely prolonged our part in that war and would have involved for our country the expenditure of many more billions of dollars and the sacrifice of many hundreds of thousands of lives.

I think the Members of this House before that measure comes on the floor ought to carefully inform themselves.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. ANDREW. Yes; but only for a second, because I have only five minutes.

Mr. WAINWRIGHT. I would like to state for the benefit of the gentleman and the House that the Committee on Military Affairs at a meeting this morning passed a resolution memorializing or requestng the Committee on Foreign Affairs to recall this resolution in order that there might be a hearing on it, it having been reported to the committee that there had been no hearing whatever on the resolution and the committee considering it a matter that involves the national defense.

Mr. ANDREW. That is a matter of great importance because the membership of this House, if they seek to inform themselves in regard to the resolution will encounter great difficulty. There are no hearings available upon the resolution. There are no reports from any of the executive departments of this Government. Although it is of vital concern to the national defense, the committee did not ask for a report either from the War Department or from the Navy Department. Although it affects many industries in this country and affects our foreign commerce, they asked for no report from the Department of Commerce. Although it proposes a change in our country's international policy, they asked for no report from the State Department. Neither did they ask representatives of any of these departments to appear and be heard by the committee, and although two years ago an international conference was held to arrange by international agreement, if possible, for the control of trade in munitions, and the United States was represented by five delegates, the Committee on Foreign Affairs, which reported out this measure, did not hear but one of these five delegates, who himself was a member of the committee.

So this bill concerning our national defense, concerning our international policies, concerning our trade and our commerce, was reported to this House without hearings, without any reference to any executive department, and there is no material available to-day for any Member of the House who wants to study this question.

The very language in which the resolution is framed indicates the way in which it was prepared in the committee. One of the first provisions in the resolution prohibiting the export of arms names the different types of arms which shall not be exported, and the first ones named are "muskets, carbines, and rifles." Well, muskets have not been used in the world since more than 100 years ago, and carbines have been unknown for more than a quarter of a century.

The SPEAKER pro tempore (Mr. KETCHAM). The time of the gentleman from Massachusetts has expired.

Mr. ANDREW. Mr. Speaker, I ask unanimous consent that I may have two minutes more.

Mr. CELLER. Mr. Speaker, I ask unanimous consent that the gentleman may have five minutes more. The matter is very important and is one that the Members of the House should be enlightened upon.

Mr. SNELL. Mr. Speaker, we have other matters coming up to-day, and, while I shall not object to the gentleman having two minutes, I hope he will not ask for a longer time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ANDREW. The second paragraph, itemizing the arms which shall not be exported from this country, classifies the cannon as "long and short cannon.",An inquiry of the Ordnance Departments both of the Army and the Navy reveals the fact that no such classification of cannon as long and short cannon has been known since the time of Admiral John Paul Jones. [Laughter.]

So this bill, framed in amateur language, was reported to this House without any hearings of any representatives of the departments or of anybody outside of the committee, was reported without having obtained any report from any department of the Government, and then, as if it were a minor bill, it was placed on the Consent Calendar and almost slipped through the House without anyone knowing that it had any special significance. I believe the Members of the House will resent this procedure and will disagree with my friend, the gentleman from New York [Mr. FISH], and will be grateful to the American Legion for having brought to our attention this amazing situation. [Applause.]

The SPEAKER pro tempore. Under the special order of the House, the Chair recognizes the gentleman from Arizona [Mr. DOUGLAS] for five minutes.

Mr. DOUGLAS of Arizona. Mr. Speaker and Members of the House, it is probably impertinent for me, a new Member, to follow in the wake of an old and reputable Member of the House, and yet I feel that House Joint Resolution 183 is so important and involves to such an extent the interests of this country that I am not willing to remain entirely silent.

Inasmuch as there are no published hearings on the measure, I have been compelled to make up my own mind from evidence which I have been able to unearth myself. As a result I am opposed to the measure on two grounds: First, because in addition to being a self-imposed enlargement of the definition of neutrality, it is contrary to the Geneva protocol of 1925; and, secondly, because if enacted it will very seriously impair the national defense of this country.

I heard the gentleman from New York [Mr. FISH] arraign the committee on national defense of the American Legion for opposing this measure. He implied that that committee is not a regularly recognized committee of the Legion. In order to correct any impressions he may have left, it should be stated

that the committee on national defense of the American Legion was appointed by the executive committee of the Legion under direction of the national convention of the American Legion for the purpose of considering all questions which pertain to the national defense of this country.

Mr. SIMMONS. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. SIMMONS. Do they have authority to commit the American Legion for or against any particular proposal?

Mr. DOUGLAS of Arizona. As to that I am not prepared to speak.

Mr. SIMMONS. I think that is the criticism that has been made.

Mr. DOUGLAS of Arizona. I think, however, that the committee, in the resolution which it enacted, did not commit the American Legion as an organization against this measure. I do know, also, that almost every local post in my State since I wired the State adjutant and the State commander the contents of House Joint Resolution 183, has considered the measure and has replied to me by wire requesting opposition.

Mr. SIMMONS. Assuming now that the committee has no authority to bind the American Legion, and that is the interpretation placed on their action, if the Congress has not the facts on which it can act without further investigation, as suggested by the gentleman from Massachusetts [Mr. ANDREW], how can a post of the American Legion out in my State or in the gentleman's own State arrive at any rational judgment on this bill?

Mr. DOUGLAS of Arizona. I will state to the gentleman, in view of the absolute lack of public information on the question, is it not a very intelligent position to take that the measure should not pass? [Applause.]

This resolution is not only a self-imposed enlargement of the definition of neutrality, but it is specifically contrary to the Geneva protocol of 1925, which dealt with international traffic in arms and ammunition and in implements of war.

Mr. FISH. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Not now. I will later. That protocol was predicated on the principle of equality as between the producing and nonproducing nations. The gentleman from Ohio [Mr. BURTON], whose eloquence has recently held the House in suspense, at the conference at Geneva in 1925 himself just as eloquently plead the cause of the nonproducing nations.

I think it would be pertinent to request from the gentleman from Ohio an answer as to whether he was right in 1925, or whether he is right in 1928. [Applause.] Now I will yield to the gentleman from New York [Mr. FISH.]

The SPEAKER. The time of the gentleman from Arizona has expired.

Mr. FISH. Mr. Speaker, I ask that the gentleman's time be extended two minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. FISH. I am only making this statement to keep the record straight. The gentleman has been talking about traffic in arms conference at Geneva. I want to point out that the terminology used in the resolution uses the exact words agreed upon by all the nations in regard to arms and ammunition at that conference, and when they talk about muskets and cannon those are the terms agreed upon by the nations of the world in the last conference on arms that the gentleman has been speaking about.

Mr. DOUGLAS of Arizona. That has nothing to do with what I have been stating.

As a result of the attitude taken by all the nations at the Geneva conference it was agreed that they should be no prohibition on the exportation of arms which would protect the producing nations against the nonproducing nations; to do so would be to agree to a provision inimical to the sovereignty of the small nations.

The small nations held that if the conference was interested in international disarmament it should not agree to any such provision, for they held that if that conference prohibited the obtaining of munitions of war from producing nations then they would be compelled to expend large sums of money in the erection of their own munition plants. So an absolute embargo instead of resulting in disarmament would as a matter of fact increase national armaments.

The protocol of 1925, therefore, contained only limitations on exportation of certain types of arms, and an embargo on arms to unrecognized de facto governments and to organizations not sanctioned by recognized governments. Article 33 of the protocol lifts all limitations with respect to belligerent nations.

The SPEAKER. The time of the gentleman from Arizona has again expired.

Mr. BUTLER. I ask that the gentleman have three minutes more.

The SPEAKER. Is there objection?

There was no objection.

Mr. DOUGLAS of Arizona. H. R. 183 would, therefore, do exactly what the Geneva conference refused to do. It would deny the principle of equality which was agreed to at Geneva. It would enact into law a prohibition which would be inimical to the interest of the small nations, and perhaps be inimical to their sovereignty. It would protect the producing against the nonproducing countries. In addition, instead of decreasing national armament it would in effect increase national armament. It would impose an embargo at the very time—that is, time of war—in which the Geneva protocol lifts limitations on exportation of arms. I say that House Joint Resolution 183 not only lacks the force and effect of international agreement, and can not therefore be effective in furthering the cause of world peace, but, in addition, violates the underlying principles of the Geneva protocol of 1925.

Of the 35 nations which signed the protocol only 2, of which we are not one, have ratified it. House Joint Resolution 183 transcends the provisions of the Geneva protocol. By what logic can it be held that this country of its own volition should undertake to enact into law a provision extending far beyond any agreement which has been reached as the result of an international conference?

Had the resolution which is now under consideration been in effect during the World War, Germany would have won the war, or the war would have been greatly prolonged. It was the market offered the munition producers in this country which enabled this country when it did enter the war to be relatively prepared at least with respect to munitions. Due to the demand of the Allies the production of toluol, basic to the manufacture of T. N. T., increased from 700,000 pounds a month in 1914 to 6,000,000 pounds a month at the time of our entrance into the war. Due to the demand of the Allies the production of smokeless powder increased from 1,500,000 pounds a month in 1914 to 45,000,000 pounds a month at the time we entered the World War. Due to the demand of the Allies the production of rifles increased from an amount totally inadequate in 1914 to supply an army recruited to war strength to an amount sufficient to equip our Army when it took the field in 1917. Whatever degree of preparedness with respect to arms we enjoyed in 1917 was due to the demand of the Allies between 1914 and April of 1917.

I submit, therefore, that had this resolution been in effect between the years 1914 and 1917, the United States would have been compelled to take its place with the Allies unprepared not only with respect to men but also with respect to arms and munitions. [Applause.]

American lives would have paid the price.

The resolution now under consideration, if enacted into law, will destroy our policy of national preparedness. It will make impotent our human forces in time of war. American lives will pay the price.

Let us continue to strive for disarmament and world peace by international agreement. Do not let us voluntarily legislate away our right to national existence.

The SPEAKER. The time of the gentleman from Arizona has expired.

REMISSION OF DUTIES ON CERTAIN CATTLE

Mr. GREEN of Iowa, by direction of the Committee on Ways and Means, presented a privileged report, for printing, from the Committee on Ways and Means on House Joint Resolution 217, providing for the remission of duties on certain cattle which have crossed the boundary line into foreign countries, which was referred to the Union Calendar and ordered printed.

CONSTRUCTION OF CERTAIN NAVAL VESSELS

Mr. SNELL. Mr. Speaker, I present the following privileged report from the Committee on Rules, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 134

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 11526, to authorize the construction of certain naval vessels, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed six hours, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall arise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. McCLINTIC. Mr. Speaker, will the gentleman yield for a parliamentary inquiry?

Mr. SNELL. I yield.

Mr. McCLINTIC. Has any suggestion been made as to the length of time to be taken on this resolution?

Mr. SNELL. On the resolution itself?

Mr. McCLINTIC. Yes.

Mr. SNELL. There will be no time taken at all, practically, unless the gentleman from North Carolina [Mr. POU] desires some time. He told me that he did not expect to want any time. Of course, if he does want some time, I shall be very glad to yield to him.

Mr. McCLINTIC. Inasmuch as the statement is made that this is a unanimous report from the Committee on Rules, would some other Member of the House have a right to be recognized in opposition to the rule, Mr. Speaker?

The SPEAKER. The gentleman from New York [Mr. SNELL] is entitled to move the previous question at any time during his hour.

Mr. SNELL. If the gentleman from Oklahoma desires some time, I shall be very glad to yield to him.

Mr. LAGUARDIA. I would like to have five minutes.

Mr. TILSON. Against the rule?

Mr. LAGUARDIA. Yes.

Mr. McCLINTIC. I would like to have 10 minutes.

Mr. TILSON. Does the gentleman from Oklahoma mean to oppose the rule?

Mr. McCLINTIC. Yes.

Mr. SNELL. Mr. Speaker, the gentleman from Oklahoma was before the Committee on Rules, and if I understood him he said at that time that he was not opposed to granting a rule for the consideration of this bill; and we made a special arrangement whereby he would control some of the time.

Mr. McCLINTIC. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. McCLINTIC. When the rule was up for discussion I made the statement that fundamentally I was opposed to the consideration of legislation of this kind ahead of farm legislation and flood control and matters that related to internal conditions, and the gentleman will surely remember that.

Mr. SNELL. Mr. Speaker, I shall not dispute the gentleman. This resolution provides for the consideration of the bill H. R. 11526. Everyone understands that bill. It simply provides authorization for the construction of 15 cruisers and 1 aircraft carrier. The bill comes to the House with the approval of 20 of the 21 members of the Committee on Naval Affairs.

The resolution comes with a unanimous report from the Committee on Rules. In my personal opinion, this is a reasonable proposition to present to the House at this time. There are certain Members who, perhaps, would have voted for a larger naval construction program than this provides; but taking into consideration the proposition that was put before the Geneva conference, and a general cross section of the feeling throughout the whole country, it is certainly a reasonable program. It is what is needed to keep our Navy in a fair condition, not only to protect our long seacoast, our outlying possessions, to protect our merchant marine, but also our nationals in all parts of the world.

I, for one, have always been for preparedness not only in the Army but in the Navy. I believe the people of this country want everything that is reasonable along this line. This certainly can not be considered a competitive or even an ambitious program. It is a very fair and reasonable program for a country of our size and with our domain. I trust that the rule will be approved by the Members of the House.

Mr. BLACK of New York. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Yes.

Mr. BLACK of New York. There are some who oppose this bill conditionally. As the gentleman intimated, they favor a larger Navy. There are others who oppose this bill absolutely. Who are to be considered in the distribution of this time?

Mr. SNELL. There was a gentleman's agreement before the Committee on Rules that one-half of this time would be controlled by the gentleman from Pennsylvania [Mr. BUTLER]; that he would yield to the Members on the Republican side equally, those who favored and those who opposed the bill; that one-half the time would be controlled by the gentleman from Oklahoma [Mr. MCCLINTIC], and that he would immediately yield one-half of that time to the gentleman from Georgia [Mr. VINSON], who would yield to those favoring the bill on the Democratic side, while Mr. MCCLINTIC would yield to those opposing the bill on that side of the House.

Mr. McCLINTIC. My understanding is just a little bit different from the gentleman's statement.

Mr. SNELL. I think I have made the statement exactly as it was.

Mr. McCLINTIC. I want to make a statement as to what my understanding of the agreement was with respect to the division of time. I agreed to yield one-half of my time to the gentleman from Georgia, my colleague on the committee, provided that Mr. BUTLER would yield one-half of his time to a gentleman on that side representing the minority.

Mr. SNELL. That is exactly the statement I made, that Mr. BUTLER would yield his time equally.

Mr. BLACK of New York. Does the gentleman from Oklahoma understand that he is to yield part of his time to those in opposition?

Mr. McCLINTIC. I will yield one-half of my time to the gentleman from New York [Mr. LAGUARDIA].

Mr. SNELL. That is not the understanding we had before the Rules Committee. I am willing to go as far as that understanding, but no further.

Mr. BUTLER. I stand by the rule.

Mr. BLACK of New York. The way it looks to me is this: The President has submitted a naval program coming from the Navy Department. As I see it, nobody who is opposed to the President's program is going to get time under this rule unless this tangle is straightened out. The gentleman from Oklahoma has all the time on that side. I favor the President's program.

Mr. BUTLER. I will yield time to the gentleman.

Mr. LAGUARDIA. Mr. Speaker, the statement just made by the gentleman from Pennsylvania [Mr. BUTLER] shows clearly the necessity of having one-half of this time on this side of the House occupied by those opposed to this bill. The gentleman from Pennsylvania clearly set forth that he will allot time to those opposed to the bill because they want more ships. I submit in all fairness that if this bill is to be properly debated and the time equally divided between those for and against the bill, one-half of the time on this side of the House ought to be in the control of somebody who is against the bill.

Let us be fair about this. If one-half of the time is to be given to those who want more ships, you can not say they are opposed to the bill.

Mr. BUTLER. Is there a man who is opposed to this bill?

Mr. BLACK of New York. A man who will take half a loaf if he can not get a whole loaf is not necessarily opposed to the half a loaf. I want to know if those opposed to the program can be heard on the floor of this House?

Mr. SNELL. We had simply the proposition before us to consider this legislation.

Mr. POU. Mr. Speaker, will the gentleman yield?

Mr. SNELL. Certainly.

Mr. POU. When this matter was before the Committee on Rules statements were heard, it seems to me, from gentlemen representing the pros and cons from every angle, and I think that will be the case if we adhere to the agreement.

Mr. SNELL. I do not think anybody would oppose it. The time on the majority side and the time on the minority side, as I say, was to be divided equally, and so far as I know the agreement was satisfactory to everybody who appeared before the Committee on Rules.

Mr. LAGUARDIA. But if the time is not controlled equally by the gentlemen on this side and on that side it will not be equally divided.

Mr. SNELL. Half the time is allotted to the gentleman from Pennsylvania [Mr. BUTLER], who will divide it equally.

Mr. LAGUARDIA. The division of the time ought not to be left to the gentleman from Pennsylvania.

Mr. POU. I think it will be found that the chairman of the Committee on Naval Affairs [Mr. BUTLER] will carry out in good faith the understanding of the committee, that he will yield one-half of the time to those who are opposed to this bill for the reasons set forth by the gentleman from New York.

Mr. LAGUARDIA. The gentleman from Pennsylvania has just stated the contrary.

Mr. BLACK of New York. No; he said he would yield me some of his time. He did not say he would yield to those opposed to the bill. The President's program has got to be considered on this floor.

Mr. SNELL. Mr. Speaker, I can not yield further. I move the previous question on the adoption of the rule.

The SPEAKER. The gentleman from New York moves the previous question on the adoption of the rule. The question is on agreeing to that motion.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. LAGUARDIA. A division, Mr. Speaker.

The SPEAKER. The gentleman from New York calls for a division.

The House divided; and there were—ayes 57, noes 7.

Mr. LAGUARDIA. Mr. Speaker, I object to the vote. There is no quorum present. I ask for a roll call.

The SPEAKER. Evidently there is no quorum present. Those who agree to the motion that the previous question be ordered will, when their names are called, answer "yea." Those opposed will answer "nay."

The question was taken; and there were—yeas 321, nays 14, not voting 99, as follows:

Palmer	Sears, Fla.	Swing	Winter
Perkins	Sirovich	Taylor, Colo.	Yates
Prall	Spearing	Taylor, Tenn.	

So the previous question was ordered.

The Clerk announced the following pairs:

Until further notice:

Mr. Begg with Mr. Tucker.
Mr. Johnson of South Dakota with Mr. Hastings.
Mr. Yates with Mr. Davey.
Mr. Kiess with Mr. Almon.
Mr. McLaughlin with Mr. Sirovich.
Mr. Palmer with Mr. Driver.
Mr. Kendall with Mr. Sears of Florida.
Mr. Sweet with Mr. Quayle.
Mr. Purnell with Mr. Kerr.
Mr. Michaelson with Mr. Sullivan.
Mr. Swing with Mr. Connally of Texas.
Mr. Pratt with Mr. Harrison.
Mr. Taylor of Tennessee with Mr. Larsen.
Mr. Magrady with Mr. Bankhead.
Mr. Strong of Pennsylvania with Mr. Tillman.
Mr. Lampert with Mr. Jacobstein.
Mr. Buckbee with Mr. Sabath.
Mr. Stobbs with Mr. Igoe.
Mr. Cramton with Mr. Montague.
Mr. Dowell with Mr. Cohen.
Mr. Hughes with Mrs. Norton of New Jersey.
Mr. Anthony with Mr. Gallivan.
Mr. Connolly of Pennsylvania with Mr. Taylor of Colorado.
Mr. Gifford with Mr. Kindred.
Mr. Crowther with Mr. O'Connell.
Mr. Frear with Mr. Douglass of Massachusetts.
Mr. Sanders of New York with Mr. King.
Mr. Curry with Mr. Spearing.
Mr. Stalker with Mr. Combs.
Mr. Perkins with Mr. Kemp.
Mr. Jenkins with Mr. McSwain.
Mr. Beck of Pennsylvania with Mr. Prall.
Mr. Campbell with Mr. Corning.
Mr. Strother with Mr. Linthicum.
Mr. Christopherson with Mr. Moore of New Jersey.
Mr. Brand of Ohio with Mr. Goldsborough.
Mr. Glynn with Mr. O'Connor of New York.
Mr. Rathbone with Mr. Carley.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. McCLINTIC. Mr. Speaker, I ask unanimous consent to make an announcement which will cover about three minutes.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to address the House for three minutes. Is there objection?

There was no objection.

Mr. McCLINTIC. Mr. Speaker, much to my regret a disagreement has come up with respect to the division of time on this bill, and I want to make myself perfectly plain before the Members. Then I will suggest the remedy.

In the beginning, when this rule was drawn, it provided that one-half of the time should be given to the chairman and one-half of the time to the ranking minority member. This would have prevented the minority on the Naval Affairs Committee from having any time on this bill, but the gentleman from New York [Mr. SNELL] and the other members of the Rules Committee wanted to be fair, and it was suggested that a gentleman's agreement be made whereby I should yield one-half of my time to the gentleman from Georgia [Mr. VINSON], and that the gentleman from Pennsylvania [Mr. BUTLER] should yield one-half of his time to those who are opposed to the bill on that side.

Mr. SNELL. I think that statement is absolutely correct up to the present time.

Mr. McCLINTIC. Following that statement I advised my colleague [Mr. VINSON] that whenever the gentleman from Pennsylvania [Mr. BUTLER] yielded one-half of his time to some one on that side who was opposed to the bill, I, of course, would yield one-half of my time to Mr. VINSON. Now, the chairman of the committee does not care to follow that suggestion, feeling and believing that he should control all of the time on that side, and that I should go ahead, regardless of the situation, and yield one-half of my time to Mr. VINSON anyhow. Now, I am going to be fair.

Mr. BUTLER. I am not going to charge the gentleman with unfairness, because the gentleman is never unfair.

Mr. McCLINTIC. I am not going to have it said that I have not kept the agreement. I spoke to the gentleman from New York [Mr. LAGUARDIA] as to whether it would be all right, and I asked him if he would not accept the responsibility of looking after half of the time. Now, the chairman of the committee does not want that kind of an arrangement made. I regret exceedingly that this misunderstanding has come up, and I would not for anything on earth fail to keep faith

with the Rules Committee, with my committee, and with the membership of the House. Therefore I yield one-half of my time to the gentleman from Georgia [Mr. VINSON].

Mr. BUTLER. Mr. Speaker, I ask for one-half minute. The House is entitled to one hour and a half in opposition to this bill, and it matters not which side it goes to, in my judgment. Of course, following out the agreement you had—I was not present when it was made—I will yield to gentlemen on this side of the House until they consume the hour and a half. If they do not consume all of the hour and a half, I shall be delighted to yield it to gentlemen on the other side.

Mr. McCLINTIC. Will the gentleman yield time to the gentleman from New York [Mr. LAGUARDIA]?

Mr. BUTLER. Yes; but I will name the time. We have already consumed three-quarters of an hour, with only 13 Members against this rule.

Mr. LAGUARDIA. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LAGUARDIA. The rule is very plain, and it has just been adopted by the House. The rule provides that the time must be equally divided and controlled by those favoring and those opposing the bill. Now, I submit, Mr. Speaker, that if one-fourth of the time is controlled by the gentleman from Oklahoma, who is opposed to the bill, and one-half of the time is controlled by the gentleman from Pennsylvania, who is in favor of the bill, and one-fourth of the time by the gentleman from Georgia, then three-fourths of the time will be controlled by gentlemen who are in favor of the bill; and the purpose of this rule is not being carried out.

The SPEAKER. The Chair understood the gentleman from Pennsylvania [Mr. BUTLER] to say he would yield one-half of his time to those opposed to the bill.

Mr. LAGUARDIA. But, Mr. Speaker, one may be opposed to this bill because he wants more than the bill calls for, and yet will ultimately vote for it. Surely that may not be considered as opposition to the bill itself. The test is whether a Member is so opposed to the bill that he will vote against it.

Mr. BUTLER. I have no acid here and I can not apply a test. If gentlemen say they are opposed to the bill I will give them time. Mr. Speaker, I suggest we get down to business and I move——

Mr. LAGUARDIA. Wait a minute. The minority has some rights here.

Mr. BUTLER. Yes.

Mr. LAGUARDIA. We have had the same experience every time we have had a naval bill up here and I have been through this two or three times before, and with all deference to the age of the gentleman from Pennsylvania I say that those few of us who are opposed to this bill are going to see that we have our rights.

Mr. BUTLER. I waive the age end of it.

The SPEAKER. The Chair thinks it would be a compliance with the terms of the rule if the arrangement just suggested were carried out.

Mr. BUTLER. I will try to carry it out and will carry it out if I know how to do it and there are plenty of gentlemen here to help me.

The SPEAKER. Of course, a final arrangement can not be made now except by unanimous consent pending a motion to go into Committee of the Whole House on the state of the Union.

Mr. LAGUARDIA. The rule provides for the division of time.

The SPEAKER. A definite arrangement as to individuals must be made by unanimous consent.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that one-half of the time be controlled by the gentleman from Pennsylvania [Mr. BUTLER] and one-half of the time by the gentleman from Oklahoma [Mr. McCLINTIC].

Mr. SNELL. Mr. Speaker, reserving the right to object, there is no unanimous consent involved in this proposition. Control of the time is definitely provided by the rule and, technically, the gentleman from Oklahoma [Mr. McCLINTIC] has one-half the time and the gentleman from Pennsylvania [Mr. BUTLER] has the other one-half; but, as I explained in presenting the rule, there was a gentleman's agreement in the Rules Committee that is not carried in the rule, and if the Lord will permit me I will never agree to another. [Laughter.]

The SPEAKER. The Chair has clearly stated there is no arrangement in the rule by which certain named individuals shall control the time.

Mr. SNELL. That is true.

The SPEAKER. That would have to be done by unanimous consent.

Mr. SNELL. Mr. McCLINTIC is the one member of the Naval Affairs Committee that is opposed to this bill and therefore he takes control of the time. It was agreed in the committee that immediately after we go into Committee of the Whole he would yield one-half of his time to the gentleman from Georgia [Mr. VINSON] and that the gentleman from Pennsylvania [Mr. BUTLER] would also yield from time to time one-half of his time to those in opposition.

Mr. BUTLER. And I will, if I only have the chance to do it. I can not do it now.

Mr. GARRETT of Tennessee. Mr. Speaker, I would like to make this statement, giving my understanding of what was suggested in the Committee on Rules. The gentleman from Pennsylvania was not at the hearing. The gentleman from Illinois [Mr. BRITTEN] was there representing the gentleman from Pennsylvania [Mr. BUTLER]. I thought everything had been smoothed out.

Mr. SNELL. That is what we all thought.

Mr. GARRETT of Tennessee. I really thought this is what was going to occur: That so soon as the rule had been adopted the gentleman from Oklahoma would announce that one-half of the time controlled by him was yielded to the gentleman from Georgia [Mr. VINSON] to be controlled by him, and to yield as he might see fit, it being the understanding that the gentleman from Georgia was in favor of the bill. I then supposed, although I can not say that this was agreed to by the representative of the Naval Affairs chairman, but I really supposed that the gentleman in charge upon the majority side of the House would yield to some one individual opposed to the bill one-half of the time to be controlled by that individual and yielded by him. I had no idea who that individual would be because I understood that all the majority members of the committee were in favor of the bill. Now, this is what I thought would happen. So far as this side of the House is concerned it is proper to say that the agreement has been fully carried out by the minority. The gentleman from Oklahoma [Mr. McCLINTIC] has yielded one-half of his time to the gentleman from Georgia.

Mr. SPEAKS. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Ohio rise?

Mr. SPEAKS. I desire to ascertain what portion of all the time allotted to general debate is assigned to those who are opposed to the bill.

Mr. SNELL. One-half of the time, or three hours.

The SPEAKER. The Chair would suggest there is nothing pending before the House.

Mr. LAGUARDIA. I have a unanimous-consent request pending, Mr. Speaker.

Mr. SNELL. Mr. Speaker, I make the point of order that no such unanimous-consent request is in order at the present time.

Mr. BUTLER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Pennsylvania.

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were—ayes 112, noes 13.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 11526, with Mr. BACON in the chair.

The Clerk read the title of the bill.

Mr. BUTLER. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BUTLER. Mr. Chairman, I shall only take about three minutes. I desire to commend the report of the Committee on Naval Affairs to the Committee of the Whole House, and I do sincerely hope, without great opposition, the House will accept it. Many, many men in this House were consulted before this conclusion was reached. If you will look at the report you will find it is signed by 20 members out of the 21 members of the Committee on Naval Affairs.

We had various views. We sat for two months, I think, my friends, in order to obtain the best information possible. We finally resolved among ourselves that we would endeavor to report a measure to this House that the House could accept and one that would be fair to the country and which the people who believe in a proper defense of the Nation would be satisfied with.

Therefore, we adopted what was offered by this country at Geneva when we were endeavoring to make a limitation. We thought no better program could be adopted, and we assumed the House would accept it.

I commend the report on this bill to Members. It was not written by me. It was written by my esteemed colleague Mr. ANDREW. I ask you now to listen to him. Later on I may have something to say on its provisions. Permit me to say in introducing Mr. ANDREW that his report is the best work of the character I have seen in 32 years. I now yield 20 minutes to the gentleman from Massachusetts [Mr. ANDREW].

Mr. ANDREW. Mr. Chairman and gentlemen, all that I intend to attempt is to explain the provisions of the bill, and I ask not to be interrupted until I have completed the different items in the bill.

This bill provides authorization for the construction of 15 cruisers and 1 aircraft carrier. The 15 cruisers are to be laid down in groups of 5 each during the next three years. The aircraft carrier is to be laid down some time during the next two years.

The committee did not feel it advisable to outline a program of construction extending beyond 1931, for the reason that in that year there will automatically be assembled in Washington another conference for the limitation of armament under the provisions of the conference of a decade ago. The outcome of the 1931 conference can not be predicted, and the situation may be different thereafter from anything that we now can foresee. Therefore this program, in so far as undertaking construction is concerned, does not go beyond the year 1931.

It provides, as I have said, for laying down 15 cruisers. The number of cruisers which are required by the Navy depends upon the two purposes for which they may be employed.

First of all, and most important, the Battle Fleet must have cruisers for scouting purposes and for the fleet's protection. Cruisers, because of their superior speed, have a great advantage over all other vessels in obtaining information as to the location and movement of the enemy fleet. They make it possible for the commander of the Battle Fleet either to avoid contact with the enemy under unfavorable conditions, or to engage under the most favorable conditions.

Because of the superiority of speed and of armament cruisers are of invaluable aid to the battle fleet for its protection, for what is called "screening."

Mr. COLE of Iowa. Will the gentleman yield?

Mr. ANDREW. I will for a question.

Mr. COLE of Iowa. Does the gentleman take any stock in the statement of the British experts that a 10,000-ton cruiser is not big enough to fight and too big to run away?

Mr. ANDREW. I am going to touch on the 10,000-ton cruiser in a moment.

Mr. BUTLER. Did the gentleman from Massachusetts ever hear any such statement as that?

Mr. ANDREW. I never did.

Mr. BUTLER. And I never did. It may be I was asleep. [Laughter.]

Mr. COLE of Iowa. If the gentleman will read the newspapers——

Mr. BUTLER. I do not read them; the Bible is a good thing for a man of my age to read. [Laughter.]

Mr. ANDREW. Another purpose of cruisers is for detached duty, either for convoying merchant ships or transports of munitions and troops, or for detached service in protecting strategic points. In the case of our own cruisers detached service would be necessary for the protection of our principal ports and the approaches to the Panama Canal, so vital to our trade and our defense, and the Hawaiian Islands.

The number of cruisers needed by the Navy depends on what is required for these two purposes. Admiral Jellicoe last summer at Geneva stated that it was "a well-accepted view" that five cruisers should be available for every three battleships. We have in our fleet 18 battleships. That would presuppose a requirement of 30 cruisers.

Admiral Jellicoe stated for the British fleet that they would need for detached service some 45 vessels for the protection of ports and harbors and trade routes and to convoy merchant ships.

In the hearings before our committee, Admiral Hughes, speaking for the Navy General Board, outlined in great detail the need of cruisers for our fleet. The description he gave of the American battle fleet in action, spreading over a width of 30 miles and a depth of between 200 and 500 miles, and his outline of the functions that the cruisers would perform was very illuminating, and I will read it into the record. He said:

> The present fleet with its necessary train of auxiliary vessels occupies when it moves at sea an area not less than 30 miles in diameter. During the movement it will be necessary to guard against surprise attack, to guard the outer part of the formation from any vessel or vessels seeking to penetrate the formation for information, or for attack.
>
> Naval experience to date indicates that the best way to guard against surprise is by scouting areas far beyond the actual area occupied by the fleet. With a limited number of scouting vessels it is not possible to scout the ocean, but only a comparatively narrow band through which the fleet expects to pass. The usual form of protective scouting is to send vessels from 200 to 500 miles in advance of the fleet along its proposed course. Such a scouting line to be effective must be a minimum length of 250 miles. In average weather conditions the maximum distance between vessels would be not more than 25 miles, from which is derived the minimum number of 10 vessels on the advanced scouting line.
>
> As the fleet moves by day and by night, and as visibility at night is very limited, it is extremely desirable that the scouting line be a double line, so that vessels which pass through the first line during dark will be sighted by the second line during daylight. Lack of vessels may make the second line impossible. Regardless of whether the second line is with the fleet or not, there are required in the fleet formation itself vessels capable of resisting at and beyond the outer edge of the fleet formation any vessel that seeks to force its way into the formation, either for attack or for observation of the fleet. The minimum number of vessels required for this particular function is eight. Even with this number, the vessels if evenly distributed on the outer fringe of the formation would be some 12 miles apart. It may well happen that attacks will be made upon the cruising formation of the fleet by groups of enemy cruisers. It is therefore desirable that there be assembled in a central position in the formation a striking group of cruisers ready to oppose an attack coming from any direction, and that this striking group of cruisers should number at least eight. Such a group would give a marked increase in the defensive measures of the fleet. This gives a minimum total of 26 cruisers required with the fleet in an overseas expedition.

According to Admiral Hughes, the minimum requirements of our fleet to-day in cruisers are 28; 26 for the fleet proper and 2 destroyer-squadron flagships. For the protection of what he calls focal or strategic points, he said we needed 9 cruisers, and for convoy work, 6. In other words, 28 cruisers for the fleet, or 2 less than those stated to be required according to the formula of Admiral Jellicoe, and in addition to these 28 cruisers, 15 for detached service, either for convoy work or for the protection of strategic points, making in all 43.

Mr. BLACK of New York. How does that compare with the Jellicoe recommendations for the British fleet?

Mr. ANDREW. The Jellicoe recommendations for the British fleet were 45 cruisers for detached service, 70 cruisers in all.

It being understood that, according to the accepted views of our Navy General Board, confirmed by the authorities of the other countries, we require a minimum of 43 cruisers, what have we in the way of cruisers?

You will find carried on our Navy list 22 cruisers of an average age of 24 years to-day. According to the generally accepted standards, the life of a cruiser is 20 years, after which it becomes obsolete. The 22 cruisers with an average age of 24 years are therefore all obsolete, according to ordinary standards. All but five of them are completely out of commission. One of those still in commission is the *Rochester*, which was built in 1893 and was called the *New York* in the Spanish War. It has been made over for use as a sort of transport and headquarters ship in the Tropics, and for this purpose ventilating systems have been installed and arrangements for sleeping out of doors.

Of the others in commission, one is the *Seattle*, which is a receiving ship in New York City. Another is the *Pittsburgh*, which was completed in 1905 and is in Chinese waters, serving the same purpose as the *Rochester*. From the point of view either of offensive or defensive effort, none of those 22 vessels is of any account whatsoever.

What have we in the way of cruisers, besides those 22 obsolete vessels, practically all out of commission, some of them used as barracks, some as receiving ships, and none of any strategic value? We have only 10 cruisers which were finished between 1923 and 1925. They are 6,600-ton cruisers of what are called the *Omaha* type, and are equipped with 6-inch guns. Then, under the 1924 program, we authorized the construction of eight additional cruisers to have a displacement of 10,000 tons and to be equipped with 8-inch guns. Of these only two are actually laid down. I may say now that there is a vast difference between the cruisers equipped with 8-inch guns and the cruisers equipped with 6-inch guns. In respect to range there is a difference of some 7 miles. The 10 cruisers we have of recent construction are equipped with 6-inch guns. We have, however, laid down two under the 1924 program, and six others have been appropriated for and will be built. In other words, we have to-day built and building 18 cruisers, and that is all.

If you recall what I said a moment ago as to the needs of our Navy for cruisers, that, according to all of the accepted authorities, we need 43; that we need 28 for service with the

Battle Fleet alone, you can see that we still lack 10 of a sufficient number to accompany the fleet, even if we had none to protect trade routes or to do convoy work.

Our proposal to-day is that in the next three years we should build 15 additional 10,000-ton cruisers equipped with 8-inch guns, which would give us altogether 33 cruisers, still 10 less than the number recommended by the Navy General Board. I repeat, when we have these 15 additional cruisers constructed, we shall still be short by 10 of the supposed requirements of our Navy.

Mr. BLACK of New York. And how many short of the British equipment in that respect?

Mr. ANDREW. I was going to speak in a moment of the relative strength, but I will turn to that now. Of course, the requirements of the fleet itself are largely determined by the number of battleships which we have, and the number of battleships which we have retained was determined by the conference in Washington. If, in addition to the 800,000 tons, approximately, which we scrapped, the 30-odd ships then built and building which we scrapped—we had at that time determined to scrap all but 10 and the British all but 10—we should not need so many cruisers to-day as is the case. It was implicit throughout the arms conference in Washington, I think, that certain standards were to be established between the great naval powers, a standard of parity between the two great fleets, that of the United States and that of Great Britain, and the standard of 5 to 3 as between our fleet and that of Japan. At Geneva, when Ambassador Gibson opened the discussion the first day, he said:

> Before suggesting tonnage allocations in the various classes, I desire to state that we frankly recognize that naval requirements are relative, that building programs on the part of one power may well require corresponding programs on the part of others, and that if these limits were adjusted for one of the three powers, they should be adjusted for all.

Then he proposed, representing the United States delegation, that the United States and Great Britain should have a total tonnage in cruisers of between 250,000 and 300,000 tons, and that Japan should have a total tonnage of 150,000 to 180,000 tons.

Now, all that we are proposing in the way of cruisers to-day will only lift our total tonnage to the level of approximately 300,000 tons, which was proposed by our delegates in Geneva as a tonnage for the American and British fleets. But the British cruiser fleet will still exceed our own in tonnage by 200,000 tons.

Now, let me state very briefly just how the principal naval powers stand to-day in relative cruiser strength. At the present time the United States, as I said, has built and is building 18 cruisers, with a tonnage of 146,000; the British Empire has to-day 63 cruisers, as compared with our 18, with a tonnage of 386,000; Japan has 33, with a tonnage of 206,000 tons. In numbers the ratio between the cruisers of the three countries stands as follows: The British Empire, 5; Japan, 2.6; the United States, 1.4. In total tonnage the ratio of the three countries stands in this proportion: The British Empire, 5; Japan, 2.7; the United States, 1.9.

If the 15 cruisers that we authorize in this bill are constructed, and assuming that the British and the Japanese were to abandon all present projects of further building, the situation would then stand as follows: The United States would have 33 cruisers, with a tonnage of 296,000; the British Empire would have 63, with a tonnage of 386,000; and Japan would have 33, the same number that we have, with a tonnage of 266,000.

I think those members of the Committee on Naval Affairs who heard the hearings on this question are inclined to feel that different nations have different requirements and different problems to meet, and that on the whole we have no great reason to feel perturbed at the superior number and tonnage of the British cruisers of small size. A very large proportion of their cruisers are of less than 5,000 tons.

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield?

Mr. ANDREW. Yes.

Mr. BLACK of New York. Has the gentleman made a comparison of the 10,000-ton cruisers?

Mr. ANDREW. I am coming to that.

Mr. HUDSON. Mr. Chairman, will the gentleman yield?

Mr. ANDREW. Yes.

Mr. HUDSON. Is it not considered that these small cruisers of the British Navy are not so much of an asset as they seem to be as compared with the total tonnage, so that we ought to realize their insufficiency?

Mr. ANDREW. Yes; they have a greater number because of their far-flung possessions. They have some 40 cruisers of less than 5,000 tons.

Mr. BLACK of New York. Does the Naval Board agree with the gentleman?

Mr. ANDREW. I can not answer whether the Naval Board agrees with me or not.

Mr. O'CONNOR of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. ANDREW. Yes.

Mr. O'CONNOR of Louisiana. It may not be a relevant question, but has the committee ever considered the necessity or the advisability of relocating the navy yards on the Atlantic and Pacific coasts?

Mr. ANDREW. I do not wish to go into that, not even for the gentleman from New Orleans although I realize his interest.

I want rather to call your attention to a comparison of the larger cruisers of the several countries, which after all is of far more importance to us to-day. Up to the time of the Washington conference no country, so far as I know, had ever built a 10,000-ton cruiser armed with 8-inch guns.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. BUTLER. Mr. Chairman, inasmuch as the gentleman from Massachusetts has prepared this report, I am going to make a special allowance in his favor, and to no one else. I am going to yield to him 10 minutes more. He is better qualified to speak than some of the rest of us.

Mr. SPEAKS. Mr. Chairman, will the gentleman yield for a question?

Mr. ANDREW. Yes.

Mr. SPEAKS. The gentleman stated that different nations differed in their naval requirements.

Mr. ANDREW. Yes.

Mr. SPEAKS. Consider the United States and England for purposes of comparison: Is there any logical reason why the United States should maintain a navy equal to that of Great Britain, in view of their vastly different national defense requirements? Great Britain's dependencies are scattered throughout the world, and in case of war would have many points to defend and require a naval strength far beyond that of the United States.

Mr. ANDREW. The gentleman opens up a very large question.

Mr. SPEAKS. I think it goes to the heart of the whole subject. Can the gentleman advance any reason why we should be so deeply concerned regarding the English Navy in determining the size of the Navy we require?

Mr. ANDREW. I think in the beginning of my remarks I set forth the reason why we need a certain number of cruisers to go with the fleet and for convoys.

Mr. SPEAKS. I do not consider war between England and the United States within the scope of possible happenings. But the point I am endeavoring to make clear is that in case of war, with all the lines of communication to be defended, not only for strategic and combat purposes but also for the very necessaries of life, England would require a navy several times that of the United States.

Mr. ANDREW. I do not agree in the least with the gentleman. But I do not want to be diverted from the topic I had in mind. I will say this, however: The United States has a continental coast line greater than that of any other country in the world. We have more ports and harbors and populous cities on the coast than any other country in the world. We have a sea-borne trade to-day that equals that of the British Empire, including its colonies and all of its dependencies; and that is destined, before we shall complete the fleet we are now building, to far exceed the sea-borne trade of any other country.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. ANDREW. Yes.

Mr. WAINWRIGHT. The gentleman is familiar with this subject. Is there not a consensus of agreement as to the requirements of cruisers that would be determined by the number of capital ships?

Mr. ANDREW. Yes; and that I tried to state earlier in my remarks. I wanted to say only one other thing—and I have taken much more time than I intended—and that is on the matter of the 8-inch-gun cruisers. At the time of the arms conference none such had been built anywhere in the world, but since the arms conference the British Empire has begun building such cruisers of a type that had not existed before, cruisers armed with 8-inch guns, which have a range 7 miles longer than any guns on the cruisers that we had constructed before or have constructed since. Already they have built and building 14 such 8-inch-gun cruisers and we have only laid down 2. We have only authorized the laying down of 6 more. That is a most significant contrast.

Mr. BLACK of New York. Will the gentleman yield?

Mr. ANDREW. Yes.

Mr. BLACK of New York. Does the gentleman care to state why the committee rejected the recommendations of the department and on what theory they justify their action?

Mr. ANDREW. I will state that in a word.

Mr. BLACK of New York. I think the House ought to have that information.

Mr. ANDREW. The department had recommended a program for cruisers covering a long series of years with no final date fixed. We thought it would be a great deal better to determine, so far as this committee can, that some cruisers should be actually constructed and to limit our program to the period of years before the assembling of the next arms conference. Therefore, we have provided as many as in all likelihood could be laid down before the arms conference.

Mr. BLACK of New York. What about the submarines and destroyer leaders?

Mr. ANDREW. We found there was authorization in the act of 1916 for the construction of 12 destroyers without any limit of tonnage and we felt that was sufficient. I think the committee were agreed that we ought to have more submarines than we have. We have a large amount of tonnage of small submarines available for the protection of ports but not available for service with the fleet. We have only three fleet submarines built and three building. The British have 16 built and building and 12 more authorized. The Japanese have about 25. But there are various investigations being made to-day as to the possibility of incorporating safety devices of one kind or another on submarines. There is now in the act of 1916 authority for the construction of three submarines, which we hope will be appropriated for this year, and we decided to wait until another year before asking any further authorization for submarines.

Mr. WELLER. Will the gentleman yield?

Mr. ANDREW. Yes.

Mr. WELLER. The gentleman did not state the range of the guns that are covered by this bill.

Mr. ANDREW. They are to be 8-inch-gun cruisers of the same type as the 8 we are building and as the 14 of the British.

Mr. WELLER. How far do they carry?

Mr. ANDREW. I think they are supposed to carry more than 30,000 yards.

Mr. LAGUARDIA. They will carry as far as any other 8-inch gun?

Mr. ANDREW. Yes. They will carry 7 miles farther than the 6-inch gun.

Mr. HUDSON. Will the gentleman yield?

Mr. ANDREW. Yes.

Mr. HUDSON. Did I understand the gentleman to say that the program as laid before the committee by the Navy Department was not to be completed within any definite period of years?

Mr. ANDREW. There was nothing in the bill that fixed any limit.

Mr. HUDSON. But the press carried the statement that the $740,000,000 was to be spent in five or six years.

Mr. ANDREW. It was not in the bill.

Mr. HUDSON. There was not any bill, was there?

Mr. ANDREW. There was a bill introduced in connection with it.

Mr. BUTLER. It was to go on indefinitely, and permit me to say it was told to us that this was the beginning of a program which would eventually call for the expenditure of $3,500,000,000, while the bill as reported calls for the expenditure of $274,000,000.

Mr. WATSON. Will the gentleman yield?

Mr. ANDREW. Yes.

Mr. WATSON. In the event of an international agreement that there should be no ships built, what would become of those ships that are partly constructed? Is it the intention to carry those ships away out in the middle of the ocean and sink them?

Mr. ANDREW. We hope not. We hope that will never be done again.

Mr. BUTLER. I hope I will be asphyxiated before I ever vote to destroy any other Government property.

Mr. ANDREW. Let me say this: If we construct the 15 ships now proposed in addition to the 18 we now have, we shall have no more of the 8-inch gun cruisers than the British will have at that time, and if any agreement were entered into which would call for the discontinuance of further construction of ships, none of our ships would be destroyed unless the British were willing to destroy ships at the same time.

Mr. WATSON. Then it is understood that those which are partly completed will be finished?

Mr. ANDREW. Yes. And if they were finished we should only have reached an equality with the British in 8-inch-gun cruisers and still be far behind them in all other sorts of cruisers.

Mr. LAGUARDIA. Does the gentleman mean an equality as to tonnage in ships?

Mr. ANDREW. I mean only an equality as to the 8-inch-gun cruisers.

Mr. BRITTEN. The gentleman does not mean to infer that when these 15 cruisers are built we will have an equality of cruiser strength with Great Britain?

Mr. ANDREW. I mean only as far as the 8-inch-gun cruisers are concerned. We would still be short several hundred thousand tons in tonnage of cruisers of all sorts.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

Mr. BUTLER. Mr. Chairman, the gentleman from Oklahoma has very generously agreed that my colleague [Mr. WOODRUFF] may speak for five minutes.

The CHAIRMAN. The gentleman from Michigan is recognized for five minutes.

Mr. WOODRUFF. Mr. Chairman, as a member of the Naval Affairs Committee I can not leave unchallenged some of the remarks that were made a few moments ago by my colleague from Ohio, General SPEAKS, when he was referring to the needs of the British as far as naval armament is concerned.

We have heard much about England's far-flung bread lines. England, theoretically at least, bases her naval needs upon the fact that she necessarily must receive her food supplies from across the seas. I want to call your attention to one thing, and that is in case of war with a power in the Western Hemisphere England's bread lines are not across the Atlantic Ocean but across the North Sea, across the English Channel, and down through the great Bay of Biscay. England's bread lines under these conditions would be short indeed. In case of a war with a European country her bread lines, perhaps, would extend across the Atlantic, but with her great fleet she could probably protect them very fully.

As a matter of fact, friends, her bread lines are not the things which are troubling the English statesmen. The thing that is troubling the English statesmen is their economic lines. Their trade extends to all parts of the world, as does ours, and they desire to protect these trade lines, because upon them depends their very life.

I want to call the attention of the members of the committee to the fact that to all intents and purposes our bread lines extend across the seas, because it is necessary to have the products of foreign countries in order to get the food supplies from our country districts into our great cities. I have in mind manganese, without which we could not build or run the railroads in this country. I have in mind rubber, without which we could not transport over our highways the food supplies that are necessary to keep life in the bodies of the people of our cities. When they talk to me about the needs of England in the way of naval equipment, I can see that in this great country of ours, with our far-flung economic lines, it is just as necessary for us to have the same amount of naval armament as Great Britain.

I want to say, too, in this connection, that no one will go farther than I will go on the way of naval disarmament if everyone will go along the same road with us. To-day, if I had the power, I would sink every battleship in the world, because if no one else had a battleship, certainly, if our intentions toward other nations are what they should be, we would need no battleships. I hope the time may come when this country can enter into an agreement with other countries of the world to scrap more than half of the navies now existing in the world. I hope this time may come soon.

I was in hopes when the administration handed to this country the program it had laid out in the bill as originally introduced, this in itself would be an inducement for other nations to meet with us and agree to disarm. While I am satisfied with the bill as it is, I am not as well satisfied as I would be, perhaps, if it had included some 21 submarines, giving to us as nearly as possible three-fifths of the original five-year program to be laid down in three of the five years. I think if the Congress had passed the bill as it was originally introduced, that long before 1931 there would have been another disarmament conference and the result would be that we would build less ships under that program than we will build under this program. [Applause.]

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McCLINTIC. Mr. Chairman, ladies, and gentlemen, there has been more speed displayed in the consideration of this bill than any that I have ever witnessed since I have been a Member of Congress. To hear certain of my colleagues on this committee talk, you would think that the British were advancing upon this Capital like they did in 1812. To hear the arguments that have been presented you would think that this

Nation was getting ready to-morrow to fight Great Britain. In other words, if the representatives of the European nations read the proceedings of this House, they are bound to feel that we are secretly, silently, preparing for a war with their country. Such tommyrot and such foolishness as this is enough to disgust the sane citizenship of this Nation.

I have visited in two or three English countries. I know something about their sentiment when it comes to the white races. I have here before me splendid statements from their leading publications which show their attitude of friendliness for our country.

But what would this committee have you believe? They would have you believe that an emergency exists at the present time and that we are about to face a serious situation throughout this Nation whereby we are liable to be attacked within the next few months. Does any such situation as this exist?

Is there any Member of this House, I care not whether he is a member of our committee or not, who can point to a single, solitary reason why this legislation should supplant flood control, farm legislation, soldiers' legislation, Muscle Shoals, and the other bills that affect the very bone and sinew of this Nation? No; you can not do it because there is not any such reason.

I will tell you what the real reason is. You heard a gentleman on the Republican side make the statement a few minutes ago when he said that 40 per cent of the laborers of this country are now idle. I have here a compilation as to the condition of the shipbuilding corporations of America, and it shows that last year, in comparison with Great Britain, the United States only turned out 124,000 tons of ships when Great Britain and Ireland turned out 1,225,800 tons.

In other words Great Britain is building up her merchant marine just like this country ought to be doing. What is a Navy worth without a merchant marine? It is not worth 15 cents and you know it. We have got to have a merchant marine if we are to be successful against any nation with whom we might engage in war when it becomes necessary to carry food supplies and transport men. That is the situation. Every member of the committee knows that Mr. Mellon has interested himself at different times in the past in behalf of the shipbuilding corporations. They know it and here is the answer. They are hungry. They are out of meat; they are a good deal like the old negro woman that went down to see Governor Taylor to get a pardon for her husband. The governor said, "Mandy, what is your husband in the penitentiary for?" She says, "Hog stealing." He sent for the record and looking it over he said, "Why, your husband deliberately stole a hog, butchered it, and put it in his own smokehouse. How can I give him a pardon?" Mandy said, "Because, Governor, I am out of meat." [Laughter.]

These shipbuilding corporations are out of meat, they are out of business, or practically so, and so this administration says, Give them some business, help them out, whether the needs of the Nation warrant it or not.

I am amazed at the situation that exists in this country at the present time. Everything is peaceable, all the other nations of the world are apparently satisfied, not a single sign anywhere of any kind of trouble, and yet this committee rushes this report in here so fast that I hardly have time to get my minority views published. They wouldn't even let the rule be debated, they were so much in a hurry.

They say, "Let us get these ships while the getting is good; we are going to have another disarmament conference in three more years, and we know if we do not get these ships laid down and started and some built before the disarmament conference is held here in Washington the nations might agree to something so that we would lose our ships, and that would be a terrible calamity for the Navy."

What about the Navy? There is a little coterie of officers up there that can give Tammany cards and spades and beat them to a frazzle in diplomacy. They are smart, foxy, and slick; they come before the public and suggest appropriations of $4,000,000,000 to be expended in nine years. They did not expect to expend that money, but they knew if they asked for 15 cruisers they wouldn't get them. So they asked for $4,000,000,000 worth of ships with the hope that they might pare that down and get the original amount which they desired; and, of course, this committee has swallowed the bait, hook, line, and sinker.

Now, I want the Navy to have just what it needs. I will vote for every dollar that is necesary, but I will never be a party to voting for a lot of ships that can not be used in time of war unless they are operated in zones that have aircraft to defend them.

What about cruisers? Can cruisers operate in time of war unless they have guns that have a superior range sufficient to take care of them if they go up againt an enemy fleet? No, they can not, and nobody but an old superannuated antique, when it comes to warfare, will admit that they can.

Now, I want to say to you that during the World War, Germany, with about 100 submarines, sunk 11,000,000 tons of commerce. In one year she sank nearly 6,000,000 tons of commerce.

A submarine is the only ship that can successfully travel alone on the ocean, and yet this committee does not want any submarines. Why? Because the so-called experts in the Navy, those men who want lovely berths, lovely equipment, fine accommodations, do not want to ride in submarines. That is the reason. A submarine can go closer to ports or harbors than any other kind of ships.

Mr. WOODRUFF. Will the gentleman yield?

Mr. McCLINTIC. No; it is not necessary that I should yield to members of the committee, for they know my position. I hope the gentleman will not bother me. I am the only member of the committee that is against the bill, and I have a heavy enough load to carry as it is. I yielded five minutes to the gentleman, and I hope he will not now bother me.

I shall make the best speech I know how to make. The gentleman may not agree with me; in fact, I know that he does not, because if he did agree with me he would have signed the minority report with me. I hope I may be able to proceed without having the continuity of my remarks broken every few minutes.

Mr. WOODRUFF. Will the gentleman yield for a statement in connection with my not signing the minority report?

Mr. McCLINTIC. Mr. Chairman, I think I was talking about submarines when the gentleman from Michigan interrupted me. A submarine can travel a distance of 11,000 to 15,000 miles unaccompanied by any other kind of ship. It is the only type, in fact, that will ever be able to successfully be a menace to foreign shipping if that situation should ever arise. In addition to my suggestion with respect to submarines, I say that the 15 submarines that I propose to offer as a substitute for the 15 cruisers will cost only about $75,000,000, and in addition I propose to authorize the expenditure of $1,000,000 to be utilized in the construction of an aircraft deck or platform, to be placed immediately over the turrets on a battleship, having in mind that the platform above the turrets can be hinged and raised and lowered like a drawbridge in case it is decided to ever use the guns. By an expenditure of $18,000,000, if the information given me is correct, it would make a battleship an independent unit, making it its own aircraft carrier, and would enable it to fight an enemy, if the case need be, at a distance of approximately 200 miles. So I say it is far better to spend about $93,000,000 in such a way as to make our Navy so that it could defend itself successfully against every nation in the world, if need be; and I think it would be a waste of money to appropriate $274,000,000 when you can get five times the amount of protection by following the suggestion that I have offered, which is agreed to by some of the leading experts, not of the United States, but of other nations in the world.

What about these aircraft carriers? There is a lot of prejudice in the Navy against them. Many officers do not believe in aircraft. In my opinion no engagement, either on land or on sea, would ever be successfully concluded in the future until aircraft has played its part, and the nation that wins in the air will be the victor. Therefore if we can spend $1,000,000 each on the 18 battleships that we have in commission at the present time, and make each of them its own aircraft carrier and enable its range to be increased from about 24 miles to 200 miles, certainly this Congress ought to be willing to go along with me on a suggestion of that kind.

Mr. Chairman, I find that this Nation is composed of three separate kinds of citizens. There is a class that is willing to accept the recommendation of the naval experts, regardless of what the cost might be. There is another class that does not believe in war and that would not expend a dime for national defense. There is the third class of citizen who believes in new appliances of war and who is willing to adopt the same when making preparation for the defense of this Nation. I think I have classified them correctly. It is not a pleasant situation for anyone to occupy in opposition to all of the members of his own committee. It is much easier to go along with them; but when it comes to principle and public policy, one has a duty to perform. I have all of the respect anyone can have for those who disagree with me, and I have always tried to uphold principle and tried to do that which I think is right. This committee has had exhaustive hearings on this bill. Many different classes of people have come before it. Some of them I have agreed with and some of them I have disagreed with, just as much as any member of the committee. I think I can safely

say that I am in accord with every member of the committee as to final results, and that the only difference that exists between myself and the members of the committee is on the question of policy, the question of power, and what is the best procedure to follow in order to make this Nation suitably prepared.

Mr. HUDSON. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC. Yes.

Mr. HUDSON. The gentleman spoke about having held long hearings on this bill. I have sent for a copy of the hearings, and I find they are in 30 different parts. The last one of them is dated March 6, and I believe the bill was reported out on March 6.

Mr. McCLINTIC. The gentleman is mistaken.

Mr. HUDSON. Why are they not bound?

Mr. McCLINTIC. The gentleman is not correct. Those hearings do not refer to the naval bill. They refer to other matters before the committee—part of them at least.

Mr. HUDSON. Are the hearings bound in a volume?

Mr. McCLINTIC. No. The Naval Affairs Committee had many naval officers before it. I remember that I asked Admiral McVey a question. I said in substance, if it is admitted that no nation on earth can land an army on our shores as long as we have adequate aircraft, do you think it is better to report out this naval bill now or to first take care of flood control and agricultural relief and those measures that affect the economic conditions of the country? He answered, of course, that the Navy should come first.

I suppose if I were an officer in the Navy and had no knowledge of the conditions that exist in the interior of this country, I possibly would assume the same position. But I feel, as long as there is nothing confronting us at the present time that would warrant any apprehension or fear, that this Congress should proceed in an orderly manner, having in mind the taking care of the conditions that are most urgent; and that is the position I have taken from the beginning to the end.

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC. Not now.

All of you know that the Geneva conference failed. It was prophesied when Admiral Hilary Jones was sent to this conference that it would fail. I heard an admiral say less than a week ago that it failed when Admiral Hilary Jones was selected as the head of those who represented the Navy of the United States at Geneva, and that there would be no agreement. I was amazed when I heard Admiral Hilary Jones testify before our committee and admit that he had been in England off and on for two years prior to the convening of that conference at Geneva. Doing what? What else would an admiral be doing over there if he was not conferring with the Admiralty? I am surprised that this Nation would ever expect a naval officer to agree with a disarmament policy.

Who is this Admiral Hilary Jones? He is the one who appeared before the Lampert Aircraft Committee and tried to qualify as an aircraft specialist, reading a document or a speech containing more dynamite against aircraft than anybody I ever heard. I was present. This is the same admiral who was hurried over to the scene of the *Shenandoah* disaster and put in charge in order to rescue that situation. As I recall, he was also a member of the President's Aircraft Board and qualified there as an expert in aircraft.

Mr. WOODRUFF. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC. Not yet. And yet this Nation selects this type of citizen and sends him over to Geneva to head the American representatives at the conference to agree with the other nations of the world.

In the Navy or in private life or anywhere else the most despicable character in life is one who accepts responsibility for a given purpose or duty and then goes out and deliberately tries to do that which he is not expected to do. I hope in the future that those in our Government who are charged with the responsibility of selecting men to represent us in conferences of this kind will select men who really know something about the financial, economic, and agricultural conditions in this country, instead of naval officers who have no knowledge along those lines, because they are only trained to do a certain thing and to do it in a certain way.

If I were an admiral of the Navy, I am willing to confess, I would be fighting for all the ships I could get, just the same; but I do think I would have a sufficient amount of conscience to ask that they put somebody else on the committee.

Mr. WOODRUFF. Mr. Chairman, will the gentleman yield just there?

Mr. McCLINTIC. I will yield for a question.

Mr. WOODRUFF. In view of the gentleman's statement, would he advocate the replacing of an officer of the Navy by a civilian?

Mr. McCLINTIC. I am glad the gentleman has asked that question. Over in England they do not appoint graduates of the naval academy to the secretaryship of the department of national defense, feeling and believing that such officers, if they were graduates of a military academy or naval academy would be in such a position that they could not say "No" to members of their classes and those who have the same qualifications as themselves. I think the thing that has been responsible for our Navy sinking to the lowest ebb it has ever reached in the history of our Nation, as many of us think, is the fact that we have at the head of the Navy a graduate of Annapolis, a man who could not say "No" to members of his own class; a man who has selected as Director of Operations one member of his class, and has chosen as commander in chief of the Navy another member of his class; and therefore there is no proper balance established between the citizens of the country and the military authorities, as there should be.

Mr. WOODRUFF. Mr. Chairman, will the gentleman yield now?

Mr. McCLINTIC. Not now. I think I have answered the gentleman's question. He can get a little more time. I would like to make a speech in my own way. I say this with all respect to my friend from Michigan.

Mr. WOODRUFF. Regardless of what the gentleman from Michigan may get in the way of time——

The CHAIRMAN. The gentleman from Oklahoma refuses to yield.

Mr. McCLINTIC. I have assumed one position, and I am trying as best I know how to represent a sentiment that I believe prevails in the Nation; and after I am through the gentleman from Michigan and I can step into the cloakroom and discuss these things.

It is often embarrassing to take a stand against all of the membership of the Naval Affairs Committee. It would be much more pleasant to agree with the findings of such a body, yet when principle and governmental policies are at stake, I have always felt that it was duty to take a position in line with my belief on public questions, having in mind that there is a large citizenship of the Nation who feel and believe as I do on this subject. This is not the first time I have either pioneered or taken a position alone from the other members of the committee on public questions, and in order that the Members of the House may have some information along this line, I am going to call attention to some of the guesses I have made in the past when either standing alone or pioneering in the offering of suggestions that differed somewhat from the Navy and the majority of the members of the committee.

(a) Being an early believer in aircraft, I prophesied many years ago that a bomb dropped from such a plane would be able to sink any kind of a ship. It will be remembered that Secretary Wilbur, in answer to one of my questions as to whether or not such a bomb would jam the turrets of such a ship, replied that the question was untenable and ridiculous. Since that date cruisers and battleships have been sunk by a single bomb, and it has been universally acknowledged that my prediction along this line was correct.

(b) I was alone in protesting the findings of a court-martial which related to the great loss of life and the sinking of more than $11,000,000 worth of property on the coast of California. Later this was disapproved by Secretary Denby.

(c) I gave out the first interview suggesting the teaching of aircraft at Annapolis, and the final suggestion was carried from my office by Commander Snead to the special board having this subject under consideration.

(d) In a speech made before the House, I suggested the advisability of using large dirigibles as airplane carriers, stating that they could be suspended underneath and launched at will in the air. It has been proved feasible.

(e) In a speech before the House, I called attention to the camouflage and deceit with reference to the reported failure of aircraft in the sinking of the *Washington*. Notwithstanding that reports were given out that thousands of pounds of explosive bombs were dropped on this ship, it was afterwards proved that not a single explosive bomb was dropped from a plane.

(f) When it was proposed that the *Shenandoah* should go to the North Pole I joined with Congressman TAYLOR in expressing the opinion that if such a trip was made it would result in disaster. Notwithstanding the fact that the committee disapproved our suggestions, President Coolidge intervened and saved what might have been an embarrassing situation.

(g) Having in mind that no fleet can be secure without aircraft protection, I have made the first suggestion that an extra deck be placed above the turrets on each battleship, thereby enabling the same to function alone in this connection.

(h) I have felt warranted in standing behind Admiral Magruder in his charges concerning wasteful expenditures in the Navy. I know that it was proved to the satisfaction of the

committee that construction in navy yards costs more money than in private yards; that we have too many naval officers stationed in Washington; and that we have a large number of destroyers out of commission at Philadelphia and San Diego which should be utilized as a part of the fleet.

(i) I have taken the position that the President of the United States, in case of a disarmament agreement between the nations, should have the right to stop any shipbuilding program, and notwithstanding the fact that the committee stood against me 18 to 1, I am glad to say they reversed themselves and we are together for the first time I can remember in a long while.

(j) I am now alone in advancing the suggestion that, inasmuch as submarines are the only type of ship that can operate alone in time of war, it will be far better to authorize the building of this type of ship rather than cruisers, which can operate only in protected zones.

I have been thoroughly convinced of this one fact, that the longer I serve as a member of the Naval Affairs Committee the less I know concerning many details of the Navy. The system in vogue is the most complicated of any on the face of the earth, and it seems to me that those in charge of what should be the pride of this country use every known method of camouflage and deceit in trying to pull the wool over the eyes of Congress and the public in general.

There are many members of the committee who enjoy making reference to the so-called Navy experts, and I have about come to the conclusion that the true definition of a naval expert is one that can come before a committee of Congress and be successful in keeping the committee from finding out anything other than that which the Navy desires to impart. In this connection, I remember a certain admiral who told me that he enjoyed a reputation among his colleagues in the Navy for being able to come before a committee and always get away without allowing the committee to find out anything but what he wished to give in the way of testimony.

At this very moment when the country is confronted with internal problems of a serious nature, and there is not a single reason on earth for the immediate consideration of this shipbuilding program, everything is side-tracked and all of the speed possible is utilized in bringing this measure before the House of Representatives. Kings could not receive greater homage from their people than the naval officers receive from the members of the Naval Affairs Committee of Congress. Sometimes I wonder why they view these officers as if they were little tin gods. I wonder why flood control, agricultural relief, Muscle Shoals, soldier legislation, and other measures are to be side-tracked in order to let this bill come before the House. Everyone knows that there are only a few hundred million dollars in the Treasury, but the naval officers in charge of the Navy are the only ones who seem to have the key and are preparing to unload this surplus ahead of all other interests. If I voted for this bill in its present form, ahead of the legislation that is needed to take care of our internal affairs, I should be ashamed to go home and face my constituents. I have no patience with anyone who is not willing first to remove any kind of obstruction that is necessary to protect his own hearthstone and that of his neighbor; therefore, I have conscientiously opposed any such wasteful expenditure of money as is proposed in this bill from the beginning to the end.

What about these naval experts? Can anyone ever say that a single war plan prepared at the War College was afterwards used in time of war? Do any of you remember what took place during the Civil War when it was proposed to build a ship of iron? Quite a controversy arose, and the so-called naval experts opposed the construction of such a ship, one of them making the statement that "any darn fool knows that iron won't float." All of you should remember the conditions that existed with respect to our Army and Navy during the Spanish-American War, when our men were forced to use an inferior rifle and black powder, while the enemy was using up-to-date equipment which gave them a great advantage. What about the World War? Was there anyone in the Navy or the Army that had any conception of, or was even willing to use up-to-date methods? No, we had no grenades, no trench mortars; our cannon were obsolete; our submarines were of an inferior type; our aircraft was minus, and if this country had been forced into the war alone with Germany, it would not have been 30 days before we would have been humiliated by being compelled to sue for peace.

Thus, it can be seen that the so-called experts are largely a "bunch" of men that can be properly classed as those unwilling to accept new ideas, and clinging tenaciously to old battleships and other kinds of antiques that were used by their forefathers. I have no patience with any man in any vocation of life that is not willing to accept a new idea, and the more quickly this Government finds some way to retire the experts who are recommending the construction of cruisers instead of submarines and aircraft carriers, the better off this country will be.

Mr. BUTLER. Mr. Chairman, I am not going to let that remark or anything like it go by without answering it. I have had as much experience with men of the sea as the gentleman from Oklahoma has had, and there never was a better class of people on the earth than found in these men. They may not be great business men, but, by Heaven, they can and will fight when the Nation is at war, and some of our people who advocate war in peace time do not fight upon such occasions.

I want to say that Hilary Jones is the standard character of this whole naval service. [Applause.] Hilary Jones said at this conference:

> We hope that these nations will accept less than 250,000 tons. We offer the amount of 300,000 tons in the way of reaching an agreement, but we hope that a less amount will be offered by England and accepted.

That was the offer of this gentleman and his colleagues, and this is the first time I have ever heard the integrity of Admiral Jones questioned. The whole country has confidence in this great sea dog, this man who has followed the sea all his life. There has never been any reflection cast upon the character or ability of this man of gentility and sincerity, who made the best attempt he could at Geneva. He was there faced by the hero of Jutland, the man who fought the great battle of the Great War, Admiral Jellicoe. He matched him there. Do you suppose we are going to send an agriculturist over there to battle with Jellicoe? We sent the best man we had.

I have nothing further to say. This man really needs no idle words of mine in his defense, but I could not sit still and hear the character of Admiral Jones questioned for a moment.

Mr. BRITTEN. Will the gentleman yield?

Mr. BUTLER. Yes.

Mr. BRITTEN. Of all the admirals who have appeared before the Committee on Naval Affairs in the past 20 years is there anyone more outstanding in character and of a finer type than Admiral Jones?

Mr. BUTLER. It goes far beyond that. There is no officer with a finer character in the American service than Admiral Jones. I do not care whether he belongs to the Navy or whether he belongs to civilian life. He is hard to match. That is all I have to say, and I am glad I have had an opportunity to testify in a public place to the fine character, intelligence, and sincerity of this gentleman.

Mr. VINSON of Georgia. Mr. Chairman, as I understand under the agreement I am entitled to one hour and a half?

The CHAIRMAN. That is the Chair's understanding.

Mr. VINSON of Georgia. Mr. Chairman, I yield 15 minutes to my colleague from Maryland [Mr. GAMBRILL].

Mr. GAMBRILL. Mr. Chairman and members of the committee, I yield to no one in the hope that some peaceful way may be found to settle international disagreements and to control those jealousies and rivalries which for centuries have been the cause of armed conflict between nations. Differ as we may on the course pursued, nevertheless it may be said with confidence and fidelity to truth, and with a measure of satisfaction, that our country has sought to do its share in promoting the peace of the world. One may question the wisdom or lack of wisdom as shown by our failure to participate in the League of Nations, but no one can deny our unselfishness when in compliance with the mandate of the Washington conference in 1922, called by the Chief Executive of this Nation, we destroyed nearly $300,000,000 of war vessels built or building, and thereby made a notable contribution to the limitation of armament.

Encouraged by what had been accomplished at this Washington conference, the Chief Executive of this Nation invited another conference—held at Geneva in 1927—in the cherished hope that by an exchange of ideas and mutual concessions and adjustments a still further contribution to the peace of the world might thereby result. I have no doubt that the failure of the representatives to that conference to reach an agreement is as much deplored by the people of Great Britain and Japan, and the other powers not parties thereto, as it is by the people of these United States.

Let us review briefly the results of the Washington conference in 1922. An agreement was reached between Great Britain, France, Italy, Japan, and the United States that the tonnage on capital ships to be retained by the five powers, signatories to the treaty, should be—

	Tons
For Great Britain	558,950
For United States	525,850
For France	221,170
For Italy	182,000
For Japan	301,320

generally known as the 5–5–3 ratio. Unfortunately the proposal of our country, that a limitation be placed on the tonnage of auxiliary craft, cruisers, destroyers, and submarines, presented difficulties which could not be satisfactorily adjusted. So there was no tonnage limitation placed on auxiliary vessels, save and except as to the tonnage on aircraft carriers of 135,000 tons and a maximum tonnage on individual cruisers of 10,000 tons with gun caliber not in excess of 8 inches.

Interpreting the spirit of the Washington conference as a limitation on all ships of war, we in this country have gone slowly in new cruiser construction, while other nations have gone forward actively. In 1924, the Congress authorized eight cruisers of 10,000 tons each, but money was appropriated for only two. The following year three more were appropriated for. Last year the remainder were appropriated for, but in such small amounts that the five cruisers last appropriated for are less than 6 per cent completed. Aside from those building or appropriated for, our Navy has 10 cruisers of 7,500 tons displacement and 22 cruisers more than 20 years old, of which 5 only are in commission and are not to be classified as efficient ships of war.

Without going into all the details of our naval strength, which are given fully in the committee's report, and which have been amplified by other speakers, it will be observed that with the 10 efficient cruisers in commission, of the Omaha type of 7,500 tons each, and with the completion of the eight 10,000-ton cruisers being constructed, together with the 15 cruisers proposed to be authorized by this bill, our Navy will have, after these 15 additional cruisers are constructed, 33 cruisers. This is 10 cruisers less than Admiral Hughes, Chief of Naval Operations, says are needed to make a well-rounded fleet distributed as follows:

Cruisers to operate with the Battle Fleet	26
Stationed at focal points	9
On convoy duty	6
Destroyer squadron flagships	2

Your committee was influenced very largely in the curtailment of the original program submitted by the President and the Secretary of the Navy for 25 cruisers of 10,000 tons each by consideration of the proposal made at Geneva by our representatives to the representatives of Great Britain and Japan; namely, that the cruiser tonnage be restricted to from 250,000 to 300,000 tons as against the proposal of Great Britain for a minimum tonnage of about 450,000. The fact can not be too strongly emphasized that in the consideration of this program for additional cruisers, your committee has not been influenced by any desire to compete with any other naval power, and has studiously avoided making any recommendations from which such an inference could be drawn. It is unquestionably true, however, that all naval armament is in a measure relative, as has been said by the Secretary of the Navy and others, and it is likewise true that in determining what is for our country an efficient fleet, the relative strength of other navies can not be disregarded. Let me say here that there seems to have grown up in this country a school of thought obsessed with the idea that it is almost unpatriotic for one to suggest that the United States of America should have a Navy in a measure comparable with that of some other great power.

I do not belong to that school of thought; and in the consideration of what our naval strength should be, I can not, in my process of reasoning, disregard the naval strength of another great and friendly power. This may lead us to a consideration of the naval strength of Great Britain, with whom conflict of any kind is unthinkable.

That your committee has sought to avoid any semblance of competion in naval strength with Great Britain is shown by the statement that the tonnage of cruisers of 27 knots plus and 3,000 tons or greater, built, building, appropriated for, or authorized, and less than 20 years old is:

	Tons
Great Britain	410,000
United States	155,000
Japan	196,200

These figures are taken from the pamphlet of the Navy Department of the United States, prepared by the Office of Naval Intelligence, and published March, 1927. Should Great Britain authorize no additional cruisers from now until the contemplated time for the completion of the 15 cruisers proposed to be authorized by this bill, namely, six years, still her cruiser strength would be about 110,000 tons in excess of that of the United States, made up as follows:

Great Britain	Tons
40 cruisers built	194,200
14 cruisers building or appropriated for	138,000
9 cruisers authorized but not appropriated for	78,000
Total	410,200

United States	Tons
10 cruisers of the *Omaha* type	75,000
8 cruisers built or appropriated for of 10,000 tons each	80,000
15 cruisers of 10,000 tons each, proposed by this bill	150,000
Total	305,000

Japan	
19 cruisers built of a tonnage of	102,005
6 cruisers building or appropriated for	54,200
4 cruisers of 10,000 tons each	40,000
Total	196,205

(Construction program for the 4.)

It is but fair to say that of the 40 cruisers of Great Britain in commission, amounting to 194,200 tons, all but 7 are of a tonnage ranging from 3,500 to 4,765 tons and armed with 4.6-inch guns to 6.6-inch guns. The 7 cruisers which exceed this tonnage are from 7,550 to 9,750 tons, and the 14 cruisers being built or appropriated for are, with one exception, 10,000-ton ships.

In aircraft carriers Great Britain has six, with a tonnage of 107,550, as against two of the United States, of 66,000 tons, or, if the *Langley* be included, then about 79,000 tons.

In destroyers under 16 years of age it can not be denied that our Navy has a superiority of about 105,000 tons, the tonnage for the United States being 329,153 tons and for Great Britain 224,150 tons. Excess, 105,003 tons.

These figures have been given by Admiral Hughes, Chief of Naval Operations. But, as was stated by Admiral Jones, this preponderance is more in theory than in fact, and not that superiority as would seem from the cold figures. Many of these destroyers in the Navy of the United States were built during the war for a specific purpose; many were built hastily and some have a radius of action as small as 3,000 miles. However, the superiority in tonnage does exist and can not be disregarded. For this reason your committee refused to authorize 9 destroyer leaders as proposed in the original program submitted by the Navy Department, especially as authorization was given by the act of 1916 for 12 destroyers, for which no appropriations have been made and none may be deemed desirable at this time.

In submarines we have a superiority, the figures being—

	Tons
United States	93,364
Great Britain	67,688
Japan	76,407

The figures given represent the tonnage built, building, and appropriated for. Here, again, your committee deemed it unwise to indorse the program submitted by the Navy Department for 32 additional submarines, although it is true that the efficient life of a submarine is taken as 13 years, and our submarines will reach the age limit in increasing numbers during the next few years.

In any effort to determine the relative strength of the Navies of Great Britain and the United States consideration must be given to the fact that Great Britain has 888,000 tons of fast merchant ships capable of being readily converted into cruisers and armed with 6-inch guns. The United States, on the other hand, has only 188,000 tons of such ships.

It has been my purpose, by these statements of the comparative strength of the Navy of the United States and that of Great Britain, to demonstrate the fact that your committee was inspired in submitting this bill for 15 additional criusers and 1 aircraft carrier by no spirit of rivalry or desire to enter into competition with Great Britain or any other power. It has, however, been influenced by a desire to give the United States a Navy sufficient only to safeguard the integrity of our country, secure ourselves against hostile attacks, and protect our great commerce. It will be seen that no effort has been made to equal the tonnage strength of Great Britain in cruisers and in aircraft carriers, and when we seem to have a preponderance of strength in other auxiliary craft there has been a refusal to give further authorization for appropriations. Members will do well to bear in mind that we have a great and world-wide commerce which is worth protecting, but aside from this we possess great treasures—not merely great wealth, but an industrial and political life which must be preserved. These alone are worth guarding, but their loss would be trivial compared with the infinitely greater disaster—the destruction of our American institutions, the forcible submergence of our American ideals and beliefs.

But if we are to view our naval strength as our security against the interference with and destruction of our world-wide commerce, then sight must not be lost of the fact that our sea-borne commerce, exports and imports, amounts to about $8,500,000,000 yearly, and our coastwise ocean traffic, exclusive of traffic on the Great Lakes, is valued at $5,600,000,000, or a

total of $14,100,000,000, while the foreign trade of Great Britain is valued at $15,000,000,000. And when we consider the cost of this building program of $274,000,000, spread over a period of six years, do not overlook the fact that this will not be money lost to the people of these United States, because it goes back into the channels of commerce, since over 147 separate industries participate in the construction of a cruiser.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. VINSON of Georgia. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. O'CONNOR of Louisiana. Will the gentleman yield?

Mr. GAMBRILL. Certainly.

Mr. O'CONNOR of Louisiana. The argument is frequently made that inasmuch as most of our commerce is carried in foreign bottoms that a navy is unnecessary, because that commerce would be free from seizure. Is there anything in that legal argument? On the other hand, would not that commerce be subject to seizure by an enemy at war with us? Of course, it would have to be an enemy to be at war with us; but would not our commerce in foreign bottoms be subject to seizure if declared contraband by an enemy?

Mr. GAMBRILL. I think that is unquestionably true; and it is to be borne in mind that our coastwise commerce amounts every year to about $5,800,000,000, which, of course, would be subject to seizure at any time. But if the gentleman from Louisiana will excuse me, there is one subject which I want to dwell upon before I conclude, and it is this—

It may be contended by some that this authorization should be deferred until 1931 in the expectation that at the reconvening of the Washington Conference on the Limitation of Armament an agreement might be reached applicable to all auxiliary vessels, so as to keep the tonnage of cruisers below 300,000 tons, which will be our tonnage strength in cruisers if this bill becomes a law and the cruisers authorized are completed by 1935.

To entertain such an idea is to disregard the claims of Great Britain and her delegates and naval experts at the Geneva conference that, independent of the naval program of any other power, she needed a cruiser strength of about 450,000 tons. And to hold such a hope one must disregard the pronouncements of responsible officers of the cabinet of Great Britain that no solemn agreement binding her to a mathematical parity with any other country in auxiliary craft could be considered.

It is well to recall that the fundamental idea which inspired the President of the United States to invite the signatories to the Washington conference to meet at Geneva in 1927 was to secure, if possible, a limitation of tonnage on auxiliary craft on the basis of the 5–5–3 ratio. In the initial stages of the negotiations at Geneva the representatives of Great Britain, Japan, and the United States agreed, in principle at least, to a mathematical parity in auxiliary vessels on a basis of 5–5–3.

It is quite evident that when this concession by the representatives of Great Britain became known it caused dissatisfaction in the cabinet of Great Britain and her representatives were called home for consultation with the British cabinet, and on their return to Geneva their attitude was reactionary to the original proposal. That there was a change of attitude on the part of the representatives of Great Britain at the Geneva conference is shown to be true in an illuminating address made by Viscount Cecil, one of the outstanding delegates at the Geneva conference. In a speech made in the House of Lords on November 16, 1927, he stated that before the convening of the Geneva conference there was a discussion in the committee of imperial defense as to the case that was to be laid before the conference, and the question was raised whether the representatives of Great Britain were to admit that the United States of America was entitled to equality in cruisers on the same basis as that which had been conceded in battleships. The representatives of Great Britain at the Geneva conference agreed, tentatively at least, to this equality as a basis for consideration of the proposal to be discussed.

According to Viscount Cecil, no sooner did this agreement for the principle of mathematical parity become known than Mr. Churchill, Chancellor of the Exchequer, began to impress on his colleagues in the cabinet—I am now using the language of Viscount Cecil—

> the necessity of avoiding the consequence of what he, Mr. Churchill, regarded as a disastrous concession.

A feeling which Mr. Churchill afterwards expressed in no unmistakable language in a speech made in Haslemere, England, August 6, 1927, in explanation of the attitude of the British cabinet on the doctrine of naval equality. He said:

> We are not able now—and I hope at no future time—to embody in a solemn international agreement any words which would bind us to the principles of mathematical parity in naval strength.

He concluded his speech with these significant words:

> I hope that when we say we should not be alarmed by the American cruiser program we shall not confine ourselves to biased sentiments, but will prove our confidence and composure by actions that speak louder than words.

But, reverting to the speech of Viscount Cecil, we are informed by him that no sooner had the representatives of Great Britain at Geneva agreed to the principles of mathematical parity when they—

> began to receive telegrams which seemed to indicate that the cabinet was dissatisfied.

A few days thereafter the representatives of Great Britain received a preemptory summons to return home, which left no alternate. Lord Cecil says:

> When we got home we found, as I have already intimated, that certain members of the cabinet strongly took the view, afterwards expressed in public by the chancellor of the exchequer, that it would have been most dangerous to have stated in the treaty that the Americans were entitled to mathematical parity in auxiliary vessels. These ministers clearly indicated that they preferred no agreement to one embodying that principle.

As a formal expression of the attitude of the British Government on this question of mathematical parity in auxiliary vessels, "statements" were read in the House of Commons on July 27, 1927, by Sir Austin Chamberlain, Secretary for Foreign Affairs, and in the House of Lords by the Marquis of Salisbury, which, in substance, were that—

> Anything resembling the quisi formula adopted at Washington for battleships is quite inapplicable to vessels designed for purposes which, not only may, but must, vary with the geographical and economic position of the several powers concerned.

This pronouncement, made while the Geneva conference was in progress, could not help but retard, if not destroy, the objective which was being sought.

Lest my reference to these events may be considered a criticism rather than a statement of facts, let me say that, after reading the proceedings of the Geneva conference and, after having heard the statements made before the Naval Affairs Committee by two of the distinguished representatives from the United States to that conference, I am disposed to agree that there was some justification for the criticism made by Viscount Cecil when he said that the representatives of the United States attached vital importance to the retention of the right to put 8-inch guns on any cruisers and—

> that the American attitude on this question seemed to me (him) to be entirely wrong and the reasons advanced for it quite unconvincing.

It is evident from what has been related that, even if an agreement can be reached at Washington on the vexed and difficult question of mathematical parity in auxiliary vessels, there is no danger of this country having a surplus strength in cruiser tonnage. And it is altogether unlikely that another conference will be called before the one to be held in Washington in 1931. Indeed, this would seem to be the attitude of the Chief Executive of this country and the Government of Great Britain.

I have in mind tha so recently as February 8, 1928, the distinguished Secretary for Foreign Affairs in the British cabinet, Sir Austin Chamberlain, dealt with this subject in his review of foreign relations. After expressing his regret at the failure of the Geneva conference to carry forward the work of the limitation of naval armament, he said:

> I do not think, and I do not believe that any other government thinks, that we would be well advised to take up that subject again at this moment.

I feel, therefore, that this orderly and noncompetitive program for the addition to the cruiser and aircraft strength of our Navy may be carried out without arousing concern in the cabinet of any power; that it will be accepted as our security from conflict, and as a just measure of defense and not one of aggression. [Applause.]

Mr. BUTLER. Mr. Chairman, I am going to consume a minute and ask my colleague a question. Is it not a fact that in all the search we made we could find no hope in the future that we would not need these ships, although there may be a conclusion reached bearing upon a limitation?

Mr. GAMBRILL. That is true.

Mr. BUTLER. In spite of any agreement we will always need these cruisers that are provided for?

Mr. GAMBRILL. We will always need the cruisers that are provided for; yes.

Mr. BUTLER. And it does not matter whether there is any agreement or not?

Mr. GAMBRILL. That also is true.

Mr. McCLINTIC. Mr. Chairman, the chairman of the committee has taken issue with me with respect to the statements I made concerning Admiral Hilary P. Jones. I want to read a statement from a naval officer who stands about as high—notwithstanding the fact that he is not from this country—as the ordinary naval officer here, and he is Lieutenant Commander Kenworthy, the statement having been made in the House of Commons. He says:

> You can not expect these naval experts, whether they are of high rank or of more modest rank, to do otherwise than use every effort they can to obtain more ships, more money, more dockyards, more seamen, bigger guns, larger equipment, and they would not be really worthy of their position unless they did.

So I am supporting the statement I made a few minutes ago when I spoke to the committee.

Further, in this connection, I want to say that Viscount Cecil, in his speech before the House of Lords, explained why the Geneva conference broke down and why he left the government. Briefly, he said, it broke down because of three reasons, the first of which was hostility of the Admiralty toward disarmament. Now, either Viscount Cecil did not know what he was talking about or he is not a square shooter; and he makes the same statement that a majority of the people who reside in this Nation now believe.

I want to say that under date of January 17, Admiral E. A. Taylor, retired, made this statement concerning the reasons there was no agreement at this disarmament conference:

> So preposterous and contrary to the spirit of the conference which the United States herself convened, that I only can assume that she had no intent of limiting our armaments, but that her policy was dictated solely by political considerations. America neither would say what she wanted in the number of ships nor why she wanted them.

Mr. BRITTEN. Will the gentleman yield for a question there?

Mr. McCLINTIC. In just a minute.

Either these gentlemen do not know what they are talking about or the statements I have made with respect to the attitude of naval officers is correct, and I am only reading this to show you that I am backed up, if you please, by authority which I consider to be very high.

Now, I wish to make a statement in regard to one other question. Some time ago I made the statement on this floor that England did not care if we built 100 cruisers, that she was of opinion that they would be of no particular use in time of war, and quoting from this same naval officer, he made this speech in the House of Parliament:

> The cruisers are practically useless against submarines. You can build as many 10,000-ton cruisers as you like, costing from $10,000,000 to $12,000,000 each, and they will be useless against submarines.

I called attention to the fact that England did not care how many cruisers we built, and quoting from an editorial published in the Nation and Athenæum, under date of August 13, the editorial states:

> Therefore we are not now able—and I trust at no future time—to embody in a solemn international agreement any words which would bind us to the principle of mathematical parity in naval strengths. But, in the name of common sense, why not, if it does not matter to us how many cruisers the Americans have.

Does not this prove my contention? Continuing further, in the Spectator, an old and conservative paper, it was stated on July 9, 1927:

> Probably America would not want to build up to our naval strength, as she would have no possible use for so many ships. Even if she did, no harm would have been done.

I am calling your attention to this to prove that the statements I made in a speech some time ago, in which I quoted the policy of England with respect to cruisers and submarines, is true.

I reserve the balance of my time, Mr. Chairman.

Mr. VINSON of Georgia. Mr. Chairman, I yield 15 minutes to the gentleman from Virginia [Mr. DREWRY]. [Applause.]

Mr. DREWRY. Mr. Chairman, in considering the present bill, which represents the sentiment of 20 out of 21 members of the Naval Affairs Committee, it seems to me that it would clear the atmosphere to some extent if the history of this proposed legislation be examined.

The present bill is not partisan, and properly so, for the defense of our country should not be considered from a partisan standpoint. There is very little of partisan politics in the Naval Affairs Committee, due largely to the conduct of its affairs by its chairman. I wish I had the time to pause here for an expression concerning him. Suffice it to say that the members of the committee love him and admire him because of his splendid qualities of head and heart, for his broad-minded humanitarianism, his sense of justice and fairness to his fellow men, his political integrity, and his deep and abiding patriotism. [Applause.]

The bill proposed by the Secretary of the Navy requested an authorization for the construction of 25 cruisers, 9 destroyer leaders, 32 submarines, and 5 aircraft carriers, to be laid down in five years, subject to the limitations of the 1923 treaty limiting naval armaments, and allowing the President to suspend the construction in his discretion—total cost of program, $740,000,000. This program was immediately attacked by certain organizations, and much propaganda was sent out by them, a great deal of which was misleading and inaccurate and untrue. The objections to the program were that the outlay was too large, that the program was competitive, and that it was provocative.

The committee considered the matter patiently from January 11, 1928, to the 3d of March, 1928—nearly two months—and then brought in its recommendations in the shape of the bill which is now before you. The committee bill requests an authorization for 15 cruisers and 1 aircraft carrier, to be laid down in three years, subject to treaty limitations, and allowing the President to suspend construction. The destroyer leaders were eliminated and so were the submarines. So this bill provides only 15 cruisers, where 25 were asked by the department, and 1 aircraff carrier instead of 5. Instead of a $740,000,000 program the committee comes to the Congress with a $274,000,000 program. This can not be called a big program, nor can the amount to be spent be looked upon as extravagant, when you consider that it is being spent for the most important matter before us—the proper defense of the country. [Applause.]

It will aid a great deal in considering whether this construction is unnecessary and against the interests of world peace, in my opinion, if we look into the efforts made by the United States for world peace in the past to see whether the United States has ever shown a tendency to militarism with aggressive intent. This country has been the foremost advocate of peace among the nations of the world from the earliest times and has always been opposed to large military establishments. I can only refer briefly as authority for these statements to the messages of our Presidents from 1790 down to the present time, especially Washington's address of December 7, 1796, in which he says:

> To secure respect to a neutral flag requires a naval force organized and ready to vindicate it from insult or aggression. This may even prevent the necessity of going to war by discouraging belligerent powers from committing such violations of the rights of the neutral party as may, first or last, leave no other option.

And in his messages of December 8, 1798, and December 3, 1799, John Adams said:

> In demonstrating by our conduct that we do not fear war for the necessary protection of our rights and honor we shall give no room to infer that we abandon the desire of peace. Efficient preparation for war can alone insure peace.
>
> A steady perseverance in a system of national defense commensurate with our resources and the situation of our country is an obvious dictate of wisdom, for nothing short of the power of repelling aggression will secure to our country a rational prospect of escaping the calamities of war or national degradation.

Also refer to the messages of Madison, Monroe, John Quincy Adams, Andrew Jackson, John Tyler, James K. Polk, Abraham Lincoln, Grant, Arthur, Cleveland, Harrison, McKinley, Roosevelt, Taft, and Wilson, in which the attitude of this country was held up before the world that world-wide peace was our ultimate object.

As the latest contribution to the subject, listen to the remarks of Mr. Hughes, a great American of ability and patriotism:

> This Government has taken the lead in securing the reduction of naval armament, but the Navy that we retain under the agreement should be maintained with efficient personnel and pride in the service. It is essential that we should maintain the relative naval strength of the United States. That, in my judgment, is the way to peace and security. It will be upon that basis that we would enter in future conferences or make agreements for limitation, and it would be folly to undermine our position.

The foremost thought, therefore, in the minds of our great Executives, as well as in the minds of the people of the country, has been that the United States is intensely desirous of world peace—that it has no intention of building up an Army and

Navy for any act of aggression, but that the country should have a Navy sufficient to protect and insure its own safety and the security of its people. In addition to these expressions and the above thought of the people of the country, the United States has taken part in every movement that has been intended to promote world peace.

Many years ago, the United States erected at the entrance of its Capitol the Peace Monument, that beautiful symbolic statue signifying to the world that forever before the eyes and in the minds of its legislators was the idea that the aftereffects of war were tears and sorrow—by the way, this statue was designed by an admiral of the Navy, Admiral Porter. With that before the lawmakers there was the hope that there would be no more wars, internal or abroad. The United States was looked upon by all the world as a peace-loving Nation. So it was, and after it had avenged the insults that provoked it into entering the last war, it turned all its energies toward securing the peace of the world. The great head of this great Nation was foremost in the scheme of inviting all the countries of the world into a pact that there would be no more wars. The whole war-wearied world was hopeful and looked to the United States for assistance and cooperation.

Woodrow Wilson proposed a League of Nations whereby there might be set up the machinery for settling all disputes that might arise between the nations. If this country had seen fit to ratify this plan, it is my opinion that we would have had no need for a large Navy. I think it is the best plan that has been proposed for the peace of the world, but it did not meet with the approval of the country.

When that failed, President Harding called a conference at Washington in 1922. The United States made a proposal at that conference which has been called an "Utopian gesture."

It proposed a 5-5-3 ratio with Great Britain and Japan, not only of capital ships but of the entire naval forces.

Mr. O'CONNOR of Louisiana. Will the gentleman yield?

Mr. DREWRY. I will yield to the gentleman.

Mr. O'CONNOR of Louisiana. I assume that the gentleman recognizes the fact that a considerable part of the exports of this country go out of Gulf ports—Galveston, New Orleans, and other ports through the Florida Strait and the Yucatan Channel. I am assuming that the gentleman knows that in the event of engaging in trans-Atlantic power that the battle would be fought in the Caribbean Sea, and the Gulf of Mexico. I am assuming that the gentleman knows that the island leading to the Atlantic entry to the Panama Canal is under the control of the trans-Atlantic power.

Mr. DREWRY. If the gentleman will allow me, the gentleman is assuming more than he should attempt to in my time.

Mr. O'CONNOR of Louisiana. The gentleman yielded to me for a question and I have stated the basis of my question. Does the gentleman think that if I am correct in my assumption that the Naval Establishment is adequate without this naval program?

Mr. DREWRY. I suppose not.

It must be borne in mind that at any conference the representatives of the United States can not propose or make an agreement that would admit any inferiority on its part. After the agreement is made, if the United States does not see fit to build up to its permitted strength, that is a matter for Congress to determine. Our country can not go into a conference and agree on paper to take an inferior position without lowering ourselves in the eyes of the world. The other nations refused to agree to the proposals of the United States, with the exception of perfecting an agreement as to the ratio of capital ships wherein at the time we were the strongest. In order that the conference might not be a failure, the United States agreed to this. This satisfied Great Britain, but Japan insisted that we should also relinquish our naval base in the Pacific, with the exception of Hawaii. Therein lies, to my mind, the difficulty that now confronts us. Not having a base in the Pacific nearer than Hawaii to the Philippines, it is necessary that we should build ships of a wide cruising radius, such as cruisers of a 10,000-ton strength. Great Britain, which has its naval bases closer than ours, does not need cruisers of such tonnage, for their cruising radius is not as great between their established bases. I think that the result of the Washington Conference was the greatest disaster this country has ever suffered in world diplomacy, and that all of our present troubles in getting further agreements for the limitation of armaments grow out of the position which resulted from that conference. We destroyed $300,000,000 worth of ships at a time when we had the peace of the world in our keeping and put ourselves on a competitive basis with Great Britain and Japan. No wonder the people of the country complain at the present program, when they realize that five or six years ago we destroyed $300,000,000 worth of ships, and then come back and ask within five years, for $740,000,000 to build more ships. The mind of the average man looks on this performance as an act of "sheer madness." He can not understand the situation at all. For the purpose of showing the relative strength of the United States, Great Britain, and Japan at the time of the Washington Conference I am inserting a table setting it forth:

Capital ships, destroyers, first line; light cruisers, first line; and aircraft carriers

(Prior to conference; i. e., December, 1921)

BUILT

	United States		British Empire		Japan

After the Washington conference, the United States continued to make efforts to limit naval armaments with reference to auxiliary ships, and participated in conferences at Geneva. After considerable discussion, during which time the other nations increased their navies and we permitted ours to deteriorate, the conference failed to agree last fall on further limitation of naval armaments. I have no criticism for the President and other sincere and earnest advocates of peace for saying that we should not build up our Navy while these conferences were being held. I did not agree with them, for I thought, and so stated on numerous occasions, publicly and otherwise, that no other nation in the world would agree to destroy its navy as we had done. There is no portion of the globe to-day that believes that we have reached such an era of good feeling among the nations of the world that a nation should not build military establishments sufficient to take care of itself if it should be attacked. So I am inserting at this place a comparative statement of the naval situation as it affects the three signatories to the Washington conference as of the present time, in order that it may be compared with the statement of similar purport at the time of the Washington conference:

Information as of October 1, 1927 (present situation)

[1] Including light mine layers.
[2] Completed since Oct. 1, 1927.
[3] Two of these of a total of 18,000 tons will not be laid down the Admiralty has announced.
[4] Converted from battle cruisers, battleships, or cruisers.

The conclusion is inevitable that we are lacking in a well-balanced and adequate Navy sufficient to protect our country and our people from insult and aggression.

Therefore after making such generous and open offers for the peace of the world, and showing our good faith by our acts, the conclusion was forced upon us that the other nations would not agree to our ideas. Only one thing remained, and that was to build our Navy to a point where it would take care of the country. The duty is upon Congress, having received the recommendations of the Executive, to see to it that the country shall not be defenseless.

In considering this bill I reached the same conclusion as the President, namely, that now our present naval policy should be to build as fast as possible a navy adequate to protect its trade and defend us from aggression. There is no question of whether it be a "big navy" or a "small navy"—such terms are relative and mean nothing. What this country wants, what I want, and what everyone wants, is a navy adequate for its needs. If that means 74 ships and $740,000,000 then it should be our purpose, within our ability with reference to other needs of the country, to build that number of ships; but we do not want to throw any money away, nor do we want to build up such a navy as would be a menace to weaker nations. Our idea is only to protect ourselves. I think we have vacillated enough—in fact, I believe the vacillating policy of the administration was the cause of the failure of the Geneva conference.

Mr. BLACK of New York. Will the gentleman yield?

Mr. DREWRY. I will.

Mr. BLACK of New York. In 1916 we authorized 9 submarines and we only have six. In 1924 we authorized 8 cruisers and to-day we have 2. Here we are authorizing 15 cruisers to undertake their construction in three years. What hope have we that we will get them, with the present attitude of the Appropriations Committee and the Bureau of the Budget? This bill does not mean anything unless it forces Congress and the President to construct the vessels.

Mr. DREWRY. I am trying to answer the gentleman's question. We can only start the 15 cruisers.

The administration has jumped back and forth on this question of naval construction, if the President has been correctly reported in the newspapers, to such an extent that I believe the confusion in the minds of the people is due largely to what the newspapers stated were his views on the subject. In December, 1926, after an interview of the President with Chairman Butler of the Naval Committee, the President was reported to advocate the construction of 10 cruisers. A few days afterwards, the country was given to understand by the "official spokesman" that the President was not in favor of building 10 cruisers, but merely favored their authorization. However, a month or two later, when the Navy bill was reported to the House, it contained no appropriation for cruisers, and it was stated that the President was opposed to building any. In less than two months after that statement the Congress passed the bill appropriating money for the beginning of work on three cruisers, and the President signed it. Last summer it was said that the Chief Executive blamed Congress for delaying the cruiser program, insisting that the appropriation for three cruisers interfered with his plan for building 10. About a month later Mr. Coolidge announced, according to the papers, that he was opposed to any naval program larger than was proposed at the Geneva conference, but in December, 1927, it was again stated that the President had approved the program of building 25 cruisers of 10,000 tons each. Then, in January, 1928, after he had previously criticised the agitation for a large Navy, he stated that he believed in building as fast as possible 25 cruisers; in other words, according to the bill originally introduced calling for a larger expansion of the Navy than the present bill. As I said above, while I do not criticize his honesty of purpose in changing his view so frequently, yet I do believe that this vacillating policy has been very confusing to the people of this country and possibly prevented other nations from agreeing with us on a limitation of armaments. It was natural that they would not agree to anything until they knew what our determined policy was to be. I am glad, however, that the President has finally reached the conclusion that we must build for our needs alone and with no idea of entering into competitive construction with others.

Great Britain would have agreed to a limitation, if she had thought it necessary to prevent us from increasing our Navy to a size commensurate with hers; but, she reasoned, why should she cut down her naval strength when the United States, apparently, was not going to keep up its Navy, as was indicated by remarks made on this floor and throughout the country on the subject.

The committee, therefore, was forced to the position of considering to what extent we should build up our Navy at this time to meet our needs without reference to any other power. The committee reached the conclusion that, owing to certain conditions, we could get along with 15 cruisers and one aircraft carrier. This is the minimum that Congress can do, in my opinion, and remain true to its duty to take care of our Naval Establishment. The committee eliminated the destroyers because 12 vessels have been authorized and no appropriation has yet been made for same, but the authorization has been directed and in the course of time the Appropriations Committee will take care of that situation. And another consideration which influenced the committee was that we are stronger in destroyers, as compared with other nations, than in any other type of ships.

Nor did the committee decide to build any submarines, for there are a great many experiments going on at this time with reference to this type of ship, and it was thought better to await the result of these experiments. In addition, three fleet submarines have already been authorized and no appropriation has been made therefor. As to aircraft carriers, a similar condition exists there with reference to experimentation as to size and construction, and it seemed wise to the committee to advocate the building of one aircraft carrier and not exhaust the limit of our tonnage under the Washington treaty, while the construction of this type of ships is so largely a matter of experiment.

This brings us, therefore, to the subject of cruisers. The department asked for 25, and the committee thought there should be at least 15 constructed. I have no desire to discuss the ratio between Great Britain and Japan and the United States with reference to their relative strength, for it is fully stated in the report on this bill, and my mind, at least, as said above, is not working with the idea of competing with any other nation but with the sole thought of building up our fleet as it is necessary for our needs. Neither Great Britain nor Japan could say we are engaging in competitive building, if the United States only built up to the 5–5–3 ratio, for this ratio has been accepted with regard to battleships, and in order for building to be competitive in auxiliary craft, only building beyond this ratio could be so considered. The present ratio in cruisers built and building is 1.4 for United States to 5 for Great Britain and 2.6 for Japan in numbers and 1.9 for United States to 5 for Great Britain and 2.6 for Japan. The United States would have to build 24 cruisers in order to equal what Great Britain now has, without reference to what she is preparing to build. Surely the building of 15 could not be called competitive.

	United States		British Empire		Japanese Empire	
	Number	Tonnage	Number	Tonnage	Number	Tonnage
Obsolete	22	164,100	None.	None.	11	73,025
Modern cruisers completed with guns less than 8-inch caliber	10	66,000	49	246,776	21	98,015
Modern cruisers completed with 8-inch guns	None.	None.	3	30,000	4	28,400
Modern 8-inch gun cruisers building	2	20,000	11	108,300	6	60,000
Modern 8-inch cruisers appropriated for but not laid down	6	60,000	None.	None.	2	20,000
Total modern 8-inch cruisers	8	80,000	14	138,300	12	108,400
Total modern cruisers of all calibers built and building	18	146,000	63	385,076	33	206,415
Ratios	1.4	1.9	5	5	2.6	2.6

It is, of course, necessary to study the use of cruisers with reference to capital ships, as evidenced by the best opinion of naval experts of other countries. Our own experts thought that we should have 28, as stated by Admiral Hughes. He thought that there should be a minimum of 15 cruisers for detached control tasks, such as the guarding of the Atlantic and Pacific coasts, the Panama Canal, and the naval base at Hawaii, and for guarding our commerce and patrolling the seas. Admiral Jellicoe, of the British Fleet, thinks that 5 cruisers are required for every 3 capital ships. I confess that I believe there should be more cruisers than we have provided for, but I am in accord with the bill of the committee. Let me impress with all the earnestness that I have, that in my opinion it is absolutely necessary that we have these 15 cruisers built without delay.

From the standpoint of our national requirements it is very important that we have light cruisers to balance our fleet. A great many factors enter into the use of cruisers, but to quote the Secretary of the Navy:

Speaking broadly, our lack of naval bases, requiring ships to fuel at the home bases, and therefore requiring them to carry a large amount

of fuel in order to perform their functions, involves a larger type of ships than Great Britain, for instance, needs with a large number of bases scattered all over the world. With that larger type of ship carrying its fuel, it is desirable to have the heavier armament, which can be carried on the larger type of ships, so that when it meets an enemy with less gun power it can command the situation. In a sense, a cruiser of smaller tonnage, with many bases, leaves on shore part of its tonnage. We have not that reserve tonnage, so to speak; consequently, we must have larger ships to carry the necessary fuel and supplies.

The other treaty powers—Great Britain, Japan, France, and Italy—after the conclusion of the Washington treaty, began the construction of cruisers of this type, but the United States lagged behind until 1924, when Congress authorized the construction of eight ships of the 10,000-ton class and made appropriations for the building of two of these ships. The fact that other nations recognized the importance of this type of ship and began to build immediately after the Washington treaty is conclusive, when taken into consideration with the advice of our own naval experts that we also should keep our Navy balanced with the construction of this class of ship.

These other nations did not consult us in their program with reference to cruisers, and there was no reason why they should. They built for their own needs, and no question was ever raised by anyone in this country, not even the pacifists, that they were doing anything in constructing these ships for their needs that was either competitive or provocative. Surely, then, we can not be charged in our program with any attempt at competition. We need these cruisers as a part of our fleet for the protection and better use of our capital ships, and for the protection of our merchant marine, and for the protection of our coastal trade routes and lines of communication. As said before, the building of 15 cruisers is not sufficient to protect our commerce entirely, but it is a conservative program of our actual needs.

The matter resolves itself into this question, Shall we have a navy adequate for our needs? There are some people who think we should not maintain any navy at all. I do not believe any Member of Congress holds such a view—certainly the people of the country do not wish to be defenseless, and it is the duty of Congress, placed upon it by the Constitution, "to provide and maintain a navy." To what extent shall we fulfill this duty? Here arises a wide variance of views. The Naval Affairs Committee thinks this bill proposes the immediate requirements. It reaches this conclusion after hard and persistent study of the question. The proposed construction is not open to the objection that the outlay is too large, for surely the amount to be expended each year is not too large for insurance of our safety; it is not competitive, for we are only considering our own needs without reference to other nations. Great Britain and every other nation is at liberty to carry out its plans for its national defense, and surely they can not resent our doing the same thing. No nation could reasonably be provoked that we are determining our own naval requirements just as they themselves are doing. This very understanding of liberty on the part of every nation to decide its own naval requirements will, in the end, probably cause the nations of the world to agree on the minimum requirements of each so that such construction will be the least possible burden on the people of their respective countries. If such avowed policy be accepted in good faith, as it should be made, then the maintenance of naval armaments will be noncompetitive and nonprovocative. [Applause.]

Mr. BUTLER. Mr. Chairman, before I move that the committee rise, I give notice that it may be necessary to ask for a little more time on general debate. I am merely throwing that hint out now to the House.

Mr. TILSON. That can be done to-morrow morning when we assemble, if need be.

Mr. BUTLER. No; I think we better wait until the general debate has proceeded for some time. Mr. Speaker, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. BACON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes, and had come to no resolution thereon.

RADIO

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 2317) continuing for one year the powers and authority of the Federal Radio Commission and agree to the conference asked by the Senate.

The SPEAKER. The gentleman from Maine asks unanimous consent to take from the Speaker's table the radio bill—S. 2317—and agree to the conference asked by the Senate. Is there objection?

Mr. CHINDBLOM. Has the Senate made any change, or just refused to concur?

Mr. WHITE of Maine. The Senate has refused to concur and has asked for a conference.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Mr. WHITE of Maine, Mr. LEHLBACH, Mr. FREE, Mr. DAVIS, Mr. BLAND of Virginia.

A SOLDIER AT THE THROTTLE—PATRIOTISM ON A LOCOMOTIVE

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD briefly in reference to the services of James E. Martin while a member of the expeditionary forces in France, serving with the Railway Transportation Corps as a locomotive engineer.

The SPEAKER. Is there objection?

There was no objection.

Mr. McSWAIN. Mr. Speaker, I have sought permission to extend my remarks in the RECORD concerning the services of my fellow townsman and friend, Mr. James E. Martin, of Greenville, S. C., in order that the records of his country may show the valuable service he rendered while a soldier in France and while detailed from his regular organization to operate a locomotive upon the railways of France. While so operating Mr. Martin was a part of the time in charge of the splendid train called "the Chaumont Special," and had the engine from Tours to Nevers.

On one occasion during the great drive in October, 1918, when there was great urgency to use every means of transporting men and supplies and munitions to the front, Mr. Martin was ordered to carry his train on toward the front about 175 kilometers beyond Nevers. Mr. Martin had never been over that route, and he used the same engine with which he had brought the train in from Tours. But there was no other engine at hand and no engineers that knew the road. So great was the confidence of his superior officers in the ability and good judgment of Mr. Martin in the handling of a train, even in a strange country where he did not know the language, and over a strange road that he had never traveled before, that they immediately ordered Mr. Martin to proceed with his train. The run consumed all of one night, as well as part of the previous day, and so much of the previous day as had been consumed by the run from Tours to Nevers. The result was that Mr. Martin was on his engine and at the throttle continuously for nearly 48 hours, covering all of two days and all of one night and part of another night.

This tends to show that not all the heroism was displayed at the front and under fire. It took patriotism and resolution and physical powers of endurance of a high order to stand what Engineer Martin endured. This adventure of his is in a certain way comparable even to that of Colonel Lindbergh in flying at night across the tractless ocean and continuing in flight actually for less than 10 hours than Mr. Martin was at the throttle of his locomotive.

Mr. Martin served as a private in the Spanish-American War, Company E, First South Carolina Volunteer Infantry. After that he was a fireman upon the Southern Railroad and later an engineer. When the United States entered the World War Mr. Martin was about 38 years old, and his aged mother and father were largely dependent upon him for support. However, so great was the patriotic urge that he immediately volunteered, and on June 2, 1917, was duly sworn in as a private in Company B, of what later became One hundred and seventeenth Engineers, under the command of Col. J. Monroe Johnson, of Marion, S. C. This organization left the United States in February, 1918, as a part of the Forty-second Division, and from then on saw exceedingly active and aggressive service upon several sectors. Due to the lack of trained engineers, Mr. Martin was detailed from his organization and transferred to the Railway Transportation Corps in June, 1918, and immediately proceeded to become prepared by the study of the rules and signals of French railways to operate a locomotive upon those roads. Accordingly, on July 2, 1918, he was certified by the French inspector as qualified, as will appear by the following certificate:

Chemin de Fer de Paris a Orléans Service du Matériel & de la Traction.
Procès-Verbal d'examen technique et d'essais pratiques pour l'emploi de mécanicien

Les membres du jury soussignés ont interrogé le (1) Mécanicien, (2) Martin James.

Il déclarent que cet agent connaît bien les signaux, les règlements sur la circulation des trains, ainsi que les instructions et ordres de service qui s'y rattachent.

Il est au courant du montage et du démontage des principales pièces de la machine et du tender et du fonctionnement de tous les organes et des divers freins en usage sur le réseau et est en état de remédier aux avaries de route.

Cet agent a conduit d'une manière satisfaisante pour faire le service de mécanicien sur les lignes de Tours a Vierzon.

Tours, le juillet, 1918.

(Signed) A. DURAND,
L'Inspection de la Traction.
(Signed) S. LIEUB,
Le Chef Mécanicien.

(1) Titre.
(2) Nom Prénom.
[*Nota:* Ce procès-verbal devra être présenté par le titulaire à toute réquisition.]

So well did Mr. Martin conduct himself as a soldier and as an engineer that Lieut. John Logan Strong, on October 29, 1918, voluntarily signed the following memorandum in commendation of the skillful service and patriotic nature of Mr. Martin, as will appear by the following copy of that recommendation:

AMERICAN EXPEDITIONARY FORCES,
TRANSPORTATION SERVICE,
OFFICE OF TRAIN MASTER, T. S.,
St. Pierre des Corps, October 29, 1918.

From: Lieut. J. L. Strong, train master, St. Pierre des Corps.
To: Captain McVey, master mechanic, St. Pierre des Corps.
Subject: Conduct of Engineer Martin on T–C train.

1. Engineer Martin, who is one of the assigned engineers on "T–C" and "C–T" trains, spoke to me to-day about a misunderstanding which occurred between himself and mechanical department at Vierzon a day or two ago. Martin feels very badly on account of having been notified to report to Captain Smith, commanding officer, as he feels that he has done his duty and obeyed orders in all cases.

2. This man attracted my attention soon after my arrival at St. Pierre des Corps last August, while standing on a freight train in St. Pierre des Corps yard awaiting clear signal from Sous Chef de Gare. His fireman wanted to go eat; Engineer Martin told his fireman that it had not been but a few hours since he, the fireman, had eaten and that a signal to move was liable to be given at any minute and when given he wanted to be ready to go; he also reminded his fireman that he was not railroading in the United States and that trains could only move when French gave them the signal, and that no opportunity to move must be lost. I am quite sure neither Engineer Martin nor his fireman knew that I was listening to their conversation. I have noticed Engineer Martin's work ever since I heard the conversation referred to above and have never seen him miss a chance to go when signal was given, have never seen him out of humor, and when I have asked him for information he has always answered me in a gentlemanly manner.

3. Since American engineers have been assigned to "T–C" train, a number of engineers furnished for this train were unable to get air into train line, trouble being in engine, and they could not find it, saying they did not understand French air, making it necessary to call on French for a man or on Captain McVey. I want to say that we never have this trouble with Engineer Martin. If there is any trouble with air or steam heat when Martin is on engine, if there is any trouble when air or steam heat is coupled, he has always found the trouble and remedied it very quickly.

4. I wish to say, in conclusion, that this man has proven to me that he is a patriotic American citizen and realizes what he came over here for, and I feel that it is the duty of commissioned officers to stand by such men and see that they are fairly dealt with. Will you kindly listen to this man's statement relative to Vierzon trouble and see Captain Smith in his behalf, as I am convinced Martin has been unjustly treated.

J. L. STRONG,
Second Lieutenant, Engineers, U. S. Army, Train Master.

Thereafter, on April 14, 1921, Lieutenant Strong, while in the employ of the United States Railroad Administration, prepared and delivered to Mr. Martin the following testimonial of his valuable services in France:

APRIL 14, 1921.

To whom it may concern:

During the year 1918 James E. Martin served as a locomotive engineer on the Touraine division of the Paris-Orleans Railway (France), American military operation, and on the district of which I was trainmaster (T. S.) at that time.

He was one of the most able locomotive engineers that served on my district. His skill and excellent judgment caused him to be selected to drive the most important train.

In addition to being an able locomotive engineer, he was an excellent soldier, one who never questioned an order. His devout patriotism and his unceasing ability to perform the work assigned to him was of such a nature that he imbibed the enlisted personnel with the same spirit, thereby increasing the high morale of the organization.

I can unhesitatingly recommend this man to anyone requiring the services of a man of his qualifications.

JOHN LOGAN STRONG,
Second Lieutenant, Engineers, U. S. A.,
Train Master.

Mr. Martin was returned to the United States as a casual, having been evacuated through several hospitals where he was treated for influenza and the aftereffects of gas and general debility resulting from overstrain and exposure. Upon his discharge from the hospital in February, 1919, while in Washington, he called upon former Senator N. B. Dial and former Representative Samuel J. Nicholls, both of South Carolina, and as the result of his visit the special correspondent of the Columbia (S. C.) State, Mr. Patillo H. McGowan, sent the following dispatch, which was published in said newspaper:

SOUTH CAROLINIAN HANDLED ENGINE ON WELL-KNOWN TOURS-CHAUMONT "EXPRESS"

(Special to the State)

WASHINGTON, February 20.—Senator Dial and Representative Nicholls have been called on at their offices lately by a constituent, James E. Martin, who had some rather unusual experiences overseas, after having been severely gassed near Luneville while serving with the One hundred and seventeenth Engineers of the Rainbow Division.

Mr. Martin, on leaving the hospital, was physically disqualified for further duty with his regiment, but having been a locomotive engineer on the Southern Railway at home, was assigned as engineman to the "American Special" when that famous train between Chaumont and Tours was established. It was while on this assignment, in the latter part of September or early in October, 1918, that he performed the stunt which brought him considerable attention at the time.

An unusually large party of important officers and civilian dignitaries, filling 13 coaches, was making the rounds of the service of supply drawn by Jim Martin's big American locomotive, No. 5897, a Schenectady built passenger speedster of the type known in the service as "Mikes." Martin picked up the train at St. Pierre des Corps and all went well until just before he reached Vierzon, when his throttle somehow became disconnected. There was neither time nor opportunity for making a repair and Martin somehow handled the big engine with its long train from Vierzon to Nevers, about 150 kilometers, with throttle wide open, controlling the train entirely by manipulating his airbrakes and his reverse lever. It was necessary, on reaching the end of the run, to "kill" the locomotive, by exhausting the steam, before it could be uncoupled and run into a siding. Martin meanwhile kept his own counsel and it was not until they reached Nevers that his distinguished passengers knew under what circumstances they had been whirled across France. Fireman Monroe of Greenville was Martin's "buddy" on this trip.

P. H. McG.

THE "S–4"

Mr. BLACK of New York. Mr. Speaker, I am wondering whether it would be in order to ask any of the House conferees on the *S–4* investigation when they may come in with a report?

The SPEAKER. By unanimous consent the gentleman may be permitted to do such a thing.

Mr. BLACK of New York. Mr. Speaker, I ask unanimous consent to ask of any of the conferees who may be present, and I see one, whether or not the House may have any hope in the near future of being presented with any kind of a report of the *S–4* investigation?

Mr. CHINDBLOM. I doubt if any of the Members of the House can consent to his making the inquiry. We can give consent to his addressing the House.

Mr. BLACK of New York. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

Mr. SNELL. Mr. Speaker, I shall have to object to that.

Mr. TILSON. It would not take all of two minutes to ask the question, and I shall have to object to the gentleman's request.

Mr. GARRETT of Tennessee. The gentleman has not figured on the time that it may take to answer the question.

The SPEAKER. Is there objection to the request of the gentleman from New York to proceed for two minutes?

Mr. BLACK of New York. And I would yield one minute of my time to the gentleman from New York [Mr. SNELL].

Mr. TILSON. Mr. Speaker, I have not consented to the gentleman's request.

Mr. BLACK of New York. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection?

Mr. SNELL. I object.

LEAVE TO ADDRESS THE HOUSE

Mr. STRONG of Kansas. Mr. Speaker, I ask unanimous consent that when the House has completed its consideration of the Navy bill I may address the House for 20 minutes.

Mr. TILSON. On what subject?

Mr. STRONG of Kansas. On a bill which I have introduced, and on which hearings will be held next Monday by the Committee on Banking and Currency, on the powers held by the Federal reserve system that may be used for the stabilization of the purchasing power of the dollar.

The SPEAKER. The Chair is informed that there are several special orders now pending on different dates. The gentleman's request might conflict with some of these orders. The Chair suggests that the gentleman modify his request with the provision that there be no special order to interfere with it.

Mr. STRONG of Kansas. I so modify my request.

The SPEAKER. Is there objection?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. WAINWRIGHT for March 14 account of urgent family reasons.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 5 o'clock and 10 minutes p. m.) the House adjourned until to-morrow, Wednesday, March 14, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Wednesday, March 14, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

Legislative appropriation bill.

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To safeguard national defense; to authorize, in the aid of agriculture, research, experiments, and demonstration in methods of manufacture and production of nitrates and ingredients comprising concentrated fertilizer and its use on farms (H. R. 10028).

COMMITTEE ON MINES AND MINING

(10 a. m.)

To amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, approved March 2, 1919, as amended" (S. 1347).

COMMITTEE ON PUBLIC BUILDINGS AND GROUNDS

(10.30 a. m.)

For the lease of land and the erection of a post office at Philippi, W. Va. (H. R. 10799).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

406. A letter from the Secretary of the Navy, transmitting suggested form of bill for the relief of Marie Rose Jean Babtiste, Marius Francois, and Regina Lexima, all natives of Haiti; to the Committee on Foreign Affairs.

407. A letter from the general secretary of Near East Relief, transmitting report of the Near East Relief for the year ending December 31, 1927; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. HOUSTON of Hawaii: Committee on Military Affairs. H. R. 11809. A bill to authorize an appropriation to complete the purchase of real estate in Hawaii; with amendment (Rept. No. 892). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. J. Res. 200. A joint resolution to amend section 10 of the act entitled "An act to establish the upper Mississippi River wild life and fish refuge," approved June 7, 1924; without amendment (Rept. No. 893). Referred to the Committee of the Whole House on the state of the Union.

Mr. GREEN of Iowa: Committee on Ways and Means. H. J. Res. 217. A joint resolution providing for the remission of duties on certain cattle which have crossed the boundary line into foreign countries; with amendment (Rept. No. 894). Referred to the Committee of the Whole House on the state of the Union.

Mr. JAMES: Committee on Military Affairs. H. R. 9144. A bill to provide for the conveyance of certain lands in the State of Wisconsin for State park purposes; without amendment (Rept. No. 895). Referred to the Committee of the Whole House on the state of the Union.

Mr. ROWBOTTOM: Committee on Labor. H. R. 7729. A bill to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases; with amendment (Rept. No. 897). Referred to the House Calendar.

Mr. LEAVITT: Committee on the Public Lands. H. R. 15. A bill authorizing an appropriation to enable the Secretary of the Interior to carry out the provisions of the act of May 26, 1926 (44 Stat. L., p. 655), to make additions to the Absaroka and Gallatin National Forests, and to improve and extend the winter-feed facilities of the elk, antelope, and other game animals of Yellowstone National Park and adjacent land; without amendment (Rept. No. 898). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GLYNN: Committee on Military Affairs. H. R. 9213. A bill granting relief to the widow of Albert F. Smith; without amendment (Rept. No. 891). Referred to the Committee of the Whole House.

Mr. RANSLEY: Committee on Military Affairs. H. R. 4108. A bill to correct the military record of Alfred G. V. Meldahl; without amendment (Rept. No. 896). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 4075) for the relief of Commander U. R. Webb, United States Navy, and others; Committee on Claims discharged, and referred to the Committee on Naval Affairs.
